The Mining Review.

VOL. 2. NO. 14. SANDON, B. C., SATURDAY, SEPTEMBER 10, 1898. PRICE FIVE CENTS.

THE CONVENTION.

The Conservatives Decide Upon Dominion Lines in Provincial Politics.

The Liberal-Conservative Convention met in the Metropolitan block on Friday last. Col. Prior, M. P., was in the chair. The day's session was a short one; the Constitution of "The Liberal-Conservative Union of British Columbia" was agreed upon and Dr. D. H. Wilson elected as President. Several other officers were also appointed.

Mr. C. Wilson, Q. C., moved the first motion of the day; it was: "That the members of this convention agree to give their hearty support to every resolution which the majority shall carry. Sir Charles Hibbert Tupper seconded the motion, which was carried.

It was then moved by Hon. T. Mayne Daly, seconded by Senator Macdonald, and Carried, that the Liberal-Conservatives in Convention assembled proceed forthwith to organize a Liberal-Conservative Union for the Province of British Columbia. The name of the organization shall be the Liberal-Conservative Union of British Columbia.

The Constitution was then read and adopted. The following is the full text:

1. The name of the organization shall be "The Liberal-Conservative Union of British Columbia."

2. The object of the Union is to promote, by all lawful means, the interests of the Liberal-Conservative party in British Columbia.

3. The officers of the Union shall be an Honorary President, five Vice-Presidents, a Secretary, a Treasurer, and a Corresponding Secretary.

4. The officers of the Union, excepting the Corresponding Secretary and the Executive Committee who shall be chosen by the President and Vice-Presidents, shall be elected annually by the members thereof, at a general meeting of the Union to be held annually. The first general meeting of the Union to be held at Vancouver the first Thursday in September, A.D. 1899, and thereafter at such time and place as each meeting may determine. They shall hold office for one year only, but excepting the President, shall be eligible for re-election. Presidents of electoral districts shall always be chosen as Vice-Presidents of the Union.

5. The duties of the President shall be to preside at all meetings of the Union from the time of his election to the election of his successor.

6. Each Vice-President is expected, with the aid of Corresponding Secretary, to organise a district association in the electoral division which he is chosen to represent, and to see that the Constitution and By-laws of District Association hereinafter recited are put into good working order in his constituency. His title in the District Association shall be "President." After the organization of the District Association the person chosen by the District Association as President shall be ex-officio a Vice-President of the Union.

7. The duties of the Secretary shall be to conduct the official correspondence of the Union and keep the minutes of the meetings. He shall also keep the record of its membership.

8. The duties of the Treasurer shall be to receive the moneys belonging to the Union and to disburse the same under the orders of the Executive Committee hereinafter provided for.

9. The duties of the Corresponding Secretary shall be to aid the several Vice-Presidents in organizing associations in harmony with this Union, to see that these associations are at all times in good working order, to provide for the proper supervision of the revising of the Voters' lists, to disseminate political reading matter, to aid in elections, and generally to serve the interests of the party.

10. There shall be chosen each year an Executive Committee of three persons, with power to add two to their number. The duties of the Executive Committee shall be to raise the funds necessary to defray the expenses of the Union; to direct the treasurer as to the payment of claims against the Union, to provide public speakers and generally to manage the affairs of the Union.

11. The services of all the officers of the Union shall be gratuitous, excepting those of the Corresponding Secretary who shall receive a salary to be determined by the Executive and expenses when travelling on the business of the Union.

12. Each member in good standing of every local Liberal-Conservative Association shall be a member of this Union.

13. Every District Association must have a membership of at least fifty in this Union to be entitled to the services of the officers of this Union and to share in the expenditure of its funds.

14. Members of the Union may vote by proxy at all meetings of the Union, but proxies can only be held by members of the Union. At all meetings of the Union the voting power shall be limited to one vote for every twenty members appearing on the rolls of each District Association as shown by the Secretary's books.

15. The voting for officers of the Union shall be by ballot initiated by the Secretary. Other votes shall be as directed by the President or other officer presiding.

16. In the absence of the President the Senior Vice-President, who is president, shall preside.

17. Four weeks' notice of all meetings of the Union shall be given by advertisement in the Conservative press of the Province.

Moved by Mr. H. Dallas Helmcken, M. P. P., seconded by Mr. W. Myers Gray, and carried: "That this Convention recalls that heretofore the interests of British Columbia have been represented in the Canadian Cabinet by the late Rt. Hon. Sir John A. Macdonald, when member for Victoria, the Hon. Edgar Dewdney, an early settler, and at one time a representative of the Province, and by the Hon. E. G. Prior, when in 1896 the Liberal-Conservative party formally recognized the necessity for and the right of the Province to such representation; and this Convention desires to record its regret that at a time when the interests of the Province are rapidly developing, largely in consequence of the progressive policy of the Liberal-Conservative regime and questions of great domestic and international importance are daily arising which directly involve the continued welfare of British Columbia, the Liberal party refuses to give such direct representation to this part of the Dominion in the government of the country."

Moved by Mr. Thomas Earle, M. P. seconded by Mr. Robert F. Green, M.P. P., and carried: "That this Convention denounces the Laurier-Tarte Administration for its studied neglect of British Columbia interests generally. It observes that while the eastern part of Canada is fully represented on the International Conference now in progress at Quebec, interests peculiar to the west are among the most important for consideration, such as the fisheries, including sealing; transportation by land and sea, including coasting in territorial water; Alaskan boundary and mining, and that not a representative from the west or anyone personally and locally familar with these subjects is a member of the Commission. This Convention charges that through this policy of indifference and neglect a scandalous discrimination has been made against British Columbia labor as well as against the interests of British Columbia traders, transportation companies and shipping, in wholly passing over this Province for supplies to Canadian troops in the Yukon and in the employment of foreign ships and the bestowal of patronage on foreign railways and foreign ports.

This Convention further charges against the indifference and neglect of the government, the long delay in the appointment of a Chief Justice of the Supreme Court and the vacancy on the bench still existing together with the consequent disorganization of the Admiralty and possibly of the election tribunals of the Province.

This Convention moreover resents the insult of the Province in the appointment of men from the outside of this Dominion to positions in the service of the Dominion Government and in the appointments connected with the administration of the Yukon Territory, in which nearly every part of Canada has shared to the exclusion of British Columbia.

Moved by Mr. Charles Wilson, Q.C., seconded by Mr. E. Dewdney, and carried: "That in the opinion of the Convention it is desirable that the Liberal-Conservative party should as a party take party in provincial elections for the purpose of ensuring the government and legislation of this Province on Liberal-Conservative principles, and in order to carry this into effect "at the next general election for the Province" that candidates be invited to stand for such constituencies as are likely to return Liberal-Conservative members pledged primarily to support a Liberal-Conservative government as distinguished from a government composed of Liberals or partly of Liberal Conservatives and partly of Liberals, and that a platform or statement of principles applicable to local politics be drawn up.

The election of officers for the Liberal-Conservative Union of British Columbia resulted as follows: Honorary President, the Hon. Sir Charles Tupper; President, Dr. D. H. Wilson; Vice-Presidents, Mr. A. McGregor, Nanaimo; Mr. B. R. Kerr, Victoria; Mr. C. Wilson, Q. C., Vancouver; Mr. R. McBride, M. P. P., New Westminster; Mr. R. F. Green, M.P.P., Slocan; Secretary, Mr. G. H. Cowan; Treasurer, Hon. E. Dewdney. It was decided that the other necessary offices be filled by appointment of the Executive.

It was resolved that the President and officers elected to form a committee to draft the platform of the party, have power to add to their number.

On motion, the delegates present then tendered to Col. Prior their hearty thanks for the able manner in which had filled the chair during the Convention.

After the customary vote of thanks to the visiting delegates, Sir Charles Hibbert Tupper, and others, the most successful political Convention ever held in British Columbia broke up with cheers for the Queen and Sir Charles Tupper.

Stop that Cough! Take warning. It may lead to consumption. A 25c. bottle of Shiloh's Cure may save your life. Sold at McQueen's Drug Store.

SILVER-LEAD MINES.

A Good Article in the Mining Record on the Whitewater Mine and Whitewater Deep.

To the Whitewater Deep mine has fallen the distinction of being the the pioneer deep level mine of the Slocan country. The success of its owners in proving the continuity of the Whitewater vein and its ore chutes to a vertical depth of about 1,000 feet below the apex has done much toward adding to the fame of one of the greatest silver-lead mining districts (the Slocan) in the world.

The Whitewater Deep group of mines is situated in the Slocan Mining Division of West Kootenay, British Columbia, and joins the town of Whitewater on the north.

Whitewater is situated in the valley of Kaslo river on the Kaslo and Slocan railway. It is eighteen miles from Kaslo, the eastern terminus of the railroad, and twelve miles from Sandon, the western terminus. Its latitude is 50 degrees north, its longitude 117 degrees west, and its altitude 3,400 feet above sea level.

Whitewater may be reached both from the east and the west by several routes—partly by rail and partly by water. At Sandon the Kaslo and Slocan railway connects with a branch of the Canadian Pacific railway, and at Kaslo (via steamboat to Nelson) with the Spokane Falls and Northern railway. This railway furnishes daily connection with Spokane, an important railroad centre. A second route to Spokane is via steamboat to Bonner's Ferry on Kootenay river, and the Great Northern railway.

The climate in the vicinity of Whitewater is favourable for the continuation of mining operations throughout the year. Although much snow falls during the long winter months it in no way interferes with mining, but on the contrary serves to facilitate and cheapen the transportation of ore from the mines to the railroad by means of sleighs (rawhides).

The principle mines in the vicinity of Whitewater are the Whitewater group, and Whitewater Deep group, Elkhorn group and Pauper's Deep claim, all lying on the steep mountain side to the north of the town. These properties all contain the Whitewater vein, the apex of which is in the first named group.

A large number of claims have been staked both to the east and West of the groups mentioned on the extension of the Whitewater vein. On some of these tunnels are being driven into the mountain side with a view to cutting and exploiting the vein.

THE WHITEWATER GROUP.

The Whitewater group has a total area of 100 acres, and consists of four claims, viz, Whitewater, Irene, Myrtle R, and Tennie C. The lengh of the group in the direction of the vein is 2,100 feet. The strike of the vein is north 30 degrees west, and its dip from 35 to 40 degrees to the south. Its width varies from two to twenty feet. The vein is persistent both longitudinally and virtically, is quite regular and well defined, and easily followvd. It is, moreover, a true fissure, the country rock being slate. The footwall, or fissure plane is smooth and hard, but the hanging wall is more or less shattered and requires timbering. As a rule the gangue is soft, and requires but little blasting for its removal.

The ore is of two principal varieties—clean and concentrating, and the latter (after treatment) yields practically the same values as the former. The clean ore is fine-grained and is locally termed "steel" galena. The clean ore occurs on either wall, and varies from several inches to several feet in thickness. A deposit of spathic iron varying in thickness from a few inches to three or four feet often lies between the wall and the ore. The remainder of the vein filling consists for the most part of decomposed slate (locally termed "talc") through which are disseminated (1) quartz and spathic iron often in a more or less decomposed state, (2) fine particles of argentiferous galena and (3) fragments of galena, tetrahedrite and chalcopyrite.

The Whitewater vein has been extensively developed in the Whitewater and Irene claims by a series adits varying in length from 200 to 1,000 feet. The several levels are connected by winzes and raises, thus securing excellent ventilation.

Up to the present time the maximum output of the Whitewater mine has been thirty-five tons per day. It is proposed to largely increase the product by erecting a 125-ton concentrator to treat the large bodies of concentrating ore. At present prices the Whitewater ore yields a net profit of $40 per ton.

THE WHITEWATER DEEP GROUP.

The Whitewater Deep group of mines covers that portion of the mountain side lying between Whitewater group and the the town of Whitewater and has an area of about 135 acres. On this property the Whitewater vein has been cut by a tunnel 800 feet in length at a vertical depth of approximately 1,000 feet below the apex, or about 400 feet below the lowest level of the Whitewater mine. At this great depth the vein and ore exhibit practically same characteristics as in the upper workings. Although the mine has not yet begun shipping, a considerable quantity of ore is being extracted in the course of development. The work is being systematically and vigorously prosecuted with a large force of men. Drifts are being run at different levels, and are being connected by raises with a view to blocking out the ore bodies for facility in mining.

At the foot of the mountain close to the Kaslo & Slocan railway, a large air compressor plant is now in process of erection. It is designed to drive the compressor by a water-wheel operating under a head of 500 feet. The water is to be obtained from Whitewater creek which flows through the property, and will be conducted to the wheel by a 10-inch pipe line 3,000 feet in length.

About seventy feet above the base of the mountain directly opposite the compressor plant a cross-cut tunnel has been started which will cut the vein about 1,800 feet in from the entrance, and nearly 1,500 feet below the apex. Between the air compressor station and the tunnel, a concentrator will be erected similar to the one now under construction at the Whitewater mine.

A hoist operated by compressed air is now being installed in the upper workings preliminary to starting a winze to connect with the deep level tunnel.

The ore will pass from the mine through the deep level tunnel to the concentrator, whence the clean ore and the concentrates will both be loaded on cars for transportation to the smelter.

To illustrate some of the profit possibilities of the Whitewate Deep mine, the following deductions are given. These are based upon data taken from the authenticated reports of several mining engineers of good repute and are believed to be conservative.

The average width of footwall ore body in the Whitewater mine has been stated by Mr. Fowler to be eight inches, and by Mr. Kendall to be seven inches. The former has placed the profit value per ton of footwall ore at $34 and the latter at $38. As stated elsewhere, the superficial area of the Whitewater Deep mine is 135 acres, or 5,880,600 square feet. Area of the plane of the vein inclined 35 degrees equal to 7,171,500 square feet. Assuming that not more than 1,500,000 square feet can be profitably worked, and that 7 cubic feet of ore is equal to 1 ton, then if the ore shall average 3 inches in thickness, the mine will produce 53,571 tons, which at a net profit of $20 per ton will yield $1,071,420; at a net profit of $30 per ton, $1,607,130; at a net profit of $40 per ton, $2,142,840.

If the ore chute averages six inches in thickness, then the total profit values of the ore at $20, $30 and $40 per ton respectively, will amount to $2,242,860; $3,214,290 and $4,285,720.

It is not too much to say in conclusion that the persistent and scientific development of the Whitewater Deep property has tended in no small degree to strengthen the possibilities of profitable and permanent mining in the Slocan country. The effect cannot but be beneficial to the entire mining community. Many mine owners who have hitherto contented themselves with surface mining and with desultory and unscientific methods will now be stimulated to exploit their properties scientifically and at greater depths. The result will be a permanent mining region which is destined in the near future to occupy a front rank among the famous mining camps of the world.

McGuigan Items.

The new pipe for the Dardanelles compressor has arrived and no time will be lost in placing it in and getting to work.

A fire occurred at the Antoine mine on Wednesday night, burning the bunk house and kitchen. Some of the men also lost their clothes.

CHURCH NOTES.

METHODIST, Rev. A. M. Sanford, A.B., pastor.—Regular services will be held to-morrow at 11 a. m. and 7.30 p. m.

PRESBYTERIAN.—Rev. J. Clelland will preach as usual in the Virginia hall, to-morrow at 11 a.m. and 7.30 p. m.

Union Sabbath School in the Methodist church at 3 p. m. Everybody welcome.

LABOR DAY.

A Decided Hit in the Silver Metropolis.

At an early hour citizens were all astir, and when the K. and S. specials arrived they brought a full quota from Kaslo, showing the citizens of that eastern burg remembered Low Sandonites attended their celebration. In a short time after the C. P. R. train put in an appearance with its increase of visitors from Slocan City, Silverton, New Denver, Roseberry and Three Forks, in all crowding Sandon to its utmost capacity. The Payne and some of the other mines gave their employees a holiday which led to a large turnout from the mines also.

The day was as fine a one for the sports as it could have been, if ordered for the occasion. The committee of management had everything in the best of form as was remarked by many outsiders, so that hitches were unknown. What was almost exceptional for a western town, there were no rows, no arrests and but very few drunken men seen anywhere. This adds much to the credit of all visitors, and townspeople alike.

RACES, ETC.

100 yds. Dash—1st, Dill, Kaslo; 2nd, Wilson, New Denver.

Standing Broad Jump—1st, Gusty, Sandon, 12 ft 6 in; 2nd, Dill, Kaslo.

Hop, Step and Jump—1st, Gusty, 42 ft 8 in; 2nd, Nicholls, Slocan City.

Putting the shot, 17½ lb. stone—1st, Gusty; 2nd, C. Seal, Sandon.

Running Long Jump—1st, Gusty, 19 ft 11 in; 2nd, Nicholls.

Drilling, double-handed—Pat Murphy and J. Corran, 25¾ in. Time 20 minutes.

Single-handed Drilling—1st, W. de R. Rose; 2nd, Murphy. 11¾ in 15 minutes.

The hose reel race, wet test, was keenly contested between Kaslo and Sandon. The latter won though Kaslo made quick time. They lost by turning on the water before the coupling was made. Gillis and Heenan acted as couplers for Kaslo and Henderson and Richardson for Sandon.

In the horse races Doc owned by Beaman took first money and Hammond's Grey Belle took second place.

In the mule race, Sullivan's took first place and Hammond's second.

Boys' Race, 17, and under—Hood 1st and Sharp 2nd.

Boys' Race, 14 and under—Sharp 1st and Cliffe 2nd.

Girls' Race—Alice Moffatt 1st and G. Lafavor 2nd.

After the regular sports were ever two bets of $25 a side for 50 yards were made between the friends of Dill and Wilson, the former taking both. In hot succession followed a bet on Gusty of this city, and he defeated Dill, by some five or six feet.

The sparring between White and Wilkinson in the evening was witnessed by a very large crowd, Phil Hickey acting as referee. In the first two rounds there was little more done than a display of science though some assert fouls were made on the part of White. Heavy work was begun in the third bout. The contest was given to Wilkinson through a foul by White. General opinion is Wilkinson is no match for White, and with better care the latter should have fairly won.

The prize was a large one. Considerable money changed hands. Kaslo, it is said, taking more of it on bets than on sports. Sandon held its own all around, and kept the bulk of the purse at home, however. One agreeable feature of the day was there were no jars, and the defeated took their defeats philosophically, which added much to the harmony of the entire proceedings.

Financial Statement as Received From Labor Day Committee.

EXPENSES.

100 yards race	$15.
Standing broad jump	7.
Running " "	7.
Hop step and jump	7.
Putting shot	12.

THE DERVISHES DEFEATED.

Anglo-Egyptian Army Wipes Out the Khalifa's Forces.

Omdurman, Opposite Khartoum on the Nile, Nubia, Sept.—(By camel post to Nasey.)—The Sirdar, General Herbert Kitchener, entered Omdurman, the capital of Mahdiam, at 4 o'clock this afternoon at the head of the Anglo-Egyptian column, after completely routing the Dervishes.

Roughly our losses were 500 while 15,000 of the Dervishes were killed and many wounded. Last night the Anglo-Egyptian army encamped at Agatza, eight miles from Omdurman. The Dervishes were three miles distant. At dawn the cavalry patrolling toward Omdurman discovered the enemy advancing to the attack in battle array, chanting war songs. Their front consisted of infantry and cavalry stretched out for three or four miles.

At 7.30 a. m. the enemy crowded the ridges above the camp and advanced steadily in enveloping formation.

At 7.30 our artillery opened fire which was answered by the Dervish riflemen. Their attack developed on our left and in accordance with their traditional tactics they swept down the hillside with the design of rushing our flank. But the withering shot maintained for 15 minutes by all our line frustrated the attempt, and the Dervishes, baulked, swept towards our centre upon which they concentrated a fierce attack. Their bravery can hardly be overstated. When the Dervishes withdrew behind the ridge in front of their camp the whole force marched in echelon battalions toward Omdurman.

When our troops surmounted the crests, the Soudanese on the right came to attack those who had reformed under the rocky eminence and had massed around the black standard of the Khalifa in order to make a supreme effort to retrieve the fortunes of the day. A mass 15,000 strong bore down on the Soudanese. General Kitchener swung round the centre and left of the Soudanese and seized the rocky eminence, and the Egyptians, hitherto in reserve, joining the firing line. In ten minutes and before the Dervishes could drive the attack home, the flower of the Khalifa's army was caught in a depression and within a zone of withering crossfire from three brigades, with the attendand artillery. The devoted mahdists strove heroically to make headway but every rush was stopped, while their main body was literally mown down by a sustained deadly crossfire.

Defiantly the Dervishes planted their standards and died beside them. Their dense masses gradually melted to companies and the companies to driblets beneath the leaden hail.

At 11.15 the sirdar ordered an advance and our whole force in line drove the shattered remnant of the foe into the desert, our cavalry cutting off their retreat to Omdurman.

Mr. Wm. Whyte on Railway Matters.

Mr. Whyte, of the C. P. R., says he expects to see the Crow's Nest Pass railway turned over to the C. P. R. for operation within the next 30 days. By that time the road will be completed between Lethbridge, N. W. T., and Kuskonook, Kootenay lake. Regular trains will be run as soon as this is done. Kuskonook for the present will remain the rail terminus of the line, but this will by no means interfere with the passenger and freight service to points further west. Passenger trains will be met at Kuskonook by the handsome and fast steel steamer that is nearly ready for service on Kootenay lake, while freight will be handled by a barge service to connect with the Columbia & Kootenay and Columbia & Western railways. Mr. Whyte was not prepared to say whether or not the Crow's Nest Pass railway will be extended westward through the Ymir district, and via Salmo, Sayward and Trail, but he admited that the route had been surveyed and found to be practical. Mr. Whyte said the company fully appreciated all the advantages that might accrue from the construction of a railway along this route.

DR. FOWLER'S EXTRACT OF WILD STRAWBERRY.

Nothing has yet been found to supercede it for Diarrhœa, Dysentery, Cholera, Cramps, Colic and Summer Complaint. Don't take a substitute. Insist on getting the genuine.

MINING BRIEFS.

With Scissors and Pen.

And now Lemon Creek has some gold placers.

Dayton No. 2 is coming up well as work progresses.

The Charleston, near Whitewater, will soon go on the shipping list.

The Northern Belle, in the Jackson basin has 30 men at work, and its new concentrator will be in operation next month.

It is understood Mr. Sandiford has thrown up his bond on the Mollie Hughes. He wanted more time, and the owners refused to give it.

They are reporting an admixture of iron in some of the ore at the Adams group. This is considered a most favorable indication by many.

The Rambler near McGuigan shipped one car of ore last month and one so far this. The Antoine did the same thing, and both will ship regularly from this out.

The Rossland Miner speaks glowingly of a strike in the White Bear that gives from $5 to $84 a ton. We in the Slocan would not consider a showing of less than double that worth working.

The St. Keverne is to be re-organized with head office here. J. A. Finch is to take a $20,000 bond covering eighteen month, and a working capital of $30,000 is to be provided during the bond. The matter is to be arranged at a general meeting on the 14th. Mr. S. Norman, it is said, will have charge.

The Miller group near the Wonderful is showing up so well that many think it possesses the lead from which the Wonderful float ore has drifted. A few weeks ago they struck a three foot body of clean ore by running in a 100 foot tunnel, and are now engaged in stoping and sacking the ore for shipment. It is the intention of the manager, Mr. Davis, to drive in another tunnel lower down than the present workings.

THE LEAD QUESTION.

We are not sure that it is always best to join Ephraim to his idols. Protection is a principle of the Conservative party; and, from the nature of things, no matter what party may be in power, Canada cannot do without it; but this does not imply indiscriminately high duties. When in 1878-9 the late Sir John Macdonald inaugurated this principle of protection, it was specifically stated that it was to be modified from time to time, as the requirements of the country called for it. That was an enunciation of a sound doctrine, but his successors in office appear to be kings who know not Joseph—with them it is the high duties still, regardless of the needs of the country.

Our provinces are very varied as regards their needs and resources, and at short intervals any trade policy that may be adopted, to work satisfactorily must be modified to meet the changing needs of this combination of apparently conflicting interests. The idea is to look at the country from time to time, from shore to shore, and make the changes to meet the growing needs, as best they can be made, by doing the least possible injury to the least possible few and the greatest possible good to the greatest possible number.

The lead industry of Canada, for instance, was a matter of no account when the national policy was formulated; and the tarif makers did not, as a consequence, give it much consideration. Now, however, it has grown to be an industry of considerable magnitude, and in the future, with proper treatment, it will constitute one of our largest exporters.

At the Conservative convention at Vancouver last week, a resolution was put by Mr. W. A. Macdonald, of Nelson, and Mr. Bogle, of Rossland, favoring a duty on pig lead. This, as an alternative measure is good as far as it goes, but no farther. Canada today consumes but a small percentage of the lead produced in this province, and under a proper tariff to encourage production, it would consume a much smaller percentage of it. We have then to seek an outside market, and the United States for many reasons should be our best customer. They do not produce enough for home demands, and will always be a large buyer.

A duty on pig lead would to some extent encourage home smelting, but smelting is an industry of inconsiderable value to the country compared with mining. A duty on pig lead, too, would encourage the manufacture of leaden merchandise for home consumption; but as we have already intimated even this is a matter of inconsiderable moment compared with the production of ore.

As an addition to the resolution of these gentlemen, Mr. Cliffe suggested an appeal for reciprocal trade in ores, to meet the earnest requirements of this district. Because this did not imply protection, the two gentlemen referred to above as the parents of the protective resolution, opposed the alternative. There are some men, who, in their party zeal, prefer being called "a h-ll of a Conservative" rather than friends of the country.

We repeat that if the mine and prospect owners of the silver-lead properties of this country were consulted 99 per cent. of them would say that free access to American market, with their ores, is what this country needs. Some 2,500 men are now employed in the industry, and if suitable trade relations could be got the number would be easily trebled. To get free entry from the States we would have to concede something; but, as a full consideration of the matter would cost but little, it ought, at least, to be fairly attempted.

LET US HAVE FAIR PLAY.

The Vancouver Province is, we are confident, stretching its conscience, which appears to be easily done, to make out that ex-Premier Turner's is decidedly the darker side in the controversy between himself and the McInnes'; and principally because Mr. Turner, in replying to the lieut.-governor's letter of dismissal, said negotiations were then pending with young McInnes. It asserts that the lieut.-governor could not have been anxious for his son to enter the Turner government, if he dismissed it while negotiations were pending. Whatever Mr. Turner may be as a business man and a statesman, he is not a schooled politician, and his correspondence, to clear away mists, must be considered in this light.

There are, however, some circumstances so far removed from surmises—actual facts—that prove the contrary. In the first place, if young McInnes was not anxious to enter provincial politics—if, in short, he was not building on something to meet his egotism and ambition in them, why did he before the elections issue an address to the electors? Why did he for some time before the elections give every one to understand that he was withdrawing from the Federal and entering the Local House? If this is not enough proof, then why is it young McInnes, private secretary to his father, in his explanation of the conversation between himself and Mr. Turner, while using a lot of verbiage never denied that he suggested to Mr. Turner the entry of his brother into Turner's cabinet as a means of settling the difficulty? Again if these reasons are not sufficient for conviction, why is it His Honor selected Mr. Beaven to form a government, a man without a seat in the House or a following anywhere, who, in his first breath after being called on, named young McInnes, a man out of the House also, as his attorney-general? The accumulated evidence shows conclusively that young Mr. McInnes wanted to get into the Provincial Cabinet, no matter who got him there, and the trend of circumstances shows that "Barkis," his father, "was willin."

Neither may it be worth an effort on the part of any one to attempt to convince the Province, that Mr. Turner is a man of veracity and public probity; but there is one thing certain the country would readily conclude that he was a man of both, if it had as long a trial of some others the Province is booming for leadership, in comparison. There are many who will acknowledge that Mr. Turner in his time did not make the best selection of colleagues; but no one after his length of service attempts to trace public plunder to his door, and, as politics go in Canada, this is one mark of distinction that must be to Mr. Turner's lasting credit.

Mr. R. F. Green, M.L.A., of Kaslo, has said over and over again that he was uncompromisingly opposed to the introduction of federal party lines in provincial politics, and yet we find him taking a prominent part in a convention at which it is decided to take the very course that he has opposed in the past, and acting as one of the officers of the association. That Mr. Green has done this conscientiously, no one who knows him will doubt. He believes he is doing what is right. But it is difficult to get at his reasons unless he wishes to be regarded as a party man, pure and simple, and means to let the colors he has sailed under all these years go by the board when the next elections come on.

The Vancouver Province is unjust in the foregoing. Mr. Green never denied he was a Conservative, and never intends to deny it. He has said he was opposed to Federal lines in the provincial House, and he says so still. He attended the convention and took an active part in it, as he is charged with doing; but not as the Province alleges to introduce Federal lines, but to advance the interests of his party in other respects. He opposed the introduction of Federal lines in provincial matters; but because the measure was carried against his wish is no reason he should abandon his party, and every sensible man will say so. If the Province does not like the move, it is more responsible for it itself than a little. All along it has been booming Mr. Joseph Martin for premier, when it should have known that he was no more entitled to it than any other member elected for the first time—no more than Mr. Green himself.

Opposed to the Friars.

A despatch received from London, Eng., states that the Philipine Islands committee in Europe has addressed a letter to President McKinley regarding the appeals made to him by high Roman Catholic ecclesiastics in America to protect the religious orders in the islands. The expulsion of the friars, the committee contends, is a necessary antecedent to moral reform. The committee urges president McKinley to "aid the Philipines to suppress immorality and the diabolical institutions fostered by these monks." The letter concludes as follows: "Your name can never be associated with that of the friars and the sense of right of the noble nation at whose head your are placed will never permit the ever-victorious and humanitarian stars and stripes to protect them."

The country woman is usually healthy and robust. If she isn't it is generally because of her own ignorance or neglect. She is a hard working woman, but her surroundings are healthy, and unless she has some local weakness, she "bears her heavy burden" without serious inconvenience.

The trouble with too many country women is that they do not sufficiently realize the supreme importance of keeping healthy in a womanly way. A woman's general health cannot be good if she suffers from local weakness and disease. If she suffers in this way, the strongest woman will soon break down and become a weak, sickly, nervous, complaining invalid. Dr. Pierce's Favorite Prescription cures all weakness and disease of the organs distinctly feminine. It acts directly on these organs, making them strong, healthy and vigorous. It cures all weakness, disorders and displacements of the delicate internal organs. It is the greatest of all nerve tonics. It banishes the discomforts of the period of solicitude, and makes baby's advent easy and almost painless. It positively insures the little new-comer's health and an ample supply of nourishment. Thousands of women have testified to its wonderful merits, and many of them have cheerfully permitted their experiences, names, addresses and photographs to be printed in Doctor Pierce's Common Sense Medical Adviser. The "Favorite Prescription" is sold by all good medicine stores, and a paper-covered "Medical Adviser" of 1008 pages is mailed free on receipt of 31 one-cent stamps to cover cost of customs and mailing. Cloth-bound 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

Mrs. Frank Caufield, of East Dickinson, Franklin Co., N. Y., writes: "I deem it my duty to express my deep, heart-felt gratitude to you for having been the means of restoring me to health. My troubles were of the womb—inflammatory and bearing-down sensations."

Don't suffer from constipation. Keep the body clean inside as well as outside. Dr. Pierce's Pleasant Pellets cure constipation and biliousness. They never gripe. All good dealers have them.

Suffocated in a Mine.

A courier reached Grand Forks on Wednesday last from the Ironsides mine and announced that two more miners, named McCormick and Twist, were suffocated in the main shaft on that property that morning.

McCormick was dead when found, while Twist is still living and may recover. These two men had taken the places of Robert Roberts and his partner, who were recently suffocated in the same shaft. These two cases of suffocation are almost identical, as in both cases the men entered the shaft too soon after the shot was fired.

When it was found that McCormick and Twist had been suffocated in the identical shaft in which Robert Roberts had died a panic started at the mine, and it is claimed that it will be many a day before another miner can be persuaded to enter the dismal shaft again.

DR. LOW'S WORM SYRUP is death to the worms every time, safe for the child, and so nice to take that the children lick the spoon. Price 25c.

The germs of consumption are everywhere.

There is no way but to fight them.

If there is a history of weak lungs in the family, this fight must be constant and vigorous.

You must strike the disease, or it will strike you.

At the very first sign of failing health take Scott's Emulsion of Cod-liver Oil with Hypophosphites.

It gives the body power to resist the germs of consumption.

50c. and $1.00, all druggists.
SCOTT & BOWNE, Chemists, Toronto.

Disordered Kidneys.

Perhaps they're the source of your ill health and you don't know it.

Here's how you can tell:—

If you have Back Ache or Lame Back.

If you have Puffiness under the Eyes or Swelling of the Feet.

If your Urine contains Sediment of any kind or is High Colored and Scanty.

If you have Coated Tongue and Nasty Taste in the Mouth.

If you have Dizzy Spells, Headaches, Bad Dreams,—Feel Dull, Drowsy, Weak and Nervous. Then you have Kidney Complaint.

The sooner you start taking

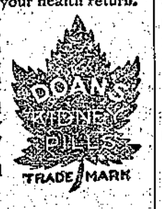
DOAN'S KIDNEY PILLS

the more quickly will your health return.

They've cured thousands of cases of kidney trouble during the past year. If you are a sufferer they can cure you.

Book that tells all about Doan's Kidney Pills sent free to any address.

The Doan Kidney Pill Co., Toronto, Ont.



TO CONSUMPTIVES.

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease, CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,

REV. EDWARD A. WILSON,
1 yr. Brooklyn, New York.

BABY'S DREAM.

In Sleep Came the Conditions He Yearned For When Awake.

Would that I had the pen of a Dickens or a Thackeray to picture for you the following incident of child life, which to me is so humorous and at the same time so full of pathos that I hardly know whether to laugh or cry over it, writes a correspondent of the Dallas News:

There was a dear little fellow of my acquaintance who was the pet of the family—consisting of father, mother and a precious maiden aunt. Baby's mamma had been an invalid from his earliest recollection, and he had learned to go to his aunt for many of his childish wants and to love her as fondly as he did his own mother. Indeed, though to her other nephews and nieces she was "auntie," to Master Baby she was always "Mamma Bell."

Should you have asked him, as his friends often did, "Who is Mamma Bell?" he would have answered you in a surprised tone and with a puzzled look on his face, "She's my nuzzer mamma of tourse."

Before the little fellow was 3 years of age the happy family was broken up. First the mother died, and in a few short months the father was laid beside her. "Mamma Bell" went to live with other relatives in a distant state, and baby was taken into an uncle's family, where he became at once the special charge of another maiden aunt.

The little fellow seemed to understand, in a childish way, of course, what death meant. He often spoke of his parents, asking for the songs "papa user sing" or the stories "mamma user tell," and while his voice sometimes quivered with emotion as he talked still he never cried for them.

But his separation from "Mamma Bell" was different. This she could not, would not, understand. She was not dead—she had not lain silent and cold, indifferent alike to his caresses or his commands. No, indeed! She had clung to him, as he to her, with kisses and tears to the very last. Sometimes at the mention of her name he would begin to cry, and he often mourned disconsolately because she came not to him. Of course he soon learned to love his new aunt very dearly, but he still seemed to think that in some vague way she stood between him and past happiness.

One night as she was putting him to bed, to stop the childish chatter, she said: "Now, baby, go to sleep quick. Dream a pretty dream and tell auntie all about it when you wake." When morning came, he was awake bright and early.

"Auntie! Auntie!" he called. "I did jeam a pretty jeam, a pretty, pretty jeam!"

"And what was it?" auntie said as she bent over him to kiss his rosy lips.

His soft little hands patted her cheeks caressingly, and his big brown eyes looked straight into her own as he said, "I jeamed you was dead, like mamma and papa is, and I was living wit my Mamma Bell again."

His Only Complaint.

Mr. Meekton was vainly endeavoring to get a composition which looked like a mixture of tar and molasses off his hands when he turned to interrupt his wife's remarks.

"Henrietta," he said, "you have just been to another meeting, haven't you?"

"Certainly," she answered, throwing her gloves on the center table.

"I suppose you made a speech?"

"Naturally."

"You said that man is an oppressive tyrant, didn't you?"

"Yes."

"You observed that it was time to break the shackles with which the husband sought to trammel the freedom of a wife and to show him that his mastery was, after all, but a relic of barbarism which enlightened humanity has outgrown."

"You overheard me rehearsing my speech," she exclaimed.

"Never mind. And then you referred to the way in which a husband ought to pose as a domineering dictator and an irresponsible autocrat?"

"Yes, I did. And I may as well inquire, once for all, if you have any objection to offer to those remarks."

"None whatever, Henrietta," replied Mr. Meekton as he took some earth out of a flowerpot and tried to rub some of the coating off his hands. "Only I must say it seems a little hard that after enjoying the luxury of thus relieving your mind you should come back and criticise the way in which I cleaned your bicycle while you were gone."—Washington Star.

Parents' Titles.

"I was brought up," said a fond father, "to say father and mother. I never dreamed of saying papa and mamma when I was a child, and I should have made awkward work of it if I had tried. My children until lately have always said papa and mamma. I don't know how they got started that way, but at the outset and for a long time they never thought of saying anything else. Then the older ones took to saying father and mother. They liked these titles better, and they thought they were better form, too, and they taught the younger children also to say father and mother, and now they all say father and mother.

"The older children soon accustomed themselves to the change. The younger children were a little by over it at first, but they soon got pretty well used to it, and now we rarely hear in my house papa and mamma. It is father and mother.

"And I must say I like it better. And I don't think it is because that is the way I was brought up, though these titles certainly do have to me an old and familiar and affectionate sound that is very pleasant, but I think I like father and mother better, anyway."—New York Sun.

Irish Wit.

As Sir Walter Scott was riding with a friend near Abbotsford he came to a field gate, which an Irish beggar, who happened to be near, opened for him. Sir Walter was desirous of rewarding him by the present of sixpence, but found he had not so small a coin in his purse. "Here, my good fellow," said he, "here is a shilling for you, but, mind, you owe me sixpence." "God bless your honor," exclaimed the Irishman; "may your honor live till I pay you."—San Francisco Argonaut.

The One Thing Needful.

She—What do you think of those songs without words?

He—With a little alteration they could be made divine.

She—How could they?

He—By omitting the music also.—Chicago News.

The Mystery Cleared.

"Well, sir," said the chief of police to one of his shrewdest detectives, "has any one succeeded in deciphering that mysterious paper you found on that suspect?"

"Yes. It was a doctor's prescription."—Detroit Free Press.

DOAN'S KIDNEY PILLS are the most effective remedy known for weak, painful backs; Dropsy, Diabetes, Bright's Disease, sediment in the urine and all kidney and bladder troubles.

AN AWFUL COLD.

Mrs. Wm. Darkes, Pine Grove, Ont., says: "I recommend Dr. Wood's Norway Pine Syrup for Coughs, Colds, Hoarseness and Sore Throat. I had an awful cold and could hardly speak. One bottle of Norway Pine Syrup cured me completely."

THE DECAY OF STONE.

Even the Most Densely Compacted Siliceous Rocks Succumb to Time.

Whoever expects to find a stone that will stand from century to century, deriding alike the frigid rains and scorching solar rays, without need of reparation will indeed search for "the philosopher's stone." There is scarcely a substance which, after having been exposed to the action of the atmosphere for a considerable time, does not exhibit proofs of "weathering." It may even be observed on the most densely compacted siliceous rocks. The fullest extent of this inquiry can only be to elucidate relative duration and comparative labor of appropriation to useful or ornamental purposes.

By examining the various productions of nature we find evident proofs of her industry in all ages. Changes have been going on from the remotest antiquity to the present time on every substance that comes within our observation. All the actual combinations of matter have had a former existence in some other state. Nothing exists in nature but what is likely to change its condition and manner of being. No material is so durable as always to retain its present appearance, for the most solid and compact bodies have not such a degree of impenetrability and so close a union of the parts which compose them as to be exempted from ultimate dissolution.

Even in the great globe which we inhabit nothing is more evident to geologists than a perpetual series of alterations. There can be discovered no vestige of a beginning, no prospect of an end. In some bodies these changes are not so frequent and remarkable as in others, though equally certain at a more distant period. The venerable remains of Egyptian splendor, many of them executed in the hardest granite between 3,000 and 4,000 years since, exhibit large portions of exfoliation and gradual decay, thereby following the primitive, immutable and universal order of causes and effects—namely, that all objects possess the materials of which they are composed only for a limited time, during which some powerful agent effects their decomposition and sets the elementary particles at liberty again to form other equally perfect combinations. Thus by divine and unerring laws order is restored amidst apparent confusion.—Architect.

A GLINT OF COLOR.

And the Only One Seen on a Trip by Rail Through a Winter Fog.

It was a damp day. The earth was saturated with water from the melting snows, and the air was thick with fog arising from it. Outside of the cities, with their paved streets, the roads were wet and muddy, the trees dripped moisture, the men wore rubber boots, the horses rubber blankets. There was dampness everywhere, and everything was made of a dull and uniform color by the enshrouding fog.

The train tore along through this universal dampness on time, itself dripping, and its passengers looking out upon the gray landscape through the film covered windows. Seen close at hand, some things were resolved out of the general gray into colors of their own, the railroad stations and the things seen about them. But these things were all blacks and slates and grays, and when a few stations had been seen it was realized that they were all alike in their way, all pitched in a low brown tone, all, like the succeeding miles of country, overcome by the general dampness.

And so a glint of color that at one spot appeared was all the more striking. It was seen at one of the stations at which the train stopped. The building and everything about it, the men and the baggage and the platform and the road beyond were dull and somber, but through all this came a Chinaman wearing a black sleeved coat of brilliant purple.

He came down a platform past the end of the station toward the platform at the front, with his hands in his pockets and the sides of his purple bodied coat caught up over them. Walking slowly, himself as much apart from all his surroundings as his coat was different in hue, like a slow moving meteor in a cloudy sky, the one touch of color seen in all the trip.—New York Sun.

James Parton's Prediction.

In 1863 James Parton, the celebrated biographical writer, made the following prediction in regard to Abraham Lincoln:

History will say of Mr. Lincoln that no man of a more genial temperament, a more kindly nature, ever tenanted the White House; that he gave all his time, his thoughts, his energies, to the discharge of duties of unprecedented magnitude and urgency; that, hating no man, he steadfastly endeavored to win the confidence and love of all the loyal and patriotic, and that in spite of four checkered years of such responsibility and anxiety as has seldom fallen to the lot of man he bore away from the capitol the sunny temper and blithe frankness of his boyhood, returning to mingle with his old neighbors as one with them in heart and in manner, in retirement as in power a happy specimen of the men whom liberty and democracy train in the log cabin and by the rudest hearth to guide the counsels of the republic and influence the destinies of the people.

Appearance and Merit.

Girard, the famous French painter, when very young, was the bearer of a letter of introduction to Lanjuinais, then of the council of Napoleon. The young painter was shabbily attired, and his reception was extremely cold, but Lanjuinais discovered in him such striking proofs of talent, good sense and amiability that, on Girard's rising to take leave, he rose, too, and accompanied his visitor to the ante chamber. The change was so striking that Girard could not avoid an expression of surprise. "My young friend," said Lanjuinais, anticipating the inquiry, "we receive an unknown person according to his dress—we take leave of him according to his merit."

The Secrets Told In Delirium.

Every one fears that if he should become delirious he would give away his secrets and trot out every skeleton in his private closet. Calm yourself. People who are delirious tell nothing they know. An Atchison man who was recently so near death that he heard Moses sing raved constantly about his head being a Missouri Pacific freighthouse.—Atchison Globe.

Naturally.

"Scribbler's plots are all so improbable."

"Yes; he belongs to the realistic school, you know."—Philadelphia North American.

A correspondent of The Westminster Gazette calls attention to the curious juxtaposition of two finger posts attached to a public house near Bridgend. One reads "To the Asylum," the other "To the Cemetery."

NEWS FROM THE MIMES.

The Cariboo Mine Has Been Reorganized.

The Cariboo Mining, Milling and Smelting company recently held their annual meeting at the company's office at Spokane.

The financial report for the year ending July 1, 1898, which was presented by John Monaghan, the president of the company, contained figures which must have been very satisfactory to the shareholders. During the past year 6770 tons of ore were crushed by the mill which yielded $121,270 in bullion and $17,948 64 in concentrates. A cash balance in hand of $28,500 was also reported. A dividend of two per cent amounting to $16,000 was then declared, which brings up the grand total of the dividends of the fiscal year to $64,000.

A resolution was then unanimously adopted that the proposition of the Cariboo Consolidated Mining & Milling Co. of B. C. to purchase the properties of the company was accepted. Each shareholder will receive an equal number of shares in the new company in exchange for his holdings in the old one. A formal meeting will be held at Camp McKinney on September 37 for the purpose of authorizing the sale in compliance with the laws of this province.

IN THE SLOCAN.

The extensive excavations necessary for the Whitewater mill, says the Kootenaian, has held back construction to some extent, but the buildings are now nearly ready for the machinery and October 1 will probably see the plant, which is designed to be one of the very best in the country, in full operation. Extensive development has been going on in the mine all the summer and simultaneously with the starting of the mill, heavy ore shipments will probably begin.

NOBLE FIVE.

Two new tunnels have been started on the Maud E. and World's Fair of the Noble Five group. The new work is on the main lead, which this year has been uncovered a distance of about 200 feet, on the west side of the mountain. It is warranted by excellent showings. When the crosscut from No. 4, in which the Burleigh is being operated, cuts the lead, a depth of 800 feet will be obtained. A second machine will be ready for a crew before the end of this week.

THE ST. KEVERNE.

The history of the St. Keverne mine has, from a financial point of view, been a rather chequered one. A scheme of reorganization has however been practically adopted which will ensure the proper development of the property. The arrangement briefly is that Mr. John A. Finch, of Spokane, will take a bond on the property for $20,000 for 18 months, and will operate the property continuously free of expense to the company. Mr. Finch will also offer each stockholder an interest in the bond proportionate to his holdings in the company's stock, the assignee agreeing to pay such assessment for working purposes as Mr. Finch may require. Such assessments will not exceed half a cent a share per quarter. It is computed that this will provide a capital of $30,000 during the life of the bond, and as Mr. Finch is ready to take the place of any stockholder that falls out, the success of the plan is considered practically assured. Mr. Sydney Norman will have charge of the property with headquarters at Sandon, Mr. George Aylard of New Denver acting as consulting engineer.

MORE INEFFICIENCY.

Sick Soldiers Sent From Santiago Without Proper Supplies.

When the transport Yucatan reached the New York pier last week and began discharging the six companies of the Seventh United States infantry, which she had brought from Santiago, it was learned that seven men had died during the passage and three more died last light while the ship was in the bay awaiting her turn to unload her human cargo. The Yucatan had 2,400 sick men on board. It is alleged the ship left Santiago without a sufficient quanity of proper food or supplies for the sick, and she reached here without any food but army rations, which the sick troopers were unable to eat. When General Wheeler learned of this state of affairs he sent on board the proper supplies. The sick men are still on board the vessel awaiting until there is room for them in the hospital.

A YOUNG GIRL'S ESCAPE.

Saved from being a Nervous Wreck BY MILBURN'S HEART AND NERVE PILLS.

For the benefit of Canadian mothers, who have daughters who are weak, pale, run down or nervous, Mrs. Belanger, 128 Rideau Street, Ottawa, Ontario, made the following statement, so that no one need suffer through ignorance of the right remedy to use: "My daughter suffered very much from heart troubles at times. Often she was so bad that she could not speak, but had to sit and gasp for breath. She was so extremely nervous that her limbs would fairly shake and tremble. Frequently she would have to leave school; and finally she grew so weak that we were much alarmed about her health. I gave her many remedies, but they did not seem to do her any good.

Then I heard of Milburn's Heart and Nerve Pills, and got a box of them, and they have indeed worked wonders with her. I can recommend them very highly as the best remedy I ever heard of for complaints similar to those from which my daughter suffered."

Milburn's Heart and Nerve Pills never fail to do good. They cure palpitation, faintness, dizziness, smothering sensation, weakness, nervousness, sleeplessness, anæmia, female troubles and general debility. Sold by all druggists at 50c. a box or three boxes for $1.25. T. Milburn & Co., Toronto, Ontario.

LAXA-LIVER PILLS act on the system in an easy and natural manner, removing all poisons and impurities. They cure Constipation, Sick Headache, Biliousness, Dyspepsia, Sour Stomach, Jaundice and Liver Complaint. Price 25c.

Rosebery Townsite.

The many advantages enjoyed by Rosebery put before the public, CLAIMED WITHOUT OPPOSITION.

Its Advantages as a Distributing Center.

Rosebery is the only town in Kootenay having both railroad and steamboat connection that can ship goods daily to ten different towns, whereby the shipper can see his wares leave his hands and that they will be received by the consignee within two hours.

Its Advantages as a Railroad Center.

Rosebery enjoys the position of king of the tunnell as it were, for the railroad business of the whole of the Kootenays. All ore and matter for shipment from Nelson, Trail Creek and the Slocan must, and is now passing out this way to the main line of the C. P. R., as well as all goods coming in from Revelstoke to the Kootenay country.

NOTE. To substantiate this: The C. P. R. are now putting in track weigh scales at Rosebery, the first and only scales that has been put in on any of the C. P. R. branches in Kootenay—which goes to show the importance of this point by the Canadian Pacific Railway Company's actions.

Its Advantages as a Steamboat Point.

Rosebery claims, without opposition, of being the only junction on the lake, unlike Slocan City, where you can step off the steamer to a waiting train and continue your journey. You can take either a north or south train at this terminus; consequently Rosebery is the best transient town in the race. Nervertheless we claim Slocan City second in importance, and would say watch the head and foot of Slocan Lake, viz.—

ROSEBERY AND SLOCAN CITY.

Its Advantages as a Manufacturing Center.

As a manufacturing center Rosebery claims to have demonstrated the fact that after the careful observation of the Denver (Colorado) Ore Coy's manager, as the natural advantages of all points in Kootenay for the treatment of ores the cheapest, Rosebery was selected, and they now are erecting works, with a capacity of 250 tons per day, which will be in operation within 90 days; and it is their intention to pay out monthly in the vicinity of $100,000. I might also add Rosebery has the largest water power from Wilson river flowing into Slocan Lake.

AS TO CLIMATE.

Rosebery claims the mildest climate on Slocan Lake, from its admirable southern exposure and absolute shelter from the north; snow always leaves the place about the 15th of March.

AS A TOWNSITE.

As a townsite, Rosebery is without a peer. It is possessed of all the flat land available at the mouth of the Wilson river leading to the valley—mining region—consequently there is no danger of any contagion. The title is a Crown Grant and is perfect. All purchasers of lots are safe in this respect. The only safe speculative townsite in the Slocan is Rosebery.

Why should I say the only safe speculative townsite in the Slocan? Because Rosebery business lots to-day are only $150 to $200 each and are bound to increase rapidly this summer. These figures can, and will, double before long. The time to buy is now. Don't wait till they are from $700 to $1,000, as you did in Slocan City last May, go in on the ground floor and make a few dollars in speculation; if you want to invest go to Vancouver or Winnipeg; if you want to speculate and and clean up money go quick to Rosebery before lots are out of sight.

What's Wanted in Rosebery.

We want a restaurant.
We want a good hotel right away.
We want a first-class general store.
We want a butcher shop.

Anyone looking for an opening spy out this place at once.

Maps and price-lists on application; prices run from $75 to $200.

TERMS: One-third cash, balance 3 and 6 months. For actual builders special terms can be arranged for a few lots by applying to

A. M. BEATTIE, General Agent, Rosebery.

MOUNTAIN ECHOES.

Rossland has 360 children going to school.

As everybody says times are improving, it must be so.

Trains are now running to Cranbrook on the Crow's Nest road.

The new C. P. R. depot is closed in, and will soon be ready for occupancy.

Messrs. W. I. Williams and Gus. Bassett have closed their two west end groceries.

Arthur Brown, of London, Eng., is now in Kootenay buying zinc ores for a London firm.

Some New York and Boston capitalists are now looking over the Slocan for investments.

Mr. Cummington has purchased the Bryan hotel here from Mr. Black and has taken full possession.

It is estimated that there are over 1,000 men now working in the mines within five miles of Sandon.

We should not be surprised to hear of challenges with big forfeits arising out of the sports here on Labor Day.

The C. P. R. is to-day transferring a large crusher for the Whitewater mine from their cars to those of the K. & S.

The Labor Day committee will find themselves with money over, which they will doubtless give to the brass band.

The Balmoral hotel is being overhauled, re-arranged, re-fitted, papered and painted anew, and put in first class order.

J. W. McDonald & Co., Whitewater, have bought out J. J. Ullman's store at Whitewater, and Mr. Ullman has returned to Kaslo.

Hunter Bros., the Reco hotel and other places are having steam heating attachments put in from a front main, to be supplied from the furnace in the rink.

Mr. Dudley Blackwood received a telegram from a friend in Revelstoke advising him not to miss the Cosgrove Family concert, as their show is simply out of sight.

Karl's Clover Root Tea, for constipation it's the best, and if after using it you don't say so, return the package and get your money. Sold at McQueen's Drug Store.

Theodore Schmezline, a German tailor, was before the Beak, Wednesday, charged with threatening to shoot his wife. She would not prosecute and the matter dropped.

Catarrh cured. A clear head and sweet breath secured with Shiloh's Catarrh Remedy. We sell six bottles for $3 and guarantee an absolute cure. Sold at McQueen's Drug Store.

Squire Lovatt has some more woodstealing cases. It would be cheaper for the Squire to charter a Beak by the year; and cheaper for neighbors wanting old logs from him to ask for them.

Shiloh's Consumption Cure cures where others fail. It is the leading Cough Cure, and no home should be without it. Pleasant to take and goes right to the spot. Sold at McQueen's Drug Store.

We received an order yesterday for The REVIEW from an Hon. gentleman in Prince Edward Island. As we aim at giving reliable information the paper is asked for in remote as well as near districts.

Miss Jean Terry, graduate of the New England College of Oratory and a pupil of the Boston School of Acting, has arranged to give a recital in the Virginia hall on the 27th inst. She will be assisted by local talent.

The Rev. G. W. Gordon, of Winnipeg, who was to have preached here in the Virginia hall, Thursday evening, did not put in an appearance. However, as he was advertised for a lecture in Nelson the same evening he could not fill both engagements.

"Red" McLeod, a man with a lengthy gaol record, was arrested the other day by officer Mountain and is now in the hands of the law. He broke gaol three or four times on both sides of the line. Theft, however, is the worst offence charged against him.

The Sheriff is selling another Rossland property "The Old Flag." The next will be the "Old Policy." Seriously speaking, Rossland has been over boomed. Man never yet heard of a sale of a property around Sandon by the Sheriff. All on which any considerable sum of money has been spent have turned out payers.

The Kootenaian concludes that the Editor of The MINING REVIEW does not know everything, a fact we readily concede; but it is not necessary we should when we are so close to editors who do know everything and more too. In our simplicity, and in fear and trembling, we may, however, say that we opine the Anglo-Saxon alliance proposed means simply a union for the protection of both powers and to better assert the united efforts of both nations for the welfare of the world. It does not, however, mean, as the Kootenaian would have the public believe, that both countries contemplate for themselves the same destiny.

A crowded house greeted the Cosgrove Family on their appearance in Cameron's hall on Tuesday night. The Company comprises some very clever artistes, well advanced in the musical and dramatic art, and are bound to receive a warm reception wherever they may appear. Harry Fay, although suffering from a heavy cold, was just as good as ever, and received a hearty encore to each of his numbers. That Miss Ada Cosgrove is very popular with a Vernon audience, was evidenced by the hearty reception she received. Miss Evelyn Mackie, elocutionist, is well to the front of her profession. The other members of the Company all take their parts well.—Vernon News.

HEALTH RUN DOWN.

"I was run down in health and weak and could not get anything to do me good until I tried Burdock Blood Bitters which has made me strong and well."

THOS. LAWSON, Terra Nova, Ont.

The railway war is now over.

The placers at Rover creek, near Nelson are much exaggerated.

The K. and S. trains now leave Kaslo at 8.30 a. m. and Sandon returning at 1.15 p. m.

The Denver brass band and three Highland pipers added much to Monday's enjoyments.

W. H. Reynolds and Miss Nellie Alexander, both of this city, were married in Spokane the other day.

Sandon's Gusty will soon have a world wide reputation as an all around athlete. Alle samee he's a good un.

For Constipation take Karl's Clover Root Tea, the great Blood Purifier. Cures Headache, Nervousness, Eruptions on the skin, and makes the head clear as a bell. Sold at McQueen's Drug Store.

The Kootenaian says Kaslo thanks Sandon for its courteous hospitality on Labor Day. That's the way to talk. In contests some one is bound to win, though often the best men lose. Sports are only worth having when they are carried through in an agreeable spirit.

Miss Stella Lilly entertained her young lady friends to her eighth anniversary at the residence of her parents on Reco Ave. The following invited guests were present: Bessie and Marjorie Dofenbacker, Edith Hawke, Rena and Jean Crawford, Alvira McMartin, Violet Jones, Pauline and Bessie Lane, Myrtle Nicholls, Mable Fogg, Katie Day, Myrtle and Mable Karr, Ruby McArthur, Minnie Fallows, Ada aad Winfred McDougall, Mary and Effie McIntrye of Kaslo. Miss Emily Jones and Miss Skinner assisted in entertaining the little tots. Each little guest bringing a present. All enjoyed themselves exceedingly.

ALL NERVES.

Many people say they are "all nerves," easily startled or upset, easily worried and irritated, Milburn's Heart and Nerve Pills are just the remedy such people require. They restore perfect harmony of the nerve centres and give new nerve force to shattered nervous systems.

PERSONAL MENTION.

Miss Crawford is now clerking in the post office.

Mrs. Dovall is visiting her daughter, Mrs. Dwyer.

Ald. Mighton returned the other day from Nelson, and is now at his old post again.

Mrs. W. I. Williams left for Spokane on Monday, where she will remain for some time.

Mrs. J. Grant came in on Monday from Nelson to visit her friends here, returning this morning.

R. F. Green, M.P.P., and Mrs. Green and family spent some days in the city this week visiting friends.

Rev. A. E. Green, pastor of Mount Pleasant church, Vancouver, was in the city Thursday, on a trip through the Kootenay.

Mrs. C. M. Wilson with her parents, Mr. and Mrs. Frame, went to Spokane on Monday to spend the winter, owing to Mrs. Frame's ill-health.

Mr. McCune, who is principal owner in the Payne, with his family returned to Salt Lake City, after spending a week here with other members of the company.

Byron N. White, principal owner of the Star, who spent some days here looking over the property, returned home well pleased with the prospects of the mine.

Messrs. Wm. Whyte, R. Marpole, Beasley and two or three other officials of the C. P. R. were in the city Wednesday on a trip of inspection, accompanying them was Col. McMillan, treasurer of the Manitoba government, and Mesdames McMillan and Whyte.

WHAT Dr. A. E. SALTER SAYS.

Buffalo, N. Y.—Gents:—From my personal knowledge, gained in observing the effect of your Shiloh's Cure in cases of advanced consumption, I am prepared to say it is the most reliable remedy that has ever been brought to my attentention. It has certainly saved many from consumption. Sold at McQueen's Drug Store.

AT THE HOTELS.

Empy, Whitewater; J. A. McLean, D. J. Coyle, Wm. Whyte and wife, D. H. McMillan and wife, R. Taylor, Winnipeg; T. A. R. Mountain, Miss Campbell, Miss Deitritch, H. E. Beasley, W. C. Anderson, T. G. Proctor, Nelson; W. A. Springer, Boston; G. H. Guie and wife, Mrs. J. Morton, Seattle; R. Twigg, F. J. Finnicune, G. Crawford, members of band, New Denver; R. J. Hamilton, H. L. Johnson, J. S. Lawrence, Nakusp; L. J. Delaney, Detroit; J. H. Truman, Victoria; W. Skene, R. Marpole, L. R. Johnstone, J. P. Geddes, F. P. Wilson, Vancouver; M. A. Bucke, R. F. Green and family, J. Fletcher, S. W. Peterson, W. E. Hodder, W. S. Drewry, Fire Brigade, Kaslo; W. Yates, H. Irwin and wife, J. Leslie, T. Conlon, Toronto; G. H. Manchester, Montreal; A. E. Jackson, Edmonton.

FOR OVER FIFTY YEARS.

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night and broken of your rest by a sick child, suffering and crying with pain of cutting teeth. Send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures diarrhœa, regulates the stomach and bowels, cures Wind Colic, softens the gums and reduces Inflammation, and gives tone and energy to the system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

BOVRIL, Limited.

Food Specialists, Hospital Purveyors and Army and Navy Contractors.

LONDON, ENGLAND, AND MONTREAL.

Travellers

Should always carry with them a bottle of Dr. Fowler's Extract of Wild Strawberry.

The change of food and water to which those who travel are subject, often produces an attack of Diarrhœa, which is as unpleasant and discomforting as it may be dangerous. A bottle of Dr. Fowler's Extract of Wild Strawberry in your grip is a guarantee of safety. On the first indication of Cramps, Colic, Diarrhœa or Dysentery, a few doses will promptly check further advance of these diseases.

It is an old, reliable remedy, with over forty years' of cures to its credit, whose merit is recognized everywhere and one that the doctors recommend in preference to all others.

Sold by medicine dealers everywhere at 35c. a bottle. Always insist on the genuine, as many of the imitations are highly dangerous.

ALWAYS KEEP ON HAND

Pain-Killer

THERE IS NO KIND OF PAIN OR ACHE, INTERNAL OR EXTERNAL, THAT PAIN-KILLER WILL NOT RELIEVE.

LOOK OUT FOR IMITATIONS AND SUBSTITUTES. THE GENUINE BOTTLE BEARS THE NAME,

PERRY DAVIS & SON.

SCROFULA.

"My little boy, aged 7 years and 15 months, was a victim of Scrofula on the face, which all the doctors said was incurable. To tell the truth he was so bad that I could not bear to look at him. At last I tried a bottle of Burdock Blood Bitters, and before it was half used he was gaining, and by the time he had three bottles used he was completely cured. I cannot say too much in recommendation of B.B.B. to all who suffer as he did." JOSEPH P. LABELLE, Manwake P.O., Que.

There can be no question about it. Burdock Blood Bitters has no equal for the cure of Sores and Ulcers of the most chronic and malignant nature. Through its powerful blood purifying properties, it gets at the source of disease and completely eradicates it from the system.

BURDOCK BLOOD BITTERS.

A GOOD INVESTMENT::

W. McCabe, Esq., Managing Director
North American Life Assurance Co., Toronto, Ont.

Dear Sir:

Of the three options at my disposal in regard to my matured 15-year investment policy for $2,500, viz:

1st, Cash.....$3,793 88
2nd, Paid-up Insurance..... 9,295.00
3rd, Life Annuity..... 259 50

I have decided to take the first, and hand you my discharge in exchange for your check. In terminating the contract, which has given me reliable Life Insurance for fifteen years for $2,500, and in addition returns me all my payments with compound interest added, at a rate within a very small fraction of 5 per cent. I can only remark that my expectations have been more than realized, and that the whole transaction from beginning to end has been of the most satisfactory character. Yours truly,

R. A. PYNE, Ontario College of Physicians and Surgeons, Toronto.

For rates and full particulars apply to
S. G. FAULKNER, Provincial Manager, Vancouver.

For Impotency, Lame Back, Night Losses, Drains, Varicocele and all effects of Youthful Errors...

There is but one sure cure—

ELECTRICITY

properly applied. Why not be up with the times? In ten years electricity will be the treatment supreme. With my world-famed ELECTRIC BELT and Supporting Suspensory I cured last year 5,000 weak men—young and old. Book, "Three Classes of Men," explaining all, sent sealed free upon request, or drop in and consult me free of charge. Address

DR. R. SANDEN, 156 St. James Street, Montreal, Que.

AGENTS.—"The best Life of Her Majesty, I have seen," writes Lord Lorne about "Queen Victoria." Agents make five dollars daily. Outfit free. BRADLEY-GARRISON CO., Limited, Toronto.

Kootenay Tailors.

I do not write for money;
I am no idle railer;
But I write to tell the story
Of the famous Kootenay Tailor.

We're making clothes for the very best—
A nice Tweed Suit or a fancy Vest;
We have clothing for every taste.
Give us a call; your time we don't waste.

Do Not Forget Our Motto—
A FIT WE GUARANTEE.

Just come and have a trial,
And then my friend you'll see,
We make clothes to fit all shapes
At prices to suit the brave and free.

J. R. & D. CAMERON,
KOOTENAY'S TAILORS.
