Telegram from Head Office Sets Wheels in Motion

READY FOR CEMENT IN TEN DAYS

Work Resumes on the Similkameen Power Dam—Plenty of Help is Offering—All That Is Needed Is Favorable Weather.

The 17th was awaited in Hedley with more than ordinary interest, for it was understood that was the date the directors of the Hedley Gold Mining Company would meet to decide the two momentous questions "what" and "when".

These two questions were answered by the telegram received by W. A. McLean on Monday evening 17th inst which said:

"Directors have decided to instal power plant at once. Push it along.
G. P. Jones."

This of course bore no other interpretation to Mr. McLean than that the work to be pushed was the work he had left off on Saturday the 8th inst. of which he had sufficient detailed instructions to keep his crew going for some time. Fortunately he had much of the preliminary work done, with roads made to haul material on the ground and considerable of the excavation work for the dam itself dug in the portion of the river bed which is inundated in high water only; and fortunately also most of the men who had been laid off when the work was discontinued a week before, were still in camp and ready to go to work at an hour's notice.

In fact Mr. McLean has about all the help he needs and it would be a misfortune to have men in large numbers crowding in looking for employment when there is only a limited number can be employed to advantage. In cases of this kind absurd and exaggerated reports of the number to be employed often get spread through the country and men are led to crowd in where they are not needed.

Those around the hotels and lodging houses were told to be on hand early Tuesday morning and work was resumed with a good gang.

The dam which is to run diagonally across the river is to be 400 feet long, with the lower end about 200 feet below the mouth of Twenty-mile Creek. The excavation which has already been made has proven the beneficial effect of the slimes which have been discharging into the river from the mouth of Twenty-mile Creek since the stamp-mill started nearly ten years ago, for it renders the gravel and sands of the river bottom impervious to water and thereby adds a most important element to the strength and security of any dam constructed in the vicinity. Where the men were digging below this argillaceous mantle formed by the slime accumulations of nearly ten years run, it was found to be quite dry although lower than the bottom of the channel in which the water of the river was flowing a few feet distant. The importance of this fact may be readily seen and it is the intention after the dam is finished to allow slimes to run into the mill pond freely for a few weeks or months to supply the protecting impervious mantle to the gravel disturbed by excavation in the construction of the dam.

In about a week or ten days more they expect to be pouring cement in the construction of the dam and it is understood that a cement-mixing machine will be here in a few days.

The dam will be of re-inforced concrete and the re-inforcement is to be done by means of a net-work of inch thick wire cable of which there is an abundant supply on hand in the miles of discarded cable that has accumulated from the operation of the gravity tramway on which a new cable is placed about every nine or ten months or as often as the cable in use is found to exhibit the slightest effect of wear. It has always been the policy of the company to take no chances with their cables as there was too much at stake to allow one to be used to anything near the breaking point. Much of this discarded cable is now being cut up for use in the dam as re inforced concrete.

KETTLE VALLEY ROUTE

No Importance Attached To The Report In Coast Papers as to Contemplated Change in Route

In Penticton they regard the newspaper story to the effect that a new route was about to be selected to run from the neighborhood of Aspen Grove to the headwaters of Deep Creek and thence down that stream to the vicinity of Peachland, as a pipe dream emanating from some source where the writer of the story knew little about the lay of the land. Before the route up Trout Creek to Osprey Lake was decided upon the Peachland route was surveyed and carefully examined and found to be impracticable. Furthermore the grade has already been constructed on the greater part of the way to Osprey Lake and the tracklayer is at present laying the steel on it at the rate of over a mile a day.

The only uncertainty said to be existing at present is for the route west of Osprey. It is an undoubted fact that the route would be shortened materially by running direct from Osprey to Aspen Grove and if operating as a through line was the only consideration to be regarded that is the route it would take. But there are local interests in the Similkameen that the railway cannot afford to pass by, and furthermore they are under pledge to touch the Similkameen.

There are some who think, however, that the final solution of that part of the problem will be that there will be both the through line from Osprey to Aspen Grove and also a loop down Five Mile to Princeton and up the Tulameen to join on to the coast route farther on.

MAIL ORDER HOUSES BUY NEWSPAPERS

From The Dry Goods Review

The big departmental stores continue to extend their interests in or control of the daily newspapers in Toronto, Montreal, and Winnipeg. A large interest in, if not the control of, another Toronto daily has just been acquired. This makes three dailies in which these mail order houses are financially interested. In Montreal it came out in legal proceedings recently that one of the oldest daily papers there passed some months ago into the chief owner of a rising mail order house which aims to monopolize the trade into Eastern Canada. There are now nine dailies in Toronto, Winnipeg and Montreal, which are known to be owned, or controlled by, the big store and financial interests, and while posing as the mediums of public opinion are the organs of these interests. The trade of these houses has grown enormously in these cities where these dailies circulate, but in the other cities and smaller places where there are good local newspapers, they have not made the same gains, because the local newspapers are well edited and are loyal to their local merchants and refuse to carry the advertising of the big city store. The only way in which the big dailies can make headway is by cutting the prices. They get $3 to $5 a year in Montreal, Toronto and Winnipeg, but sell in other cities at 50c to $1 a year. This does not pay for the white paper on which these newspapers are printed, but the heavy deficits are made up by subsides through big advertising contracts and in other ways, and by the low postal rates. The merchants and newspapers outside of these three big centres should get together and insist that no newspaper should have the privilege of the mails which has a lower subscription price outside than in the centre in which it is published or which sells at less than cost of the paper used.

The Consolidated Mining and Smelting Co. have secured possession of the Coffee Creek air compressor at Ainsworth which is the only compressor of that type in the Dominion. Water is conveyed in a flume to the compressor and dropped 200 feet forcing compressed air into tanks from which it is drawn as required. The compressor will be used by the company to carry on its mining operations in the Ainsworth district.

PREMIER ADDRESSES CONSTITUENTS

Premier McBride Deals with Public Questions Dominion and Provincial

Victoria, Nov. 12.—A vigorous defence of the railroad policy of the government, supported by figures of the actual work of construction, and a stirring appeal for a broader outlook on the question of Imperial naval defence, were the features of an address made by Sir Richard McBride to an audience which filled every seat in the Kinemacolor Theatre here to to-night.

So great was the demand for admission that some time before the hour for opening the meeting it was found necessary to close the doors, and hundreds who arrived later were unable to gain admission.

The Premier received an ovation on entering the building, and cheering was renewed when, after a few introductory remarks by Mr. William Blakemore, the chairman, Mr. H. B. Thomson, M. P. P., and Dr. H. E. Young, Minister of Education, he rose to address the meeting.

FAITHFULLY CARRIED OUT.

"There has never been in the history of this country," said Sir Richard, "a railway policy that has been so faithfully carried out, and I challenge contradiction on this point. With regard to the Canadian Northern, we promised when we introduced that system to bring it to Vancouver, Victoria and through the Island, and by the first day of July, 1914, to have a great section of the road completed. "There has been a record made in railroad building in this province which no other part of the Dominion can equal. There are today 220 miles of steel laid on the Mainland, and grading and tracking is practically continuous on all the uncompleted sections from the tidewater on the Pacific to the eastern boundary of the province, with the exception of a small section.

REPLIES TO CRITICS.

To those critics who say that another transcontinental road was unnecessary I point out that the C. P. R., with its years of experience, is expending $40,000,000 in double tracking its lines in the West. Over thirty millions of dollars have already been spent on this untertaking and a great many millions have yet to be spent.

How does the last Liberal administration with its new trancontinental railway compare with the Provincial Government and the Canadian Northern? The national road has already cost ten times as much as the original estimate and the policy of favoring the Canadian Northern in other parts of the Dominion becomes a crime when applied to this province.

In addition to the Canadian Northern we have the Kettle Valley costing over twenty millions, which will be through in eighteen months.

5000 MEN EMPLOYED

On the Pacific Great Eastern 5000 men are at present employed, distributed over 170 miles, and next year trains will be running from Howe Sound to Lillooet, and the construction trains will be operating over the entire system. Mr. J. J. Hill of the V. V. & E. has completed arrangements for conquering the Coquihalla summit and in coinjunction with his American section he proposes making direct contact with Hope and Vancouver."

THE RAW FUR MARKET

Those of our readers who are interested in the raw fur business will find it to there advantage to keep in touch with the fur market. There is no better way for you to get this information and protect yourself than through the publication issued by A. B. Schubert, Chicago. "The Schubert Shipper" is sent to thousands of trappers and shippers of raw furs in the United States and Canada, and they would just as soon go without their traps or gun as to miss a copy of "The Shubert Shipper" when it is issued. It is not a magazine, it contains no advertisement whatever, and every word in it is good sound market news on every branch of the fur business. Write the above mentioned firm if you would like to have the fur news.

CONTRACTION IN WORLD'S TRADE

English Authority Says It Has been Almost Impossible to Obtain Capital

Sir George Paish, editor of the London Statist, is in America to ascertain how far the world conditions of credit are affecting and are likely to affect the prosperity of the American people.

To the Wall Street Journal, Sir George said: "After the long period of excellent credit in which the younger countries of the world have been able to borrow large sums of money for their development, there has been since the Balkan war began ever increasing difficulty in obtaining loans of capital needed to complete the great works under construction all over the world; and it has been impossable to obtain new capital for new work.

WILL CHECK TRADE.

"The result of this condition of things is great financial stringency in all countries, and a severe check has been given to the general prosperity and to the great activity of trade.

Having regard to the difficulties experienced by borrowers everywhere, it is obvious that efforts must be concentrated on completing work already commenced and that no fresh work will be begun until after capital and banking money become more plentiful. Consequently somewhat severe contraction will go will depend upon two or three countries, more particularly the United States, France and England.

IS TO VISIT CANADA.

"My present visit to this country is for the purpose of ascertaining how far the conditions in the United States make for the maintenance of world prosperity, or rather how far they will contribute to prevent extreme trade depression the world over."

Sir George purposes travelling extensively, visiting the more important cities in the United States and Canada.—Monetary Times.

FARMING IN OKANAGAN

Fruit and Other Farm Products Now Reach Colossal Sums

One hundred and thirty carloads of fruit and produce were shipped from the Okanagan Valley during the week ending Nov. 4th, according to figures compiled for the Vernon News by C. P. R. freight agents. These shipments brings the total for the year, in carload lots only, to 1583, which, at a conservative valuation of $750 a car, represents an export value of $1,187,250. Shipments reported for the week and year are as follows:

	Week	Year
Vernon	42	465
Okanagan Landing	41	463
Armstrong	40	325
Enderby	6	325

In addition to the six cars of produce noted above, Enderby shipped out 17 carloads of lumber and one of brick.

GETTING POINTERS

Mr. Pelletier Is Shown Over New York Office and Sees Parcels Post System

New York, Nov. 15—Hon. George E. Foster and Hon. L. P. Pelletier, with Mr. W. J. Gerald, president of the Canadian Club of Ottawa, who were here last night as the guests of the Canadian Club of this city, left to-night on their return trip home.

During the afternoon the Postmaster-General visited the General Post Office and various parcel stations throughout the city where the postal authorities gave the Canadian official every opportunity to witness the working of the parcels post system which has proved such an enormous addition to the work of the department.

Mr. Pelletier expressed his conviction that the system which will be inaugurated in Canada at the beginning of 1914 will prove as great a boom to Canada as the system now in vogue in this country has proved itself.

The proprietors of the Commercial Hotel in Penticton have obtained a 21 year lease on coal lands near Ashcroft which have been declared by experts to have very valuable deposits of coal.

EDITORIAL COMMENTS

The visit of the editor of the London Statist to the United States and Canada and the interviews he has given out as shown in another column makes some of the speeches of Sir Wilfrid Laurier in the recent bye-elections read rather funny. This eminent financier and political economist can see in the present money stringency a world-wide trade depression effecting old lands as well as the newer countries, but Sir Wilfrid jauntily told the electors of Chateauguay and South Bruce that it was all due to his removal from the treasury benches. According to Sir Wilfrid the prosperity of the whole world depends upon keeping him in power in Canada, even if his ability as a financier is illustrated by the fact that the Grand Trunk Pacific has already cost the country in hard cash a sum which is ten times that which Sir Wilfrid told parliament it was going so cost ten years ago.

Those who may think that the days of martrydom for a cause are past should examine the case of Godfrei Langlois, editor and proprietor of Le Pays, a French paper published inth e city of Montreal. The Roman Catholic bishops of the Province of Quebec have issued an order to the various parishes in the province forbidding members of their flock from paying for, reading, or in any other way recognizing Langlois' paper. This ecclesiastical boycot of his paper practically spells ruin to the publisher of Le Pays. And what has been the man's offence which would call down upon him such serious punishment? Simply that he has carried on a propaganda in his newspaper and in the Legislature (for he is a member of the Legislative Assembly for that province,) demanding for the youth of his province a liberal education. The educational system in that province which by far the greater number of children in Quebec are dependent upon to fit them for the duties of after life and permit them to make their way in competition with the youth of other provinces, is far behind the times and places a cruel handicap upon those who have no better. This fact has been fully recognized by Langlois and all he asks is that the schools of the province be graded up to a standard somewhat approaching that in the other provinces. To do this he advocates state control of the schools such as we have in all the other provinces of the Dominion, and that of coure means that the Church must relinquish her control of schools, in which she has been shown to have fallen down so badly. To show the extent to which she has fallen short, Mr. Langlois has been investigating the curriculum and the textbooks in use in the schools and he has been able to show from these that the histories and geographies they have still teach that Canada is composed of two provinces known as Upper and Lower Canada and that some of the other dope which the pupils are asked to believe about their own country is not only what existed when Canada was made up of Upper and Lower Canada, but what it was about the time of the Treaty of Paris in 1763. The Bishops appear to have made a very great mistake in adopting the attitude towards Mr. Langlois which they have done.

LOCAL NEWS

The Gazette is indebted to Mr. Finlay Fraser for a photo from the architect's design of the "Fairy Village in the Clouds" at Glacier, B. C., where Foley, Welsh & Stewart are running the big tunnel for the C. P. R. This tunnel is to be 4.9 miles long at a point in the Selkirks where very deep snows prevail in the winter season that would bury up ordinary sized lodging houses for the men and cut off ingress or egress. So, to get rid of the difficulty and labor of eternally shovelling snow, with no room to get rid of it, the plan has been adopted of constructing the enormous bunk houses in two long rows of two-storey buildings with an elevated and roofed sidewalk which in this case would be more fittingly termed "centre-walk" between them and little bridges from this centre walk to the upper storey of the bunkhouses. There are three buildings 30x316, 36x270 and 44x144, the last mentioned being the boiler and power house. Of the second mentioned building 72 feet is 60 feet wide. The claim is made that it is the most comfortable and up-to date railway construction camp that has ever been seen in any country. It is not yet fully completed although parts of it have been occupied for a month or two.

Mr. Arthur Hickling of the Princeton Coal and Land Company writes to the Rossland Miner giving his experience in connection with the quarantine for small-pox. He was assured by the G.N.R. agent at Rossland that he would have no difficulty in getting into the Similkameen, but when he reached Nighthawk he was asked for a vaccination certificate "six months old or under" and had to spend the day there until the train returned in the evening when he went back to Oroville and was vaccinated there, because the certificate he held was six years old instead of six months. The points upon which he would like an explanation are as to why the agent at Rossland could not have told him before he left there, and also why the time had been shortened up to six months when it was generally understood that the effect of vaccination was to render one immune for seven years. The health officer who stipulated the period as six months can doubtless explain the reason for making it that recent, and the Great Northern will have to take the responsibility of failure to have their agents in other places posted when a regulation of that kind affecting public travel on their lines has been passed.

THE WEEK'S GOLF

Late and all as the season is and short as the days are which prevent those coming off shift at three o'clock from getting in a full round of the links there has been a lot of playing on the Hedley course.

Following the match won by Miss Jackson and A. Megraw from James and Martin on the stroke a hole handicap they played another match gam against Paddy Murray and S. E. Hamilton. This resulted in another win for them of two up and one to play.

A return match was asked by James and Martin with a modified handicap which was by consent agreed to be reduced to five strokes on each round. In this game the winners in the former two matches did not put up as good a game as usual and were beaten three up and one to play. But in the second round Miss Jackson played excellent golf, and but for a spurt on the part of the opponents and a slump that round in the play of her partner the result would have been held down to a tie at least. It was but another case of

"Which stood the storm when waves were rough,
Yet in the sunny hour fell off,
Like ships that have gone down at sea
When heaven was all tranquility."

METEOROLOGICAL.

The following are the readings showing temperature, etc., for the week ending Nov. 15, 1913:

MINING NOTES

The Dividend-Lakeview property on Kruger Mountain near Osoyoos is maintaining ore shipments weekly to the Grand Forks smelter. The ore is hauled by auto truck to Oroville and there shipped by the Great Northern.

Work has been commenced on the driving of a tunnel into the Snowshoe mine at Phoenix at a point considerably lower than previous operations at the property. After some years of extensive "glory hole" operations at the Snowshoe the Consolidated company ceased work at the property in 1912 and it was generally inferred that the Snowshoe was worked out. The present tunnel is being driven by the Granby company, it is stated, and the exploring of the Snowshoe at a depth is the intention.

Water Act and Amending Acts

Before the Board of Investigation

In the Matter of Alder Creek, Arawana Creek, Beaneage Creek, Beaver Creek, Beaver Lake, Camp Creek, ChuChuakit Creek, Coldstream Creek, Dauphin Lake, Defoe Creek, Ellis Creek, Farleigh Creek, Farleigh Lake, Four mile Creek, Five mile Creek, Harkin Creek, James Creek, Maple creek, Marron creek, Marron Lake, Matts creek, Matheson creek, Maclean creek, Nanashee creek, Naramata creek, Nine mile creek, One mile creek, Old Camp creek, Parker creek, Penticton creek, Sheep creek, Robinson creek, Shilling Spring, Shingle creek, Shoot creek, Six mile creek, Snake creek, Steward Dam, Strutt creek, Three mile creek, Twenty mile creek, tributaries Lake and Okanagan river in the neighborhood of Naramata and Penticton, and of all unnamed streams tributaries to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at Penticton on the 27th day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection.

All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown Granted lands, the title deeds or the certificate of title, or a certificate of incumbrance, or in case of lands not held under Crown Grant, by producing the pre-emption record or the agreement of sale etc.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board, at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans of such works, and for the commencement and completion of such works.

Dated at Victoria, B. C., this 8th day of October, 1913.

For the Board of Investigation;
J. F. ARMSTRONG,
Chairman.

YOU WANT THE BEST
IT ALWAYS PAYS BEST

There are Two Kinds of Printing

The one is turned out by the man who believes that anything goes, but the other by the one who values the reputation of his establishment too highly to allow any work to go out which will not do him credit.

There is just as good work being done in country offices as in the cities, and often as poor work in the cities as in the worst country shops

In Prices the country office can do just as well for you and you save the express. The city printer may get his stock a trifle cheaper by saving the local freight, but his rent and other overhead expenses are higher, and in the end he is obliged to charge as much or more than the country printer will charge for the same class of work.

THE HEDLEY GAZETTE

is prepared to do any kind of work that may come along. No order too small and none too large.

WATER NOTICE

APPLICATION for a licence to take and use and to store or pen back water will be made under the "Water Act" of British Columbia, as follows:—

1 The name of the applicant is E. A. Hargreaves

2 The address of the applicant is Keremeos B. C.

3 The name of the stream is Crater Creek. The stream has its source on Crater Mountain, flows in a southerly direction, and empties into Ashnola creek about eight miles from mouth of Ashnola Creek.

4 The water is to be diverted from the stream on both sides, about eighty rods from its mouth.

5 The purpose for which the water will be used is irrigation.

6 The land on which the water is to be used is described as follows:—Pre-emption of Edward Asquith Hargreaves, No. 6718

7 The quantity of water applied for is as follows: One hundred inches

10 This notice was posted on the ground on the 20th day of October, 1913.

11 A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act", will be filed in the office of Water Recorder at Fairview.

Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

BORN—In Hedley on November 15th, to Mr. and Mrs. H. G. Freeman, a son.

Rev. G. D. Griffiths of Princeton held Anglican service in Fraternity hall on Sunday last.

Mr. and Mrs. Arthur Clare were among those who went to Princeton on Friday night last.

L. W. Shatford, M.P.P. left London on the 8th and would sail from Liverpool on the 10th for Canada.

F. H. French took an auto load to Princeton on Friday night for the Oddfellows' opening of their new hall.

If it's dress-making or cleaning and pressing of ladies' and gentlemen's clothing, see McClure's. North of hospital.

Rev. G. T. McKenzie came up from Keremeos on Saturday last and held service on Sunday evening for the first since the quarantine of four weeks ago.

A letter received in town from Loomis reports that the small-pox situation in that place is not encouraging and the town is reported to be full of it.

Hedley was pretty well represented at the Oddfellows ball in Princeton on Friday night last, the occasion being the opening of the new Oddfellows' Hall.

E. D. Boeing was down from Princeton over Sunday and reports that the bridge they are building over the Tulameen will be completed in about a week more.

R. Wood, who has been store-keeper and time-keeper at the mine for the past two years, went out last week and his successor, Mr. Gezon, is now in charge.

Mrs. H. E. Hansen and her mother, Mrs. A. W. Blanchard, who had been visiting with her, left on Monday with baby Hansen, for a three week's visit to Mrs. Blanchard's home in Chewelah, Washington.

Dr. Jackson, dentist, writes to say that he is disappointed in not being able to make the visit to Hedley which was announced in last issue. The date of his next visit is not yet decided but notice will be given of it shortly.

The Princeton Racing and Athletic Association has been gazetted. They own the new race track laid out there last summer and it is understood that the organization of Athletic sports of various kinds willl be under their control.

Hedley Camp of the Modern Woodmen of America have decided to hold their annual ball on the evening of Tuesday, December 16th. An active committee are now at work making full arrangements and particulars will be given later.

The B. C. Portland Cement plant was closed down last week to permit the completion of some necessary repairs. They expect to open up again in about a week and have been assured that when they are able to start up again the United Empire Company will be in a position to supply them with whatever coal they may need. It is hoped, however, that the manager of the United Empire will not be as far out in his estimate of what his company will be able to do in that line as he has been on former occasions.

Mr. John Power of Penticton, accountant for the Southern Okanagan Land Co., was in Hedley on Saturday last on his first visit to Similkameen. He accompanied road supervisor H. A. Turner, and they went up as far as Tulameen. Mr. Power was formerly a resident of New Westminster but has been identified with the work of the Southern Okanagan Land Company since they began operations in the spring of 1995 and now his enthusiasm is all for the fruitful dry belt which he has seen transformed from arid cactus-covered valley and bench land and made to blossom as the rose.

Dr. McEwen received confirmation of his appointment from Ottawa to look after health regulations. He has full power to maintain guards not only on the railwry to prevent the importation of any more small-pox, but guards on the roads and trails as well, and it is his intention to keep things tight up until those across the line who are responsible for the menace will make up their minds to quit playing with the situation and begin to clean up. The way tor them to clean up is to clean out the triflers.

When writing Advertisers Please Mention the Gazette.

Word received from Mr. Brown who was here a few weeks ago in connection with the Golden Zone would indicate that he is not likely to go further in the matter. Mr. Brown does not care to mix up much in corporations but likes to run his own show and prefers a property that would offer sufficient encouragement to induce him to go the entire thing on his own resources. He had seen a great deal of the operations of mining in Cobalt where many of the properties require less initial expense before they give returns than is the rule in British Columbia. The people here would have been pleased to have had him a resident in the camp and were in hope that the Golden Zone would suit him but he knows his own business best.

The American mail clerks on the trains between Oroville and Spokane are about the limit for blundering in the despatch of mail matter consigned to offices on this side of the line. The bundles of coast dailies intended for Hedley are repeatedly going through to Princeton which invariably results in their not being received here until the next day. Sometimes it is one paper that goes past and sometimes another. When the road gets through to the coast and the mail follows an all-Canadian route an improvement is looked for. At all events if blunders of this kind continue a kick to the department will be productive of results. At present the making of a kick would be only so much lost effort.

The moving picture shows on Friday and Saturday last were well patronized. The main piece in three reels was a biblical subject entitled "The Star of Bethlehem" and had been gotten up with apparent heavy expense to impersonate the various characters represented. For the teaching of biblical history to the youth there is no question that films of this character would be beneficial, but whether it would conduce to orthodoxy among the majority of grown-ups who go for amusement alone and are not disposed to mix up an undue amount of reverence with their entertainment, the experiment might be considered doubtful. At all events those disposed to levity in such matters might help somewhat their own self respect and jar less upon others who regard such things differently, if they would endeavor to restrain a little their irreverent tendencies.

Mr. G. Hess of Denver, Colorado, was in town last week exhibiting a new thing in the way of a sheet iron flume which looks to be a very efficient arrangement. As a conduit of water in large volume such as is required in hydraulic power plants or for the larger irrigation schemes, it should give good satisfaction. An eloquent argument in its favor is the cheapness with which it can be installed and maintained in comparison with the cost of steel piping required to carry the same volume of water. It can be put in for about a dollar a foot cheaper than the wood stave piping and not much in advance of the cost of board flume of the same dimensions, while it is guaranteed to neither leak nor freeze and to outlast from three to four wooden flumes. The sheet iron used is galvanized 16 gauge and not an ounce of soder is used in making the joints which are claimed to be so tight that the flume would carry its full capacity of gasoline without leaking a drop. What this would mean in efficiency over a leaky board flume can be readily imagined. Unfortunately the hang up in plans for installing the power plant on the Similkameen river, and the absence of Mr. Jones gave him the trip for nothing, as no one about the works was in a position to negotiate. As a result Mr. Hess was compelled to go out again without accomplishing the mission on which he came, although he will doubtless be back later.

BAZAAR AND SALE OF WORK

Wednesday Nov. 26, 1913. Afternoon 3 to 5 Evening 7 and on

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen----Famed for Fruit Growing

Town and Lower Valley.

Mrs. Booth of Vancouver is visiting her parents, Mr. and Mrs. Sam Johnson, for a couple of weeks.

W. J. Armstrong came up from Similkameen Monday and reports "busy building cabins near his claims."

Church of England services in the school house on Sunday the 30th by the Rev. J. A. Cleland of Penticton.

Rev. A. H. Cameron held his first service on Sunday the 16th since the first report of sickness. Both services were well attended.

Mike Costello drifted in with the last westerly wind and reports that Tom Anderson has staked a ranch on Sixteen mile Creek, about one mile from the river.

Where oh where are the pupils for the packing school? No names as yet have been handed in to Mr. J. J. Armstrong; now get busy and send in your names right away.

Telegraph business was interrupted Sunday and part of Monday between Keremeos and Princeton by what must have been an infant cyclone which put six poles in the vicinity of Ashnola to the bad.

R. J. McCurdy, special constable on train 255, reports having had to run down a few persons occasionally in order that they should not go without being vaccinated. He does not say that they had to be hog tied while the operation was performed.

The Women's Institute will be there on Friday the 21st, in the Town hall, with lovely little nifty things and delicious eatables for sale; and after these things are disposed of, the people, being naturally tickled to death with themselves, can trip the light fantastic. Come one and all and forget your troubles.

The quarantine has been taken off the men employed on the W. H. Armstrong lower ranch. Everything else is lovely, and all, that is to say the Bromley residence and Mr. and Mrs. E. M. Crooker, are only waiting when the time limit is up so they also, will will be able to break loose and take a gallop round the pasture.

The ladies of Keremeos are very anxious to get up a hockey team, so if the ladies of our sister towns get together right now, for now's the time, and form teams we will all be able to enjoy the good sport, and help to make things as lively and cheerful as possible for the coming winter.

The W. H. Armstrong residence is almost completed there just being a few things to be finished in and around the house. The frame work of the greenhouse is up and all ready for the glass. This work will be held over until the spring. Mr. Williamson, who has had charge of the work, will stay a week longer in Keremeos before going to the coast for the winter.

There is to be another dance on the 28th and it is going to be a rare one. It will be held in the Keremeos Town Hall and is to be a proverty dance at which you are expected to come dressed in your overalls and the ladies will wear their old togs too. No glad rags will go for this function so don't fail to ransack your wardrobes and bring out the discards. The dance will be in aid of the Hockey Club.

Miss Scott is busy getting the aspirants for Christmas Tree honors trained down to take their parts in whatever task is allotted to them. The little fellows are getting along nicely and hope to put forward some nice recitations, songs etc. Last year's entertainment was altogether too long and long before old Santa put in an appearance many of the little fellows were soundly sleeping.

The skating rink is progressing splendidly and when completed will be second to none in the valley. The measurements are 60x150 feet. Boards are now being put around and a well has been sunk in which water was struck at 12 feet. A good force pump will be installed; this will be run by Keeler's transport auto. Everybody is looking forward to a fine time skating this winter. The boys are figuring on putting a good hockey team on the ice, and hope to meet Hedley and Princeton this winter. We know Hedley has been working very hard to get a rink together and deserve a lot of credit. Princeton we have not heard from, but only hope the boys of that town will get together and not be behind in the game. They have a good hockey team and we hope they will also have a good rink.

Uber Villa narrowly escaped from being destroyed by fire last Saturday night. About 12 o'clock Mr. and Mrs. Clarke were awakened by smoke. They immediately got up, waking the rest of the household. Mr. Clarke reached the kitchen, but finding no fire there but tremendous heat, he started for the basement, taking a bucket of water with him. Here he found the trouble, with a fire getting well under way near the furnace. With the help of the family passing buckets of water Mr. Clarke was able to extinguish the flames. It is a hard thing to say just how the fire started. It is possible that a match or cigarette end was thrown amongst the wood the evening of the dance and had been smoldering there unsuspected. It was a lucky thing that there is a very fine concrete basement in the house, for if it had not been for this the house would surely have burnt down.

MASQUERADE BALL

"Uber Villa" the residence of Mr. and Mrs. R. C. Clarke, last Friday the 14th, was the scene of a very pleasant gathering when the postponed Hallowe'en masquerade dance took place. There were some very pretty costumes and the disguises of many were hard to penetrate. During the evening songs were kindly given by Mrs. Thos. Daly, jr., Miss Daly and Mr. Hugh Williamson. The music was delightful throughout and afforded great pleasure to the dancers. The evening was a most enjoyable one for the many guests, among whom were in costume

Mrs. R. L. Cawston, Miss Daly, Miss Corrigan, Mr. Wm. Daly, Mr. Lloyd Armstrong, Mr. Patterson, "The ghost family; Mrs. Thos. Daly, jr, Dutch Girl; Mr. Donald McCallum, Clown; Mrs. Donald McCallum, Red Riding Hood: Miss Mattie Armstrong, Dutch Girl; Miss Richter, Spanish Lady; Miss Ella Innis, Cow Girl; Mr. W. R. Hope, Turk; Mr. Douglas Smith, Clown; Mr. H. C. N. Etches, Spanish Troubadour; Mrs. J. A. Brown, Miss Hallowe'en; Mr. and Mrs. Frith, Mr. and Mrs. Pumpkinhead; Miss Scott, Red Riding Hood; Mr. H. Williamson, Friar: Mr. Arthur Mattice, Schoolboy; Mr. Albert Mattice, Clown; Miss Doris Fleming, Queen of Night; Miss Alice Fleming, Japanese Lady; Miss Agnes Fleming, Turkish Lady, Miss Margaret Clarke, Red Cross Nurse; Miss A. M. Easton, Normandy Peasant; Mr. James Clarke, Indian Girl; Mr. Tom Daly, Clown; Carl Keeler, Clown; and other guests among whom were Mrs. E. M. Daly, Mrs. J. J. Armstrong, Mr, and Mrs. J. W. Armstrong, Mr. and Mrs. R. H. Carmichael, Mr. Chas. Armstrong, Mr. and Mrs. Geo. B. Clarke, Mrs. Fleming, Miss Gibson, Miss Manery, Mr. Frank Manery and Mr. Ginty Cawston.

NOVEMBER ROD AND GUN

Rod and Gun in Canada for November (Publisher, W. J. Taylor, Ltd., Woodstock, Ont.) sustains its reputation as the leading Canadian magazine devoted to the interests of sportsmen. Big game hunting in British Columbia is described in several well written and illustrated articles: "A Labrador Room" is descriptive of a Labrador fishing village; "My visit to an Alberta Trapper," details a successful day on the trap line; "How to Keep Game from Spoiling" contains some valuable information for the hunter of big and small game; "When Riley Tied Hanlan" is by way of variety and is reminiscent of the famous Barrie Regatta when all the world's big scullers had a try-out for the Championship. The regular departments are well maintained.

The Rawhide mine in the Boundary which formerly belonged to the Dominion Copper Co. and is now being worked by the B. C. Copper Company is showing marked increase in values of the ore.

The United Empire Co. announce their intention to begin shipment of coal to the outside in addition to the contract they have in hand to supply the Cement Works.

The wagon road to the Jewel mine has been completed and the company is preparing to add 10 men to the force employed at the property. Plans have been outlined for extensive development during the winter and another shaft will be started soon.

Water Act and Amending Acts
Before the Board of Investigation

In the matter of Alkali Lake, Acheghip Creek, Akemeep Creek, Atsiklak Creek, Boulder Creek, Blue Lake, Cougar Creek, Eleven Mile Creek, Freshwater Lake, Green Lake, Gregoire Creek, Haynes Creek, Hester Creek, Hody Creek, Horn Creek, Incameep Creek, Irrigation Creek, Johnson Creek, Kearns Creek, Keogan Creek, Krouger Creek, Lime Kiln Creek, Little Creek, Mill Creek, Maloan Creek, McCraig Creek, McConnell Creek, McIntyre Creek, Mike Keogan Creek, Nogl Creek, Orofino Creek, Okanagan River, Park Rill Creek, Reed Creek, Rocky Creek, Round Lake, Sawmill Creek and Lake, Sheep Creek, Shuttleworth Creek, Spring Creek, Strawberry Creek, Taylor Creek, Ten Mile Creek, Testalinda Creek, Tinhorn Creek, Togo Creek, Twin Lake, Upper Clear Lake, Victoria Creek, Vaseaux Lake, Wild West Creek, Wolf Creek, tributaries of the Okanagan River in the neighbourhood of Fairview, and of all unnamed streams tributary to or in the vicinity of any of the said streams.

NOTICE is hereby given that a meeting of the Board of Investigation will be held at Fairview on the 20th day of November, 1913, at nine o'clock in the forenoon when all claims which have been filed, all objections thereto, and the plans prepared for the use of the Board will be open for inspection.

All persons interested are entitled to examine these and to file objections thereto in writing if they deem fit.

At this meeting claimants shall prove their title to lands to which their water records are appurtenant. This may be done by producing, in case of Crown Granted Lands the title deeds or the certificate of title, or a certificate of incumbrance, or in case of lands not held under Crown Grant, by producing the pre-emption record or the agreement of sale, etc.

Objections will be heard forthwith if the party objected to has received sufficient notice of the objection.

The Board, at the said meeting, will determine the quantity of water which may be used under each record, the further works which are necessary for such use, and will set dates for the filing of plans for such works, and for the commencement and completion of such works.

Dated at Victoria, B. C., this 10th day of October, 1913.

For the Board of Investigation,
J. F. ARMSTRONG,
13-1 Chairman

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Drill Hall, Victoria, B.C.," will be received until 4.00 p. m., on Thursday, December 11th, 1913, for the construction of Drill Hall at Victoria, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained on application to the office of Wm. Henderson, resident architect, Victoria, B. C., on application to the Postmaster, at Vancouver, B. C., and at this Department.

Persons tendering are notified that tenders will not be considered unless made out on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupations, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order
R.C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, November. 11th, 1913

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.-Unauthorized publication of this advertisement will not be paid for. 9-6m
