# The Mining Review.

VOL. 4.—NO. 20. SANDON, B. C., OCTOBER 27, 1900. $2.00 PER YEAR.

## THE LOCAL GRAFT.

Eli Taylor has been appointed a school trustee.

The spur to the Ivanhoe concentrator under way.

There is more mud than money in Sandon just now.

Silver is now quoted at 65 cents, the highest figure since 1896.

W. J. Pierson has a couple of comfortable houses for sale cheap.

Sunnyside is likely to have a sidewalk again as far as the school-house.

The Yukon district council has elected opponents to the present system of management.

Teachers and pupils have now taken possession of the new school. The seats are now in.

The French company has cabled the money to pay the men at Camp Mansfield, and Mansfield is now liberated.

At the assizes in Nelson this week. Hocking, the Moyie bigamist, was sentenced to 3 years at New Westminter.

The passenger trains of the C. P. R. will will shortly come in on the west side of the new depot, to the delight of many.

The big Pennsylvania coal miners' strike is likely to be declared off at any moment, the differences being nearly adjusted.

The Industrial World, published at Rossland, calls John Houston "a traitor to labor unions." It has got to be either slavery or a traitor.

A number of carpenters and other mechanics are likely to leave the city before long, as the building boom of the season is now nearly over.

Young Chenoweth, accused of shooting a Chinaman at Rossland last summer, was acquitted at the assizes, the jury finding him not guilty.

C. L. Alvord, a cashier, stole a million dollars from the First National Bank, New York, and he will probably get a six months' sentence for it.

Two Finlanders in a beastly state of intoxication, showed revolvers on the street Tuesday night. They were arrested and fined $25 each next day.

Mr. Brown has completed plans for our new city hall. They are in the hands of the government awaiting a decision, before anything can be done.

The union Sabbath school of Sandon will be held in the upper flat of the new school, commencing tomorrow (Sunday) at 2:30, and thereafter until further notice.

The Methodists will hold service in the red building lately vacated by Mr. Nash tomorrow (Sunday) morning and evening, and there after until the new church is completed.

A telegram from New Denver informed the chief of police Wednesday that a Dago who smashed windows there was on the train, When the train reached, however, he was non est.

The Methodists have decided to change their original plans for a church building. They received tenders Tuesday night, but all of them were too high for the purse of the committee.

Mr. Trueman has leased the rear of the upper flat of the Cliffe block for a term of years, and is having a model photograph gallery arranged thereon. There are a few more rooms to rent in the building that will make very comfortable and convenient offices. The rental is not at all extortionate, and the locality the best in the city.

Our city council are still wrestling with the street lighting problem. The city needs the service badly, and the best thing the council can do is to ascerwhat other places pay for what they require, and if accepted by the company that ends it. If the light company refuse that offer, let them call the taxpayers together and submit the situation to them for a solution.

R. J. Broddy has removed from here to Nelson.

The Sandon laundry is likely to put in a steam plant.

Mrs. Ganty has returned home from a trip to the south.

The Rev. Yates has removed from New Denver to Golden.

E. C. Chipman, of Kaslo, was in the city a few days on business.

The Misses McKinnon returned Saturday from a visit to Nelson.

Wm. Harrington, of Slocan, spend a few days in Sandon this week.

Mr. and Mrs. J. Vallance went down to Nelson, this week, for a visit.

Fred. Buckholy, steward on the Slocan, has got a divorce from his wife.

Alex. Stewart, a real estate man of Nelson, has gone to Toronto to reside.

C. Gales has removed his barber shop to the Balmoral building, and is now "soaping it up" in dead earnest.

Sandon is to have a Chinese laundry it is said. The Chinamen will, of course, remain as long as they are patronized.

Mayor Goodeve, of Rossland, is expected shortly to speak on behalf of the Conservative candidate, A. H. McNeill.

H. A. Macdonald, a deaf prospector, was run over by an engine at Rossland, on Wednesday, and both feet were cut off.

H. B. Alexander returned from the N. W. Territories on Saturday, where he had been overlooking matters on a large ranch he has there.

The council have decided on a petition to build a sidewalk on Reco avenue from the Sandon hotel to Byers' store, which is very much needed.

The council have decided to extend the flume in the west end of the city, and also repair the damage done it by the fire near the C. P. R. track.

The public now see the necessity for encouraging and supporting a fire brigade, as a cent of insurance cannot be got by anyone in the abeence of a fire company.

About 200 Indians are starving 150 north of Agassiz. They caught no salmon this year, their potatoe crop has failed, and their cattle have been drowned by the floods.

Esmer Wallace, who used to be a C. P. R. agent on the Crow's Nest branch, was arrested at Slocan Junction the other day for embezzlement at a former post.

Frank Clarkin, one of the best brakemen running out of Nelson, has been promoted. He now has charge of a freight train on the Nakusp & Slocan branch.—Tribune.

Wm. Hennessy, who located some of the oldest and best mines in the Slocan, and who since wandered over the one-half of creation, is again back in the Slocan looking over the field again.

Messrs. Karr & Wilson are going to build residences on Sunnyside yet this winter, G. W. Grimmett and J. Woods are wrestling with stores, the foundations of which are just finished, and the Methodists are going to tackle a church building.

The public will please bear all imperfections in this paper for a week or two until we get into our new building and get matters in shape. All mechanics are rushed at this season, but this does not lessen the difficulty of running a newspaper in an open tent at this season of the year.

Nothwithstanding the criminations and recriminations between Architect Balmain and Contractor McLachlan, the new school building has been finished contrary to much prophecy. We do not know whether the contractor made or lost money on the job; but we do know he has put up a splendid building and one whose finish must be satisfactory to all persons interested. The new seats are now being put in, and when painted, the building will be one of the best in the province.

## MINES AND MINING.

Ruby silver has been found on the Emily Edith.

Ernest Mansfield has bought the marble quarry near Kaslo.

The Speculator claim will have 20 man at work this winter.

The Whitewater mine shipped 172 tons of ore the past week.

The Ymir Mine is now paying the prevailing wages of this district.

The Hewett, at New Denver, is likely to become a heavy shipper soon.

The Iron Horse, on Ten Mile, has been bonded by a Spokane company.

The St. Eugene mine at Moyie, is turning out 100 tons of concentrates a day.

Sandon ore shipments this week were: Payne, 245; Last Chance, 79; Ruth, 66. Total 390 tons.

The Wakefield is being thoroughly examined by an expert, at the suggestion of the English owners.

W. Alpherson, an old timer in the Slocan, is likely to buy some properties here and in the Lardeau.

The Ivanhoe concentrator is now ready to start up at any time, and when started, barring accidents, will be a heavy, steady grinder.

It is now more than likely that the new company will acquire the Fletcher property near Whitewater, as a second payment has been made on it.

Alex. Sharp, a mining engineer of Rossland, has been in the camp the past week, looking over some mining property for the Burns-Wilson syndicate.

There are 663 acres of land in the Condor and Bosun properties on Slocan Lake, and over two miles of a mineralized vein located. How many more miles there are unknown it is hard to say.

Development work goes steadily on at the Ajax. A contract has just been let for 450 feet of tunneling and upraising the vein on No. 6 level, the greater part of said distance being through the ore body exposed in No. 5.

The Nooday mine at Silverton, another property that paid the large wage for the short day during the lockout, and whose manager used to say could do it with profit, is in serious financial difficulties; and it is a question if the ownership is not changed all around before all is over.

Some very fine ore is now being taken out at the Palmita mine, and the property gives every indication of becoming one of the largest producers of this district, late development having demonstrated that. The Queen Bess vein carries good values on Palmita, and also that another large vein crosses the property from which ore is now being mined.

The Mountain Con group will, in all probability, soon be turnad over to London capitalists at a good figure. The group consists of five claims, the Mountain Con and Costic, which were bonded from J. A. Whittier last July, and the Granite Mountain, Silver Lake and Silver Lake Falls, which were located by W. W. Warner since that time. The formation in which the claims are located is granite. They are almost on the divide between the north fork of Carpenter Creek and the south fork of Kaslo Creek. Properties in this belt have not received much attention until lately, and at the time work was commenced on the Mountain Con its prospects were not considered very promising. Development has proved different, however. Since July 20th the vein has been opnned up by two tunnels, showing a continuous shoot from three to 18 inches of ore, the property being virtually a grass-roots payer. Three cars of ore have been shipped during the summer, the last one averaging 247 ozs. silver and 5.16 per cent. lead. All work on the property has been suspended pending the completion of the deal.

### A Bureau of Statistics.

R. E. Gosnell has been appointed secretary of the bureau of statistics for the province. The bureau will collect information relating to mining, labor, agriculture, health, shipping, railways, municipalities, education, building, finance, insurance and other matters.

### Candidates for the Commons.

The following candidates have been nominated in the various constituences of the province:

Yale-Cariboo—W. A. Galliher, Liberal; A. H. MacNeill, Conservative; Christopher Foley, Labor.

Victoria—George Riley and Richard L. Drury, Liberal; Thomas Earle, M. P. and Hon. E. G. Prior, M. P. Conservatives.

Vancouver Island—William Sloan, Liberal; John Bryden, Conservative; Ralph Smith, Independent-Labor.

Burrard—G. R. Maxwell, Liberal; James F. Garden, Conservative.

Westminster—Aulay Morrison, Liberal; Edgar Dewdney, Conservative; Will MacCain, Socialist-Labor.

### To the Business Men and Residents of Sandon.

The Methodist congregation of this town is making an effort to build a house of worship that will cost about $1,700, when completed. A parsonage has already been purchased at a cost of $950, and the lot upon which our church will be erected cost $500. Upon these properties there is some indebtedness, but we wish to open our church without any encumbrance upon it whatever.

Knowing that the fire must have seriously affected the resources of many persons, we have decided not to make an individual appeal. We do not wish to tax your well-known liberality, but we would at the same time beg leave to urge that our enterprise receive your attention, and whatever support you feel inclined to give.

Any contributions will be thankfully received by the members of our Trustee Board, and acknowledged in our reports issed quarterly.

A. M. SANDFORD,
Chairman of Board.
G. H. SMEDLEY,
Secretary of Board.

# The Mining Review.

SATURDAY, OCTOBER 27, 1900.

## THE LABOR CANDIDATE'S MEETING.

The Labor candidate, Mr. Foley, assisted by Mr. Wilks, held a meeting here Saturday evening, in the Miners' Union hall, the first meeting held in the building, and addressed a large gathering, notwithstanding the unfavorable state of the weather. Mr. Foley is a fair, average speaker, for a man of his calling, and with better education and more knowledge of legislation and politicial history of the country in the past, would be a good, average stumper, as stumpers go in Canada. He was not backward in telling the people he was in the old politics a Liberal; and we fully believe, if elected, he would be just as useful to Mr. Laurier as any other man the constituency might send down, as he would in all essential points be a voter with him.

He attacked the Conservative party truly, but certainly not justly, as he repeated again they paid the C.P.R. $100,000,000 in land and money to build the road. The statistics show the payment in cash was but $77,000,000 and the land subsidy at the time it was given was worth nothing. A man in buying a colt does not pay for it what the horse may be worth in after years. For the same reason the price for the land given the C.P.R. must not be rated at what it is now worth through the construction of the road, but what it was worth at the time—merely a nominal figure. But Mr. Foley could not see what the Conservative party ever did for the working men—he could not see since confederation they spent $175,000,000 one way and another in public works, the one-half of which was paid out in wages, neither could he see the National policy has kept 25,000 extra mechanics at work since it was inaugurated in 1879, nor yet that under it tea and coffee, and many other necessities were made free, and others brought to a mere revenue basis.

It appears to us also if he spent the time he took up in criticising some of the official acts of Mayor Goodeve, of Rossland, who is neither one of the government, nor a candidate, nor in any way whatever in issue, in explaining to his audience, what he would do, if elected, for labor, his time would have been much better employed.

We are free to admit much legislation might be passed at Ottawa that would help the industrial classes of the country, but certain it is Mr. Foley in his speech outlined none of it. Laboring men and others should remember abusing the old parties, for alleged mistakes, is not showing what could and should be done for labor.

However, we intend to say but little one way or the other in the present campaign. As a matter of fact, in passing, as a public journalist, we deem it a duty, to correct mistakes made by any speaker, so that the people may have before them the truth as nearly as possible, and then form convictions and conclusions for themselves.

---

It appears to us the miners must themselves admit, the employees of Ernest Mansfield are not showing the best of gratitude to that gentleman in the present trouble in Camp Mansfield. It was hearlded far and near during the late lockout that Mr. Mansfield was of different material from most of the mine owners, and was not afraid to pay $3.50 for the short day. Now, however, they have him behind the bars at Nelson, and for an offence, if we have the right side of the story, that is not his own creating. As we learn it, he was managing some properties in Camp Mansfield, in which he held as partial interest, for old country parties, who were to advance money when required. Lately the advances failed to materialize, and his men placed their special friend in the trouble of the past year in the Nelson prison under a capias. Just how the matter will end it remains for the next few days to show.

---

The jury says the Nelson court house requires ventilation.

---

## FAT AND LEAN

That is, babies: fat, they are happy and safe; lean, they are neither happy nor safe.

Apart from being entirely healthy or not quite well, a fat one has much reserve of vital strength to resist any sudden attack, while the lean one has little or no reserve.

The way to be fat and well is Scott's emulsion of cod-liver oil. A little: only a little. Not any, if healthy and plump already; "let well enough alone."

We'll send you a little to try if you like.
SCOTT & BOWNE, Chemists, Toronto.

## LICENSE AUTHORISING AN EXTRA-PROVINCIAL COMPANY TO CARRY ON BUSINESS.

"COMPANIES ACT, 1897."

CANADA:

PROVINCE OF BRITISH COLUMBIA.

No. 192.

THIS IS TO CERTIFY that the "Condor Claims, Limited," is authorised and licensed to carry on business within the Province of British Columbia, and to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends

The head office of the Company is situate in England.

The amount of capital of the Company is £20,000, divided into 20,000 shares of £1 each.

The head office of the Company in this Province is situate at New Denver, and Wm Henry Sandiford, Mining Engineer, whose address is New Denver aforesaid, is the attorney for the Company.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 14th day of September, one thousand nine hundred.

[L.S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

The following are the objects for which the Company has been established:—

(a.) To purchase or otherwise acquire and work any lands, mines, mining or mineral claims, mining rights, grants, concessions, leases, easements, or interests in lands, waters, mines, minerals, mining or mineral claims, mining rights and other hereditaments in British Columbia or elsewhere and any property, real or personal, movable or immovable, for purposes incidental thereto, or to any other objects of the Company:

(b.) To prospect and search for, get, win, work and raise, either within the area aforesaid, or elsewhere, copper or other ores, metals, minerals or substances, and to carry on the business of miners, millers, smelters, and workers of any processes in the production, reduction and making merchantable of ores, minerals, metals, metallic products, suppliers of water, merchants and manufacturers and workers of any minerals, metals, articles, and things used in connection with mining, milling, smelting, and other processes aforesaid, or any of them:

(c.) To search for mines and minerals, and to acquire and grant licenses and other rights and privileges for the purposes of, or in respect of, the search for or winning and getting of copper or other ores, metals or minerals:

(d.) To purchase, take on lease, or in exchange, hire or otherwise acquire any real or personal property, live or dead stock, or any easements, rights, privileges or concessions, or any interest therein, necessary or convenient for the Company's business, or for developing or utilizing any of the Company's property, and to explore, work and develop the same:

(e.) To acquire, erect, construct, or hire and maintain and work, any buildings, plant, engines, machinery, fixtures, mills, roads, railways, tramways, canals, creeks, shafts, ditches, or other works which may be necessary or advisable for the purposes of the Company, whether on land of the Company or not:

(f.) To undertake and carry into effect all such financial, commercial, trading, or other operations or business in connection with the objects of the Company as the Company may think fit:

(g.) To acquire any inventions capable of being used for any purpose connected with any of the businesses or operations of the Company, or the license or right to use the same, and to acquire or cause to be applied for and obtained, any letters patent or concessions or privileges of an analogous character, whether British or foreign, in respect of any such inventions, and to grant and issue licenses for the use of any such invention or inventions, upon such terms and conditions as may be considered expedient:

(h.) To amalgamate with any other company having objects altogether or in part similar to the objects of this Company, or to acquire and undertake the whole or any part of the business, properties and liabilities of any person or company carrying on any business which this Company is authorised to carry on, or possessed of property suitable for the purpose of this Company:

(i.) To pay for any property or business purchased or otherwise acquired in shares (to be treated as either wholly or partly paid up), or debentures or debenture stock of the Company, or in money, or partly in shares or debentures or debenture stock, and partly in money; and to accept in payment for any part or for the whole of the property of the Company, sold or otherwise disposed of, shares, bonds or debentures or any other company or companies:

(j.) To improve, manage, develop, let or sell, or otherwise dispose of, charge or deal with, in any manner whatsoever, all or any part or parts of the property of the Company, or any rights or easements in or over the same:

(k.) To acquire by original subscription or otherwise, and to hold and sell, or otherwise dispose of, shares, stock, debentures, or debenture stock, or any interest in the revenues or profits of any company, corporation, partnership, or person carrying on any business capable of being conducted so as directly or indirectly to benefit this Company, and, upon any return of capital, distribution of assets, or division of profits, to distribute such shares, stock, debentures, or debenture stock among the members of this Company in kind:

(l.) To borrow or raise money for the purposes of the Company, and to execute and issue bonds or debentures, or debenture stock, to bearer or otherwise, mortgages and other instruments for securing the repayment thereof, or for any other purpose, with or without charge upon all or any of the property of the Company or its uncalled capital, and upon such terms as to priority or otherwise as the Company shall think fit:

(m.) To establish or promote, or concur in establishing or promoting, any other company whose object shall include the acquisition and taking over of all or any part of the property, assets or liabilities of this Company, or shall be in any manner calculated to enhance, either directly or indirectly, the interests of the Company, and to acquire and hold shares, stock, or securities of, or guarantee the payment of any securities issued by, or any other obligations of any such company:

(n.) To lend, invest, and deal with the moneys of the Company not immediately required, upon such securities, or without security, and in such manner as from time to time may be determined:

(o.) To make, accept, indorse, and execute promissory notes, bills of exchange, and other negotiable instruments:

(p.) To apply for, obtain, accept, adopt, and carry into effect, any Acts of Parliament, provisional orders, concessions, contracts, grants, decrees, powers or privileges, which may be deemed necessary or desirable for facilitating the objects, or any of the objects of the Company:

(q.) To procure the Company to be registered, or incorporated, or otherwise domiciled, represented, or recognised in British Columbia, or in any other place where it may be necessary or expedient so to do:

(r.) To hold in the names of others any property which the Company is authorised to acquire, and to carry on or to do any of the businesses and acts and things aforesaid, either as principal or agent, and either by the agency of or as agents or trustees for others:

(s.) To pay all expenses of and incident to the formation of the Company, and to remunerate and make donations (by cash or other assets or by the allotment of fully or partly paid shares, or in any other manner) to any person or persons for services rendered or to be rendered, in introducing any property or business to the Company, or in placing or assisting to place any shares, debentures or other securities of the Company, or for any other reason which the Company may think proper:

(t.) To execute and do generally all such other things as the Company may at any time consider conducive to the carrying out or attainment of the above objects, or any of them.

### Another Boundary Smelter.

Grand Forks, B. C., Oct. 23.—James McGregor, of Vancouver, who is backed by eastern Canadian capitalists, is making a tour of the Boundary country to select a site for a pyritic smelter. Mr. McGregor today visited several points in the Kettle River valley. He will spend next week at Greenwood, Phoenix and Midway.

Mr. McGregor declined to disclose the names of his principals at this juncture, but stated ample means and purpose having a 250-ton plant in operation in Boundary country before next spring. The pyritic system of smelting, he declared, will reduce the cost of treating low-grade ores as compared with existing rates at least 75 per cent.

### Wise in Her Generation.

"Yes she is one of the best wives in the world, and he got her by advertising."

"It doesn't seem to me I could ever bear to think of marrying a man who would advertise for a wife."

"I didn't say he advertised for a wife. But he was such a liberal and judicious advertiser of his business that she was satisfied he would make a good husband—and she took him.—Exchange.

### Wagon Road Completed.

E. A. Cameron has completed this week a $1,000 contract on the government wagon road between here and Cody, which took a month to build the work. The road was repaired last year and frequently since, so the B. C. government let a contract to fix the whole road properly. The contractor had to plank, krib and bridge in places, besides cleaning away heavy mud slides which came down from the K. & S. track. The road is now in first-class condition.

### NOTICE.

I hereby give notice that 30 days from the date hereof I will apply to the Board of License Commissioners for the City of Sandon for a license for my hotel on lots 2 and 3, block A, K. & S. division west, in the City of Sandon.

H. M. STEVENS.

Sandon, October 20th, 1900.

### A Mountain of Iron Ore.

In the Algoma district Canada has one of the most marvelous deposits of iron ore that has ever been discovered. It is now known as the Helen mine and is situated 12 miles from the Michipicoten harbor on the northeast shore of Lake Superior. Three years ago it was discovered by Robert Sayers and Benjamin Boyer, who located it while prospecting for gold. Little realizing the immense value of their discovery they sold the mountain to F. H. Clergue, who gave them $500, the price they asked, and $75 per month each during the term of their natural lives. Sayers died in a few months, and Boyer is enjoying the fruits of their united efforts, residing in Sault Ste. Marie, Ont.

It is a mountain of Bessemer iron ore, 66 per cent. pure, and is characterized as "the most amazing thing in iron mining in the history of the western hemisphere." They have 27,000,000 tons of ore blocked out, and every ton represents a profit of $2 or better to the company. The ore is taken out by quarrymen working in the open air. How many millions of tons of ore is concealed back in the mountain beyond the depth already explored, or in the depths below the lake, no man knows. The ore is carried to the ore dock in pressed steel cars which hold 55 tons each. It is the intention of the Clergue company to ship annually 3,000,000 tons of ore, 600,000 tons of which will be used at the blast furnace which will be erected at the Canadian Soo, to supply material for the steel rail plant already arranged for there.

### Not Much Difference.

As between cyanide and barrel chlorination process, the greatest difference in cost after roasting lies in the amount and value of chemicals used. The chemical cost in chlorination would vary from 50 to 70 cents per ton; in cyaniding from 25 to 45 cents per ton. While this fragmentary statement would appear to indicate that chlorination would be dearer, other elements, such as coarser crushing for chlorination, and per centage of saving, would offset such implication. The difference would require some space to explain, and as for comparison that need no longer be instituted. The ore itself should determine the process, and that can be best learned by experience.

### A Mint for Canada.

Montreal, Oct. 22.—Hon. W. S. Fielding, Canadian Minister of Finance, in a campaign speech this evening announced that the Canadian government had obtained the consent of the Imperial government for the establishment of the royal mint in Canada. This mint would coin all the Canadian gold required, the balance of the Yukon and British Columbia product being made up into British sovereigns.

FOR OVER FIFTY YEARS.

Mrs. Winslows Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night and broken of your rest by a sick child, suffering and crying with pain of cutting teeth. Send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures diarrhoea, regulates the stomach and bowels, cures Wind Colic, softens the gums and reduces Inflammation, and gives tone and energy to the system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price 25c. a bottle. Sold by all druggists throughout the world. Be sure and ask for Mrs. Winslow's Soothing Syrup."
