AND BOUNDARY MINING JOURNAL.

TENTH YEAR. PHOENIX, BRITISH COLUMBIA, SATURDAY, AUGUST 7, 1909 No. 37

MIDSUMMER DISPLAY

WE are making a special showing this week throughout our DRY GOODS DEPARTMENT OF SUMMER GOODS, such as ladies require during the warm weather. Displayed on our tables you will find:

SWISS MUSLINS

White Swiss Muslins, assorted spots 25c. to 75c.
Embroidered Swiss Muslins " " 47½c.
Eylet Swiss Muslins, assorted patterns 47½c.

COLORED MUSLINS

Colored Muslins, dainty designs 15c.
Colored Muslins, stripes and figures 25c. to 50c.

COLORED DIMITIES

Beautiful Colored Dimities, the latest for Summer Dresses, at . . . . 35c. to 50c.

LAWNS

Persian Lawns, plain and stripes . . 25c. to 40c.
Linen Lawn . . . . . 20c. to 35c.
Victoria Lawn . . . . . 12c½. to 40c.

LINENS AND DUCKS

Plain and Fancy Duck Suitings . . 17c½. to 45c.
Striped Linen Suitings, all shades 25c. to 50c.

GINGHAMS

A complete line of Zephyr Ginghams, stripes, checks and plain 17c½.

PRINTS

Grafton's Celebrated English Prints, light and dark colors . . . . 15c.

BLOUSES

We are showing exceptionally good values in Ladies' Blouses at . . 1.25 to $6

SUMMER VESTS

In this line we are particularly strong this season. Made in Cotton, Lisle and Silk, long short sleeves, prices 20c to $1.75

OUR SHOWING OF WASH GOODS, NECKWEAR, GLOVES, HOSIERY AND RIBBONS EXCELL ALL PREVIOUS YEARS

HUNTER-KENDRICK CO. LTD.

MORRIN, THOMPSON & CO.

Hot Weather Specials

Armour's Dried Beef - - - - - - 35c. lb.
Griffin's Lunch Ham - - - - - - 35c. "
Swift's Ashland Ham - - - - - - 35c. "
Clark's Lunch Tongues - - - - 40c. Can
Davies' Pork Tenderloin - - - - 50c. "

MORRIN, THOMPSON & CO.

THE THIRD INTEREST IN AMALGAMATION

Of Dominion and B. C. Copper Companies

Since the close-down of the Dominion Copper mines last fall, the properties of both the Dominion and British Columbia Copper companies have been inspected by three prominent New York financiers—Adolph Lewisohn, J. Parke Channing and J. H. Susmann—who, through the General Development company, are credited with endeavoring to bring about a consolidation of the two Boundary copper producers.

The General Development company is becoming more and more aggressive in the mining field, particularly in the various copper camps. The company is a close corporation, of which Adolph Lewisohn is president, J. H. Susmann, treasurer, and J. Parke Channing, consulting engineer. Among the few stockholders are representatives of some of the largest banking institutions in the country. The company is capitalized at $2,600,000.

A late acquisition on the part of the Generel Development company has been the Keystone company, located near the Miami, an option on which has been held for some time by Mr. Susmann of the General company, while a large block of the B. C. Copper stock was acquired by Mr. Lewisohn a few months ago.

Below is a partial list of properties in which the General Development company are known to be interested:

	Stock	Shares
B. C. Copper....	$3,000,000	600,000
New Dominion..	1,250,000	250,000
Miami Copper....	3,000,000	600,000
Kerr Lake M. Co.	3,000,000	600,000
Planet Copper....	4,000,000	800,000
Ray Central.....	5,000,000	1000000

They also hold $500,000 bonds in the New Dominion Copper and $600,000 bonds in Ray Central.

LE ROI TO BE DEEPENED

Famous Mine at Rossland to be Thoroughly Explored

A. J. McMillan, managing director of the LeRoi Mining company, returned to Rossland last week from London, where he had been making financial arrangements to carry out a plan of exploration and development.

The directors of the company, Mr. McMillan says, have succeeded in making such financial arrangements as will enable a large and comprehensive scheme of exploration work to be carried on. Some of the details of the scheme have yet to be settled, but, speaking in general terms, it is the intention to sink the main shaft a few hundred feet further, and to do a large amount of diamond drilling, so that the mine can be thorougly prospected to a depth of about one thousand feet below the present 1,650-foot level. Work will also be carried on in other parts of the mine, but it is realized that future developments are of paramount importance. A number of men have already started work and more will be put on from time to time, when the preliminary work in getting the machinery in shape, and the shaft in working order permit of this. Shipments of ore are not contemplated at present.

PYTHIAN SISTERS INSTALL OFFICERS

Enjoyable At Home on Thursday Evening

After business proceedings of Phoenix Pythian Sisters lodge on Thursday evening, the members and a number of invited friends participated in a very enjoyable evening at progressive whist, the tables numbering a dozen or more. The usual interesting contest for high score resulted in R. J. Gardner and Miss Hyslop getting away with first honors. The real rivalry of the evening, however, centered in the race for booby prizes, a full half dozen being tied at the finish, but Miss J. McKenzie and G. Kay were victors in the draw. Cards were followed by the serving of ice cream and cake, and the evening concluded with dancing.

The new officers of the Pythian Sisters for the current term were installed by Mrs. J. Marshall, D.D.G.C., as follows: M.E.C., Mrs. W. A. Pickard; E.S., Mrs. R. J. Gardner; E.J., Mrs. J. Bateman; Manager, Mrs. S. Reed; P.T., Mrs. R. Silverthorn; O.G., Mrs. A. Almstrom; Trustee, Mrs. J. E. W. Thompson.

In Prominent Class

"In the Coeur d'Alenes results of the very first importance have been attained in the development of the Star, Tamarack-Carbon-Custer group, Alice and Caledonia into undoubted mines; while the best information obtainable indicates that the Black Bear Fraction, H. E. M., Carney, Idora Black Horse, Orofino and several other properties will shortly attain similar rank"

The above is from an editorial comment in the Inland Observer, Spokane, on recent successes in mining. It speaks well for the Carney, in which so many Phoenix people are interested to be classed among such properties as Black Horse, Black Fraction and H. E. M., which are selling from 15 to 35 cents per share.

Boundary Mining Notes

The big bore into Phoenix hill from Greenwood has reached the 250-foot point.

The Golden Crown mineral claim in Wellington camp is being advertised for sale.

M. E. Jeffery, M.E., formerly of Greenwood, is in charge of the Silver Cliff mine at Cobalt.

The Granby company are constructing a large trestle work for the dumping of waste west of the No. 2 tunnel.

George E. Cole, for some years on the engineering staff of the Granby company, has accepted a lucrative position with a Cobalt company.

The six enlarged furnaces at Granby smelter are now operating in full blast and new records in smelting ore may be expected any time. Furnaces No. 7 and 8 are now under reconstruction.

A carload of rails arrived at the Golden Eagle on the North Fork during the past week for use in the development work. Assessment work is also being done on two adjoining claims.

The Granby company have constructed a wagon road from the Gold Drop outlet to the Monarch claim, primarly for the purpose of conveying a hoist over the hill to be installed between the Gold Drop and Monarch workings.

A strike of native silver is reported to have been made at the Fife mines during the past week and the property is being looked upon as a probable shipper in the near future. Lindsay Crossen is at present erecting mine buildings for the company.

It is reported that a deal was closed yesterday by the B. C. Copper company for the purchase of a claim adjoining their Jackpot group, in Welington camp, from D. Oxley et al. The property is being secured for the location of mine buildings, and for its water supply, not as a mining prospect.

That the British Columbia Copper Co. will invest money in Kamloops camp is now beyond the state of peradventure. The reports of the investigating engineer have, it is understood, been received with favor though further prospecting work will be done before a definite step is taken.—Kamloops Standard.

Charles W. Drysdale, a graduate of McGill with degree of B.Sc. M.E., has been honored by Yale, being appointed as fellow there with an allowance of $200. Mr. Drysdale is well known here having spent all of last summer and several weeks of this year as assistant to O. E. LeRoy in the geological survey of Phoenix camp.

Two weeks ago the Vancouver News-Advertiser published a statement that "the amalgamation of the Dominion Copper and the British Columbia Copper companies had been definitely announced from the east," which has been copied into many exchanges. This statement is a shade previous, no such merger having yet been consummated. However, the announcement may not be far out a few days hence.

Further development work is to be commenced on the Buster and Alaska Fraction on Wallace mountain, owned by the Alaska Mining company. There is already a 35-foot shaft on the property, and a lead of native silver has been uncovered. Five assays of the ore ran from $153 to $334. The property is in the same high-grade belt as the Sally, Duncan and Rambler and gives promise of being enlisted with the shippers in the near future.

Up to yesterday none of the furnaces at the B. C. Copper company's smelter had been blown in, but General Manager J. E. McAllister stated that the smelter was in readiness and would be in operation in a day or two. The Mother Lode mine has commenced shipments, and the ore is now arriving daily at the smelter bunkers. As soon as the forces at the properties can be properly organized it is the intention of the company to smelt 2100 tons of 1.50% copper ore per day. About 60 men are now employed at the smelter and 160 at Mother Lode.

R. P. Williams of Rossland, representing the Canadian Rank company, was in the city for a few days this week. Mr. Williams has just sold a 30-drill Rand air compressor to the Nicola Valley Coal & Coke company, at Middlesboro, which will be built and installed in about three months. The company is outputting about 400 tons of coal per day at present and when the compressor just ordered is installed, 1,000 tons a day will be extracted. The coal is first-class and is finding a ready market, its chief use being for domestic purposes.

Electric Smelting

Dr. Haanel, of the mines branch of the Dominion government, will in a few days issue a report favoring the treatment of ores by electricity in Canada, as a result of observations made in Sweden and elsewhere. Dr. Haanel is convinced that the cost of such treatment of ores in Canada, owing to the amount of water available, would be less even than in Sweden.

DIRT WILL FLY ON SPUR IN FEW DAYS

And Line Will be Rushed to Completion

Information has just been received from an authoritative source that the dirt will be flying on the grade for the new spur to Wellington camp before the end of this month, and that the construction of the road will be rushed to completion.

The big steam shovel of Contractor Tierney is now working on a filling-in contract for the C.P.R. east of Cascade, and as soon as the work is completed there, the outfit will come direct to Phoenix to commence operations on the new spur.

It is further stated that the contractors will continue the grading of the road to Central camp, but owing to the difficult nature of the extension it will not be completed until late next summer. The estimated cost of the railway to the British Columbia Copper company's Lone Star mine in Washington is from $200,000 to $300,000, but the road will probably be bonused by the mining company.

A number of C.P.R. officials arrived in their private car Lethbridge on Tuesday to make further investigations in connection with the line.

A Lucky Phoenician

The eyes of the continent may be said to be fixed on Vancouver, which today gives promise of becoming the Liverpool of the Pacific coast. To be the owner of forty acres of choice property bordering on the city limits of North Vancouver may well be the envy of both the capitalist and the real estate vendor, and to have become possessor of such acreage, almost by accident, for the nominal disbursement of $100 gives an idea of the hidden fortunes which lie in wait for those born under the lucky star.

Whether John Pickthal of Phoenix was really born under a lucky star or not, the Pioneer files do not state, though evidence is rather conclusive. Fourteen years ago Mr. Pickthal loaned a friend $100, who later gave Mr. Pickthal a deed of 40 acres of land in lieu of the cash. The land is in the Capalino district of North Vancouver, and the growth of the city must soon force the property to become city lots. Mr. Pickthal has been besieged with fancy offers for his holding, and only this week refused an offer of $40,000 from a Vancouver realty firm. But he is too optimistic of North Vancouver's future to part with his holding at present.

Dr. MacLean Goes to Greenwood

Dr. J. D. MacLean went to Greenwood on Thursday, where he will reside and practice his profession. His departure from Phoenix is a matter of general regret among all who knew him. A capable physician, a public spirited citizen, affable and genial, Dr. MacLean enjoyed a large practice during his two years in Phoenix, and he leaves a large circle of warm friends who will wish him success in our sister city. In Greenwood he will be physician to the B. C. Copper employees, and will be assisted by Dr. Arbuckle, who arrived from Vancouver on Tuesday.

SERIOUS ACCIDENT TO CHARLES TAYLOR

Arm and Leg Badly Fractured Yesterday

Charles Taylor was the victim of a serious and perhaps fatal accident yesterday morning, which occurred at the new trestle being constructed for the dumping of waste from Granby mines.

The route for continuing the trestlework was being cleared, and a crane, operated by a hoist, close to which Taylor was standing, was being used to remove a small building. The strain of the cable was such as to overturn the crane, taking the unfortunate man with it to the ground, a distance of about eight feet.

Taylor sustained bad fractures to his right leg and left arm, as well as internal injuries, and is at present lying in the hospital in a serious condition. He is a young man of 25 years, and was employed as a carpenter's helper, and has been with the Granby for about a year and half.

The New King's Hotel

The transformation which has resulted in the renovation of the old Balmoral, makes the new King's hotel, under the proprietorship of E. P. Shea, hardly recognizable as the former McMillan block. The remodelling of the interior, and excellent taste in its decoration, new furnishings, and modern appointments, together with exterior painting and handsome window lettering, makes the King's a new building. A bright and attractive dining room is supplemented by a short-order grill and quick lunch, which is open at all hours. Under the capable management of W. R. Williams the King's is already becoming a very popular hostelry, and will rank among the first in the district. The King's is a hotel of which any city the size of Phoenix might feel proud.

Boundary Side Lights

The supreme court sits at Greenwood on Oct. 27th.

The Mother Lode stage now runs on ragular schedule to Greenwood.

Born—At Eholt, on Wednesday, Aug. 4th, to Mr. and Mrs. J. J. Larson, a son.

A tax sale of Grand Forks delinquent properties will be held on September 4th.

Work will shortly commence on Dr. Kingston's new private hospital in Grand Forks.

Alfred Marchantom of Grand Forks has accepted a position as city electrician at Armstrong.

J. A. Tuzo has accepted a position as engineer on the Midway & Vernon railway construction.

Frederic Keffer of the B. C. Copper company has returned from examining the copper properties in the vicinity of Kamloops.

The marriage of Dr. Truax of Grand Forks and Miss Inglis, recently of the public school staff of that city, took place in Vancouver on Tuesday.

The Winsor hotel, Greenwood, will be conducted by C. McClung in future, the partnership existing between C. McClung and D. Goodeve having been dissolved.

Wilfrid Holmes, who came from California a year ago and purchased 17 acres of land near Grand Forks, has recently purchased 20 acres more of adjoining property.

Dr. J. E. Spankie leaves Greenwood this week to practice as a specialist in Vancouver. The doctor has prrctised his profession in the district for ten years, and had also become financially interested in many local mining properties. He was banquetted by Greenwood citizens Saturday evening.

Mining Records

The following are the locations, certificates of work, bills of sale, etc., recorded at the office of the Grand Forks mining division for the past week:

LOCATIONS

Stella, Christina Lake, F. Bruno; Bluestone, Franklin camp, relocation of Amalgamated, James McDonald; Keystone fraction, relocation of Midway, Yellowston, relocation of Dan Patch, J. S. Boyce; Buby, Burnt Basin, T. H. Paulson; Lennora, relocation of Last Chance, Sonnora, relocation of Rabbit Paw, R. W. Yuill and P. W. George; Alpha, Christina Lake, H. D. Cameron; Delta, Christina Lake, W. Beach; Garnet, Christina Lake, relocation of Wonder, W. Beach; Omega, Christina Lake, W. H. Beach; Viking, Christina Lake, relocation of Nemo, Ole Johnson.

CERTIFICATES OF WORK.

Glenora fraction, Wellington camp, 2 years, F. M. Kerby; Bullion, Dawn, Gloucester camp, Horner et al; Maple Leaf, Franklin camp, H. W. Young; Winchester, Franklin camp, A. J. Fee; Ready Cash, fraction, survey, K. Kipling fraction, survey, Wellington camp, McMynn et al; K. V L. fraction, Brown's camp, J. A. Thompson; Walborg, Franklin camp, Chas. Hansen; Hope, Franklin camp, Holger Hansen; O.K., Franklin camp, Harvey Hansen; Windfall, Wellington camp, J. A. Drum; O.K., Franklin camp, John McLaren; Ruby fraction, McKinley camp, Morrell et al.; Triangle fraction, Brown's camp, Tim Townsend.

PICNIC SCHEDULED FOR LABOR DAY

Phoenix Miners' Union Preparing for Big Celebration

Phoenix Miners' Union are making preparations for their annual Labor Day celebration, which it is expected will eclipse all former occasions.

The celebration will take place in the Union park, and elaborate arrangements are already under way for an attractive program of sports and caledonian games. A good purse will be hung up for baseball, which will bring in the prominent teams of the district.

A number of prominent speakers will also be present and deliver addresses during the afternoon, and the celebration will conclude with a dance in Miners' Union hall in the evening. The program of sports is now being arranged, and will be published in a few days.

Newman's Father Killed

The father of Wm. and Cleve Newman, who were recently convicted and sent to the penitentiary for the Bridesville hold-up, was killed Saturday by a run-away near Fish Lake, between Loomis and Connully.

Will Entertain John Oliver

John Oliver, the Liberal member for Delta in the legislature, who is at present touring the interior organizing the Opposition forces for the approaching provincial elections, will arrive in Phoenix next Thursday, Aug. 12th. Local Liberals will tender him a smoker.

New Teachers Appointed

Miss Bertha A. Tupper and Miss Kate Murray, of Vancouver, have been appointed to the teaching staff of Phoenix public school. Miss Tupper will be in charge of the intermediate classes, and Miss Murray the primary division. Their duties commence with the reopening of school on Aug. 23rd.

Coming to Phoenix

T. C. G. Mahon, for the past two years on the staff of the E. T. Bank, leaves on Sunday for Phoenix to which branch he has been transferred. Mr. Mahon's many friends will wish him success in his new home. He has been a most able captain of the Grand Forks cricket club, and under his leadership they have won from every team they have come in contact with.—Grand Forks Gazette.

SATURDAY, AUGUST 7, 1909

In addition to the four dreadnoughts for which financial provision has already been made, the British government has just announced its intention to ask Parliament for authority to build four more. These will be of a type so superior to those now in commission that already there is talk of the time approaching when the existing dreadnaughts will have to be sent to the scrap heap. The new vessels will be more strongly built and have greater resisting power; they will carry more and heavier guns; and, withal, they will be capable of reaching a higher rate of speed. This settles for years to come the relative strength of the British and German navies. Only by means of another statutory building program, to begin at the completion of the present one, and by going yet more heavily in debt, can Germany hope to come anywhere near the new limit officially announced.

The road from Phoenix to the city cemetery is at present in bad shape and demands the prompt attention of government authorities. It is but a repetition of what exists every year at this season. The road master of the Greenwood division usually repairs his section of the road early in the summer, but his division ends at the cemetery. The balance is in the Grand Forks division and is seldom repaired until the snow is ready to fall, resulting in the road practically never being in good shape. The Phoenix-Greenwood road is one of the most extensively travelled thorougfares in the Boundary and, a rough road at best, should at least be repaired promply after spring rains.

The Selkirk Centennial for Winnipeg has got away to a good start with a grant of $250,000 from the Manitoba government. The centennial should be an important event in the history of immigration to western Canada, as well as a world's fair. Vast numbers from across the seas will see the fertile Canadian prairies for the first time, and will do much in advertising the possibilities of the great west.

The London Mining Journal, the oldest mining paper and pioneer of the technical and trade press in the world, has yielded to the call of its readers for a more convenient-sized sheet for filing purposes and adopted the American standard size. This is the first change in the general make-up of the Mining Journal since it was established in 1834.

Attorney-General W. J. Bowser is already predicting the result of the next Dominion general election, which he says will be a Conservative victory. The attorney-general won't have to swallow his words for a year or two anyway.

Fernie on Sunday celebrated the anniversary of its great fire of a year ago. Progressive citizens have already eliminated almost all traces of the ruins and have built up a more substantial city.

A commemorative arch at Niagara Falls is proposed to mark the hundred years of peace between Canada and the United States.

The struggling existence and spasmotic operations of the Dominion Copper properties in the past would suggest that the success of the New Dominion Copper company depends largely on the completion of a merger with the British Columbia Copper. It would mean big things for the Boundary and perhaps more to Phoenix than any other point. Everything points to a successful outcome of the negotiations in a short time.

The welfare of the city is at stake in the present state of affairs at the city hall. No good can be accomplished in tieing up civic business, and it is time for the aldermen to bury the hatchet.

Everything points to Phoenix being on the verge of the balmy days of prosperity again.

B. C. MINING

The Leitch Collieries has commenced the work of opening up a new mine at Police Flats just to the east of the main workings at Passburg.

The well-known Ikeda mines, on Queen Charlotte islands, have been bonded to an English syndicate for $200,000 on a two months' option.

A vein of copper glance 8½ ft. wide was found near Douglas channel by a prospector, and work is now being done on the showing. The find is considered of importance from a geological point of view.

Chas. F. Law, the mining man who has just returned from a trip to the far north confirms the report that there are some rich copper fields in the Telqua and Bulkley valleys. From the head of the Skeena river to Aldemere most important silver-lead discoveries have been made.

Hon. William Templeman, minister of mines, will shortly leave Victoria on a tour of Comox-Atlin. He will visit the Atlin mining district and, if time permits, go on to Dawson. Owing to illness it is doubtful whether R. W. Brock, director of the Dominion geological survey, will be able to accompady the minister.

Extensive work is being done on the pegmatita dikes of the Big Bend district this season. It is only a matter of time until development and transportation will open up a big mica field in this section. The companies which own the big mica deposits are petitioning the government for better roads and trails.

A fine sample of ore has been taken from the Brown-Bulldog mine between Princeton and Hedley. It was taken from a lead 35 ft. wide, and contains assayed values as follows: Copper, 5 p.c., silver, 8 oz., gold average, $8; zinc, 14 p.c. The values are shot through a lime breccia which makes it susceptible of easy smelter treatment, containing those constituent properties which characterise a self-fluxing ore.

Zinc blende, carrying 53 per cent zinc values with a variation of not more than 1 per cent, is being shipped from the Lucky Jim mine to the fullest hauling capacity of the K. & S. railway, with prospects of the output being at least doubled as early as transportation facilities can be arranged. The Lucky Jim, which is near Kaslo, is being operated by the Lucky Jim Mines, Limited, a company composed of New York capitalists, and is now in shape to ship about 1400 tons per week.

ALL READY FOR THE NATIONAL CONGRESS

Big Irrigation Meeting in Spokane Next Week

Spokane, Wash., Aug. 5—Everything is in readiness for the 17th sessions of the National Irrigation Congress in Spokane, August 9 to 14, when experts will discuss problems of reclaiming arid and swamp lands, forestry, deep waterways, good roads, home-building and the conservation of the country's natural resources. George E. Barstow of Texas will preside, and among the 4000 delegates will be representatives from every state and territory in the Union and the provinces in Canada, 30 delegates from Europe, the southern republics and the orient.

Various stages of the development of the Pacific Northwest will be shown by elaborate floats and other devices in two parades of progress and a march in review of the industrial and irrigation army, 10,000 men and 35 bands of music, in Riverside avenue on Aug. 10, 11 and 12, when the electrical illuminations and decorations will be the most pretentious ever attempted in this part of the west. There will also be demonstrations of 14 different methods of supplying moisture to the land by artificial means and exhibits of products.

CLOSE GAME SEASON

Provincial Regulations for Year Announced in Gazette

Notice is given in last week's issue of the B. C. Gazette of the order of the lieutenant governor:

That the hunting, killing or taking of elk or wapiti in the Columbia, Cranbrook and Fernie electoral districts shall be prohibited until the 31st day of August, 1911.

And on Vancouver island south of the following described line: "Commencing at the Little Qualicum river; thence following that stream westerly to its junction with the Alberni road; thence following the Alberni road to the Alberni canal," the hunting, killing or taking of elk or wapiti shall be prohibited until the 31st day of August, 1914.

The hunting killing or taking of moose south of the 52nd parallel of latitude in the province except in Columbia district, shall be prohibited until the 31st day of August, 1914.

That the hunting, killing or taking of mountain sheep in the counties of Yale and Westminster, shall be prohibited until the 31st day of August, 1911.

Want $5,000—Refused $200

T. Dale, who lost his arm some time ago while working on the Dominion dredge at Nakusp, has entered action in the exchequer court to recover $5,000 damages. He was offered $200 and the position of watchman on the dredge in compensation for his injuries, and refused to take it.

RECORD YEAR AT THE TRAIL SMELTER

Five and a Half Million is Value of Output

During the year ended June 30 the Consolidated Mining & Smelting company's smelter at Trail produced metals, including gold, silver, copper and lead, to the extent of $5,506,000, which establishes a new record for the plant. This return is all the more worthy of note because of the fact that throughout the year metal values have been exceptionally low. With prices where they were a couple of years ago, and they are now trending that way, the smelter returns for the past year would have been much higher even than they are. In the face of the market conditions, however, the returns for the year are $77,500 above those for the previous year, the figures for which were away ahead of those for any other year.

One of the most gratifying features of the year's returns is the large output of the company's electrolytic refinery, which totalled $2,700,000, or nearly half the company's total product. This figure, satisfactory though it is, would have been much larger were the capacity of the refinery such that it could have handled all the lead bullion produced by the smelter during the past three months. This it was not, with the result that during April and May 2,000 tons of bullion were sent out of the country for further treatment, and a corresponding amount during June. The company, however, already has plans under way for largely increasing the capacity of the refinery, and when these have been carried into effect, the necessity for sending any any lead bullion out of the country will be obviated, and the company's production of 999 pure gold and silver and pure lead greatly increased.

14 Killed; 102 Injured

In a head-on collision on the Inland Empire railway at Lacrosse, one mile west of Coeur d'Alene, Idaho, Saturday afternoon, two electric passenger trains were wrecked. Fourteen people are dead as a result and 102 were injured.

When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures female weakness.

Sick women are invited to consult Dr. Pierce by letter, *free*. All correspondence strictly private and sacredly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

If you want a book that tells all about woman's diseases, and how to cure them at home, send 31 one-cent stamps to Dr. Pierce to pay cost of mailing *only*, and he will send you a *free* copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers. In handsome cloth-binding, 50 stamps.

DININGROOM FURNITURE

We have all kinds of up-to-date Furniture in this line, such as SIDEBOARDS, BUFFAS, CHINA CLOSETS, EXTENSION TABLES, round and square; all kinds and styles of Dining Chairs—a new shipment just in.

Have you seen our GO CARTS, if not, you should as they are up-to-date.

Boston Copper

United Metals Selling Co has come down to earth and is selling copper at 13¼ cents per pound. Sales by this agency were made at the new level for the first time yesterday morning and transactions, with the same sellers continued in the afternoon.

The inquiry continues good on the part of consumers, but on the part of sellers there is still a variance with regard to prices. One of Saturday's sellers at 13⅜ cents held for this price today.

The sale of Stanton copper at 13¾ cents records the top figure thus far noted for this brand.

The United Metals Selling Co. has sold casting brands, which include some of the poorer Lake product, at 13⅛ cents.

The United Metals Selling Co. today reduced its London price for electrolytic from £61¼ to £61 per ton (equivalent to 13 28 cents per pound). —Boston News Bureau.

BOUNDARY & KOOTENAY 1909 ORE RECORD

Shipments and Smelter Receipts For Year to Date.

Ore shipments from the various mines of Boundary and Kootenay, and the receipts of ore at the smelters of Southeastern British Columbia for last week and for 1909 to date are as follows:

SHIPMENTS.	WEEK.	YEAR.
Boundary	22,906	654,236
Rossland	4,296	138,117
East Columbia River	3,799	109,275
Total	31,103	869,647
SMELTER RECEIPTS—		
Granby	18,763	559,470
B.C. Copper Co	....	140,505
Trail	9,484	209,179
Northport	....	12,761
Total	28,247	930,802

A fresh supply of Salome chocolates, manufactured by Popham Bros., Victoria, just received at Love's Drug Store.

PROVINCIAL.

There is talk of Slocan City reverting to the government.

A slight shock of earthquake was experienced at the coast on Monday.

The order has gone forth that all slot machines in Vancouver must go.

The Provincial Conservative association will meet in Kamloops early in November.

F. C. Stratford of Vancouver has been appointed a Dominion fisheries protection officer.

Vernon sold $100,000 of waterworks and school debentures at par to the Bank of Montreal.

The provincial jail at New Westminster is full and twenty prisoners have been sent to the Victoria cells.

When in Vancouver last week Hon. Dr. Pugsley said that the time had arrived when the Port of Vancouver should be nationalized.

John D. Marsh of Winnipeg and Alfred Shrubb, the English runner, will run a 15-mile race in Vancouver on Aug. 14th for a purse of $1500.

A Nelson delivery horse swam Kootenay lake one day recently. It had been taken across for a few days' rest but could not stand the solitude and longed for the excitement of city life.

The city of Kamloops has awarded a contract to the Canadian General Electric company for the installation of arc lights on the principal streets of the city. A 35-light service has been adopted.

James R. Thompson, a constable in Salmon Arm, has been committed for trial by two justices of the peace in that town, on the ground that he unlawfully secured the discharge of an Indian from custody.

Speaking at Vancouver, Hon. Mr. Templeman said: "We believe that the Transcontinental in the north will do even more for British Columbia than the C.P.R. has done. We will complete the transcontinental, and just as sure as fate, when we have that done, we will build a road to Hodson Bay."

Judicious advertising is the only real way to "stir things up."

A TIMELY WARNING

To the Editor of The Pionneer:

Dear Sir,—I read Provincial Policeman W. H. Docksteader's bush fire warning with a great deal of interest. For a source of water supply, Phoenix is a law unto itself. What I say will be as I view the question from a citizen's standpoint and not as one interested in the local water supply company. The first three years the water company was in business there was no difficulty in having a sufficient supply of water from the natural walls of Marshall lake. But since the forest has been cut away from the New York townsite, the company has been compelled to increase the storage capacity of the lake at least 100 per cent, while the same amount of water was pumped daily at that time as now. This proves that laying waste to the forests, in some manner, exhausts the supply of water from the mountain springs. Certainly it is a great public trust to protect the forests surrounding Phoenix, and every citizen should cheerfully respond to the call of the provincial authorities to fight bush fires. Yours truly,

J. L. MARTIN.

Buster's Philosophy.—LXXVI.

Resolved, that figure heads are not confined to shop windows, they are to be found in every walk and run of life. They are block heads that do no thinking. I don't want to be one, I want to think. To think well of every one. Think happy thoughts, kind thoughts, and healthy thoughts. To think success, for "as a man thinketh in his heart so is he." The figure head is always an employee, he only represents the man who thinks. Every great invention, bridge, ship, building, opera, book, picture or poem was first a thought; had to be. So you see that thoughts are actual things. See if you cannot think something. A young man thinks there are no opportunities for boys like there used to be, so when a chance comes he doesn't see it. Another boy thinks that the only road to success is a pull, or through influence, so he doesn't work for himself and hustle. He fails. Think "I can and I will," it works.

A CASE OF NERVOUS PROSTRATION

Relieved In a Remarkable Manner By Pe-ru-na.

Pe-ru-na is a Systemic Catarrh Remedy.

Especially Adapted to Cases of Nervous Prostration Caused By Overwork, Mental Strain or Extreme Summer Heat.

IN latitudes where warm weather is of long continuance, the inhabitants become more or less accustomed to it.

In Temperate Zones, however, where the change from winter to summer is great, the system is sometimes poorly prepared to meet the exigencies of hot weather. This is the cause of much sickness.

Stomach catarrh, indigestion and dyspepsia are not among the least of summer ailments.

INDIGESTION CAUSES WEAKNESS.

When the digestion is disturbed, the assimilation is also affected, and as a result the body does not receive the nourishment it should. Lassitude, weakness, brain fag, loss of flesh and nervous prostration are the natural results.

What is needed is a remedy that will restore the digestive organs to their normal condition.

Such a remedy has been found in Peruna. It has proven itself of great value in thousands of cases of this kind.

Its action has been remarkable at times in restoring some patients who had given up all hope of recovery.

PE-RU-NA'S BENEFICIAL EFFECT.

But there is nothing strange about Peruna's action. It simply tones up the mucous membranes of the organs involved, restoring them to their normal condition and leaving Nature to perform her duties unhindered.

That person who has sound, healthy mucous membranes lining the entire digestive tract is well-guarded against the usual summer ailments.

Peruna is the means whereby to attain this most desirable condition.

If you suffer from any of the above mentioned symptoms, try a bottle of Peruna.

One bottle of this remedy is often sufficient to convince any one of its merit as a safe and reliable remedy for all catarrhal conditions.

We have many letters of gratitude received from persons who have experienced its benefits.

These testimonials are proof to us that Peruna has not failed in the mission for which it was intended, that of relieving suffering and restoring health.

MR. P. BRIEN, 28 Third Street, Limoilou, Quebec.

"The fatigues entailed by my duties as accountant began to weaken my system about a year ago. I felt that I would not long be able to withstand the severe strain upon my nerves, as, a thing unknown to me before, I would long for office hours to be over in order to rest.

"I gradually *grew weaker* and a few months later my *sight* was *impaired*. I then *broke down completely* and was obliged to take to my bed." I was also suffering from palpitation of the heart.

"After a few weeks' treatment by a local physician, I was in the same critical condition and as the doctor held out no great prospects for me, I decided to experiment on myself.

"I took several remedies advertised as tonics, but did not derive any benefit.

"Peruna was then given a trial, and before I had taken it a week I felt my condition improving. After a few weeks more had elapsed, during which time I followed the directions carefully, my shattered nervous system became firmer, my sight stronger and I hoped to be out soon again.

"My expectations were realized, for in three weeks I assumed my duties as accountant at the office.

"*Peruna* certainly *worked wonders on my system*, and for persons run down from overwork, I believe it is the most efficacious tonic."

Kidneys and Liver.

Mr. George E. Hess, 1611 Broadway, Supervisor of the 2nd District Watervliet, N. Y., writes:

"It is but just to you to acknowledge with thanks the great help I have received from the use of Peruna. Two years ago I was a sick man. My kidneys and liver were out of order, and the pain in my back and head was at times so severe that I was obliged to give up my work.

"At this time a club friend of mine spoke to me of Peruna, and induced me to try it. The effect it had on me from the first was most remarkable. I knew at once that I had secured the right medicine, and was entirely cured in ten weeks."

Distress After Eating.

Mr. J. W. Pritchard, Columbia City, Ind., writes:

"I am pleased to say that I have been cured of catarrh of the stomach by Peruna.

"I could hardly eat anything that agreed with me. Before I would get half through my meal my stomach would fill with gas, causing me much distress and unpleasant feelings for an hour or two after each meal.

"But, thanks to your Peruna, I am now completely cured, and can eat anything I want to without any of the distressing symptoms. I can now enjoy my meals, and it is all due to Dr. Hartman and his wonderful medicine."

36, SHELDEN BUILDING, HOUGHTON MICH., U.S.A.

The Coming Building Material

Concrete is composed of cement, sand, and fine rock or gravel. Its manufacture is as old as the Roman Empire, but it is only of late years that Portland cement has been known; and that the wonderful combination of cement and steel—reinforced concrete—has become an important factor in building operations, especially in supplanting structural steel. So far as the supply is concerned and likewise the value of concrete as a building material, its position as a competitor of stone or as a supplement to stone in building operations is in most instances unassailable, while the reinforced concrete beam and column have, in the opinion of many engineers, great advantage for certain purposes over steel framing. The constituents of concrete are not only unlimited in quantity, but they are widely distributed, so as to be cheaply procurable in every section of the country; and when properly made it seems to be not only the equal, but in many respects the superior, of the very best building stone, excepting probably the question of appearance. Moreover, it is useful in a score of ways where stone and brick cannot be economically employed. Sand and rock or gravel are, of course, present in every state in the Union in absolutely inexhaustible quantities, and the materials for the manufacture of cement are only slightly less widely distributed and plentiful—G. E. Mitchell in Review of Reviews for August.

If you are thinking of building or require building material of any kind—lumber, shingles, lime, brick—call on me for figures. Phone A 44. C. A. Ross.

W. Fraser returned from Lethbridge on Tuesday. Mrs. Fraser, who had been visiting her former home in eastern Canada, returned with him. They purpose moving to Lethbridge.

LaMott's Comedy company is booked for Phoenix opera house for three nights, Aug. 12, 13 and 14. Here is what the Deer Park Union has to say about the company: LaMott's show is one of the finest and cleanest little shows that have come to the Park Mrs. LaMott is an accomplished musician and performs her part in the show with credit. Mr. LaMott, in his Irish and Negro stunts, was far above the travelling show, and all his work was free from vulgarity which characterises so many of the travelling shows. Mr. Zaneta's performance is worth the price of admission. He is much the best contortionist ever seen at Deer Park

Tanglefoot and fly poison at pads Love's drug store.

For sale—the Mint hotel; will sell for $1000. Apply to L. Penna.

Mrs. E. A. Black returned Tuesday from a visit with friends at Grand Forks.

J. B. BOONE
H. L. MASSEY

There is no better or greater index finger to the business interests of an up-to-date town than the advertisements of its merchants in the local weekly publication.

"The Serge of the Serges"

BLUNOZ CANADIAN Semi-ready

In the first place "Blunoz" serge is not made in Nova Scotia.

In the second place, it is not all a blue serge, for it is a freely woven Australian wool serge in both the navy blue and black colors. You have a choice of either.

To be sure they call the Nova Scotians "Blunoses"—but that is not the derivative of "Blunoz" serge.

Only two woollen mills in Canada can make the "Blunoz" Serge—and the Semi-ready Company control and absorb in their tailor shops the entire output.

This is the Canadian Serge which has made the British mills "sit up," and it is the Standard cloth by which the Government judge the tariff needs of this particular Canadian industry.

Semi-ready

Semi-ready "Blunoz" Suits, now $20, will cost $24 after January 1st, 1908.
