The Phoenix Pioneer

Twelfth Year — PHOENIX, B.C., SATURDAY, AUGUST 19, 1911 — No. 39

B. C. Mining

Last month in the Big Bend, above Revelstoke, six mining leases were let.

Hugh Harris, who with his three brothers, have several groups of claims near Hazleton have now an excellent showing on their American Boy property. The lead has been exposed for a distance of 3,000 feet. Two shafts have been sunk, both of which have a showing of 2ft of ore, averaging $100 to the ton.

Among the promising properties in the Hazleton district are those of Messrs. Tremble and Pemberton; two silver leads were encountered last fall. A trail has been completed and later development has furnished abundant excitement in the district. Beside their silver-lead showings they have opened up a large body of high grade copper ore, something quite new in that district.

Jim Whittaker and R. Yuill, who have been prospecting in the Slocan, have something to show for their labors. They have staked out three claims on the Blue ridge, 13 miles from Kaslo. An assay from one of their claims ran about 159 ounces silver, with considerable lead and a trace of gold. On one of the claims they uncovered a pinkish quartz, a sample as large as a dinner pail, which they showed at this office was alive with the yellow metal.

The outlook for the Big Casino mine, in the Portland Canal district, is extremely promising. The recent discovery on the two lower claims has increased the value of the company's property to a great extent. Mr. Heidman, the superintendent, stated that with further work on the new discovery he expected to open up a large vein of copper-gold ore which can be economically mined and shipped, as there is an excellent tunnel site immediately adjacent to the railway. The directors congratulated Mr. Heidman on the excellent work accomplished under his supervision.

The Naas valley, in northern B. C., has made its bow to the mining world. A group of nine claims have been located on Porter creek, a branch of White river, emptying into the Naas; another group of four claims have been staked on Strohn lake. The samples from the Porter creek claims show honeycombed white quartz of the "live" variety carrying considerable galena. The lead is five feet wide and can be traced for a great distance; in fact it is supposed to be the same as that on the Strohn group, eight miles distant. Returns of $54, $167 and $188 per ton in gold and silver have been secured.

B. C. COPPER COMPANY'S SHOWING FOR SIX MONTHS

Gold Contents of its Ore Have Shown Substantial Improvement—No Dividend Likely in Sept.—Fuel Property Under Option.

The British Columbia Copper company in June produced 816,676 pounds of copper, 11,742 ounces of silver and 2428 ounces of gold.

For the six months ended June 30 the company produced 5,144,365 pounds of copper as compared with 2,978,227 pounds in the corresponding period of last year.

Production in detail for six months of 1911 and 1910 follows:

	1911			1910		
	Copper	Silver	Gold	Copper	Silver	Gold
January	827,272	9,545	2,376	656,473	7,530	2,513
February	767,470	8,384	2,014	683,234	7,627	2,560
March	804,542	9,690	2,711	891,419	9,191	2,623
April	952,284	13,630	3,127	†340,061	3,611	126
May	976,121	12,703	2,880	.....	.....	.....
June	816,676	11,742	2,428	407,040	5,221	1,550
Total	5,144,365	65,594	15,537	2,978,227	33,080	9,372

†April 1 to 19 mine closed down.

The company has for many weeks been obliged to get its fuel from Pennsylvania at a much higher cost than would be paid to its natural source of supply, the Crow's Nest Pass and other Canadian coal mines, which have been tied up by a strike. Cost of production by the British Columbia Copper company must have increased materially with fully $27,000 more being paid per month for fuel than formerly. Gold contents of its ore have shown substantial improvement which will at least partially offset the greater cost of production.

After having re-entered the dividend ranks and made since the first of the year two disbursements of 2½% each, or a total of 25 cents a share, the British Columbia Copper company, which has a dividend falling due in September, will likely forego that payment. Directors held a meeting last week but took no action in the matter.

An option has been secured on a coal property in order to anticipate future fuel requirements, present operation being much hindered by strikes at properties where coal is secured.

The British Columbia Copper company has been most fortunate in possessing high gold values in its ores which has resulted in a cost at times of less than eight cents a pound, and substantial profits even with copper around 12 cents. Fuel costs of $27,000 a month, however, have offset the advantage of high gold values.

Capt. Johnson's Luck.

Capt. Barney Johnson, of the Grand Trunk steamer Prince Rupert is shortly to find himself a wealthy man as the result of the swift development plans at Goose Bay, thirty miles from Rupert, and the investments of the Granby Mining and Smelting company of Phoenix, B. C., composed of New York, Spokane and Canadian capitalists.

About three years ago, before it had been established that there were valuable copper deposits in the Goose Bay district, an acquaintance of Capt. Johnson suddenly found himself pressed for funds. As the result of a small loan the man voluntarily relinquished a copper claim in the district and perfecting the title Capt. Johnson found that he was located in the hotbed of the Granby mining properties.

Plans have already been made and some of the contracts let by the Granby company for the construction of a smelter, docks, buildings and other properties to the amount of $2,500,000, and members of the corporation say that a big town will develop.

Two other claims, similar in size and value to that owned by Capt. Johnson are being worked, and each is estimated to be worth $150,000. Capt. Jonnson is having extensive surveys and tests of the property made.—Victoria Daily Times.

B. C. Copper Treatment

The B. C. Columbia company's smelter treated 11,121 tons of ore this week, as follows: Mother Lode, 4,681, Napoleon, 70; Wellington, 571; Rawhide, 5,576; Athelstan, 47; others, 176.

Dan Patterson and Angus Mckinnon are touring the northwest. Angus, who claims he is some pitcher (hay), will probably sign on for the season.

Conservative Convention

A special wire to the Pioneer from J. A. MacKelvie, secy. of Yale-Cariboo Conservative Convention, which met at Kamloops, on Thursday, says: "Martin Burrell was re-nominated to contest the seat in the interests of the Conservative party. There was a large attendance and the selection was remarkable for its unanimity.

Liberal Candidate Nominated.

We understand that the Liberals have selected a Dr. McDonald to carry the party stardard in this riding. We do not know the gentleman, and his entry into the arena will have but small effect on the result. But we do know that history repeats itself, and after September 21st, this unfortunate gentleman's name will figure prominently on the mournful roll in company with that of the ill-fated Duncan Ross.

Socialist In The Field

Special to the Pioneer.

"George Houston, late socialist candidate for Winnipeg, in 1908, will be the socialist candidate for parliamentary honors in this riding." This will mean a lively three-cornered fight in Yale Cariboo.

Boundary Ore Tonnages

Following are the returns of the output of the mines and smelters of the Boundary district for the week ending Aug. 19, and year to date:

Granby	.....	585,672
Mother Lode	4,000	193,689
Jack Pot	312	19,290
Rawhide	3,990	136,153
Athelstan	127	4,081
Napoleon	767	7,080
Others	297	1,859
Total	9,493	947,804

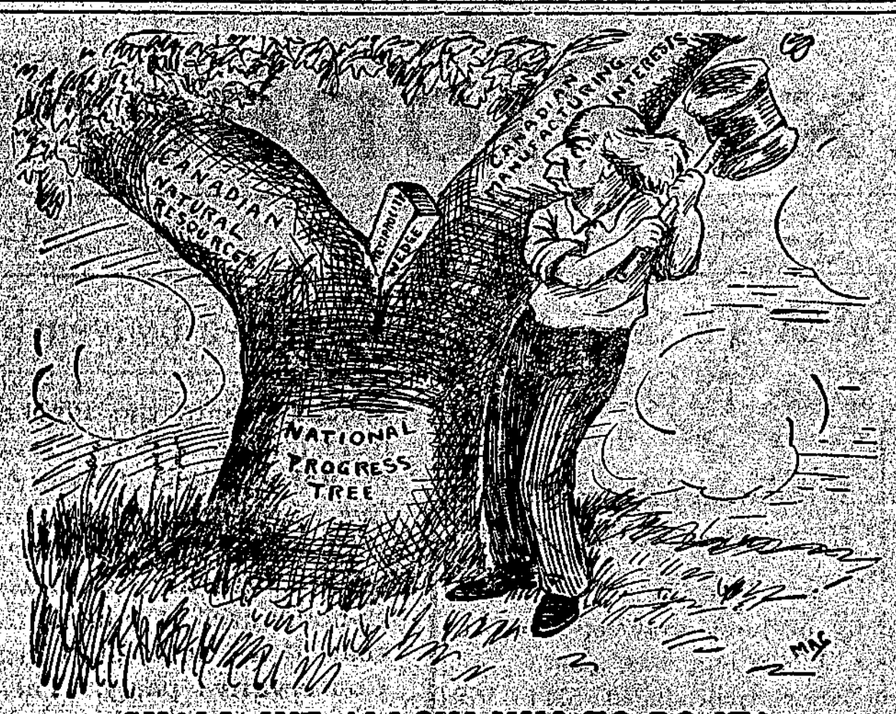
SMELTER TONNAGES

Granby	.....	577,791
B. C. Copper Co.	11,121	380,490

Phoenix vs. Oroville.

One of the fastest games of baseball in the history of the Boundary took place at Greenwood last Sunday, when Oroville attempted to win back their lost laurels by bumping into Phoenix invincibles. Oroville was elected for the first innings at the bat, and Elwin, Phoenix's new pitcher amused himself by fanning them out alternately, to the surprise of the fans, who hurled sarcastic remarks as the batters kept on fanning the atmosphere. Although Oroville put up a stubborn game, they were completely outclassed. The result was 3-0 in favor of Phoenix.

Fred Tysoe left this week on a business trip to Lethbridge and Medicine Hat. He expects to be away for a month.



SHALL WE ALLOW HIM TO DO IT?

Local and General

Born—On August 2nd, to Mr. and Mrs. Wheatley, a son.

Born—On August 15th, to Mr. and Mrs. E. E. Campbell, a son.

Pete Cranley left on Monday for a holiday jaunt through the northwest.

Angus McPherson left for Vancouver on Monday. He expects to settle there.

Alphonse Kobloth, of the Granby Hotel staff, returned to his home in Spokane on Wednesday.

Mrs. H. M. Harrison, who has been visiting at Spokane for a few days returned to town on Wednesday.

E. A. Black is the latest recruit to the Phoenix motor cycle brigade. His buzz-wheel arrived during the week.

Before going away call on the editor and leave a subscription for the little Pioneer. You will then be in constant touch with the town. Try a six month's subscription. It only costs a dollar, and will reach you in any part of the Dominion.

Mayor Matheson returned this week from his motor cycle tour of the Similkameen, Okanagan and Nichola valleys. His furthest point north was Ashcroft. The mayor reports a delightful trip, the weather throughout proving most favorable.

It is recorded that Cleopatra dissolved a great pearl in wine and gave it to Mark Antony to drink. The chef at the Brooklyn Hotel doesn't approve of this method, but serves them whole in the oyster soup. Joe Bush was the lucky pearl diver this week.

A number of householders are taking advantage of the present enforced layoff, and are engaged in the woods around cutting their winter supply of fuel. This is the time boys to fill up the chinks in the shack, rig up the heaters and patch the blankets.

The C.P.R. passengers who left Phoenix, on Wednesday morning, were detained two or three hours on account of the engine leaving the track at Hartford Junction. A special was employed to carry them as far as Eholt. As a consequence the mail was delayed some hours in its arrival from the east.

Alderman Rogers is showing some fine specimens of wheat and oats from his ranch at Stetler, Alberta. The wheat, which was a fair sample, measured 58 inches and the expected yield from the 350 acres is estimated at 10,000 bushels. From 50 acres of oats he expects to reap about 3,500 bushels. Mr. Rogers was surprised last week by a visit from his father and mother, whom he has not seen for eleven years. They left on Tuesday on the return trip to their home in P. E. Island.

Al Saunders, who has been employed in the Granby company's machine shops, left on Thursday for Rossland. He has secured a position at the Centre Star mine.

The circus has come and gone. The show proved a great attraction and was well attended. It will require considerable watchfulness for some days to come on the part of fond parents to prevent an aftermath of broken necks and dislocated limbs among the small fry in their efforts to emulate the stunts seen in the circus.

The Rev. Henry Steele, rural dean of Grand Fords, was in town on Tuesday. He was accompanied by the Rev. C. Lee. It is the intention of the Anglican bishop to station Mr. Lee in this parish and this was primarily the object of their visit. Mr. Lee expects to take up his work in Phoenix about the second week in September.

The long promised and much debated game of football, which was to decide the supremacy of either the Welsh or English, took place on neutral ground at Greenwood on Saturday. The game was stubbornly contested, each side strained every effort to score, but after the full time had elapsed neither side had scored a goal.

John Mulligan was a passenger on Friday's train bound for the land of Cousin Jonathan. A whisper was current that the object of his trip was of considerable importance, and that he expected to return with a partner in the firm. John certainly has the best wishes of his numerous friends in the copper camp. The deed of partnership will in all probability be signed in Walla Walla.

The many friends of James Dewar will learn with sorrow the news of his approaching departure. About the 25th of this month he intends to sever his connection with our city, having accepted a somewhat similar position with a coast firm. The departure of Mr. Dewar will be keenly felt by all in the city; his kindness and geniality have certainly made their mark on all who have had occasion to meet him. The board of managers of the Presbyterian Church, of which Mr. Dewar is a member, will find it difficult to fill his place, and the many patrons of the big store will have reason to regret his departure. Mr. Dewar, who has been connected with the Hunter Kendrick Co. as manager and buyer in the dry goods department, and later with the Morrin Thompson Co. will carry away with him the good wishes of his many friends to his new sphere of action in the provincial capitol.

A Word to the Wise!

¶ When the Quake and fire hit 'Frisco, the chief thought of the multitude was—how to get out, and where.

¶ A few "POOR FOOLS" began to flash good money for what was overwhelmingly considered worthless property.

We all know the answer.

¶ To profit—most of us require experience. Some of us are naturally wise, but the plain thoughtful can save the cost of experience, and acquire the shrewdness of the wise by just stepping in the footprints of the "POOR FOOLS."

¶ This is the time in Phoenix to **BUILD and BUY**—I will prove it too.

No Man is Stronger Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a *secret* nostrum as a substitute for this non-alcoholic medicine OF KNOWN COMPOSITION, not even though the urgent dealer may thereby make a little bigger profit. Ingredients printed on wrapper.

The Shut-Down

A REVIEW.

"Silence falls o'er hill and mountain,
Perfect peace now reigns serene"

On the mining and smelting centres of the Boundary region, and the unutterable boredom of countless consecutive Toronto Sabbaths is bearing heavily on our spirits.

How long, O Lord, how long shall this peace which passeth all understanding continue to clog our energies and deplete our pocket books? Yes, the long averted bolt has finally fallen; eastern coke has proven a failure, and, until the Crow's Nest coal mines commences shipping once more, we face an income of unpaid bills and dismally diminishing meal tickets.

"Lives of working men remind us,
Honest toil don't stand a chance.
More we work we feel behind us
Bigger patches on our pance."

In the meantime, Dick McBride, the "man of destiny," his cabinet and the Lieutenant-Governor, are painfully drawing their salaries, ranging from four to nine thousands of OUR good Canadian dollars every twelve months, and facing three times daily the terrors of the menu and wine list of the Empress Hotel; while thirty odd stout supporters of this most valuable, strong Conservative government are regarding the ripening of our Pacific pride, the Yellow Transparent, (including the variety immortalized by Bret Harte) in the bosoms of their far-flung families (and rancherias), with the comfortable assurance of an income of twelve hundred per year, and the knowledge that "good roads Taylor" is perfecting his excellent series of highways for deserving joy riders. Shall we save our supporters in the inland empire from penury and starvation? Perish the thought! We have their votes, and when next year comes we will fool them with a new battle cry.

Last time it was "McBride, Industrial Stability and New Railroads," next time it will be—but O, hell! What's the use?

Since the excitement of November, 1908, has passed, we have begun to see that the railroads "had" to come, anyway; but where, O! where is that industrial stability?

It is here sure enough, but it is the stability of silent whistles and motionless machinery.

There seems to be every reason to suppose that the shut down will continue for months, if not years, and also that the blow will strike other mines in short order. A scheme is already afoot to pre-empt the hay crop in the streets of the business marts of the Boundary. We are going to oppose this franchise, as the grass will be needed for food by the electors.

Dear Mr. Miller, we love your lawn tennis, but O you pay roll! And where is that government ad-advertising we were promised for our support? We confess that we have been captivated by the good roads policy of our government, (said goodness being emphasised by the government grant to the Salvation Army), as we expected, sooner or later to own an automobile consequent upon our ever present "Industrial Stability," but we confess that the present situation is a terrible test to our loyalty, especially when we consider that we shall be lucky if our auto is replaced by a humble burro to pack our blankets out of a sin cursed country. The road to Greenwood is already thronged with miners going down the hill talking to themselves. We sympathise with these men, although their present conversation is distinctly irreligious, for soon, we fear, we shall have to follow them, to sue for permission to work on the grade, under an unchristian Mike or Ole, with a persistent dessert of prunes and dried apples as the reward of our toil.

Oh! Why left I my Hame?

Our review, this week, of the industrial situation in the Boundary has subjected the editorial gray matter to a severe strain, but we are determined to continue in our next issue, our comments on the present dilemma, together with a solution.

Let Laurier finish his work, was the pathetic appeal of the Liberals at the last general election. Let the people now take a turn and finish the Laurier government.

Greenwood Fall Fair.

Greenwood, B. C., one of the prominent mining and smelting centres of the province is to hold its first annual fall fair on October 3rd, 4th and 5th, under the auspices of the Greenwood Agricultural Association, the corporation, business men and citizens of that hustling city. A large sum has been placed at the disposal of the several committees in charge to ensure success financially and otherwise. Further details will be published later.

Game Law Prosecution.

J. Eope, of Phoenix, was charged at Greenwood, on Monday, with killing game out of season. A witness swore he saw Eope packing away part of the carcase of a deer. Eope, however, denies he has killed any deer. The case has been remanded. Sutton of Grand Forks appeared for the defence.

Fine Showing on McBain Claims

Angus Stewart and his associates have two feet of solid ore on their property in the Omineca country. The property is situated on the Glen mount and is generally known as the McBain claims. They have six men employed and expect to work all winter.

SATURDAY, AUGUST 19, 1911

Martin Burrell Nominated.

The expected has taken place. The Conservative Convention at Kamloops has renominated Martin Burrell, to lead the Conservative forces of the Yale-Cariboo constituency to another victory at the forthcoming election. The decision of the convention, was however, only natural. Martin Burrell, who was elected for Yale-Cariboo in 1908 by a plurality of about 900, has proved himself a figure to be reckoned with by the Laurier government, and his personality, ability and scholarly attainments have been recognised alike both by government and opposition. The importance to this riding in having an orchardist as its representative cannot be overestimated, and this, combined with his knowledge of affairs in British Columbia, fit him admirably as a representative from this province. It seems a pity the Liberals have been so ill advised as to oppose Mr. Burrell's candidature, but such is the case, and to the thoughtful thinker it seems an unnecessary and useless waste of energy, but "fools rush in where angels fear to tread." The return of Mr. Bnrrell, however, is certain, and a repetition of the 1908 Conservative landslide will be the inevitable result.

The Curtain Raised.

The recent speech of the British Columbian premier, Hon. Richard McBride, comes at an opportune time. It fairly rings with the true Canadian spirit, and should be read and re-read by all Canadians who have the future welfare of our glorious heritage at heart. The Hon. gentleman minced no words, but proceeded to lift the curtain and give his audience a view of the bogus article which we are invited to exchange for our cherished institutions and God given freedom. The American press, or rather the United States press, have now given up apologising for the annexation speeches of their men of affairs; they have apparently decided that the farce has been played out, and have now almost with one accord thrown aside the mask of hypocrisy which they imagined for a time was fooling the Canadian people. The ruse was very transparent truly American, but more worthy of P T. Barnum or an ostrich. However, the situation is clearer, those who have been misled are much wiser and are arraying themselves with the opponents of this nation-wrecking measure. The Canadians, and especially the Conservatives, have known all along that the cry of reciprocity was only a miserable subterfuge, and that hidden behind it were massed the iniquitous forces of annexation. The Canadians have been charged with possessing an excess of patriotism, a superfluity of sentiment, and with allowing that sentiment to usurp the place of judgment. In a measure this is quite true, but we infinitely prefer to be the slaves of such feelings rather than sell our place in the empire for a miserable mess of the United States pottage—Annexation.

Plain Truths.

Vote for Borden and the maintenance of British trade connection.

Laurier and larger markets—for the fruit growers of Washington and Oregon.

Reciprocity is at the best a leap in the dark. Why take such a desperate risk?

A vote for reciprocity means a blow against the fruit growing industry of British Columbia!

If British Colnmbia is alive to its own interests not a single Liberal representative will go to Ottawa from this province as a member of the next Parliament.

In 1908 the people of Yale-Cariboo gave Martin Burrell a plurality of some 900 votes over Duncan Ross. Next month the majority of the Conservative candidate should be increased by at least 50 per cent.

British Columbia would have had several more members under a square measure of redistribution. Laurier's mad hurry to rush through reciprocity is alone responsible for this disfranchisement. That the people bitterly resent treatment of this kind will be abundantly made clear on Sept. 21st.

Scobell's Liquor, Tobacco and Drug Cure Permanently dispels the need for Alcohol, Tobacco and Drugs. It counteracts the effects almost instantly—removes all cravings. After taking the treatment there will never be any need to drink intoxicants or use drugs again. Can be given secretly. We have yet to hear of one failure. Mailed under separate cover to any address. Price $5.00 box, or 3 boxes for $10.00. The Scobell Drug Co., St. Catharines, Ont.

Proper Clothes for Men

Whether you are well dressed or not is determined more by where you buy your clothes than by what you pay for them. POINTED PARAGRAPHS

The British post office authorities are about to experiment with aeroplanes as a method of carrying the mails.

Vicars Sons and Maxim, England, has secured the contract for the $10,000,000 Turkish superdreadnaught.

The Guatemalan minister has announced that a $30,000,000 loan will be placed with American bankers within four months.

About 1,061 deposits, aggregating $37,000, were made during the first week of operating the new postal savings bank in New York.

The immigration branch has been advised of the arrival at Rimouski of a number of British journalists who will spend two months in Canada as guests of the Dominion Government.

Sinking like a plummet after she was rammed by the British steamer Silverton, during a dense fog in the Straits of Gibraltar, the French steamer, Emir, carried down with her 93 of her passengers and crew.

By a vote of 256 to 159 the British House of Commons, last week decided that the members of that house should be paid. The remuneration was placed at $2,000 per year, with no travelling or other expenses to be allowed. It was charged by those opposed to the measure that it would fill the house with professional politicians and cause corruption.

An Englishman, said to be an officer of the British yeomanry, was arrested at Bremen, recently, accused of spying on the German forts on the North Sea coast. The prisoner, whose name has not been learned, was subsequently admitted to bail. No details of the alleged spying are made known, but the deed charged is described as of the most daring character.

The captain and first officer of the Canadian steamer, Arramore, were found guilty by a Quebec court, recently, of base cowardice, and their action in leaping to safety and leaving to perish those entrusted to their care was denounced. Capt. Young and Fortin were condemned as unworthy to be numbered among British mariners, whose bravery has ever been proverbial, and therefore they shall be struck from the list and their certificates cancelled for ever.

A letter from U.S. Secretary of the Interior Fisher, to a coal land locator, in Seward, states that it is the intention of the interior department to proceed at once with the final determination of all the remaining Alaska coal claims, so far as this can properly be done, denying those which should be denied, and granting those which should be granted, as rapidly as possible. The letter arouses hope of the speedy opening of the coal mines, and caused elation in Seward.

An Unsolicited Wage Increase.

There stands out conspicuously in what may be called the present depression of the copper mining industry, the recent action of the Copper Queen and Calumet & Arizona Mining companies in voluntarily raising the wage scale of all their miners at Bisbee, Arizona. Beginning Aug. 1, 1911, the new scale of $3.75 per day will supplant the old scale of $3.50 per day.

In these days when we hear so much anent the heartlessness of the average corporation the following reasons for the unsolicited increase will prove interesting (quoted from Walter Douglas, manager): "Our company has made the raise: first, because of the fact that the closing of the mines on Sunday has materially reduced the monthly earnings of the miners. The directors did not feel justified in resuming Sunday work, as they feel more for the health of the individual and happiness of his family, a day's rest each week is essential. While the present condition of the copper market hardly warrants the proposed raise, they are willing and anxious to do everything possible to keep Bisbee an American community and a city of homes."

Such sentiments and action are bound to meet a well merited reward.—Mining and Engineering World.

President Taft Returns Thanks

President Taft has sent a telegram to the New York American expressing his high appreciation of the energetic work of the seven Hearst papers, and of the earnest and useful work of the members of the staff in spreading the gospel of reciprocity. Our local Liberals ought to be proud of such assistance. Appended are a few examples of these papers' "earnest and useful work" on behalf of reciprocity, and for which the President returned his thanks:

The Chicago American's gospel reads:

"The day that reciprocity becomes a fact, the chief interests of Canada will be here in the United States.

"Should we not with reciprocity be far more important in the eyes of Canadians than the imaginary "Empire of Great Britain," which they look to now?

"Is it not a fact that reciprocity bringing the people of Canada and the United States closer together every day, will do more than everything else to promote, eventually, the complete political and business union of the United States and all the great territory north of us?"

The New York Journal evangel sets forth:

"We look forward to the day when this whole North American continent will be one great nation, as it should be."

"The wiser men in Congress realise that the people endorse the very sane and Conservative plan of the President. This Congress will be known as the special Congress which united Canada and the United States in business, while waiting for a closer union in political matters."

Settle the Rug and Carpet question here tomorrow—in a pleasing economic way.

C. F. Edwards, Furniture Dealer and Undertaker

Great Victory for Union Labor.

"The result of the London strike is the greatest labor triumph of the century."

Ben Tillett, the leader of the dockers, teamsters, carmen and other laborers of the world's greatest city, to whose handling of the great strike all concede the victory was largely due, told what their winning will mean for the toilers.

"More than 100,000 workers," Tillett continued, "will benefit by the increased wages and reduced hours they have won, giving them for the first time in their lives, a space of time for recreation. Heretofore they have toiled all their waking hours.

"But the demonstration we have given the world of the absolute power of the wage-earner is more important far than even the betterment in the lot of the London workmen.

"The loyalty and discipline of the organized workingmen was superb. Many of them reported that fights were deliberately planned by the police as an excuse for the importation of troops. The orderly conduct of the strike was remarkable, considering the number engaged and the aggravations to which workingmen were hourly exposed."

Although the London settlement did not provide for a resumption of work until Monday, thousands of the strikers, driven by utter need, returned to their places today and aided in the restoration of normal conditions. This will take several days. The gain to the strikers by their victory will reach a total of more than $3,000,000 yearly.

Glad to be back at their tasks, thousands of the men worked all night clearing up the streets and docks which their strike had congested to such a point that business was practically impossible. At the docks the scene was remarkable. Men crowded the entire waterfront and shopkeepers, whose stores were denuded of food during the struggle, fought madly to secure provisions for their trade.

Deserters from Laurier's Navy.

E. J. Ling, secretary of the naval department, when seen regarding the statement that forty-six men had deserted from the Canadian cruiser Rainbow on the Pacific coast, stated that these desertions had been going on ever since the cruiser went to Esquimalt station. Higher pay elsewhere is given as the reason.

Huge Humpback Salmon.

A humpback salmon weighing 154½ pounds, caught in a trap near Anacortes several days ago, is said to be the largest salmon on record anywhere. It was five feet one and one-half inches long, measured 39 inches round the body, and was at first thought to be a young catecean. The average four-year-old humpback salmon weighs 25 to 30 pounds. The giant fish has been preserved.

The Kootenay Belle mine in the Sheep Creek camp, has produced over $100,000 in gold from shipments during preliminary development. Recently a crosscut tunnel has intersected one of the veins at a considerable depth, and some high-grade ore was encountered.

Tear down that old fence and put a coat of fresh paint on that coal house. It will increase the value of your property fifty per cent.

Printers' Convention.

The 57th session of the International Typographical Union was opened at San Francisco, on Monday. While the union was organised in 1851, this is the 57th convention and not the 57th annual gathering. In 1894 the organisation adopted the biennial idea, no convention being held in 1895 or 1897. A return to annual conventions began with 1898 and they have been held yearly ever since.

The reports of officers submitted to the convention showed that for the fiscal year ending May 31st, 1910, the membership of the union earned $45,602,944, or an average of $933.00 per member. For the fiscal year ending May 31, 1911, the membership earned the total of $49,770,668, or an average per member of 973.00.

The average membership for the fiscal year ending May, 1911, was 51,095, whilst the average membership for the prior fiscal year was 47,848.

These figures represent an increase in earnings of more than $4,000,000, and an increase in average membership of 3,247. The present average paying membership is more than 51,247.

France Ready For War.

Paul M. Doumer, a possible future president of France, says that France has spent hundreds of millions since 1905 on the eastern French forts, which today form a line of defence not to be found elsewhere in Europe. The artillery has been doubled, and the war material tripled since then. It is because this is known that we can be confident of peace being maintained. Our army is ready and it can regard the darkening horizon without uneasiness.
