The largest copper mines in the Dominion are situated at Phoenix. The Granby Co. employs 500 men, and has a monthly pay roll of over $50,000: Two railroads afford access to the city.

THE PHOENIX PIONEER

Devoted to the Interests of the Boundary Mining District

THE PHOENIX PIONEER is published in the highest municipality in Canada—altitude, 4,800 ft. The city has a population of 1,500, and possesses first-class hotels, opera house, schools

SEVENTEENTH YEAR — PHOENIX, B. C., SATURDAY, AUG. 14, 1915 — NUMBER 5

TO DONATE $2000 EVERY MONTH

Granby's Mine Employees Subscribe Handsomely—Redivision of Fund.

A meeting took place on Wednesday at the residence of J. McLaughlin, of the trustees of the funds raised in Phoenix for patriotic purposes. The purpose of the assembly was to determine on some settled basis for the disposition of the money. It developed during the meeting that the amount for distribution monthly will total about $2000, $1775.40 of which is contributed by the staff and other employees of the Granby mine, and approximately $250 from other sources in and around the city.

After some discussion and careful consideration of the claims of the various societies, it was decided to divide the money as follows: $600 to the Canadian Red Cross; $600 to the War Contingent fund, one of whose cares is the upkeep of the big Canadian hospital at Shorncliff; $500 to the treasurer of the No. 5 B.C. hospital, the entire complement of which are encamped near Victoria awaiting orders to leave for Europe; $100 to the Overseas Club, Toronto, whose special work is the provision of aeroplanes for Canada's army; and about $200, or ten per cent of the aggregate amount, is to be set aside as a fund for the assistance of any local soldiers who may be sent back incapacited after service in the field.

The whole is a splendid choice, and reflects a deal of credit on the committee, who have taken care that all the money shall only be alloted to societies working in collaboration and under governmental authority. The monthly donation to the B.C. No. 5 Hospital was especially a happy decision. The unit is provincial-wide in chaacter, and like the 1st B.C. Regiment, will furnish another glorious link with this mountain province of ours and the fearful scenes of military operations in Belgium and France.

In the matter of the machine guns, the money for two of which is also in hand or promised. the same committee went into discussion on the subject, but no authoritative statement having been given out by the government, the sec.-treasurer, P. B. Freeland, was instructed to obtain from the Ottawa authorities some information on the matter, which to say the least is very perplexing. The following comprise the Phoenix committee in charge of both funds: J. G. Mullen, manager of the local Bank of Commerce; P. B. Freeland, sec.-treasurer; W. X. Perkins, J. McLaughlin and Dr. W. L. Ritchie.

Another Kick

Our friends in Grand Forks have ever possessed the unenviable faculty of rubbing us the wrong way. This time it is the "talented" and versatile Grand Forks correspondent of the Vancouver Province, who in his laudable desire to magnify the patriotic virtues of his fellow citizens, wires the news seawards that Phoenix had only subscribed for one gun. Of course he took care to state correctly that his home city was going to buy a couple. A knowledge of true facts is essential in compiling a despatch, and a greater readiness on the part of the Grand Forks publicity expert, to obtain them when wanted, would be be appreciated in Phoenix. Why on earth the affairs of Phoenix and Hedley should figure in a despatch from Grand Forks is a moot point, but why, we ask, was the trading post of Montreal, or the little Indian village of Toronto omitted. Both of them must surely have purchased a gun apiece.

A site for an alien enemies' internment camp has been chosen on Mount Revelstoke, about eleven miles from Revelstoke. It will accommodate 225 prisoners.

Copper Situation

G. W. Walker, who more than any man in the States, has his finger on the pulse of the world's copper industry, has the following to say of the situation in his weekly letter in the current issue of the Boston Commercial:

"Copper is slightly more active, but at somewhat lower prices than prevailed a week ago. Lake is 18¾ to 20 cents, and electrolytic is 18¼ to 18½ cents a pound. These quotations have been made on transactions in relatively small lots. Signs of increasing activity are making their appearance and the prospect is that another substantial buying movement will soon be under way. There is a growing number of enquiries and some big manufacturers now negotiating for war orders have asked for short options on a large tonnage of copper.

* * * * *

The world's production of copper, with all of the mines and reduction plants forced to their limit, probably is not more than ten or 15 per cent greater now than it was 18 months or two years ago, and it is altogether improbable that another ten per cent could be added to the world's output, even if the price advanced to 30 cents a pound."

British Lee-Enfield Best

Writing from Shorncliffe, Welton Mackay, L. Draycot, formerly of Lynn Valley, but now with the Princess Pats, states that the regiment is using the British short magazine Lee-Enfield. He says this rifle is lighter, shorter and better to handle than other makes.

"Sentiment is cast aside and when we are asked if we prefer the Ross or the British Lee-Enfield, the invariable answer is in favor of the Lee-Enfield.

He goes on to say that on July 8 Lt.-Col. Buller and Major Gault came to renew acquaintance with all that was left of the original Princess Pats, about thirty.

"These officers were like two very dear chums. Colonel Buller had a shade over his right eye (which was knocked out), and Major Gault had his left arm in a sling, and walked with a limp. Both appeared happy despite their wounds, and went along the line talking to every man. After inspection was over Captain Moorhead called for three cheers.

"We sent a draft to reinforce the boys at Armentieres, We now have about 700 men from various universities, and they are certainly a good bunch of fellows and just the kind to keep up the name and honor of the Princess Pats."

Vancouver Exhibition

On account of the above event, which opened on Friday, August 12th and continues until the 21st, the Canadian Pacific Railway are naming a special rate of single fare for the return journey from all stations in the Kootenay district. The tickets are on sale daily up to the 18th of August, good to return till August 25th. Passengers may be routed via the Arrow Lakes, or via Kettle Valley line to Penticton thence through Okanagan Lakes to Sicamous or via Merritt. Preference is allowed to choose the route either going or returning. Berth reservation from any agent, or write J. S. Carter, D.P.A., Nelson.

The season for forest fires has arrived. As the vegetation ripens and dries out, the risk is increased unless kept in check by frequent rains. Every effort should be made by campers, settlers, loggers, and those whose work or pleasure takes them into the woods, to observe the utmost precaution during this month and the rest of the dry season.

The Austrian eagle has two heads. It'll want 'em.

B. C. Mining

A gold-saving machine has arrived in Prince George from Edmonton, made to the order of W. J. Matheson, says the Prince George Post. The machinery is the invention of an old-time prospector, and it is claimed by the inventor that this machine is specially adaptable for saving flour gold. The machine resembles somewhat a fanning mill on a large scale. It is driven by motor power, either steam or gasoline, and is put on a raft which ties up to a bar which is to be worked. Mr. Matheson and his associates in the enterprise will place the machine in operation on the Fraser river.

Lucius W. Mayer, consulting engineer of the Canada Copper Corporation, was in Princton from New York last week, says the Similkameen Star, and in company with Oscar Lachmund, the general manager, visited Copper Mountain. The visit by the engineer at this time means a great deal to Princeton. The company is seriously considering the best means for transporting the ore to their smelter at Greenwood. A railway from Princeton to Copper Mountain and Voigt's Camp has been under consideration for some time, and many are of the opinion that construction work on it will begin this fall.

Weather Forecast

Foster's weather forecast for next week promises to be a varied one. The first disturbance is an exceptionally hot wave that he predicts will last from today, Saturday, until Monday. The secoud is a cool wave accompanied by severe storms and heavy rains, commencing about Tuesday or Wednesday. The latter it is thought, will be exceptionally severe and people on the Pacific coast are especially warned to be careful. Frosts may be expected about Augnst 20th, but whether dangerous to crops or not, is not stated.

Alien Enemies

Owing to the indifference shown by local alien enemies in the matter of reporting regularly, we are requested to issue a warning that any further infractions of the order-in-council will be severely dealt with. There is no provision made for fines, the only course left for the police being the internment of the offender. All alien enemies are warned to report at the provincial police office on the first day of every month, or suffer the risk of imprisonment until the end of the war.

Ready To Leave

The complete details of No. 5 General Hospital, were recently inspected on Macaulay Plains, Victoria, by Major-General Lessard. On parade there were 35 doctors, 73 nurses and 203 rank and file. The men were in full war khaki kit and the nurses wore uniforms of navy blue with crimson red collars and cuffs. Among the platoon commanders on parade was Captain D. J. Millar, formerly assistant to Dr. Ritchie of Phoenix. They have received orders to have their baggage ready for immediate departure.

Distributing Fish

The officials of the Dominion fish hatchery at Gerrard are now busily engaged in distributing and turning loose thousands of salmon trout fry in the waters of East and West Kootenay. All orders are being executed in the order received, and the time for the delivery of the consignment for Loon Lake has been fixed for next Thursday. Arrangements have been made for automobiles to convey the party to the lake for the ceremony.

Patriotic Subscription

From far-away Alaska comes a subscription from a son of the Dominion. Writing from Valdez, on July 26th, Palmer J. Cook, formerly one of the local Granby mine shiftbosses, encloses a money order for ten dollars. No definite instructions for the disposition of the money accompanied it, simply a request that the Pioneer place it where we consider it will do the most immediate good. We have accordingly handed over the donation to Mrs. J. A. Morrin, sec.-treasurer of the Woman's Patriotic Society, whose work on behalf of our own boys is deserving of even more support than has hitherto been accorded them. Although they have forwarded many packages of personal field comforts to Phoenix soldiers in the trenches, a great deal of their activity has been centred on Red Cross supplies, so if there are any others of our subscribers living in outlying points desirous of emulating Mr. Cook's example, the Pioneer would be pleased to acknowledge any sum, however small.

Razors For Soldiers

It having been found impossible to supply sufficient razors for the use of the new army of Great Britain and Ireland, Lord Kitchener has issued another appeal to the people throughout the empire to supply the deficiency. The Cutlers' Company of Sheffield has offered to re-set and fix up any razors that may be donated, and following the example of other towns, it has been suggested that an opportunity be afforded the residents of Phoenix to contribute any extra razors they possess. Safety razors are not wanted, and anyone desiring to send a blade will oblige by leaving them either at the Pioneer office, Danny Deane's or the Queen's or Brooklyn hotels.

During the recent storm, the lightning struck and killed ten cows at Molson.

HEAVY SENTENCE ON DIAMOND THIEF

Pleaded Guilty—Wife Discharged--Located Goods In a Dream.

A. E. Acton, the hair goods man, was sentenced at Nelson on Tuesday, to imprisonment at hard labor for one year. The prisoner and his wife were both under arrest charged with the theft of diamond jewelry from a hotel in Rossland. They were fairly well known here where they had worked up quite a good business in their line of goods. The charge against the woman was dropped, but the husband pleaded guilty and restitution was made by Mrs. Acton handing over her own diamonds in place of the stolen ones which Acton said he had thrown away in the street. A strange incident in connection with the case was the finding of the empty settings These were found in a cupboard of the room occupied by the Actons during their stay in Nelson. The landlady of the house had worried considerably over the affair, and in a dream one night had seen the jewelry concealed in a roll of wall paper in the cupboard, but on visiting the spot next morning she was astonished to find that her dream had nearly come true. The settings were there, but the diamonds had vanished.

Granby Shipments

The following are the monthly shipping figures from the local Granby mine to the Grand Forks smelter:

SATURDAY, AUG. 14, 1915.

"We are conducting negotiations with two groups of great powers. They are at present very satisfactory. Bulgaria's policy is to secure the best terms at the least possible sacrifice."

This was the recent statement of the prime minister of Bulgaria and, coming from the representative of a people who actually owe their national existence to the good offices of Russia, it is to say the least a piece of unpardonable selfishness, sufficient to rattle the whitened bones of the thousands upon thousands of Russian soldiers who gave up their lives in avenging the unspeakable atrocities of the Turks in 1875. So dreadful were some of these that the phrase "the unspeakable Turk," was coined during those days.

The recent statement by W. F. Reid, a past president of the Society of Chemical industry, that practically no cotton was used in the manufacture of high explosive shells, is perfectly true, but dangerously misleading. He must have known at the time of his speech of the great agitation going on for cotton to be included in the list of contraband, and why he elected to fool his hearers it is difficult to say. But as Mr. Reid stated, cotton is not used in the shell proper, but why did he not tell his audience that there were two charges used in a piece of artillery—one composed chiefly of cotton for throwing the shell, and the other, a product of coal, inside the shell for bursting.

MADE IN CANADA

The London Times, commenting on the fact that there are actually several hundred so-called charitable organizations soliciting funds for various war relief purposes, urges the government to appoint immediately a committee to license approved charities, making it an offence to collect money without a license. The Times declares there is collossal waste under the present system, and that the existence of most of the present organizations are a nuisance and a danger.

The momentous hour is about to strike in the United Kingdom. If all signs are correct, a few short months will see the formation of the first British conscript battalions. Conscript battalions they will be called. An ugly name. But there will be a great gulf between them and the men who have voluntarily placed their services at the disposal of their country.

General Lessard advises the people not to spend their money buying machine guns. Give the money, he says, to the Red Cross aud other similar societies. Yet, last week, Hon. Martin Burrell sent a donation of fifty dollars to the Grand Forks machine gun committee. Once again we ask. Where are we?

No victory can be called such, unless the results are commensurate with the sacrifice of life in attaining it. Such an incident is the capture of Warsaw. The loss of life among the Huns must have been enormous, and the ultimate effect in reducing the number of invaders will surely be felt before the end of the year.

It is to be hoped that no battles will take place in Wales. Presnysz, Novogeorgievsk are all bad enough for the English readers, but a battle fought on the shores of Llyniau Nanty-y-Llef, or a retreat over the beautiful slopes of Elidyrfawr would be the death of every proof reader in Canada.

The Wall Street Journal predicts that within six months the value of the German mark bill will rank less than the Confederate shin plaster.

Francis Joseph of Austria is reported to have caught a slight chill. Let us hope it will soon be roasted out of his arrogant carcase.

The Russians took no chances at Warsaw. They removed everything of value in anticipation of the arrival of the burglar crown prince.

The following advertisement appeared in the London Times:

"Jack F. G.—If you are not in khaki by the 20th I shall cut you dead."

And this is how the Cologne Gazette translated it:

"If you are not in khaki by the 20th I shall hack you to death."

Unbelievable

"It has been erroneously stated," says a coast paper, "that the Scotch are devoid of humor, but never until now has it been discovered that any of the men frae the land of the heather are devoid of appreciation of their national instrument. This morning a local newspaper man, who at any rate is the proud possessor of a Scottish name, entered a protest at police headquarters anent some resident on Third Avenue West, who at midnight wafted melodious strains from the pipes for the soothing of his nerves. Worse than all, the informant stated he thought the dulcet strains were the screams of someone who was being murdered, the only thing which dispelled the illusion being the fact a second performer at the same address obliged with a cornet obligato."

Big War Planes

The Russian aviator, Onipenke, gave a demonstration at Hendon with a new aeroplane. In addition to the air pilot, eight soldiers were carried. The machine has four engines of 500 total horsepower. Two of them could be put out of gear in flight, and still the aeroplane could continue its flight. So stable is the equilibrium that a man can leave the cabin and make his way along the frame to the engines withou effecting its normal progress. The accommodation is very complete, consisting of passenger cabin, lavatory, photographic room and pilot house. Some of the same type of machine carry as many as sixteen passengers.

An Irish section foreman who found one of his men fast asleep in the shade of a hedge, slowly addressed the unconscious one: "Slape on, slape on, ye idle spalpeen—so long as ye slape ye've got a job, but when ye wake up ye're out of work."

A royal proclamation prohibits the importation into the United Kingdom of uncut diamonds, except under special license. This step has been taken on account of the alleged sale recently of quantities of stones from the former German colony in South-west Africa.

War or no war, nothing whatever is to be allowed to stand in the way of the completion of the great port of London improvements. Lord Davenport told a party of journalists that it was our duty to see that the port of London was so equipped that when the war is over Hamburg will never again threaten our supremacy.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

Concentrates

One of the most daring aviators in the Russian service is a girl from the Petrograd high school.

The thrifty housewives of Port Alberni are allowed to use electric irons on Wednesday of every week.

Kaslo will harvest its usual lemon crop this year. You can have a home-grown lemon shampoo over there.

Out of deference to Italy the British government has consented to make Italian the official language of Malta.

The Russian government is about to release ten thousand Italian prisoners captured while serving in the Austrian army.

A reward has been offered for the apprehension of the party or parties who robbed the orchard of the Silverton hospital.

Reports from Zurich announce the execution by hanging of five Polish ladies, who were suspected by the Austrians with being spies.

British subjects of Russian origin, possessing a command of the English language, will be accepted in the ranks of Canada's oversea force.

Since the beginning of war the British government has paid the sum of 125 million dollars in separation allowances to wives and children of soldiers.

The committee in charge of the liquor traffic in Liverpool have reduced the time for selling to 5½ hours daily. They have made credit and treating a crime.

Among the passengers on the Atlantic liner, Metagama, which arrived recently at Liverpool were several hundred wives and children of Canadian soldiers.

The harvest having been gathered in Roumania, and the Dardanelles being closed, it is expected that about three million tons of that country's grain will go to Germany.

While giving "lessons" in swimming to the members of his regiment, a London colonel slipped and fell headlong into the water from which he was rescued by a couple of his pupils.

Donald MacMaster, a British M.P., who has just returned to London after visiting the lines in France, says there is much need for more machine guns and high explosive shells.

Among the 50,000 women who marched in the great London procession was a ranee of India, the Sikh Princess Dhuleep Singh. The women wanted the privilege of making munitions of war.

While shaking a tin box containing dynamite caps, the six-year old daughter of a rancher near Revelstoke, was badly injured by an explosion. A baby in the room at the time was also injured.

A despatch from Capetown says that the South African government proposes to settle the former German possesion with a strong body of British-African colonists. Preference is to be given to those who have taken part in the campaign.

Speaking at the midsummer meeting of the Manufacturing Association, at Spokane, R. Goldrich a prominent lumberman, said the United States was holding a post mortem on the lumber industry, while in B.C. they were doing constructive work for the industry.

The Rev. Gertrude Petzold, the woman pastor of a Unitarian church in Birmingham, has been expelled from England by order of the Home Secretary. She had lived in England for eighteen years. Some years ago the woman applied for naturalization, but went to America and the application lapsed. A second application was refused.

The hard lot of many English women who have sacrificed their nationality by marrying Germans, was illustrated the other day in a London police court, when Grace Jungh, who was only married a day before the outbreak of war, was sentenced to a month's imprisonment for living with her parents at Gravesend, one of the prohibited areas. Her husband had been interned and she was unable to obtain work on account of her German name. To make matters worse she was faced with a severe penalty if she assumed another name.

Boundary District of British Columbia

RICH IN MINERAL, AGRICULTURAL AND LUMBERING POSSIBILITIES--- A MOST PROMISING FIELD FOR THE INVESTOR.

Probably no district in the Dominion of Canada possesses so great an array of potentialities as the above. The mountains throughout its entire length and breadth, are almost without exception mineraliferous, containing gold, silver, copper, iron and other valuable ores, while in a few localities there are more than surface indications of the presence of coal.

FOREST AND MINERAL WEALTH

Its forest stretches are among the richest in the province, and what is of great importance, easily accessable to river and railway. There is scarcely a square mile of it that is not either equipped with high tension wires, or which could not be reached by the expenditure of the smallest outlay. Not the least attraction from the point of view of the investor, is the sites for water power, which abound in this district.

Just at present an immense amount of interest is being directed to the recent free gold discovery in Greenwood, while in the same district is to be seen one of the best equipped free gold properties in the west, a not inconsiderable asset in these days of industrial depression and shrinkage of gold reserves. It is in this district where is situated the Phoenix and Grand Forks properties of the Granby Consolidated, together with those of the British Columbia Copper company. In the former camp, and surrounding it for miles on all sides, are acres of crown-granted mineral claims, all awaiting the advent of the investor. The title deeds to these properties, thanks to a beneficent series of mining laws, are unimpeachable, and if proof is wanted of the statement, let us point to the almost entire absence of mining litigation in the courts of the province.

AGRICULTURE AND FRUIT-GROWING CENTRE

The possibilities of the Boundary as an agricultural and fruit-growing centre are also worthy of investigation, and a visit to some of its spendidly equipped orchards will prove a revelation to the stranger. The highways throughout the Boundary makes this section of the province the motorists paradise, millions having been spent on the construction of government roads.

No locality is better served with railroads than the Boundary district. At present this section is served by two of the greatest systems on the continent, the C. P. R. and Great Northern companies, while within a few months the route to the Pacific coast will be commercially curtailed by the opening of the new K. V. V. branch of the former.

Safeguard Your Food by Always Using
Dr. PRICE'S CREAM BAKING POWDER
Made from Pure Grape Cream of Tartar
Its purity, wholesomeness and superior leavening qualities are never questioned.
NO ALUM—NO LIME PHOSPHATE
"Alum is a powerful astringent with very decided irritant qualities, owing to which, when taken internally in sufficient quantity, it is emetic and purgative, and may soon cause fatal gastro-intestinal inflammation."—U. S. Dispensatory, p. 144.
"The use of alum and salts of alumina in food should be prohibited."—Prof. Wood, Harvard Univ.
Notice that all advertisements of the cheap baking powders conceal the presence of alum; Therefore read the label.

Local and General

G. W. Rumberger returned to the city on Tuesday from a business trip to Spokane.

Mrs. Wm. Delahay left Thursday to spend a few days with Mrs. Walters of Danville.

Mrs. Wm. Jackson and children left Wednesday for a few days' visit with relatives in the Forks.

J. Carman, of the 54th Battalion, is in town on a week's furlough, the guest of Mr. and Mrs. Jos. Strutzel.

Mrs. J. Kempston and children are spending a holiday with Miss Earle, the former's sister at Bridesville.

Married—At Phoenix, on August 11th, by the Rev. J. R. Munro, Peter Franklin Grant to Miss Nellie Dockar, both of Phoenix.

The resumption of work on the Phoenix-Greenwood tunnel is to be considered at a meeting of the company in Chicago on September 1st.

Mrs. Gustafson of the Victoria house, returned home on Monday from Spokane much improved in health.

While trolling on Christina Lake, on Wenesday, Kathleen Carson hooked a rainbow trout measuring 20½ inches in length. (Passed by the censor).

Major Davies of the 54th Battalion is about to undertake a recruiting tour through the Boundary. In about two weeks he expects to reach Phoenix.

Ed. Bellis, Andy Johnson and Danny Deane, who were among the local flock of Eagles who swooped dowe on Spokane last week, all flew back to town on Monday.

Recruits for the 54th Battalion continue to slip out of town very quietly. The latest to leave is Jos. Larden, who has been employed for the past year by R. Forshaw. He will go as a bugler.

Mrs. N. E. Cronant, of Grand Forks, informs the public that she has acquired rooms in the Bank Block, and will be here on the 12th to the 18th of each month with her usual line of ladies' and children's clothing. Her last visit this month commences today, Saturday.

Eyesight—Dr. S. L. Taube, of the Taube Optical Co., of Calgary and Vancouver, announces that he will be at Quance's drug store on Monday, August 23rd. If there is anything wrong with your eyesight, or the glasses you are using are not satisfactory, do not fail to make a point of seeing him. All work absolutely guaranteed.

There was no dearth of dancers on Friday of last week, when the ball in aid of the local knights of the diamond took place. The number present was above the usual average, and the music of the popular Ironsides orchestra kept the merriment at full pitch until nearly three o'clock the following morning. Supper was served at midnight by the lady friends of the club members.

The Ottawa authorities have intimated that there is a limit to the number of machine guns which may economically be contributed, and it is further stated that the public in its zeal for providing death-dealing weapons should not forget the other channels of patriotic giving. They remind us particularly of the patriotic fund, and the needs of the Red Cross, both of which are deserving of special attention just now.

Church Services

St. Andrew's Church (Presbyterian)—Service, Sunday, August 15th, at 7.30 p.m.; Sunday school at 2. All welcome. Rev. J. R. Munro.

St. John's Church—Tomorrow, Sunday, August 15th: Morning Prayer and Holy Communion at 11 a.m. Sunday school at 3 o'clock. Rev. R. D. Porter.

The stated services at the Church of Our Lady of Good Counsel are as follows—First and third Sundays in the month: Mass at 10 a.m.; Sunday school at 2.30 p.m.; Evening service at 7.30. Rev. Father Dom. Dorval.

One Examination

A change in the regulations for recruits for overseas service has been approved by the Militia Council and Cabinet, and officially announced by Senator Lougheed, acting minister of Militia, Ottawa. It stipulates that there will be but one medical examination. Previously there have been two examinations, one when a man first joined, and second when he reached camp. The first examination was often rather lax, and men who were accepted, resigned positions and were "farewelled" by friends, were rejected when they reached camp. Now the first examinations which will be more rigorous, will be final; men will not be subjected to the humiliation of return home after being once accepted.

Finger rings have been invented with interchangeable settings, removed with no more difficult tool than a common pin.

PHOENIX BAKERY
W. WILLIAMS, PROP.
A new line of Bakery and Confectionery just arrived. Fresh Bread, Cakes and Cookies, just like mother used to bake, delivered daily to any part of city.

Another War Fake

A correspondent of the London Morning Post has drawn the attention of the British people to the great military preparations going on in Northern Sweden. He believes that Sweden's old antipathy to Russia will decide them to throw in their lot against us. He is emphatic in the statement that the great majority of the Swedes are for the Germans, whose successes of late have emboldened them. The foregoing piece of news is highly significant in the face of the refusal of the Malmo hospital authorities to send a single doctor or nurse to Austria.

The London Times, however, threw cold water on the report, and stated the influence of the Swedish war party while strong at the beginning of war, was steadily declining.

When the attention of Count Wrangel, Swedish ambassador in London, was drawn to the rumors, His Excellency characterized them as absurd. "The relations between Sweden and Russia," he said "were of the most friendly nature."

There can be no doubt but that the publication of a pro-German book on the war, the author of which is Swen Hedin, the Swedish explorer, has prepared the British people for any kind of unfavorable rumors of Sweden's intentions. The book was something of a shock in official circles and is being widely read in the United Kingdom.

WOOD TENDERS

Tenders wanted for supplying Phoenix Public School with twenty-five cords of good, dry wood. Tenders must be sent in immediately to

N. J. CARSON, Sec.,
Phoenix School Board.

RHEUMATISM ARRESTED
Many people suffer the tortures of lame muscles and stiffened joints because of impurities in the blood, and each succeeding attack seems more acute until rheumatism has invaded the whole system.
To arrest rheumatism it is quite as important to improve your general health as to purify your blood, and the cod liver oil in Scott's Emulsion is nature's great blood-maker, while its medicinal nourishment strengthens the organs to expel the impurities and upbuild your strength.
Scott's Emulsion is helping thousands every day who could not find other relief. Refuse the alcoholic substitutes.

No. 7 Oliver
The American Oliver Typewriter turns out more work—of better quality and greater variety—than any other writing machine. Simplicity, strength, ease of operation and visibility are the corner-stones of its towering supremacy in

A WONDERFUL DISCOVERY
An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poison! Not one species of microbe has been found that Zam-Buk does not kill!
Then again. As soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.
Again. As soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue *from below* is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.
Only the other day Mr. Marsh, of 101 Delorimier Ave., Montreal, called upon the Zam-Buk Company and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. To-day—over three years after his cure of a disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema!
All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage). Address Zam-Buk Co., Toronto.
