Report of The Canada Copper Corporation, Ltd.

The Gazette is fortunate to be able to present the following report from the pen of E. Jacobs, of Victoria, one of the most experienced and authentic writers on mining affairs in Canada.

The following information has been taken from the annual report of the Canada Copper Corporation, Ltd., and its operating company, the British Columbia Copper Co., Ltd., both of New York City, for the year 1915:

Exerpt from the report of the president of the Canada Copper Corporation.

"The exhaustion of the ore deposits adjacent to Greenwood, Boundary district, was foreseen some years ago when options were secured on the properties at Copper Mountain, Similkameen, and satisfactory progress has since been made in developing ore at the latter. As of December 31, 1914, there had been disclosed 6,200,000 tons of reasonably assured and probable ore averaging 1.82 per cent. copper and in addition to this, some 750,000 tons of 1.54 per cent. copper ore.

"As of December 31, 1915, it is estimated that there are 9,075,000 tons of reasonably assured ore and 2,000,000 tons of probable ore of on average grade of 1.75 per cent. copper and 20c a ton recoverable value in gold and and silver, the average value of both classes of ore being the same. It will there for be seen that the estimate for assured and probable ore reserves has been increased approximately 60 per cent, within the year.

"In connection with the program for installing the proposed concentrating plant at Copper Mountain, it has been decided to proceed forthwith with an underground delopment campaign which will not only serve to confirm the diamond drilling already done but will also be of a permanent character looking to the eventual extraction of the ores. A tunnel will be started of sufficient size to allow of handling through it a large tonnage of ore; it will be driven at an elevation which will serve the upper horizon of ore. The shaft on the Sunset claim will be deepened sufficiently, to connect with this tunnel, and, in addition, drifts and crosscuts will be run to block out the ore.

"Steps have already been taken looking to the purchase of the necessary equipment to proceed with this work, and it is expected that the tunnel, which will approximately 2000 ft. in length, will be completed in less than six months from date of commencement; it will be started as soon as the equipment can be installed. To cover the expense of this work, arrangements have been concluded with bankers, whereby the sum of $400,000 is available for the purpose, this money having been borrowed by the Canada Copper Corporation for a period of two years, bearing 6 per cent. interest. In order that financial arrangements could be made, it became necessary to retire, as far as possible, the company's outstanding debentures, and upward of 87½ per cent. of the $600,000 original issue has thus far been converted into stock under the plan as set forth in the circular to debenture holders bearing date November 16 1915."

The report of the general manager of the operating company includes particulars, as follows:

The mines and smelting plant were inoperative during the first six months of the year. In June, preparation was made to partially resume mining and smelting operations. On July 26, 1915, one furnace was blown in. Thence to the end of the year both mining and smelting were carried on continuously.

Mother Lode Mine Greenwood B. C. work preparatory to resumption of mining was commenced on June 15. Ore shipments to end of year totalled 105,085 tons, dry weight. Average grade of ore was: Gold 0.037 oz. and silver 0.21 oz. a ton, and copper 0.8746 per cent.

A rock fall cut off the ore supply from the quarry; most of the ore shipped was stoped underground from territory south of the quarry. Ore was brought up to a commercial grade by hand sorting.

Development Work done comprised drifting and crosscutting 433 ft. and raising 666 ft., and diamond drilling totalled 711 ft. No new orebodies were found; drilling is being continued with the hope of finding new shoots of ore.

Operating expenses compare favorably with those of 1914. The cost of new constuction, also the expense of putting the mine in shape for production, has been charged to operating expense, bringing cost up to $0.8437 per ton f. o. b. railway cars at the mine. The freight to the smelting works was $0.1245 a ton, making a total of $0.9682 per ton of ore delivered at the smeltery.

The quanity of ore remained in the Mother Lode mine is difficult to calculate; it amounts to possibly 50,000 tons. With present high price for copper, 50.000 tons could be sorted out from mixed ore and waste in the quarry. The total ore reserve, under present conditions, is therefore 100,000 tons. This means rather more than five months' operation unless new ore, at present unknown, shall be discovered.

Lone Star Mine, Washington,—Ore shipped from this property in 1915 amounted to 6510 tons, dry weight; it averaged gold 0.032 oz. and silver 0.193 oz. a ton, and copper 2.60 per cent. Development work consisted of 697 ft. of drifting and raising. A sorting belt was put in; of the material passed over this belt, 14 per cent was rejected as waste. Available and probable ore is estimated at 170,000 tons, with a good prospect of this reserve being increased by development work. The average copper tenor of the ore in reserve is 1.60 per cent.

Napoleon Mine, Washington,—No ore was shipped in 1915 from this mine, but preparations were made in December to put it in shape for early operations, the need for extra sulphide ore at the smeltery at Greenwood having arisen.

Queen Victoria Mine, Near Nelson,—This mine was leased; lessees shipped to Greenwood in the latter part of year 754 tons dry weight, of ore that averaged 0.0037 oz. gold and 0.77 oz. silver a ton, and 2.28 per cent copper.

Emma Mine Near Eholt, B. C.—This mine has been idle since destruction by fire in February, 1912, of head frame and hoisting plant. The ore not being suitable for smelting at Greenwood, it was decided to sell the mine which was unwatered for examination purposes. (The president reported sale early in 1916 for $55,000.

Smelting at Greenwood,—Supply of ore was insufficient only for operation of one blast furnace, which was run 158 furnace days. Total quantity of ore smelted was 122,514 tons, dry weight, of which 115,140 tons was ore from company's mines and 7374 tons customs ores. Actual amount of ore smelted per day was 775.4 tons, which work was performed by an average of 49.2 men per day at an average wage of $3.48 per day. There was produced 1869 tons of matte averaging 48 per cent copper The output of metals was: Copper (fine) 1,734,385 lb., silver 23,003 oz., gold 5417 oz.

Copper Mountain, Similkameen,—Work at this property consisted principally of diamond-drilling and trenching. Extensive topograpeical surveys were made, with a view to outlining installation of surface equipment, etc, Commercial ore was found at greater depth than heretofore. drills having penetrated bodies of such ore at 900 ft. below the collar of the shaft of Sunset mine. The ore as developed to date is divided into two groups. One is the main ore occurrence, found along the strike of a system of intrusive dikes, principally on the Sunset, Vancouver, and Gardner claims while the other comprises ore bodies found on one side or other of the principal ore zone. Future developments may establish a connection between these ore bodies. (Note—See above for estimate of quantity of ore.

Conclusion—Attention is called to the fact that the profits from the Greenwood smelting plant for the five months of operations are largely due to the extraordinary high price of copper on account of the rapid depletion of the ore reserves in the company's mines in Greenwood district, the period of smelting activity there will be limited, unless a profitable custom-ore business shall be developed or new orebodies be found. The high price of metals has stimulated the mining industry, and it is not unlikely the market for customs ores will further improve during the ensuing year.

Accounts—The B. C. Copper Co's Profit and Loss account shows operating disbursements, mining; smelting, refining and selling charges, general office and administration expenses—$366,172.38. and custom ores purchased $36,218.02; total $402,390.40. Proceeds of metals shipped were $466,599.50 and miscellaneous earnings $1824.77; total $468,424.27. The balance of profit for the operating period was $66,033.87, but there was general expenses incurred while the minesand smeltery were inoperative, and the minimum charges under the electric supply contract. together total $90,951.59, so that there was a net loss for the year of $24,917.72. The company's balance sheet shows liabilities to others than shareholders as follows: Accounts payable $277, 597.29, due to banks $99,894.28, due to Canada Copper Corporation (amount of mortgage) $460,000, and sundry liabilities $8,745.99; total $846,237.56. The assets include: Metals and smelter products and supplies $116,626.55, copper on hand and in transit to refinery $92,581.01, cash $17,776.20, and sundry debtors, etc.. $18,846.20, total $245,829.96. The valuation of the various mining and smelting properties is set down at $3,557,565.33 against which there is a capital stock liability of $2,958,545. The balance sheet of the B. C. Copper Co. shows a deficit of $1,387.27.

The Canada Copper Corporation's assets are: Investment in B. C. Copper Co. stock, $3,000,000; notes receivable, secured by mortgage, $460,000; mining property $13,554.84; cash in hand, $49,374.30, and sundries, $78,070.86; total $3,601,000.

L. Gillander, of Keremeos passed through town Saturday on his way to Copper Mountain, where he will work one of Innis' teams for the B. C. Copper Co.

On Sunday Homer Wells, of Princeton brought a load to town, consisting os K. C. Brown, J. A. McLellan, J. E. King. He returned home in the afternoon.

Private Dan Devane Writes to Hedley Friends

Headquarters, 102nd R. M. R.
Kamloops, B. C. April 15, 1916

To Mrs. Boyd, Sec. Hedley Ladies Sewing Circle.

Madame,

Parcel received for which thank "The Hedley Ladies Sewing Circle."

I have been transferred from Edgewood to here and expect soon to be transferred to the "Canadian Pioneer Battalion" at Victoria for the front.

The parcel has been to Edgewood but was forwarded on to me.

Again thanking the Hedley Ladies' Sewing Circle and the people of Hedley for their kindness to me I remain,

Yours Truly,
Pte. D. J. Devane, 102nd., R. M. R.

Vancouver, B. C. May 1st, 1916

Dear Andy,

I am going Overseas at last. I came here about a week ago transferred from the 102nd R. M. R. to the above and in about five or six weeks will be going to England.

The training in this will not be as hard as the other battalions, we will be used for digging trenches, etc.

I received a parcel from the Hedley Ladies Sewing Circle a short time ago for which thank them very much for me.

If any one from Hedley should be in Vancouver tell them to come and see me.

With best wishes to all in Hedley I remain,

Yours Truly,
D. J. Devane

TEN YEARS AGO

From the Hedley Gazette Files of May 3, 1903

Thos. Bradshaw has resumed work on his claims in Twenty Mile Canyon.

John Love is moving his drugstore across the street into Dr. Whillans' new building. Mr. Way will move the telephone.

The local lodge A. O. F. attended church on Sunday evening when a cermom was preached by Rev. L. Thomas.

The friends of Mr. and Mrs. W. J. Forbes were relieved to learn of their safety and interested in the experience which they had, as described in the Green Mountain notes of this issue.

The Indians have fixed up the fence between the town and Pinto's flats and made a good stout fix of it too. The result is that sundry bovines and nags look very longingly over the fence but cannot enter therein.

The Hedley Lumber Co. are looking up a gang of river drivers and expect to get their drive started early this year so as to take advantage of the higher water. In the new quarters which will enable them to get their logs out of mid stream they can handle logs on the river at a much higher stage of water.

Rev. A. H. Cameron who is in charge of the Presbyterian mission at Fairview and Keremeos, and has taken up his residence at the latter place, was in Hedley on Friday last. Mr. Cameron spent several years on the mission fields in Manitoba and the territories and last year was at Midway where he did good work and won the appreciation and respect of the people there.

(Where more than one claim appears in notice, $2.50 for each additional claim.)

A. B. S. STANLEY, Editor

Au Revoir!

In laying aside the pen to don the uniform of the King and take up the sword, we have nothing but the highest opinion of the town of Hedley and her people.

The beautiful little town nestling in the gulch of Twenty-Mile Creek, basking in the sunshine of the Similkameen, has before it a wonderful future of activity and enterprise.

Although feeling the stress of war times as much as any merchants anywhere in the Province of B. C., Hedley's business men are as enterprising and optimistic as any in this province of opportunities and big projects.

We desire to express our thanks and appreciation to them and to our readers and friends everywhere for their enthusiastic support during the months in which it has been our pleasure to steer the destinies of the Hedley Gazette. And when this world war will have become a matter of history, we hope to return to Hedley and mingle again with her people and resume again some form of commercial activity within the sound of that busy enterprise, the center of Hedley's attractions, the Daly Reduction Works.

The legislature of New Brunswick has adopted a resolution calling for conscription in Canada and delegations from quite a number of towns in Ontaria have visited Ottawa with the same idea in view. If the East had done as well as the west in proportion there would have been no need of conscription.—Victorian.

Berlin laughs over the contraversy with Washington concerning submarine outrages of last year or last month, while the submarines go cheerfully on adding to the list. Mr. Lansing keeps asking for assurances, and every time he asks he gets the practical assurance that the outrages continue and will go on. What possible sense is there in these dialectics? The one message to be affective would be fashioned after Comwell's letter: "If you do not cease British cannon will be heard in your capital."—News-Adertiser.

Recruits Wanted For First Canadian Pioneers

This regiment is now in France having moved across at the latter end of February, and is engaged in construction work. Before leaving England the regiment received a great supply of tools and equipment for railway and other work, and though fully trained and equipped as an Infantry Battalion it will be employed except on emergency, solely as a battalion of workmen. All descriptions of trades and occupations are represented in this Pioneer Battalion but those mostly in request are carpenters, linesmen, railway construction men, miners, loggers and the like. The general handy man is also a very useful member of the corps.

Towards the end of January recruiting for a reinforcing draft of three officers and one hundred men was started, the recruits however were not assembled until the middle of February and on the 5th. March they left Victoria en route for England where by this time they should have arrived, that is, the draft is in England within two months of starting recruiting.

A second draft of similar strength was authorized and recruiting for this has been so satisfactory that the draft is now up to strength and will be ready to embark within a couple of weeks.

A third draft is now starting and if recruits for this offer as readily as for the first two drafts it is expected that this third reinforcement will be ready to leave for England by the middle of May.

Men who wish to get away with the least possible delay and see a little of France before the summer is well through cannot do better than join the reinforcing draft now being assembled at the Old Drill Hall, Menzies St., Victoria, where recruits can apply in person. Those not in Victoria can apply by letter and recruits passed medically fit and approved will have their transportation sent them to enable them to join without expense.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres wi be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out y the applicant himself.

Each application must be accompanied by fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable mined and pay the royalty thereon. I coal mining rights are not being operated su returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or o any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

"Instruction by correspondence is the cheapest and best way for the poor man."—*Thos. A. Edison*

"Of Course They're Right"

You admit the International Correspondence Schools are a good thing. You'd take course right now "if"—"except"—

"If" what? If you weren't so "overworked," with such "long hours," or had more strength and energy? Didn't John Mitchell get his training after working 12 hours a day as a mine boy?

Wasn't it Edison who stayed up half the night to read every get-at-able book on electricity? Didn't he educate himself in spite of every handicap you could ever have? Spend as much time in I. C. S. study as you do in reading the newspapers and you'll get that promotion before you know it.

All big men who have made their mark in the world had the *ambition*—the *determination*—to improve their spare time, to train themselves for big work. You, too, can possess power, money and happiness if you'll only make the effort. The reward is great—it's worth it.

Here's all we ask: Merely mail this coupon. Put it up to us without paying or promising. Let us send you the details of others' success through the I. C. S., and then decide.

Mark the Coupon and Mail it Now

TOWN AND DISTRICT

There will be service in St. John's Church next Sunday at 8:00 p.m.

M. L. Gezon was a visitor to town Sunday.

J. Hossack was a Nickel Plate visitor in town yesterday.

Mr. and Mrs. L. S. Morrison of Nickel Plate were visitors to town Tuesday.

Joseph A. Haley, of Vancouver, was registered at the Great Northern Hotel Thursday.

Fred Johnson, Fred Ostrome, John Ostrom and Axel Lindgren left for Copper mountain Thursday.

If you owe the editor anything please see him this week before he leaves or pay the amount to Mrs. A. B. S. Stanley.

Rev. Stewart leaves today for his new field in the Moosejaw Presbytery. Who his successor will be has not been announced.

A few choice dahlia roots for sale after May 1st. Apply to A. Clare, Hedley, B. C. 19pd

Read all the ads.

Hand a dollar over to the Tobacco Fund.

Lorne Cousins, of Keremeos, was a visitor in town Saturday.

Mr. and Mrs. F. A. Howse motored to town Sunday accompanied by Mrs. Swanson, J. G. Potts and F. E. Haddon.

Neil MacLeod a former resident of Hedley is in the hospital at Shorncliffe having sustained a broken leg while training at that camp.

There will be a big celebration at Keremeos Center on May 24th. $500 in prizes of which $100 goes to a baseball game. Don't forget the date, May 24th.

L. C. Rolls has put up a fence from the door of the Post Office across the vacant lot and will have a small garden this season.

The hour of service in St. John's church has been changed, the services commencing at 8 o'clock instead of 7.30 as heretofore. This will continue during the summer months.

A limited amount of dahlia bulbs, show, cactus and decorator for sale, 35c each postpaid. Mail orders will receive prompt attention. S. E. Hamilton, Hedley, B. C. tf

The warm weather of the past few days is bringing down the water in greater volume and the debris is causing more or less trouble with the turbines at the lower power house. Logs also are running and a force is constantly on the watch at the dam.

Eddie Simpson is in receipt of a letter from Arthur Freeman. He is in splendid health, had seen Liddicoat, who was reported a prisoner, they are looking for some more heavy fighting. Charlie Saunders was also heard from, well and happy, sure of the ultimate defeat of the Bosches.

Read the ads.

B. C. Hay, of Vancouver, representing the Canadian Explosives, was doing business in Hedley Wednesday.

M. H. Parrott, the Penticton chauffer motored to town Monday bringing J. E. F. White and A. Durden.

W. T. Johnston, of Penticton, came in Saturday with F. W. Brown, of the Swift-Canadian Co., leaving later for Princeton.

The Sunday School teachers entertained at Mrs. Bowerman's, Monday for Mrs. Vance who left Tuesday to join her husband at Grand Forks.

Tools for sale, also garden tools, consisting of potato planter, hand cultivator, hoes, etc. cheap for cash. Mrs. A. B. S. Stanley, Hedley, B. C.

W. T. Butler is busy in his garden again. A. Winkler has some radishes up and they will soon be large enough to eat. Garden plots are beginning to show the effects of fine weather.

Mrs. A. Winkler and two youngest children left Thursday morning for a visit to her home near Edmonton. She expects to be away for at least a month.

W. E. Morphy, representing the J. & J. Taylor Safe Works came to Hedley Monday. Its a safe bet that a man is safe who saves his papers with a Taylor safe.

Father John arrived on Saturday's train, he held services in the hall Sunday morning, and at the Mission in the evening. He left on Tuesday's train, for Chopaca.

Geo. Riddle is in the act of building an auto garage 17x32, it will house his own car and take care of visitors who motor to town and want to leave their car in over night. W. Forbes is the builder.

Jack Budd, of Princeton is on the register of the Grand Union Hotel.

V. E. Johnson, a Kamloops miner arrived Tuesday and went up the hill to work.

A. Bibone, a Phoenix miner arrived Tuesday but left again yesterday for Copper Mountain.

Andy Winkler has bought a bicycle and is doing all kinds of fancy stunts on our leading thoroughfare.

Rev. A. H. Cameron, of Keremeos returned home Thursday, having spent a few days golfing and visiting with Mr. and Mrs. S. E. Hamilton.

C. E. Prior, our local assayer was a visitor to Princeton yesterday, going up by way of George Riddle's auto, a very popular route these days.

T. Peterson, Dave Wevy and A. Nicholson, a committee from the Miner's Union, were in town Monday to attend the meeting held in Fraser's Hall in the evening.

The water in the river is now raising at the rate of ten inches to a foot every twenty four hours and logs are running pretty freely but the Co's dam is taking care of everything beautifully.

Sidney Hall, who has the work of installing the plumbing in the addition to the school house, and who put in the furnace last fall, arrived Saturday to finish the work which was delayed awaiting supplies from England.

Notice!

As I leave in a few days for Victoria to enlist, all accounts owing to me should be paid to Mrs. A. B. S. Stanley, Hedley. Make money orders and cheques out in her name.

(Signed) A. B. S. Stanley

Wednesday evening of last week occurred the Sunday School entertainment in the Opera House. There was a large audience present and all came prepared to be entertained, in which expectation they were not disappointed. The chair was taken by Rev. R. G. Stewart, who in a few well-chosen remarks explained the object of the entertainment and then introduced the performers. The program was as follows: Chairman's Remarks, Rev. R. G. Stewart; Song by the School, Marching, Marching hear the Marching Feet; Cradle Song, 8 girls from Primary Room; "House That Jack Built," 13 children; Recitations, Primary Pupils; Instrumental Duett, Lena Wirth and Marguerite Luke; Song (motion), Up up in the Sky, Baby Class; Song Jesus Bids us Shine, Boys from Primary Class; Lily Motion Song 20 girls; Instrumental Duett, Lena Wirth and Marguerite Luke; Rainbow Drill, 16 girls; Song, String of Pearls, by Sunday Sch[illegible] Intermission; Comedy, 6 cups of [illegible]olate, 6 girls; God Save the King. T[illegible] program throughout was a great success. To specialize would be difficult because each had its own features of merit. Of course the first place belongs to the tiny tots who faced a large audience for the first time, perhaps. The motion songs and the rainbow drill were very good as were the instrumental duetts by Lena Wirth and Marguerite Luke. The Comedy in which appeared at intervals, the name of a certain young man of Hedley, brought down the house. The work of the girls was exceedingly good and a great credit to their teachers.

Production and Thrift

CANADA'S CALL FOR SERVICE AT HOME

Produce More and Save More

The Empire needs food. If you are not in the fighting line you may be in the producing line. Labour is limited—all the more reason to do more than ever before. Grow food for the men who are fighting for you. The Allies need all the food that you can produce. Every little helps. You are responsible for your own work. If you cannot produce as much as you would like, produce all you can. Work with the right spirit. Put fighting energy into your effort and produce now when it counts. The more you produce the more you can save. Producing and saving are war-service.

Make Your Labour Efficient

In war-time do not waste time and energy on unimportant and unprofitable work. Economize labour. Put off unproductive work till after the war, and, if possible, help in producing something needed now. Let us not waste labour. Canada needs it all. If possible help to feed the Allies. Make your backyard a productive garden. Cultivate it with a will. Make your labour count for as much as possible.

Do Not Waste Materials

There should be no waste in war-time. Canada could pay the annual interest on her war expenditure out of what we waste on our farms, in our factories, in our homes. Every pound of food saved from waste is as good as a pound of increased production. The way for a nation to save is for every individual to save. France is strong to-day because of thrift in time of peace. The men and women of Great Britain are not only "doing" but are learning to "do without."

Spend Your Money Wisely

Practise economy in the home by eliminating luxuries. Wasting our dollars here weakens our strength at the Front. Your savings will help Canada to finance the war. Save your money for the next Dominion War issue. There can be no better investment.

KEREMEOS

Schools opened again on Monday after the holidays.

Miss Helen Taylor returned to school at Penticton on Tuesday.

Dr. McEwen and friends of Hedley motored through town on Sunday.

Mr. Condit, of the Horn Silver mine was a business visitor to town on Thursday.

Mr. Oscar Lauchmond passed through Keremeos on Sunday on his way to Copper Mountain.

Mr. Oiser returned home from the coast on Saturday's train, after being absent for a week.

Mr. and Mrs. Frank French and family accompanied by friends, motored through Keremeos Sunday.

Rev. Mr. Cleland of Penticton preached a very impressive sermon to a large gathering on Sunday evening.

Mr. Hood and wife of Vancouver have arrived to take charge of Mr. W. H. Armstrong's conservatory.

Miss Sewell of Similkameen school returned home on Saturday after spending the holidays at Armstrong, B. C.

A large party gathered at the home of Mr. and Mrs. Taylor of South Keremeos on Thursday night and spent a delightful two hours.

The trees have been planted at the schools here and the children are delighted to think they are going to have such beautiful grounds. The beautifying of the grounds is being looked after by the Women's Institute.

Mr. and Mrs. Brown of Ashland, Oregon arrived by auto last week and will spend the summer in Olalla. Mr. Brown will spend the summer in Olalla Mr. Brown will have some work done on his mining property, the Daulphin. owned by himself and Mr. Gordon.

Germany's Warped Philosophy

The following, sent to us by a friend, appeared in the telegraph. of Hong Kong, China, on Tuesday, March 21st.

The German educational system has concealed in it a poison which warps the reasoning ability of all who come under its influence; its victims believe that evil deeds can produce or force good results. One such man "in other matters sane," when the Lusitania incident was referred to, expressed the hope that all the belligerents would make the war as "frightful" as possible. This man was not a German, but had received part of his education in Germany. He seemed to think that the more the nations and individuals in Europe allowed themselves to be controlled by unscrupulousness, hatred and brutality, the sooner war would be done away with, and was quite oblivious to the fact that these very qualities are themselves the cause of belligerency and will continue to incite to war so long as they are indulged in.

Sane people naturally expect evil thinking to produce and maintain evil conditions, and look for good only as the result of good. An honest man, even if confronted with evidence which seemed to prove that evil was the quickest and most effective means of accomplishing good, would not therefore resort to evil practices, but would bend all his energies to oppose such an illogical contention, and would prefer to stand by principle, though it entailed the surrender of every hope of material gain, rather than, under the banner of evil methods, to reap a disgraceful and unpalatable success at the sacrifice of all a man holds dear—his integrity and faith in right.

The doctrine that the end justifies the means is held by a varying percentage of people in all countries; the more unenlightened the nation, the more universally accepted is the doctrine. But it is strange to find in Germany, which has made so much progress along many lines in these latter years, an almost unanimous acceptance of this fallacy. In her educators, the men who have had the ear of the public through the press and the pulpit, and those who have had the training of the young in the schools, we must look for the cause of this state of mind. High moral teaching by men of lofty ideals bears fruit in a noble citizenship which values its own and its national honor above the petty advantages of worldly success, of pride, or power. Opposite teaching bears opposite fruit.

There has been a war party in Germany for many years, a party which has had the upper hand, which prepared guns and ammunition, and trained soldiers. But these three factors alone are not sufficent to enable a few men to lead a nation into war; something more is needed, and the present non-moral state of the German mind shows that the war party was also active in preparing and moulding public thought to suit its purposes.

A nation which has produced and accepted a Martin Luther, does not naturally embrace the doctrine that if the end seems desirable, any means are justifiable in obtaining it; nothing but the subtle suggestions of designing educators continued for a number of years could possibly accomplish such a result.

With this object lesson before them, it behoves the citizens of all countries to see that the teaching in their schools is pure. A nation's greatest enemy is the corruption within its own borders; its surest safeguard high-minded, truth loving educators."

Another Nebula Coming

The latest from the skies is that there is a big nebula coming in the direction of the earth at the rate of one hundred miles a second. If that nebula strikes us it will be like a ton of coal falling on a gnat. It will over-welm us and annihilate us. Its speed is more than three billion miles a year.

One might think at that rate it might soon reach us but it never will. It will veer off into endless space long before it would strike the earth. But think of the distance and its coming one hundred miles a second and never getting here, it is so far off. This fact gives one an idea of the bigness of the universe and the littleness of the earth, and to lead one in the ways of modesty and simplicity, where selfishness and unkindness are never tolerated and the rule of purity, honor and duty becomes the law of gravitation.—Ohio State Journal.

Where Are Your Interests

¶ Are they in this community?

¶ Are they among the people with whom you associate?

¶ Are they with the neighbors and friends with whom you do busi-business?

If so, you want to know what is happening in this community. You want to know the goings and comings of the people with whom you associate, the little news items of your neighbors and friends—now, don't you?

That is what this paper gives you in every issue. It is printed for that purpose. It represents your interests and the interests of this town. Is your name on our subscription lists? If not you owe it to yourself to see that it is put there. To do so

Will be to Your Interest

READ==

Then Think!

Now that you have commenced to read this article, just keep right on to the end, and then you will have absorbed meat of the cocoanut.

What has this town ever done for you¿ It has fed you, and clothed you, and housed you, and given you employment and kept the wolf from your door for these many years.

It has done more. It has furnished you recreation, and enjoyment, and has guided you safely over many of the stones that beset the pathway of life.

It has praised your good deeds and has thrown the mantle of charity over your questionable ones.

It has been, and is, YOUR HOME. But what have YOU done for the TOWN?

You are making you money here but where are you spending it?

Are your buying goods from the local dealer, who pays and otherwise contributes liberally to the upkeep of the community and your home, or are you sending your money away to some catalogue house that wonldn't lend you a five cent piece to save your soul from purgatory?

And now you have reached the point where we want you to stop and think, and think hard, and to a sane, sensible and patriotic purpose.
