No mining camp in the Boundary is attracting more attention than PHOENIX. If you wish to receive the mining and general news of this camp and the Boundary, subscribe to the PHOENIX PIONEER.

The Phœnix Pioneer.

During the year 1900 100,000 TONS OF ORE were shipped from the mines of PHOENIX. For the first five months of 1901 over 90,000 tons of ore were shipped, or at the rate of 200,000 tons annually.

Devoted to the Interests of the Boundary Mining District.

Sets the Busy Housewife Thinking

Something to Eat

Is the hardest problem to solve. Everything seems tasteless and unpalatable. A visit to our Grocery Department will settle the question for you.

Our store is full of Summer Groceries ready to eat and just suitable for the warm weather.

We make an effort to have everything fresh. A small order will convince you that we accomplish it.

We expect our fruit for preserving this week.

In our Hardware Dep't we have a nice lot of Family Ranges and Cooking Stoves at prices to suit all purses.

Screen Doors, Screen Windows, Window Netting, Ice Cream Freezers, etc., etc.

Come in and see us; you are always welcome whether purchasing or not. All orders delivered promptly.

ORE FROM GRANBY CO. MINES

Nearly 200,000 Tons of Ore Sent Out From This Camp to Date, of Which 129,136 Tons Were Shipped This Year.

This last week the Granby Co.'s mines in this camp—the Old Ironsides, Knob Hill and Victoria—have been in the business of breaking all previous records as far as ore shipping goes. Heretofore the regular output that has daily gone down to the company's smelter at Grand Forks was 600 tons or a little over. This average was kept up nights, days, Sundays and holidays. But the reduction works at the Forks are being enlarged, and a reserve of ore is wanted, so late last week orders came to send out three ore trains per day, instead of two as formely. This meant that 36 ore cars, each holding on an average of 30 tons of chalcopyrite, were to be sent out every 24 hours, or 1,080 tons daily.

With the present hoisting facilities of the properties, it is not an easy thing to keep up an output of this magnitude steadily, but for several days it was done without trouble, so that the ore shipments for the week show a decided increase over those of any previous week. Under the existing circumstances it will be necessary to drop down to the old two-train daily rate occasionally. But if the smelter ore bins will hold the output, three trains of ore daily will be sent down as often as possible.

What These Mines Have Shipped.

Last year these Granby Co. mines shipped a total of 64,553 tons—the output being of course for only part of the year, after the railway was completed in July. Thus far in 1901, seven months, these same mines have shipped close to 130,000 tons, or an average of 18,449 tons per month for that time. With the shipments for this week, which are not included in the table given herewith, these properties have sent out about 200,000 tons of ore since they began shipping, a little over a year ago. The actual smelter weights of the shipments for the last seven months were as follows:

	Tons.
January	18,050
February	17,300
March	19,208
April	18,904
May	18,113
June	19,319
July	18,182
Total	129,136

PUBLIC SCHOOL OPENS MONDAY WEEK.

G. D. Turner and Miss Edith Hawthorne Engaged as Instructors.

Monday, August 12th, the public school of Phoenix will once more open at the old stand. In a couple of weeks thereafter sessions will be held in the new school building, the contractor, Stephen Tripp, having until the 18th inst. to finish his work, and it is believed that he will be done in time.

The school trustees have engaged two new instructors, who will be in charge of the scholars for the coming scholastic year. The principal will be George B. Turner, who has been teaching at Alder Grove for the last three years, and who comes here highly recommended. The second teacher will be Miss Edith E. Hawthorne, who has latterly been teaching at Ashcroft. Both of them will arrive late next week.

One thing the school trustees desire to impress especially on the parents of the city, and that is that the amount of the grant from the government for the next year will be based on the average attendance for the balance of this year. If there are but 50 scholars, only $1,000 will be received from the provincial government, and the balance needed will be paid by the city itself. Phoenix is in the class of cities that will receive school funds from the government at the rate of $20 per member. It will require at least $1,500 to pay the expenses of the school for the first year in the new building, with only two teachers. Therefore to get this amount from the government there must be an average attendance of at least 75 scholars from the opening till the Christmas holidays. Good teachers and a first-class building have been provided, and it is hoped that the attendence will be much larger than at the close of the last session.

George W. Wooster, treasurer of the Granby Co., was up from Grand Forks this week.

W. J. Porter has been doing some development on the Iron Clad, a crown granted claim near the Athelstan, in which Messrs. Farrell and Rumberger are also interested. There is an immense iron cap, of a low grade, from which great results are anticipated some day.

COPPERFIELD NOW ON THE MARKET.

Smith Curtis Has Just Platted the Place in the Similkameen.

The Similkameen country has a new townsite, Copperfield, on the market, and it is apparently located in the right place, namely, directly at the foot of Copper mountain, and close to the largest mines in that section. The townsite is owned by Smith Curtis, who is now in that country, looking after his interests, but is expected in Phoenix in a few days.

Robert Barr has been appointed agent for the new town in Phoenix, and is making his headquarters at the Bellevue hotel. Mr. Barr returned from the Similkameen last week Friday, and is enthusiastic in regard to the prospects for the new city owned by the worthy member from this riding. Two years ago Mr. Curtis purchased from Captain S. F. Scott his pre-emption of 310 acres, located at the confluence of Whipsaw creek and Similkameen river. Even then he had an eye to the possibilities of a prosperous town being built when the mines of Kennedy and Copper mountains were in a sufficient state of development to support a place. Mr. Curtis evidently believes the time is fast approaching, for he has had the town platted by Jas. Hislop, P. L. S., and the lots are now on the market at low figures.

Speaking of his new townsite, Mr. Curtis recently said:

"The development of the mines of Copper and Kennedy mountains in the near future will support a good-sized place with their payroll. Between these two mountains there are few places suitable for such a town. Copperfield is at the foot of Kennedy mountain right across the Similkameen river is Copper mountain, within easy distance. Besides numerous mineral claims, several of which in my opinion will unquestionably develop into mines, there is along Whipsaw and Nine Mile creeks and the Similkameen river, measures, that when opened up, will support a large payroll.

"Immediately below the townsite there is a splendid site for a smelter, with an abundance of water, and if the future justifies the erection of a plant, the product of both Kennedy and Copper camps could easily be trammed down the mountain side at slight expense. Just as soon as I can complete my arrangements I shall have the townsite cleared, and a good hotel built. Meanwhile I intend to make myself thoroughly acquainted with the district, by putting in the summer here."

Back From Franklin Camp.

D. D. Munro, who has been spending a month in Franklin camp, up the north fork of the Kettle river, returned last Wednesday. He was selling off a stock of goods for Megaw, of Grand Forks. About a hundred men were working in and around the camp, but the assessment work is now practically done for the season.

Superintendent Noble has begun work on the wagon road up to Franklin camp, and it is expected that the sum now made available by the government, some $8,000, will build a good road from Lynch creek up about 16 miles further. Mr. Noble now has 60 men on the work, but a considerable sum must be spent on a bridge that will have to be built.

New Town is Called Beaverdell.

The owners of the two townsites of Beaverton and Rendell, adjoining each other on the west fork of Kettle river, have decided wisely to combine their interests, the amalgamated place to be hereafter known as Beaverdell—a combination of both the former names. A stock company with a capital of $50,000 is to be organized at once to take over the townsites. There has been a good deal of opposition between the two townsites heretotore, but now all parties interested will work together for the building up of a large and prosperous place on the west fork, which that section is undoubtedly capable of supporting, as it has some of the best mining properties in the Boundary.

Just eleven votes were cast last Monday by the ratepapers on the proposition re hypothecating the city debentures for $10,000 with the Bank of Montreal. Every vote was in favor of the proposition.

20-ROUND CONTEST

To Be Held in Phoenix on Labor Day.

MARTIN DENNY VS. DAL HAWKINS

Will Be a Great Event—Both are Fast Men, and Will Put up a Good Contest on September 2nd.

In connection with the Labor Day celebration, which will be held in Phoenix on September 2nd, there will be held one of the best glove contests yet seen in the Boundary country. The arrangements were completed this week to bring Martin Denny and Dal Hawkins together on that date.

It will be remembered that these men had a contest on Dominion Day in Grand Forks, and those who witnessed the contest, which was declared a draw, all agree that it was one of the best yet held in these parts. Both men have many friends, who are confident each can win.

Hawkins is the light-weight champion of the world, and in ten years, it is said, that he has never been defeated but once. Martin Denny is the light-weight champion of Australia, and has been in 47 contests, in none of which has he ever been knocked out. Hawkins won the light-weight championship from Martin Flaherty at Carson City, Nev., at the time that Fitzsimmons whipped Corbett. Both men are fast and strong and will certainly put up a good contest.

There will also be some preliminary bouts the particulars of which will be announced later.

Everything in connection with the celebration is going on in shape. This week thousands of envelopes, bearing the advertisement of the celebration on both sides, have been distributed among the business men of the city for use this month. The committee have arranged with the C. P. R. for a special passenger train to leave Cascade about 7 a. m. on Labor Day, which will run through to Phoenix, stopping at Grand Forks, Eholt and also at the B. C. Junction. Those coming up from Greenwood and Midway will probably take private conveyances.

Our Mines AND Smelters.

LATE NEWS NOTES FROM THE SEVERAL CAMPS.

For the last week the ore treated at the Granby smelter, at Grand Forks, amounted to 4,463 tons.

The No. 7 mine, in Central camp, is making small snipments regularly to the Mother Lode smelter at Greenwood.

The Bullock diamond drill, operating for some weeks on the Idaho, was transferred last Monday to the underground workings of the Brooklyn.

Today is pay day with the mines of Phoenix, and in the neighborhood of $40,000 worth of pay checks will be distributed among the delvers for precious metals.

It is said that the coal measures recently located up the north fork of Kettle river are of considerable importance, and that the Granby Co. has an option on the locations and will test the properties.

The Golden Crown Mines, Ltd., the new corporation that succeeds the Brandon and Golden Crown Co., Ltd., has levied an assessment of one cent per share. Operations at the property, two miles east of Phoenix, will be resumed shortly.

The single furnace of the Greenwood smelter has been running steadily from February 18th last, and up to July 31st had run through 59,839 tons of ore, mostly from the Mother Lode mine. The daily average for five months is 371 tons, and during the month of July 11,943 tons were treated, an average of 385 tons. It is expected that the new furnace, recently ordered, will be installed some time in November, which will double the output of the reduction works.

PHOENIX BRANCH ORE SHIPMENTS.

The following table gives the ore shipments of Phoenix Branch and other Boundary mines for 1900, for the past week, for 1901, and the total to date:—

	1900	Week	1901	Totals
Old Ironsides, Knob Hill and Victoria	64,533	5,431	133,031	197,564
B. C. Mine	19,494	760	30,476	49,970
Golden Crown	2,500	....	....	2,500
Winnipeg	1,075	....	....	1,125
Athelstan	1,200	....	550	1,750
Snowshoe	300	....	375	675
Brooklyn	150	....	....	150
R. Bell	....	40	340	340
Totals, tons	89,252	6,231	164,772	254,074
Mother Lode, Deadwood,	5,340	2,368	51,147	56,487
Other Boundary mines	3,180	....	500	3,680
Grand Totals, tons	97,772	8,599	216,419	314,241

FORGER LOGAN BROKE JAIL.

And is Now Probably Residing in Uncle Sam's Land.

A man giving the name of John Logan, with several aliases, was arrested Sunday evening by Chief of Police McMillan out near the Athelstan mine, charged with passing forged checks.

It appears that the day before he passed a check at the Maple Leaf hotel for $13, purporting to be signed by Joe Taylor. He also tried to pass one for $75 at the store of the Hunter-Kendrick Co., Ltd., but was unsuccessful. This was supposed to be signed by Tom Kirk. When arrested still another was found in his possession for $23, signed by Kirk, all being drawn on the Eastern Townships Bank.

Logan's examination was held before Police Justice Williams, and he was held for trial at the county court, the evidence being very clear. This occurred Tuesday evening. Early Wednesday morning it was discovered that the bird had flown, and has no since been heard from. He probably made tracks straight for the other side of the international boundary line.

In some unaccountable manner he had secured a hammer, and with little trouble pried off some of the boards of the ceiling of the cell in the jail, then dropped down into the jail proper and walked out the front door, there being no one else in the building at the time except a drunk. The latter also tried to escape, but was caught by Night Watchman Flood, and brought back. The provincial authorities were promptly notified and given a description of the forger, but up to the date of going to press nothing further was heard of Logan. The jail has since been repaired.

Logan was recognized by Dan O'Leary as the same man who a short time ago was found stealing from the room of proprietor of a hotel in the city of Nelson.

After Logan had left for other parts, the following was found in his cell, which is here given verbatum:

"Dear Judge:—I hate to leave you, but it is rather warm in here. Give my regards to McMillan and Flood. Tell them to write to me at Republick. I like these ventilated jales very much. Hoping not to see you again, with best wishes, JOHN LOGAN.

"Excuse writing—it is dark."

Largest in the Boundary.

When the McMillan block is completed, located on the corner of First street and Dominion avenue, it will have four of the largest panes of plate glass ever brought into the Boundary. Each of these panes is 10x13 feet in size, and together they represent a cost of about $1,000. They required an entire flat car to transport them here from the coast, and as the case stood on end there was little room to spare when the car went through the tunnels. M. Madden, the contractor, is now putting these mammoth sheets of glass in place.

Work of the City Council.

At Wednesday's meeting of the city council all the members were present with the exception of Alderman McInnis. A communication was read from Dr. Gordon, asking for the payment of the $500 from the city to the Phoenix General Hospital.

The finance committee recommended that the following bills be paid:

McPherson Bros., lumber for flumes and sidewalks	$462 36
McRae Bros. & Smith	2 45
Pioneer Publishing Co.	17 50
Jail rent for August	10 00
R. B. Kerr, salary	40 00
R. B. Kerr, expenses	2 50
H. R. Blunt, city engineer	89 30
Hunter-Kendrick Co., Ltd.	3 50
Morrin, Thompson & Co.	135 22
Total	$766 83

Street Improvements Temporary Loan By-Law No. 25 was finally passed and Alderman Punch gave notice that he intended to introduce a street grade by-law amendment by-law.

New Hoist Has Arrived.

The new hoist to be used by the Granby Co. in the preliminary work of sinking for the main five-compartment shaft, arrived yesterday and was hauled to the site, where a hole ten or fifteen feet deep has already been made by hand. The new machine is a 5x5 hoist, made by the Jenckes Machine Co., Ltd., of Sherbrooke, Que. The work of sinking will now proceed with all speed. From below the work of raising to meet the force of men sinking is proceeding steadily.

Plans for Church of England.

Plans are being prepared for the new edifice to be erected by the Church of England in Phoenix, and in another column of the Pioneer will be found the call for tenders for the erection of the same. The building, which will be erected at the corner of Victoria avenue and Second street, will probably cost in the neighborhood of $1,200 or $1,300, and will be put up at once. The new building will have a seating capacity of about 100 persons and the interior wood work will be of coast cedar, finished in oil. There will be a chancel and two trancepts, and a nave capable of extension. The windows will be of cathedral glass.

ON THE RAWHIDE

Raise and Shaft Connected on Tuesday.

PROPERTY SAID TO BE LOOKING WELL.

Contractor Gillis Continues Development on This Well Known Property—Fought Fire This Week.

For some time two forces of miners have been working on the Rawhide, owned by the Dominion Copper Co., with the intention of connecting the shaft and the long tunnel. One gang has been raising and the other sinking, and last Tuesday the two met. This makes the shaft 180 feet deep to the tunnel level, this tunnel being in about 600 feet from the portal. It will be remembered that an excellent body of ore was encountered in this shaft shortly after it was started last spring, and in fact the present management of the company has been very successful in uncovering more than one ore shoot on this property. Joseph N. Gillis has been doing most of the work on the Rawhide by contract, and it is understood has given satisfaction to the management. He has also been doing some drifting and crosscutting in the tunnel in various places.

Been Fighting Brush Fires.

This week Mr. Gillis has had his men out fighting brush fires, which seemingly originated on the Bank of England claim, adjoining the Rawhide. It is thought that the fires started from the sparks from the C. P. R. locomotives, which are constantly passing up and down. At any rate the powder house, in which the Hunter-Kendrick Co. had 250 cases of powder, was in danger, and that firm had the explosive removed to a place of safety. Mr. Gillis got his men out two days to fight the fire, and several men were also sent out by the Granby Co., together with several members of the Phoenix fire department, to assist in confining the flames. Fortunately, they were successful, although it looked serious two or three different times.

GETTING THEIR NEW CERTIFICATES.

Granby Company Is Now Prepared to Issue to the Old Stockholders.

Geo. W. Wooster, liquidator of the four companies that have been consolidated as the Granby Consolidated Mining, Smelting and Power Co., Ltd. has sent notices to all old stockholders that the new company is now ready to issue the new certificates. The shares will be issued in the following proportion:

To the shareholders of the Knob Hill Gold Mining Company of British Columbia, Limited, 250,000 shares, in the proportion of one share of new stock for every six shares held in the old company.

To the shareholders of the Old Ironsides Company, 250,000 shares, in the proportion of one share of the new stock for every four shares held in the old company.

To the shareholders of the Grey Eagle Gold Mining Company, Limited, 225,833 shares, in the proportion of one share in the new company for every six shares held in the old company.

To the shareholders of the Granby Consolidated Mining and Smelting Company, Limited, 484,800 shares in the proportion of one share for every six and two-third shares held in the old company.

WAS MERELY A FAMILY JAR.

Slight Friction on the Hill Has Been Amicably Adjusted.

Last week there was a little misunderstanding between some of the carpenters employed by the Granby Co., and Wm. Yolen Williams, the popular superintendent, in regard to the repairing of a bridge of the C.P.R., for the purpose of keeping up the ore shipments from this camp uninterruptedly. This week Mr. Williams met those interested in the matter, and after due consideration by both sides an adjustment was arrived at that was satisfactory to all. While the greater part of the carpenter work to be done till the large new buildings go up later in the year, is already finished, Mr. Williams has already put several carpenters at work, and will put on more as needed.

Those who conferred with Mr. Williams are not slow to appreciate the consideration which he showed them. On his part, Mr. Williams says that the company is not looking for trouble, but is in the business of mining, and wishes to get along amicably with the employees. As he puts it, it was merely a little "family jar," which is now over. Probably no mining superintendent in Kootenay or Yale is more popular with his employees than is Mr. Williams.

A new blacksmith shop, 20x30 feet in size, has just been completed at the Brooklyn mine.

VERY GENERALLY CRITICISED.

The memorial recently sent by the Mine Owners' Association to the government at Ottawa, praying for relief from a number of troubles with which the mining industry is said to be afflicted, is coming in for a large share of criticism from those who look the conditions squarely in the face. The list of complaints is a long one, and there is not the least chance of most of them receiving any attention whatever. Some of them call for provincial and some for Dominion relief, but they are all bunched together, and sent to the governor-general. It would appear that more was expected from the publicity given the matter than from the officials addressed themselves. At any rate the criticism against the memorial is very general and is coming to the front from all directions.

In one respect, at least, the memorial asked for something reasonable, and that was the readjustment of the present two per cent tax on gross ore output. It is certainly unreasonable that a low grade mine should pay the same tax as a mine producing high grade ore. If the tax had been made two per cent on the net returns, it would have been in some degree more equitable. As it is, it is in no small degree burdensome, and should be rearranged. This we believe will be done by the next legislature.

It is not to the credit of the men in the Mine Owners' Association that their names are connected with such a document as a whole, and this they will discover in due time.

LITTLE MONEY IN NEWSPAPERS.

The recent sale of the plant and good will of the Nelson Miner by the sheriff impelled the editor of the Nelson Tribune to make some extended remarks in regard to the lack of profit in the newspaper business generally in southern British Columbia. He took up each section in turn and turned on the searchlight of common sense, showing how poorly paid the profession is as a rule. It made interesting reading. He believed that one daily in Rossland and another in Nelson would serve the purpose, and possibly each might make a living, while now all of them are steadily running behind. And the same could be said of the weeklies all over the Kootenays. There are too many of them for the population. Half the number could cover the ground to better advantage, and the owners might have a chance to get even, after the printers and paper makers were paid.

Undoubtedly there is a great deal of truth in this. The adage that "fools will rush in where angels fear to tread," fits the case to a nicety. But it is also more than probable that this state of things will continue indefinitely, or as long as there are printers who have the longing to pose as editors and proprietors—be it of ever so humble a sheet. There are indeed too many papers in the country, but as yet none of those writing on the subject have volunteered to set a good example by stepping down and out for the benefit of those who are left behind in the journalistic field. They cannot all be Horace Greeleys, but there are a large number who propose to try it. For the amount of good honest work done for their respective communities no body of men receive as little for it as the average newspaper publishers in small towns.

EDITORIAL COMMENTS.

No change is reported at Rossland in the labor strike. It appears to be a case of wait, and a long wait at that.

Unless all signs fail, there will be more people in Phoenix to celebrate Labor Day this year than were ever before gathered together in the Boundary country on a similar occasion.

On account of delays from strikes in Chicago, the Granby smelter at Grand Forks, will not blow in the two additional furnaces till on or about the 1st of October. The new matte converter will also begin operations about the same time.

Last Saturday the first issue of the Grand Forks News, under the management of E. D. Hall, formerly on the staff of the Pioneer, made its appearance. It is an eight-page weekly, printed on good stock, and is full to the brim of news of the smelter town.

More than a thousand tons of ore each 24 hours went out of Phoenix over the C. P. R. several days this week, to the Granby smelter at Grand Forks. Even this quite respectable tonnage will be exceeded in the early fall, when some 1,300 tons per day will be shipped.

"The Mineral Industry, Its Statistics, Technology and the Trade for 1901" has just been published by the Scientific Publishing Company of New York. This is a recognized authority the world over, but when it speaks of the "Ironsides group in the Slocan district," it is time its data on British Columbia was revised.

Labor and capital interested in the steel industry in the United States have locked horns in what it appears will be one of the greatest contests of the age. Neither, it is said, will give any quarter. Here again is a case where compulsory arbitration might save untold thousands of dollars to both sides in the struggle.

WHAT THE EDITORS SAY.

What the mines are doing for Phoenix, the smelters will do for Grand Forks—build for us a large and flourishing city.—Grand Forks News.

The Cape Town man who suggests sending Boers to settle in British Columbia had better call himself in. We don't want any white-flag artists and murderers of wounded men in this province.—Province.

The present two per cent tax on the output of the mines means a 30 per cent on the net profits of some of the low grade Boundary ores—a tax that would not be tolerated nor paid on any other industry—Greenwood Times.

The Victoria Colonist gave David B. Bogle, the only magazine writer in the province, a free hand to write a reply to the Mine Owners' Association Memorial. It is needless to say the reply logically demolishes the memorial.—Nelson Tribune.

The United States government is talking about building a $10,000 assay office in Seattle principally to handle Canadian gold. If the Ottawa authorities know what they are about, they will see to it that not much of our gold reaches the Seattle establishment.—Colonist.

Smelter talk in its most virulent and contagious form is still prevelent in Kaslo. Citizens of that town are ambitious to become smoke eaters and they hope to jerk their town into an arena of prosperity permeated with smelter fumes. It is going to be a hard up-grade pull, however, and Kasloites are beginning to recognize that the obstructions to the city's success in this matter are to be found not without but within the city itself.—Sandon Paystreak.

Can Do No Good.

The minister of mines concluding a lengthy interview with a coast paper last week said:

"I, personally, am very sorry that the mine owners have taken the course they have, not so much from a political point of view, as from the fact that their representations can do no good, and, if anything, will do harm to the industry represented by them. As minister of mines, it has been my aim to offer every encouragement possible for investment of capital, and to cooperate as far as possible with those who have interests in this country, at the same time endeavoring to hold the balance evenly and impartially as between the employer and employee, recognizing that the interests of the owner is equally important to that of the other, and that the prosperity of both is essential to the prosperity of the country in general."

UNITING GRAND FORKS AND COLUMBIA.

Some of the Propositions That Have Been Made.

The negotiations for the amalgamation of the adjoining cities of Grand Forks and Columbia are still in progress.

Columbia's proposition is that the two cities be divided into three wards in such a way that what is now the city of Columbia, or at least the portion of it west of the C. P. R. track, shall constitute one ward, the intervening portion of it between the two towns shall be the center ward, and the city of Grand Forks shall be the third ward, each ward to have two aldermen.

It also calls for $50,000 in debentures to be floated and the money to be expended by the present mayor and council of Columbia in the improvement of that place and for paying off the present indebtedness. This would make the bonded indebtedness of Columbia $50,000 and that of Grand Forks $150,000, which it is proposed to consolidate in a joint loan of $200,000, any excess of the two amounts named being a special debt of the city incurring the same.

Both places are to consent to the location of the V., V. and E. depot at the dividing line between the two towns, and each is to furnish the road, free of cost, whatever land it may need for depot or other purposes, the depot to be located in one town and the freight sheds in the other, subject to the decision of the railway.

It is also stipulated that a union central school shall be established on the boundary line between the two towns, and that each town shall have alternately the choice of mayor, Grand Forks to have the honor first.

On the other hand, Grand Forks submitted a proposition that the two towns be amalgamated under a name acceptable to the two cities, the C. P. R., and the postal authorities.

It is stipulated that the present indebtedness of the two places be consolidated in one loan of $200,000, to be floated by the joint cities.

The electric light service shall be extended to Columbia, and a 6-inch water main shall be laid up Government avenue to Columbia street, and smaller pipes to the residential streets, hydrants, etc. An electric fire alarm system shall be installed.

A union central school shall be established as nearly as possible in the center of the city, and ultimately ward schools shall be established.

The city shall be divided into three or six wards, as may be decided, according to the provisions of the municipal act. In any event, there must be six aldermen.

Depot and yard grounds are to be furnished the V., V. and E. railway at the joint expense of the two cities at whatever point may be decided upon.

The mayor of the amalgamated cities for the first twelve months to be a resident of Grand Forks, and for the ensuing twelve months a resident of Columbia.

Neither city to issue any further bonds until amalgamation has been effected, and the issue to be a join one.

Labor Day in Greenwood.

In another column will be found the announcement of the festivities which are intended to be held in Greenwood on Labor Day. The business men of Greenwood are a progressive lot and never do things by halves. This being the case, they will doubtless have a creditable celebration. It is perhaps unfortunate that both Phoenix and Greenwood should elect to celebrate the same day, but, as there are to be so few celebrations elsewhere, there will be crowds enough for both.

Notice to the Public.

What we Prophesied

LAST APRIL we prophesied that Phoenix would be shipping more ore than any camp in British Columbia before the end of the year.

Over 250,000 tons of ore have been sent out over the Phoenix branch of the C. P. R. since July, 1900---one year; and this camp is today producing more ore than any mining camp in the Province.

PHOENIX WILL SHIP AS MUCH ORE IN 1901 AS ALL OTHER CAMPS IN BRITISH COLUMBIA TOGETHER.

Let us tell you something more about Phoenix and its possibilities for investment. Correspondence promptly answered.

RUMBERGER & TAYLOR, PHOENIX, B. C.

IS AGAINST PROVINCE

Recent Memorial of Mine Managers' Association.

SOME ARGUMENTS PUNCTURED

David B. Bogle Thinks the Whole Document Weak, Inaccurate Disingenuous, and Fatuously Impolitic.

David B. Bogle has written a letter to the Victoria Colonist embodying his views in regard to the recent manifesto sent out by the Mine Managers' Association, which, generally speaking, can hardly be said to be favorable to the manifesto, or the men who formulated the document. The troubles complained of were many, and Mr. Bogle comments on some of them in these words:

When the memorial talks of the extension of the eight-hour law to certain surface employees, it intends to raise a spectre of rampant and too hasty legislative changes in the conditions obtaining between labor and capital. The legal status altered by this law affected only an infinitesimal number of men, men who had the safety of the mines in their charge, and merely gave legal sanction to the system already in vogue. Did this law change the hours of 20 men in the province of British Columbia? I do not believe it did.

The unreasonable demands for information consist only in asking for what every reputable company supplies to its shareholders and the press every month, and what disreputable companies endeavor to conceal from them.

As for the signal code, a uniform signal code is an advantage. If the legislation complained of has not brought about a workable uniform code, let it be amended till it does. It is a mere triviality to introduce such a thing in a memorial of such portentous gravity.

The provincial Master and Servant Act is, I presume, objected to for the same reason as the Dominion Alien Labor Act. To conclude, the uncertainty and apprehension under which capital is kept are not likely to be allayed by the memorial in which the alleged causes of that apprehension are described.

That is the whole case. It is not a complaint against legitimate grievances nor an appeal for necessary reforms, but an indictment against the province. It is based upon a supposed condition of affairs which does not really exist and buttressed by an ex parte and disingenuous citation of circumstances, which are distorted from their true meaning and unfairly applied in their real bearing. The memorial is weak, inaccurate, disingenuous and fatuously impolitic. It is apparently designed to lower the credit and sully the reputation of the province among outsiders who are unable to discriminate between the truth and the falsity of the statements which it contains, and apt, through ignorance, to accept without question the inferences which it draws.

It has unfortunately been endorsed by an association containing men eminent in the profession and practice of mining who have doubtless accepted the general principle of making a complaint about matters wherein legislation might improve the conditions under which they work, but who have not taken the trouble to investigate the statements contained in the memorial, nor to consider its actual effect. It would be decidedly to the advantage of the province and to that of their own reputations, if gentlemen in that position were to withdraw from an association which has destroyed its reputation and prostituted its representative position, which remains an instrument of evil with no longer the possibility of accomplishing any good.

Pert and Pertinent.

"Why did the sidewalk?"
"Because the elevated road"
"How did the cake walk?"
"The clam chowder how."
"Why was the Venetian blind?"
"Because the circular saw."
"Why is Russell Sage?"
"Because he gave Henry Clews."
"Can the sardine box?"
"No, but the tomato can."
"Why did the brandy smash?"
"To make the bar tender."
"Why wasn't Shamrock II?"
"Because she was built in nineteen hundred and won."

For Sale—5-Octave Piano. Apply to Mrs. W. B. Willcox, Grey Eagle ave.

IN AND AROUND PHOENIX

AND ELSEWHERE

J. E. Mills went to Rossland by Monday's train.

The Nelson smelter is now treating about 140 tons of Silver King ore per day.

C. W. Abbott has been called to California by the serious illness of his father.

Last week only 180 tons of ore were shipped from all the mines in Rossland.

Ward Lowery left on Monday's train for a two months visit to his old home in Ohio.

Alfred McMillan, after spending ten days at the Snowshoe, went back to Rossland early this week.

A force of 120 men is employed at the Slocan Star mine and mill. Shipments amounting to 186 tons were made last week.

Some 50 men have recently been put to work on the Whitewater mine in the Slocan, which had been closed down for some time.

John Slinn, of the firm of Slinn & McCague, proprietors of the City Bakery, has sold out to his partner and gone to the Lardo.

Kelly's Merrymakers—consisting of Mr. Kelly and his versatile wife—appeared at Miners' Union hall last week Friday before a small audience.

The sum of $2,500 has been made available for the construction of a wagon road from Eholt to Long Lake camp, and the work of building it has commenced.

A special meeting of the board of license commissioners, for the Boundary Creek License District, was held at Cascade last Tuesday, to pass upon several applications in that locality.

Ratepayers in Greenwood will vote next Monday on the bonus to give the local smelter a bonus of $3,600, by making the company a present of 20-year, six aer cent debentures. It will probably carry.

One of the famous Shay locomotives, for some time in use on the Rossland hill, is to be utilized shortly in hauling ores from Phoenix to the Granby smelter. The advantage is its great hauling capacity.

Harvey E. Mitchell, formerly in the tailoring business in Phoenix, is now working some claims at Rendell, on the West Fork, one of which, the Gold Drop, was recently bonded for a good sum. Mr. Mitchell was in town on a visit last Saturday.

Some 7,000 acres of coal land have been staked at the headwaters of the north fork of Kettle river. Among the stakers are H. G. S. Heisterman, W. A. Harkin, R. R. Gilpin, A. G. Fraser, H. P. Toronto, E. D. Doberer, Wm. Wiseman, J. L. Wiseman, M. Miller, G. A. Fraser and Jos. Ward, all of Grand Forks.

Mining as an Industry.

There is yearly as much money invested in mining as there is in banking, but banking does not prove as safe or as profitable as mining. In a time of prosperity the average banking dividend seldom exceeds 8 per cent a year. . . . That mining produces quicker and greater profits than any other industrial pursuit is evidenced by the scores of multi-millionaires."—National Banker, of Chicago.

EXTRALATERAL RIGHTS.

Apex Matter Starts Another Case of Litigation.

British Columbia jurisprudence is to be enriched with another long, costly lawsuit in which the question of extralateral rights will be the main points at issue. It is fortunate for the province that the source of litigation has been done away with for claims located since 1892. The case is described as follows in an exchange:

"One of the most important suits which has been entered since the celebrated War Eagle and Centre Star mining suit, will come up for hearing at the next sitting of the supreme court, in October.

"The case arises out of an action entered by S. S. Taylor, K.C., on behalf of the Star Mining Company, of Sandon, owners of the Heber Fractional and Rabbit Paw claims, adjoining the Slocan Star, for $500,000 against the Byron N. White Company, owners of the Slocan Star. The latter company are following a lead, the apex of which they claim is on their property, whereas the Star Mining Company claim that the apex is on the Heber Fraction.

"The plaintiffs state that large quantities of extraordinarily high grade ore have of late been taken from their property by the people of the Byron N. White Company.

"The suit involves the difficulty and complex question of the apex, arising under the old mining law, as all these claims were staked in the years 1891-92, and the properties in question are some of the most valuable in the Slocan. A receiver and an injunction have been applied for in connection with the suit."

Thanked by the Eagles.

The following resolutions were carried and recorded upon the books of the Fraternal Order of Eagles Sunday, July 28th, 1901:

"Be it resolved, That the Phoenix Aerie, No. 158, F. O. E., hereby tenders a hearty vote of thanks to all who took part in making our first social smoker and entertainment the grand success which it was.

"Be it further resolved, That a special vote of thanks be tendered the boxing and wrestling teams who exerted themselves so earnestly in our behalf upon that night, and to the Phoenix Pioneer for the many courtesies extended to this body and space devoted to our attention in connection with this and other business pertaining to the order."

Boundary Man in the Phillipines.

Eber C. Smith, the founder of the Grand Forks Gazette, is now a resident of Manila, Phillipine Islands. Mr. Smith was well known in Southern British Columbia, and went to the antipodes about six months ago. For a time, it is learned from a recent letter, he was city editor of a Manila daily—one of those papers the very appearance of which would give a modern newspaper man the jim-jams.

But Mr. Smith has a scheme, to start a daily there with American press dispatches, something for which he says there is a long felt want. By this time the daily has probably made its appearance, and should be a success, as Manila has 10,000 white people and over 300.000 natives.

Go to Zimmerman for watches, clocks and jewelry. Opposite Eastern Townships Bank.

NOTICE OF DISSOLUTION.

Notice is hereby given that the partnership heretofore subsisting between us, the undersigned, as wholesale liquor merchants in the town of Cascade and City of Phoenix, British Columbia, under the name, title and firm of V. Monnier & Co., has this day been dissolved by mutual consent. All debts owing to the said partnership are to be paid to Victor Monnier at Phoenix aforesaid, and all claims against the said partnership are to be presented to the said Victor Monnier by whom the same will be paid.

Dated this 10th day of June, A. D., 1901.

Who carries a large stock of Fine English, French and Scotch Tweeds and Serges. Only union help employed.

The Local Grist.

Dr. Mathison, dentist, Greenwood, both phones.

B. Tomkins left for Trail on Thursday's train.

Rev. Kinney will occupy the pulpit of the Methodist church at Grand Forks tomorrow.

Dr. McDonald will be at his dental office, Phoenix, from the 10th to the 13th of August.

Wm. Yolen Williams went to Spokane last Saturday, returning Tuesday of this week.

Thursday evening five new members were taken into King Edward Lodge, U. D., A. F. and A. M.

W. J. Morrison, one of the owners of the Morrison Anderson block, was up from the Forks last Monday.

Secretary J. E. Billings, of the Yale-Columbia Lumber Co., Ltd., was registered at the Victoria Wednesday.

Forbes M. Kirby, one of the best known land surveyors in the Boundary, has been visiting this week in Phoenix, accompanied by Mrs. Kirby.

George C. Tunstall, the Giant Powder representative of Nelson, arrived in the city Thursday, on one of his periodical trips through the Boundary.

Mrs. P. L. McKelvey, formerly of Rossland, has taken over the rooms and dining room of the Stemwinder hotel (formerly known as the Palace).

Martin Madden expects to complete his contract on the McMillan block next week. This is one of the best business and office buildings in the city.

Fire Chief Hemenway has received an invitation to attend the convention of Pacific coast fire chiefs to be held at Tacoma, but will be unable to attend.

A. H. McNeill, of Rossland, arrived in town yesterday to arrange for the grade crossings of the V., V. & E. railway, he being solicitor for that company.

There is a report current that the mine managers at Rossland are willing to concede the advance in wages asked by the striking miners. It is yet to be confirmed.

T. L. Buckton and Will Tilton took a little trip down to Cascade and Christina lake this week. They report good success at Sutherland creek with the fishing line.

Assessment work on the Moscow fraction, owned by Alex Douglass and Jack Dempsey, was completed last Saturday. The property is close to town and adjoins the Moscow.

O. W. Dey, the C. P. R. agent here, who has been taking his annual vacation in the east, visited the Pan-American exposition this week. He is expected home early next week.

B. I. Wood, merchant tailor of Greenwood, lost his two-story building and stock by fire last week Friday, on which there was some insurance. The origin of the fire is yet unknown.

Parson Kinney of the Methodist church, has had his coat off this week, making additional pews for the large congregations which he is having each Sunday night at the school house.

Anthony J. McMillan, manager of the Snowshoe mine, who has spent the winter in London, and who has arrived on this side of the water, is expected in camp today or Monday.

The usual services will be held in St. Andrews Presbyterian Church tomorrow at 11 a. m. and 7:30 p. m. conducted by the pastor, Rev. J. M. Millar, M.A. All cordially invited.

John J. McDonald, the saw mill man, formerly located in Phoenix who has been operating at Loomis for some time, is now putting in a mill at Similkameen City, Frank Bailey's townsite.

Col. Jack Egan, one of the best newspaper men in the Kootenays, and for a long time connected with the Rossland Miner, is reported to have taken editorial charge of the Nelson Miner.

George D. Curtis, the Nelson architect, was over from that city this week, in connection with the new McMillan block and the edifice for the Church of England, for both of which he drew the plans.

Lately the brick masons have been doing a big business, owing to the order by the city authorities to do away with stovepipes through roofs. There are a number yet that should be built.

J. B. Boyle, the druggist, and Geo. E. Dey, watchmaker and jeweler, moved into new quarters on Knob Hill avenue last Moday, and are now conveniently located and prepared to meet their friends.

J. E. Keogh, manager for E. Spraggett, the Grand Forks saw mill man, spent several days in the city this week. He does not think Mr. Spraggett will rebuild his recently burned mill at Smelter lake.

Dan Grady, a blacksmith, has been arrested at Grand Forks for horse stealing. He is accused of having stolen two horses belonging to Mrs. Polly Thornton, of Midway, and disposing of them at Cascade for $25.

Last Saturday was the first pay day on the city street work. On the Bell & McBeath contract the sum of $484.60 was paid to the laborers, and on the day work being done by the city the sum of $280.80 was disbursed.

David A. Stewart, the first pastor of the Phoenix Presbyterian church, is now doing relief work at the coast cities, filling some of the largest pulpits in that section. He intends to visit Phoenix before his return to Manitoba.

Engineer McCarty and a party of V., V. and E. surveyors arrived in town Tuesday from near Grand Forks, and will be here a few days making some changes in the railway lines already run. The camp is on the Idaho claim.

A. F. McMillan, of Spokane, spent a day in the city this week, having just returned from Ottawa and Toronto. Mr. McMillan still has the greatest faith in Phoenix, and is showing it by erecting one of the best business blocks in the city.

Joseph S. Carter, travelling passenger agent of the C. P. R., with headquarters at Nelson, was in the city yesterday, in regard to arranging for the transportation for the Labor Day celebration to be held in Phoenix September 2nd.

Some time since the Phoenix Board of Trade asked the management of the C. P. R. to provide some eating accommodation on the Boundary trains, for the convenience of the travelling public. As a result the train to Rossland now stops for 25 minutes at Grand Forks to permit passengers to regale the inner man.

Wednesday evening the ladies of the Church of England gave a fruit festival and dance at Miners Union hall, for the benefit of the building fund. There was an excellent attendance, and the ladies' exchequer received an appreciable addition. The dancers enjoyed themselves till the early hours the next morning. The receipts were $137.

Rev. W. G. Mahon, well known throughout East Kootenay as the workingman's friend, will preach evangelistic sermons for Rev. Kinney tomorrow at the school building. Subjects as follows: At 11 a.m., "A Vital Movement"; 3 p. m., Sunday School; 7:30 p. m., "Our Saviour's Lament." All are most cordially invited to attend these services.

Some miscreants appropriated the spoons, dishes and edibles that were left in Miners' Union hall last Wednesday evening after the dance given by the ladies of the Church of England. The ladies feel badly about it, as the articles taken were personal property and cannot be replaced easily. It is hard on the ladies, after their arduous labor, to be robbed in this scandalous manner.

MINERAL ACT.
Certificate of Improvements.
NOTICE.

Wheeling Mineral Claim, situate in the Kettle River Mining Division of Yale District. Where located: In Greenwood camp.

Take notice that I, George W. Rumberger, Free Miner's Certificate No. B 40,388, for myself and agent for John Milligan, Free Miner's Certificate No. B 40,328, intend sixty days from the date hereof to apply to the mining recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above named claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 9th day of August 1901.

39-48 G. W. RUMBERGER.

Call For Tenders.

Tenders will be received for the building of the English church at Phoenix, B. C., at the office of Messrs. Aldham & Blunt, Phoenix, B. C. Tenders to be in by Thursday, Aug. 22nd, 1901. Plans and specifications can be seen at the above office after Aug. 15th. The lowest or any tender not necessarily accepted.

APPLICATION FOR TRANSFER OF LIQUOR LICENSE.

Notice is hereby given that I will make application to the board of License Commissioners of the City of Phoenix at its next meeting for a transfer of the liquor license now held by me, to sell liquor by retail in the Butte Hotel, situate on Dominion Avenue, City of Phoenix, to Frank Goforth.

C. W. ABBOTT.

Dated this 3rd day of August, A. D., 1901. 38-42

Copperfield

AT Junction of Whipsaw Creek and Similkameen River, at the foot of Copper and Kennedy mountains, famous for their enormous showings of Copper and Gold ores, nine miles above Princeton. Copperfield is the natural Smelter City and mining center for this district and south to the international boundary. Several hundred horse power is already developed in Whipsaw Creek. Large Smelter Site reserved. Coal croppings and exposures under and surrounding townsite, and negotiations are pending for exploitation of adjoining coal measures to the west. Also extensive ranching, fruit and cattle raising.

Mr. Curtis has gone to supervise the platting of lots and will reserve for Phoenix and Greenwood purchasers exclusively a number of the best lots on the business and residential street. First choice to those first applying and paying a deposit to the undersigned. Prices, $65, $55 and $50 for lots on business streets, and $30 and $25 for lots on residential streets. A limited number only will be sold at these prices. TERMS—One half cash, balance in six months. The big boom in the Upper Similkameen mining country is beginning. Why not be in it?
