MEETING OF CITY COUNCIL

A meeting of the city council was held on Monday last a full attendance of aldermen being present with Mayor DeHart in the chair after the minutes of the previous meeting had been read and adopted the following correspondence was read by the city clerk:—

B. C. Farmer and Fruit Grower—referred to Board of Trade.

Canadian Municipalities G. S. Wilson, resubscribing, filed

Kelowna Canning Co., re water connections. Referred to Fire and Water commitee.

Collet Bros re water connections. Referred to Fire and Water committee.

A letter was also read complaining of neighbor's sanitary arrengements.

Mr. Robertson conductor of the Kelowna band attended and asked for the co-operation of the city council in organizing a good band.

Mr. Robertson remarked that he had not been long in this part of the country, but as far as he could see he liked the conditions and climate. As long as he could find a suitable position in the town he would continue to stay here, and would make it his work to drill the various musicians into a presentable shape. He was sure the council would assist him in the matter. The band at present consisted of several beginners who, after a little tuition, would blossom forth into good muicians. As far as he could ascertain several good musicians had left the band, owing to the organization not being strong enough. He hoped to see these return soon and the whole matter supported by the council. When asked about finances, Mr. Robertson replied, the band was badly in need of two cornets and two clarionets. These would cost about $50 a piece, and a subscription or grant would have to be gone into in order to supply these. The Mayor instructed the Band committee to look into the matter, and to report at next meeting, it being decided that a good band ought to receive the support of the city. In the course of discussion it transpired that there were at present thirteen members. The band was greatly at a loss for want of instruments, what instruments remained were the property of the city but many had been taken away as the property of the player. Mr. Robinson thought it best for the band to have its own instruments, and to ask the council to assist them in that respect. Two clarionets and two cornets were needed, the cost would be about $200 for the four instruments.

Dr. Shepherd was present, and explained that a number of lots near his premises were covered with dead leaves, trees, grass, and other inflamable materials. He thought the council might take some action to have this refuse cleared, as it was endangering his property as well as other property adjacent. The likelyhood of a bush fire was considered, and Dr. Shepherd thought the council ought to take some steps in the matter. He had been asked by several people to approach the council and would not have come himself had not his neighbors also felt affrighted at fire. The matter was referred to the Board of Works to take what steps were necessary to relieve this nuisance.

The attention of the council was directed to other vacant places in and around the city, all of which were spread with inflamable refuse, and instructions were given to the city clerk to write one person in particular as to the cleaning of his lot in Barnard Avenue, the same to have attention before the first of June.

The Mayor explained that Mr. Lloyd-Jones had asked for permission to use the city's dump cart, in order to haul the sawdust away from the mill. Permission was granted.

By Ald. Cox an agreement was presented between D. Mills (the city scavenger) and the council, it was decided that the whole city should be included in the scavenging district. The agreement laid before the council that night included the whole city, being from the north side of Gaston Avenue due east to the east boundary of the city limits, thence south to the southern limits.

Mayor DeHart thought it advisable at the same time to levy a scavenger rate to be paid with the taxes, several people were in arrears, and it was a difficult job collecting the money.

Ald. Elliott thought it better to levy a proportunate rate on the assessment of the value of the property.

Ald. Ball pointed out that the matter had been discussed by other councils, and had caused endless debates. His idea was that a flat rate should be levied and placed and collected with the taxes. He pointed out that it was hard for people who did not need the scavenger to have to pay for the cleaning away of other people's refuse.

A committee consisting of Alds. Cox, Elliott and Ball were appointed to look into the matter and to report at next meeting. It was agreed however to approve the proposed agreement between the city and D. Mills, the Mayor and City Clerk being authorised to sign the necessary papers.

A lengthy discussion next ensued as to the state of the road in Water Street. It was thought a by-law ought to be passed making contractors who start a building responsible for the upkeep of a sidewalk around such building. The sidewalk by Raymer's old building had been torn up and no provision had been made for the pedestrian. Some reports had reached the council that people often stumbled over odd bricks and sawhorses at night. The street had been a kind of brick yard since the beginning of the building, and at one time it was quite a job for a wagon to and team to pass by. Such a condition would not improve the business down any street and the by-law was recommended to have the attention of the council.

It also transpired that street noises were very prevalent late at night. Ald. Ball pointed out that last Saturday an army of people were whistling and shouting away into the morning, tin cans were being beaten and large crackers were let off, causing a fearful noise, worse than if a gun had been let off. He thought this very inconvenient to any invalid or nervous person and he knew of one person in particular who had suffered from fright at the proceedings of Saturday night.

Ald. Cox, endorsed Ald. Ball's statement and thought the chief of police ought to have taken some steps. It was reported that he was present, but took no notice of the business.

Mr. G. Rose informed the council that the chief was in the Courier Office about eleven thirty and had told him about the affair. He also informed Mr. Rose that he had advised them to quit, and had left all quiet. The row must have started up after the chief had left, and he did not think the blame was entirely on his shoulders.

It was left in the hands of the Mayor to get the chief's report on the subject.

The Mayor tnought it about time something was done with reference to the cement sidewalks along main street, he suggested that the city clerk issue an advertisement calling for tenders.

Ald. Rowcliffe thought a better job might be made by paying by the day. Contract work was always hurried through and was never done as well as work paid for by the day. It was however decided that as the last sidewalks were well constructed and were the result of a tender there was no need to deviate from that course. The city clerk was therefore instructed to call for tenders, the same to be closed on May 26th.

Ald. Ball did not think the water main pipes were being put deep enough into the ground, he pointed out that even though we usually experience a very mild winter here, yet it is very often the case that the least degree of frost will go several feet into the ground owing to there being no snow to stop its progress, if our mains got frozen we would be in a fix. The matter was left in the hands of the water committee.

The following accounts were referred to the finance committee to be paid if found correct.

W. R. Glenn, hauling rock	$ 12 00
Kelowna Sawmill, lumber	23 80
Kelowna Sawmill, lumber	32 12
Kelowna Sawmill, sawdust	84 00
D. Leckie, hardware	16 59
Imperial Oil Co., oil and tanks	32 14
James Bros., hose coupling compound	50
A. E. Marks, repairs to jail	19 75
Collett Bros., feed for horses	1 50
Wm. Dallan, dray	50
T. W. Stirling, deed of land, lot 10 block 10	5 00
Oak Hall, overalls for the fire brigade	17 00
D. McMillan, teaming	7 65
G. H. Dunn, returning officer's poll clerk's fee	10 00
Kelowna Courier, printing, Dec. 15 to April 30	200 00
Oscar Tress, teaming pipes	7 50

Ald. Elliott pointed out that a certain amount of brush was alongside the banks of Mill Creek. When the water rises this will be washed down and likely cause a jam, it had better be removed.

Ald. Cox wished the council to think over the advisability of putting the names on the new cement sidewalks. After a little discussion it was decided to have the name hollowed out and painted black.

Mayor DeHart thought that now the Park By-law had been passed by the people, it would be as well to get on with the work. A suggestion was made that one or two prizes be given for the best plan for setting out the park. It was left in the hands of the park committee to report.

The Mayor wished the aldermen to think over the advisability of buying a team for the city's use. Quite a lot of money had been used up for paying for teaming and he thought that that bill would be greatly relieved if a team was bought. The city clerk was authorised to put an advertisement in the paper and get prices of the owners.

Mr. Dunn informed the council he was unable to get some electric light accounts paid. One of these delinquents had asked the old council to have a pole line connecting his house with the current. This was done and an account was sent in, the account was disputed and never paid. Now the house is rented to someone else who pays his light bill regularly, and he would like to know what steps he had better take to collect the money due previous to the time the house changed hands.

The aldermen instructed him to take proceedings.

Several other accounts were outstanding, although not for the same length of time, and it was decided to inform these that the light would be cut off if they were not paid at once.

The reports of committees were next called for.

Continued on page 8

A. J, Henderson, Eye-specialist, from Toronto, will be at W. R. Trench's Drug Store till May 27th.

Mr. J. B. Winslow, provincial government inspector of fruit, has been in town during last week. He is making several trips out into the country, to look at the fruit crop, and will report if any serious damage has been done by the frosts experienced just lately.

A number of young people spent a very enjoyable evening at the home of Mr. D. W. Sutherland last Thursday.

AQUATIC ASSOCIATION

Shareholder's Meeting

An interesting meeting of the shareholders in the newly incorporated Aquatic Association, was held in Raymer's Hall on Tuesday last. Mr. G. Rose was nominated to the chair. Twenty-two shareholders were present.

Mr. Rose in commenting on the present meeting said the sale of shares had not received the support that was anticipated, and it was a question to decide as to whether the Association could start building under their present plans or if they would have to cut down the dimensions of the building owing to lack of shareholders. He strongly urged that efforts should be made to visit people outside the town with a view to getting them to subscribe, but it was impossible under the present conditions to do this, as the various business men in town were unable to get around and see prospective subscribers, owing to press of business. He pointed out that Mr. A. L. Meugens had accepted the position of secretary pro tem, but owing to his business, he was unable to carry on the position. He would ask Mr. Meugens to read out the names of the various subscribers.

Mr. Meugens reported that at present 87 shares had been subscribed for. This covered in all 49 names, and it was possible to get many more. He did not see any danger in not getting the full subscription right away, and thought the present shareholders ought to advise some plan whereby the various likely subscribers might be approached. The subscription at present entailed an amount of $2,175. Eight or nine more had been promised but these had not made their first payment and were not included in the list.

Mr. Rose wished the shareholders present would advise on the best plan to be taken, as it was impossible to proceed with the building under the present conditions. At least $5,000 ought to be guaranteed before the building was started.

Mr. Crowley thought that someone might be instructed to look after the balance of the shares, and a certain percentage allowed him for every share sold. It was impossible for business men to look after the selling of shares. He would suggest that the person so employed would receive a good commission of about 5 per cent. and that a certain limited time be put in the agreement with him to sell the shares.

Mayor DeHart was of the opinion that a sliding scale would be better employed, and suggested that 5 per cent. be paid for the first thousand sold, 7½ per cent. for the second and 10 per cent. for the third. It was finally agreed to employ a man to look after the sale of shares for a limited time, the rate of commission to be fixed by the new directors.

Mr. Crowley wished the names of the subscribers to be read out so that they could see if anyone was present who was not a shareholder.

Mr. C. Clarke suggested that it would be better to exclude the press from such meetings as he did not think they ought to report meetings of that description.

The Chairman, Mr. C. Rose, in support of the Press replied that he thought it would be an act of discourtesy to try to exclude the Press from any meeting. Much of the good welfare of companies was due to the influence of the press, and he would not endorse any statement that the press ought not to be admitted to their meetings.

It now rested with the shareholders to pick out their directors and Mr. Rose asked that a number be chosen, which was easily devisible by three, as one third of the members elected would hold office for two consecutive years, the re-

VICTORIA DAY SPORTS

Committee Arrange Details

A meeting of the sports committee was held on Saturday to make arrangements for the carrying out of the sports on May 24th.

The Mayor and Ald. Bailey were present to give assistance in the organization, the business being much and varied.

The question of finances was gone into closely, the Secretary explaining that the money for the prizes for the Marathon Race had been already subscribed, and very little touting for subscriptions had been done.

Mayor DeHart wished to know how much would be required for the other events, and a general opinion was that $150 would be sufficient. The Mayor advocated making out a prize list and alloting the proposed prizes to the various races. He did not think there would be any difficulty in raising the money.

The committee wished to ask the Mayor if they could take a collection in the park to defray the cost of running the races and for advertisements, etc. Mayor DeHart was of the opinion that such a thing could be done. Permission was also asked to put the old grand stand in repair and to charge for admission. The grand stand of course to be at the winning post.

Sanction was given to have this carried through, provided a good carpenter was employed, and the stand was set on a good solid footing. The name of Mr. Potter who has been doing quite a lot of work around town and in the country of a satisfactory nature was afterwards submitted, and it was decided to see him and make arrangements.

The Mayor was asked to act as judge during the day and Ald. Bailey to be clerk of the course. Both these agreed to act in the capacity, Ald. Bailey being only able to act in the morning. It was also agreed to approach Mr. McGuire and Mr. F. A. Taylor to act as starters, and Doctor Boyce to act as judge to assist the Mayor. L. C. Aviss was appointed clerk of the course during Mr. Bailey's absence.

A deputation had been received during the week, asking leave to have a football match during the latter part of the afternoon. It was decided to allow this and to shift the sports on to an earlier start so as to finish about 4:30 p.m.

The competitors of the Marathon did not like the idea of having it round the park, and much discussion was forthcoming in that respect. It was decided to run it in the park irrespective of the competitors, wish to have it run out in the country. The townspeople it was pointed out will be responsible for most of the money subscribed, and it is their wish to have it run in the park. The committee had no power to alter their opinion, and the event will be round the track in the park.

Permission was asked to start preparing the ground on the Saturday before Victoria Day. This was granted.

The minor sports were then gone into, times altered and prize money proposed.

The following programme was agreed upon.

10:00	Marathon Race in Park
11:15	100 yards Boy's Race
11:20	100 yards Girls Race
11:25	Long Jump
11:45	High Jump
11:55	Pole Jump
1:24	Quarter Mile
1:35	Sack Race
1:45	Mile Race
2:00	Obstacle
2:15	Hurdles
2:30	Three-legged Race
2:40	100 yards
3:00	Greasy Pole
3:10	Half Mile
3:30	220 yards
3:40	Tug o' War

Mr. McJannet had promised a ham for the greasy pole and Mr. J. B. Knowles was striking medals for the 220 yards.

The meeting then closed, agreeing to meet again on Wednesday, May 19th.

A meeting of the sports committee was held on Wednesday evening, much and varied business being discussed. It was decided to include a race for boys and girls under ten, during the afternoon. Rev. Herdman giving the first prize.

Lap scorers were told off for the Marathon Race, and H. Lee was elected on the committee. It was decided to strike medals for the Tug o' War, each team competing to be eight in number. Owing to Vernon being unable to play on that day it was decided to entertain the idea of a game. Kelowna v. The Benches.

RESULT OF VOTING ON BY-LAWS

The voting on By-laws No. 60 and 61 took place in the city council chamber last Monday. Mr. G. H. Dunn being the returning officer, assisted by Mr. Hamilton.

Seventy-five citizens recorded their votes as follows:

By-law No. 60. To convey to the Canadian Pacific Railway Co., all the city's interests in a certain portion of Water Street. For 70, against 5.

By-law No. 61. To spend the sum of $4,035 upon the laying out and improving the park. For 56, against 19.

Number necessary to carry 45.

The C.P.R. were at once informed of the result of the voting on By-law No. 60 and will start work at once on the new wharves.

The council will take immediate steps to use the money provided for in By-law No. 61, on the improvement of the park property.

Baseball Team Re-organized.

During the present week, a change has come over the baseball team. It was practically decided to split up, owing to lack of funds, and other business complications, when Mr. Eastman put a project before the members that saved the situation. He agreed to run the team himself, and to pay the members so much a game, and stand either to win or lose over the deal. The team reorganized, and will play Summerland on the 24th of May at Summerland.

This will be the first game these newly made professionals will play under their new colors. It is the hope of Mr. Eastman that even if he should lose over the project he will at least turn out a team worthy of the Kelowna badge.

Hospital Bazaar.

Raymer's Hall was one glow of color, last Wednesday. A striking comparison to the previous evening, when the shelves and stalls were being put up, and the room filled with carpenters. Many becoming gowns were worn by the vast number of ladies present, when Mayor DeHart made his opening speech. In generally praising the project, the mayor went fully into finances, and the cost of running such a noble institution as the Kelowna Hospital. The proceeds of the sale of goods were to be given to this institution, and he had great pleasure in declaring the Bazaar open. A general stampede was made to the various stalls, and several large purchases were made within the first few minutes. The younger members of the comunity made great havoc on the fish-pond, which was held in the room adjoining, and where a dainty array of tables were set out for the serving of tea.

Are the citizens of Kelowna losing interest in the welfare of their town, or can it be that the general rush of business caused the public meeting advertised to be held in Raymer's Hall last Saturday to be practically unattended. The meeting was called to explain By-laws No. 59 and 61, both of which deal with matters of vital importance to the city and to every citizen. Owing to the short attendance it was deemed expedient to cancel the meeting. The published by-laws have given a general idea as to the cause that prompts the City Council taking a vote of the citizens, but there may as yet be some unexplained doubts in the minds of the public which require removing. The meeting was called with the idea of finding out if such a doubt prevailed.

These poorly attended meetings are discouraging to the Mayor and Aldermen, or indeed anyone else engaged in public work, for other societies here have the same cause of complaint. There is no doubt that the average individual thought to himself that the by-laws would be passed anyway whether he went to the meeting or not, but it is just as well if the public at large get their heads together occasionally at a public meeting and assist the council when an important project is before them.

Our Council sits once, twice and occasionally even three times during the week in the interests of the city and it is only fair that the public should be ready to respond when called upon to help. If the city is to go ahead, as we suppose is the wish of everyone in it, that advance will be made more rapid and decided by enthusiastic co-operation, and not by sinking into that state of lethargy which leaves everything to be done by the city council.

Now that the dryer weather is coming and the dust in the roads threatens to become a nuisance it is pleasing to note that steps are being taken to sprinkle them with water. The method adopted at present however bids fair to prove rather rather expensive. It seems at first sight a very handy and "slick" arrangement to bring out the fire hose and use the water from the hydrants but how long will the fabric of the hose stand the rough wear of being dragged by a horse along the streets under a high pressure of water? The hose is certainly not made to stand such usage, and it must in a very short time begin to develop holes which will render it unfit for use in case of fire. Then——new hose! This rough method will soon cost the price of a road sprinkler, and now that the city are considering the purchase of a team, it might prove economy to provide the proper appliance for laying the dust.

More Microbes.

Microbes, microbes,
Microbes on the brain,
Microbes in the omnibus,
Microbes in the train,
Microbes in the oyster,
Microbes in the sprat,
Microbes in the grampus,
And in the sticklebat.

Microbes on the tablecloth,
Microbes in the plate,
Microbes in the parsley sauce,
Microbes in the skate,
Microbes in the winkle,
Microbes in the shark,
Microbes in the conge-eel,
For that's what makes him bark.

Microbes in the lobster,
Microbes in the crab,
Microbes in the almond whelk!
Microbes in the dab,
Microbes in the sturgeon,
Microbes in the cream,
Microbes in the mackerel,
The largest ever seen,

Microbes in the weaver,
Microbes in the pout,
Microbes in the salmon,
Microbes in the trout,
Microbes in the silver eel,
Nicrobes in the shrimp,
Microbes in the codfish,
For that's what makes him crimp.

Microbes in the bloater,
Microbes in the whale,
Microbes in the lamprey,
Which makes him wag his tail.
Microbes in the cat-fish,
Microbes in the sole,
Microbes in the dory,
Which makes him look so droll

Microbes, microbes, in everything we eat,
Microbes on the cranium of everyone we meet;
Doctors all are striving to bring about their fall,
Yet, if it wasn't for the microbes,
We couldn't live at all.

THE CHEERFUL TURTLE.

This Queer Creature Enjoys Many Peculiar Advantages.

"To be or not to be—a turtle? To be certainly, if I could not be a man," declares one who speaks with knowledge of his subject. "Basking in tropical suns or cruising leisurely in cool depths, the turtle has an exceedingly good time. As soon as the baby turtle emerges from the egg he scuttles down to the sea. He has no one to teach him, no one to guide. In his little brain there is implanted a streak of caution, based on the fact that until a certain period his projecting armor is soft and no defense against hungry fish, and he immediately seeks shelter in the tropical profusion of the gulf weed, which holds within its branching fronds an astonishing abundance of marine life.

"Here the young turtle feeds unmolested and knows that his armor is hardening apace. Once he has attained the weight of twenty-five pounds he may 'cheek' freely any monster of the deep. After that no fish or mammal ever interferes with him. Intending devourers may struggle all day to break through his iron shell. They always fail.

"The turtle, like the sperm whale, has but one enemy—man. Now, even that sperm whale must come pretty frequently to the surface to breathe, and if it got beached high and dry on land what would become of it? But the cheerful turtle can stay below the surface for a week if he wants to, and he often does, while if he had to spend an equal time on land he would enjoy the change and be none the worse for it. He is neither fish, flesh nor fowl, yet his flesh partakes of the characteristics of all three.

"Eating seems a mere superfluity with him, since for weeks at a time he may be placed in a barrel, with the bung out, and emerge after his long fast apparently none the worse for his enforced abstinence from food, from light and almost from air. Of all the warm blooded organisms there is none so tenacious of life as the turtle. Injuries that would be instantly fatal even to fish leave the turtle apparently undisturbed, and his power of keeping death at bay is nothing short of marvelous."

AN EFFECTIVE SERMON.

Trumpet Blast That Drove the People to Repentance.

Old Peter Cartwright was a famous preacher and circuit rider many years ago.

The exhorter was holding a camp meeting in Ohio. There was a great number of campers on the field, and the eccentric speaker addressed vast concourses at every service, but he thought too few were being converted. He felt that something should be done to stir the sinners to repentance, so he prepared a strong sermon on the second coming of Christ. He told how the world would go on in its sin and wickedness and at last Gabriel would sound his trumpet and time would come to an end. He described the horrors of the lost and the joys of those who were saved. The sermon grew in intensity, and he brought his people up to a grand climax, when suddenly the sound of a trumpet smote the ears of the anxious throng.

There was a great sensation, and many fell upon their knees in terror and began to repent and pray. Women screamed and strong men groaned. Pandemonium was let loose for a few minutes. After the terror had somewhat ceased the preacher called to a man up a tree, and he descended with a long tin horn in his hand. The speaker then turned in fierce wrath and upbraided the people. He cried out in stentorian tones that, if a man with a tin horn up a tree could frighten them so, how would it be in the last great end when Gabriel's trumpet sounded the knell of the world! The sermon had a great effect upon the vast audience, and many hundreds flocked to the front and were converted.

Simple When You Know How.

An innocent cockney while in the country asked a farmer how they managed to grow streaky bacon.

"Oh, it is simple enough," said the honest agriculturist. "One week we starve the pig or feed him very little. That makes a layer of lean meat. Next week we give him all he can possibly eat, even working overtime, and that makes a row of fat. So by alternate starving and feeding we get the beautiful streaky bacon."

"Dear me," said the cockney, "and how do you make the ham?"

"Oh, we manage that by putting a ring in the pig's nose," was the reply.—London M. A. P.

The Careful Scots.

A Scot and his wife came to London, and the worthy pair were in a hundred fears concerning the diabolical ingenuity of London thieves.

As they took their first walk down the Strand the husband whispered of a sudden hoarsely in her ears, "Janet, wumman, hast thou got thy teeth feexed feermly in thy gums?"

"Na, na," she answered; "A'm no sich a fule! I've left 'em safely lockit awa' in the portmonty!"—London Chronicle.

What a Blessing!

Smith—What a blessing children are! Jones (enthusiastically)—Aren't they! Now that my wife has two to look after she has no time to play the piano.

The Plot.

Doctor—I think I shall have to call in some other physicians for consultation. Patient—That's right. Go ahead. Get as many of the fellows as you can.—London T[illegible]

Old Country News

Thames Island Sold.

Another island on the Thames was sold at the Tottenhouse Mart by auction. The Island which is just off Surbiton was at one time head quarters of the Kingston Rowing Club, and the went under the name of Raven's Ait. The purchaser was Mr. Hart, who was at one time partner to Mr. Budden at this point. The price was £4,000, and it is estimated that about an acre and a quarter of land is entailed in the purchase.

Tug Collides With Council Boat.

A collision occurred off Gravesend between the tug Britannia, and a council sewage vessel named Bazalgette. The collison which was due to a fog, stove in the bows of the Brittannia and caused her to sink immediately. The crew consisted of seven men, five of whom were drowned. The mate who jumped overboard at the first impact, was saved by a life line which was thrown by the colliding steamer. The captain was picked up afterwards by a boat from a passing tug. Several of the drowned men leave widows and children.

Forest and Dock Fires in England.

Forest fires are devastating the Aldershot district of Hampshire. The district which was planted out by William the Conqueror in 1079. The Norman King made Winchester his capital and devastated a progressive countryside to provide for the sport he so loved. He planted the forest with oaks and beeches, and many of the trees now being burned are dated back to his time. The forest at one time furnished a lot of the oak used in building warships before the iron age time. The forest is full of game, principally deer. It is estimated that about two thousand acres are already burned, and the troops have been called out to fight the flames. A great fire also raged in the dock district at Swansea. Several buildings were burned, including the custom house.

Misplaced Anxiety.

Much anxiety prevailed at Lloyds, in consequence of the report that the steamer Castlegarth of Newcastle was greatly overdue at Bombay. A reinsurance rate of 25 guineas per cent. had been taken freely, thousands of pounds of reinsurance being put through at that rate. The report is now through that the vessel has been snugly stowed away in port since the middle of April, and owing to an oversight the vessel was not telegraphed as arrived.

The whole business has been without example, it being the first case where a vessel has not been reported within 48 hours of its arrival. Those who had the reinsurance are jubilant over the affair while the issuers are busy tearing their hair, and passing remarks against the telegraph system at that point. It is certain that information will be required and some interesting cases will be the result. The Castlegarth is a vessel of 2615 tons, valued including cargo at £50,000.

Arrested After Nine Years.

The extraordinary case of a man being arrested for an offence committed nine years previously has just come to light at Epping. His name is Walter Tugby, and it was on the day the whole of England were celebrating the relief of Ladysmith that Tugby was found driving a horse at a great speed. He was arrested, and owing to the occasion the Judge only imposed a fine of 28 shillings. Tugby forgot to pay and the court did not press the matter, in fact very nearly forgot to do so. Last month two policemen met Tugby in the street, and showing payment papers, requested him to fix the matter up. He however refused, and was given the option of paying or doing fourteen days. Tugby has just been released and is very indignant at the action taken by the police.

Lady Attacked in Broad Daylight.

Mrs. Beeby a wealthy widow living at Putney, was attacked in broad daylight by two tramps. Mrs. Beeby was out walking in the afternoon when she was stoped by her assailants. She offered some resistance but was roughly treated by the men. They took from her everything of value she had about her, and then decamped, no one unfortunately being within hearing of Mrs. Beeby's calls for assistance. She was, however, able to make her way home and his since been suffering from shock and severe handling. No trace of the perpetrators of the outrage have yet been discovered.

Death of H. P. Truefitt.

England has just lost one of its most remarkable celebrites, and most famous hair-dressers. Mr. Henry P. Truefitt died at Barnes, after a very short illness. The shock to the society patrons was immense, the news spread with great rapidity, when the shop in Bond Street was closed with black shutters. It is said that society people, as well as royalty, often told Mr. Truefitt their secret stories, and some time ago he was asked to write his reminiscenses. He had a fund of ancedotes about notable people which was really well-nigh inexhaustable. He firmly declined to make "copy" of his patrons for any sum. He leaves a widow, five sons, and two daughters.

News of the Valley.

Armstrong is advertising two interesting by-laws. One the Bicycle By-law, the other the Curfew By-law. The former enacts that no person shall exceed eight miles an hour riding in the streets, also that bells and lights be provided on all machines. It also makes provision for persons found throwing glass or the like about the streets in order to puncture the tires of machines. The bicycle is not allowed to be ridden on any sidewalk under a penalty not exceeding twenty-five dollars. The Curfew by-law enacts that no children under fifteen years of age shall be allowed on the streets, between the hours of nine o'clock in the evening and six o'clock in the morning, unless the child is in the charge of a parent or guardian.

The reports of the Mara fire, although bad, have hardly been severe enough. The damage done greatly exceeding the reports. The Armstrong branch of the W.C.T.U. have taken matters into their hands and are receiving bedding, clothing and cooking utensils for distribution among the people who have lost nearly all they had by this disastrous fire. It is to be hoped that what help Kelowna can give will be sent to this society as soon as possible.

There will be a W.C.T.U. convention in Summerland on May 26th and 27th when a large number of delegates from all points in the Okanagan will, it is expected, be present.

The Summerland Amateur Dramatic Society are due to present "The School Mistress" by A. W. Pinero, on Wednesday, May 26th. Lovers of the play will find it an interesting trip from here to Summerland in the afternoon, returning in time for business in the morning.

A curious accident occurred at Vernon on the old bridge on the Coldstream Road south of the town. The Misses Butters, daughters of Mr. Thos. Butters of Lumley, and the rig they they were driving were precipitated over the bridge into the ravine, a drop of about twenty feet. By a miracle neither of the young ladies were killed, although they did not escape without injury. One of the horses was found to be in such pain that the veterinary surgeon deemed it necessary to shoot it at once. The bridge is severely critizised by the inhabitants of Vernon and it is generally thought the Government ought to take steps to stop the occurrence of a similar accident.

News of the Prairie.

The sum of $500 has been voted by the Moose Jaw City Council for the relief of suffers from the recent prairie fires around the district. The reports show that many are in great need. Benefit concerts are also being arranged.

Rain seems to have been prevalent throughout the county, and while the townspeople are grumbling over postponed baseball matches, the farmers are rejoicing. The rains of the first half of last week, followed by the sunshine of the latter part has made the grain blades show above the ground.

W. C. T. U. Notes.

Conducted by the Ladies of the Kelowna branch of the W. C. T. U.

Too Many Saloons

From the Roman Catholic Record.

In addressing the grand jury at the opening of the court the Hon. Mr. Justice Teetzel referred to the Larocque murder trial, and said it was another instance of the baneful effect of over indulgence in drink. It was a lamentable fact he said that out of ten cases of homicide he had tried seven men on trial were in that position through drink, and in two or three other cases the victims had been intoxicated and had brought the attack on themselves. He was pleased at the sentiment expressed throughout the province in favor of the reduction of the number of licenses. That, as he declared that almost every city has more licenced places than are necessary, is due to our mind to the indifference and neglect of the citizen. The liquor men are organized, with lawyers to warn them against every obstacle; we have no unity, no compactness, and are handicapped by adherents whose hearts are better than their heads. While we take vocal exercise the liquor men who control vast interests and pull the strings of a hundred bar-rooms are watching, and contravening when possible, every move of the law maker. And entrenched behind the law money-bags and donations to this and that, always a matter of business, they ask the few indignant citizens: "Well what are you going to do about it?"

Resolutions are of no avail, and the fiery eloquence looks pale by the sheen of the dollar. The first and most necessary step toward reform—we quote Archbishop Ireland—"is to reduce beer and whiskey men and their friends to obscurity, to wrest completely from their hands the helm of government in village, city and state." This will be done when Catholic and non-Catholic stand in this matter on a common platform. And the first plank in that platform should be: Vote for the men who promise to hold high above all party cries the welfare of Canada and its citizens.

Defeat of an Army.

During the encampment of several regiments of soldiers in a certain district the wood and turf used for cooking purposes were carted by the neighboring farmers. One day a donkey cart full of turf was brought in, the driver being a country lad.

As a regimental band was playing, he stood in front of the donkey and held the animal tightly by the head. Some of the "smart ones" gathered round, highly pleased, and the wit of the party asked why he "held his brother so tightly". The reply was crushing; "I'm afraid he might enlist."

Two of a Kind.

A distinguished specialist was called upon a week or two ago by an eminent government official for treatment for a nervous ailment.

"The first thing you must do," said the physician, after an examination, "is to give up both smoking and drinking."

Whereupon the eminent official became peevish. "Look here doctor," he burst out. "now your talking just like my wife!"

Provincial and General News

C. P. R Agent Accused of Theft.

At the speedy trial courts at Regina, Judge Newlands handed a six months term to Peebles the C. P. R. agent at Heward Sask. The accusation was one of stealing personal belongings from trunks, when they were in the custody of the company. The accused pleaded guilty to the charge, and without further comment was given the above mentioned term of imprisonment. It was publicly know n that a purse containing $400, had been from his charge, but this matter was not brought into the accusation, sufficient proof of the theft not being ready. Mrs. Peebles who was charged with being an accessory to the crime, is out on bail, and will likely fight her case.

Many Bidders for Coveted Land.

Three quarter sections, two near Nanton and one near Carbon, Alta., concerning which there was nearly a riot about a month ago, two city policemen grabbing them by virtue of their uniform, were sold by auction at Calgary last week. The auctioneer was T. W. Martin, of Medicine Hat, and nearly one hundred bidders were present. Arthur Wannog of Nanton, got one quarter, at $12.50 an acre, Robert Robertson, of Nanton, getting the other in the neighborhood of the same price. Mrs. Mary Jane Ross, obtained the quarter at Carbon for $6.50 per acre. Mrs. Ross was one of those who obtained homestead rights originally by the intervention of the city policemen, both of whom lost the quarter sections already allotted to them.

C.P.R. Steamer Collides in Fog

The steamer Bruce brougnt the first consignment of passengers numbering 241 from the disabled C.P.R. steamer Lake Champlain. The Bruce left directly she had landed her passengers at North Sidney, to get another consignment. The Champlain had 750 on board. The collision took place durinz a fog. She was going slowly ahead when an iceberg was sighted directly in front of the bows. Everything possible was done to avert a collision but the ship was too close to avoid it and struck a large projecting part of the berg which showed out of the water about twenty-five feet. When the collision occurred a concert was in progress in the 1st class cabin, and many did not know what had occurred. The foreign immigrants were the first to get alarmed. The wireless operator immediately got in communication with the Allan Line Laurentian and kept in touch until St. Johns was reached. The passengers behaved well and transferred from the boat in an orderly manner. Of the passengers on board 120 were bound for the States, the rest for different parts of Canada.

New C.P.R. Station.

The Canadian Pacific Railway have opened a new station at Calgary Junction where all the local trains stop. Tickets can be purchased and passengers can have their baggage checked through from that point. The new station will be a great boon to the residents on the east side of Calgary.

Steamer Aground.

By reason of the steering gear becoming entangled while making a turn, the steamer Wasaga is stranded at Soo, Mich. Her bottom is damaged forward, and she is leakikg badly into the hold. She is loaded with grain from Fort William to Montreal. Assistance has been sent and it is hoped to save some of the cargo.

Accident on C. P. R.

A serious accident occurred last Thursday on the C. P. R., between Mattawa and Kippewa. It is pleasing to state that no casualties occurred. The railway winds its way along narrow ledges, through the Laurentians, far above the Ottawa River, and through many quick cuttings. As the passenger train from the north, heavily laden, was passing a dangerous point where the road bed clings to the mountain side, a four ton rock came hurling down, wrecking the locomotive, ahd severely shaking the passengers. Dynamite had to be used to clear the wreckage from the line.

Courtship by Wireless.

The marriage of J. A. Balch, manager of the Wireless Telegraph Company of Honolulu and Helen Skelly, of Butte, Montana, were solemnized in SanFrancisco last week. The courtship and engagement were carried on by wireless telegraphy, the couple being married directly Miss Skelly left the boat.

Wireless Electric Light

A startling innovation has just been established when the Ontario Government sent an electric current to light up the Ontario Electrical Exhibition. The wireless was sent over a distance of five miles, and four thousand incandescent lamps were kept burning for four hours. The system by which the experiment was made was the invention of Dr. Frederick Millener, wireless expert of the Pacific Union Railroad.

Fair Promoters at Victoria.

The Centennial fair party from Winnipeg, met the government at Victoria to ask for their co-operation in promoting a World's Fair. The question of a grant was not brought up At a public meeting held in the City Hall, a resolution was passed endorsing the scheme, and Mayor Hall was authorised to advise the city's representatives at Ottawa to support a grant by the Dominion, for the promotion of a fair. The members of the delegation were entertained at the Canadian Club and it is expected that they will return shortly to Winnipeg.

Crushed to Death by a Freight Train.

A sad death occurred this week at North Bay. Mrs. Patterson who was visiting a friend, wished to get home as soon as possible, her way lay across the line. To avoid a long detour, the woman crawled underneath some freight cars which were blocking her way. As she was doing this, the train moved on, and the woman's legs were ground off, and other injuries sustained causing her death within a few hours. She leaves four children and a husband, who ha been out of work for some time. The gravity of the accident is accelerated by the fact that an 18 year old daughter died only a week previous.

Actors a Bad Lot

Summoned to serve on a jury at London an actor made a successful plea that he was a "rogue and a vagabond," therefore being illegible. In support of his contention the actor showed an old act of parliament that had never been repealed. The judge was forced to admit that the actor was not qualified to sit on a jury.

The Remittance Man Smitten

Magistrate McMiken of Winnipeg was unusually strict with the case of a remittance man named William Allott who it was stated came from a good family, but preferred loafing and squandering his remittance to working. The Magistrate remarked that numbers of immigrants of an undesirable nature are shipped from England every year, who when they have been in the country a year rail at the foreigners and say they cannot get a job. He directed his remarks to the back of the court where remittance men were thronging the benches. He thought that they were a disgrace. There was work for all, and as long as the foreigner who is willing to work comes into the country, he will steal a march on any remittance man who looks for work at the same time grumbling over the prevailing conditions.

C.P.R. Employee Exonerated

Much surprise was sprung on the Supreme Court at Saskatoon last week, when the jury, after having been absent for about half an hour, returned a verdict of not guilty on Elmar Rau. The charge was one of stealing coal, and the C.P.R. had gone to great expense in bringing witnesses from Ontario, to prove that Rau not only stole five cars of coal from a siding, but was also responsible for several barrels of whiskey. Several persons had been arrested on the charge of receiving stolen goods, but as it is now found that Rau is not responsible for these misdoings, it is expected that all charges will be dismissed and the prosecution withdrawn.

Killed by Well Boring Machine

A sad story comes from Deloraine, Man. A young man named Joseph Robbin was killed instantly by his head coming in contact with the working apparatus of a gasoline well boring engine. He had crawled under the machine for some reason and was caught by an arm of the machinery, being literally crushed to death. He was about 20 years of age and had a brother working near by at the time.

Exciting Chase at Brantford

A clever capture of a burglar was made by Constable Borthwick last week at Brantford, Ont. Four burglaries were reported during the night and the whole force was on the look out. In the morning Borthwick saw a man entering the rear window of a house on Lawrence Street. Quickly making for the scene of action, a severe struggle ensued, the constable being dragged through the window after the burglar. A dash was then made for the front door, but finding that it was locked, the burglar dodged ond jumped through a large window near by. Constable Borthwick followed and finally caught his man half way down the street. He gave the name of Joseph Smith, but is a French-Canadian. At the courts he pleaded guilty to eight burglaries and asked for a good stiff sentence. The police are looking up his record.

The Doukhobor is Coming.

Last Friday, three hundred Doukhobors, including men, women, and children, left the villiages north of Kamsack, Sask., to travel across country to Broadview. From that point they will take the C. P. R. for British Columbia.

AN IDEAL FRUIT RANCH

¶ **A WANT AD. in the Record will bring speedy results.**

Social and Personal

Miss Oakly returned from Esquimalt last Friday, after a prolonged visit to her brother.

Miss G. Hudson arrived by Thursday's boat from the Old Country to visit her brother G. H. E. Hudson. Luckily Mr. Hudson was at Sicamous when she arrived, and they resumed the journey together.

L. E. Shaw of Edmonton was a visitor in town this week.

J. B. Maskell arrived from Cornwall, Eng., last Friday and is staying at the Lake View.

Mr. and Mrs. Rean and son of Vancouver arrived from Vernon last Friday by motor, the trip being done in slightly less than two hours. His motor is a 30 h.p. Beeston Humber, and many congregated to see its arrival. Mr. Rean will spend a few days fishing on the lake. He is on a tour through the Valley.

E. Snowsell left on Saturday for Brandon where he intends remaining for a few weeks.

W. S. Anderson will take the place of C. Clarke, as C.P.R. Agent when he leaves on his holiday shortly.

Hugh Rose has decided not to leave the town, in which he has been associated for the last seventeen years. He is accordingly getting his ranch on the benches into trim, having four men busy at work on the land, and a house in course of erection by Mr. Brown. Mr. A. E. Boyer is putting in about 12 acres of orchard, while the rest of the land will go to the cultivation of alfalfa. Mr. Rose can be congratulated on the decision of banishing the idea of chicken raising in the Salmon Arm district.

Miss L. Campbell who has been in the dress making business in connection with Miss Storey left on Saturday for Vernon where she will take charge of W. R. Megaw's dress making department of that city.

T. R. Welland of Naramata is a visitor in town this week.

Bert LeQuusque arrived here last Friday and has taken a position with D. Leckie.

Miss L. Storey has closed her dressmaking parlors owing to her inability to obtain suitable rooms for carrying on the business. Miss Storey will spend the summer visiting friends at the coast cities in B.C. and Washington.

Messrs. Paget and Digby passed through on Monday to Summerland. They intend taking up land in the valley, and are making a tour of inspection. They will possibly visit Kelowna the latter part of this week.

Mr. Reggie Allan who, during Dallan's illness has obtained a good reputation as nurse, received instructions to attend to the "Cook of the George," at Salmon Arm, who has broken his arm. He returned on Saturday and reports his patient doing well.

It is a pleasure to see Mr. Dallan around town again. Even though on crutches. He is receiving the congratulations of the inhabitants, as he passes up and down main street.

Dr. Mathison, dentist, next to Post Office. Phone 89.

A. J. HENDERSON

Eye Specialist

Refracting Ocalist, Doctor of Optics, and Scientific Optician,

of TORONTO, ONT., will be in

KELOWNA

from Monday, May 17th, to Thursday, May 27th

in

Trench's Drug Store.

New do not miss this opportunity to have your eyes examined and attended to by one who has had many years practical experience with John Wanless & Co., the leading Optical Parlors of Toronto, besides four years' study of medicine. Nothing but the highest class of work done.

Satisfaction Guaranteed.

Town and Country News.

Mr. Kinley of North Dakota is visiting his brother-in-law, Mr. T. G. Speers, this week.

H. W. Beattie has retired from the Livery business. The barn is now back into the hands of Col Blackwood.

Eggs are eggs as sure as cows are cows, but have you ever chased a cow over hill, up dale and down dell, at an hour when all good men should be asleep. An excellent display of cow chasing was experienced by one of our milkmen last week, as he was driving one home from Carsarso's. This particular beast has been entered for the "Derby" and will be shipped during the next few days. Billy will make the pace during the trials.

The new telephone system has caused some curious calls in the wee sma' hours. One call last week requested the hour of the night and a reply of one twenty a.m. elicited no surprise from the subscriber.

Quite a crop of wild rice is growing round the edges of the freight sheds on the C. P. R. wharf. The latest scattering of seed, was on Saturday when Mr. and Mrs. Jenkins returned from Vernon after a very interesting trip.

The many local fishermen have been in deadly combat during the last week. Mr. Wilks caught two fine trout last Saturday while G. Wright has been hooking four or five a day for the last week. Now the water is running down the creeks to the lake, and the lake is rising, the general idea is that we must take out fish to make room for the water.

An interesting auction sale of shrubs was held on Monday last quite a few bidders being present. Raymer's hall was turned into a veritable nursery during the day, and many of the best known men in town were present to take away bargains. The face of the auctioneer W. S. Anderson, and his immense stock of jokes for every article sold, made the sale very interesting.

The order for repairing the grand stand for the accommodation of spectators on Victoria Day has been given to Mr. Potter. He will fix an awning over the top and make a comfortable and shady place for the accommodation of the spectators.

A new plan has been devised by Mr. Samson. He now hires a horse to help him water the streets.

The subscription list for the sports is receiving great support, about $200 being already collected. It seems a pity that we clash with Summerland, but they advertised in the press that they were having their affair on the nineteenth, and forced us to make our arrangements accordingly.

Mr. A. Stewart wishes us to thank Dr. Keller and the hospital staff for their great kindness and attention during his illness.

Dr. and Mrs. J. M. Pearson, of Vancouver, are visitors in town this week. They are staying at the Lake View Hotel.

Mr. and Mrs. Colin Smith returned from Vancouver last Tuesday.

Several farmers report that strawberries have not been hurt by the cold weather, but it is expected that the crop will be very late this year.

The work at the hospital must have been very heavy the last few weeks. From all sources we hear reports of the efficient staff, and the excellent arrangements the hospital affords for its patients. Mrs D. McMillan has asked us to thank Dr. Knox and the matron and nurses who have been so kind to her during her illness. She also wishes to thank the Kelowna people for their kindness to her family as well as to herself.

A serious accident occured last Friday, on the building being built by H. W. Raymer, for Thomas Lawson Ltd. H. Munro was carrying a hod of mortar, when the board over which he was walking gave way, precipitating him some feet to the gound. He sustained injuries to the extent of a broken rib, three others being cracked by the impact, he also receiving a nasty flesh wound in the neck. The doctor was sent for immediately and first aid was administered. The patient was directly taken to the hospital, where he received the desired attention. The latest report shows that the patient is doing well.

Arthnr Raymer was catching a horse last week when for some reason the animal reared, and started off at a brisk gallop. The tie rope caught in Raymer's leg throwing him and dragging him several yards. The injuries consisted of a severe scratching and a nasty wound in the neighborhood of the eye. Later reports give a satisfactory account of the patient's welfare.

The new Opera House has been supplied with a good floor, and all will be ready for the dance to be held on May 24. It was expected to have the Jennie Russel stock company here about the end of this week, but as the hall is not yet ready for a theatrical performance, the date has had to be postponed.

The new water mains down Abbott street were laid this week, and it is hoped to extend the system as far as Chinatown in the near future. The Kelowna Canning Co.'s premises and Collett's livery barn are to be connected at once.

The B.C. Gazette reports the incorporation of the Okanagan Press, Ltd., of Vernon, with a capital of $25,000 in $10 shares. The new company has bought over the goodwill of the Okanagan Publishing Co., of Vernon.

Mr. S. Gray, who is commencing a new photographic studio in the Rowcliffe Block, after some delay caused by the non-arrival of his stock from the east, is now getting down to business, and expects to have everything in full swing by Victoria Day, the 24th of this month.

Mr. H. W. Raymer returned last Tuesday. Owing to his absence the work on his new building was impeded the latter part of last week, and instructions had to be conveyed by wire in order to start operations again.

Mrs. Knowles left on Tuesday last to attend the closing ceremonies at the Okanagan College, Summerland. These have been going on since Monday last, and quite a few were travelling south to attend the final day on Wednesday.

C. C. JOSSELYN GROCERIES FLOUR FEED

Thinning Apples for Profit.

A correspondent of "The Fruit-Grower" contributes the following interesting article which we take the liberty of reprinting for the benefit of our readers:—

My orchards are all in grass. I have quit cultivating. I usually cut the grass and leave it on the ground as a mulch, placing it around the trees, especially where they are too large. I apply what manure I can where it is most needed, but have never seen the difference in the results. I have thinned my apples for the last four years, and I am well pleased with the results. We thin most of the varieties, but some need it worse than others. We commence on the early varieties about June the first, and quit on the late one in August. When the fruit is small it is difficult to get enough removed. When it gets larger it is easier to determine when it is properly thinned. On late apples most of the tinning should be done in June and July, and some more of the surplus can be taken off in August, when it can readily be seen if the trees are yet too full. We try to thin all branches of fruit so as to leave just ane specimen in a place, unless the branches are far apart, when it may be best sometimes to leave two in a bunch, but the centre one should be taken out, so that the other two will not touch each other, if it is possible to get them that way. Worms will often spoil both of them if they hang together all summer. Hand picking is the only way to thin, and both hands must be used to keep from breaking the twigs off. All scabby, stung or wormy specimens should be removed first and then thin out the small ones. What seems to be afair setting of apples, after being thinned in June will often show up twice as many in September as there should be for best results. I have had many fruit-growers tell me that I was having twice as many picked off as there should have been when the fruit became ripe. The trees looked twice as full as they should have been. The tender-hearted grower better give directions to disinterested labourers about the thinning and go off and leave him to do the work. The ground will look as if the trees had been stripped but the results will be most profitable. The cost of thinning is very small. It need not usually be over 5c. per barrel. Yield will be about as much as when no thinning is done and the size and quality will more than pay for the cost. It costs money to pick apples when they are ripe. If a fourth or half of them are picked in the summer, when help is not so scarce, there would not be quite so much of a demand far pickers, and the work would not need to be rushed so much to get the picking done in time. Large, fine apples can be picked faster by the barrel, or as fast by the number, as smaller ones, and when about all the culls have been thinned out the sorting and packing can be done for a small part of the cost of the same when all kinds of fruit must be handled aod disposed of from unthinned trees. Trees that have been thinned every year, that in time of drouth, and have fairly fertile soil to supply the needs of the tree, have fair crops of apples every year. When they used to bear too full and suffer from drouth they bore once in two years. I expect to continue to thin whether the trees are too loaded or not, if there are many imperfect apples on the trees. It is better to get rid of them than to allow them to mature. There is no money in handling them, and all the hard cash made in fruit growing is with good fruit, with few exceptions.

C. A. UMOSELLE,
Hammonton, N. J.

It was their first meeting, and the conversation turned to books. He wanted to appear smart, and informed her that he knew Scotts works from beginning to end. "What do you think of Scotts Ivanhoe?" she queried. "Oh," he replied, "I don't like that as well as some." "Or Scotts Peveril?" she asked. "That is not too bad, but some of the characters are hardly natural." "And Scotts Waverley?" "That is quite a fine work, but again not the best." At last with a merry little twinkle in her eye she asked "what do yoo think of Scotts Emulsion." "Oh, I that was the finest work I have yet read. It is brim full of humor, touched with a certain amount of sentiment and——" but the sight of an advertisement in the paper he was nervously fingering cut the praise rather short.

Little Daughter(entering breakfast-room on the morning of April 1st): "Mother, there's a man in the kitchen kissing nurse."

The mother rushed to the door, and would have run along the passage to the assistance of her daughter's guardian but for the sudden outburst of mirth from her little girl: "Ha, ha,ha, mother's April fool. Ha, ha, ha. It's only father."

'Arry: "Did you read the list of presents Ann Smith had for her weddin'?"

'Arriet: "Yes I did. The hidea for such as them 'avin' the wedbin put in the paper! They might be bloomin' haristocrats."

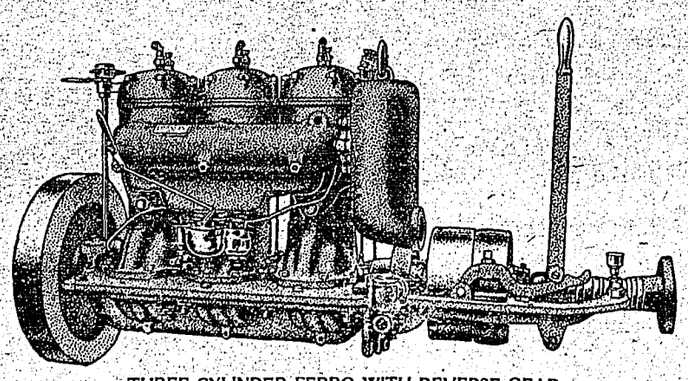
'Arry: "Fancy her mother giving her sich a 'andsome present as a 'orse and trap!"

'Arriet: "Garn! It was a clothes 'orse and a mouse trap. I've seed 'em. That's their bloomin' pride!"

"Why doesn't some one invent a new puzzle?"

"Cheer up: the spring change of railway timetables is about due."—Buffalo Express

Ferro Marine Engines



THREE CYLINDER FERRO WITH REVERSE GEAR

Some Important Improvements

Offset Cylinder Construction, (Reducing Friction and Vibration, Securing Maximum Power.)

Counterbalanced Crank Shaft, (Saving wear on bearings and vibration.)

Accessability of Parts, (Enabling operator to take engine apart without removing it from the bed.)

Other good points. Competent Cooling System, Positive Pressure Oiling System, Interchangeability of Parts, Effective Ignition System for either Jump, Spark or Make and Break System.

1909 Ferro Catalogue explains fully these and many other points. This is FREE.

A Practical Treatise on Marine Gasoline Engines gives complete and clear information on construction, operation and installation of marine gasoline engines. Price 25 cents

To reduce production cost and selling price we are making 5,000 FERRO SPECIAL ENGINES at the rate of 30 a day. These are all single cylinder 3 h.p. engines and in every way equal to the higher priced Ferro Models.

Let us demonstrate this engine to you

The Fishing Season

Opened on May 1st

Mr. Fisherman,

If your stock of tackle needs renewing, come and inspect our new supply. We carry everything in the fishing line, including

Rods	*Trout Flies*	*Fish Baskets*	*Lines*
Leaders	*Fly Books*	*Hooks*	*Reels*
Otter Baits	*Landing Nets*	*Spoon Baits*	*Etc.*

Note.—This being the first season to handle this line of goods, all our stock is perfectly new.

W. R. TRENCH,

Druggist and Stationer.

BROWN BROTHERS COMPANY, NURSERYMEN,

LIMITED, of ONTARIO,

Are extensive growers of all kinds of Fruit Trees, and other Nursery Stock, such as Roses, Shrubs, and Ornamental Trees, and offer to planters of Orchards, choice trees, true to name.

The most experienced planters realize that young trees grown in Ontario, under somewhat similar conditions as prevail in the Interior of this Province, are the best.

We are prepared to furnish "One year old trees," on a three year old root, or a two year old tree on a four year old root, as desired, at prices that will be considered reasonable.

We grow the Duchess Dwarf Pear very extensively, which is being used as a filler by a good many planters.

Our Peach, Apple, Pear, cherry and Plum trees are all of first quality well grown, well rooted, and will please the most critical buyers.

Thorough cultivation in our Nurseries ensure a splendid root system which of course is most necessary in a young tree.

During the past two seasons we have successfully shipped our stock to all parts of the Province, and can guarantee satisfaction to all our patrons.

The members of our firm are all practical Nurserymen, with long experience, and they are giving their whole time to this one business, constantly overseeing every detail of the work of growing, packing, shipping, etc. The fact is, we live among the trees, watching with zealous care the development of every acre of our vast plantings.

This is a Canadian enterprise of 25 years standing, and our reputation is behind all our dealings, give us your order and you will not regret it.

We want a good reliable man to look after our business in Kelowna and vicinity.

Apply for particulars in regard to prices and terms to salesmen to our British Columbia Branch Office.

The lowest or any tender not necessarily accepted.

City Clerk's Office, Kelowna, B.C. May 18th, 1909.

G. H. DUNN, City Clerk

CITY COUNCIL MEETING

Continued from page 1

Ald. Elliott said he had made inquiries about the water trough and drinking fountain and it was decided that a good cement trough could be put up for $25. The water would be served through a goose neck pipe over the trough; and a cup would be handy for anyone who wanted a drink. The locality was largely gone into but it was finally left with the Health and Water Committee to buy the trough and place it in a suitable position.

The By-laws No. 60 and 61 were reconsidered and finally passed. It being agreed that No. 60 come in force on the 18th of May.

The following resolutions were carried.

Rowcliffe-Bailey.—That the Health and Water Committee arrange to have a cement water trough and fountain placed at what they consider the most suitable place.

Elliott-Rowcliffe—That an advertisement be put in the paper advertising for a team of horses for the city.

Elliott-Rowcliffe—That By-laws No. 60 and 61 be reconsidered and finally passed.

Ball-Rowcliffe—That bills for electric light be paid not later than the 15th day of each month in order to secure the 25 per cent. discount, and that the city clerk be authorised to get a rubber stamp made to notify electric light users when bills are issued.

Elliott-Rowcliffe—That the city clerk be instructed to call for tenders for building cement sidewalks Tenders to be in not later than May 28th, plans and specifications can be seen at the clerk's office.

Cox-Ball—That the Kelowna Sawmill be given permission to use the City's Dump Cart for hauling sawdust to the Power House.

AQUATIC ASSOCIATION

Continued from page 1

maining two thirds to cease their office at the close of one year.

It was proposed by Mr. Aviss, seconded by G. James that the number of directors should be nine. This was decided on and a vote was taken. Messrs. P. DuMoulin and F. R. E. DeHart acting as scrutineers.

The result of the voting was as follows:—P. DuMoulin, George James, E. R. Bailey, W. Crawford, G. C. Rose, A. L. Meugins, L. C. Aviss, D.Crowley and T.W. Stirling.

It was agreed to ask to ask the directors to make provision for a scale of season ticket charges, the following scale being suggested. $5.00 single ticket for men, $6 double ticket for man and wife, $2.50 single ticket for ladies, children under fourteen half price.

Also that a salaried secretary be employed to look after the business of the Association.

It was proposed by Mr. Crowley seconded by Mr. Crawford that the directors have power to advertise for tenders and to proceed with the building of the premises as soon as sufficient money is obtained.

THE PEOPLE'S STORE

A Garment with Distinction and Popularity.

Our three button and two button Sacks. Styles and price are things that speak for themselves.

Quality is hidden away inside the linings. The foundation of good workmanship is the special feature of all our Clothing which means that the coat lapels will not turn up at the corners, the pockets will not sag, the coat fronts will not wrinkle and pucker, our trousers bag or become high-water; the coat sleeves will not pull up. In fact all our clothing means

COMFORT, STYLE and DURABILITY

THOMAS LAWSON, Ltd.

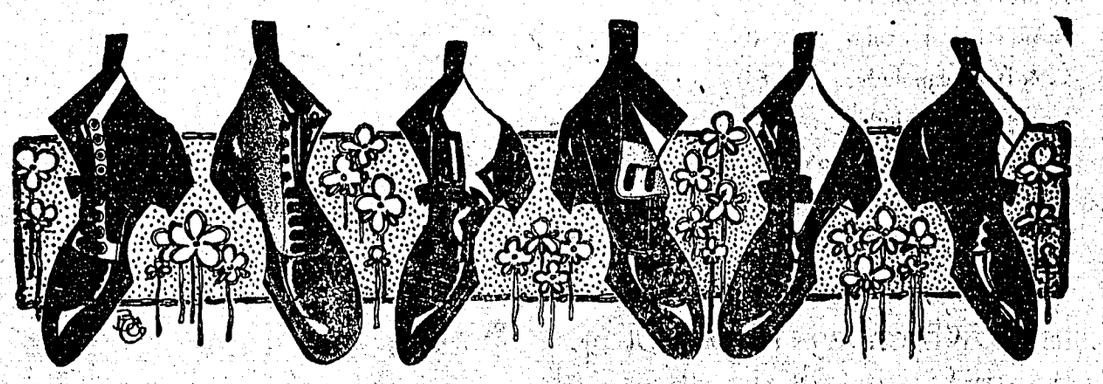
Ideal Shoes for Summer



For a summer shoe, there's no shoe that can take the place of an Oxford or low shoe.
Oxfords being light do not tire your feet the same as boots do.
They fit easily and comfortably and leave your ankles perfectly free.
INVICTUS Oxfords never bulge or sag at the sides.
If you've never worn INVICTUS Oxfords you have yet to learn what genuine hot weather comfort means.
We have INVICTUS Oxfords in all the newest 1909 shapes, in all sizes and all the widths.
