MME. KOKEVTSEVA, REAL FIGHTING WOMAN

Mme. Kokevtseva, recently awarded the cross of St. George for bravery is the Colonel Commanding the 56th Ural Cossacks Regiment. She has been wounded twice while fighting.

Tax Rate Will Be Twenty-Five Mills

Financial Estimates for Year are Passed—Tax Sale will be Necessary Evil—Husks that the Swine Do Eat

There was a full attendance at the regular meeting of the city council Friday morning last. The principal business on hand was the consideration of the financial estimates for the year and the fixing of the tax rate necessary to raise the amount required to cover the difference between the revenue and the estimated expenditure.

A summary of the estimates was contained in a report submitted by the finance committee as follows:

REVENUE

Sundry Revenue:		
Trade and Hotel Licenses	$3,150.00	
Police Court Fines	1,000.00	
Scavenging fees	2,500.00	
Interest on unpaid taxes	1,000.00	
Sundry Items	830.00	$8,480.00
Light and Water.		
Estimated Revenue		$31,000.00
Total Revenue		$39,480.00

EXPENDITURE

Sundry Expenses		
Interest and exchange	$2,800.00	
Office salaries	3,360.00	
Printing and stationery	920.00	
Office sundries	560.00	
Legal expenses	300.00	
Council s indemnity	1,750.00	
General and Contingent expenses	1,200.00	
Grants	100.00	$11,010.00
Administration of justice		$4,650.00
Streets and Sidewalks:		
Street lighting	$2,900.00	
Expenditure as per estimates	4,000.00	
Debenture expense	2,245.94	$9,145.94
Health:		
Expenditure as per estimates	$2,020.00	
Scavenger's wages	1,500.00	
Debenture expense	7,521.18	$11,041.18
Park:		
Expenditures as per estimates	$2,031.00	
Debenture expense	3,352.26	$5,383.26
Light and Water:		
Current expenses as per estimates	16,690.00	
Debenture expense	12,121.87	$28,811.87
Fire Protection:		
Expenditures as per estimates	2,210.00	
Debenture expense	662.61	$2,872.61
Schools:		
Expenditures as per estimates	16,760.00	
Debenture expense	4,925.51	
	21,685.51	
Less government grant	6,760.00	$14,925.51
Implement shed (debenture expense)		74.01
Completion of street lighting system		500.00
Contingent expenditure		578.01
Total expenditure		$88,992.39
Less Revenue		$39,480.00
Amount to be raised by taxation		$49,512.39

This was to be raised by a total tax levy of 25 mills, as follows:

General levy, 4½ mills	$8,912.23
School levy, 5 mills	9,902.48
Debenture levy, 15½ mills	30,697.68

"The above levy," the report stated, "is $16,000 less than last year but is higher then we anticipated owing to a shrinkage of $7,000,00 in the revenue from Light and Water. This shrinkage adds an additional four mills to the general rate and necessitates a saving of $23,000 in the other departments.

There are at present $48,691.00 of unpaid taxes dating back to 1910, against which the city has a loan of $36,000.00. Means should be taken to collect these taxes and have the loan repaid, as until this is done it will be difficult to secure further advances from our bankers. Apart from this aspect of the case such loans are very costly. The interest on the present loan adds 1½ mills to the general rate for this year, and therefore works a hardship on those who pay their taxes promptly.

The present financial condition of the city is such that a tax sale seems to be absolutely necessary, and until the Municipal Act is changed so as to allow a larger rebate for the payment of taxes such sale should be made an annual affair.

We would recommend that the date set for the payment of the present levy be placed late in the year and that no extension be granted as has been the practice in former years."

This report was adopted in its entirity after a little discussion, which centred chiefly upon the question of holding a tax sale.

Alderman Copeland requested the council to authorize the erection of two stand pipes for filling the water wagons, one to be placed near the intersection of Bernard avenue and Richter street and the other at the intersection of Pendozi street and Cadder avenue. The Light and Water committee were instructed to have same installed.

Alderman Copeland also asked the council to authorize the expenditure of $10 on the road to Manhattan Beach, and also the hiring of a team for two or three days for the purpose of general street repairs.

Permission was also asked for the proprietors of the brick yard to fill in an old bridge on Gaston avenue opposite the Agricultural Grounds, such work to be done free of cost to the city. The requests were all granted.

Mayor Jones reported that the band proposed to hold their weekly meetings in the park this summer as in previous years. Owing to present conditions they did not expect a grant from the city, but desired, however permission from the council to take up a collection in the park during their concerts. This proposal was endorsed.

A letter was read from the superintendent of the Provincial Home for aged men suggesting that the council apply for full particulars, as to the rules governing the admission of applicants to the home. The Mayor said there were a few aged men in the district who were unable to care for themselves, and for this reason he had requested the clerk to write to the home for a copy of their regulations.

THE QUEEN ELIZABETH IN ACTUAL ACTION

The largest British Dreadnought at work inside the Dardanelles. She is firing at a fort in the narrows. A shot from a concealed battery has just fallen over her causing the splash of water seen in the photo.

The provincial department of agriculture wrote enclosing notices in connection with the destruction of weeds.

A communication was also read from the corporation of North Vancouver, asking the city to support them and other municipalities in bringing pressure to bear upon the provincial government to have struck out clauses in the provincial charters to railways granting exemptions from municipal taxation upon application for extension of charters. The clerk was instructed to reply that the council was in sympathy with the proposal, but would suggest that action be taken through the Union of B. C. Municipalities.

Letters were received from the Berlin, Ontario Board of Trade enclosing copies of resolutions regarding employment of returned soldiers and also dealing with Camada's fire losses.

A request from the fire brigade for the purchasing of 500 feet of 2½ inch hose at a price of $1.00 per foot was referred to the committee.

The Veterinary Director-General, of Ottawa, wrote respecting certain new regulations, to prevent the spread of hog cholera. It was pointed out that the feeding of swine on garbage from cities was a frequent cause of the outbreak of the disease.

"As the connection between garbage feeding and hog cholera is not apparent," the letter stated, "I may inform you that the disease is frequently conveyed by uncooked pieces of pork, which find their way into the swill barrel. Pieces of hams, bacon rinds, sausages, that have become tainted, and thrown out may easily convey hog cholera, if any of them have been derived from swine affected with the disease.

"Hogs in the early stages of cholera are sometimes killed for food, and I may say that an experienced meat inspector would find nothing suspicious about any such animals. In the stage of incubation the disease makes no change in the appearance of the carcasses, and the meat may be eaten by human beings with no bad effects, while remaining capable of carrying the infection of hog cholera to swine.

"Pickling and curing do not destroy the virulency of such pork, and experience has shown that quite a small piece of it may convey the disease to susceptible hogs.

"Garbage collected from widely scattered sources, as in ordinary city garbage feeding, has many chances of becoming contaminated with scraps of infected pork, and outbreaks of hog cholera in the neighborhood of towns and cities have occurred with great frequency. Once the infection has begun it rarely is confined to the herd first attacked, but spreads to other herds in the vicinity and very great losses result.

"Last year the government paid approximately $200,000 in compensation to owners of hogs destroyed in stamping out the disease, and this is only part of the losses incurred. Two-thirds of this loss might be avoided, I think, if infection through garbage feeding could be prevented.

"This department" the writer continued, "has endeavored to discourage garbage feeding by withholding compensation in cases where hog cholera has resulted from this cause, and the owner has not tried to protect his

(Continued on Page 3.)

Fall Fair Changed to September 27, 28 and 29

Otherwise Would Clash With Provincial Fair Schedule

There was a full meeting of the Agricultural Association in the Farmers' Institute rooms, on Saturday afternoon last, the president, Mr. R. A. Copeland in the chair, and Mr. P. B. Snashall acting as secretary.

A letter was read from the secretary of the Department of Agriculture with reference to the dates arranged for the show, 21st, to 23rd of September, instead of 27th and 28th as arranged by the Provincial Fall Fairs' Association. It was pointed out by the government that the dates arranged would conflict with the Kamloops fair and it would not be practicable for the same judges to judge at Kamloops and also at Kelowna, and it would be necessary for additional judges being appointed, an undesirable feature, in view of the strict economy required from the department this year. The Deputy Minister of Agriculture had been consulted in the matter, and strongly urged the directors to take the later dates, in order that the judges itinerary, as arranged might be undisturbed.

Although it was felt to be desirable to have the fair days include Thursday half-holiday it was considered that the difference of the few days was not sufficiently important to justify clashing with the views of the Fall Fair Association of the province, and that it would be possible to arrange with the Merchants' Association to have the half holiday on Fair week on Wednesday, the 29th. It was finally resolved that the fair be held on the 27th, 28th and 29th of September.

A letter was read from Mr. F.R.E. DeHart with reference to the appeal for funds to pay off the indebtedness of the association, and donating the prize money, amounting to about $40. due to him for last year's exhibits. Mr. DeHart also promised to give the association any help he could in the future. The secretary was directed to write, thanking Mr. DeHart for his generosity.

The chairman took the opportunity of thanking the Press Committee, Messrs. Pridham and Calder, for the letter they had inserted published in the press, with reference to the need for co-operation among all the community in order that the show this year shall be a successful one, and for assisting the association generally. Thanks was also due to the local press for their kindness in publishing same.

The chairman announced that Mr. Cooper, the late secretary had had a letter from the government stating that the grant of $700,00 for the show if held this year would be forthcoming.

The committee appointed to deal with the prize list under the different sections made their reports. As there were only a few minor alterations to be made it was decided to use the show lists, printed for last year's show, there being a sufficient supply reported to be on hand, and have a leaflet inserted with the alterations shown.

In the poultry section it was decided to have a class for "Any other variety" in addition to those specified as in the sub-section for "English breeds. It was also resolved to insist on leg bands being on all birds shown, the association to provide the same at a nominal cost where necessary.

In the division for cattle, it was decided to add a section for "Red Polled" cattle, and to add classes in all breeds specified, for cows under three years, and heifers of different ages, and bull calves.

Mr. Jas. Bowes, on behalf of the sports committee stated that they proposed drawing up a program providing for two days races, but thought details should be left until a little later. On the proposal of Mr. Pridham, seconded by Mr. Prowse, it was resolved that the races be confined to local horses, from the Okanagan valley.

Mr. Pridham, on behalf of the special prizes committee, proposed that the secretary write to various corporations and wholesale firms who transact a great deal of business with Kelowna, soliciting special prizes for the show. The secretary was instructed accordingly.

It was resolved that the next meeting of directors be held on Saturday, July 17th at 2.30 p.m.

KELOWNA TENNIS CLUB

The arrival of the fine weather will be welcomed by none more heartily than by the local tennis enthusiasts as, although a little practice has been going on play has been much hampered by the wet.

The Kelowna Tennis Club played the Mission Tennis Club at men's doubles last Saturday at Kelowna courts, the result being a win for the home side by six sets to three.

The teams were as follows:

Kelowna.—W. E. Adams, H. A. Willis, H. G. M. Wilson, H. G. M. Gardner, G. A. McKay and A. W. R. Cowan.

Mission.—R. H. Stubbs, H. C. Mallam, E. A. Barnaby, R. A. Bartholomew, St. G. P. Baldwin, J. S. Thomson.

Adams and Willis beat Stubbs and Mallam 6—3, 3—6, 8—6; Barnaby and Bartholomew 7—5, 6—1; Baldwin and Thomson, 6—4, 11—9.

Wilson and Gardner lost to Stubbs and Mallam 4—6, 5—7; beat Barnaby and Bartholomew 6—3, 7—5; Baldwin and Thomson, 7—5, 6—3.

McKay and Cowan lost to Stubbs and Mallam 0—6, 0—6, Barnaby and Bartholomew 4—6, 7—5, 4—6; beat Baldwin and Thomson 6—0, 8—6.

A return match will be played at the Mission next Saturday.

Former Kelowna People Burnt Out at Naramata

Mr. and Mrs. G. H. Hodson who removed recently from Kelowna to Naramata have had the misfortune to lose their comfortable home there with all its contents by fire in the early hours of last Thursday morning. The fire was apparently caused through the bursting of a lamp.

Mrs. Hodson was alone in the house, as her husband was engaged at contract work in Penticton, and in order not to be so afraid she had left a light burning in the passage way between living room and kitchen. Some time in the early morning Mrs. Hodson was awakened by a noise as of glass cracking, and was alarmed by the smell of smoke and flame. Hastily snatching some clothing she made good her escape from the burning building. By the time she got outside flames were coming from the upstair windows. It was a case of letting everything go, and the distressed woman hastened away to wake her nearest neighbors, Mr. Jas. Myers and Mr. King.

The loss includes some valuable jewellery and a considerable quantity of cash, as well as the usual household furniture.

The loss to Mr. Hodson is considerable as only a small amount of insurance was carried.

Docking Charges Sustained

The Railway Commission, at its recent sitting at Revelstoke, considered the petition of the Boards of Trade of Kelowna and Summerland, asking that the recent increase in the C. P. R. charge to $2.50 per car for docking and switching be not allowed. The C.P.R., defended the charges, arguing that they had built the docks and the tracks at much expense, and were forced to hire teams to do the switching. No doubt the matter of barge transfer was also taken into consideration when the commission sustained the C. P. R. in making its increased charge.

If the Penticton board of trade is successful in its appeal to Ottawa, supported by Merritt and Princeton, the K.V.R. train will soon include a mail car. At present communication between many points along the K.V.R., is possible only by a very circuitous and slow route.

To Place Farming on Business Basis

The Canadian farmer is finding a strong and determined ally in Hon. Martin Burrell, minister of agriculture. Mr. Burrell proposes to provide a commercial service for agriculture similar to that which Sir George Foster has rendered manufacturers and Canadian industries generally. A comprehensive market propaganda is being initiated.

It is recognized that the farmer has had difficulty in meeting his commercial competitors on an equal footing. This has been due partly to lack of organization and partly through his inability to keep himself informed as to current trade movements in the livestock market.

A careful study is to be made with the co-operation of the department of trade and commerce, of trade movements in foreign markets in order that Canadian farmers may be in a position to take advantage intelligently of the greatly increased products. A review of production in Canada will be carefully made with the view to enabling the country to handle its supplies in the light of market, demands and in the most economical and profitable manner possible. Co-operative selling, the benefits of which have been so successfully demonstrated by Mr. Burrell's department in connection with the sale of eggs and wool will be given energetic support. It is expected also that under the new policy the department will be able to promote co-operation between livestock breeders and feeders and the packing and transportation companies, with the view to stimulating and developing Canadian industry as a whole.

Wire Submarine Net Across English Channel

Contrary to the general notion that a protective lane of torpedo boat destroyers and other warships is maintained by the Allies across the English channel, it is learned that there has been stretched from Folkestone to Cape Grisnez, a wire cable netting with meshes eighteen inches square. The cable is clamped together in sections. It is submerged to a depth of about 150 feet and kept in place by anchor buoys. This submarine "deadline" the German "U" boats can not pass.

A narrow passage left open, according to the British admiralty announcement for merchant shipping by way of the Downs and Deal, is carefully guarded by torpedo boats and torpedo boat destroyers.

"While Germany's front is unbroken she can manage without foreign trade and without a gold basis to her currency," writes Col. Maude in the Evening Standard, "but once it becomes apparent that her ultimate victory is an impossibility, her public credit will be shaken as it has never been shaken in any country in the world."

Details have been received of a recent engagement between an Italian and an Austrian submarine in which the Italian boat was vanquished. This is the first time in history than an encounter between undersea boats has been recorded.

* *

Mr. H. Leney was held up on Wednesday at the Wilson Landing post office, from which point he telephoned Kelowna for a tow down to get necessary repairs to his launch.

* *

Mr. Arthur Johnson has been in the vicinity for the past two weeks. He is at present putting logs into the lake for the Kelowna Sawmill Co., and is staying at Mr. Atkinson's ranch.

Items from Ellison

(From our own Correspondent.)

Mrs. Campbell Brown gave an address in the Methodist church on Sunday last on missionary life and work in China, which was listened to with great interest. The lady, who is a fluent speaker, spent several years in the flowery kingdom and consequently spoke from personal knowledge on Chinese work and customs. A return visit of this gifted lady will be highly appreciated.

* *

A successful ice-cream and strawberry social was held in the Methodist church grounds on Friday last, under the auspices of the Unique Bible class. Although the day had been showery, a large number of friends gathered and after having eaten freely of ice-cream, strawberries, cake, etc., an adjournment was made into the church where a musical program was provided in which the following artistes took part: Mrs. G. Whitaker, Miss Vernier, Miss Pineo and Mr. G. Whitaker. The sum of $14.80 was realized towards the shed fund.

Slow but steady improvement in the condition of King Constantine was reported in a bulletin to the Greek legation at Washington.

The board of governors of the University of B. C. announces the appointment of Mr. Mack Eastman, B.A., Toronto, Ph.D., Columbia, as assistant professor in history.

A Zeppelin air ship caught fire in the air Monday night near Zeebrugge and fell into the sea, according to a Central News despatch received from Amsterdam.

MEETING OF CITY COUNCIL

(Continued from Page 1.)

hogs by cooking the garbage before feeding it. Experience has shown that this method of dealing with the question has had little result in lessening outbreaks. It has therefore been decided to place garbage feeding under more stringent regulations than before. A licence will be required in order to carry on the business, and licenses will be issued only to those who agree to certain conditions and are equipped with the necessary premises for carrying them out."

The regulation reads as follows: The feeding of swine upon garbage or swill, either raw or cooked, obtained elsewhere than on the premises where fed, is prohibited, unless special permission in writing is first obtained from the Veterinary Director General.

A court of revision in connection with the assessment rolls for the local improvement by-laws numbers 174 to 188 was fixed for Wednesday, July 14, 1915, at 10 a.m., when any complaints against the same would be heard.

The finance committee submitted the following list of accounts for payment:

J. H. Ferguson, hauling wood	$ 65.00

T. Barrett, work at firehall etc	8.00
H. Harrison elec. line work	10.00
Provincial govt. taxes on sewage disposal grounds	81.00
J. Batt, hauling wood	77.50

Alderman Copeland wished to be placed on record as objecting to the payment of the account of the O. K. Lumber Co., for $70.50 for hauling sawdust for the months of January and February upon the ground that this sawdust was delivered at the power house after the company had been notified to stop hauling same.

Alderman Adams stated that the Light and Water committee had decided not to grant the company's request for free light and water during the period in which they hauled sawdust contrary to instructions, but as a portion of the sawdust hauled had been used by the council the committee had recommended that $70.50 be paid upon the understanding that the city received a receipt in full and a release from any further liability in the matter.

Printed Butter Wrappers

According to the new Dominion Government regulations all farmers who sell butter either to the stores or privately, are required to have it properly covered in a wrapper on which MUST appear in prominent letters the words "DAIRY BUTTER." The fact is also emphasized that all butter in such packages must be of the full net weight of sixteen ounces, and in default of same a fine of from $10 to $30 for each offence is imposed. Whey butter must be so labelled even when mixed with dairy butter, and dairy butter retains its label though it be mixed with the creamery product.

You can be supplied with neatly-printed wrappers for your butter at the Kelowna Record Office, for the following prices:

100	PAPER & PRINTING INCLUDED	$1.50
200	" "	2.00
500	" "	2.75
1000	" "	3.75

These prices include Both the Paper, which is the best obtainable for the purpose, and the Printing of same. Please note this.

Care of Milk and Cream

Success of Dairying Depends Upon Right Methods of Handling

(Continued from our last issue)

Skimming the Milk

If the product sold is cream, the milk should be separated at once, while still warm, and the cream therefrom should be immediately cooled to as low a temperature as possible. It might seem that it is not necessary to take this precaution in producing the cream for butter-making, since it should be sour for churning; but when it is to be kept for two days or longer before it is delivered to the creamery, it is very important to check all fermentations, good or bad, so as to allow the butter-maker to have full control of the souring process. He can then make a much more uniform grade of butter or better keeping quality, as well as a much better flavored product.

When a separate milk-house is available the cream separator should always be found there, and never operated in the stable or any other place where the air is impure or the surroundings bad. A simple, clean room with a solid floor and screened doors and windows can be made to answer very well as a place to separate the cream.

Care of the Separator

It is important that the separator runs smoothly: Any trembling or shaking of the separator while skimming will cause a loss of butter fat in the skim-milk. It is essential then, that the machine be set upon a firm foundation and properly levelled. Each separator is usually accompanied by specific directions for setting up and operating, and these should be carefully followed. The life of a standard separator depends to a large extent upon the care it receives. One that is allowed to become gummy or dirty may wear out in a year, while if properly cared for will last half a lifetime. It should be kept level, free from dirt, and well oiled. Uniform turning will contribute to skimming efficiency and to the life of the machine.

Cleaning the Separator

Many dairymen are neglectful in the cleaning of the separator, and some seem to think that it is unnecessary to wash them more than once a day. Even when the bowl is rinsed with warm water, there remains a coating of slime and milk on the interior parts which readily undergoes decomposition. When next used the warm cream in passing becomes contaminated with bacteria from this source, and it is injured beyond repair. Such cream may be dangerous to health, and it is certainly unfit for butter-making.

Care of the Cream

Warm cream should never be mixed with that which is cold or older since this brings about conditions favorable to the growth of all kinds of bacteria which produce bad flavors. This can be avoided easily by providing two small cans in addition to the large one for storage. One of these should receive the warm cream direct from the separator and be immersed in the cooling water until the next milking, when the other small can is put into its place, and the cream in the first small can may be poured into the main supply in the storage can and thoroughly mixed by efficient stirring. Cream or milk should never be stirred with anything but a well-tinned or enamelled long-handled spoon or dipper. No amount of washing and boiling can keep a wooden stirrer sweet and clean, and its use cannot be too strongly condemned.

The cream can should not be closely covered, for moulds and putrefactive bacteria, which always produce bad flavors in the cream, find an ideal condition for their development in the dark, moist, closely confined space thus provided. If necessary to cover the can, this should be done with a loose-fitting cover. A clean piece of white muslin or a piece of wire gauze would be suitable for this purpose. While the cream is cooling the lid should always be removed from the can, thus giving the animal odors a chance to escape.

Utensils

All milk pails and other dairy utensils used in handling milk and cream should be of such construction and material that they can easily be kept clean. Many are to be found in use with open or rough seams and joints, so that the milk can never be completely removed from them by any ordinary methods of washing, and it remains there to sour and decay, inoculating each milking with millions of the most undesirable bacteria. The use of sound utensils, well tinned, free from rust, and in a cleanly condition, is essential to good milk. Dented or battered pails, cans, etc., and seams that are not properly flushed with solder cannot be rapidly cleaned. Such uneven surfaces invite contamination that is readily imparted to the milk, though the latter is subjected to it only for a very short period. New pails and cans may cause an immediate improvement in the product.

An essential requirement in any utensil for handling milk in simplicity, to which should be added durability. Nothing will contribute so much to the cause of better milk and cream as will the sanitary milk pail, if properly used and cared for. The critical period in the life of milk is during the time of milking. Very few who have not made careful tests realize to what extent the wide-open pails invite dirt, as compared with the one partly covered. These assist very materially in excluding dirt and dust, and when we fully realize that dust-particles are the carriers of infection, the advantages of excluding them are obvious. Milking pails should never be used for any other purpose.

Washing Dairy Utensils.

This is a very important question, though it involves but a few simple considerations. They should be rinsed first of all with cold or lukewarm water to remove all particles of milk. This step should never be omitted, for hot water tends to cook the milk fast to the tin, forming a sticky layer over the surface which is very difficult to remove. They should then be thoroughly scrubbed with a brush in warm water to which a small quantity of good washing-powder, such as "Wyandotte" or "Crescent Cleaner" has been added. The washing should be followed by a thorough scalding with water as near the boiling point as possible, after which the vessels should be inverted on a rack to drain and dry from their own heat. If possible they should be placed where the sun will shine on them, as that will do much toward keeping them pure and sweet. The protection of utensils from accidental contemination after they have been thoroughly washed and scalded has a measurable effect in reducing the germ content of the milk.

Renew for the Record

Emigration to Canada

A well-known American writer, Mr. J. O. Curwood, has been making a study of conditions in the west of Canada in relation to the war.

He considers that the war may result in an era of prosperity to that country which it has never known before, not an era of estate boom but of development and growth that will mean practically a new Canada in the west. "For some time" he says, "Canada, if not really sick, has been on the eve of a serious kind of sickness, caused by the fact that her town and city population and values had too greatly outrun her rural population and values' —a statement which may be applied with some, if not equal, force to Australia, where the growth of the city has been far in advance of the rural district, greatly to the disadvantage of the country as a whole.

In Mr. Curwood's judgment, the signing of peace will lead to an immigration movement that will amaze the world. After the Franco German war in 1870, 200,000 Germans settled in three of the greatest American States,— Nebraska, Minnesota and Iowa, which are now German American. He thinks that where one German emigrated then, five are likely to do so at the close of this war, but they will not go to the United States, as there are no fit lands open to them there. They, and numbers of emigrants of other European nationalities and of the United Kingdom, will make their way to Canada and South America. We should also say to Australasia as well, as to the Greater Britain of the southern seas there is likely to be a considerable movement when peace is concluded.

In regard to the prospect of land values in Canada, Mr. Curwood says, "they must increase, and from now on they will increase through steady growth and development." He considers that a great deal of property had been oversold and that certain places had consequently suffered, but he did not think this over-selling is so serious as some people believe, who forget that every city that ever became a city had to pass through its period of boom days.

Strenuous efforts are being made throughout the Dominions to encourage the production of all commodities for which a special demand may be expected. The immediate prospects appear, therefore, to be most favorable. The purchasing power of the farmers, is largely increasing, and the appeal of the Dominion and provincial governments to put more acreage under cultivation has met with a ready response.

Antiseptic Bullets

A new bullet that carries in its nickle jacket first-aid kits filled with narcotics to deaden pain, and with antiseptics to heal the wound it makes has been invented by Alexander Foster Humphrey, of Pittsburg.

The new anaesthetic, antiseptic bullet contains both narcotic and antiseptic drugs. There are enough of the former so that a wound even in a vital part will cause little pain or shock to the nervous system. And while the narcotics are bringing relief to the wounded man the antiseptic preparations are cleansing the torn tissues and checking the flow of blood.

The Humphrey bullet is exceedingly simple in construction. It looks exactly like any bullet at first glance, but a closer inspection will reveal two angular grooves pressed into its nickel jacket.

The grooves are where the first-aid drugs are stored. The one nearest the tip is for the narcotic and the other for the antiseptics.

The drugs are encased in layers of gelatine, and when the grooves are filled a thin coating of paraffin is spread over the top.

The paraffin coating is melted by the friction of the bullet n the rifling of the projecting weapon, and in its flight through the air, so that the drugs are ready to begin their work of healing as soon as the missile finds its mark.

The small amount of gelatine which is used to hold the drugs in place is entirely harmless, and is quickly absorbed by the blood. The anaesthetic is also absorbed by the system almost instantly, and in a very short time produces nearly complete insensibility to pain. At the same time the antiseptic is checking the hemorrhage, and uniting with the blood to soothe and heal the torn flesh.

During a thunder storm at Gibralter Sunday a cloud rained millions of tiny frogs, which had evidently been sucked up from a lake twenty miles away. The ground was swarming with them.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,500 acres will be leased to one applicant.

Applications for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns shall be furnished at least once a year.

The lease will include the coal mining rights only, but the lease may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to the Agent or Sub-Agent of Dominion lands.

W. W. CORY.

Deputy Minister of the Interior.

TOWN AND COUNTRY NOTES

Mrs. W. Scott left Monday morning for a visit to the prairie.

* * *

Mrs. Curts was a passenger Tuesday to Hammond, B. C., where she is to pay a visit to friends. 6

* * *

A split has occurred in the directorare of the Penticton Fruit Growers' Union, and is the outcome of the failure to obtain the assistance of the Okanagan United Growers in operating the cannery.

* * *

The local lodge of Rebekahs are holding a picnic on the first of July and cordially invite the Oddfellows and their wives to join them. All desirous of joining the party are requested to meet in the lodge room at 1.30 p.m. sharp.

* * *

The pre-cooling plant at Summerland is not likely to be operated by the government this season. The fruit union are willing to run the plant this season, but have not yet been able to get what they consider satisfactory terms from the government.

* * *

C.P.R. Agent Swerdfager is leaving this week end for a holiday jaunt into southern California. He in company with Mrs. Swerdfager and family who will join him at the coast, will visit the San Francisco exhibition and call at many of the most interesting points on the Pacific coast.

* * *

A change takes place this week in the management of the Bank of Commerce, Mr. H. G. Pangman having been transferred to the North Vancouver branch. Actually an exchange of managers between the two places has taken place. Mr. J. A. Forster, formerly of North Vancouver has now taken charge here. Mr. and Mrs. Forster arrived Monday. Mr. Pangman, who left this morning for the coast, has been with the Kelowna branch ever since its establishment here about four years ago, and besides working up a good business, has made many friends. For the last two or three years he has taken a prominent part in the work of the Board of Trade.

* * *

An important land transfer is to take place shortly as we understand that Mr. Fred Lewis, a well-known farmer on the Vernon Road has made arrangements for the purchase of the fine property known as the Lefevre estate, held in trust for the family of the late Alphonse Lefevre. The property consists of 143 acres of some of the finest land in the Kelowna district. It is amongst the last of the old original pre-emptions of the district remaining unsubdivided. Originally it was known as the Bouchere stock ranch, Bouchere being the original settler, and its rich pastures has been the grazing grounds for hundreds of head of cattle for which the valley was once famous. On the north the ranch is bounded by Mill Creek, which sweeps through a beautiful belt of timber around the foot of Dilworth Mountain. Through it passes the right of way of the projected C.N.R., line from Kamloops to Kelowna. Mr. Lewis is leaving this week for his old home in Ontario on a business visit in connection with the transaction.

Mr. B. F. Petch, of Regina, Sask., is on a visit this week to Mr. Geo. McKenzie.

* * *

Mr. A. Venables has returned to Calgary after three week's visit to his old school friend Mr. Thrussell.

* * *

The local Masonic Lodge will attend service Sunday morning at the Presbyterian church. The Rev. A. Dunn will preach.

* * *

Summerland people are talking of organizing a joint movement for the purpose of securing a Sunday boat service.

* * *

R. F. Beaven, government remount commissioner, is to be in town July 1st for the purpose of purchasing a further supply of horses.

* * *

Mr. J. W. Nutt, representing the Allan line of steamships was in town this week. He is making a tour of inspection of the various agencies of the company.

* * *

The local creamery has this week undertaken the supply for a considerable quantity of milk and cream to Vernon for the supplying of the military camps there.

* * *

D. Gellatly, who is perhaps the largest independent shipper of vegetables in the Okanagan expects to have a greatly increased output this year, amounting to about 150 cars of produce.

* * *

The Kelowna Steam Laundry has this week secured an important contract with the military camp at Vernon. The contract will include the laundry work for about 1100 men of the new 54th regiment in training there, and will probably mean an addition to Kelowna's payroll of over $1.000 per month.

* * *

A new freight tariff covering rates between Vancouver and points of the K.V.R., was issued a few days ago. There is not a very marked reduction in any of the class rates for less than car lots, as compared with C.P.R. rail and lake races between Vancouver and south Okanagan points. The largest cut is on carlots of lumber and cattle these being reduced by about one eighth.

* * *

A party of local anglers betook themselves to the hills last week end and wandered out over the Belgo property to Mission Creek. Here they carefully prepared their lines and set out wading up stream when suddenly a large bear appeared on the bank opposite one of the fishermen and proceeded to enter into the creek, also in search of food. The angler, we will call him "Percy". immediately evacuated his position in favor of the new comer. This did not satisfy Mr. Bruin, who followed the retreating angler for some distance, Percy making the dust fly so that bruin soon gave up the chase. "Percy" arrived amang the rest of the party "all in" and related his story, much to the delight of all. Another of the party saw the same animal and declared it was a ground hog.

BELGIAN WOMEN FEEDING SOLDIERS ON THE FIRING LINE

These women have greatly cheered the soldiers by bringing them many dainties they otherwise would not have secured. In reaching the trenches the women frequently have exposed themselves to the enemy's fire.

Hay Time will be Early This Year

Look over your equipment now, and be ready with a reliable outfit when the rush comes. We are agents for and have in stock, the following

Haymaking Machinery

McCormick Mowers, 4½ and 5-foot cut

Deering Mowers, 4½ and 5-foot cut

McCormick and Deering Rakes, 8-ft., 9-ft. and 10-ft.

Hay Tedders in the different sizes

Call in and look around, and if you desire to purchase we feel sure that we can please you

Botanical Notes

Special interest attaches to the first named plant of this week's list. It was a favorite with Linnaeus, the father of the modern system in classification of plants and animals; and it was with his sanction named after him.

61. Twin-flower, Linnaea borealis. The sole one of the genus, which belongs to the Honeysuckle family. A small opposite-leaved trailing plant, in cool woods of the northern hemisphere and very common in B. C. It may be found on the Pentland hills near Edinburgh, Scotland, but its British locations are rare. The little pink bell-shaped flowers, less than half an inch long, are in pairs; stamens four, two being long and two short. The fragrance scents the air.

Replying to a question on type and variation, a note from the botanical office tells that "we have in B. C. typical L. borealis with the apex of the leaves almost perfectly rounded . . We also have the long-flowered variety with a corolla 1½ or twice the size of the typical form, and having as a rule a more or less acute apex to the leaves. Up to the present we have referred to this variety as longiflora."

62. Geranium viscosissimum grows about two feet high in masses up the Mission Creek. Flower, color rose purple, an inch across.

63. Bristly Butter-cup, (Ranunculus pennsylvanicus). Leaves 3-divided; divisions 3-cleft. Petals equal, the reflexed petals, or shorter. Stems very hairy.

64. An Alum-root, Heuchera cylindrica ovalis. Saxifrage family. Cream colored cylindrical spike about a foot high. Leaves cordate-ovate, slightly 5-lobed, and doubly toothed. Location shaded cliffs or dry woods.

65. Virginian Sarsaparilla, (Aralia nudicaulis). Ginseng family. The short woody stalk bears a single long-stalked leaf, about a foot high, and a shorter naked scape with 2 to 7 umbels. Greenish flower, parts in fives (May) green seed vessels (June), turning black. The oval leaflets 3 to 4 inches long, 5 on each of the three divisions or the 5th (top) leaflet absent. Mission Creek.

66. Salsify of Purple Goat's-Beard. (Tragopogon porrifolius). Chicory family. Is grown as a vegetable, but often found wild as on the northern flats of Kelowna townsite. 2 to over 3 feet high. Linear lanceolate leaves. Differs from the yellow Goat's Beard in the violet color of the rays and in their being shorter than the enclosing involucre. The flower closes at midday. "Nap-at-noon."

A botanical office leaflet of 21 pages recently issued on the Collection and Preservation of Plants, by J. Davidson, F.L.S., provincial botanist, gives many valuable hints.

For students' popular handbooks of our Flora we have as yet to depend on American authors. Piper's "Flora of Washington" being mentioned, and Clements and Clements', "Rocky Mountain Flowers", (the latter published by the H. W. Wilson Co., White Plains New York City, at three dollars).

The following information, abbreviated, was kindly supplied by the Botanical office in reply to queries.

The great work, the Index Kewensis, which had been suggested by Charles Darwin, was begun in 1895 and much lessened the confusion resulting from botanists of different countries naming a plant by different names, which was a great difficulty, though all alike accepted Linnaeus' binomial system of names. Supplements to this Kew Index are added every five years.

An international conference of botanists was held at Vienna, 1900, and a congress in 1905, when the International rules of Botanical nomenclature were drawn up, and additions were made in 1910, at Brussels. This year's congress, the third, due in London, had to be postponed on account of the war.

The American botanists unfortunately did not accept the Vienna rules. Gray's Manual of Botany, written without reference to the American rules (known as the Rochester Code), by two professors of Harvard University is fairly reliable as far as the names of B. C. plants contained in it are concerned. It is hoped that within five or ten years the Americans will fall in with the rules adopted by scientists of all other parts of the world.

"No one but a professional botanist can realize the enormous amount of work to be done and the enormous number of difficulties to be overcome before the botany of B. C., is lifted out of its chaotic condition."

"The Ottawa catalogue of plants does not necessarily supply the correct names; many of them are right, and many are out of date. The catalogue is valuable in-as-much as it supplies us with the state of botanical knowledge at the time it was written."

For customs purposes Pentiston has been made an outport of the Port of Greenwood.

Pennant in Schools League Not Yet Awarded

Owing to the game under protest from the beginning of the season between Rutland and Ellison being played off on Saturday last and being won by the latter three teams are now tie in the pennant race with 8 wins and 4 losses.

The game on Saturday, for the first five innings was as good ball as has been played on the local grounds this year and was very close. After the fifth inning, however Rutland began to slip back, and while Pearce was hit rather freely poor fielding was responsible for a good share of the runs scored against him.

The final score was 14 to 7 in favor of Ellison. The game was played off according to the advice of Mr. James Hewitt, sporting editor of the Vancouver Province, to whom Mr. Trench referred the matter for a decision.

Following is Mr. Hewitt's reply:

W. R. Trench, Esq.,
Kelowna, B. C.

Dear Sir.—According to all baseball rules "drawn" games must be played off before the end of the season, if they affect the championship.

In this instance the season appears to be completed, but in my opinion the game should be played. It might be mentioned in this connection that amateur leagues are conducted slightly different to professional organizations, whose season ends when the schedule is completed, and it is usual for the amateur clubs to play off ties after the regular schedule if they affect the leading teams.

Hoping that this will be satisfactory I remain, yours sincerely,

JAMES T. HEWITT.
Sporting Editor Province

The standing of the clubs at present is at follows:

Rutland	12	8	4—.666
Ellison	12	8	4—.666
High School	12	8	4—.666
Public School	12	0	12—.000

The executive met early this week to arrange for the tie to be played off and after the names were drawn the following schedule resulted:

June 26.—High School vs Rutland.
July 3.—Ellison vs. High School.
July 10.—Rutland vs. Ellison.

All games will be played in the city.

Free Matinee for the School Children To-Morrow

The following is a copy of a letter sent to Principal Rogers of the High School and Principal Richardson, of the Public School:

Dear Sirs,—Will you kindly have it announced to all teachers and pupils of the school that I have much pleasure in inviting all to a matinee moving picture program to be given in the Opera House on Friday, June 25, at 3 p.m., in celebration of the beginning of the holidays. All seats are free at this performance and it will afford me the greatest pleasure if your boys and girls will help to pack the Opera House on this occasion. I can assure you an excellent program of good pictures.

Yours very truly,
ROBERT DUNCAN.

BILLY SUNDAY'S STYLE

In a recent sermon Billy Sunday, the American evangelist, took up the story of David and Goliath. Here is an extract from the verbatim report:

"Who's that big stiff doing all the talking?" asked David of his brothers one day.

"Oh, he thinks he's the whole thing; he does that stunt every day," was the reply.

"Say," said David, "you mutts make me sick. Why don't you go out and soak the guy? Don't let him get away with the dough." So Saul said to David: "You'd better take my armor and sword." David put them on but he felt like a fellow with a hand-me-down suit about four time too big for him, so he shook them off and went down to the brook and picked up half a dozen stones. He put one of them in his sling and soaked Goliath between the lamps. Then he took his sword and chopped his block off.—Edmonton Journal.

Germany's reply to the American note will be ready about July 1, and will be of a conciliatory nature.

The assertion is made by newspapers of Rome that the Italian army now occupied 10,000 square kilometres (a kilometre is about two-thirds of a mile) "un-redeemed" territory, or more than twice as much as Austria offered Italy for remaining neutral.

NO ALUM

Weeds on Vacant Lots

What undoubtedly constitutes a menace to those farmers who are making an honest effort to keep their farms clean is the crop of weeds found growing on vacant lots and roadsides in and around our towns and cities. These vacant lots are often nothing more nor less than nurseries and breeding places for all kinds of weeds. This is especially true of towns where large areas adjoining have been subject to wildcat subdivisioning and have had roadways ploughed, forming lodging places for weeds, which are allowed to grow unmolested. These produce countless numbers of seeds, to be scattered by the winds over the farms. So far, bulletins, articles and advice pertaining to weed control have been directed at the farmer. A glance at the conditions found in most of our cities and towns will prove convincing that the farmer is not entirely to blame in the matter of weed seed production and distribution.

In the west the weed inspectors are being trained and instructed along lines that will enable them to assist the farmer in weed control, while at the same time provision by law is made to prevent any farmer from allowing his farm to become a breeding place for weeds and a menace to his neighbors. In most towns there are bylaws covering the weed problem but too often they are not enforced. Those living in towns and cities should co-operate and do their bit in the war against weeds. This is an important matter, and should receive strict attention by every town council. Action should be taken at once and not deferred until the weeds ripen and scatter their seeds.—F.C.N.

BUY IY NOW!

Say.
Do you remember when you were a kid,
How they used to tell you
About throwing a pebble into a pond,
And how it made a ripple
That went on, and on, and on
Until it reached the distant shore,
Or something like that?
And when we got big enough
You went to the minstrel show
And saw the end man
And the middle man
Show how a quarter of a dollar
Paid off ten dollars' worth of debts
In about five minutes,
By passing from Tambo to Bones,
And from Bones to Rastus,
And from Rastus to Ephraim.
And from Ephraim to Lijah,
And so on around the half circle?
And thenm when you were sent up
To College,
The high-brow Professor
Tried to explain the same thing?
You remember?
Well,
This is no talk on Political Economy
Or anything like that;
It't just a gentle hint
To the effect that Right Now
Is a good time for you
To start a little ripple of your own,
A good time
To start your dollars
Moving around the circle.
PAY OFF YOUR DEBTS,
BUY WHAT YOU NEED,
And buy it now.
Get things started.
Put money in circulation.
That's good sense;
And patriotism,
And good business.
Every ripple in the pond,
No matter how small
Helps break the stagnation.
Get busy
And make it splash.
"Buy it now."
And get your money back.
—Topeka Daily Capital.

School teacher.—What little boy can tell me where is the home of the swallow?

Bobby.—I ken, please.

Teacher.—Well, Bobby.

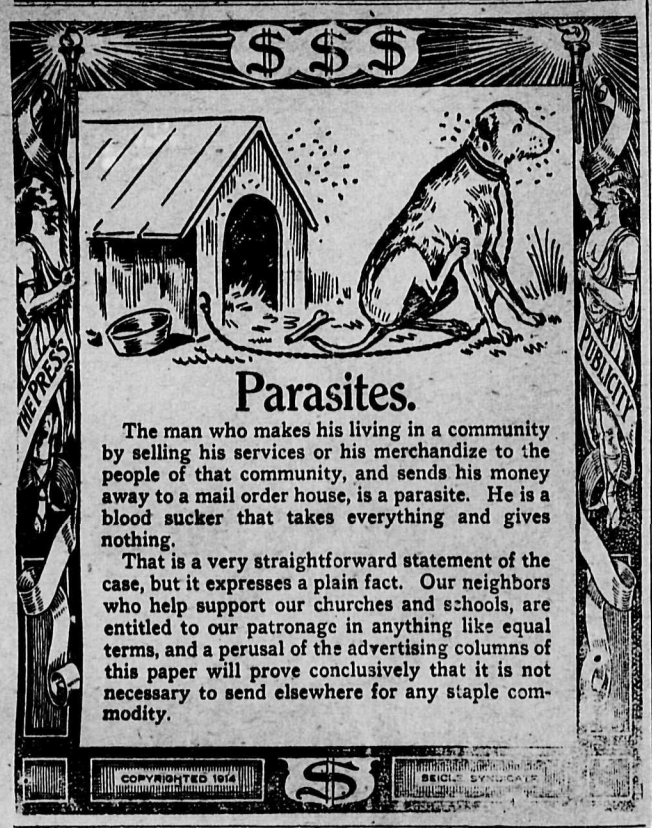
Bobby.—The home of the swallow is in the stummick.

Be Loyal To Your Own Community

Considerations for the Business Men

WE have devoted a considerable amount of both time and space in trying to convince the general public of the unprofitable plan of buying their supplies from mail order houses, and thus sending money OUT of their own town and receiving no more than they could get for it at home. The same principle applies to the business man in the matter of Printing. There are some who have not considered this. They get their Printing orders executed by outside offices, and yet expect the people of their home town to quit the mail order houses and deal with them.

We have every facility for doing all kinds of Commercial and High-Class Printing, and by giving us your orders you will not only boost your own town but directly help your own business by keeping money circulating at home.



Parasites.

The man who makes his living in a community by selling his services or his merchandize to the people of that community, and sends his money away to a mail order house, is a parasite. He is a blood sucker that takes everything and gives nothing.

That is a very straightforward statement of the case, but it expresses a plain fact. Our neighbors who help support our churches and schools, are entitled to our patronage in anything like equal terms, and a perusal of the advertising columns of this paper will prove conclusively that it is not necessary to send elsewhere for any staple commodity.

Britain Orders Big Aeroplanes in Canada

Britain is developing a larger and more powerful aeroplane for offensive service. Glenn H. Curtiss, the American aviator, has been commissioned to produce the machines, landing biplanes of 360 horse power, in course of construction at the new factory recently built by Curtiss in Toronto.

The giant aeroplane is expected to have a spread of nearly one hundred feet. Its power will be supplied by two engines of 180 horsepower.

These will add about 350 to 400 pounds weight, but this will be more than made up by drooping the heavy boat and substituting a landing chassis. It is estimated that the new craft will weigh at least 700 pounds more than the American. The latter, it is understood recently ascended 6000 feet in 35 minutes with a load of 1200 pounds.

Overall Factory Blown Up in Ontario

The overall factory of the Peabody Company Limited in Walkerville, a suburb of Windsor, was partially wrecked by the explosion of a bomb early Monday. The company is said to have just completed an order of 115,000 British uniforms. After the explosion in the overall factory, 27 sticks of dynamite attached to a time fuse which had been set for 5.15 a.m., were found under the armory at Windsor, but the fuse had burned out. It is said that 200 men slept in the armory Sunday night.

Horace B. Peabody, head of the overall company expressed the belief that the bomb had been placed by German sympathizers from Dertoit. Police and military authorities are working together on the case. The property loss was estimated at between $5000 and $10,000.

The Canadian Pacific Railway has lowered the freight rate on apples from Okanagan points to Vancouver from 40 to 30 cents per 100 pounds in carload lots.

Don't ax de good Lawd ter send Prosperity. Let Him see you wid yo' coat off an' yo' sleeves rolled high, tryin' ter pitch Hard Times over de fence, an' Prosperity will be settin' at yo' br'akfas' table nex' mawnin' an' you needn't wonder how he got dar!—Atlanta Conttitution.

Last Saturday's issue of the "Province" contained a long and interesting letter from Private F. T. Orchard, at one time salesman with the T. Malkin Co., wholesale grocers, and consequently well-known to many local merchants. Private Orchard is also nephew to Mr. P. B. Snashall of Kelowna. In his letter to a friend he throws many interesting sidelights upon the life which is being lived by the Canadian boys who made up the expeditionary force.

A manifesto is being circulated widely among the working classes by the German Socialist party in Germany in which Austria is accused of having caused the war. The manifesto complains of the ignorance in which German and Austrian people are kept, and denounces the German war party, imperialism and secret diplomacy as the arch enemies of the German people It is asserted that in March peace was possible, but the greed of the imperialists refused it.

Strawberries

Buy them now for canning and preserving. Would you like to have some Strawberry Short Cake in the middle of winter, so nice that your guests would think they were eating freshly-picked Strawberries? Here is a recipe for putting away Raw Strawberries:

RECIPE—Put your cleaned strawberries in a kettle and mash with a potato pounder until there are no solid pieces left. Add an equal amount of sugar (cup for cut or pound for pound) and let stand for 24 hours or longer until the sugar is thoroughly dissolved, giving frequent good stirrings.

Fill into screw top jars which have been previously sterilized and cooled, and dip your rubbers into hot water before sealing the jars.

Try some strawberries this way and you will not be disappointed.

Kelowna Creamery Butter
