HEADQUARTERS FOR COMMERCIAL AND MININGMEN.

MOYIE CITY, — — — BRITISH COLUMBIA.

BE HERE AUGUST FIRST

Steel Will Be Laid to Moyie Then.

PILE DRIVING HAS COMMENCED

Seven Hundred Men Will Be Put to Work on the Western Division Before Very Long.

Construction work on the Crow's Nest road is beginning to assume a new phase, and during the next few months work will be pushed with greater vigor than ever before. It is said that 700 white men will be added to the forces already working on this division, which will have the effect of making times considerable better in the different towns along the line.

R. Balfour, who has the contract of building all the bridges and trestles between Kuskonook and a point a short distance above the tunnel, was here the latter part of the week. He is making arrangements to start trestle work immediately at this end of his contract, and already has 300 men working on the long bridge near Kuskonook on the west end. At that point he has a steam pile driver at work, and two pile drivers run by horse power will soon be operating between here and that place.

Mr. Balfour is confident the steel will be laid to Moyie City by the first of August and to Kuskonook about 20 days later.

Cowan & O'Neil are making splendid progress with the big tunnel, and expect to have daylight through tomorrow or next day. McBeth and Peters are also nearly through, while Haskins' men are grading through town and have only a few weeks' work to do.

Haney on Railway Matters.

M. J. Haney, chief of construction of the Crow's Nest railway, did not come as far west as Moyie City last week on his trip over the road, having turned back at Cranbrook. He was accompanied by Mrs. Haney and Theodore Knowlton, superintendent of construction from Elk river east. In an interview published in the Wardner International, he said:

"I am confident that steel will be laid to the Kootenay river early in July. Everything is in excellent shape, and now it is only a question of tracklaying. The trestles necessary at the loop will be completed this week, and all grading contracts to the Elk river will be completed in 30 days. From there to Wardner the work is light. We have an extra battalion of 200 men and teams to put on at any place that it will be necessary to force the work, so that there is little chance of experiencing any serious delays. The work of driving piling for the Elk river bridge will commence this week, and the piles for the Kootenay river bridge will be driven only a short time before the steel reaches here. We are anxious to avoid this work on rising water."

"Under ordinarily favorably circumstances, Mr. Haney, how fast will you lay steel?"

"Three miles a day. We hught to average that, and will try and do a little better. That rate would give us 90 miles a month, but we want to lay 100."

Under the rate of progress that Mr. Haney speaks of, the steel will be laid into Moyie City by the first of August.

Boat Race Pulled Off.

The boat race between W. H. Murphy and Conrad Comitois, which for some time has been the chief topic for discussion among the sports of Moyie City, was pulled off last Thursday evening at 7:30 o'clock, and was won by the latter named gentleman.

The course outlined was from McMahon Bros.' landing straight across the lake, around the little island near the opposite shore and back to the starting point again. The contest was an exciting one, there being scarcely any difference in the speed of the contestants, and Comitois' victory was not a walkover by any means, he being only a few feet ahead of Murphy. The time made was nine minutes and a few seconds.

MOYIE CITY, - - - BRITISH COLUMBIA.

Baillie Got the Plum.

At the convention held in Fort Steele Thursday evening for the purpose of choosing a candidate to oppose Col. Baker at the coming election, Wm. Baillie, editor of the Prospector, received the nomination. The ballot gave Baillie 66 and W. R. Ross 51 votes; a majority of 15 for the former.

The committee on the Baillie side proposed that no one should be allowed to vote in the convention unless he signed a pledge to support the candidate selected in opposition to the present provincial government. The Ross members were opposed to this as being subversive of the liberty of the voter and the secrecy of the ballot. Many protested against this, and refused to vote, amongst them being the delegation from Moyie City. They demanded the right to vote as free and independent electors of South East Kootenay, considering themselves in no way bound to the action of a committee in the selection of which they had taken no part. More than 20 voters present refused to sign the pledge and were consequently denied the right to vote. While the balloting was in progres R. H. Oliver, speaking for the Moyie delegation, demanded the right to vote without signing the pledge. It was, of course, refused, and Mr. Oliver, with his friends, Messrs. Tierney and Kauffman, declined on principle to vote and retired from the convention.

Invasion of Cuba Begins.

WASHINGTON, May 30.—The invasion of Cuba has begun. Twenty-five ships have been gathered to carry the 300,000 soldiers from the gulf ports to Cuba. General Miles will proceed directly to Tampa, where he will establish temporary headquarters and personally direct the movements of troops and the invasion of Cuba.

KEY WEST, May 30.—Any doubt regarding the exact location of Cevera's fleet was relieved by dispatches forwarded to Washington. The Spanish squadron is anchored at Santiago de Cuba. The problem remains for the commanders of the American fleet to dispose of the enmiy either by corking the bottle or forcing a long, narrow passage and smashing the squadron at anchorage.

JAMAICA, May 28.—The Harvard has arrived, bearing important dispatches to Washington. Twelve United States war ships are outside of San Diego; it is almost certain that Commodore Schley has the Spanish fleet bottled up, and that the only danger is from mines.

WASHINGTON, May 27.—The Hawaiian annexation resolution has been added to war measures in the senate and will go through.

WASHINGTON, May 28.—The president has issued a proclamation calling for 75,000 more volunteers, making 285,000 soldiers in all.

R. M. Niebet, editor of the Kuskonook Searchlight, was arrested and incarcerated last week by Constable Forrester of that place. The trouble grew out of an attack made upon Forrester by the Searchlight.

Cranston's Yacht Launched.

W. S. Cranston's pleasure yacht was launched at the wharf last Thursday afternoon. It would have been launched some time ago had the sails which Mr. Cranston sent east for not been delayed on the road.

It was not long after the boat was lowered into the water until the canvas was raised and the little craft was shooting across the lake on a trial trip with seven men on board. The wind was squally and at times the lake was quite rough, but the yacht proudly rode the waves and proved itself equal to the heavy sea.

The yacht is 16 feet in length and six and one-half feet in width, and will comfortably seat ten persons. It was built by Mr. Cranston during the odd times while not engaged on the road, and he spared no pains or expense in making it a model of perfection.

Hodge's Proposition.

C. G. Hodge, superintendent of the telephone company that has the line between Fort Steele and Swansea has made the people of Moyie City a proposition that is if they will guarantee him $30 per month for one year he will immediately extend the line to this place. This is the most liberal offer yet made by that company, and seems to be agreeable to most of the business men. A definite decision should be arrived at and submitted to Mr. Hodge at as early a date as possible.

The Anaconda.

C. F. Diamond and A. M. Hogg returned Thursday from the Anaconda claim, three miles east of Sifton, upon which they were doing assessment work. They have driven a fifteen foot tunnel and had five feet of a ledge in the face where they quit work. The ore carries copper, gold and galena in large quantities. It is owned by S. A. Scott, C. F. Diamond and A. M. Hogg.

LOCAL BRIEFS.

Al. Bailes of Fort Steele was here the fore part of the week.

For fresh wheat and rye bread call on Mrs. Neiderstadt.

Geo. Watson of Fort Steele was in the city a few days this week.

Lindsay Crawson of Sifton was in town a few hours last Wednesday.

Inspector Saunders, of the mounted police, was through here this week.

Sam Hammond was up from the Logging camp a few days this week.

John Day left for Spokane last Wednesday by way of Bonners Ferry.

E. H. Small of the Moyie hotel went to Fort Steele Thursday to attend the convention.

A large lot of supplies were taken up to the St. Eugene mine the fore part of the week.

C. J. Johnson returned last Tuesday from Spokane, where he has been for the past week.

J. E. Ridgers, of the nowthwest mounted police, went to Fort Steele the fore part of the week.

Paymaster Stephen was through here last Tuesday on his regular trip distributing "dough."

W. J. Tierney and Ben Murphy attended the convention held in Fort Steeele last Thursday evening.

J. Peck McSwain, one of the best known typographical tourists on the road, blew through here last Monday on his way to Nelson.

Alfred Manuel of the Lake Shore hotel departed Tuesday for Nelson but met C. J. Clayton, his partner, on the road and returned home.

Miss Hackett, Miss Turner and Mr. Chisholm of Swansea came down on the Echo last Thursday morning, returning in the evening.

J. P. Farrell and Wm. Hamilton are building a good substantial boat which will soon be added to the already large fleet on Moyie lake.

Ira Finch succeeded in killing two black bears near Finch Bros.' sawmill on the upper lake this week, but as yet he has not come to town to "tell how it happened."

The Acetylene gas machine has been placed in the East Kootenay hotel. The machine produces a very brilliant light, and the cost of keeping it operation is quite small.

J. I. Booge, with two men, has been at work this week prospecting his mining properties on the west shore of the lake proparatory to commencing development work on them.

FOR SALE—Barber shop complete, 18x20 feet in size, with bath room in connection. Doing a first class business. For further particulars apply to J. E. Musgrave, Moyie City, B. C.

Colonel Henderson and his two nephews have arrived from Fort Steele and taken up their residence on the Sanburn estate on the west shore of the lake.

Joseph Shae this week sold his interest in the Moyie saloon to Messrs. Campbell and Clark, the proprietors of the hotel. Mr. Shae intends to remain in Moyie City.

The sale of government land in this place which was advertised to take city in Fort Steele today, has been postponed until Saturday, June 18th. The land has been sub-divided into town lots, which will be sold singly or as desired by purchasers.

McMahon Bros. now have one of the most complete general stores in East Kootenay. Their stock is large and well assorted, and their prices are reasonable. With such a house in Moyie City there is absolutely no need of sending out of town for goods.

W. G. Bateman and Dan Chisholm are making arrangements to bring a bunch of milch cows from Kootenai county, Idaho, to their ranch about five miles south of here on the Moyie river. They intend to conduct a general dairying business.

E. A. Elton was here in the interest of W. R. Ross this week, and it is understood that Wm. Baillie had men in the field. Their representation from here to their convention, however, was very light.

MOYIE HAS BACKING

If any person doubts the backing which Moyie City has in the way of mineral resources, let him take a trip up to the St. Eugene mine, which can be easily done in three-quarters of an hour, and feast his eyes on the huge piles of ore of which there are between two and three thousand tons, and then carefully examine the different tunnels, shafts and surface strippings to be seen on the various claims comprising the group. Besides the ore taken out there are thousands of tons blocked out and ready to be taken out for shipment. Men with wide experience in mining and who have inspected some of the most noted mining propositions in the world do not hesitate in saying it is one of the largest bodies of ore they have ever seen.

Having thoroughly inspected the St. Eugene, he can return by a short cut straight down the hill towards this place. By so doing he can trace the ledge clear to the foot of the hill, upon which are also located the Moyie, Queen of the Hills and Lake Shore. Each of the last named properties, though not developed to such an extent as the St. Eugene, have plenty of ore on the dumps and plenty more in sight.

Never did one see a mineral belt which showed so small an amount of "dead work," for wherever a hole has been dug a pile of ore nearly equal its size can be seen on the outside.

The mining properties on the west shore of the lake are also worthy of inspection, and parties who are skeptical as to the resources of Moyie City should not overlook them.

The LEADER predicts that in less than two years' time there will be no less than fifteen or twenty mines surrounding Moyie City which will be shipping ore, and that it will be the greatest mining camp in Canada.

NOW ON THE RIGHT SIDE

The Kaslo Kootenaian, formerly one of the staunchest opposition papers in the province, has changed its faith and is now supporting the Turner government. In changing its policy, it says:

"We simply believe that taking all things into account, and canvassing all the public men who are, or may be before the electors during the next few months, the present Premier is the best fitted by personal character and past experience to direct the destinies of the province for the next four years. He is a man of strong personality, who, by a long and successful business career, has won a place among the first of our citizens. In knowledge of parliamentary practice and provincial affairs he is second to no man now in public life, while of his deep interest in all that concerns British Columbia no one can entertain a doubt. His long public service and blameless private life alike entitle him to a continuance of the confidence of the people. That he has been fiercely assailed by his opponents is not surprising, and is the inevitable experience of a strong man placed in such a position as he has occupied. But even his most bitter detractors have been constrained to admit the charm of his personality and the pureness of his private life. Hon. Mr. Turner's interest in agriculture is well-known; and he has ever shown the utmost regard for the welfare of this district in particular, as his attitude towards any proposal for the bettering of its conditions abundantly testifies."

From other sections come the same strain indicating the most unmistakable manner that a change is coming over those of the people who were disposed to be hostile to the government heretofore.

The offer made by C. E. Hodge for the extension of the telephone line from Swansea to this place seems quite reasonable and will undoubtedly meet with the approval of the citizens of Moyie City. The amount of business which will be done over the line is bound to exceed the $30 asked as a guarantee to the company, and should it not come up to that mark for the first few months the deficiency to be made up would be but a mere bagatelle, and would scarcely be felt by the people. The services of a telephone would be of incalcuable benefit to Moyie City, and its business men should not hesitate about meeting that company on reasonable grounds.

Should a Spanish fleet ever attempt to enter the Moyie City harbor it might prove very disastrous for it on account of the number of "mines" which are in close proximity.

Sampson slew the Spaniards, but not with the proverbial jaw bone of an ass, as was the case in ancient times when he got his work in on the Philistines.

To the Provincial postoffice inspector we say: Give us a better mail service or give us death.

War at Kaslo.

A special to the LEADER from Pocahontasville says:

The battleships Kootenaian and News, under command of Admiral King and Senor El Paso DeRakin, are having a hot engagement on the high journalistic sea off the coast of Kaslo, and grave fears are entertained that they will blow up the city with editorial bombast. Rubberneck Tinhorn Lowery, commander of the Ledge, a small caliber torpedo thrower, is expected on the scene mostly any minute with a shooting stick, a hypo gun and fourteen hot Scotches on board. When he arrives he will immediately change his socks. He will then bombard the Comique and capture all the schooners in sight and perhaps a few of the schooner destroyers, such as the Kitty Goodwin and the Ida Storms, which are frequently seen cruising around that harbor during the night.

Sea Bathing.

"How are you coming on with sea bathing?" asked a gentleman of an invalid.

"Splendid; I bathe three times a day."

"How do you like it?"

"The doctor says I must take a toddy after each bath to restore the circulation—that's how I like it."
