AND BOUNDARY MINING JOURNAL.

EIGHTH YEAR. PHOENIX, BRITISH COLUMBIA, SATURDAY, APRIL 27, 1907. No. 23

Spring Suits

Our Spring Suits have arrived and await your inspection.

Besides Campbell's, we have stocked a complete line of the celebrated "FITREFORM" clothing. These suits are cut in the latest style and sell themselves.

New Hats

What about your new hat? We have them in all styles, and at any price.

Soft Shirts

We are introducing this spring an entire new line of nobby American Soft Shirts—they are right up to-date, you should have a couple.

Men's Shoes

As usual we lead in the display of Men's Shoes, Fancy Vests and all other lines of Gent's Furnishings.

The Hunter-Kendrick Co. Ltd.
THE BIG STORE

WALL PAPER

We make no ideal boast, when we say that we have the finest selection of WALL PAPER ever shown in Phoenix, and at prices to suit every one, ranging from 25c. to $1.00 for a double roll, comprising all the best shades in Ingrains, Light and Dark with the new Scenic Borders in Landscape effects to go with them. We have them in Silk and Brocade effects, in Panel effects, Flowered effects, and the effect they will have on your Parlor, Sitting Room, Bed Room or Dining Room will be marvelous, and for the finishing touches to the wood work, we have

VARNISH STAINS

in Oak, Golden Oak, Antique Oak, Dark Oak, Rosewood, Cherry, Walnut and Mahogany.

In art enamels we have White, Sky Blue, Pink, Red, Green, and Black and a full line of Floor Paints, and House Paints in all the best shades.

Morrin Thompson & Co.
GROCERS AND HARDWARE MERCHANTS

SETTLING COAL MINERS' STRIKE

Fernie Men Vote to Return to Work--Other Unions Voting.

Seems Probable That Peace Will Soon be Declared in Crow's Nest Collieries.

Much to the relief of thousands who are interested all through British Columbia and other provinces dependent on the Crow's Nest for coal supplies, it now appears as if the differences between the operators and miners were in a fair way for a settlement. The following telegram was received here yesterday from D. J. Matheson, mayor of Phoenix, who was sent as representative of the Phoenix board of trade to Fernie this week:

Fernie, B.C., April 26th, 1907.
A. S. Hood, Sec.,
Board of Trade, Phoenix, B.C.

Local union voted to go to work. Other unions will take vote on question. Will probably require two days. Fully expected that all men will be at work on Monday.

D. J. MATHESON.

Last Tuesday the board of conciliation, under the Industrial Disputes' Investigation Act, met at Fernie, for the purpose of inquiring into the strike, and seeing if it was not possible to find a common ground for agreement between the operators and coal miners. The commission consisted of L. P. Eckstein, on behalf of the miners of the Crow, John L. Parker for the operators, and they not agreeing on a third, the Dominion government appointed Sir William Mulock, ex-postmaster-general, as the third member of the conciliation board.

The board organized on Tuesday, and held closed meetings that night and Wednesday, the present representatives not being admitted to the proceedings. Officers of the miners' unions and operators' association were present, and the discussion of the matter was taken up. Wednesday afternoon the following telegram was received by Mr. Hood from Mayor Matheson:

Fernie, B C., April 25, 1907.
A. S. Hood, Sec.,
Board of Trade, Phoenix, B.C.

Miners and operators failed to agree. Mass meeting this afternoon, to get men to work pending result of the investigation.

D. J. MATHESON.

While as yet particulars are not at hand regarding what was done at the several meetings, it is apparent that the strong pressure brought to bear by government officials and others have had some effect, and that the coal miners have about decided to resume operations pending a settlement, which is now in progress.

At Boundary Mines

According to report the diamond drill at the Elkhorn mine is making from 20 to 25 feet daily.

Annual meetings of the Boundary-Elkhorn Mining Co. will be held May 1st at Greenwood, and of the Gold Bug Mining Co. on May 13th, in the same city.

Diamond drill explorations are being conducted at the Snowshoe mine. Knight & Stone, of Spokane, have the contract.

For the time being work has been discontinued at the B. C. mine, Summit camp, but will be taken up again later on.

Two diamond drills have been in operation in the Brooklyn mine lately, one by Boyles Brothers, and the other by the company itself.

If the Granby can secure some of the coke still at Fernie, it may be able to operate the smelter a while longer than has been expected.

The contract for 200 feet of tunneling on the Crown Silver, one of the Sunset group in Deadwood camp, has been completed by Alex. Robinson.

Granby's mammoth ore crusher, making the fifth of this type thus far ordered, which will be used at the Gold Drop mine, will not be installed for several months.

The new seven drill, electric-drive air compressor for the Dominion Copper Co.'s Sunset mine, Deadwood camp, was shipped from Sherbrooke, Quebec, on the 8th of April.

Ore shipments have been discontinued from the Riverside, west of Midway, by P. J. Dermody and associates, as the water in Kettle river is too high for ferrying the ore across to the wagon road.

According to official statements, last year Granby's copper recovery was 24 pounds per ton of ore. It is understood that this year it is running somewhat better, from 25 to 27 pounds of copper per ton.

B. C. Copper has been running two furnaces this week and doing good work. This was accomplished by letting the C. P. R. have a bunch of cars of coal which the company had at the time of the strike last week.

From the shipments of ore made from the Strathmore mine in the last two months, returns of from $180 to $200 per ton are expected to be received. The ore is that encountered in development, no stoping yet having been done.

The electric motor and hoist have arrived and been taken to the Crescent fraction, being operated by the Chicago British Columbia Mining Co., with Theo. Mueller as manager. In a few days the new machinery will be in operation, greatly facilitating the development of the mine.

By furnishing the C. P. R. with something like 20 or 30 cars of coal which it had on hand, the Snowshoe has been able to keep its ore moving down to the B. C. Copper Co.'s smelter this week, making an excellent record for shipments, notwithstanding the acute fuel situation.

Showing the effect of the car and fuel shortage and the severe weather conditions this last winter, during the first quarter of 1906 the refined copper output from the ore of Boundary mines is given at approximately 7,500,000 pounds, while for the same period in 1907 it was one-third less, or about 5,000,000 pounds.

As announced in the Pioneer last week, the Dominion Copper Co.'s Boundary falls smelting plant was blown out on Sunday, directly caused by the strike of the coal miners in the Crow's Nest Pass country, the company being able to get neither ore nor coke hauled. While idle, Manager Thomas will put the plant in thorough repair.

Electric power for the Moreen, in Deadwood camp, will be furnished by the Greenwood City Waterworks Company, and the work of erecting poles and stringing wires will be commenced next week. H. H. Shallenberger, manager of the mine, is in the city this week making arrangements for power and the commencement of development work.—Ledge.

This week the Granby smelter has been operating five and six furnaces, as the supply of coke or ore came in. The Great Northern has been doing all the ore hauling for the Granby this week, and there is no telling when its coal supply will run out. The Granby's coke supply is likely to be exhausted by tonight or tomorrow, when the entire plant must be blown out. As the new work in hand is now complete, it will let out some 300 or 350 men till the coal strike is settled.

Thomas Green, B.A., M.A., B.D.

Many residents of Phoenix will remember Rev. Thomas Green, the young man who was at one time the energetic Methodist minister in Phoenix, and through whose energy and efforts largely, the present church building was erected. Mr. Green has been pursuing his theological studies since leaving Phoenix, and last year won a scholarship at Columbia university, in New York. Information now comes that "Tommy" has been awarded the university fellowship in philosophy at Columbia university for the coming academical year of 1907-8, valued at $950, and paying tuition and expenses for a year at the university, being the highest honor that the university can pay a student for character and ability. He can now write his name Thomas Green, B.A., M.A., B.D., and his many friends here will rejoice to hear of his steady progress.

R. C. Morgan, superintendent of the Spokane Falls and Northern system, and W. R. Smith, the assistant superintendent was here yesterday.

C. S. Moss, of the C. P. R. engineering staff, was here this week, with Contractor P. W. Tierney, who is constructing the extensions to the Raw hide mine spur.

Charles E. Legg, who was conductor on the Phoenix Great Northern Passenger run for months, was a visitor here once more Thursday, bringing in the vice-president's special train.

TOOK OVER NEW PLANT

Dominion Copper Has New Compressor

Now Furnishing Air to Idaho, Brooklyn and Rawhide.

This week A. W. Cleveland, erecting engineer for the Jenckes Machine Co. and the Canadian Rand Co., turned over the new machinery plant recently installed on the Idaho ground to the Dominion Copper Co. in this camp, and it was accepted by Manager W. C. Thomas on behalf of the Dominion Copper Co. When everything was in place and the last nut had been screwed on and the final bit of soldering done for the electric connections, the plant was started running, and has been operating as smoothly as could be desired. This compressor furnishes air for the Brooklyn, Idaho, Rawhide and Stemwinder mines of the company, and at present also operates two diamond drills and three pumps.

The compressor is of the Rand make, and came from Sherbrooke, Quebec. Owing to delays in manufacture, in delivery, etc., it is almost or quite a year since the order was placed. The compressor has a rated capacity of about 25 drills, and is driven by a 450 h p. Canadian Westinghouse electric motor. The current is taken from the South Kootenay Power Co.'s high tension hydro-electric lines, being brought from Bonnington Falls, on Kootenay river, some 75 miles distant. The machine is of the same type as those at the Granby mines, the latter having two 30 drill machines, operated tandem.

To furnish the Rawhide with compressed air, a six-inch pipe line was laid for more than a mile It was fortunate that the compressor was started just now, as no coal is available to operate the Brooklyn mine's steam plant, it keeping Foreman Sampson busy to secure wood so that the Brooklyn hoist can be operated when needed. The new compressor is being operated steadily night and day, three shifts, and is giving great satisfaction.

Odd Fellows Church Parade.

Tomorrow the members of Snowshoe Lodge No. 46, and of Phoenix Rebekah Lodge No. 17, I. O. O. F., will have a church parade and attend divine services in the evening at the Methodist church, where Rev. Whittaker will preach a sermon appropriate to the occasion—the 89th anniversary of the establishment of this great organization.

Snowshoe Lodge is now one of the largest orders of any of the fraternals in the Boundary, having been steadily growing till it has now upwards of 100 members, which will entitle the local lodge to two delegates at the next grand lodge meeting. Friday evening, being the exact date of the anniversary, Snowshoe and Rebekah lodges united in giving a dance at Miners' Union hall, the event being a pleasant one to all that were fortunate enough to be present.

The first Odd Fellows lodge on this continent was established at Baltimore, Maryland, on April 26, 1819, and was called Wildey lodge after one of its founders. The order now has something like 1,500,000 members.

Discovered a Tin Mine.

A short time ago Richard Marsh, of Spokane, discovered a tin mine within six miles of that city, located on the Spokane & Inland Empire railway. Mr. Marsh gave the rock all the necessary tests, and being satisfied that he had the real article, proceeded to acquire all the land needed for the property. He asserts that it can be readily concentrated at small expense, when the plant is installed, at the rate of ten to one, from which he can secure a 70 per cent product of tin. A company is to be formed and the mine worked energetically. If Mr. Marsh has tin in quantity, he has something as good or better than a gold, copper or coal mine, there being no tin mines in the United States, the pure metal being worth 40 cents per pound.

Associated with Mr. Marsh, are Charles Theis and C.P. Robbins, both well known Spokane men, who will be able to command whatever capital may be necessary. There are now seven men at work on the property, and the force will be increased May 1st.

Mr. Marsh was for years in the assay business in Rossland, and is the owner of the Marsh building in Phoenix. He moved to Spokane about a year ago, which he now makes his home.

Latest Prices in Metals.

NEW YORK—Copper, electrolytic, $23 - 75 @ $24.75; lake, $24 25 @ $25.25.
Bar Silver, 65¾
Lead, $6.00 to $6.10.

COMING AND GOING

Harry James made a business trip to Nelson this week.

R. V. Chisholm, proprietor of the Hotel Alexander, visited Rossland this week.

Manager J. E. McAllister and Frederic Keffer, of the B. C. Copper Co., were visitors in camp Wednesday from Greenwood.

Miss Thornber, who has been visiting her brother here for a time, went down to Grand Forks this week.

A. D. McKenzie and his father-in law, Mr. Clark, returned Tuesday from a trip to their ranch on Kruger mountain, where they set out more fruit trees.

Mayor D. J. Matheson took Sunday's G. N. train for Nelson, to represent Phoenix at the conference of the Associated Boards of Trade at Fernie this week.

Dr. J. F. Boyle, who with his wife visited J. B. Boyle, his brother, for a few days, left Monday for Edmonton, where the doctor will locate and practice his profession.

Charles Biesel, in charge of operations at the Snowshoe mine for the Consolidated Mining and Smelting Co. of Canada, spent two or three days in Rossland this week.

A. W. English, of the Phoenix office staff of the Dominion Copper Co., left last Saturday for Cobalt, Ont., where he will be with T. R. Drummond, formerly of the same company here.

George H. Williams, formerly superintendent of the Dominion Copper Co.'s smelter at Greenwood, after spending some months at Victoria, returned this week to the Boundary.

Rev. C. W. Whittaker, spent a day or two in Grand Forks this week, arranging for the quarterly district meeting of all the Boundary Methodist churches, which will take place in the Forks early next month.

Fred Allen, of Milwaukee, of the Pabst Brewing Co., was being shown the highest mining camp in British Columbia Thursday by James McCreath, of Greenwood, the Boundary agent for that famous product.

Robert H. Karatofsky, who has been a resident of Phoenix for seven years, and who recently sold his business here to Cosgrove & McAstocker, left Sunday for Seattle, his future home. It is understood that he will go into the real estate business in Seattle.

Mrs. T. R. Drummond, children and two maids, left Greenwood this week for Salt Lake City, Utah, en route to Cobalt, Ont., where Mr. Drummond preceded her a few weeks ago. Mrs. Drummond went by way of Spokane. Mr. Drummond has assumed his position as superintendent of the Nipissing Mining Co., and has some 250 men employed, expecting to have over 500 this summer.

NEW COMPANY FOR SUDBURY

Spokane Capital Taking a Hand.

Will Develop Promising Deadwood Camp Group.

A couple of weeks ago a resident of Spokane, James Schiewe, visited the Boundary, to have a look at the Fremont mine, in which he is a stockholder. He was pleased with the Fremont, which lies between the Providence and Strathmore, and while in Greenwood also looked at some other claims and prospects. It appears that Mr. Schiewe has been quite successful in his mining operations in the Coeur d'Alene country in Idaho, and was disposed to take up something here if it seemed sufficiently promising. This he found in the Sudbury group, in Deadwood camp, a copper proposition that has had considerable development work done on it, and he arranged to bond the group of three claims. The price of the bond was not made public, but it is known that the owners had previously refused $30,000.

Last week incorporation papers of the Sudbury Mining Co. were recorded in Spokane, the company having a capital of $250,000, for the purpose of taking over and exploiting the Sudbury group. The five trustees in charge of the company's business are James Schiewe, J. D. Whitels and A. S. Elder, of Spokane, and W. C. Reeder and William O. Lewis, of Ritzville, Wash. As soon as all details are completed, it is expected that an active programme of development will be outlined and undertaken by the new company, the officers of which have confidence that they have the making of a mine in the Sudbury group.

It will be noted that Spokane men are still picking up the good things in a mineral way in the Boundary.

Phoenix bottled bock beer can now be had at all hotels.

A meeting of the Boundary Medical Association was held in Phoenix last evening.

J. R. Dunlap, formerly in the office at the B.C. mine, has accepted a position in the Dominion Copper Co.'s office in Phoenix.

Danny Deane has had good luck with coal for the last few months. Just before the coal strike last winter he got in a car of coal, and this week another car arrived, putting him on easy street in this regard, while the average local coal consumer cannot buy coal for love or money.

Water or No Water.

Recently the Pioneer has printed two letters from residents of this city, calling attention to the lack of an adequate water supply in Phoenix, and bringing up the question of what is to be done about it, as this place is sure to grow every year, and will likely double its size in the next two or three years.

The question is an important one, and should be handled before the demand gets to a point where the lack of water is seriously felt. Thus far we have had some troubles in this regard, but nothing to what they will be in the future, if the matter is not taken up and dealt with in advance. For this reason it behooves every taxpayer to bear the matter in mind.

At present water is supplied from Marshall lake and springs adjoining the city by a private corporation, under franchise from the city, the same people also having the electric light franchise. The holders of the franchise only agreed to supply such water as could be obtained from the sources indicated. If Marshall lake should fail, through being drained by mining operations, or for any other reason, the matter would then come up suddenly for solution. Therefore it should be taken up now, as the contingency indicated is likely to ensue at almost any time.

Water must be brought here from some distance, from a lake or from Kettle river or a tributary of that stream. Either would mean an approximate expense of from $100,000 to $150,000, it has been estimated. How is this expense to be met? Who will do it, and how soon can it be accomplished? These are the queries that must suggest themselves to any one who has the interest of Phoenix at heart. We may not think much of the matter, now that water is comparatively plenty, but the time will surely come when it must be considered—and that time may arrive at any moment. Water is an absolute necessity, and we might as well take up the matter of an additional supply now as to wait till it is forced upon us. The Pioneer opens its columns to those most interested to give their views on the subject.

Chasing Down Wildcatters.

Uncle Samuel has of late been giving attention, through the postoffice department, to a number of schemers who have been using the mails to defraud, by advertising more or less worthless mining company stock for sale. Fraud orders were issued against promoting concerns in Colorado, Kansas and Nevada, and they are now being put out of business as rapidly as the slow machinery of American law will permit. Of course, nothing is said of the thousands of deluded so-called investors, who have been making these "permanent" investments. They can simply take their medicine and preserve their stock certificates as mementos of how not to do it.

But the American postoffice authorities should keep up the good work, as there is plenty for them to do in this line, unless all indications fail, for fake mining companies are abroad in the land on every hand, and even in British Columbia occasionally to pull their golden chestnuts out of the fire. For instance, there is the British-American Copper Mines and Smelter Co., of Cleveland, Ohio, of which we have spoken before. The latest dodge of this concern is to print a fac-simile letter from Claudet & Wynne, mining engineers of Rossland, to help to sell the stock. This firm asserts that their letter reporting on the wildcats was altered, changing the intent of it, and so being in itself a fraud.

This Cleveland outfit has undoubtedly taken in thousands of dollars at 25 cents per share, and the chance of any one getting anything out of it is not one in ten thousand—perhaps not one in a million. Their mineral prospects (even if worth anything) are in an inaccessible locality, are not even crowngranted, have no transportation and are hundreds of miles from a smelter. There is every chance in the world that it will turn out a swindle, pure and simple, and the clerks, widows, orphans, washerwomen, etc., who put their hard earned dollars into the scheme will be down and out. Uncle Sam should investigate those Cleveland chaps.

Between the Grindstones.

If anything were needed to impress upon the public that, ofttimes, one industry is absolutely dependent upon another, the present strike or walkout of the coal miners in the Crow's Nest Pass, should serve that purpose.

For instance, here are 2,000 miners and smeltermen in the Boundary district alone, with probably 10,000 others that are dependent on them for a living to a greater or less extent, who will be thrown out of work if the question is not settled and that without delay. In Alberta, Saskatchewan and Manitoba, thousands are also dependent on the collieries referred to for a supply of coal. Two great transcontinental railways are in the same predicament, and cannot do business without that coal—at least on the western divisions. It will simply mean stagnation, if not ruin, to a vast number.

Thus the difficulty between coal miners and coal operators is bearing very hardly on thousands who are in no way responsible for the trouble, whatever it may be, and can do little or nothing to prevent it. They are literally between the grindstones, and will be ground exceeding small if a settlement of some kind is not made shortly.

We believe, from what we can learn by reading many columns of matter on this subject, that there is reason for complaint on both sides. Those who should know, say that coal mine operators are the hardest employers in the world. Perhaps the miners themselves are in the same class. In any event, too great issues are at stake to permit either side to tie up the industries of an entire province or several provinces, possibly. There is a duty to the public aside from the quarrel between miners and employers. This matter will, of course, be settled, if it is not already in a fair way to that end. But it should be settled in a way that will not permit it to recur again for a long time—and we confess to an idea that if there was more confidence displayed on both sides of the controversy, it would help the adjustment not a little. In the long run, it pays to be white and honest, and some of those interested would do well to ponder this matter.

A Woman Tells How to Relieve Rheumatic Pains.

I have been a very great sufferer from the dreadful disease, rheumatism, for a number of years. I have tried many medicines but never got much relief from any of them until two years ago, when I bought a bottle of Chamberlain's Pain Balm. I found relief before I had used all of one bottle, but kept on applying it and soon felt like a different woman. Through my advice many of my friends have tried it and can tell you how wonderfully it has worked.—Mrs Sarah A. Cole, 140 S. New St., Dover, Del. Chamberlain's Pain Balm is a liniment. The relief from pain which it affords is alone worth many times its cost. It makes rest and sleep possible. For sale by all druggists.

A Clear Definition.

An Irishman wishing to take a homestead and not knowing just how to go about it, sought information from a friend. "Mike" he said, "you've taken a homestead an' I thought maybe ye could tell me th' law concernin how to go about it." "Well, Dennis, I don't remember the exact workin' uv the law, but th' meanin' uv it is this: Th' Government is willin' t' bet ye 160 acres uv land again $17.50 that ye can't live on it five years widout starvin' t' death."

Chamberlain's Salve is good for any disease of the skin. It allays the itching and burning sensation instantly For sale by all druggists.

MAN'S STRENGTH OF PURPOSE

He Shows It While He Is Buying for Himself.

When a man goes into a store he wants to get just what he asks for. According to his success can he judge his strength of purpose and his keenness. It is the little things that mark the man of big achievements.

According to the records of complaints received, there were nearly 9,000 men in 1906 who allowed themselves to be decived when they wanted a pair of real Slater shoes. They got imitations. The real Slater shoe has the sign of the slate stamped on the sole, and it can be had only in stores where the "Sign of the Slate" hangs in proud prominence.—Hunter-Kendrick Co., Ltd., Phoenix.

Beware of imitations and substitutes.

B. C. MINING

Coal deposits in the Nicola section are receiving increasing attention, and that district promises to be a large producer at no distant date.

A new record in Boundary-Kootenay ore shipments was made last week, being 43,000 tons. It will be much less this week.

The mining activity at Moresby Island, Queen Charlotte group, continues, and the prospects for the coming season are extremely good.

About 25 men are employed at the Stemwinder mine, in Fairview camp at present, and development is being rapidly pushed.

From May 1st the shovelers, carmen, ore sorters, and surface men employed at the mines of the Rossland camp are to receive $3 per day; instead of $2.75 as heretofore.

Everybody Agrees

that COD LIVER OIL and IRON are beyond question the greatest medicines known. Then why does not everybody take Cod Liver Oil and Iron? Simply because, most people cannot take the Oil and few can digest the Iron in any ordinary form. These difficulties have been entirely removed by the introduction of FERROL, in which the Iron is scientifically combined with the Oil, rendering the Oil palatable and the Iron digestible. While

FERROL

is manufactured from the best quality of Cod Liver Oil (the whole of the Oil) and is richer in oil than any other emulsion, and while it contains just the right quantity of the best form of Iron and Phosphorus, it is so scientifically prepared that not one person in a thousand finds any trouble in taking it, and infants digest it without difficulty. Moreover the well-established value of the Oil and Iron is immensely enhanced by the process of manufacture, and as the formula is freely exposed it is not to be wondered at that physicians everywhere have fully endorsed FERROL and used it largely in their practice. FERROL is invaluable for the treatment of any kind of Lung or Bronchial troubles, while for wasting diseases it has no equal, and

Printing That Counts

A creditable job of printing on the stationery you use, is like a good suit of clothes when one is doing business—first impressions count.

If you use a rubber stamp on your letter heads or envelopes, you will be put down as of the rubber stamp calibre. If you are a business man, and use no printed stationery, it is natural to suppose that your business is not of sufficient importance to require it, and your credit likewise.

If you wish Modern Stationery, gotten up by competent workmen, worked on the best of stock, imported or domestic—stationery that does not have the earmarks of the Cheap John printery, we can furnish it from the only print shop in the Boundary operated by electricity.

We know that business men of Phoenix have sent to Spokane, Chicago, Detroit, Hamilton, St. Louis, Omaha and other places, in the past, for printing that could have been done right here—and probably in better style. We'd charge a little more, of course, just as the merchant must charge more than Cheap John Tim, of Toronto—and its worth a little more. Besides, if you spend your dollars here for printing, you have a chance to get them back some day through the Pioneer and its employees. If you spend them in the East, you'll never see them again. We have print shop facilities that no other office in this section possesses. Come and see us.

THE OBSERVATORY

THINGS TALKED OF AT HOME AND ELSEWHERE

Some weeks ago a concern calling itself the Northwestern Supply House, of Winnipeg, sent the Pioneer an order for advertising, offering to sell goods to any one at greatly reduced prices. This paper, not believing in that kind of competition, declined to run the business. It did not look good in any way, and the sequel proves it. The concern, we are informed, is practically worthless, and does not pay accounts. Nevertheless, we notice a number of our exchanges are still printing the advertisement, being mostly papers that also print the ad of the "Big Four" Consolidated Gold Mines. One will be as profitable as the other to either publisher or patron.

•••

Two of the arbitrators named in the Crow's Nest coal miners' strike are well known in Phoenix and the Boundary. John L. Parker, who has a ranch at Lee Lake, Alberta, was superintendent of the Dominion Copper Co. during the James Breen regime, when the latter spent $125,000 in development of the company's copper mines in this camp, and afterwards had a difference with Mackenzie, Mann & Co., the chief owners. Mr. Parker was also known as the one who made an unsuccessful attempt to bring Chinese into Phoenix. After leaving here, he went to the North Star mine in East Kootenay, also owned by Mackenzie, Mann & Co., and later to the Brown Alaska Co. mines, at Hadley, Alaska. Latterly Mr. Parker has had an office as consulting engineer in Seattle.

•••

L. P. Eckstein was for years located at Grand Forks, where he practiced law till he moved to Fernie. He has represented the Fernie miners at several different times, and is now their nominee on the arbitration board.

•••

The Nelson Daily News has just entered on its sixth year of publication, and too much credit cannot be given F. J. Deane, the chief proprietor of that excellent publication, for his untiring energy and unflagging zeal in the past five years to give the people of the interior a daily of which they have no reason to feel ashamed. It is, we believe, a fact that not one practical newspaper man of experience out of a hundred would have tackled the job that Mr. Deane took up, and equally few could have made it a success. In its own behalf, the News says that it spends more money for wire service than any other daily in the province, and we believe it. This is done to supplement the wretched and high priced press service furnished by the C. P. R. As a newspaper, we believe that the News stands ahead of any other in the Dominion, published in a city of similar size.

•••

Business men of Phoenix have decided to reorganize the board of trade, the initial work being done last Saturday night at the Pioneer office, where a number had foregathered to arrange to send a delegate to Fernie. In the past the Phoenix board of trade has accomplished lasting good to this community, and there is no reason why it should not do so in the future. To be specific on a few points, the board of trade, in its early days, worked hard for a wagon road from Phoenix to Eholt, and it became an accomplished fact; the board never ceased working for the establishment of a sub-port of entry here, and eventually a customs office was established in Phoenix; at one time we received our mail via Greenwood while trains were running into Phoenix, and a telegram from the board of trade soon straightened matters out; then the C. P. R. would not run a passenger train into Phoenix for several months after ore trains were in operation—the board of trade did some more telegraphing, and presto, there was a change, and it came mighty quick; again, in postal matters, improvements came as a result of the efforts of the board of trade.

•••

These are a few things, among many, that the board has accomplished in the past. In the face of this, who will say that it has not been eminently useful; and, further, who will say that there is not yet work before it? How about a provincial policeman being located here? How about improved mail service with Greenwood and the Boundary creek valley in the summer time (when the C. P.R. leisurely takes two days to deliver a letter between towns that can be reached in one or two hours)? How about a better water supply for Phoenix—something we shall certainly be up against one of these fine days? And there are other things that will arise. So, we say to the business men—give the board of trade your hearty support; it's well worth while, even from the selfish individual standpoint.

•••

Through the courtesy of Duncan Ross, M.P., the Pioneer is in receipt of the full text of the Industrial Disputes Investigation Act, 1907, and regrets that lack of space prevents publication of the entire document. Any one interested, however, can see the pamphlet at this office.

•••

Ever since the Boundary came into anything like the present importance, the town of Midway, the oldest settlement in this section, has observed the 24th of May as a holiday, has made special preparations, and has always had a good big crowd there. A couple of weeks ago, the matter was taken up again, as usual, a goodly sum subscribed, and announcement made that, following the custom of nearly a decade, Midway would again celebrate the birthday of Victoria the Good.

•••

However, the celebration boosters have found a rift in the lute, for the very next week the business men of Greenwood got together, subscribed a large sum of money, and announced that they would give a celebration on May 24th that would eclipse anything yet put before the Boundary public in this regard. It need hardly be noted that Midway is anything but pleased at this, and there is not room for two celebrations in towns so close on the same date. Of course, this is a free country, and every cross-roads hamlet can celebrate if it so desires, and the people of Greenwood do so desire. But it certainly would have been in better taste if they had made the announcement and begun preparations before the Midway people took it up. Developments will be noted with interest, and meantime it is said that the Grand Forks fire department will have a little celebration all of its own. There will be ample opportunity, seemingly, to help do the celebrating act in the Boundary next month.

PE-RU-NA DR. HARTMAN'S FAMOUS PRESCRIPTION THE TALK OF THE CONTINENT.

READ AND BE CONVINCED.

Just A Few Of the Sincere Letters Written To Dr. Hartman By Honest People.

Owes Good Health to Pe-ru-na.

Miss L. Wall, 850 N. Dale street, St. Paul, Minn., writes:

"Last spring I had a very severe case of catarrh of the stomach and bowels. I was very much run down in strength and lost my appetite.

"I took three bottles of Peruna and found myself gaining very quickly in every way.

"I also had catarrh in my head, which has been entirely cured.

"I thank Peruna for the health I am enjoying."

The World's Greatest Medicine Factory.

The rapid growth of the Peruna Medicine Company is as phenomenal in the business world as the universal popularity of their famous remedy, Peruna.

The plant covers a number of acres, and employs several hundred people. No other medicine firm in the world reaches anything like the volume of business done by Dr. Hartman's firm.

Although Peruna is a proprietary medicine, the details of its compounding are in strict accordance with pharmaceutical discoveries and nothing gives Dr. Hartman greater pleasure than to show his intimate professional friends through the laboratory where Peruna is made.

A Doctor's Prescription.

Dr. Hartman used Peruna in his practice as a regular prescription and no thought of manufacturing it as a proprietary medicine. Finally there was a demand by his many patients for the original prescription.

Forty Thousand Patients.

Dr. Hartman estimates that he must have prescribed Peruna for over forty thousand patients before it was advertised as a proprietary medicine.

Relieved in Four Weeks of Severe Cold on Lungs.

Miss Josie Schaetzel, Gen. Del., Appleton, Wis., writes:

"I contracted a severe cold which settled on my lungs in very short order and it was not long until it developed into a serious case of catarrh. Every morning I would raise a lot of phlegm, which was very disagreeable. My digestion was poor and my lungs sore.

"After a few doses of Peruna I began to mend, and felt that if I kept on taking it, it would not be long until I would be well. I was right, for in four weeks I was well again.

"I think Peruna is a grand medicine, and wish to add my testimony to the many others you have."

Catarrh is almost universal. Catarrh is difficult to cure. Many doctors do not care to treat catarrh at all.

Followed Doctor Hartman's Advice — A Grateful Letter.

Mrs. Anthony Rauch, 438 Johnston street, Bucyrus, Ohio, writes:

"I was suffering from obstinate constipation and torpid liver when I took your advice and purchased six bottles of Peruna and Manalin.

"When I had taken only one bottle I felt much better and since I have taken two more bottles I feel entirely well, but I will continue taking the medicine for a short time to make sure of my cure.

"I think Manalin is one of the finest remedies for constipation that I ever tried. I will never be without it. It has made me so strong. I can do a day's work and never tire.

"I am so glad I do not get those dizzy spells any more. I hav't had one since I took your medicine.

"I cannot thank you enough for what your medicine has done for me. All sick people should give it a fair trial."

Pe-ru-na's Popularity.

Peruna is not like so many other remedies that pass away as soon as the first few bottles are used. The longer Peruna is used in any community, the more popular it becomes.

Keeps Pe-ru-na in the House.

Mrs. Jessie Smith, 408 Buttles Ave., Columbus, Ohio, writes:

"I have used your Peruna for catarrh of the head and stomach, and have been greatly relieved from it.

"Therefore, I cannot praise Peruna too much and can recommend it to any one having the above disease, as there is nothing better.

"I always keep it in the house."

Finds Relief in Pe-ru-na After Suffering Twenty Years.

Mrs. M. S. Davis, 1505 Buena Vista street, Nashville, Tenn., writes:

"After having been a constant sufferer from catarrh for more than twenty years and after trying almost every remedy advertised, and having lost all hope, I very reluctantly began the use of Peruna about two years ago.

"Everybody says I look younger now than I did twenty years ago, and I actually feel younger and better, and weigh more.

"I am recommending it to my neighbors and all with whom I come in contact."

Pe-ru-na Removes the Cause of Catarrh.

Peruna has no bad effects upon the system and gradually eliminates catarrh by removing the cause of catarrh. There are a multitude of homes where Peruna has been used off and on for twenty years.

Pe-ru-na Actually Relieves.

The reason why Peruna has become a standard catarrh remedy the world over is simply because it eliminates catarrh.

This explains why Peruna has become so popular. It relieves catarrh. This is an amply sufficient reason why it should become popular.

It therefore follows that when a remedy is devised that can be used in the home at a moderate cost, such a remedy should inevitably become popular.

There are a great many catarrh cures in the world. The most of them are local applications. Few of them are to be used internally.

Unfortunately, a large number of these catarrh remedies, especially the ones prescribed by the doctors, contain narcotics of some sort. Cocaine, opium, and other narcotics are used.

These remedies give temporary relief. The patient thinks he is better right away.

In a few weeks, however, he discovers his mistake. Not only is his catarrh no better, but he has acquired the habit of using some narcotic.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind.

Peruna is perfectly harmless, if taken according to directions on the bottle. So used, it can be taken any length of time without acquiring a drug habit.

Cured of Rheumatism.

Mr. Wm. Henry of Chattanooga, Tenn, had rheumatism in his left arm. "The strength seemed to have gone out of the muscles so that it was useless for work," he says. "I applied Chamberlain's Pain Balm and wrapped the arm in flannel all night, and to my relief I found that the pain gradually left me and the strength returned. In three weeks the rheumatism had disappeared and has not since returned." If troubled with rheumatism try a few applications of Pain Balm. You are certain to be pleased with the relief which it affords. For sale by all druggists.

PROVINCIAL.

The Port Essington Sun is the title of a new weekly soon to appear upon the northwest coast of the province.

Nelson's 20,000 club is raising $3,000 for the year's expenses, and will pay the secretary $100 per month.

Ald. Sam Green has been elected mayor of Kaslo by acclamation for the unexpired term of the late mayor, C. W. McAnn.

The provincial grand lodge of the Knights of Pythias will meet in convention at Nelson this year on May 8th, 9th and 10th.

W. A. Galliher, M. P. for Kootenay was married in Buffalo on Wednesday of last week. Mr. Galliher and his bride are taking a trip to England.

Representatives of several of the American magazines are touring the Northwest under the auspices of the Canada Immigration Association.

An English philanthropist has offered Mayor Keary of New Westminster $100,000 towards a B. C. University, provided the site is selected somewhere between New Westminster and Vancouver.

Suffered for Five Years with Kidney and Liver Trouble.

"I suffered for five years with kidney and liver trouble, which caused severe pains across the back and a blinding headache. I had dyspepsia and was so constipated that I could not move my bowels without a cathartic. I was cured by Chamberlain's Stomach and Liver Tablets, and have been well now for six months," says Mr. Arthur S. Strickland, of Chattanooga, Tenn. For sale by all druggists.

OUR COPPER CORNER

MATTERS OF INTEREST TO THOSE INTERESTED IN THE COPPER MINING INDUSTRY

Anaconda and Calumet and Hecla.

The Anaconda mine, at Butte, Montana, is the largest single producer of copper in the world, leading the Calumet and Hecla of Michigan. Anaconda is selling on the Boston market at $60 a share and Calumet and Hecla is selling at $860. At first sight one would be led to believe that the latter was much the more valuable stock of the two. It is true that it is a little higher priced, but not so very much when capitalization is considered. Calumet and Hecla has only 100,000 shares of capital stock, the par value of which is $25 per share, or $2,500,000 for the whole. Anaconda has one million two hundred thousand shares of capital stock, the par value of which is $25 per share, making its capitalization $30,000,000 as against only $2,500,000 for Calumet and Hecla, twelve times as much as the latter. Relatively, Anaconda is worth $720 a share compared with $860 for Calumet and Hecla.

In the matter of dividends Anaconda is well up with the big Michigan mine. For the year 1906 Calumet and Hecla paid $7,000,000 in dividends and Anaconda paid $6,900,000. If a 25-cent copper market prevails throughout the present year Anaconda will do better that that. It may be relied upon for not less than one hundred million pounds of copper, on which there would be an easy profit of about $16,000,000 of which not less than ten million would go to stockholders. An interesting fact in connection with the Anaconda is that it is the biggest—or believed to be—producer of silver of any mine in the world. The silver in its ore averages three ounces to the ton of rock, with from $1.75 to $2 in gold per ton. As the Anaconda puts out about one and a-half million tons of ore a year it is easy to see what a large revenue it derives from its silver and gold, outside of its immensely large copper profits.

THE COPPER HANDBOOK
(New Edition Issued November 15, 1906.)

Is a dozen books in one, covering the history, geography, geology, chemistry, mineralogy, metallurgy, terminology, uses, statistics and finances of copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the copper industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man. It gives the plain facts in plain English without fear or favor. It lists and describes 4626 copper mines and companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property. The COPPER HANDBOOK is conceded to be the

World's Standard Reference Book on Copper.

The mining man needs the book for the facts it gives him about mines, mining and metal. The investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundreds of swindling companies are exposed in plain English.

Price is $5 in buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

RE-ORGANIZED THE BOARD OF TRADE

Decided to Send Delegate to Fernie.

Last Saturday evening a meeting of business men was called on short notice at the Pioneer office, for the purpose of considering the advisability of sending a delegate to Fernie, to confer with other delegates from the interior, at the time of coal strike conference. Although the night was not a good one for a meeting, there was a representative attendance, and the matter in hand was discussed, it being the unanimous decision that Phoenix, which would feel an extended coal miners' strike so seriously, should be represented in such a gathering. Mayor Matheson was in the chair, and A. S. Hood was made secretary. On motion the mayor was elected as the representative from Phoenix, with full power to act as he thought best in the matter.

It was also decided, after discussion, to reorganize the board of trade, an organization that has done a large amount of good for Phoenix in the past. Accordingly, the following officers were elected: President, Charles H. Hunter; vice-president, John A. McMaster; secretary-treasurer, A. S. Hood. Every one present subscribed towards the expense of the representative to Fernie, and it was the idea to call a general meeting of the business men at an early date, when not only the report of the mayor after his trip to Fernie could be heard, but other matters of importance could be taken up and acted upon.

The following telegram was received by Mayor Matheson on Saturday last:

Nelson, B. C., April 19, 1907.
Secretary, Board of Trade,
Phoenix, B. C.

This board sending representative to Fernie 23rd, to be present coal conference. We earnestly ask your board have representative here also. Object, to place before convention serious effects general business.

S. M. BRYDGES, Secretary.

Ice Cream Parlors.

C. H. Mullin, of the Gem restaurant, will handle Sengfelder's celebrated Spokane ice cream for the rest of the season. Also in bulk. Open Sunday, April 28th. t.f.

The first Sunday in May, tomorrow week, the choir of the Presbyterian church will give a special choral service, and everyone enjoying music will miss a treat by not being present.

In and Around Phoenix

BRIEF TOPICS OF LOCAL AND GENERAL INTEREST TO PHOENICIANS.

Don't forget Boyle is the Druggist.

Dr. Mathison, dentist.

See the ad of James in this issue of the Pioneer.

Dry wood in car lots. Apply to J. Trombley, Phoenix, B. C.

Bock beer is now on tap at all hotels.

Prescriptions properly prepared by Boyle, the Druggist.

Burton's and Bass' Ale on draft at the Hotel Brooklyn.

Woodchoppers wanted. Inquire of J. J. Bassett, Hartford Junction.

See Miss McDonald, milliner, for sewing machines and supplies.

The telephone company has been installing a number of new 'phones here recently.

Encycloypaedia Britannica, 26 vols, for sale at less than half cost. Inquire at Pioneer office.

P. Burns & Co., Ltd., are installing an up to date refrigerating plant at their local headquarters, the work of installation being in charge of J. B. Desrosiers.

The game of the Phoenix base ball club last Sunday at Greenwood, against a club from the latter town, resulted in a victory for the Greenwood team, with a score of 9 to 8.

Miss Queenie McCoy, daughter of Rev. James McCoy, who was located as Presbyterian preacher here some years ago, was married recently at Victoria, where the family now resides, to William A. Jameson. Mrs. Jameson will be remembered as having been in Phoenix last summer, being a vocalist of more than ordinary ability.

Among the Railway Men.

Coal scarcity has resulted in laying off several crews that usually make their headquarters at Eholt.

This week the C. P. R. raised the embrago on incoming and outgoing freight in the Boundary, and a little of it is now moving once more, the company having obtained a small supply of coal.

Conductor Mowatt, the skipper of White Wings Limited on the Phoenix branch of the C. P. R., has had things almost to himself this week, since only Snowshoe ore was hauled out of this camp by this road.

Either a mail clerk or a railway employee, whose duty it is to see that the Phoenix sacks are transferred to Eholt daily, must have been asleep Tuesday, as the mail did not arrive here that day. This is the second time in a few weeks that this has occurred, and there were some pretty angry people in this burg when it happened.

F. H. McGuigan, vice-president; F. E. Ward, general manager, and H. A. Kennedy, assistant general superintendent of the Great Northern railway, arrived Thursday night on a trip of inspection. They had a special train and were accompanied by several lesser officials of the line.

Ralph Smailes, the chief promotor of the Midway & Vernon railway, which has had such a checkered career, was back in Greenwood this week, and is still confident that the enterprise will eventually be brought to a successful issue. Mr. Smailes, who has a large store in Greenwood, has devoted most of his time for the last two years to endeavoring to interest capital in this important railway project, and deserves to succeed.

A bad wreck occurred on the Molson hill on the V. V. & E. last week, resulting in the death of Dan Evans, of Vancouver, a fireman, at the Grand Forks hospital. A train of cars loaded with steel got away on the hill, and ran down to Oroville, where it collided with an engine, doing a great amount of damage and seriously injuring four other men, namely, Dan Coghlan, St. Paul, brakeman; Wm. Bresnahan, engineer, Grand Forks; D. McSwain, P. E. I., and James Fowler, Wisconsin.

George J. Bury, of Winnipeg, assistant general western manager of the C. P. R.; F. F. Busteed, of Vancouver, general superintendent of the western division, and J. S. Lawrence, of Nelson, superintendent Kootenay-Boundary branches, were in Phoenix in Mr. Bury's private car Thursday, on a trip of inspection through the Boundary, it being Mr. Bury's first visit here. The party also had in tow the antiquated coach that does duty on the Phoenix branch, which had had another wash-up for the occasion.

Boyle, the Druggist.

Hannam's milk suffers no addition or subtraction.

Dr. Mathison, dentist, Bank Block, April 10th to 14th, inclusive.

Sewing machines to rent at $3 per month. See Miss McDonald, milliner.

Twin creek is now doing a big stroke of business once more.

Born, to the wife of A. Liljegram, Old Ironsides avenue, April 19th, a daughter.

Subject for Sunday in the Methodist church will be "Oddfellowship's Basal Principle."

A little son was welcomed at the home of Mrs. and Chas. Biesel at the Snowshoe mine yesterday.

Thursday evening what was termed a "Sock" social was given at St. Andrew's Presbyterian church, and foot gear of the prescribed kind was not lacking.

Last year Phoenix celebrated Dominion day, and every one seemed to enjoy the event. If the same thing is to be done this year, it is not too early to make the preliminary preparations.

George Hewson has had plans drawn for a two-story flat for two families, of five rooms each, which he expects to build on Knob Hill avenue, east of Second street, as soon as the coal strike is settled.

Early Tuesday morning the eight months' daughter of Mr. and Mrs. I. Hibner passed away at their home on Spion Kop, from bronchial pneumonia. The remains were taken to Spokane on Wednesday's train for interment.

Wednesday evening Rev. Samuel Lundie, pastor of the Presbyterian church baptized the twins of Mr. and Mrs. John W. Hannam at the family residence, below the city. They were given the names of Ellen and Elsie.

Next Tuesday evening a meeting will be held at the Eastern Townships Bank, for the formation of a gun club. Quite a number have expressed interest in the plan; and all interested are invited to be present at the gathering.

E. A. Black received word this week that F. G. Niems, a manufacturing jeweler, who has been in the employ of the A. T. Lehman Jewelry Co., of Denver, will arrive here about May 10th to accept a position with Mr. Black.

W. G. McGimsie, formerly of Kenora, Ont., has been secured by A. D. Morrison to be in charge of his business in Phoenix, which he takes over from G. E. Dey on May 1st. Mr. McGimsie has the reputation of being a famous hockey player.

No pumping has been done for the city water system since April 13th, the system being supplied from the numerous springs continguous to the city. Marshall lake, the chief source of supply, is now rising at the rate of from one to two inches daily.

The Granby football team has been organized for the season with the following officers: Captain, Richard Milkie; secretary, Tom Jones; treasurer, Thomas Loftus. There are a number of old country players in camp, and some good games are expected to be had.

Morrin, Thompson & Co.'s branch, to be known as Donaldson, Thompson & Co., will shortly open up in Moose Jaw in the general commission business—that is, if the coal strike is settled soon. Mr. Thompson went over to Oxbow, Alta., several days ago, to visit his family. John Donaldson has been in business in Grand Forks for years.

Ore Tonnage for Southeast Kootenay.

The following are the reported ore shipments and smelter receipts in Southeastern British Columbia districts for the week ending April 20, and the year to date, in tons.

Boundary Side Lights

Grand Forks had a civic holiday yesterday, and made it a cleaning up day.

Recently the bankers and printers of Grand Forks had a mix-up at baseball. The printers won by a score of 19 to 16. Will this help the overdrafts?

George R. Naden, M.P.P. for Greenwood riding, after his arduous labors at Victoria, was home again this week, before trekking to the north country.

J. T. Beattie, who for the past three months has been acting manager, has been appointed manager of the Greenwood branch of the Canadian Bank of Commerce

According to the estimates submitted, the rate of taxation in Grand Forks for 1907 has been figured at 36 mills. The estimates will doubtless be reduced somewhat.

J. J. Caulfield, for ten years a resident of Greenwood, and one of the incorporators of the Russell-Law Caulfield Co, has moved to the coast, where he expects to make his home in the future.

It is expected that a large French contingent will settle west of Midway in the near future. Rev. Father Ferroux, from Alberta, was looking over that district recently, and is understood to have been well satisfied with prospects for farmers in that neighborhood.

Over 100 have paid in membership fees to the Kettle River Fish and Game Protective Association. Fish ladders are to be placed at Cascade and Boundary Falls, and T. Stuart Palmer has been appointed game and fish warden by the association for the district.

The Nelson Iron Works, operating in Nelson and Greenwood, will be taken over next month by a company composed principally of Montreal capitalists, says the Ledge. The foundry at Greenwood is to be greatly enlarged, and a machine shop added. The Greenwood plant, when finished, will cost $50,000.

Local Manager Hodges, of the Granby Co., expected this week to receive his new 12 h.p. Franklin buzz-wagon, being type G of that well known make of autos. It is expected that he will have no trouble whatever in negotiating the hill up Boundary mountain to Phoenix with this powerful car, should he care to do so.

The work of installation of the hydro-electric power plant of the Greenwood City Waterworks Co. at Boundary Falls, is now practically complete, and will be in operation very shortly. The city of Greenwood will be lighted from this plant, and a number of contiguous high-grade mines will be furnished power for operating hoists and other machinery.

William Spier, manager of the Grand Forks branch of the Eastern Townships Bank, went over to Fernie this week, to be present at the coal strike conference as the representative of the Grand Forks board of trade. Greenwood's board of trade sent a telegram to the Dominion government officials, instead of a delegate to Fernie.

About $2,000 is said to be in sight in Greenwood for the 24th of May celebration, which was decided upon last week. The committee in charge consists of H. Bunting, chairman; A. H. Hallett, secretary; Kenneth McKenzie, treasurer; and Messrs. Fair, Thomas, Roy, Cartier, Cameron, Wellwood, Wilson, McAllister and Redpath. It is the intention to have a two days' celebration, with all the usual trimmings for such occasions made and provided.
