Last Meeting of Old Council and First Meeting of New

Special Committee Appointed to Consider Fire Limit By-law - Standing Committees Arranged for Year's Work

The last meeting of the old council was held Saturday last, Jan. 14th. The mayor, Ald. Leckie, Harvey, Jones, and Cox being present.

The minutes of the last meeting were first read and confirmed.

A letter was read from the Provincial Board of Health, asking the City to forward their annual health report as soon as possible.

A motion was passed accepting the annual statement as submitted by the auditor, and ordering that same be printed in a local paper.

The lease of the site of the Aquatic Association buildings was then taken up.

Ald. Leckie objected to the ambiguity of certain clauses respecting the taking over of the buildings by the city, and after some discussion, it was decided to return the lease to the city solicitor to re-draft the clause.

By-law No. 83 to borrow $7,000 for additions to the power house, which was voted upon last Thursday and received the assent of a large majority of the ratepayers, was re-considered and finally passed.

The plan which had recently been prepared of the Cemetery was also passed.

The by-law to extend the fire limits came up for consideration. The mayor suggested that some provision might be made so that necessary additions and improvements might be made to existing wooden buildings. It would perhaps be as well to make the by-law a little more flexible. There were many dwelling houses included in the extended area which their owners might wish to improve at some time by the addition of a verandah, etc. It might be a hardship on them if they could not do this.

Ald. Leckie thought it would not do to leave too much to the council in the way of granting permission for improvements. Some future council might show discrimination, granting permission to some business men and refusing it to others.

Mayor Sutherland proposed as the best plan that a committee be appointed to go into the whole question and re-draft the by-law.

This was agreed to, and Ald. Jones and Cox, with Mayor Sutherland were appointed.

An application was read from Dr. Knox for permission to place a long tie-pole in front of his house to accommodate four horses, or as an alternative to place four single posts. Mr. N. D. McTavish also applied for one tie-post for the front of the Central Okanagan Land Co.'s office.

Ald. Jones objected to poles which he considered hideous, and thought permission only should be given for separate posts.

A motion was passed granting the necessary permission.

The following motion was passed: "That this council place upon the minutes its appreciation of the excellent work done by Ald. Chas. Harvey on the Board of Works, and Ald. T. W. Stirling on the Finance Committee."

Ald. Harvey thanked the council for their motion. It had been a pleasure to him at all times to do the work of the council and to attend the meetings.

A motion was also passed: "That we appreciate the fair treatment accorded to the city council by the local press in reporting the proceedings of the different sessions."

The new council held its first session last Monday evening. The Mayor, Ald. Leckie, Jones, Copeland and Dalgleish were present, the only absentee being Ald. Cox. The newly elected Ald. Dalgleish and Copeland were welcomed by their brother aldermen, and assigned places at the table.

The minutes of last meeting were first read and confirmed.

Then followed the appointment of committees to take charge of the various branches of public work for the year. The following were agreed upon, the first name in each case being that of the chairman:

Finance—Ald. Jones, Leckie.

Board of Works—Ald. Dalgleish, Copeland.

Light and Water—Ald. Leckie, Jones.

Health—Ald. Cox, Dalgleish.

Parks—(which was to include any work connected with the cemetery, fire protection, buildings, beautifying of the city, etc.)—Ald. Copeland, Cox.

Ald. Jones said he would like to mention a matter of some importance to the fire brigade. At the present time the Chief of the fire brigade was not connected with the telephone service. As he lived some distance up town, it sometimes happened that when the alarm of fire was given he did not hear it. Men engaged in hard toil during the day generally slept more soundly than those who merely had to deal with figures. They all realized the importance of the chief being on hand in case of a bad fire. He spoke of the excellent services rendered by the fire brigade on many occasions when but for their promptness the fires might have spread over the town. No one, he said, inspired the boys better than a good leader, such as Max Jenkins had proved to be, and he thought they ought to show some appreciation of the chief by granting him this little favour.

Ald. Dalgleish agreed that the boys deserved the very greatest credit, and he had pleasure in seconding the proposal.

A motion was accordingly passed that a 'phone be placed in the house of Fire Chief Jenkins.

Ald. Leckie referred to the excellent work Mr. F. Buckland was doing in connection with the fire brigade. They were now fairly well organized, with a library and other advantages, chiefly due to Mr. Buckland's efforts.

Ald. Jones also moved that the salary of the city clerk be raised to $120 a month. As one of last year's council, he was voicing the feeling of the whole of the members in bringing forward this motion. They could all without exception bear testimony to the efficient and courteous manner in which Mr. Dunn had carried out the duties of his office. It was of the utmost importance that they should have good trustworthy men to conduct the affairs of the city, and when they had got one they could not show their appreciation better than by giving him a good salary. He would also like to convey the thanks of the last year's council to Mr. Dunn, for the ready assistance and courtesy he had shewn them.

Mayor Sutherland said that the last year's council had decided to raise Mr. Dunn's salary, but thought it best to leave it until the new members met. He agreed with Ald. Jones as to the good work which they had had from the clerk during the year. He had one objection to him, he remarked humorously. He (the mayor) used to think himself something of an authority on municipal work, but Mr. Dunn had him beaten easily.

A motion was accordingly passed that the clerk's salary be raised to $120 per month,

Mr. G. H. Dunn the city clerk, said he thanked the council very much for the kind sentiments which they had expressed, and also for the substantial increase of salary. He had, he said, in his turn received the utmost consideration at all times from the council.

Mayor Sutherland spoke on the work which was before the council. He said it would be well if the various committees would get to work at once without delay. Now was the time while winter was on to think out a programme for the future. Although, he said, certain of the Aldermen had been appointed to certain committees it would be well for each to take an interest in everything which passed. If any of them saw anything which wanted attending to, even though not in their own department, it was better that it should be brought at once before the council so as to give then a chance to deal with it without delay. The light and water committee would no doubt at once take up the question of additions to the powes house. In the matter of streets, too there was much for the committee to do. There was considerably more money to spend tnis year.

Ald. Jones asked if it would be well to continue the graveling which had been going on. Pendozi st. was now complete as far as Stirling's.

Mayor Sutherland expressed the view that it might be well to let the work stop at present. Probably the new committee might wish to make some changes in the road at that point. It would not do to get the gravel laid and then decide to widen the road.

The matter was eventually referred to the committee.

The question of changing the hour of meeting of the city council to Saturday evening was discussed and it was decided that for the winter months at least the meetings be held on Saturday evening at 8 p. m.

The meeting then adjourned.

Legislature Opens Last Thursday

Speech From Throne Mentions Several New Bills

The second session of the twelfth Legislature of British Columbia was opened last Thursday afternoon by his honor Lieutenant Governor Patterson. There was the usual ceremony customary upon such occasions. The governor was attended by a guard of honor drawn from the Fifth regiment with the regimental band. An unfamiliar feature was the presence for the first time of officers of the Canadian Navy.

The proceedings of the day occupied only a few minutes, and adjournment was taken immediately after the speech from the throne.

It is expected that the session will last about six weeks. There is a good deal of public legislation promised, although none of a contentious nature. There are also a number of private bills already on the order paper with the probability that several more will be introduced within a few days.

The speech from the throne contained a fitting tribute to the memory of the late Capt. Tatlow, for several years minister of finance and agriculture.

Several new bills were mentioned in the speech as coming under consideration this session. A bill to amend the Coal Mines Regulation Act, and another to provide for the inspection of logging camps and railroad construction camps are promised.

Another important bit of legislation will be the creation of a Department of Railways. A bill will also provide for the consolidation of existing railway acts, with additional facilities for the incorporation of railway companies.

A bill will also be submitted for the regulation of trust companies.

A boy was born to Mr. and Mrs. T. E. Clever on Wednesday last, the little fellow unfortunately only living a short time. Mrs. Clever's parents are visiting her, and much sympathy has been expressed with Mr. and Mrs. Clever in their bereavement.

A grand ice carnival is billed to take place at Haug's rink next Wednesday. Prizes are offered for ladies', gent.'s, boys' and girls' costumes. The city band will also be in attendance.

Lecture Course on Fruit Growing

Two Days' Syllabus by Provincial Experts

In connection with the Kelowna Farmers' Institute the provincial Department of Agriculture are holding next Tuesday and Wednesday, January 24th and 25th, a series of lectures constituting a "Short Course" in fruit-growing. The course consists of nine lectures, which are to be delivered by undeniable experts in their several branches, and should prove of very great interest and educational value to all engaged in the care and management of an orchard. The subjects cover, as the syllabus given below will show, a very wide range of just the kind of information required by the fruit-grower, from the selection and cultivation of the soil and the planting out of the orchard to the successful marketing of the fruit.

In accordance with the policy recently decided upon by the directors of the Farmers' Institute of endeavoring to serve the country districts better by holding meetings in their midst, the lecture course will be divided between Kelowna, Benvoulin, Rutland, the K.L.O. bench, South Okanagan. This will enable many who could not spare time for the long drive into town to attend one or more of the meetings. The final meeting is to be held in Kelowna, in Raymer's small Hall. An important limelight lecture on the selection of the nursery stock by Mr. M. S. Middleton, and Mr. R. M. Winslow, the Provincial Horticulturist, will deal with the successful disposal of the finished product.

The following is the comprehensive syllabus arranged:

K. L. O. Boarding House

Tuesday Afternoon

2.00 p.m.—Types of Soil in relation to practical fruit growing. C. C. CLARK.

3.30 p.m.—Pruning: Summer and Winter. (Open air Demonstration) M. S. MIDDLETON.

South Okanagan Mission School House

Tuesday Evening

7.30 p.m.—Orchard Pests and their control. BEN HOY.

—Sprays: Preparation and Application. J. F. CARPENTER.

Benvoulin Presbyterian Church

Wednesday Morning

10.00 a.m.—Management of Orchard Soil in relation to Conservation of Moisture and Fertility. C. C. CLARK.

Rutland Public Hall

Wednesday Afternoon

2.00 p.m.—Physiology of Plants in practical relation to fruit growing. J. F. CARPENTER.

3.30 p.m.—Winter injury: Causes of and methods of prevention. BEN HOY.

Raymer's Small Hall, Kelowna

Wednesday Evening

7.30 p.m.—Selection of Nursery Stock. Orchard Plans and Planting. (Illustrated by lantern-slides) M. S. MIDDLETON.

—Successful growing and marketing of fruit. R. M. WINSLOW, Provin. Horticulturist.

The lectures we might add are free and open to all, whether members of the Farmers' Institute or not, and as far as possible those interested are advised to attend the complete course.

These are the first lectures to be held in connection with the Farmers' Institute this season. The secretary is at present in communication with the Department and hopes shortly to announce an interesting programme for the season.

MARRIED

BIRD—JOHNSON

At the residence of Mr. J. H. Middleton, by the Rev. D. J. Welsh on Wednesday, Jan. 18th, Mr. C. H. Bird and Miss I. V. Johnson, all of Kelowna.

Government Control of Irrigation

Deputation from District Favorably Received by Premier and Cabinet

That the provision of an efficient and plentiful supply of irrigation water, more especially to those farmers and fruitgrowers situated in what is known as the "dry belt," is one of paramount importance and demands the immediate and thoughtful consideration of all concerned, there is no denying. The whole question is intimately bound up with the future growth and progress of the fruit industry throughout the province.

Although the idea of the British Columbia Government with its unlimited resources, coming to the aid of the fruitgrowers and establishing permanent dams and storage reservoirs to utilize the abundant water supplies of the mountains on a larger scale than any private companies could expect to undertake has been talked of in the Okanagan Valley for some time past, it was not until the middle of last year that any active steps were taken by the farmers themselves to bring the matter before the attention of the government. A handful of farmers in the Kelowna district, realizing the enormous impediment to the development of the valley which the present limited supply of water was going to impose in the near future, got their heads together and formulated the following petition, which was widely circulated and signed:

"Unto his honor the Lieutenant Governor of British Columbia in Council and unto the Legislative Assembly of the Province of British Columbia, the petition of the undersigned land holders of the Okanagan Electoral District humbly sheweth:

"That the existing conditions in connection with the control and distribution of water for irrigation purposes are far from satisfactory in certain districts in British Columbia, resulting in excessive waste, inadequate supply, and inequitable distribution, which often leads to costly litigation; and that large tracts of land remain undeveloped in consequence of the lack of systemetic conservation;

"Your petitioners therefore herewith earnestly request you to introduce and put into effect a system of Government ownership and operation of the water supply for irrigation purposes, by the construction of reservoirs and distributing systems in this dirtrict."

Although originating locally as stated, the project met with enthusiastic support not only from one end of the Okanagan Valley to the other, but also from other parts of the province where the same difficulties were being experienced. Evidence of this is found in the following delegation, which last Thursday waited upon the premier and members of the cabinet to present the petition:

Colin S. Smith, Kelowna; M. Hereron, Kelowna; D. McEachern, Kelowna; H. P. Lee, Vernon; W. A. Lang, Peachland; A. J. Clarence, Peachland; Mr. Blackwood, West Bank; Mr. Thompson, Summerland; A. D. Mounsees, Okanagan Centre; A. W. Matthews, Nicola; A. Janhustor, Nelson; and Chas. Little, Mara.

The members of the cabinet in addition to Premier McBride were the Hon. W. R. Ross, minister of lands; the Hon. Thos Taylor, minister of public works; the Hon, W. J. Bowser, attorney general; and the Hon. Price Ellison, minister of finance and agriculture.

The task of introducing the delegation was allotted to W. A. Lang of Peachland. Mr. C. S. Smith followed and in an able manner presented the case of the fruitgrowers. He emphasized the difficulties both present and future of the prevailing system of leaving to private enterprise the supply of irrigation water. A much larger and broader scheme was necessary to bring into cultivation the thousands of acres of rich fruit land at present lying idle in the Okanagan from lack of the life-giving water. He pointed out how much better a powerful government like that of British Columbia was to cope with the great engineering problems which would have to be faced. The cost of the undertaking far from coming from the pockets of the people generally would be met by a charge upon the land benefited, and by the increased value of now useless areas, and would moreover make ample return to the people in increased settlement, and greater prosperity and development.

Mr. M. Hereron and other members of the delegation warmly supported the proposal.

The deputation were cordially received by the Premier who said that he fully recognised the importance of the proposal, and although he could not give of course any definite reply without consultation with his cabinet, he could promise them that the matter would receive earnest consideration at the hands of the government.

Trapper's Terrible Struggle for Life

Alone in the Storm-swept Hills With Feet Frozen and Hip Injured

The folly of negotiating the snow covered mountains alone has again been painfully emphasized. Saturday morning last Charles Bailey was brought into town more dead than alive, and with his feet badly frozen as the result of a fall whilst out trapping in the hills east of town.

The snow is very deep now on the higher slopes, and whilst making the round of his traps, his snowshoe tripped in the buried underbrush, causing him to sprain his hip. This was Monday, and at the beginnipg of last week's cold snap. His recollections of the terrible experiences of the next few days are vague, and the awfulness of the situation, away up in hills, with deep snow and deeper drifts all around, with the thermometer rapidly falling, and a cutting wind tearing through the snow laden trees, painfully struggling on with an injured hip, may be better imagined than described.

Soon after the accident he fainted and lay all night where he fell, only to find his feet badly frozen upon regaining consciousness. Tuesday, with greater difficulty than ever, and the storm still blowing, he struggled on to a pre-emptor's shack, but it was empty and unoccupied. With a twenty-two mile tramp to the next place, many a less plucky fellow would have now given in, but, spending the night in the empty shack, he continued his long tramp next morning, finally reaching Tom Leddy's place on the K.L.O. Here assistance was secured from town, and the unfortunate fellow placed under the doctor's care. We are glad to report that Charley is pulling through all right, but with the loss of five toes.

The lecture on the Klondyke given in connection with the Young People's Society of Knox church on Monday night by Rev. Geo. Pringle, was well attended. Mr. Pringle, along with his brother, Dr. John Pringle, had been Presbyterian missionary for 11 years in that northern country, and spoke from personal experience, which made the subject more interesting and informing. The lecture was preceded by a solo from Miss Bullis, and was brought to a close with a vote of thanks to the lecturer. Mr. Pringle returned to Vernon on Tuesday morning, where he is supplying the Presbyterian church. While here he was the guest of Mr. R. A. Copeland. The subject next Monday at the Y. P. S. will be "A nicht wi' Bobbie Burns."

The Duke of Connaught has accepted his appointment of Governor-General of Canada, and will probably arrive at Ottawa in September next.

To the British Isles and Back for $397.50

With a Seat to View the Royal Coronation Procession to Westminster June 22

This tour is being promoted by the Rev. Robert Hughes of Cranbrook, B. C. The party will leave Vancouver during the last week in May next, on specially reserved cars (first-class standard Pullmans) and travel over the Northern Pacific railway to St. Paul, thence to Chicago, and on to Buffalo for the Niagara Falls, thence to New York or Boston. Boston is likely to be the port of departure, although the negotiations are not yet closed with the shipping company, but in all probability, the fine new Cunard liner, the Franconia—a newer ship than the famous Mauritania—will carry the party to Queenstown, where they will disembark and proceed to Blarney Castle; then on to Killarney for the world-famed lakes. The city of Dublin will next be visited, and then on to Belfast. In these places free carriage drives will be provided, and the places of interest shown. From Ireland the tourists will cross by steamer via Larne and Stranraer to Glasgow, thence via Trossachs and Stirling to Edinboro. A trip will also be arranged to Ayr, the birth-place of Robert Burns. The party will then cross the Tweed into England and visit York and Chester, two fine old English cities, thence to Warwick Castle and Kenilworth, thence to Stratford-on-Avon for Shakespeare's country and so on to Oxford, the University centre of the world. From here, the party will proceed to London, where specially reserved seats, valued at the present time at $15.00 each, will be at their disposal, to view the greatest pageant in modern history--the coronation procession of King George V. and Queen Mary, to Westminster Abbey. All hotels will be provided for the above figure, with the exception of a mid-day lunch, which member must buy for themselves. Mr. Hughes will personally accompany the party, and a competent guide will also attend with no extra charge to fully explain the many places of interest. Baggage will be moved from boat and train free of charge, fees to railway porters will be paid, and admission to many places of interest—London excepted—will be paid by the promoter. The extras which each member of the party must meet, are fees to the table and cabin steward on ocean, sleeper and meals on rail while crossing the American continent. If rooms for two persons are required, this will cost a few dollars extra each way. The above figures are upon the four-in-a-room basis, second cabin, which is a very comfortable way to travel. The tickets will be good for at least three months, and the privilege will be granted to return to a Canadian port, and travel back on the C. P. R. system, with stop-over privileges. The rail tickets are first class, and as said before, reserved cars will be placed at the disposal of this party on the outward journey. The promoter has already received many enquiries, and bookings have been made from the coast and the upper country. It is imperative to make application at once for a place in this party, as after January it will be very difficult to get ocean accommodation, the vessels are already filling very fast. The right is reserved to decline any application, and references will be required from all. Applicants will please state when they wish to return, as the return ocean berths will be secured for them at the time of booking. This will obviate being left behind in England waiting for a return steamer. Mr. Hughes has crossed the Atlantic nine times and conducted a party to the coronation procession of King Edward VII., so that he is well able to see after the comfort of those who will travel with him. Arrangements are now being made in England for members of this party to visit the continent at very low rates. To Paris for a few days for $25.00. Switzerland for two weeks, $50.00. A visit to France, Germany, Switzerland and Italy, including several days in Rome, for $100.00. These rates are all to and from London, and are, of course, not included in the $397.50 rate. The continental list of tours will be ready in a few weeks, but the most important thing now, is to secure a place in the party so that the ocean berths may be secured, and leave the matter of continental travel until later. Those who do not wish to go on to the continent can be supplied with good rooms and board, in either England, Ireland or Scotland at $10 per week.

This is an opportunity for visiting the old land at small cost, and in going with a party like this much more can be seen, and much more pleasure enjoyed. The above rate provides everything with the exception mentioned until and including June 22nd.

Write REV. ROBERT HUGHS, Box 782, Cranbrook, B. C.

According to present intentions the rearrangements of the prices of berths in sleeping cars on all Canadian railways will go into effect February 1. The tariff, subject to the approval of the railway commission, will be the same scale as proposed for American railways, the upper berths being charged 80 per cent. of the price of the lower.

When the minister of finance makes his annual statement to the legislature this year, he will be able to report that the finances of the province are in excellent shape. The surplus on hand, after providing for all expenditures to date is $2,250,000. The appropriations for public works this session will be something over six million dollars.

W. Nolan, of Wood's Lake, died died last week from injuries received whilst hauling wood. The load overturned on top of him, breaking his pelvis and severely bruising him. He was taken to the Vernon Hospital, but succumbed.

Town and Country

Mr. Colin S. Smith, returned Saturday from Victoria, where he had been visiting as delegate to the Central Farmers' Institute.

The comparitavely good sleighing weather which we have experienced lately has had the effect of clearing out Mr. S. T. Elliott's entire stock of sleighs and cutters.

A farewell party to Mr. Dan Campbell, who is leaving shortly for Penticton, was given Tuesday evening at the home of Mr. D. Lloyd-Jones. A large number of friends were present and a most enjoyable time was spent.

The cold weather which had been experienced during the past week disappeared suddenly at the beginning of this week, the temperature steadily rising until well above freezing point.

Mrs. J. Gibb returned Tuesday from the coast.

Mr. M. Hereron returned Saturday from Victoria, where he had been as a delegate on the irrigation question. Mr. Hereron came down from Vernon by the stage.

A fancy dress carnival takes place to-night at Fuller's rink. Prizes are to be given for the best costumes, also several prizes for proficiency in skating. Mayor Sutherland, Ald. J. W. Jones and Mr. W. B. M. Calder are to be the judges. A special feature is a two mile skating race open to everybody, for which prizes are offered. Music will be provided by the band.

The annual general meeting of the Kelowna Hospital Society will be held on Friday, Jan. 27, at 2:30 p.m., in Raymer's small hall. The treasurer's statement and the directors' report will be considered, and the new board elected for the ensuing year.

A pianoforte drawing-room recital will be given by pupils of Miss P. Louise Adams, A. T. C. M., on Tuesday evening, Jan. 24, at the home of Mrs. Gaddes, Bernard ave., at 8 o'clock, to which parents and friends of the pupils are invited.

A debate on similar lines to the one conducted last year will be held on Tuesday evening Jan. 24 at 8 p.m. by members of the Benvoulin Literary club. Subject, "Resolved that man has a greater influence by personal control than through literature." Rev. A. W. K. Herdman will act as chairman. Competent judges have been selected. A collection will be taken on behalf of the Sunday School Library. The public are cordially invited to attend. A musical programme will also be provided.

Revs. Davidson and Herdman exchanged pulpits last Sunday evening.

We understand that the Summerland Amateur Dramatic Society have arranged to present that successful farce "Brixton Burglary" at the Kelowna Opera House on Friday Feb. 3rd. All who remember the excellent performance the society gave of Pinero's "Schoolmistress" when last here, will not fail to take advantage of the opportunity of seeing them again.

The Farmers' Magazine for this month pays a flattering tribute to the Kelowna tobacco industry.

Mr. Geo. Ritchie left Tuesday for Penticton, where he is building the new store for the Oak Hall Clothing Co. of Penticton.

HOCKEY.

The local hockey players are bent upon making the best of the skating while it lasts. Three teams have been organized, the Shamrocks, captained by Jim Copeland; the Fire Brigade, by Jack McMillan; and the Commercials, by O. B. Holden. A local league has been formed, and a schedule drawn up giving three matches per week as follows:

Frid.	Jan. 13	Firemen	v.	Shamrocks
Mon.	" 16	Sham.	v.	Commer.
Wed.	" 18	Commer.	v.	Firemen
Frid.	" 20	Firemen	v.	Shamrocks
Mon.	" 23	Sham.	v.	Commer.
Wed.	" 25	Commer.	v.	Firemen
Frid.	" 27	Firemen	v.	Shamrocks
Mon.	" 30	Sham.	v.	Commer.
Wed.	Feb. 1	Commer.	v.	Firemen

The matches so far have been played at Haug's Rink, and some exciting games have been witnessed. Friday last the Firemen beat the Shamrocks by 6 to 4. Monday the Shamrocks were again beaten by the Commercials by 11 to 2.

Fruitgrowers Will Fight Reciprocity

Reduction of Duty Condemned at Convention - Other Important Discussions

The proposal of the United States growers that the duty on fruit entering Canada be removed met with an emphatically hostile reception at the hands of the B. C. Fruitgrowers' Association at the convention held in Victoria last week. A resolution was passed stating that the Association was absolutely against any reduction of the rates, and asking on the other hand that the duty on fruit brought into Canada be raised to equal the duty imposed by the United States on fruit going from Canada into the States.

The Hon. Price Ellison made a vigorous attack on this idea of reciprocity. "I hope," he said that this reciprocity arrangement will never take place. If it does we shall have to go out of the business of fruitgrowing, and indeed out of many other businesses. We in Canada have only a population of 8,000,000. In the United States there are 105,000,000 people. The surplus production of that country would be dumped on us. Our markets would be flooded. Our industries crowded out. Our prosperity gone. Who is it that is agitating for reciprocity? Just a handful of Manitoba farmers. They want to get their agricultural implements cheap, but in their desire they lose sight of the fact that the industries, which are the life and the soul of the country, would be hampered, their vitality eaten into, and in many cases their very existence destroyed by the flood of cheap products, the result of overproduction, which would come in here from the United States. This question is not one of politics, but one which affects Canada as a whole and British Columbia in particular. Don't let us make British Columbia a dumping ground for American goods. What is required in our trade arrangements is a preferential tariff with the Mother Country, so that we shall continue to stand side by side with her and fight her battles as in the past. There is no sentiment in the idea of fighting reciprocity. It is purely a business agitation. We are responsible for what is going on; if we don't make our voices heard while there is yet time we will then be responsible for what happens. We ought to see that we preserve, not only for ourselves, but for our children, that essential policy which is the making of Canada today. That is the policy of protection. If the United States had been a free trade nation would she have the population she has today? No. Her industries would be stifled, or still-born, and she would be the dumping ground of every other country in the world."

Labour for Fruitgrowers

Another important matter which came up for discussion at the Fruitgrowers' convention was the question of establishing a labour bureau for the province.

The secretary of the association, R. M. Winslow, made a statement of how this matter stood at present. He said that a committee had been appointed to wait on the provincial government on the necessity for action regarding labour and the appointment of a labour bureau. Owing to the absence in the east of Mr. R. H. Agur, the chairman of the committee, it had not yet waited on the government, so there was nothing to report as to its actions. Conditions in the fruit industry had reached such a pitch that either values would have to go up, or else the cost of production would have to come down. In his capacity of secretary he had been instructed to find out, if possible, the number of labourers wanted by the fruit growers in the province. He had circularized them all, or as many as he could get in touch with, and up to date he had received data which showed that there was a demand for nearly 1,300 labourers. These men could be employed at current wages during the coming season, and over half of them could be employed for eight months of the season.

The matter was thoroughly discussed and the proposal heartily supported. The view expressed that although men with capital were continually being sought as settlers, the government did not do all it might to promote the immigration of labouring men.

A resolution was passed unanimously asking the provincial government to promote immigration from the British Isles and with this end in view to establish a bureau of labour, and set aside receiving farms for the training of such immigrants. It further recommended that assisted passages should be advanced by the provincial government.

Express Companies and the Handling of Fruit.

The Express service came in for some strong criticism, both on the question of rates and on the manner in which the fruit was handled. Mr. W. A. Pitcairn who attended from Kelowna alluded to the bad condition in which cars often arrived to load with shipments of fruit. It frequently, he stated, took hours to clean them. At times they were dirty, full of rubbish and broken inside, and the fruitgrowers were put to the expense of having them repaired.

Standardization of Fruit Boxes.

The British Columbia Fruit Growers' Association will reccommend the following as the standard sizes of fruit boxes to the Dominion fruit conference in Ottawa next December.

Apple boxes 20 by 11 by 10 inches.

Pear boxes 18 1-4 by 11 by 8 1-2 inches.

Four basket plum crates, 15 3-4 by 15 3-4 by 4 1-4 inches.

Peach boxes 18 1-4 by 11 3-4 by 4 1-2 inches.

Crabapple boxes 18 1-4 by 11 by 8 1-4 inches.

The standardization of all boxes was held to be in the best interests of the fruit growers, and also of box manufacturers, and the statement was made that the province is greatly in advance of the states of Washington and Oregon in this regard.

Delegates for Dominion Fruit Conference.

The following four delegates were appointed to attend the Dominion Fruit Conference to be held in Ottawa, probably next December: For Vancouver Island, Mr. Thomas A. Brydon; For the Lower Mainland, Mr. Maxwell Smith; for the Similkameen, Okanagan and Thompson districts, Mr. R. H. Agur; and for the Kootenays and Boundary district, Mr. T. Abriel.

Sunday School Teachers' Association Meetings

The second of a series of six meetings of the Sunday School Teachers' Association was held last Wednes. week in the Baptist church under the leadership of Rev. D. J. Welsh, and was attended by a goodly number of interested teachers and others. The subject for discussion was:—"The Sunday School an Educational Force" which was opened by an able and instructive address by Rev. Welsh. He began by referring to the latent capacities of the child, and he said that we stand for the development of these. The public school develops the mental and moral, but the child's education is not complete without the development of the religious capacities.

The speaker dealt with the subject under four heads:

1. The primary impulse of human nature is religious 'not religion, but religions. Everywhere we find some form of religion. Christianity gives the noblest direction to this religious impulse. The Sunday school seeks to capture this primary principle of the child life.

2. Religious education must consider the whole life. Every possibility and power should be unfolded. Life is to be regarded as a unity, part of the great whole over which God is our Father, and it should be the endeavor of the educator to lead the child to give right expression to its power and activities, its religious impulse.

3. Religious education must be on scientific lines. Reference was made to the public school system, which has the very best methods, and these must be kept in mind by the Sunday school teacher, who is dealing with the same individual. Hence the wisdom of a systematic course of training for the teacher. Similar methods should be applied by the Sunday school teacher as obtained in the public school.

4. Religious education must regard the child as the centre of interest, not the truth taught. The Bible must be used as a means to an end; namely, the development of the powers of heart and mind in the proper expression of the religious life.

Along what lines should the Sunday school proceed?

It should recognize educational facts and should seek to interpret these to the child in the terms of the spiritual life. Reference was here made to the graded lessons which are adapted to the child's understanding at the different periods of intellectual development. Then the ideals of religion should dominate the business and political activities of life. If up to the time of entering upon these activities the child is governed by religious ideas, it is much easier for him to apply them as he comes to face the stern realities and problems of adult life.

The Sunday school in the religious education of the child should furnish opportunities for him to give expression to the social relationships of life, such as friendships, love, unselfishness, helpfulness and kindness. While this has special reference to the Sunday school teacher, it also applies to parents and others who have to do with the education and training of the children.

The next meeting will be held in the Presbyterian Sunday school hall on the first Wednesday in February, and the subject will be "The Art of Teaching."

WATER NOTICE

Notice is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the Osoyoos Division of Yale District.

(*a.*) The name, address and occupation of applicant—W. E. Adams, Kelowna, B.C.

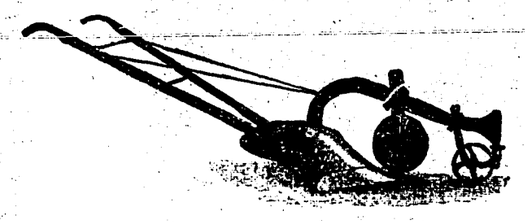
A Progressive Farmer

Never wastes time and horseflesh upon faulty or worn-out implements.

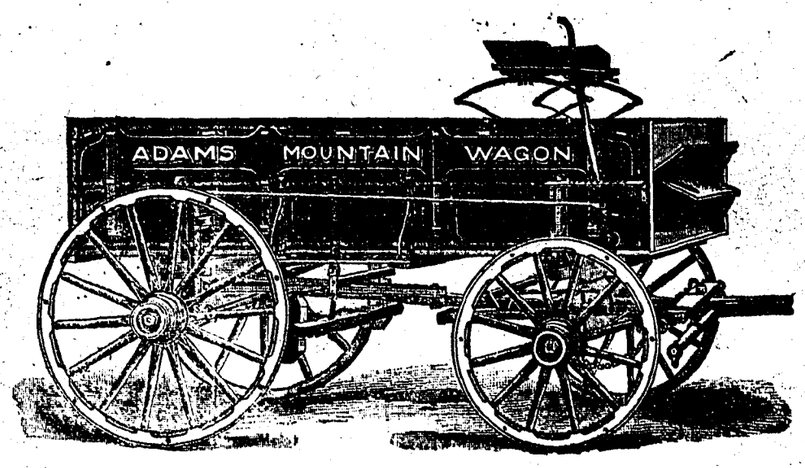
A machine that will not do its work right is dear at any price, and the longer you keep it around, the more it is "eating its head off."

START RIGHT

This spring, and it will be easy to keep right. Call in and let us show you how easy it is to get the right start.



Our Cockshutt Plows and Adams' Wagons are the last word in proficiency and reliability.



S. T. ELLIOTT - Kelowna, B. C.

AERIAL NAVIGATION.

Problems Which Confront the Aviator In Action.

In tracing the development of flying it all looks very simple now that it has been accomplished. Lillienthal gliding was the art first removed from actual flying, and it was a tragic close of his life of devotion to an idea, when in 1895 he was killed after 2,000 successful trips. But back of Lillienthal's gliding the same idea that has developed the aeroplane is found in kiteflying.

It is pressure against the air that makes the kite soar; it is pressure against the air that makes the aeroplane soar—pressure promoted by the rapidly revolving propeller. Ascent, descent, balance and direction are the problems which confront the aviator when he takes his seat in the air craft. In every movement while he is in the air there must be constant alertness to adjust his machine for varying air currents or "holes in the atmosphere." If the engine fails to work there is left the probability of reaching earth again safely by gliding downward. A short descent gives momentum to glide along for more distance to gain a desired point. Most of the accidents have happened as the result of some part of the aeroplane giving way. That is why the aeroplanes are guarded so closely in their respective hangars to keep away meddlesome sightseers, who are liable to tamper or "monkey" with the machines. When Mr. Harmon's biplane crashed to the marsh land curious memento hunters made way with a great many of the parts, the loss of which prevented him from getting it ready for the air again during the meet.—William Chapple in National Magazine.

A Frilled Lizard.

Living specimens of a strange frilled lizard of Australia have been transported to England, where photography has most convincingly proved the truth of the legend that these animals, which sometimes attain a length of three feet, are in the habit of running about erect on their hind legs. The lizards are furnished with a broad frill, or collar, round the neck, which lies folded unless the animal is threatened. In that case it immediately spreads its frill like a suddenly opened umbrella to frighten off the enemy. When running on its hind legs, with its long tail swinging in the air, it presents an irresistibly ludicrous appearance. There was a time in the jurassic age when this method of locomotion was common among giant reptiles, but now the chlamydosaurus is the sole surviving species of reptiles that assumes an erect attitude when running.—Chicago Record-Herald.

An Automobile Tempest.

Germany's Hessian Automobile club recently issued a "decalogue for cart drivers," calling upon them in more or less peremptory terms to pay prompt attention to the signals of motor horns. This document was criticised by a peasant reichstag member, Herr Kohler, who said: "I should like to recommend the following as an eleventh commandment for all cartmen: 'Go and get yourself a license for firearms and then a thoroughly serviceable revolver, so that you can protect yourself when you are fallen upon by the modern vermin which render the country roads unsafe and trifle with human life.'" The automobile club has retaliated by prosecuting Herr Kohler for inciting to crime.

Barbarous Butchery of Our Seals.

A more revolting story has never been recorded than the savage plunder of our magnificent Pribilof islands fur seal herd by pelagic sealers, Japanese mostly, Canadians and avaricious seal hunters, who kill the mother seals while they are in the water seeking food for newborn cubs. An idea that a crisis has been reached in unscrupulous seal killing may be had from the fact that there were about 4,000,000 seals in the Pribilof herd when the United States government purchased Alaska from Russia in 1867. Twelve years ago there were 375,000. Today the herd presents the pitiable spectacle of less than 140,000. There are now fewer than 50,000 female breeding seals.—Leslie's.
