The Mining Review.

VOL. 4.—NO. 5. SANDON, B. C., JULY 7, 1900. $2.00 PER YEAR.

The Slocan District.

Whatever may be said of other mining districts of the Province as a field for extensive investments, the Slocan is essentially the poor man's country. It may be that the men who have sunk their millions in the Rossland and the Boundary districts (and it takes millions to work properties there) will every one reach the zenith of their ambition; but that in no way diminishes the force of the contention, that the Slocan is the poor man's country.

There are now, including the Slocan City and Whitewater districts, some 60 properties that could be made to pay right along as worked without a dollar of imported capital, excepting, perhaps, a few temporary loans from banks, and every one of them has been put in shipping condition without the aid of outside millionaires. They are the product of local men with moderate means. It is true that a few of them, such as the Payne, etc., are controlled by outside millions; but these millions have only got hold of the properties since they were made paying by men of small means. Scarcely a week transpires that some new property has not disclosed ore in paying quantities under the drill and pick of men who put in a year's work or so, with but very limited means, and are then turned over under sale or bond to men of means who will make fortunes out of the energies of their predecessors. We might go over the shipping properties of the district, one by one, and it would be found that nearly every one of them after showing paying ore passed from the hands of the locators at figures varying from $1,000 to $15,000. The state owes these original developers—prospectors and locators—a great deal, much more than they will ever get credit for; and it appears to us it has means at hand to sufficiently reward them, if our representatives would only take the matter in hand instead of wasting their energies over eight-hour squabbles.

The state lends money to railways, for irrigation purposes, for dyking, etc., then why not lend some of it to prospectors who have good security. As we have said above, many a prospector in the Slocan has been forced to part with his prospective millions, nay, we might say assured millions, simply because he could not command a little more money to develop his find, build trails, etc. Why, we ask, does not the government come to the relief of such men, upon whom above all others the future of the country depends, and lend them means to make the necessary improvements and to enable the prospectors, who of all others are entitled to it, to retain the wealth, taking security upon the property.

We will give a case in point. The other day Mr. Kerlin uncovered a most promising vein of ore within a few feet of his own property, carrying sufficient assurance that it crosses his property, and, presumably for the lack of private means to proceed with the work, he has given a bond on it. Now, if the prospects are sufficiently definite to warrant private individuals or a corporation in advancing money on the showing there and the bonders to put up more in working it they are sufficiently definite to warrant any government in lending money to Mr. Kerlin to go on with the work under the supervision of a competent engineer. The sum advanced need not be large at first, but might be increased from time to time as the showing under development warranted. In this way the pioneers, the men entitled to the reward, would become the millionaires, and not the outsiders or the local capitalists. Failure would, of course, occur in some cases, but the country would become developed, and labor would be employed under the operation; and there is no more crime in wasting money in mining failures than there is in non-paying railways, dykes, etc.

We know there are many who will not agree with us in this advance; but we are confident it is the proper thing for the country, and we will stick at it until something comes of it. The government can borrow the money at 4 per cent. and by lending it at 7 or 8, or even more, they cover cost of supervision of work and put by a rest from excess of interest to assist in covering losses wherever failure is realized. Such a proposition would make the Slocan the poor man's country truly.

From Far and Near.

Kaslo wants a new chief of police.

A Robson Indian, named Louis, was drowned at Waterloo last week.

An Italian, name unknown, drowned himself near Procter the other day.

The C. P. R. are making great improvements on their dock at Silverton.

D. Bremner, who spent several months in Scotland, has returned to Silverton.

McNichol, of Silverton, won several jumping and running prizes at Nelson.

The sum of $96,000 is in the Ottawa estimates for the Lardo-Duncan railway.

The case against Haybrick, of Slocan Junction, for selling venison out of season, has been dismissed.

In the four-oared race at Nelson, Winnipeg got away with Vancouver, as the Yankee would say, "like nothin'."

The Silvertonian says Jack Carlin killed three bears with a rifle the other day near the Wakefield concentrator. Jack must have been on the long shift in that engagement.

There are some hotel changes at Whitewater. Mr. Walmsley vacates the Jackson House and re-opens the Whitewater, while Palmer and Allan, of the the Central, Kaslo, take over the Jackson House.

An appalling accident happened at Tacoma on Wednesday last, by which about 60 people lost their lives. An electric train loaded with excursionists, many of them women and children, jumped the track crashing down a deep gulch.

Police Magistrate Carney ran for school trustee the other day in Kaslo, championed by R. F. Green, M. P. P., and Mayor McAnn, and was beaten by Mrs. Livingstone in a majority of 53. The Conservatives will have to run Mrs. Livingstone against Mr. Green for parliament next time.

Upwards of 20,000 people including men, women and children have been butchered by the heathen Chinee so far. Latest reports have it that not a white person is left alive in Pekin. After such atrocities it will not be any harm surely for the powers to convert the pig-tails with the most forcible means of modern civilization.

The Chinese have adopted a new system of warfare—that of butchering. They have by this time butchered nearly every white man, regardless of nationality, in Pekin, and the work is being extended to other places. If the Chinese will not adopt the usages of civilized nations in business and will not be civilized the march of progress must go on all the same, even at the expense of annihilating the Chinese empire.

The Minnesota Silver Co.

The long tunnel at the Ivanhoe is now in 1400 feet, and the company are looking for the lead every day. In the driving they crossed two other leads in both of which they found ore, and of but the one they had previous knowledge. The entire mine is showing up remarkably well with 15 feet of concentrating ore. There are 36 men at work on the Ivanhoe and 18 at the Sunshine with some 40 at the concentrator.

All the stone work is completed at the concentrator, and they are fully justified in saying they have a foundation unsurpassed in the country. The framework of the concentrator proper is all but finished, there remaining but the orebins and crusher structures to erect. The roofing, siding, etc., will be commenced next week. Some of the machinery has arrived and consignments are coming in daily. Mr. Hickey expects the mill to be ready for operations by the 15th of Sept. Mr. McRae, mill contractor of Montana, who built the Wakefield, has charge of the work.

Grading for the flume is pretty well done. A "Y" is put in to collect forces from Miller and Tributary creeks. A pipe will also convey water from Carpenter creek to drive a wheel at the base, which, combined, will provide ample power and water needs at every season of the year. Carpenter creek supply will not be needed until the force is deficient in the hill streams. Mr. Hickey has also underway a complete system for domestic use and fire protection.

MINES AND MINING.

The Ruby, near the Bosun, has a rich strike.

Mr. Bennedum will shortly begin work on the Golden Wedge.

The mines of Moyie shipped 60 tons of ore per day during June.

Ore shipments from Whitewater for the week were: Whitewater, 134 tons.

The ore shipments via K. & S. for the week were: Last Chance 80 tons; American Boy 20.

The Idaho mine has now over 30 men at work and the property is shipping 20 tons of ore daily.

W. W. Fallows and J. Dimick are doing assessment work on their claims in the Windermere.

W. A. Coplen has found an eight-inch vein of solid galena, running 100 oz. silver, in the Meadow, a property on the Columbia river below Nakusp.

At Slocan Sports.

As usual, our townsman, J. S. Gusty, gobbled a handful of the prize money at the Slocan sports on Monday. He took first money in the running, hop, step and jump, clearing 40 ft. 1 in. He also took first in standing-long-jump, clearing 11 ft. 6½ in. He only reached second place in running-long-jump clearing 19 ft. 8½ in, McNichol, of Silverton, going one inch more. Of course it is pretty close measuring when it goes to an inch in such a distance. Sandon was defeated in football by the Silverton hustlers. The day was fair, and it is said everything turned out quite satisfactory.

PURELY PERSONAL.

Mr. and Mrs. G. B. McDonald are visiting in Kaslo.

Geo. Alexander, of Kaslo, spent a few days here this week.

Wm. Richards was in from Kaslo this week for a day in the old town.

Mrs. Funk, after a long visit at Seattle, returned home on Monday last.

J. G. Main has gone to Kaslo to take charge of the firm's business there.

Mark Manley, of the Arlington mine at Slocan, was in the city Monday.

A. W. Wright returned Thursday from a trip to Rossland and other mining camps.

Mr. Fallows is in from the Windermere. He says business is not very brisk there.

H. Haines, of the B. C. Bank here, was the principal water power that Nelson could boast of on Dominion Day.

P. D. Moore, government inspector of roads, was in town this week. Mr. D. C. Kutriz, of Kaslo, was also here some days.

Mrs. Egan has returned from Spokane, and she and Mr. Egan will likely take up their residence at the Ivanhoe concentrator.

Dr. and Mrs. Gomm returned Wednesday from their honeymoon trip and are now comfortably settled in the Lane cottage, Cody ave.

Mr. Sandiford, son of W. Sandiford of the Bosun mine, who has been managing properties in Servia for some time, is now in New Denver and is likely to take hold of some Slocan properties.

P. J. Hickey, jr., is in town on a visit. He will soon be a larger man than the senior P. J. if he sticks to it. Mrs. Hickey and children will soon be up from Spokane for a few months' visit.

Mrs. Hambly, who has been visiting her daughter, Mrs. Jalland, for some weeks, left this week for her home near Edmonton. Mrs. Jalland accompanied her in a trip to the Okanagan country.

Mr. Cruse, late C. P. R. agent here, and Mrs. Cruse left on Tuesday for Midway, where Mr. Cruse thinks of taking up ranching. When down to business Mr. Cruse makes an excellent official. All join in wishing both success in their new venture.

Miss Mary Crawford has resigned her position in the post office, and left on Tuesday for an extended visit with Miss Rawlings and other friends in Ontario. She was a most efficient official in the post office and will be much missed. Miss Mary McDonald has taken a position in the office since Miss Crawford left.

Three Marriages.

On the evening of July 1st, in the parlor of the Kaslo hotel, by the Rev. A. D. Menzies, Daniel Hurley of Sandon to Mrs. Lizzie McIntyre of the same place.

At the Manse, Kaslo, by the Rev. A. D. Menzies on the evening of June 13th, William L. Barner, of Whitewater, to Mrs. Susanna M. Hughes, of Kaslo.—Kootenaian.

Rev. A. M. Sanford performed a like ceremony for Larry O'Neil and Miss M. A. Lees at Three Forks on the 2nd.

The Canadian Bank of Commerce and the Bank of B. C. are about to amalgamate, in which case the amalgamation will make a strong institution and will, of course, take over all the agencies of both and make but little or no changes in the officials the country over.

The Mining Review.

SATURDAY, JULY 7, 1900.

THAT RELIEF.

Our cotem is out in favor of taking a portion of the relief money for the repair of Sunnyside road, and principally because that in a pro rata division of the money there would be but small relief for any and all. Well, we contend that even small relief, under present circumstances, is better than none at all; and, in using the money, as suggested, the benefit to all but residents would be inappreciable. The money, by outsiders at least, was sent in to be distributed amongst those who lost their all, or lost so heavily as to be left in even worse circumstances, that is with their business interests all gone and in debt. If a cash value had been placed on the goods sent in, and all contributions valued as cash, a payment of at least 3 per cent, or $30 per $1,000 loss, could have been made, which would have been much appreciated by all. Will our neighbor tell us how Messrs. Griffith, Fallows and others, who lost heavily on Sunnyside and are not going to re-build, will be helped by the construction of the wagon road up that hill? Or again, how people living down the creek towards the lower end of the town will be helped by that wagon road? Again, if the money in hands is now too small for distribution, as is alleged, which it is not, it will be smaller when that road is built, and the stronger reason why no general distribution should be made.

We give every member of that committee, who have at much inconvenience given their time for nothing, credit for acting in the very best of good faith; but even good faith may be mistaken. If any subscribed to assist public works, their money should certainly go as intended; but under no circumstances should money sent in for direct distribution among the sufferers be taken for improvements that should be met by direct taxation. We are quite confident that under a proper distribution of the money in hand, there would be enough coming to residents of Sunnyside to build that road, and they could apply it that way if they felt so disposed.

It is now to be hoped that our council, and all in responsibility in the place, will take a lesson from the mistakes of the past. It is, of course, a question if any fire brigade, under the most favorable circumstances, could have stayed a fire in Sandon, even with our unexcelled water supply, on account of the narrowness of the main street and, comparatively speaking, absence of cross streets to act as fire breaks; but if the flume had been planked a fighting chance would have been afforded. It is true the council were hampered for means; but the previous two years, all will now admit, monies had been spent in salaries and other outlays that might have been saved, as they will be saved in the future, and applied that way. In a place like this, with escapes problematical, fire protection should be the first consideration. Every facility should be provided to enable our company to make the best possible use of all appliances and opportunity. As there is no use in crying over spilt milk, there is no use in dealing acrimoniously with the mistakes of the past, but merely to hold them in view as guide for the future.

Silvertonian:

"The editor of The Sandon Mining Review does not know the difference between revising the Voters' List openly now after the election and revising it underhandedly just before the election, but as there are so many things that that editor don't know this will not surprise anyone."

Well, the difference between the editor of The Review and the scribe of the Silvertonian is this: The former acknowledges he does not know everything, and the latter refuses to do so. He, the latter, posseses two great attributes—omniscience and infallibility like the Pope. There was no "underhand" attempt to revise the Slocan lists before the elections; it was overhand and strictly according to law. But pray what use would a list revised now be for an election four years hence? It would be as defective as the one last used. In every other province in Confederation the lists are revised, as they ought to be, just before the elections; but apparently this is one of the very few things our contemporary does not know.

The Silvertonian says that Mr. Green will have nothing to do with either Martinism or Turnerism in the House. We are not sure that it is is an Ishmaelite a representative may be the most service to a constituency. A representative is always the better of being allied to one side of the House or the other, though he need not necessarily endorse a Bill from either in which he cannot concur.

The Silvertonian says the recent rains ruined the orange crop in that vicinity. There will be more known about it after the 12th.

Alta Lodge, No. 29.

Supplementary Estimates.

Ottawa, June ,—In the supplementary estimates brought down to-day, which totals $7,444,000, there is an item for Kamloops public building of $5,000. There is also $20,000 for the Vancouver drill hall; Columbia river improvements in the narrows between the Upper and Lower Arrow lakes, $15,000; Columbia river improvements above Golden, $3,000; Fraser river improvements and ship channel protection works, $40,000; general repairs and improvements to harbor, diver and bridger works in Victoria harbor, $3,000; removal of dredger rock and dredging at other points, $15,000; Anderson and Kennedy lakes, clearing outlets, $2,500; Salmon river, removal of driftwood, $2,500; Williams' head quarantine station wharf, repairs, $2,000; total, $82,000. Alberni-Clayoquot telegraph line, $6,500; Ashcroft-Barkerville telegraph line, repoleing, $14,000; telegraph line from Golden station, C.P.R., to Windermere, $9,000; telephone connection between Vancouver Island and Salt Spring Island, $1,550; telegraph line from 150-Mile House to Quesnelle Forks and Horsefly, $6,000. There is also $121,000 for the Yukon and Quesnelle telegraph lines.

List of Dead Increases.

New York, July.—Sixty-seven bodies given up by the waters of North river is the horrible evidence that tonight confirms the tale of the disaster at the docks of the North German Lloyd line in Hoboken. Each hour that passes witnesses additional recoveries of bodies, seared, maimed and burned beyond all semblance of human flesh, and the half has not yet been told, as all of the bodies brought to the surface today were caught on grappling hooks. About the first of next week people will realize the appalling loss of life, as it will then be time for the bodies that are now lying at the bottom of the river to come to the surface of the water of their own accord. The list of missing is still placed at but few below the 300 mark.

Germany Wants Satisfaction.

Berlin, July 2.—From well founded sources the representative of the Associated Press is able to state that after a detailed statement by Count von Buelow, secretary of state for foreign affairs, regarding the Chinese situation, Emporer William made up his mind to insist on full satisfaction for the death of Baron von Kettler for which purpose he resolved to send armed forces as large as those of other countries.

Botha Released on Bail.

Capetown, July 2.—Commandant Philip Botha, who was captured by the British near Kroonstadt on May 17th, has been released under heavy bail. He is to reside at Aliwal North until the conclusion of his preliminary examination.

Let the Japs Do It.

London, July 3.—The Times this morning editorially advocates strenously that the powers invite Japan to intervene in China, or at least that they shall place no obstacle in the way of the extensive employment of Japanese troops in quelling the rebellion.

THE LOCAL GRAFT.

C. J. Smith was one of the boosters of the 4th in town, having had an excellent display of fireworks.

G. H. Muirhead has opened a restaurant on the site of the Bryan cafe, and is building up a big trade.

The proposed Wood block, at the head of Reco ave., is to be built after all, to the evident delight of many citizens.

E. A. Cameron has commenced his contract on the wagon road, leading to the K. & S. track on Sunnyside.

Probably one-fourth of our population left the place Sunday and Monday to take in the sports at Nelson and Slocan City.

Harry Nash has taken the local agency for the Metallic Roofing Co. of Canada, and will likely have a busy season ahead of him.

Ald. Crawford has moved into his new residence on Sunnyside. Mr. C. J. Smith will occupy the Wilson residence vacated by him.

J. Stocker, late of the K. & S. hotel, McGuigan, has opened a restaurant at the Miners' hotel. He is said to be an excellent caterer.

Monday being the holiday for Dominion Day the band tooted on the street in the afternoon and the small boy did his share with the fire-crackers.

It was learned the other day that a hotel in the city had a Chinaman cook, and at once vengeance in many quarters was set on edge. We cannot believe it is to the interest of any one to import the "heathen Chinee."

The Nelson Dailies are doing a wise thing. The Tribune is taking the morning field and the Miner the evening. Of course the mail service is such that it will leave the Miner at a disadvantage in the Slocan; but it should fare better in other fields.

We have on file for reference by our readers the latest price circular of the McMillan Fur & Wool Co., Minneapolis, Minn. Their advertisement appears in another column, and we take pleasure in recommending any parties who have goods in their line to ship to them.

In the Slocan proper, which embraces the record offices at Slocan, New Denver and Kaslo, there were 1,322 claims recorded last year; 2,272 certificates of improvements; 1,106 bills of sale and transfers; and 2,229 Free Miners' certificates issued. What other territory has an equally good showing?

Mr. Jas. Griffith, who soon takes his leave of the town to embark in business in Trout Lake, was farewelled on Tuesday evening by the leader of the band, Mr. Tranery. The band members, who were in it, enjoyed to the full the "bachelor" party and the spread prepared by the ingenious hand of Mrs. Tranery.

Mr. Campbell, who has been an excellent official, has resigned his position as K. & S. agent here and will take up a better position across the line as soon as his successor is appointed. It would be but a gracious act, that would give general satisfaction, if the company would promote Mr. Hamilton, at McGuigan, to the vacancy.

In the drilling contest at Nelson McLeod and Ringwood, of the Slocan Star, took first money, winning the Robertson trophy and $100. They drilled 41 5-6 inches in coarse granite in the fifteen minutes. Ross and McLeod, of Greenwood, went two-thirds of an inch better, but were barred from this competion by an error in entry. They took the citizens' prize of $100, however.

It may be that two policemen would be expensive in the city, but at times there is need for them. On Monday a youth loaded up well with bad whiskey made it his special business to employ the foulest language ever heard in the place, and that at the top of his voice, to several of our most respectable citizens, and he escaped the police when a term of three months in the cooler would have done him efficient service.

Nelson, B.C. Kaslo, B.C. Sandon, B.C.

The Knights of Phythias celebrated their annual memorial day with due solemnity on Wednesday evening in the Methodist tabernacle. A choir composed of Mrs. Cliffe, Miss Plant, Messrs. Grimmett and Gable, rendered two suitable selections. Mrs. Sanford presiding at the organ. Rev. J. A. Ferguson delivered an excellent address, bearing on lessons of the past, the opportunities of the present and their connections with the future.

Police Court.

J. P. McLean, alias Kruger, hailing from New Denver, was told by the Beak to get out of town the other day, and he got. A few other old stiffs got word of the way things were going and they got also to the relief of Sandon.

Robt. Burns (not the bard, however), J. A. Donnelly and S. S. Manning paid each $20 and costs this week into the city treasury for being drunk and disorderly and using obscene language on the streets. Wm. Dowding paid $10 for the same offence. It may be remarked, however, that none of the men are old-timers. Most of them are late arrivals who imagined that English law did not extend to Sandon. If people want to get drunk there is no law to prevent them doing so, but there is a law against appearing on the streets in that condition and annoying the public, and it will be enforced.
