VISITED THE MINE

W. E. Cory and Friends see the Nickel Plate Mine and Works.

On Friday last Mr. W. E. Cory of New York who has been one of the principal owners in the Nickel Plate mine since the Hedley Gold Mining Company took over the property some four years ago, and has given the concern much of his attention as a member of the Board of directors, came in to pay his first visit to the property. He has recently been on an extended trip to Europe and came direct from Paris, bringing with him a couple of friends, Mr. J. B. Worden of Philadelphia who spends considerable of his time in the French capital, and M. Eriera de Castro a Portuguese engineer.

The party landed at Montreal and came directly west by C. P. R. to Sicamous and down the lake to Penticton wheere they were met by Mr. T Walter Beam and Mr. Jones in the Company's car.

As there was scarcely time after their arrival on Friday to take in the mine that day they were taken for a run up the river and also up the Twenty Mile Creek to give them a good idea of the surroundings and the company's holdings in the valley.

On Saturday they went up the tramway to the mine which was an experience that impressed them considerably as it has done almost everyone who makes the trip for the first time. A careful and thorough inspection of the mine followed and it goes without saying that the Nickel Plate looked good to them. When it was known what was involved in a trip over the trail to Camp Clifton where the diamond drill crews are operating, the little side excursion was declined by Messrs. Cory and Worden, but the younger man, Mr. de Castro was game and accompanied Mr. Beam over the tough steep trail to the scene of the diamond drill operations, and thence down the canyon direct for Hedley with Mr. Beam as pilot.

Although not in the public eye to the extent that men like Rockfeller, J. J. Hill or Schwab are known, Mr. Cory is nevertheless one of the great captains of industry and finance in a country that is pre-eminent for financial and industrial achievment. He has held the position of President in the United States Steel Corporation a circumstance which is in itself abundant evidence of his worth and attainments and his position in the business world.

His interests are widely scattered and many of them are concerned with mining, but he is much too busy a man to give personal attention to more than a small part of them. This accounts for his inability to pay an earlier visit to Hedley. His interests in Montana which are large, helped to bring him west at the present time and the trip was arranged by him so as to allow him to take in Hedley on the way and satisfy his curiosity as to the lay of the land in connection with a mine which is yielding him excellent profits on the capital he had invested in it.

POSTMASTER-GENERAL IN B. C.

The Postmasters-General of Great Britain and Canada Make Joint Visit to Pacific Coast

There should be something doing in the post office business in Canada after the visit to the Pacific coast of Hon. Herbert Samuel, Postmaster-general of Great Britain, and Hon. L.P. Pelletier, Postmaster-general of Canada. These two distinguished visitors arrived in Vancouver last week.

Unlike Canada the business of the British Post office is not confined to the mails but also embraces telegraph and cable service, and in all probability the present visit foreshadows important changes, among which may be expected earnest effort to cheapen cable service.

It is the first instance in which a British Cabinet Minister has visited Canada during his term of office. The British Minister has addressed Canadian clubs at various points en route and was not very well satisfied with the liberties taken by sundry Canadian newspapers in misrepresenting his views.

STEEL AT SUMMIT DEC. 1st

K. V. Road Now Ready-76 Miles West of Midway

Steel on the Kettle Valley railway will be laid to the summit, 76 miles west of Midway, by Dec. 1st, according to plans of those now in charge of the work. The roadbed is in readiness, but there will be about 18 days of bridge building and 20 days of steel laying in the 11 miles remaining to reach the summit.

The laying of steel from Wolfe creek at mile 65 west from Midway, started yesterday, but there will be three bridges to build in the first three miles. The bridges are framed at Carmi ready for installing. The work is now being done by the railway company, but it is excepted that it will be late next summer before the link to Penticton will be connected up. There is considerable difficult roadwork yet to do.—Grand Fork's Gazette.

A NOTEWORTHY EVENT

The Imperial Exhibition in Great Britain in 1915 to Mark Many Centenaries

The Panama Exhibition is not the only great fair in preparation. Two yeras hence an Imperial Exhibition will be held in London. It will be on the lines of the Colonial Exhibition of 1886, and the different names illustrate the change in British Empire nomenclature. Colonial exhibitions have gone with the Colonial conference. What is now done by the dominions over the seas is Imperial. The exhibition of 1915 is expected to bring together a great display of British Empire products, including those of regions which were not British when the Colonial Exhibition was held.

It will be an anniversary year, the centennial of Waterloo, the seventh centenary of Magna Charta. The Prince of Wales will then be twenty-one, and the quadrennial Imperial Council will be due. We may expect in addition to the regular council of premiers, and the meeting of the Defence Committee, a much larger council or parliament of the Empire, and probably gatherings of various commercial, professional and other organizations.

The failure of Great Britain to participate in the Panama Exhibition cannot react on the London Exhibition. No foreign country will be invited or permitted to share in this enterprise. It will not be international but Pan-British.

It will be shown that the British Empire is the most self-contained organization the world has ever seen. There is hardly any object of human desire, to say nothing of objects of human need, that are not produced under the British flag, and almost everything produced in the Empire meets a demand in some part of the British domain. The collection of such productions in one vast display in the presence of the persons who produce them and of those who consume them, will be a strong and impressive argument for an Imperial Trade Alliance.—News-Advertiser.

ULSTER MEANS BUSINESS

100,000 Enrolled, and Commander-in-Chief Chosen

BELFAST, Sept. 18.—Capt. James Craig, Unionist member for the East Division of Down, announced at a public meeting here tonight the acceptance of Gen. Sir George Richardson of the post of "general officer commanding the volunteers."

Sir Edward Carson, leader of the Irish Unionists, who is continuing his inspection through West Down, expressed the hope, in addressing the volunteers, that the next time he saw them "every man will have a rifle on his shoulder." He urged them to leave no stone unturned to resist the invaders.

Frederick E. Smith, another of the Ulster leaders, urged them to make their ideals such that when the time came for Sir Edward Carson to negotiate with the government he might do so with the knowledge that behind him were 100,000 disciplined volunteers. The commanding general emphasized the importance of efficacy in drill and knowledge of the rifle as being useful when the rally sounded.

MR. CAMSELL REVISITS HEDLEY

Mr. Camsell came in on Monday and has since been busy over the hills and in the workings of the Nickel Plate mine, noting the developments that have taken place since his last visit and adding to his geological data of things proven. The Gazette had an interview with him in reference to the International Geological Congress which has taken up his attention for more than a year past. Regarding the cancellation of the side trip into the Similkameen, it was as we guessed it would be, a greater disappointment to Mr. Camsell himself than it was to Hedley. It is, however a little bit of satisfaction to know, although perhaps it shouldn't be, that all the other side excursions had to be cancelled as well and for the same reason—simply that with the surfeit of good things they had been having and the comfort of the overland train with its ten sleepers and large day coaches in which lectures were being given by various members of the Canadian Geological Survey, it was practically impossible to persuade any of the foreign delegates to leave the main party. The Congress itself, Mr. Camsell said, was an unqualified success, and while it had entailed a lot of hard work on the members of the Survey they were well repaid in the expressions of satisfaction heard from all the delegates. The only trouble was that the country is too big and from a geological point of view it is also far too interesting altogether to expect men to take in and digest it all in the weeks or months at their disposal. To do so and expect to escape scientific dyspepsia was to expect too much. Many of them, however, have determined to come back and take longer time to see things more at their leisure.

One feature of the occasion mentioned by Mr. Camsell was that of the large number attending—and there were 47 countries represented—only a small percentage of them were economic geologists or mining engineers. The greater number by far were general geologists who were wedded to geology for its own sake, and they revelled in a country like Canada where they could see the whole story of creation spread out before them in the book of rocks, from the early Kewaydin to the latest soils that can produce Canada's No. 1 hard, or the more benign Similkameen dirt mixed with volcanic ash which grows the peerless Keremeos peaches which they might have seen but didn't.

Mr. Camsell did not accompany any of the parties to the north, but returned to Toroto after going with them to the coast.

The Government did the handsome thing and a wise thing when they gave the Geological survey carte blanche and told them to spare no pains nor expense to make the affair go off as well as possible. Canada had the honor of playing host on the occasion and she had the goods to show, and it would have been unpardonable folly to have let the opportunity slip without making the most of it. If an unkind fate prevented us in Hedley from having a finger in the pie, we have sense enough to understand where the impossibility came in and accept the situation for which there was nobody to blame—not even ourselves.

MINING NOTES

Canada's mineral output increased by $74,000,000 in the decade ending 1910. The Province of Ontario increased from $10,000,000 to $50,000,000 in the same decade.

Twenty cent copper is said to be in sight in the near future.

Conference committees on the tariff schedule find it difficult to come to an agreement on the duty on zinc and zinc ores from Canada.

Good ore is reported to have been struck in the Wonderful mine in the Slocan. The general manager in charge of the development is J. P. Keane well-known as a mine manager on the old Cariboo mine in Camp McKinney which paid dividends for years under his management. The Wonderful is now being worked under a lease and a bond in which Keane is interested with Clarence Cunningham of Seattle.

C. P. R. PROMISES MADE GOOD

The Big Railroad Carries Out Its 1913 Building Programme

WINNIPEG, Sept. 18.—The Canadian Pacific railway will complete to the last detail the program which was mapped out for 1913, was the statement made this morning by George Bury, vice-president of the company, on his return from Fort William, where he accompanied the directors, completing their trip over western lines. Mr. Bury stated that he had found the work going ahead so rapidly in the west that every piece of grading and every foot of steel planned to be done would be finished this year. In connection with double tracking, he said that a little of it was now in operation, but there would be more by the end of the year. Asked if he thought the company would be able to move the crop without much difficulty, all the vice-president replied was: "Wait and we shall see."

The Gazette has received a copy of Frank Bailey's pamphlet "The Valley of Sunshine" setting forth the merits of Nicola, Similkameen and Tulameen valleys. It is a well illustrated book of some 80 pages without counting the advertising which will run it up considerably more. The matter has been carefully prepared, and is reliable and well within the facts. The effort shows public-spiritedness on the part of the compiler and it is to be hoped that his enterprise will meet with better reward than that which fell to the lot of one luckless compiler of a pamphlet on Hedley some four years ago. Then payment of the cost was practically guaranteed before it was undertaken and a subscription list produced to make good the promise, but nevertheless the compiler was nicely stung to the tune of over $150.00 in hard cash paid out by him without counting a cent for the labor. Mr. Bailey has met some of the same class who are big on schemes and long on promises, but willing nevertheless for somebody else to be stuck for it, then he is up against it indeed, for it cost some money as well as labor to turn out "The Valley of Sunshine." To help the scheme along the Gazette gave the use of over a hundred dollars worth of cuts, which were used in the illustrations of Hedley and other parts of the valley.

KEEP THEM NON-SECTARIAN

Some of the Protestant clergy of Ontario who are clamoring for religious instruction in the schools of that province should be shipped out to British Columbia that they may learn and know their position under the School Act. If Premier Whitney yields to their clamor he will be a weaker man than his admirers out here in the west take him to be. Many of these men who are making their demands for religious instruction in the public schools and are so ready to declaim against what they are pleased to characterize as godless schools, are strongly against Roman Catholic separate schools, and yet they practically want for themselves more than they are denying to the Roman clergy because it is surely less objectionable to allow the Roman Catholics to have their own separate schools than to have their clergy enter the public school and teach their doctrine there. British Columbia did the wisest thing she could possibly have done and saved herself a heap of trouble when she put her foot right down on it in the first place and allowed no teaching of anything in the public schools except the studies of the regular school curriculum. "To make assurance double sure and take a bond of fate" those wise old guys who determined to save us from any possibility of sectarian brawls in our educational affairs, even put a clause in the School Act that "no clergyman of any denomination shall be eligible for the position of Superintendent, Inspector, Teacher or Trustee." They said "The Lord's prayer may be used in opening or closing school" but specified that "no religious dogma nor creed shall be taught."

When the clergy of any denomination clamor for the right to enter the public schools to impart religious instruction they practically admit that the church has failed in its power to guide the youth within its own fold. If they cannot impart a sufficient amount of religious instruction to the youth of their own congregations within the church or the Sunday School they have no right to the privilege of enforcing their dogmas upon others in the public schools.

EDITORIAL COMMENTS

While carrying out important public improvments the Borden government have been reducing the national debt by retiring certain bonds.

THEIR TWO BEST CUSTOMERS

A U. S. Financial Writer Furnishes Some Instructive Figures

De Forest Hicks, a writer in the New York Times Annalist, has made a study of trade statistics and shows that Canada is borrowing money from Britain and spending it in the United States.

Mr. Hicks says: "To one making a study of the foreign trade of the United States several facts stand out prominently. First: That while the total of exports and imports has advanced without serious setbacks from 1886 to date, the balance of trade, that is excess of exports over imports, has been subject to wide fluctuations. The magnitude of these fluctuations is shown by the fact that in 1893 the United States owed other countries in respect of its foreign trade for that year $18,000,000, whereas in 1908 other countries owed the United States $666,000,000. The result of our foreign trade for year ended June 30, 1913, approximates this banner year with a figure of $653,000,000. An analysis of the official figures brings out the surprising fact that to our favorable trade balance for the year ended June 30, 1913, $294,688,869, or over 45 per cent. of the total, resulted from our trade with the Dominion of Canada, which, added to our trade with the United Kingdom, constituted a total of $596,274,236, or over 91 per cent. of our total trade balance. If we added to these figures the balances with British colonies throughout the world the percentage would be even higher.

United States Trade Balances

"Following are trade balances of the United States for the past fiscal year with the principal countries of the world:

In favor of the United States arriving from—

Great Britain and Ireland	$301,585,367
Canada	294,688,869
Germany	142,721,141
Netherlands	87,728,895
Balance of Europe	44,952,011
Australia, New Zealand, and balance of Oceania	37,184,859
France	9,222,211
Philippine Islands	4,374,545
Africa	2,663,573

Against United States, arriving with

Mexico	$ 22,972,258
South America, Central America, Cuba, West Indies and balance of North America	87,847,550
Japan, China and balance of Asia	161,395,748

"So much for the balance of trade which the United States enjoys in her commercial relations with the Dominion.

"Let us now consider the aggregate value of goods shipped to Canada as compared with our shipments to other countries.

"In the past fiscal year we shipped to:

	Goods valued at
The United Kingdom	$597,150,307
Canada	415,260,049
Germany	331,684,212
South America	146,147,993
France	146,100,201
The Netherlands	125,909,862
Cuba	70,581,154
Japan	57,741,815
All of China	22,439,594

"Canada being part of the British Empire, we might naturally assume that the bulk of her imports, particularly manufactures, would come from England. This, however, is not the case, as a study of the figures extending over a period of years points out that in 1894 Canadian imports from the United States were $61,000,000, as compared with $59,000,000 from the rest of teh world, and that in each year thereafter Canada purchased more in the United States than in the rest of the world combined.

The open golf championship of America was won by a boy named Ouimet who beat the two English champions, Vardon and Ray, in a sensational finish.

County Court of Yale

A sitting of the County Court of Yale will be held at the Court House, Princeton, Wednesday, 8th day of October, 1913, at the hour of 2 o'clock in the afternoon. By command.

"OUR MUTUAL FRIEND"

When this expression is used some Canadians in stantly think of Charles Dickens' much-loved masterpiece. Others associate the words with The Mutual Life Assurance Company of Canada, and with reason, for

It is the only Mutual Life Insurance Company incorporated in the Dominion.

It solicits only Canadian business.*

It invests only in Canadian Securities, and

It has paid to Canadian families,* often in times of direst need $12,800,000 since its foundation in 1870.

For these and other reasons Canadians refer to

THE MUTUAL LIFE ASSURANCE CO., of CANADA
as Our Mutual Friend

* The colony of Newfoundland is included.

WATER NOTICE

APPLICATION for a Licence to take and use Water will be made under the "Water Act" of British Columbia, as follows:—

1. The name of the applicant is The Similkameen Water Works Company, Limited.

2. The address of the applicant is Hedley, B. C.

3. The name of the stream is The Twenty-Mile Creek. The stream has its source in Stray Horse Lake, flows in a southerly direction, and empties into the Similkameen River about one mile from Hedley.

4 The water is to be diverted from the stream on the East side, about 3,200 feet up the creek from Hedley.

5 The purpose for which the water is to be used is domestic.

The land on which the water is to be used is described as follows:— The unincorporated town of Hedley and vicinity.

7 The quantity of water applied for is as follows:—10,000 gallons a day.

8 This notice was posted on the ground on the 3rd day of Sept. 1913.

8 A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Princeton.

Objections to the application may be filed with the Comptroller of Water Rights, Parliament Buildings, Victoria.

The Similkameen Water Works Co. Ltd.
36-4 Gomer P. Jones, Agent.

ACQUAINTANCE

You Naturally Trust Person or Thing Known ::

By HOLLAND.

WHEN about to engage in a business venture you prefer to deal with some one you know. You have more confidence in the advice of an acquaintance than in that offered by a stranger. Confidence is based on acquaintance.

In buying goods you prefer to buy those that have proved their merit. You want those of a known standard—those that have stood the test of use. These are the goods that are advertised. Look at our advertising columns and see if this is not true.

Did you ever know an article of inferior merit to be widely advertised? It is a fact that the

MOST WIDELY ADVERTISED GOODS ARE THE BEST.

Just as you find it safest to do business with a man you know, you will find it safest to buy goods that you know—goods with which you have become acquainted through advertising.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for. 9-6m

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Wharf Summerland, B. C.," will be received at this office until 4.00 p. m., on Tuesday, October 21, 1913, for the construction of a Wharf at Summerland, B.C.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of F. W. Aylmer Esq., District Engineer, Chase, B. C., and on application to the Postmaster at Summerland, B. C.

Persons tendering are notified that tenders will not be considered unless made out on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupations, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order
R.C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, September 16th, 1913

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Town and District.

A rural mail delivery route is being put in operation over on the mountain between Rock Creek and Sidley.

Dan McKinnon is working for the Grace Development Co. on the Golden Zone mining property near Nighthawk.

The executive committee of the Hedley Golf Club are called to meet at the Hotel Similkameen to-night (Thursday) at 8 o'clock.

E. D. Boeing spent Sunday in town with his family. He returned to Princeton on Monday, going with F. H. French in the auto.

An itinerant mechanic struck town last week repairing cash registers and combination locks for safes. Several jobs in that line fell to his lot here.

The equinoctial gales came along on schedule time this year. There was a vigorous driving rain accompaniment at Hedley and snow at the Nickel Plate and Camp Clifton.

A vicious horse in Innis' barn let out with both heels at Wixy Allison on Saturday evening and got in a blow that knocked him out for a spell but did no serious damage.

The second section of the "bohunk express" towed the first section into port on Saturday, and nearly blew up from internal heat generated while performing the salvage stunt.

Rev. G. T. McKenzie announced on Sunday night that the service on Sunday (28th inst.) would be held at 8:00 p.m. and the following service at 7:30, beginning the winter schedule after October the first.

Jack Raitor was sent up from Marcus to look after the Oroville station for a while but has been moved back to Marcus. He has relieved station agents at a good many points on the Great Northern since he left Hedley.

Mr. G. P. Jones left on Sunday for Oroville with Mr. W. E. Cory and his friends in the Company's car and left them there to get the train out for Spokane on Monday morning. Returning next day Mr. Jones was back in Hedley early in the forenoon.

Tim Griffin who went to Nighthawk to work there for the winter has gone to Oroville where he is sharpening steel for the Owasco Co. If the men who are to handle the steel can deliver the service that Tim does in the sharpening there will be some work done there this winter.

F. H. French, of the Hedley Trading Company, left on Monday with Mrs. French, children and maid and Miss Allen for Vancouver, going by way of Merritt where they intended to leave the auto and go by C. P. R. By this route the fastest time to the coast may be made, only about a day being required.

On Sunday night which was the darkest night since early spring the arc light at the bank corner was out of commission. Shakespeare on one occasion accounted for the absence of stars by ascribing it to "husbandry in heaven". This time the husbandry was on earth and the carbons were being saved for moonlight nights.

Rally Day will be observed in the Hedley Union Sunday School on Sunday, Sept. 28th at 2:30. A short special program will be given and everybody welcome. The officers and teachers would be pleased to see all the parents present. Come and see what is being done in the Sunday School. There is a roll call of 52 and an average attendance of 45.

Monday, October 20th has been decided upon for Thanksgiving Day in Canada and the general proclamation concerning the same has been gazetted. Thursday used to be the date selected but an agitation got up by commercial men who found it inconvenient to spend Thanksgiving Day at home when the day came on a Thursday was instrumental in having the day changed.

A man known as Scotty Amos met with a nasty accident at Fairview on the morning of the 18th inst. He was drawing lumber and had a shot gun on the load with him. The gun was laid on the ground near-by when the wagon was being unloaded and on picking it up quickly after the load had been removed it went off, carrying away a portion of his hand.

For the first time since the reign of M. K. Rodgers all the living accommodation at the mine for miners' families is being utilized, and all the rest are for the present doomed to perpetual single-blessedness. Most employers whose help is mostly of the floating order prefer married men to single. A few more families up there which would enable them to have school, ought to be a good thing.

The death in Burrard Sanitarium, Vancouver, of W. A. Harkin, removes a noted newspaperman. He was in the newspaper game at the early age of 17 years and held important positions on leading eastern Canadian dailies before following the rush to Rossland in the boom days of that camp. From there he drifted to Grand Forks and was for a while editor of the Grand Forks Gazette. Latterly he has been working on Vancouver papers.

A movement is on foot to erect an addition in rear of the Methodist church. Rev. G. T. McKenzie expressed the advisability about a month ago of making an attempt in that direction and a subscription list circulated by way of a feeler has met with fair success. The object in building it is to provide accommodation for the infant class of the Sunday school which has been deprived of that advantage when the partition was torn out to give more room. When the subscription list has been circulated all over town it will be known whether the support given to the scheme will be sufficiently encouraging to warrant going ahead with it.

Coalmont has taken on fresh life and interest with the purchase of the Vancouver men and the announcement is made that the development work will be prosecuted with more vigor than formerly and along lines better calculated to produce results. It is said that the townsite of Coalmont is included in the deal along with the coal properties. That in fact is the worst feature of the situation, for mining companies should be mining companies pure and simple, and where they begin dabbling in townsiting they almost invariably invite failure by doing fool things from the mining point of view in order to boost the townsite.

The Hedley Hockey and Skating Club has re organized for the season and work has already started on enlarging and improving the rink which is to be 60x150 feet. Last year it was run more or less in a go-as-please sort of way and those who used the rink most suited themselves whether they would contribute to the up-keep or not. This year it is intended to look after the finances a little more carefully and have all do their share. The chaps who have been working at the rink this year so far have done good work. Most of last year's senior team are still on hand and if they can get ice in good time they should be in fair shape before the season is very old.

A few days before she went away Miss Marguerite Beam added to the feats of mountain-climbing to her credit by making the descent through the canyon from Camp Clifton to the bed of Twenty-mile, piloted by her father. For the greater part of the way there is no trail whatever and an exceedingly steep descent where in several places there was nothing for it but to slide with the loose talus. Among the men folks the trip is considered strenuous and not unattended with danger, but a soreness of the muscles for a few days was all the after effect there was to trouble her. It was an experience which she said she wouldn't have missed for a great deal and which she would not tackle again for much more.

Mr. and Mrs. H. S. Joyner who have been living in Seattle since they left here a little over a year ago are moving to Los Angeles, California, to take up their residence with Mr. and Mrs. Rodgers, who intend to make the California city their home until matters quieten down a bit in Mexico. On one occasion a band of 125 rebels made a raid into the section where Mr. Rodgers was working a mining property and demanded their horses. Meanwhile the foreman had the horses taken into a tunnel where there were a few rifles and a supply of ammunition, and when the rebs. demanded the horses they were told to come in and get them. Mrs. Rodgers, too, on one occasion had a narrow escape when she was on a train that the rebels were trying to capture. They took the station, killing the station agent and freight handler and the train was near enough the station to hear the shots but got a signal in time to enable them to run back out of danger.

Mrs. T. Walter Beam and her daughter, Miss Marguerite, left on Thursday last for their home in Denver, Colorado, after a three months' holiday in Hedley. They both expressed, before leaving, how well they enjoyed their stay, and we are sure the people of Hedley will be as ready to bear testimony to the pleasure it afforded their many friends in Hedley to have them here. It was Mrs. Beam's third visit to Hedley and as her husband and son were both here all summer in connection with the exploratory work they had in hand at Camp Clifton, it is readily understood how a woman whose interest is centred in her family would find her best enjoyment of an outing in being with them, even with less means of diversion than we have here. The readiness of both Mrs. Beam and her talented daughter to interest themselves in all that interested the townspeople and to take their part with the rest on occasions for mirth and jollity, was thoroughly appreciated and accounted in great measure for their popularity. There was no supercilious aloofness and the entire absence of all such, together with their own good sense and wholesomeness, enabled them to have a good time themselves and contribute to the enjoyment of others. Hedley, we are sure, will be glad to welcome them back at any future time it may please them to come among us again.

Buy an **Eastman Kodak** and let the pictures, made from your own point of view, keep the story of your personal impressions. Eastman Kodaks and supplies on sale at L. C. Rolls & Co. at Eastman prices.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen----Famed for Fruit Growing

Town and Lower Valley.

Mr. Noyes of Oroville was a visitor to town Monday the 22nd.

Scotty is back after spending an expensive sojourn in Oroville.

Mr. G. W. Cooper left for the coast on a business trip this week.

Mrs. E. M. Crooker returned Saturday the 20th after spending a delightful holiday in Alberta.

A party of civil engineers are making a topographical survey of the country in the vicinity of the Ashnola.

The most of the peach shipping rush is over and the growers are now paying attention to apple picking and packing.

Harry Allison of Princeton who has not been seen round these parts for a long time is paying his friends in the district a visit.

Ben Anderson of Chopaka was a visitor to town on Monday. He wants to dispose of his band of sheep and start up in some other pursuit.

Billy (W. R.) Hope, of the Customs office, returned from the coast by way of Merritt last Saturday looking exceedingly well after his holiday in the coast cities.

Miss Carrie and Susie Crowe, of the Government telephone service at Penticton, were visitors to town last Saturday and spent a most enjoyable day before returning.

Carl Keeler, Harold Ralson and Roland Smith went out last week on a hunting trip up the Ashnola River and had the good luck to bring back a couple of fine deer.

Frank and Roy Hargreaves brought down a fine buck from Cathedral Mountain on Saturday. They went over to Penticton on Tuesday where they intend to spend the winter.

Mrs. J. P. Thomas was taken to the Hedley hospital on Sunday suffering from a slight attack of fever. She is now progressing favorably and we hope to see her around again shortly.

Mr. Alexander Morrison, of Armstrong & Morrison Co. Ltd., Vancouver, spent a few days in the valley before proceeding to the coast. He came in last Friday from the Kootenay country after inspecting some work there.

Mr. and Mrs. Thomas Daly were welcomed back to the old home last week. Both are looking the picture of health. Tom came down town a few days after his arrival to meet his old chums who were delighted to shake their old friend once more by the hand.

With the object in view of encouraging live stock owners to keep and breed a better class of animals, principally horses and dairy cattle, W. Thomson, V. S., of Keremeos, is now in a position to recommend proposed animals for insurance at modest premiums to the Yorkshire Insurance Company of York, England, the only English Live Stock Insurance Company operating in British Columbia. This reliable company has $13,000,000 of assets since establishment in 1824, and has paid claims to the amount of $30,000,000.

LIKES KEREMEOS FRUIT

Provincial Fruit Pest Inspector Hands Out Deserved Compliment

Mr. A. B. Kengedy, Provincial Fruit Pest Inspector, returned on Tuesday from a trip through the Keremeos and Osoyoos Fruit districts, where he has been inspecting the fruit crop now being marketed.

Mr. Kennedy stated that some of the best peaches he has seen this season of the Crawford, Triumph, and Yellow St. John varieties, are in Keremeos orchards, and he predicts a future for that district in respect to peach growing. The size of the fruit and the flavor, he said, were remarkable, but might be accounted for in the abnormal amount of sunshine that obtained in the Keremeos Valley.---Penticton Herald.

Some of the big trees in Stanley Park, Vancouver, are dying and leading forestry experts of the Dominion are being asked to make an examination and suggest means of combatting the ravages of the insects and fungi that are believed to be responsible for the trouble.

NEW WELLAND CANAL

Construction Will Be Rushed as Rapidly as Possible--Two Contracts Already Awarded

Ottawa, Sept. 19.—The Department of Railways and Canals is determined to push the construction of the new Welland Canal as rapidly as possible.

Contracts for sections, involving an expenditure of approximately $12,000,000 have already been let. On Monday next, tenders for another portion of the canal will be called for, and the contracts will be awarded as soon as possible.

WEIGHED DOWN BY GOLD

Alaska Bridegroom-to-be Falling Overboard Drowned by Being Held Under Water by Coin in His Belt

Fairbanks, Alaska, Sept. 20.—Fredy Martini of Portland, who was on his way to that city to be married, fell from a barge near the mouth of the Koyokuk River September 5, and was drowned. Mr. Martini carried several thousand dollars in gold on his person, and the heavy metal weighed him down.

GENERAL NEWS

The apple crop in many parts of Ontario is reported to be a total failure.

A fierce gale on the great lakes did much damage to shipping on the 21st.

Clifford Sifton will not resign from the chairmanship of the Conservative Commission.

Tom Mann, the English labor agitator, addressed a meeting at Windsor, Ont., and after an inflammatory, revolutionary speech in which he denounced the church and the King, left the hall when the audience began to sing the national anthem.

MINING NOTES

An option has been taken on the Queen mine on Sheep Creek.

A mining excitement was occasioned in Gloucester and Franklin camps on the North Fork of Kettle River by a rich strike on the Union mine. A rush to stake fractions and extensions resulted.

The recent big blast at the Mother Lode mine near Greenwood, when more than 24 tons of dynamite was set off at once was the largest blast in the history of mining.—Ledge.

Declaring that the problem of the treatment of complex zinc ores had been solved and that he was willing to demonstrate the process, F. B. Allan of Toronto has written to the Nelson board of trade. The process of which he writes will save all the metals in the ore, he declares in a letter read at last night's meeting, at a cost of about $12 per ton. He suggests that from $15,000 to $20,000 should be raised to erect a plant on a commercial basis. The secretary was instructed to take the matter up with the British Columbia Mining association. — Nelson News.

TARDY RECOMMENDATION

Greenwood Ledge

An obituary notice always sounds nice, "but" says Bill McBride, it always comes too late to get a fellow a better job.
