Furniture Wanted.

Second hand furniture, range, etc., wanted. Apply stating terms to "B" THE LEDGE.

TENDERS WANTED

Tenders wanted for putting sills on cement blocks underneath the Old Masonic Hall. Apply to Secretary. Masonic Lodge, Greenwood.

The Yankee promoter came to town in a special car. He told his admiring friends at the hotel that he had just "pulled off a deal" that had netted him a million dollars. No, he didn't have the actual cash yet, but would have it tomorrow. He had just sold seven hundred thousand acres of land and "fixed himself for life."

A week later the promoter was intercepted while making a quiet "get-away" from the hostelry. He was a picture of dejection, but put on a brave front when asked what had gone wrong.

"Didn't your deal go through all right?" inquired a sypathizer.

"No. I slipped up on a couple of technicalities, and that, too, after I thought I had covered every point."

"What were the technicalities?"

"Well, the fellow who had the land couldn't make a clear title, and the man who wanted to buy didn't have the money."

Around Home

Mr. and Mrs. Portman have gone to the coast on a two months visit.

Sid Oliver left on Tuesday for Nelson where he will volunteer for the front.

Miss Jeffrey, who spent the vacation in Victoria, returned to Greenwood last week.

H. McCutcheon returned on Saturday from Vancouver, where he spent a two weeks vacation.

Miss Eileen Oliver, who has been at the coast for the last four months, returned to town this week.

The diamond drill on the coal mine at Midway, B.C., has drilled through two seams of coal, both about nine feet in width.

Mrs. H. C. Cummins returned to Greenwood on Saturday last after an extended trip to England New York, Toronto and other points.

The Greenwood Tennis Club entertained the Mother Lode Club at the local courts on Sunday afternoon. Ten sets were played and the honors were even.

Miss Gibbon, formerly teacher at the Deadwood school, and who has been visiting here, returned on Saturday to resume her duties as teacher in the Nelson school.

It is an ill wind that blows nobody any good. Many men who have been thrown out of employment by the mines closing down are getting lots of work fighting bush fires.

J. McCullough, head clerk in the hardware department of L. A. Smith & Co. left on Tuesday morning by motorcycle for Spokane and Vancouver. The journey will be about 1000 miles.

An informal party was held at the residence of Mr. and Mrs. F. W. McLaine in honor of Miss Colville, who leaves shortly for her home. About 18 were present and all enjoyed a most sociable evening.

Mr. Birk, superintendent of the Carmi mine is in the hospital suffering from a crushed hand, which he received while placing a large casting in the stamping mill. The hand had to be amputated.

Owing to shortage of water, connections are being made to pump a supply from Boundary creek. Citizens should boil all water used for drinking purposes and waste none whatever on lawns and so on. This is important.

Owing to the extreme dry weather it has been found necessary to employ a night watchman. Citizens should be extra careful during this dry spell as a spark or cigarette stubb might cause serious loss. An ounce of preventative is worth a pound of cure.

Rock Creek, Midway and Greenwood Gun Clubs held a shoot at Midway this week when A. Logan secured the highest individual score getting 24 out of 25. The same clubs will meet in Greenwood the early part of next week,

The Rebekahs gave a hard times party in their lodge-room last Friday and all present spent a most enjoyable evening. On account of counter attractions the attendance was not quite as large as usual. It is to be hoped that the Rebekahs, noted for giving good times, will give us more of their enjoyable parties in the near future.

Miss Esther Lawson won the automobile in the Grand Forks Gazette contest. We are glad the honor of winning the auto comes to Greenwood, and this in spite of the financial depression, shows that Greenwood has more money to spare than the other towns. This is another feather in Greenwood's cap and Miss Lawson is to be congratulated.

There are many good and loyal Germans living in Canada. For instance there is a veteran of the Franco-Prussian war by the name of Theodore Witte, living at Deadwood and who still wears his medal on his watch chain, but he says he would not fight for the present Kaiser. He is proud of being a British subject.

On Monday night the people of Mother Lode gave a farewell dance, where a large and merry crowd was present. Mrs. Oliver, pianist, and J. Sutherland, violinist, furnished excellent and inspiring music. The dance was kept up well until morning, everybody enjoying themselves so thoroughly that they were reluctant to go.

The cosy home of Mr. and Mrs. Wm. Phillips was the scene of a gay time on Friday night, when their daughter, Evangeline, entertained a few guests in honor of her friend Miss Gibbon, who has been visiting here for two weeks. The evening was pleasantly spent in song, story and cards. A nice supper was served after which all repaired to their various homes voting Miss Phillips an ideal hostess.

Last Friday night witnessed a most enjoyable smoker at the Mother Lode mine when, in spite of the fact that the mine had shut down the night before, it could hardly be called a farewell smoker as there was another entertainment to come, but as the sports committee had $100 of undivided capital, it might be more appropriately be called a "liquidation" meeting. O. Lachmund, general manager in a short address said that the mine was to open again when there was a rise in the price of copper. Songs were well rendered by Messrs. McKay, Handcock, Lakeland and the Austrian quartette as well as Messrs. Winter, Burnell and Parker, the accompanying being skillfully performed by Mr. F. Marrirge. J. Sutherland played pleasingly on the violin. The chair was most suitably filled by Mr. Crane the superintendent.

LADIES OF GREENWOOD!

At a meeting held in the Star Theatre last week to consider ways and means of helping during the presrnt crisis the ladies proved themselves eager and anxious to raise patriotic funds to care for those left behind and to assist the Daughters of the Empire, who are able to take the lead because they are an organized body. Mrs. Coles, Mrs. Rendell, Mrs. Marcon, Mrs. Hopkins, Mrs. McCutcheon, Mrs. Hobbin, Mrs. Foyle-Smith and Mrs. F. W. McLaine are the women organized and who are working and planning with an earnestness and devotion beyond all praise and with a spirit which is as inspiring as it is indomitable. $200 has already been collected and forwarded to the Daughters of the Empire. The Women's Institute subscribed $25.

When the war is over, when the smoke of battle is cleared away, when freedom has been re-established upon a broader and ever broadening basis, when once more we are able to resume the ordinary avocations of life and in the time of peace recount the incidents of war, there will not be a more constant theme of admiration than the contribution of the Daughters of the Empire to the greatest moral and material victory which the pages of history will record.

BIRTHS

To Mr. and Mrs. L. McKenzie, of Greenwood on August 11th a daughter.

To Mr, and Mrs. H. Andrews, of Midway, on August 9th, a daughter,

Western Float

New Denver will hold a fair up on October 1-2.

Great Britain imports yearly food worth $1,375,000,000.

War will be declared in a few days upon grouse and deer.

The war has stopped the annual flower show in Rossland.

A 12 stall round house is being built at Rupe.

In spite of the war limburger cheese is still holding its own.

Wm. Blair will open a general store at Soda Creek.

Dick Case of Oroville is out for sheriff in that district.

Kaslo will not build any cement sidewalks this year.

This has been a record year for weddings in Hazelton.

A new electric light plant is being built at New Denver.

There are 1000 men making Ross rifles at the gun factory in Quebec.

Silver ore is being shipped from Babine lake to the Tacoma smelter.

Harry Howson is manager of the Fiddler mine up the Skeena river.

This summer the best hay crop on record was cut in the Chilcrotin district.

Fifty special refrigerator cars have been ordered to carry fish east from Prince Rupert.

Wong Gone was fined $75 for keeping an opium joint in Rossland.

Henry DeLesprinasse of Grand Forks has gone to France to join the army.

The winter poultry show will be held in Grand Forks on November 25 and 26.

This month a monthly cattle market will be established in Kamloops.

Prohibit the export of meat and cattle and living will soon be cheaper in Canada.

Angus Stewart will have charge of the work on the P.G.E. railway at Soda Creek.

The fish hatchery at Gerrard is fully protected by a large fleet of stone boats.

Eight leasing contracts upon the old Republic mine at Republic have been granted.

Many people are leaving Peace River Crossing. The rush was too big and too soon.

Roy Cruikshank, well known in Revelstoke, was recently killed in Australia in an auto accident.

In B.C. last year bounties were paid on 58 golden eagles, 232 cougars, 277 wolves, and 1618 coyotes.

The times are panicky and the people full of fear. Even delinquent subscribers are afraid to pay the paper.

A pack train between Dease lake and Telegraph creek was recently held up by road agents and robbed of $4000 worth of gold dust.

There are 1000 men working day and night at the big C.P.R. tunnel in the Selkirk mountaine. The tunnel will cost $10,000,000.

A Frye has bought a store in Curlew from Geo. Thomas. He also owns 30 million feet of timber near Curlew and will build a sawmill.

A number of Jewish capitalists from Nova Scotia have invested $75,000 in land and cattle at Republic, Wash., and will establish a Jewish colony.

The sale of gun licenses in B. C. last year brought the government $99,225. The fines for breeches of the game act amounted to over $4,000.

In Kootenay, the Bluebell, Rambler, Standard and other mines are temporarily closed down until the smelters can handle their ore.

Mike Ryan died in Sandon last week. His health had not been good since he was injured in a railway accident at Rosebery about a year ago.

The postal business in B. C. requires some changes in its administration. The public suffers because the officials cannot keep up with the business. Look at the Princeton office. The service is rotten because the postmaster has too much to do.

The Vernon News was shown a specimen of remarkably fine coal this week, taken from the claims at Shorts' Point. S. C. Smith who is one of the principal owners of this property is greatly pleased with the prospects, and has every hope that the St. Catherines syndicate who are having a report made by Jas. McEvoy, the well known Ontario geologist, will take hold of the claims and develop them into a producing mine.

Greenwood's Opportunity.

The Dominion of Canada in its exhibition at the Panama-Pacific Exposition is to make a special feature of a very interesting and complete mineral collection made up of ores and specimens found in Canada. In this exhibit British Columbia, it is needless to add, will be in the lead. With the intention of making a very thorough and representative collection of the ores and minerals of this province, Wm. Thomlinson, well known in connection with the Provincial Bureau of Mines, has been made official collector for the commission which was appointed by the Dominion to have charge of this exhibit as well as the forestry and fisheries exhibits. In the course of his duties Mr. Thomlinson has completed an extensive tour of the northern and central parts of the province and is now in this district having spent Tuesday and Wednesday visiting the Jewel and other mines in the vicinity of Greenwood and left here today for Phoenix. In conversation with the Ledge Mr. Thomlinson pointed out that as every expense was to be paid by the government it remained in the hands of the people of B. C. to make sure that they would be adequately represented. Specimens should always be chosen and labeled with care, details of their origin being given as well as other information likely to prove of value. Specimens may be of any size and should be packed in cases, not sacks as they permit of too much movement, and addressed C O.D. to the collecting warehouse at 324 Water St. Vancouver, B.C. We repeat that all charges, even those of packing and local hauling, will be paid by the government. The collection, is to be continually added to, will remain the property of the government and will be exhibited on every possible occasion. That the greatest benefit to the province will result from such advertising is obvious and it is up to Greenwood to do its individual part towards making the collection complete in every respect.

The statement is sometimes made by the uninitiated that the water-powers north of the settled parts of our Dominion are of litte value. The existence of numerous falls and rapids is not denied, but the argument is advanced that the temperature and other climatic conditions existing where these falls and rapids are situated will prevent their utilization. As a direct contradiction of the above assertion we need only to turn to Norway, the latitude of which is about the same as that of the Yukon, and where climatic conditions are similar to those of northern Canada. In size, Norway is only slightly larger than our Maritime Provinces, and yet we find there power plants with a total capacity of over 1,500,000 horse-power, either in actual operation, or in course of construction. Hydro-electric stations of considerable size have been constructed in different parts of that country. Many of the smaller ones have been erected for municipal use, but the larger ones are for the electro-chemical industry, in which a main factor of success is cheap and plentiful electric power.—L. G. D.

Ben Petersen is prospecting in the Peace River district. He is well known in Greenwood and Hazelton.

THE LEDGE

R. T. LOWERY

EDITOR AND FINANCIER.

is located at Greenwood, B. C., and can be traced to many parts of the earth. It comes to the front every Thursday morning, and believes that hell would close up if love ruled the world. It believes in justice to everyone; from the man who mucks in the mine to the king who sits on the cushions of the throne. It believes that advertising is the life of trade; and that one of the noblest works of creation is the man who always pays the printer.

The Ledge is $2.00 a year in advance, or $2.50 when not so paid. It is postage free to all parts of Canada, Mexico, Great Britain and the county of Bruce. To the United States it is $2.50 a year, always in advance.

A blue mark here indicates that your Subscription has become deceased, and that the editor would once more like to commune with your collateral.

GREENWOOD, AUGUST 20, 1914.

JUST now many a sock is heavy with gold.

THE shooting season opened rather early in Europe this year.

IT will take more than three kings to win the pot in Europe.

ANANIAS has a steady job these days running war bulletins.

FEAR is the cause of all panics, and much sickness during war times.

IF Egypt is short of corn there is heaps of it in the United States.

TROUBLES do not come singly. The hens have quit laying in our back yard.

IN addition to its naval fleet, Germany has a vast number of schooners in Berlin.

IF the Iron Duke was living today he would make no request for "Night or Blucher."

THESE days it is a good thing to have a bit of land, some spuds and a barrel of buttermilk.

IT is just as well to postpone the teaching of European geography for a few months.

IN these unpleasant days in Europe, not many soldiers will save their lives by carrying bibles over their hearts.

MOST people eat twice as much as is necessary. Better go on war rations. Your health will be better and food cheaper.

THE war has opened up for Canada and the United States a vast market for manufactured goods in Asia, Africa, Australia and South America.

THERE is no excuse for the prices of foodstuffs in America going up. The prices should go down as we have more grub in America than we can eat or sell.

IN America several millions of men are fighting the European war. The fighting is principally from store counters and arm chairs, while the weapons used are war bulletins and ozone more or less heated.

Thinking Themes

Thought is the trouble maker of the world. If it were not for the thinkers kings might go on undisturbed spending in play the cream of the nation's toil, and trusts might keep sleek as fatted swine. and superstition rule forever, all old frauds flourish as eternal oaks.

It is the thinker that is at the bottom of every revolution. He splits parties and churches. he sows discontent amony the lowly, and makes the magnificent ones of earth suspect their privilege.

Thought brings down them that sit on high, and the despised and rejected of men it raises up.

Thought is the loyal friend of demos. It is always for the many against the few. The sure and selfish cry out, "They that turn the world upside down have come hither also!"

Thought is always modern and more, it is a futurist, it is the abiding heretic, the ever present disturber of the peace. Thought it the "angel that troubleth the pool."

Thought for the fools that heed no warning swell,
Prepares its hell."—Dr. Crane.

FROM THE TALMUD

He who loves his wife as himself and honors her more than himself will train his children properly; he will meet too the fulfilment of the verse: "And thou shalt know that there is peace in thy tent, and thou wilt look over thy habitation and shall miss nothing."

Rabbi Jose said: "I never call my wife 'wife,' but 'home,' for she indeed makes my home."

He who possesses a knowledge of God and a knowledge of man will not easily commit a sin.

The Bible was given us to establish peace.

He who wrongs his fellow men, even in so small a coin as a penny, is as wicked as if he should take life.

He who raises his hand against his fellow in a passion is a sinner.

Be not the friend of one who wears the cloak of a saint to cover the deformities of a fool.

The other day a man with a ruby nose was brought before a magistrate charged with the crime of impersonating a police officer.

"What have you to say?" asked the magistrate.

"I am innocent," replied the man.

"What did he do?" asked the magistrate.

What did he do?" exclaimed the policeman, hautily, who had hoped that such a question would not be put, "Why, he tapped three times at the door of a 'pub' on my beat, and when the landlord shoved the beer out through the half-closed door he took it and drank it. That's what he did!" Amid the roars of laughter the case was dismissed.

Hunger Brings Health

These hunger strikes, doctor," inquired an "Answers" man of a famous London physician. "are they dangerous to life?"

"Oh, yes!' said the doctor. "They may be dangerous for a delicate woman, but incidentally they cure a lot of troublesome ailments.

"Fasting relieves pain of almost every kind. If you have a bad toothache, refrain from food for 24 hours, and ten to one your toothache will vanish.

"Are you gouty or rheumatic? Then the sovereign cure is a good long fast.

"Paraylsis you probably think is an incurable disease. No doubt many forms are, but miraculous recoveries have occurred under treatment by fasting. Men who had abandoned all hope, and who then tried fasting for thirty, forty, and even fifty days, had the use of their limbs completely restored.

"How does this happen? My theory is that certain waste matters. poisoning the nerves, are often the cause of this disease, and by a prolonged fast these are removed.

"I have known a patient suffer for years from chronic catarrh of the nose and air passages. No doctor could cure the trouble, but a twenty days' fast completely cured it in this instance.

"That fasting should cure stomach and liver trouble seems natural. But how many of us make use of the remedy? Next time you are bilious or have bad indigestion try the remedy of abstinence from food, and you won't be disappointed.

Deafness, resulting from catarrh of the air passages, is another matter. You would scarcely try fasting to cure it. But I have known the hearing of such a person to be completely cured by a seventeen-day fast.

"If a man feels dull, heavy and stupid, nothing can cure him like a fast.

"Here are a dozen cases in one—a real example of the marvelous virtues of fasting. A patient suffered all at the same time with rheumatism, kidney disease, excema, loss of power in the limbs and several other affections.

"He sampled half the drugs in the pharmacopoeia, and then, in despair, tried a long fast. In forty days he was perfectly cured of every trouble.

"In reality we are only obeying Nature when we fast to cure diseases. What course do all animals follow when ill? They drink a great deal, but, as a rule, they eat nothing. This measure, combined with rest and sleep, is usually successful.

"Of course, no sensible person will undertake a long fast of ten days and upward without medical supervision. Unless properly conducted it might wreck even an apparently strong man.

How is the fast to be carried out? There are many ways. One is to omit breakfast for a week, and then live on one meal a day until cured.

"Another is to fast two or three days, then eat a couple of light meals—milk, rice, etc.—and then fast again.

"Nature will tell you when to end the treatment. The tongue clears, the spirits become buoyant, and the appetite becomes ravenous.

"You may, of course, while fasting drink as much water. lemonade, etc., as you like, and may also eat juicy fruits, such as oranges and grapes."

If a dentist pulled the wrong tooth and the man in the chair took a punch at him, who would the toothpaste?

Shiloh 25¢

The family remedy for Coughs and Colds "Shiloh costs so little and does so much"

"The Lost Art of Behaving Well" refers to a manual of behavior which in 1803 had run into a third edition. The author was a clergyman named Truslar. Among his directions was a series addressed to the guest, who was admonished not to smell viands on the fork before eating them, nor to "eat" his soup with his nose in the plate; "eating quick or very slow at meals" moreover is characteristic of the vulgar; "the first suggests that you are starving; the second that you do not like the food set before you." He avers that it is exceedingly rude to spit, eat greedily, pick your teeth before the dishes are removed."

Although only a month married, the young man had learned much feminine logic. Tired out with a day in the shops, his wife opened her eyes languidly as he struck a match. "Another?" she said. "Mortimer, I do wish you would not use cigarettes.,, "Why?" "Because they are bad for you. You don't know what is in them." "Oh yes, I do. Why, for the trifling sum that cigarette costs, you get nicotine, valerian, possibly a little morphine and any quantity of carbon." She sat up alert and bright-eyed. "Good gracious," she said. "All that? Why, that is a real bargain, isn't it?"

Mrs. Nag (looking at the hearse which is to take her fifth to his last resting place)—But I didn't order all those expensive plumes.

Undertaker—No, mum. We thrsw those in on account of your being such a regular customer, Mrs. Nag.

Mrs. Muriel took great interest parish affairs. Last year she promised to assist in decorating the parish church. One illuminated text. she thought would look well over the chancel screen, and requested her husband to bring it from town. As might have been expected, he forgot the text, and wired to his wife for particulars. To the surprise of all the telegraph clerks this message came flashing over the wires. "Unto us a child is born, nine feet long by two feet broad."

I'd rather be a Could Be
If I could not be an Are;
For a Could Be is a May Be,
With a chance of touching par.
I'd rather be a Has Been
Than a Might Have Been by far;
For a Might Have Been has never been,
But a Has was once and Are.

The active head of a great law school says this country needs fewer and better lawyers.

In other words, this country needs fewer and wiser clients. —Cleveland Plain Dealer.

WATER NOTICE

Application for a licence to take and use water will be made under the "Water Act" of British Columbia as follows:—

1. The name of applicant is Robert Daniel McKenzie.
2. The address of the applicant is Greenwood, B.C.
3. The name of the stream is Providence Creek. The stream has its source in Marshall lake, flows in a westerly direction, and empties into Boundary creek within the boundaries of the City of Greenwood.
4. The water is to be diverted from the stream on the north side, about 60 feet below the confluence of the water flowing from the Resevoir belonging to the city of Greenwood with the water of the said creek, and on the Providence Mineral Claim, Lot 618.
5. The purpose for which the water will be used is irrigation purposes.
6. The land on which the water is to be used is described as follows;—The Elkhorn Fractional Mineral Claim, being lot 297S, in the Similkameen Division of the District of Yale, the surface of which claim belongs to the applicant.
7. The quantity of water applied for is as follows:—14 acre feet per annum.
8. This notice was posted on the ground on the 24th day of July, 1914.
9. A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Grand Forks. Objections may be filed with the said Recorder, or with the Comptroller of Water Right, Parliament Buildings, Victoria, B.C., within 30 days after the above date.

R. D. McKENZIE,
Applicant.

When you go to a dealer's store to hear a Phonograph be sure you hear an Edison Phonograph

If you do not hear an Edison you do not hear a phonograph. There is only one Edison and only one Phonograph bearing his name. The Edison Phonograph is Mr. Edison's own personal achievement. He invented it and he perfected it. He is responsible for its clear, lifelike musical Records—the Blue Amberols, unbreakable, playing four minutes and lasting a lifetime. He has produced the indestructible diamond reproducing point, that never needs changing. He has recently perfected this new cabinet model—a thing of beauty in itself and a marvel of musical perfection.

Hear this new model. Hear the new Blue Amberol Records, embracing everything worth while in the field of songs and instrumental music.

LOWERY'S CLAIM

During the 37 months that Lowery's Claim was on earth it did business all over the world. It was the most unique, independent and fearless journal ever produced in Canada. Political and theological enemies pursued it with the venom of a rattlesnake until the government shut it out of the mails, and its editor ceasad to publish it partly on account of a lazy liver and partly because it takes a pile of money to run a paper that is outlawed. There are still 20 different editions of this condemned journal in print. Send 10 cents and get one or $2 and get the bunch,

R. T. LOWERY,
Greenwood, B. C.

Synopsis of Coal Mining Regulations.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district inwhich the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon: If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Subscribers are reminded that The Ledge is $2 a year when paid in advance. When not so paid it is $2.50 a year.

ADVERTISE IN THE LEDGE

THE HOME CIRCLE

Pleasant Evening Reveries. A Column Dedicated to Tired Mothers as they Join the Home Circle at Evening Tide.

The time to have the brightest lamps lit, the hottest supper ready, to wear the gayest dresses and hunt up the funniest stories in one's memory, is the cold rainy night, when there will not be any company, but when the home-coming husband, sons, and brothers will doubly enjoy the cheer.

* * *

The father who is "chummy" with his boy, gets down to that eager, inquiring, restless little soul and explains and encourages, does not need to cut a birch gad in order to maintain discipline; and the mother who sympathizes, cuddles and plays with her children can keep her slippers on her feet and her hairbrush on the dressing table. Children need love and sympathy as much as flowers need air and sunshine.

* * *

The best way to keep the boys at home is to make it an object for them not to go out to seek amusements, for these they will have. Every farm home ought to be made a very heaven on earth to its inmates. Not alone the farm home either, but all the houses in the land. Learn each child's nature, and then work some home charm to keep him in your circle.

* * *

"Time has scattered the snowy flakes on her brow, plowed furrows in her cheeks—but is she not sweet and beautiful now? The lips which have kissed many tears from the childish cheeks are the sweetest lips in all the world. The eye is dim, yet it glows with rapt radiance of a holy love which can never fade. Oh, yes, she is a dear old mother. Her sands of time are nearly run out, feeble as she is she will go farther and reach lower down for you than will any other on earth. You cannot walk into midnight where she cannot see you; you cannot enter a prison whose bars shall keep her out; you cannot mount a scaffold too high for her to reach and bless you. In evidence of her deathless love, when the world shall despise and forsake you—when it leaves you by the wayside to die unnoticed—the dear old mother will gather you up in her feeble arms, carry you home and tell you of your virtues until you almost forget that your soul is disfigured by vices. Love her tenderly and cheer her declining years with holy devotion.

* * *

If you want to keep your children away from sin you can only do so by making their home attractive. You can preach sermons advocate reforms and denounce wickedness and yet your children will be captivated by the glittering saloons of sin, unless you make your home brighter than any other place on earth to them. Gather all the charms you possibly can into your house. If you can afford it, bring books and pictures and cheerful entertainments to the household. But above all, teach those children not by half an hour, twice a year on the Sabbath day, but day after day, and every day teach them that religion is a great gladness, that it throws chains of gold about the neck, that it takes no spring from the foot, no blithness from the heart, no sparkle from the eye, no ring from the laughter, but that "her ways are ways of pleasantness and all her paths are peace.

About Float.

Float is not a periodical. It is a book containing 86 illustrations all told, and is filled with sketches and stories of western life. It tells how a gambler cashed in after the flush days of Sandon; how it rained in New Denver long after Noah was dead; how a parson took a drink at Bear Lake in early days; how justice was dealt in Kaslo in '93; how the saloon man outprayed the women in Kalamazoo, and graphically depicts the roamings of a western editor among the tenderfeet in the cent belt. It contains the early history of Nelson and a romance of the Silver King mine. In it are printed three western poems, and dozens of articles too numerous to mention. Send for one before it is too late. The price is 25 cents, postpaid to any part of the world. Address all letters to

R. T. Lowery

GREENWOOD, B. C.

He Does Not Advertise.

Breathes there a man with soul so dead
Who never to himself has said:
"My trade of late is getting bad,
I'll try another ten-inch ad!"

If there be, go mark him well,
For him no bank account shall swell,
No angels watch the golden stair,
To welcome home the millionaire.

The man who never asks for trade,
By local line, or add displayed,
Cares more for rest than worldly gain,
And patronage but gives him pain.

Tread lightly, friends; let no rude sound
Disturb his solitude profound,
Here let him lie in calm repose.
Unsought except by men he owes.

And when he dies, go plant him deep
That nothing may disturb his sleep,
Where no rude clamor may dispel
That quiet that he loved so well.

And that the world may know its loss,
Place on a stone a wreath of moss,
And on a stone above "Here lies
A fossil, who did not advertise."

B. C. MINING NEWS

The activities of the British Columbia Copper Co. at Princess camp on Copper mountain are in line with what was reported some time ago. Buildings of a permanent character are being erected. The movements of the company denote ore production on a large scale. From 700 to 800 acres of land have been bought on which to put up buildings to be used in the reduction of ore.

A body of ore rich in galena and carrying high values in silver and lead has been discovered on the north side of Constance Cove, Esquimalt harbor. The ground has been staked and recorded. Lead can be traced for a distance of 1500 feet. The land on which the location has been made is said to belong to the Hudson Bay Co. and is close to tide water.

They are getting a lot of high-grade ore on the four hundred foot level at the Silver Standard mine. Steady improvement has lately been the reward of this work, and the present showings are very favorable for a large body of pay ore near at hand. It is expected that the work will run into No. 1 vein this week. They are now encountering ore in the seams, which is a good indication that there is the large body of ore that the owners have been expecting near at hand. Last month's work shows that over two hundred feet of tunnel, 5 x 7, has been driven and by five machine men. This is looked on as very good work as the rock lies.

McCrimmon & Stewart, lessees of several claims of the Silver Standard property are sinking a shaft on Black River. They had to put in a syphon to relieve the workings of water flowing in from the excessive rains. The boys have taken out quite a lot of ore and such as they have mined is quite up to the uniform high quality of stuff previously extracted from Glen mountain. —Omineca Herald.

Frank Brown has just returned from Bob creek, six miles from Houston on the G.T.P. railway, where he and J. T. Dravenstott were the second locators on the new gold strike—Soper and Allport being the original locators. Chinamen are now placer mining on Bob creek, and above their placer ground is a porphyry dyke seven or eight hundred feet wide, which carries free milling gold values for ite entire length, and looks like a big steam shovel proposition. Mr. Brown will return to Bob creek at once and will crosscut and sample the dyke thoroughly. While away he visited his holdings at Owen's Lake, and states that he expects to do considerable work there this year. Speaking of the new strike near Tellkwa he says that it looks very promising and that the ore is high grade chalcopyrite. The Chisholm boys are shipping ore from their propert to the Trail smelter.—The Chalcopyrite.

D. J. Galloway, assistant provincial minerologist, finished his labors in our district and went to Hazelton last Wednesday. During his ten-day stay here he examined the Rocher de Boule, Red Rose and Brian Boru basins, and his work has evidently been very thorough and complete.—The Chalcopyrite.

Harry Howson, well and favorably known among the mining fraternity in this part of the world, has charge of the development work now under way on the Fiddler mountain recently taken over by Martin Welch of Spokane. We are glad to see Spokane mining men and mining money getting on in the Skeena, and hope with a great hope that this new enterprise will prove successful.—The Chalcopyrite.

World's Largest Banks

So frequently the question of the world's largest banks comes up that we take this opportunity of presenting the list published in the foreign banking section of The Statist, London. Sixty-one banks each with deposits of $100,000,000 or more are included, three of which are Canadian institutions.

What Effect will it Have.

That is the question men are asking so far as Canada is concerned. As to the effect the war will have. Will Canada benefit or not?

Undoubtedly it will precipitate a marked financial stringency so far as the money which we borrow to carry on our national and provincial works and operations. And all the enterprises depending on foreign capital will feel a pinch. Of that new loan guaranteed as it is by the Dominion, the Canadian Northern have had subscribed only about one-fifth of the required amount.

Probably Canada will benefit. Russia will conserve her wheat crop to feed her troops in the field, and the crop may suffer from a scarcity of labor. Europe bent on fighting will be forced to depend on the American continent for a wheat supply. There is a possibility that wheat may advance to a price never heard of on this side of the globe. Two dollar wheat would enrich the North West farmer, for in time of war wheat is paid for promptly. If the prairie farmer has a good crop he will be on easy street.

The fisheries will feel the influence, for they constitute a notable source of supply of food. Thousands of men who now encumber the labor markets will be drawn from this land and leave the ranks of the unemployed so many less.

While money in large amounts may be difficult to find there will be enough to keep things moving. If the war prevails a market is assured. When it is all over Canada may be the richer and better for it. That is a plain way to look at the possibilities.

The Reason Why.

People are asking this question: Why should Britain be drawn into a war, and to which, as a party, without ostensible object? The folmay assist to make the matter plain.

The Triple Alliance is a compact entered into between Germany, Austria and Italy against Russia. It was formerly the Dual Alliance entered into in 1879, when Germany and Austria pledged themselves to joint action should either be assailed by Russia and to neutrality should either be assailed by another power. In 1883 Italy was admitted into the Dual Alliance and it became the Triple Alliance. The treaty provides that should Russia assist any nation at war with any of the signatories to the treaty the other signatories must come to assistanee. The treaty is very specific in its terms and provides for a division of all territory acquired at a victorious war. Under the treaty the Triple Alliance must back Austria should Russia come to the assistance of Servia. In addition to the Triple Alliance powers, Bulgaria, for Balkan political reasons, will support Austria.

The Triple Entente is the offset to the Triple Alliance. It embraces Russia, France and Britain. The details of the Triple Entente have never been made public, but it is accepted as certain that France and Russia are bound absolutely in an offensive and defensive alliance. Just how firmly Britain is bound is not known. Spain has become a party to this agreement, but to what extent is conjectural. For Balkan reasons Greece and Romania will support Servia as against Austria. Russia's support of Servia is part of the Pan-Slavic programme as against the Pan-Germanic expansion plans.

To make life happy is an art—a good many people have either lost or never found.

There is nothing gained in the government of children by threatening that which is not performed.

No man, however great, is known to everybody, and no man, however solitary, is known to nobody.—Moore.

"These kids I teach aren't a bit slow," observed a school teacher yesterday. "In fact I'm afraid they read the papers. The other day I proposed the following problem to my arithmetic class:

"'A rich man dies and leaves $1,000,000. One fifth goes to his wife, one sixth to his son, one seventh to his daughter, one eighth to his brother, and the rest to foreign missions. What does each get?'

"'A lawyer,' said the smallest boy in the class, promptly."

The reason why women do not propose is supposed to be due to the fact that they want to have the last word.

It is worth a thousand dollars a year to have the habit of looking on the bright side of things.

AT THE CHURCHES

Christian Science service will be held in the Oddfellows Hall on Sunday at 11 a.m. All welcome. On the 3rd Friday of each month at 8 p.m. testimonial meetings will be held in the same hall. Sunday school every Sunday morning.

2nd and 4th Sundays in the month celebration of the Holy Communion 8 a. m. Matins and Litany at 11 a.m.

5th Sunday in the month Ma- and Litany at 11 a.m.

Evensong every Sunday at 7.30 p.m.

Rev. R. D. Porter, Vicar.

CATHOLIC CHURCH, Rev. Dom G. Dorval, Rector, Mass 2nd and 4th Sunday, at 10 o'clock. Evening service at 7.30, sermon and benediction. Daily Mass at the hospital at 6 o'clock. Confessions are heard half an hour before mass.

WATER NOTICE
DIVERSION AND USE

Take notice that I, David Oxley, whose address is Eholt, B. C., will apply for a licence to take and use 20 inches of water out of Eholt Creek, which flows southwest and drains into Boundary Creek about 7 miles south-west.

The water will be diverted from the stream at a point about 300 feet from corner of lot 1223 and will be used for domestic purpose upon the pre-emption described as Number 1235. This notice was posted on the ground on this 10th day of August, 1914. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Grand Forks, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within 30 days after the first appearance of this notice in a local newspaper. The land is for farming purposes for which purposes I am going to use the water. The date of the first publication of this notice is Aug.13, 1614.

DAVID OXLEY, Applicant.
