FRESH FRUIT AND VEGETABLES ARRIVING DAILY

Leave Your PEACH Orders This Week

MORRIN, THOMPSON & CO.

RICH COPPER-GOLD ORE AT FIFE MINES

Property Will Shortly Be on the Shipping List

Ore is being taken out of the 100-foot level of the Fife mine in blocks weighing approximately half a ton each, according to Charles Dempster, general manager of the Fife Mines, Limited. The property, which is located 30 miles east of Phoenix, is producing rich copper ore, with values in gold and silver.

Mr. Dempster states the clean ore dumps are a very fine sight and believes it is as fine ore as has ever been mined in the province. The results of some 30 assays of these dumps had given an average of 5.3 per cent. copper and $4.20 gold. A very careful average taken through the face of the stope last week gave a result of 7.5 per cent. copper apart from gold and silver values. Another sample from an accumulated pile of ore during the previous two days showed 10 per cent. copper in addition to values in gold and silver.

The ore in the stope was at present, continued Mr. Dempster, six feet in width with a large body of lower grade ore, but of commercial value alongside. This latter body has been crosscut for nearly 30 feet, all in ore, the values ranging from $5 to $15 in copper and gold. This crosscut was now being driven with a view to encountering the boundary or hanging wall.

At various points in the tunnel run in for nearly 600 feet on the vein, values have been obtained of 5 per cent. copper and as high as $18 and even $22 in gold. To get a true knowledge of this huge deposit crosscuts at frequent intervals will be immediately run. The showing at the glory hole, where the rich sulphides come right to the surface, is a sight worth seeing, said Mr. Dempster.

The new kitchen and dining hall is now complete and is up-to-date in every particular, more nearly resembling the accommodation of a good hotel than a mining camp, but it is in line with the management's desire to give every comfort and convenience to its employees. The best possible equipment has been installed in the assay office which is an immense convenience.

The company is only awaiting the completion of arrangements with the C.P.R. to commence shipping its product in earnest.

Several large blocks of chalcopyrite ore from the Fife property, recently assayed ran 15 per cent. copper in addition to gold and silver. Ores from the mine also carry considerable values in azurite.

Smith Is Wanted

The Police of Vernon have offered a reward of $250 for the arrest of Alex. Smith, who is wanted in connection with the burning of the Okanagan hotel, at Vernon, in which eleven lives were lost. It is said that Smith disappeared from Vernon immediately after the fire. He is 5 feet 9 inches in height, smooth shaven, of dark complexion, pale face, with a hole on the left jaw, 35 years old, slim build, and weighs 160 pounds.

C. P. R. OFFICIALS HERE ON VISIT

Inspect Trackage and Proposed Lines.

David E. McNicoll of Montreal, vice-president of the C.P.R., who is on his annual tour of inspection of the company's lines through British Columbia, was a visitor in Phoenix on Monday. He was accompanied by F. F. Busteed of Vancouver, general superintendent of the Pacific Division; R. A. Pine of Nelson, master mechanic, and Allan Purvis, local superintendent. They arrived by special train and after making a general inspection of local trackage left for Rossland.

They also inspected the route of the proposed line to Wellington camp, as well as the proposed siding to the Consolidated company's Phoenix Amalgamated mine. Everything is in readiness to construct the latter, but it is understood the company have not yet secured the authority of the railway commission to proceed. It is probable the matter will be considered by the commission when they meet at Nelson about November 1st.

W. J. Camp, of Montreal, inspector of C.P.R. telegraphs, and Mrs. Camp, and J. Wilson, superintendent at Vancouver, also arrived with the railway officials. They were guests at the Brooklyn hotel during the afternoon, driving to Greenwood in the evening

Watch the Boundary Grow

At Grand Forks, on Aug. 23, to Mr. and Mrs. C. C. Heaven, a daughter.

At Fife, on Aug. 25, to Mr. and Mrs. Michael Mader, a daughter.

At Grand Forks, on Aug. 20, to Mr. and Mrs. Wm. Walmsley, a daughter.

At Anaconda, on Aug. 22, to Mr. and Mrs. S. A. Hartmann, a son.

At Greenwood, on Aug. 21, to Mr. and Mrs. E. B. Dill, a son.

At Anaconda, on Aug. 14, to Mr. and Mrs. J. McDonell, a son.

At Anaconda, on Aug. 8, to Mr. and Mrs. J. Bedard, a daughter.

Boundary Mining Notes

The Greenwood smelter is now receiving plenty of coke from Coleman.

The ore tonnage from Boundary mines for 1909 has now passed the 900,000 mark.

The B. C. Copper company have put a small force of men to work on the Sappho group, near Midway.

Alex. Sharpe, superintendent of the First Thought mine at Orient, visited Boundary camps during the week.

C. A. Shaw has been surveying the Windfall and Prince fraction on the West Fork for the B.C. Copper company.

E. Jackson is superintending development work at No. 7 mine in Central camp where fourteen men are now employed.

P. G. Morey of Ymir arrived at the Jewel mine this week where he is interested in the construction of the new cyanide plant.

The B.C. Copper smelter treated 8,333 tons of ore during the past week, 7,701 tons from Mother Lode and 632 tons from other properties.

B. M. Snyder, formerly of this district, is now smelter superintendent of the new plant of the Arizona United Mining company, at Johnson, Arizona.

Samples of ore, from Mother Lode, Snowshoe and Phoenix Amalgamated mines have been sent with the mineral exhibit from Nelson to the Toronto fair, which opens next week.

Charles H. Rundberg, superintendent of the Dominion Copper mines for the past two years, has resigned. No successor has yet been appointed. Mr. Rundberg will leave shortly for Spokane, where he is considerably interested in real estate.

There is a probability of an arrangement being made for miners at Mother Lode to reside in Greenwood and be taken to and from the mine each morning and evening by special train. It is understood the B.C. Copper company contemplate extensive surface work at Mother Lode and think it wise to have the population removed from the danger zone of blasting.

The syndicate operating the E.P.U. property are prosecuting development with the expectation of striking a vein very soon. Tunnelling to the extent of 1200 feet has been done, and work is now being done 340 feet below the collar of the shaft. The tunnel of the E.P.U. is the longest of any small property in the Boundary, and will permit of a fine gravity system for handling the output. Ore shipped from the property several years ago netted $66 per ton.

The Riverside claim on the West Fork, near Rock Creek, held by the Perkins estate, was bonded during the past week to John H Arnold, of Columbus, Ohio, for $16,000. The bond calls for a concentrating plant to be erected on the property within four months and the payments extend over two years. Considerable development work was done on the claim in 1907 when the property was under bond to a Phoenix syndicate. Ninety tons of sample ore were shipped, with very satisfactory results.

The recent firmness of British Columbia Copper is due to the reopening of the mines, and the fact the company expects to enjoy a good production within a comparatively short time, comments a N.Y. financial paper. It has been stated that the company can lay copper in New York for 7.963c. a pound, which includes mining, smelting, transportation, selling commission and other expenses. Insiders have been keeping the price down with a view to buying a quantity of the stock, and since Adolph Lewishon became a director in the company, several new purchasers have appeared in the market. The directors have planned to declare a dividend when a surplus of somewhat over $200,000 shall be collected, and this would have been done some while ago, if the strike and other difficulties in the price of the metal had not prevented.

Granby Consolidated

With the end of August, eight months will have elapsed since there has been a disbursement on the shares of the Granby Co. Notwithstanding this, stockholders hold tenaciously to their shares and a price better than par is maintained, says the News Bureau.

The bulk of Granby's shares is closely held. Among those credited with large holdings are J. J. Hill, the First National Bank of New York, the American Metal and Nichols Copper companies, and H. L. Higginson, of Lee & Higginson, New York.

During 1908 the company paid two dividends of $2 each, the last one in December. Expenditures have been made for enlargement of the smelting plant to a capacity of 40,000,000 pounds or more.

There is one disadvantage which acts against Granby ranking with the lowest cost producers—the distance from eastern refineries and markets, thereby necessitating a long haul for the company's product.

$115 FOR BASEBALL HERE ON LABOR DAY

Attractive Program of Sports Now About Completed

The various committees in charge of the big Miners' Union picnic in Phoenix on Labor Day are working diligently to make the event the most successful in the history of Phoenix union celebrations. The splendid program of sports and attractions is now about completed and there is every reason to expect that all visitors to Phoenix on Sept. 6th will spend an enjoyable day.

Among the leading attractions will be baseball matches. It is not definitely known as yet what teams will participate, but as a purse of $115 is hung up, divided into two prizes, there is no doubt matches between some good teams from the surrounding cities may be looked for.

Attractive posters have been distributed through outlying districts that "they who run may read," and before the end of next week complete programs of the sports will be issued for the benefit of all interested in the picnic. Every businessman in Phoenix should see that he is represented in the program for it will be carefully examined by hundreds of visitors as well as home people.

HANDSOME GIFT TO WM FRASER

Presented With Gold Watch, Chain and Locket on Monday Evening

William Fraser, who has held the position of master mechanic at Granby mines for nearly a decade, leaves shortly for Lethbridge, Alberta, to accept a similar position. His long connection with the mines here made him one of the best known men on Granby hill, and his departure is a source of regret to his many friends.

On Monday evening a number of the officials and others connected with the Granby mine met at his home and presented Mr. Fraser with a beautiful gold watch and chain, and a Masonic emblem locket. W. X. McDonald in an eloquent address expressed the regret of his fellow-employees in Mr. Fraser's departure after such long and pleasant relations at the mine. Mr. Fraser, who appeared deeply moved by the honor done him, was unable to speak other than to thank them for the gift and their kind expressions which he greatly appreciated.

Fires in the Boundary

Bush fires have been raging in many parts of the interior and did considerable damage in the Boundary during the past week. On Tuesday night 5000 ties were destroyed at Fisherman, near Eholt. Further destruction of property was prevented by a gang of men, who were repairing a bridge at that point, taking prompt action and worked all night. The engine of a passing freight train was pressed into service and hauled water from a nearby supply, thus saving another pile of 5000 ties. Fire raged in the vicinity of the Bonanza mine on the North Fork, but the mine buildings were kept safe. The Kootenay Power company's lines were also threatened early in the week.

JAS. G. McKEOWN IS THE NEW ALDERMAN

Elected Over John McIntosh on Thursday

James G. McKeown was on Thursday elected to fill the vacancy in the city council for the east ward over John McIntosh by a majority of 12 votes.

A comparatively small per centage of ratepayers voted, there being a general feeling that either of the men would make a good alderman, while the best of feeling existed between the candidates. Seventy-two votes were cast, 42 for Mr. McKeown and 30 for Mr. McIntosh.

Mr. McKeown is one of the oldest property owners in Phoenix, is familiar with the conditions of the city and the requirements of a civic official and should make a decided acquisition to the aldermanic board.

The bye-election was necessitated by the declaring vacant of P. J. Cook's seat on account of prolonged absence.

Mining Records

The following are the locations, certificates of work, bills of sale, etc., recorded at the office of the Grand Forks mining division for the past week:

LOCATIONS

Easton, Summit camp, D. R. McElmon.

CERTIFICATES OF WORK.

Lone Star fraction, Bannock, Bayley et al; Molly Gibson, Burnt Basin, Paulsen et al, 2 years; Irish Mellie, Burnt Basin, 2 years, McNeely et al; Manchuria, Burnt Basin, 3 years, Grey Eagle. Burnt Basin, 3 years, Paulser et al; Molly Gibson Fraction, Burnt Basin, 3 years, McNelley et al.

BILLS OF SALE

¼ in Homestake fraction, Connection and Cressant, Hardy mountain. Lake D. Wolfard to F. M. Kerby.

Agreement for sale of Windfall, Wellington camp, mineral claim, James Crum to James M. Doyle.

Boundary Side Lights

Frederic Keffer was in Nelson on Thursday.

Grand Forks wants a resident photograher.

Customs Officer Cameron of Laurier is on a trip to Toronto fair.

A meteorological observation station will be established at Grand Forks.

A splendid hay crop has been taken from the Eholt meadows this season.

W. J. Cook has been appointed fruit inspector for the Grand Forks district.

Rev. M. D. and Mrs. McKee have returned to Greenwood from a month's holiday on Arrow Lakes.

The new Masonic temple being erected in Grand Forks will be completed early in September.

The marriage of Miss Mamie A. Barrett to John A. McDougall takes place in Grand Forks on Sept. 1st.

Prof. Craig, of Cornell university, will give an address on horticulture in Grand Forks next Tuesday evening.

W. H. Wartchow had two ribs broken by falling into the pocket of the shaft at the No. 7 mine last Saturday.

Martin Burrell is delivering a series of lectures through the interior, in company with Prof Craig of Cornell university.

The Riverview poultry farm of Midway is giving special prizes for competition in the the poulty section at the Nelson fair.

Mr. and Mrs. H. F. Stow and Mr. and Mrs. C. H. Fair, of Greenwood, are camping on the West Fork for a couple of weeks.

The death of Mrs. Pluma Kinney took place at the residence of her son, Charles Kinney, Greenwood, on Aug. 22, aged 84 years.

Long Lake has been stocked with 200 trout from Boundary creek and a close season for fishing at the lake declared until 1912.

Peter Boydinck, an Austrian, fell down a chute at the Mother Lode mine last week and fractured his skull. He died in Greenwood hospital two days later.

George A. Ohren, formerly of the Boundary, has returned to Rossland, after a year's residence in Spokane, to resume his position as accountant with the Canadian Rand company.

Judging by present indications fruit culture at Eholt should prove remunerative. Cherry and plum trees planted this spring by G. A. Rendall in light sandy soil already show two and three feet of growth, respectively. This is, be it remarked, altogether without irrigation.

A. B. W. Hodges, manager of the Granby company, and R. P. Williams, of the Canadian Rand company, left on Tuesday for a trip up the coast. They will be accompanied from Victoria by Hon. Thomas Taylor, and will visit Prince Rupert and the Queen Charlotte Islands.

The following prizes were won this year by Grand Forks pupils in the high school examination: P. Burns' gold medal for junior grade, Maude Harrigan; Martin Burrell's prize for preliminary grade, Neta Reid; Mayor Fripp's gold medal for matriculation, Ida Hartinger, who also won the $50 Spokane scholarship for general proficiency in this same examination.

B.C. COPPER CO. IN THE NEW DOMINION

Purchase Old Bonds and Stock in New Company

On Friday, the 20th inst., the last payment of the underwriters of the Dominion Copper company was made and the securities of the new company delivered to what now constitutes the present bond and shareholders, the old bondholders having received their stock and the depositing shareholders and underwriters having received bonds and stock to which they were entitled.

The new company now has outstanding $500,000 of bonds and 250,000 shares of stock. By the purchase of the old bonds, which have been exchanged for stock in the new company, and also by purchase of stock in the new company that has been delivered to the underwriters, the British Columbia Copper company interests are now large shareholders in this company. This should prove beneficial to the New Dominion Copper company in that the familiarity of the British Columbia people with the situation in the Boundary and their successful operation here, as well as having adjoining properties, should lead to the development of the Dominion property on an economical scale without the errors that have been made in the past.

Mother Lode's New Superintendent

Paul S. Couldrey arrived in the Boundary Monday to take charge of the Mother Lode mine. Commenting on his departure from Rossland, the Miner says:

"Paul S. Couldrey, who has been manager of the Le Roi Two Mining Co., for the past seven years, left on Monday for Greenwood for the purpose of taking a position with the British Columbia Copper Co. Mr. Couldrey, during his stay in Rossland, has won the respect and esteem of all with whom he came in contact, while the success that he has made of the affairs of the Le Roi Two Co. is shown in the dividends made for the shareholders, and in the splendid condition in which he leaves the mines of the company, stamp him as a manager of more than ordinary ability. It is a pity that he could not continue his work here, as it is believed still better results would have ensued under his stewardship in the future, if he were to remain. His departure is a great loss to this community. Ernest Levy, of London, England, who on two accasions during Mr. Couldrey's absence, has been placed in charge of the mines of the Le Roi Two, will arrive here towards the end of August for the purpose of taking the place left vacant by Mr. Couldrey's resignation.

SATURDAY, AUGUST 28, 1909

The year 1909 is important in the building of transcontinental railways. Up to the present there have been six such lines: the Canadian Pacific, the Great Northern, the Northern Pacific, the Union Pacific, the Atchison, and the Southern Pacific. Of those now building, the Grand Trunk Pacific in Canada is in rapid progress. It will be the northernmost of all transcontinental railways yet constructed. Moreover, it will shorten the sea route from the American continent to the Far East by about five hundred miles, as Prince Rupert, its western terminus, is much nearer Yokohama than are the points further south. On the U.S. side of the border we now have to chronicle the completion of the Chicago, St. Paul and Puget Sound railway. As its name indicates, is an extension of the Chicago, Milwaukee, and St. Paul system by a line fourteen hundred miles long from Mobridge, South Dakota, to Seattle and Tacoma, in the State of Washington. This latest highway to the Pacific is distinguished above others because of two advantages: first, it represents the shortest distance between Chicago and Puget Sound, and second, it has very easy grades. Of these two advantages, the latter is of more importance than the former. The Grand Trunk Pacific is to have the same advantage over the Canadian Pacific. The grades on the latter are reported to average 110 feet to the mile, and on the former, it is claimed, are only a trifle over 21 feet.

General Bingham, until lately New York Chief of Police, and recently dismissed by Mayor McClellan, has published a magazine article asserting that $100,000,000 changes hands annually in graft and blackmail in the city, and that from fifteen hundred to two thousand of the policemen are grafters. The President of the Board of Aldermen replies that General Bingham lacks tact.

The Hosmer Times continues to improve since its recent resumption of publication. It is a bright, crisp news purveyor and is well deserving of the liberal patronage it receives from the businessmen of the promising coal metropolis.

Canada has nearly a million square miles of unexplored territory in the far north; is as large as 30 United Kingdoms and 18 Germanys; is twice the size of British India, and almost as large as Europe.

During 1908 there was not a single fatality from railway accidents in the United Kingdom. This should furnish food for reflection for American and Canadian railway companies.

The contract for the armor-plating alone of the new British battleship Colossus calls for 2,000 tons. The value will be about $1,000,000.

PRESENTATION ON LEAVING ROSSLAND

Paul S. Couldrey Recipient of Cup From Josie Employees

An interesting little ceremony took place at the Josie mine on Saturday afternoon, when Paul S. Couldrey was the recipient of a parting gift on his relinquishing the post of general manager, says the Rossland Miner. The gift took the form of a valuable and handsome silver loving cup on an ebony stand. This had been subscribed for by the whole of the employees of the mine and bore the inscription, "Presented to Paul S. Couldrey, Esq., by the employees of the Josie mine and mill (Le Roi No. 2, Ltd.), August 14th, 1909."

The presentation was made by James Douglas, who in asking Mr. Couldrey's acceptance of the gift, said he had a very pleasing duty to perform; not that it was pleasant to part with their manager, but because of the kindly feeling which had always existed between him and his employees, pleasant because on leaving he took with him the best regards and greatest esteem of those employees. His high personal character and his justice in dealing with all his workmen had endeared the manager to them all. They wished he was coming to them instead of going away, but when he was away, wherever and whatever he might be he would be followed by the love, esteem and regard of those left behind. If ever he came back to them he could rely on receiving, in the future, the same loyal support that he had received during the past. (Applause.)

Mr. Couldrey, in acknowledging the loving cup, said if they had made the presentation on the previous day they would have taken him completely by surprise. He need hardly tell them how sorry he was to leave them. This was the fourth time he had tried to go away, and three times he had come back, but he thought this time was final. (Voices: "We hope not!") When he first came to Rossland there were some people who predicted a life of six months for the camp. That was seven years ago, and he thought the same people would be inclined to double that life now. The Josie and other mines, and other properties opening up gave promise of as good work in the future as they had ever given in the past. He thanked them very much indeed for the present.

Mr. Couldrey arrived last week to act as superintendent of Mother Lode mine.

B. C. MINING

The Murex magnetic process of ore saving is to be tried on the ores of the Vancouver mine at Silverton.

A seam of coal eleven feet thick has been discovered on Haslam creek in the neighborhood of Nanaimo.

The Kootenay Development company will reconstruct the buildings destroyed by fire at the Silver King mine.

The only mine working at New Denver is the Molly Hughes, a dry ore proposition, which carries high silver values.

The Second Chance and the Juno claims at Erie have been leased by a local syndicate, which intends to develop them.

Fernie men own 20 iron claims about thirty miles from Coleman. The assays show from 57 to 75 per cent iron, and, when a company is formed, the properties will be worked.

Chas. F. Law, the mining operator of Vancouver, has returned from a trip into the Bulkley valley and Aldermere country, and speaks most glowingly of the vast coal and other mineral wealth of those districts.

A fire, which started on Aug. 19th, destroyed the compressor house, tramway, terminals, ore bins and blacksmith shop at the Silver King mine, near Nelson. The loss is several thousand dollars, which is partially covered by insurance.

On the Vancouver mine at Silverton the Van Roi Mining company are operating three shifts employing 70 men in all. The tram-line to the concentrator is being overhauled and when this work is completed the mill will operate to its full capacity.

A mining deal was communated last week by which the Golden Fawn mine at Sheep Creek was transferred to a Vancouver syndicate for a consideration of $75,000. The mine, which is a free milling property, is situated in the Sheep creek valley about ten miles from Salmo.

Silver For the Orient

Sixty bars of silver bullion from the Trail smelter, consigned to Shanghai were sent west Saturday morning. Each bar weighed 75 lbs. The silver is used in China for coinage.

BIG FIRES OVER THE COUNTRY

Forest Fires are Fierce Over the Country from Crow's Nest to Kootenay Landing.

As usual again the whole part of this country is being devastated by the flames of fall, attributed to the lack of proper conservation and the expenditure of a little money in proper time. From Kootenay Landing to Crow's Nest valuable timber limits are being wiped out by forest fires, and lumbermen are losing thousands of dollars by the flames that are sweeping over the country. The whole Kootenay valley is one dense mass of smoke arising from the general destruction that is sweeping over the country. Along the line of the C.P.R. the sparks from the engines are spreading fires in the dry grass, and in other parts of the country careless campers are doing the same thing. Never before in the history of this district has so much damage been done by timber fires, and it is a shame and an outrage that the laws of the province are not more stringently enforced. The Otis Staples Lumber company has lost in the last few days 6,200 logs by forest fires. The East Kootenay Lumber company has thousands of dollars in jeopardy at this time. The Standard Lumber company and the Baker Lumber company, as well as the King Lumber Mills company and every other lumber company in the district, that have been paying hundreds and thousands of dollars to protect their limits during the past few years, are liable to lose everything that they possess.—Cranbrook Herald.

CANADIAN MINING INSTITUTE

General Meeting at Nelson, on September 25th

The sixth general meeting of members of the Western Branch of the Canadian Mining Institute will be opened at Nelson, on Saturday, September, 25, when routine will be transacted and several papers will be read and discussed.

The council of the branch having approved of the acceptance of an invitation received from the local reception committee to adjourn the meeting to Spokane and there join in welcoming the American Institute of Mining Engineers to the northwest, there will be, at the close of the session in Nelson, an adjournment, where, with the sanction and kind co-operation of the A.I.M.E., a joint session of the two Institutes will be held, at which several papers relative to "The Coal Resources of south-eastern British Columbia and of Alberta," will be read and discussed.

Big Tunnels Completed

The spiral tunnels between Field and Hector on the C.P.R. main line are now open for traffic. The old 4.4 per cent grade on the big hill at Field will be abandoned for all time, the tunnels reducing it to about 2 per cent. The change will reduce the cost of operating, increase speed, and do much to facilitate traffic on the transcontinental line, of which the Field hill was by far the heaviest grade.

Cyanide Mill For First Thought

It is reported that the First Thought Gold Mines, Ltd., will commence the construction of a large cyanide mill in the next three or four weeks. This company has ordered a diamond drill, for boring to a depth of 600 feet. The company is at present shipping four carloads of ore per week to the smelter at Trail, B.C.

A Clean Man

Outside cleanliness is less than half the battle. A man may scrub himself a dozen times a day, and still be unclean. Good health means cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it and act it. He will work with energy and think clean, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stomachs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

Dr. Pierce's Golden Medical Discovery

prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and clean, healthy flesh.

It restores tone to the nervous system, and cures nervous exhaustion and prostration. It contains no alcohol or habit-forming drugs.

Constipation is the most unclean uncleanliness. Dr. Pierce's Pleasant Pellets cure it. They never gripe. Easy to take as candy.

A Good Long Life

is likely to be yours if you stick to good meat—not too much of it, of course—and vegetables and fruit; yes, and pastry in moderation. Note we said good meat. Tender and full of natural juices. Such meats we supply, whether your choice be of beef, lamb, mutton, pork, veal or poultry. You'll find our service and prices to match.

Westward Ho!

The August issue of Westward Ho! is essentially a fiction number, and the half-score of snappy stories are just the right kind for summer reading. Of the regular departments, even that of "Country and Suburban Homes," contributed by Stanley Mitton, is in a light vein and his articles are always instructive.

The fight that this western monthly is putting up for recognition is worth while and now that Percy Godenrath, the founder, has resumed the active management, after an absence of five months in the East, readers can rest assured that Westward Ho! will again come into its own.

Keep both eyes on the Rio Tinto Treadwell mine, near Curlew, Wash. Buy Rio Tinto-Treadwell stock at 2½ cents per share on the payment plan. Only a few thousand shares left at this price.—J. L. Martin, Phoenix, B. C.

Printing

WHEN YOU WANT PRINTING DONE, you want it done properly. To do it properly you must have experienced men. The PHOENIX PIONEER has the men, the material and the machinery to do the work. Send us your next order for printing—no order too big, none too small. We do everything in printing, and will give you satisfaction.

PHOENIX PIONEER

To Honor Lord Strathcona

In view of Lord Strathcona's honorable position for many years in the Hudson's Bay company, his relation to the early days as head of important bodies, and his unique position today as almost the only living man who knew well, personally, many of the early Selkirk settlers, the position of honorary president of the Canadian International and Selkirk Centennial exposition, will be unanimously tendered to his Lordship. Lord Strathcona arrived in Winnipeg, August 26.

Keep Your Money in Town

The semi-annual supply of Eaton's family ready reference books are being distributed at the Phoenix postoffice. There is really nothing gained in patronizing the mail order houses. This is true throughout the entire country. It is often accompanied by inconvenience and loss. If wearing apparel is secured. If you have presents or prizes to purchase buy them in Phoenix. These remarks apply equally to the printing business. The Pioneer will print anything from a visiting card to a poster at as low a price as can be obtained anywhere else.

Lever Brothers, Toronto, will send you free a cake of their famous Plantol toilet soap, if you mention this paper.

PLUCKY ENGINEER SAVES MANY LIVES

Stuck to Post and Went Through Burning Bridge

At the risk of his life, Engineer Herbert Jones saved the passengers of a train on the Spokane Falls & Northern railroad near Dart, Wash., on Saturday. Instead of following his fireman in a leap for safety, Jones stuck at the throttle, applied emergency brakes, and fell with his engine and the baggage car 40 feet into Dragoon creek through a burning trestle. He was unconscious when rescued, and had sustained a fractured leg and a scalp wound, but will recover. Men in the baggage car escaped uninjured.

The accident occurred while the train was rounding a curve. Smoke from the brush fires prevented the engineer seeing the bridge was on fire, till too late to stop the train. The engine ran clear across before the bridge broke letting the baggage and mail cars drop into the ravine. The weight of the cars dragged the engine back and down, but fortunately the coupling connecting the car with the rest of the train broke, leaving the two passenger cars standing on the brink above.

All the passengers escaped safely, but the blazing wreck communicated to the cars still on the track, and all the coaches were burned.

Your Dollar

will come back to you if you spend it at home. It is gone for ever if you send it to the Mail Order House. A glance through our advertising columns will give you an idea where it will buy the most.

PROVINCIAL.

Keremeos has a new public school.

Merritt is to have a new C.P.R. depot.

Fire did $4000 damage to a Moyie hotel last week.

A new Anglican church will be erected at Rossland.

Summerland is sending an exhibit of fruit to Toronto fair.

Revelstoke citizens want more water on their streets and less in their whisky.

The Provincial Conservative Association will meet in Kamloops in November.

Hon. Sidney Fisher, Dominion minister of agriculture, is touring British Columbia.

Heaps & Co., of Vancouver, will probably build another sawmill near New Westminster.

Nelson enthusiasts will resolution the C.P.R. to build their new tourist hotel in that city.

Hedley is certainly in the dry belt. That place has six hotels, or one to every twenty voters.

In Rossland Goodeve Bros. have incorporated a $100,000 company to handle their drug business.

The Provincial School Trustees convention will this year be held in Chilliwack towards the end of September.

J. Widham, foreman of the blasting operations at Port Grey, had his head almost blown off by a premature blast.

Frank Kootenay has confessed to killing his companion near Nakusp on the 15th inst. as the result of drinking firewater.

Arrangements are being made whereby it is expected the Bank of Vancouver will open in different parts of the province at an early date.

Nelson's big seventh annual fruit fair takes place this year on Sept. 22, 23 and 24. Prize lists may be had by sending a postal to D. C. McMorris, Nelson.

The Chinese of Armstrong are making themselves so obnoxious to respectable people that the city council is taking steps to have them removed to isolated premises.

A bad fire was raging in the Castle mountains between Banff and Laggan last week. Bankhead and the whole country for ten miles up the valley was shrouded in smoke.

C. H. Thomas and wife of England, both octogenarians, have made the journey across the "herring pond," and are visiting their four sons at Princeton, two of whom they have not seen for 25 years.

A boosters club has been formed in Prince Rupert which will probably be known as the Empire Club. One of the first matters to be taken up will be an excursion to the Seattle Fair on September 4, which has been set aside as Prince Rupert's day.

The sawmill operators of British Columbia at a meeting of the Canadian lumbermen to be held in Hamilton next month will make another attempt to bring influence to bear on the Dominion government to secure the imposition of an import duty on rough lumber.

Mrs. A. C. Brydone-Jack, wife of a prominent lawyer of Vancouver, had a miraculous escape from death when their auto ran down a hill and jumped into a ravine 40 feet below. It turned a complete summersault, but only one occupant was at all seriously hurt. She had her leg broken.

Chief Engineer Hogeland, of the Great Northern railway, says that in his opinion the route from the Similkameen to the Fraser river valley over the Hope Mountains present no insuperable difficulty. He is confident that a revised survey will give a grade of one per cent. on westbound and two per cent. on eastbound traffic.

A. B. Gordon of Sudbury, Ont., has purchased the property in the northeast corner of Hastings and Carrall streets, Vancouver. It has a frontage of 84 ft. in Hastings and 61 feet in Carrall. The purchase price was $160,000. It is understood that the purchaser will erect a steel skyscraper on the premises early next spring. The lot was purchased 25 years ago for $400.

Vaudeville is Increased

The vaudeville program at the Spokane Interstate Fair, held this year September 20 to 25, is the best arrangement of circus and vaudeville attractions yet seen in the northwest. It is not only more varied, but it is made up of attractions of the highest class, with the result that visitors will see more vaudeville than given by the ordinary vaudeville circuit, but as good circus numbers as are shown by the largest circus.

To Seek the Blue Bird

"The Blue Bird, a silver-lead proposition of Rossland, B.C., is to be developed by sinking a 200 foot shaft that is expected to tap four out of five producing veins within the Boundary lines," said L. C. Carter of Spokane, president and manager of the property, the other day.

The greatest depth reached so far is only 35 feet. Five different veins, with a maximum width of four feet, have produced 10 cars of $30 ore, net, from the smelter. One car of carbonated yielded $78 a ton.

The Canadian Government has paid $10 ropalty on the lead contents of each car. Nearly a car of ore is awaiting shipment to the Trail smelter, which is about seven miles from the mine.

The G. T. P. Construction

The Grand Trunk Pacific railway company is now considering tenders for the second section east of Prince Rupert, 130 miles in length and going as far as Aldermere. There is a great deal of rough country, and the contracts are likely to run anywhere between $5,000,000 and $6,000,000. Foley, Welsh and Stewart, who built the first hundred miles are among the tenderers, but two or three other big firms have also put in bids. The first 100 miles cost $8,000,000, but was nearly all rock work, and is considered the heaviest piece of work on the whole line. The country gets easier as the railway reaches further east.

The Vancouver Province estimates that the Ringling brothers circus which performed there last Saturday lifted $27,500, of which $22,900 would be taken out of the city. The attendance was 11,000 in the afternoon and 13,000 in the evening.

STOMACH INDIGESTION.

Peruna Strikes at the Root of the Trouble.

MR. S. J. MASSEY.

Mr. S. J. Massey, formerly a resident of Toronto, and a well-known business man, writes from 247 Guy street, Montreal, Quebec:

"I wish to testify to the *good results I have derived from the use of Peruna.*

"Having been troubled for several years with catarrh of the head, I decided to give Peruna a fair trial and I can truly say I have received great benefit from its use. It evidently strikes at the very root of the trouble and good results are soon noticeable.

"I have also *found Peruna a very valuable remedy for stomach trouble and indigestion.*

"I have no hesitancy whatever in recommending Peruna as a reliable catarrh remedy."

There are several kinds of indigestion. The trouble may be due to sluggishness of the liver, derangements of the bowels, enlargement of the pancreas, or it may be due to the stomach itself.

In nearly all cases of stomach indigestion catarrh of the stomach is the cause. The only permanent relief is to remove the catarrh.

Peruna has become well-known the world over as a remedy in such cases.

HAYWOOD ADDRESSES LARGE AUDIENCE

In Miners' Union Hall Sunday Evening

Last Sunday the large opera house of Phoenix Miners' Union hall was crowded with an audience to hear William D. Haywood, the ex-secretary of the Western Federation of Miners.

A review of the W.F. of M. with an account of the great trial at Boise was the theme upon which Mr. Haywood spoke for two hours. He made a strong plea in favor of Socialism. He did not ask his auditors, however, to vote for the Socialist party until they were convinced it was the best course to pursue.

Mr. Haywood told how the Western Federation of Miners was born in 1892 amid much trials and tribulations in the Panhandle of Idaho, with the idea of having a strong organization which would include all the mines of the West. Its main objects were to increase wages, shorten the hours of those engaged and to generally better the condition of its members. This aroused strong opposition of mine owners, and war, he declared, had been carried on vigorously against the organization. He reviewed the strikes in Idaho and Colorado, the calling out of the troops and the turmoil which followed. Then followed a recital of the arrest of Moyer, Pettibone and himself at Denver on a charge of murder in which they were rushed into Idaho without authority of law. The irons, the chains, the cells in which they were confined were vividly described. He paid his respects to McPartland and Orchard, describing them as the King and Prince of detectives. Detectives, he asserted, were the meanest men on earth.

He thanked the unions everywhere for raising the splendid fund to fight the legal battle and prove their innocence. The meeting concluded with cheers for the speaker.

Horse Thief Gets One Year

On Monday last, one Viel Marcus, was arrested by Chief Constable Bunbury in the Bank of Commerce. He had been up the Kettle river and helped himself to a horse belonging to a man called Waddell, at Steve's lumber camp, and a saddle belonging to Steve. While trying to pass a forged check at the bank, he was recognized, and the telephone brought the chief to the scene, with the result that Viel is in jail. The case was remanded to allow the prosecution time to procure evidence.—Greenwood Times.

The prisoner appeared before Judge Brown at Greenwood on Tuesday on two charges—forgery and horse stealing—on each of which he was sentenced to one year in Nelson jail, sentences to run concurrent.

V. V. & E. Withdraw

The appeal of the V. V. & E. railway company against the court of revision of Phoenix assessment roll, which was to have come up before Judge Brown in Greenwood yesterday, was withdrawn by the company before being given a hearing.

Notice to Parents

Parents having children of school age, viz. 6 years, and wishing to have them begin their studies this coming term must see that they are enrolled during the first two weeks immediately following the summer vacation. The next period for enrollment will be after the Easter holidays. This rule must be strictly adhered to in order that all the beginners may be started off in the same class, and thus conserve the time of the Primary instructor. Children under school age, 6 years, cannot be enrolled.

HOUSEHOLD GOODS FOR SALE

Kitchen range, beds, bed-lounge, dressers, table, chairs, sideboard and rockers.

CHAS RUNDBERG,
at Dominion Copper Co.'s Office

Notice of Assignment

NOTICE IS HEREBY GIVEN that the Phoenix Steam Laundry Company, Limited, having its head offices at Phoenix, British Columbia, has, by deed of assignment, dated 24th August, 1909, assigned all its personal property, real estate, credits and effects which may be taken under execution, to me ALBIN ALMSTROM, of Phoenix aforesaid, for the general benefit of its creditors.

A meeting of the creditors will be held at the office of the company at Phoenix, at 8 o'clock in the afternoon, on Monday, the 6th day of September, 1909, for the giving of directions with reference to the disposal of the estate.

AND FURTHER TAKE NOTICE that all creditors are required on or before the 10th of September, 1909, to file with me full particulars of their claims duly verified, and the nature of the security, if any, held by them.

And Notice is Hereby Given that after the 10th day of September, 1909, I will proceed to distribute the assets among the creditors of whose debts or claims I shall then have received notice, and I will not be responsible to any creditor of whose debt or claim I shall not then have received notice, for the assets or any part thereof so distributed.

Dated at Phoenix, the 25th day of August, 1909.

ALBIN ALMSTROM, Assignee.
