Prov. Legislative Assembly JUL 4 - 1905 Victoria, B. C.

Legislative Library

The Best of Everything Is For the First Comer

We invite you to come at once and select your requirements from the following:

Ladies' Shirt Waists

We are showing much the finest line in the above we have ever had in stock ranging in price from 75c. to $4.00

New Wash Neckwear

Just received 10 dozen of the above in the very newest designs, selling rapidly at 25c. to $1.50 each.

The Hunter-Kendrick Co. Ltd.
THE BIG STORE

Silk Parasols

This season we are showing a much larger range of Parasols than hitherto, in the very latest creations — plain colorings, Navy, Black, Brown, Green, also Persian designs. Price within reach of everybody from $2.00 to $6.00.

In our Gents' Furnishing Dept. the stock is complete and up-to-date.

See our Show Windows.

Grocery Dept.

Swift's Premium Bacon
Swift's Cooked Ashland Hams.
Swift's Summer Sausage
Swift's Pigs Feet
These are particularly appetizing.

Summer Drinks

Sovereign Brand Lime Juice | Hire's Root Beer

Regular shipments of Strawberries, Oranges, Bananas, Lemons and Lettuce, Spinach, Onions, Rhubarb, and Turnips direct from the growers.

Tetley's Teas

Everything in Hardware.

Fruit Jars all Sizes.

MORRIN, THOMPSON & CO.

ENGINEERS SAW OUR MINES

Noted American Body Here Thursday.

Shown Courtesies By the Citizens.

Sitting in the compartment of the private Pullman coach Olympia, which has been occupied by the martyred president, William McKinley, and also by Prince Henry, of Prussia, on his trip through America, the Pioneer man learned something of the trip of the American Institute of Mining Engineers last Tuesday, while the special train of solid Pullmans was bringing them up from Grand Forks to look at the Granby mines for the first time.

After leaving Spokane the party had spent a day in Nelson, and had been taken up Kootenay lake and down to Bonnington Falls, and banquetted. Then on Wednesday, they went through a similar performance at Rossland, seeing the mines and the Trail smelter, and having another banquet. Thursday was devoted to the Granby smelter and mines—with the banquet left out and ample refreshments and a social time provided instead, something that was appreciated by the travellers.

Thursday morning the train arrived at Grand Forks, and was run around to to the Granby smelter, where it was met by Supt. Hodges and a committee of citizens of Grand Forks. The visitors were shown through the various departments of the reduction works, including the sampling, briquetting, smelting and bessemerizing rooms, and much interest was taken in each, especially with the automatic charging device, now in full operation. The engineers were surprised to see so large and complete a plant as was found.

At noon the party was served a substantial and delectable lunch in the offices and mess house of the smelter, Mr. Hodges and Mrs. Hodges looking personally and particularly after the comforts of the 150 or more guests who sat down to the bountiful repast.

About two o'clock the entire party boarded the coaches at the invitation of the Granby Co., and started up the hill on the Great Northern to Phoenix. Here they were met by local officials of the Granby mines, headed by Supt. Smith and re-enforced by a number of the ladies of the city, and were welcomed to the camp. The members of the party, including the ladies, were taken to the No. 1 level of the Knob Hill mine, where they could see the gigantic ore quarry, note the steam shovel at work and go into the No. 1 tunnel. They also visited the ore crushers and compressor building, and had a chance to see the ponderous machinery that furnishes power for all purposes at the mines.

Following this the party proceeded to the Granby office, which, under the skilful hands of the ladies of the town and the Granby office force, had been transformed into a bower, with festoons o bunting, etc., the entire room being taken up with with tables and booths, where a delicious lunch was served to all, the ladies of the party being welcomed by the ladies of Phoenix—the visiters evidently appreciating the courtesy. A social time was spent here, and it is believed, most enjoyably to all, the train pulling out on the return trip about 6:30, and leaving Grand Forks the same evening for Victoria, where the sessions of the Institute will be held. After that a trip will be taken to Dawson, and the return to the east will be over the C. P. R.

Before the party left Phoenix the members were presented with a special photographic souvenir, consisting of three large views of the Granby mines and smelter, a copy of the last illustrated souvenir number of the Phoenix Pioneer and souvenir postal cards of Phoenix. Besides this a supply of ore samples of high and low grade mines, was on hand for visitors that desired them.

Personnel of the Party.

Among those who travelled with the American Institute of Mining Engineers on this trip to the Boundary and coast were the following: Dr. R. W. Raymond, secretary of the institute, and wife, of Brooklyn, N.Y.; Theodore Dwight, assistant secretary, New York; W. P. Agnew, New York; Mrs. M. B. Ayres and Mrs. B. Ayres, Bound Brook, N. J.; Mr. and Mrs. T. H. Aldrich and Miss Aldrich of Washington, D. C.; W. S. Ayres and wife of Banff, Alta.; Miss Pearl Browning and Miss Elizabeth Browning, of Syracuse, N. Y.: Joseph G. and Mrs. Butler, of Youngstown, Ohio; George D. and Mrs. Barron, with the two Misses Barron, of Rye, N. Y.; Mr. and Mrs. Briggs, Chicago; S. M. Bamberger, Salt Lake City, Utah; W. B. and Mrs. Cogswell, Syracuse, N. Y.; F. Clymer, Reading, Penn; E. S. and Mrs. Campbell, of Denver Colo.; A. E. and Mrs. Carlton, Cripple Creek, Col.; J. B. Cullum, Pittsburg, Penn. and E. V. and Mrs. d'Invilliers, with Miss d'Invilliers, of Philadelphia; B. F. and Mrs. Fackenthal, Easton, Pa.; E. L. Ford and Master Ford, Youngstown, Ohio; D. G. Forbes, Shillingstone, Blandford, England; R. L. and Mrs. Foucar, High Bridge, N.J., W. H. and Mrs. Harrington, and Arthur Harrington, Philadelphia; L. and Mrs. Holbrook, New York; R. W. and Mrs. Hunt, Chicago; Mr. and Miss Holt, Macon, Ga.; Mrs. J. R. Howard, Brooklyn, N.Y.; S. F. Kirkpatrick, Kingston, Ont.; Paul F. King, New York; Mrs. James F. Lawson, New York; John and Mrs. Lilly and Wm. Lilly, Lambertville, N.J.; Major Chas. E. Lydecker, New York; F. W. Lyman and George Lyman, New York; Wm. R. and Mrs. McIlvain, Reading, Penn.; C. T. Olcott, Miss Anna Olcott, and Master Mason Olcott, New York; W. S. and Mrs. Pilling, Miss Mary B. Pilling and Jos. R. Pilling, Philadelphia; I. P. and Mrs. Pardee and Jas. L. Pardee, Hazelton, Pa.; Gen. and Mrs. Chas. F. Roed, New York; Miss Ross, Macon, Ga.; Dr. Joseph Struthers, New York; Miss Florence Starr, Brooklyn, N.Y.; Miss Ella Sealy, Galveston, Texas; Miss Velasquez, New York; A. E. Vaughan, Brooklyn, N.Y.; Walter Wood, Philadelphia.

COMING AND GOING

Percy Wilkinson went over to Rossland this week to get his family.

Dalby B. Morkill returned from a several days' visit to Rossland last Monday.

Supt. T. H. Rea, of the Betts and Hesperus, was a visitor in the city Tuesday.

Ernest Spraggett, road superintendent for Grand Forks division, was in the city last Saturday.

Supt. O. B. Smith, Jr., of the Granby mines, went to Spokane Monday, returning Wednesday.

Mrs. William Spier, of Grand Forks, spent several days this week as the guest of Mrs. A. B. Hood.

Sydney R. Almond, gold commissioner at Grand Forks, was registered at the Hotel Balmoral last Saturday.

Albin Almstrom, wife and children left Thursday to visit her sister at Wallace, Idaho. Mrs. Almstrom will be gone for a couple of weeks.

Mr. and Mrs. A. G. Pease, of Spencer, Mass., the parents of Mrs. O. B. Smith, Jr., arrived in the city Wednesday to spend a couple of months.

Ralph Smailes, of Greenwood, went down to Victoria last Sunday on business connected with the Midway & Vernon railway, in which he is interested.

Robert Denzler, one of the original locators of the Snowshoe and other prominent claims in this camp, but now of Spokane, was in the city this week.

F. W. Guernsey, in charge of the Bonnington pole line survey, was a visitor here Thursday, being a member of the American Institute of Mining Engineers.

E. G. Warren, manager of the Greenwood Electric Co., who has just returned from the grand lodge meeting of the Masons, at Vancouver, was here this week.

Martin Burrell, of the Grand Forks Gazette, G. A. Evans, of the Grand Forks Sun, and W. A. Harkin came up from Grand Forks on Thursday's Engineers' special train.

G. L. Woodard came back from a trip to Oroville this week. He says about 800 men are working on the new railway near there and that the town itself is just as lively as reported, with its 14 saloons, two banks, etc.

Capt. Harry Johns, for years foreman at the Mother Lode and later at the Sunset, who has been spending some weeks in the Boundary, went to Spokane early this week. For a couple of years he has been mining in California.

J G. Gallagher, the newly appointed Boundary roadmaster of the C. P. R, in succession to H. L. Johnston, who is now located at Nelson, will make headquarters at Ebelt. Mr. Gallagher comes here from the Nakusp & Slocan branch.

R. M. Barnhardt, manager of the Second Relief mine, near Erie, in the Ymir district, spent Sunday in this city. The mine is one that is doing very well, with its own ten stamp mill, and employing 17 men. Last month the property cleaned up a net profit of $3,000. C. E. Legg, of this city, is a large shareholder in the Second Relief.

MAKING OF THE TRANSFER

M. & B. to Dominion Copper Company.

$700,000 in Bonds Only to Be Sold.

The Montreal & Boston Consolidated has issued a circular to its shareholders, explaining in detail the transfer to the Dominion Copper Co. of its properties, and giving the basis of the same. The circular also relates the causes that led up to the necessity for selling the mines and smelter of the company, most of which are familiar to the readers of the Pioneer. In brief the Montreal & Boston Consolidated was unable to secure the capital for development and improvements needed at the properties and for making the balance of the payments due on the Dominion group. The circular is signed by the president, Warner Miller, and by the full board of directors, namely, Warner Miller, Frederick W. Brown, Alexander Davidson, A. J. Dittmar, Leopold Herrmann, Robert C. Miller, Wm. R. Sainsbury and Morgan C. Mann.

With the above circular is also sent a copy of the report of M. M. Johnson, mining engineer, on the properties of the company, which will be found on another page of this issue, and a copy of the agreement made between the company, the Dominion Copper Co. and the National Trust Co., Ltd., of Toronto, as trustee. This agreement is signed by the president and secretary of the Montreal & Boston Consolidated; by D. D. Mann as president, and W. H. Moore as secretary, of the Dominion Copper Co., and by Z. A. Lash as president and W. T. White as secretary of the National Trust Co. It is dated May 11, 1905, while the other circular is dated June 15, 1905.

Briefly, the Montreal & Boston Consolidated found that it owed $186.789 to the Dominion Copper Co., being four installments due on mine and four months' royalties; $90,000 to two trustees for moneys advanced, and other estimated liabilities of $43,000, making a total of $320,000. This the officers say they were unable to raise by sales of stock or bonds, owing to the condition into which the company found itself from previous manipulations. So the arrangement was made to sell out to the Dominion Copper Co., exchanging shares on a basis of one of the Montreal & Boston for one of Dominion. These shares were to have been received by the trust company for exchange by June 30th (yesterday)

There are 1,242,724 shares of the Montreal & Boston outstanding, which will be taken by the Dominion Co., share for share, through the trust company. The Dominion Company also agrees to assume and pay debts of the Montreal & Boston, and to do this and provide working capital, will issue $1,000,000 in bonds, bearing six per cent interest and running ten years. Present shareholders are given preference in purchasing these bonds, but an underwriting syndicate has agreed to take all bonds not subscribed for by the shareholders. Bonds are in denominations of $1,000, $500 and $100.

It is intended to issue but $700,000 of the bonds at present, the balance remaining in the treasury of the Dominion Copper Co. Shareholders who subscribe for the bonds, will get them at 90% of the par value, and in addition be given a bonus of two shares of the Dominion Company. That is to say, the buyers of $700,000 in bonds will also secure 1,400,000 shares of Dominion Co.

As to how soon matters will be in shape so that operations can and will be resumed at the mines of the company—a matter that is of intense interest locally—nothing has yet been given out, nor in regard to the new local officials of the company.

Paul Johnson a Visitor.

Paul Johnson, formerly for three years superintendent of the B. C. Copper Co. smelter at Greenwood, but now of the Brown Alaska Co.'s smelter, at Hadley, Prince of Wales Island, Alaska, was in Phoenix this week. He came to meet the American mining engineers, and states that his company will start operations with its 400 ton smelter in September. J. L. Parker, formerly superintendent of the Brooklyn group here, during the Jas. Breen management, has charge of the mining end of the Brown Alaska Co. The ore is copper, carrying three to five per cent in value.

Boundary Mining Notes

Water is still being kept out of the Brooklyn and Stemwinder mines.

The force at the Skylark has been reduced somewhat for the time being.

Five parallel leads have been exposed on the Gold Finch, where work is progressing.

Efforts are still being made to lease the B. C. mine, but the owners wish to sell for cash only.

Improvements are still being made at the Mother Lode, and the boiler capacity is being increased.

A new find is reported from the Oro Denoro, pretty well up the hill. Ten men are employed at the mine.

Ore that runs $300 per ton is being taken out of the Providence, and one car is expected to return $9,000.

The diamond drill is showing up some excellent copper ore on the Wolfard group, on Fourth of July creek.

The tunnel in the McKinley mine, Franklin camp, is now in a distance of 135 feet, and the property continues to improve.

Reports from the Mavis, being operated by a Phoenix syndicate, are to the effect that a solid body of ore, 18 inches wide, carrying free gold, has been found in the workings of that mine.

The main tunnel on the Betts and Hesperus is now in 550 feet, and will be driven 200 feet further to strike the main ore body. Some excellent ore is being obtained from the bottom of the 70 foot shaft also.

Phoenix Won at Bowling.

Thursday evening teams from Grand Forks and Phoenix bowled at the new alleys, the local team winning by 95 points. The following was the score by games:

Dermody Working the Providence.

Foreman Dermody is once more working the Providence mine, after the mix-up of last Saturday, and will probably continue to do so until the courts have decided who should be in control, the Chicago or Grreenwood directors. On the sixth of July the injunctions prohibiting the Greenwood and Chicago people, respectively, from taking control will be heard at Vancover, when there will be a pretty fight among the lawyers. The real point, however, that will decide things is the Diamond shares, which is tied up by the court also, and which case will be tried, it is expected, at no distant date. In the meantime, the mine itself is looking better than ever.

FALLING ORE KILLED LOSTER

In a Raise at the Granby Mines.

Leaves a Widow and Four Children.

Tuesday morning about nine or ten o'clock an accident occurred at the Granby mines, from the results of which Frank Loster died two or three hours later. Loster, with his working partner, J. McKenzie, were operating a drill in a raise between the No. 2 and No. 3 tunnels, an upright hole being put in. The ground had been examined previously and such material as could be thus loosened was barred down, as usual in such cases. Without warning, while Loster was looking up at the working drill, he doing the cranking, a piece of ore weighing perhaps 500 pounds, came down, and pinned him to the floor. It was so heavy that it bent the steel rods of the drilling machine. McKenzie fortunately escaped.

Being taken at once to the hospital, it was found that Loster's hip had been crushed to a jelly, his left arm broken, and he had received internal injuries that were fatal. He died about noon of the same day.

The case is a particularly sad one for several reasons, chief of which is that Loster leaves a widow and four children, the oldest about six years of age and the youngest only three or four weeks old. Mrs. Loster herself is not in good health. She and the children were taken at once to the dying man's bedside, he being conscious till the last. Father Pecoul, the Catholic priest, of Greenwood, was notified to come up the hill and give the dying man the last rites, and the reverend gentleman made a record ride, taking just 30 minutes to reach the hospital, which he did before only four minutes Loster passed away.

Deceased had been employed in and about Phoenix for five or six years, working at the Snowshoe and Granby mines. For several months he was employed at the Mother Lode, and had been in present position but a few months. He was a member of Phoenix Miners' Union, No. 8, was sober and industrious, and was well liked by all who knew him. His taking off is an exceedingly sad blow to the dear ones he left behind.

Result of Inquest.

Wednesday afternoon Dr. Kingston, of Grand Forks held an inquest, the following jury being empanelled: Robert G. Mack, R V. Chisholm, Chas. L. Thornber, Dan Martin, Tuck Collins and J. McDonald.

The witnesses examined were John McKenzie, Dr. R. B. Boucher, John Swanson and James McGregor, mining inspector, and after due consideration the jury returned a verdict of death from accident, no blame being assigned.

The funeral was held under the auspices of the Miners' Union yesterday afternoon, the cortege marching from the hall to the Catholic church, where services were held. Interment was in the Phoenix cemetery.

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of Boundary mines for 1900, for 1901 to 1902 for 1903 for 1904, and 1905, as reported to the Phoenix Pioneer—

VISIT OF MINING ENGINEERS.

Of more than ordinary importance to the Boundary country was the visit of the American Institute of Mining Engineers this week. The coming of a body of men who are acknowledged to be at the head of their profession, technical men who are observant to a degree that counts, should be fraught with good to the country and undoubtedly will be in due time. Having seen in the course of their travels and professional duties, the greatest metal producers and metallurgical works of all kinds—and many of them being directly connected with the prominent mines and reduction works of the world—these gentlemen were in a position to judge impartially of what they saw in the Boundary district—and that is all that could be desired.

The plain truth, the whole truth and nothing but the truth is what should be made known of the Boundary—nothing more or less. It is good enough to bank on, and if statements made and conditions presented eventually proved to be otherwise, that fact would come out. But the Boundary can safely be left to stand on its own merits.

That body of technical men saw conditions just as they exist. They saw some of the cheapest mining here that is done anywhere in the world, and at the same time witnessed some of the most economical reduction of ores that has yet been accomplished. That these simple and pregnant facts were more or less of a revelation to them is already self evident, although they are not men who are given to airing their views to any extent in the press at large.

Of vastly more importance is the visit of men of this stamp to the country than that of the representatives of any other calling. Editors may come and go, and represent the most influential journals on the globe; capitalists may come and see for themselves, and they are also welcome; but the editors may write, and the monied men may be so convinced of the richness of the country that their hands almost voluntarily reach for their cheque books, yet, after all, the business of investing in mines is really done, as it should be, on the advice of men versed in metallurgy—men who, although they are fallible, like mankind in general, nevertheless possess the education and knowledge that the capitalist must rely upon to a large extent in spending his thousands or millions in the mining field. And so we believe that the visit of the American Institute of Mining Engineers was one of the best things that ever happened to the Boundary.

VALUE OF BEING CHEERFUL.

The gentle art of being cheerful is one that is practiced none too much in this day and generation, but it is, nevertheless, an art that is well worth cultivating to the highest state of perfection. In these strenuous times of attempted money getting, if matters do not go to please us to the full, we are apt to be anything but cheerful—in fact to the contrary. And yet, no good result can possibly accrue from a blue standpoint. Keeping a stiff upper lip and having a cheerful expression is half the battle, and nine times out of ten things will not prove to be as bad as we thought, when we look them squarely in the face.

We once knew a minister that made it his rule to invariably have a smile on his countenance, no matter how discouraging things looked, either in his own work or in that of those he came in contact with. And the effect of that smile was remarkable. It cheered all he met, no matter how down in the mouth they felt, and was like a tonic to most of them. It was a valuable asset for that preacher.

In the far west there are many ups and downs, and as a rule they seem worse to individuals than they really are. When they occur, instead of talking, acting and feeling gloomily, how much better it would be for every one to be cheerful, and make the best of conditions then obtaining. Were this rule adopted more generally, life would be much more worth living to thousands of those who are all too ready to feel discouraged at the least little thing that does not happen to go as expected.

And so, we repeat, that the art of being cheerful is one of the best that can possibly be cultivated by young or old in this hum drum, work-day world of ours. It is better for the one who practices it, and better for those with whom he comes in contact continually—whether in mining or farming, or manufacturing or business districts.

The city of Winnipeg now claims a population of 100,000. There seems to be nothing like making claims, and as Winnipeg is growing so fast there is no way of disproving the latest.

It is to be hoped that the warring Providence mine directors will be able to agree pretty soon and work the richest and best high grade property in the Boundary. Fighting in the courts is poor business, if it can possibly be avoided.

John Houston, of the Nelson Tribune has repeatedly printed the statement that the Granby Co. never paid a higher ore freight rate than 50 cents per ton. Hundreds of men in the Boundary know better, and John should get the C. P. R. to revise his copy. For months, after starting shipping, the rate was 75 cents per ton.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

This remedy is certain to be needed in almost every home before the summer is over. It can always be depended upon even in the most severe and dangerous cases. It is especially valuable for summer disorders in children. It is pleasant to take and never fails to give prompt relief. Why not buy it now? It may save life. For sale by all druggists.

Distinct Innovation.

A distinct innovation will be inaugurated this season by the Northern Steamship Company, which operates the magnificent steamships the "Northwest" and "Northland" on the Great Lakes and which sail between Duluth, Chicago and Buffalo.

Heretofore the service on these boats has entirely been European plan but this year it has been arranged to place in effect an American plan service on both the "Northwest" and "Northland." The first sailing of the "Northwest" from Duluth will be June 27th and the "Northland" from Chicago June 24th.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. WALDING, KINNAN & MARVIN. Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c per bottle. Sold by all Druggists

Take Hall's Family's Pills for constipation.

Safeguard the Children.

Notwithstanding all that is done by boards of health and charitably inclined persons, the death rate among small children is very high during the hot weather of the summer months in the large cities. There is probably not one case of bowel complaint in a hundred, however, that cannot be cured by the timely use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. Mr. Frank Riggs, of Franklinville, N. Y., speaking of this remedy said: "I have found it expedient to have a supply of Chamberlain's Colic, Cholera and Diarrhoea Remedy on hand. It has been a family safeguard and while especially beneficial to children, it is equally good in adult cases. I recommend it cheerfully and without reservation." For sale by all druggists

Some Figures About Canada.

Canada's wheat growing area in the west is according to Prof. Saunders' estimate, 171 million acres in extent.

Canada has less than 5 million acres of this area under cultivation, or only 3 per cent.

If one-fourth of the 171 million acres were under wheat it would supply Britain three times over and the home market as well.

By 1915 there will, it is estimated, be 10 millions of acres under wheat, yielding 200 million bushels.

The Canadian west is capable of producing 3 billion bushels of wheat.

Canada's wheat crop in 1904 was 85 million bushels, 60 million of which was produced in the west.

Canada ranks tenth among the world's wheat producing countries.

Canada's wheat crop is nearly double that of the United Kingdom.

Western Canada's grain crop, 1904, yielded 75 million dollars to 25,000 farmers.

Chills Prove Fatal.

If warmth and circulation are not promptly restored, chills result in fatal pneumonia. This necessitates keeping nerviline on hand. Taken in hot water it breaks up a chill in two minutes. By rubbing freely over throat and chest it prevents colds. No liniment so strong, so penetrating, so swift to kill pain and inflammation. Nearly fifty years' record has proved the value of Polson's Nerviline. You should get a bottle to-day.

An Atlas for $1.00.

The Great Northern Railway has issued an Atlas of 56 pages containing up-to-date maps of Iowa, Wisconsin, Minnesota, North and South Dakota, Montana, Idaho, Washington, British Columbia, Oregon, Kansas, Missouri, Nebraska, Wyoming, Colorado, Alaska, Hawaii, Japan, Philippine Islands, China, the United States and of the World.

In addition to this the Atlas contains valuable statistical information as to the states named above, is printed on the very best quality of paper, shows the lines of the Great Northern Railway, and is in every way a commendable work.

This Atlas will be distributed at the actual cost of production and will be sent to any address upon receipt of $1.00. Address, F. I. Whitney, Passenger Traffic Manager, Great Northern Railway, St. Paul, Minn.

Coughers, Hawkers, Spitters!

Public expectoration is against the common law, against the laws of health also. When the throat tickles, that's the time you need "Catarrhozone"; it soothes away the irritation, cuts out the phlegm and loosens the tight feeling. You'll quickly cure that catarrh and throat trouble with Catarrhozone. It positively prevents new attacks and cures catarrh forever and for all time to come. Don't take our word for it, try Catarrhozone yourself. Once used you'll be delighted with its pleasant and helpful influence.

Canadian Pacific Railway Summer Excursion Rates East.

The Canadian Pacific Railway announce low return rates to eastern points account following conventions: Imperial Council Mystic Shrine, Niagara Falls, N.Y., $76.25; International Sunday School Convention, Toronto, $76.65; International Turnerfest, Indianapolis, Ind., $67.65; National Educational Association, Asbury Park, N.J., $85.35; Christian Endeavor Convention, Baltimore, Maryland, $81.25; American Institute of Instruction, Portland, Me., $92.70; Annual Meeting B.P.O.E., Buffalo, N.Y., $76.25. All tickets good for 60 days. For dates of sale, particulars of routes, and berth reservations, apply to local agents, or write, J. S. Carter, D.P.A., Nelson B. C.

What Causes Appendicitis.

The commonest cause of appendicitis is constipation. When you require physic don't use cheap drastic pills—get Dr. Hamilton's Pills which strengthen the stomach, regulate the bowels and prevent any tendency to appendicitis. In one day you'll feel the tremendous benefit of Dr. Hamilton's Pills. By purifying the blood and cleansing the system they prevent headaches, lift depression and drive away weariness. No medicine so successful as Dr. Hamilton's Pills, sold everywhere in 25 cent boxes with yellow cover; get the genuine.

The Illinois Central

Maintains unexcelled service from the west to the east and south, making close connections with trains of all transcontinental lines. Passengers are given their choice of routes to Chicago, Louisville, Memphis and New Orleans, and through these points to the far east.

Prospective travellers desiring information as to the lowest rates and best routes are invited to correspond with the following representatives: B. H. Trumbull, Commercial Agent, 142 Third St., Portland Ore.; J. C. Lindsley, Trav. Passenger Agent, 142 Third St., Portland, Ore.; Paul B. Thompson, Passenger Agent, Coleman Building, Seattle, Wash.

Cured of Chronic Diarrhoea After Ten Years of Suffering.

"I wish to say a few words in praise of Chamberlain's Colic, Cholera and Diarrhoea Remedy," says Mrs. Mattie Burge, of Martinsville, Va. "I suffered from chronic diarrhoea for ten years and during that time tried various medicines without obtaining any permanent relief. Last summer one of my children was taken with cholera morbus, and I procured a bottle of this remedy. Only two doses were required to give her entire relief. I then decided to try the medicine myself, and did not use all of one bottle before I was well and I have never since been troubled with that complaint. One cannot say too much in favor of that wonderful medicine." This remedy is for sale by all druggists.

Halcyon Hot Springs

SANITARIUM, Arrow Lake, B.C.

The most perfectly appointed Health and Pleasure Resort in the West, with a complete system of Baths—including Turkish and Russian. Open the year round. The curative properties of its waters are unequalled.

For Curing all Rheumatic, Nervous and Muscular Troubles.

For Healing all Kidney, Liver and Stomach ailments.

For Eliminating all Metallic Poisons from the System

The grandeur of the scenery is unrivalled Mountains, snow peaks, forests, lakes, water falls boating, yachting, fishing shooting, excursions tennis. The winter climate is unsurpassed for mildness.

COLUMBIAN COLLEGE.

Founded 1892—Incorporated 1893.
NEW WESTMINSTER, B.C.

Provides a Christian home for students of both sexes at moderate rates. Has a preparatory class for junior students, doing grade public school work. Does high school work, confers all high school privileges, and prepares for teachers' examinations. Teaches all branches of a Practical Business Course and gives Diplomas. Gives a liberal education in its Collegiate Course and in the Ladies' Course for M.E.L. and M.L.A. In University work, can take students through the complete Arts Course, and the degree of B.A. can be obtained from Toronto University, which the college is in full affiliation

THE PHOENIX PIONEER

And Boundary Mining Journal

Is published in the heart of the greatest and most productive gold-copper camp in the Dominion of Canada.

In five years more than 2,500,000 tons of ore have been mined and smelted here, with a valuation of over $12,500,000. And the industry is only in its infancy.

The greatest mines of the Boundary are at Phoenix—not one or five miles distant, but in front of, behind and beneath the Pioneer office. Consequently, from our vantage point we believe the Pioneer can give you the best, latest and most reliable news of the mines and smelters of the Boundary.

The Pioneer is worth $10 per year—but it costs only $2, if the coin comes with the order. Make all orders payable to the

Pioneer Publishing Co.,

W. B. WILLCOX, Manager. Phoenix, British Columbia

JOHNSON ON THE BROOKLYN

Emi n t Metallurgist Makes Report.

O Properties of M. & B. Consolidated.

In conjunction with the recent transfer of the properties of the Montana & Boston Consolidated to the Premier Copper Co., Ltd., the report of Mr. Johnson, of Salt Lake City, Utah, on the mines of the former company, has been made public, and is of interest as being from a source free of interest. Mr. Johnson has charge of all the mines of the Standard Consolidated Mining Company, and is also the manager of the Granby Smelter. The report was made by the Senate committee last winter, the report being dated February 18, 1903.

Referring to the size of the properties, Mr. Johnson said that the company's properties contained 3[illegible] acres as follows: Phoenix camp, Brooklyn, Stemwinder, Rawhide, Mountain Rose, Scotland and Idaho, 148 acres; Wellington camp, Athelstan and Jackson, 34 acres; Summit camp, Pinnacle, Montana, Rose and bell, 48 acres; Lancashire Lass, 7 acres; Deadwood camp, Scout, C. O. D., Crown Silver and Morrison, 116 acres.

Railway freight charges to the company's two smelters at Boundary Falls are given as 50 cents per ton from Greenwood and Summit camp, and 17 cents per ton from Deadwood camp.

Values in the Mines.

The Brooklyn development consists of a shaft 350 feet deep and 3,500 feet of underground workings. The lode at a depth of 250 feet shows a width of 40 feet from the surface to this depth, and has been developed to the south of the shaft along the strike at the 150 and 250 foot levels for 500 feet, all in average good ore. Eleven samples on the 250 foot level, carefully taken along the entire distance average as follows: Copper, 1.43%; gold, $1.32; silver, .25; iron, 13.2%; silica, 38.8%; lime, 17%.

All of the ore taken out by the Dominion Copper Co. from the 150 and 250 foot levels, was placed on the dump. Of this, 3,264 tons smelted up to November, 1904, gave the following averages: Copper, 1.6%; gold, $1.52; silver, .25.

From 26,530 tons smelted by the Montreal & Boston Co. the ore taken from the 150 and 250 foot levels gave the following average: Copper, 1.62%; gold, $1.8[illegible]; silver, .25; iron, 13%; silica, [illegible]; lime, 17.5.

Mr. Johnson's estimate of ore available for smelting in the Brooklyn is 262,000 tons, which would contain of safe figures 1.43% copper, $1.32 gold, .25 silver per ton. Copper at 15c. per lb. gives this a gross value of $5.86 per ton. He estimated with reasonable certainty an additional 250,000 tons 100 feet deeper, where sufficient development has occurred to indicate continuance of ore. In addition the Granby Co. has proved ore to a depth of 300 feet by actual work, and an additional 400 feet by diamond drill. Mr. Johnson saw no reason why the Brooklyn lode should not continue to same depth.

He found the Stemwinder developed to a depth of 200 feet and about 1,200 feet of underground workings, the lode being parallel to the Brooklyn, about 1,000 feet east. An average of samples taken at the 114 foot level gave the following values: Copper, 1.4%; gold, $1.00; silver .25. He allowed no available tonnage here, but expected the lode to develop and return a large number of tons. It can be easily and cheaply opened.

He found little work done on the Idaho except on the surface, but the Granby Co. is taking out close to 2,000 tons daily from the adjoining claims, and he expected large deposits of ore would be shown by systematic development. The Great Northern had just completed a track across the north end of the claim, and had exposed ore for more than 25 feet in width. He would only take the claim into account prospectively, but certainly thought it would prove a very valuable one and warrants expenditure to thoroughly prospect and develop it.

At the Rawhide Mr. Johnson found underground workings of about 600 feet at a depth of 180 feet, the ore being taken out of a surface quarry at the rate of about 300 tons daily. His average sampling gave the following: Copper, 1.4 per cent; gold, 90c.; silver, 25c.; gross value, $5.35. He figured 239,000 tons of ore available from the small amount of work done, and after proper development he would expect to mine an additional 1,000,000 tons from the Rawhide.

The Mountain Rose he found to have a vein 20 to 25 feet wide, and explored for a length of 150 feet. Ore contains from 40 to 50 per cent iron, 30 per cent sulphur, and about $1.00 in copper, gold and silver; is valuable only as a flux for ores from the other mines. The Lancashire Lass has a 50 foot shaft, and the vein, from 10 to 15 feet wide, has been stripped for 500 feet, showing continuous ore, with from 2,000 to 3,000 tons on the dump. Same character and metallic contents as Mountain Rose.

At the Athelstan he found no equipment and little work that could be closely examined. Outcrop shows large body of oxidized ore, containing gold and a little silver and copper. From 4,060 tons shipped to smelter and treated books show an average value of $7.67 in gold. Would expect to find sulphide ore below the oxidized zone and would be disappointed if it did not contain good copper values. Consider this a very good prospect.

At the Sunset he found a 200 foot shaft with no work below 200 foot level, and considerable work at 100 foot level, showing a large tonnage of ore from surface down. Ore valuable mainly for fluxing qualities is obtainable at this mine, containing 0.6% copper; 80c gold; 20c silver; 34% iron; 23% silica, and 11% lime. It can be mined at low cost, and there is sufficient available to answer requirements of the smelter for a long period.

Mr. Johnson concluded his report as follows:

"With present method of mining and smelting it is costing the full value of the ore to pay expenses. The equipment of the mines is not of the proper type or of sufficient power for economical work; the mines are not developed far enough ahead and no development is now being done. The prospects of obtaining a very large tonnage of ore on the several properties, particularly the Dominion and Rawhide groups, seem most certain.

"In order to put the mines on a production of 1,500 tons per day and keep the cost of production down to a point that would make the operation profitable, there should be an expenditure of $250,000 for additional furnaces, converting plant, electric power equipment, compressor and mine development. I am satisfied that if this be done a profit of $1.25 per ton can be obtained, based on the selling price of copper at 12½ cents per lb. The result, however, can be assured only upon competent, skilful and economical management, with modern equipment and improved methods both in mining and smelting."

The Source of Neuralgia.

It runs hand in hand with poor blood and weak nerves. Health runs down, nerves get irritable, neuralgia trouble follows. For the moment applications may relieve—but to thoroughly cure, the system must be strengthened with nutritious blood.

What can equal Ferrozone? It increases the appetite, forms abundance of rich life-giving blood, supplies nutriment and building material for worn-out nerves. Ferrozone completely cures neuralgia. Every root and branch of the disease it kills. Absolute success in every case. Stop suffering—fifty cents buys Ferrozone. Fifty chocolate coated tablets in a box at any drug store.

MINERAL ACT.

Certificate of Improvements.

NOTICE.

'Little Chief' Mineral Claim, situate in the Greenwood Mining Division of Yale District. Where located: Skylark camp.

NOTICE IS HEREBY GIVEN that I, John P. McLeod, as agent for William M. Hanna, Free Miners' Certificate No. B91577, intend, sixty days from the date hereof to apply the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 5th day of June, A.D. 1905.

J. P. McLEOD.

THE BEST FRIENDS OF PE-RU-NA ARE THE MOTHERS AND CHILDREN

When Sickness Comes to the Little Ones

It Is the Mother Who Chiefly Suffers.

She suffers even more than the child who happens to be sick.

Her sympathy is deeper than that of any other member of the family.

The mothers look forward with dread to the torrid heat of summer, thinking of their children and the many liabilities to disease that are before them.

Spring and summer are sure to bring ailments, especially among the little folks.

It does not take a mother very long to discover that Peruna is the best friend she has in times of illness among the children.

The doctors may come and go with their different theories and constant change of remedies.

The doctor of years ago gave entirely different remedies than he does today.

Each year finds some change in his prescriptions and in the drugs he relies upon.

A Multitude of Mothers

Have discovered that Peruna is the stand-by, and that in all the ailments of spring and summer to which the children are subjected, Peruna is the remedy that will most quickly relieve.

Whether it is spring fever or stomach derangement, whether it is indigestion or bowel disease, a catarrhal congestion of the mucous surfaces is the cause.

Peruna quickly relieves this condition of the mucous membranes. Its operation is prompt, the children do not dislike to take the medicine, it has no deleterious effects in any part of the body.

It simple removes the cause of the disagreeable symptoms and restores the health.

Peruna is not a physic. Peruna is not a nervine nor a narcotic. Peruna does not produce any drug habit, however long it may be taken. Peruna is not a stimulant.

Peruna is a specific remedy for all catarrhal ailments of winter and summer, acute or chronic.

The mothers all over the United States are the best friends that Peruna has.

The Mothers Hold Pe-ru-na in High Esteem,

Not only because it has cured them of their various ailments, but because it always rescues the children from the throes and grasp of catarrhal diseases.

We have in our files bushels of testimonials from mothers whose children have been cured by Peruna. However, the large majority of mothers who use Peruna, we never hear from.

But we do hear from a great number of mothers who are so overjoyed at some special good they have received from Peruna that they cannot restrain their enthusiasm. They are anxious to share these benefits with other mothers.

The Benefit Which the Children of the United States Have Received From Pe-ru-na Can Never Be Put Into Words.

The chronic ailments it has prevented, the suffering it has mitigated, will never be fully recorded.

But at least this much can be said that the coming generation owes a great debt to Peruna, for it is in the tender years of youth that slight ailments are liable to develop into lasting disease, thus blasting the whole career of the individual.

The mothers who are bringing up their children to-day, to believe in Peruna are doing a great work for humanity.

These children brought up to believe in Peruna from the start, will, when they become heads of families themselves, use Peruna with unquestioning faith.

Pe-ru-na Protects the Entire Household.

As soon as the value of Peruna is appreciated by every household, both as a preventive and cure, tens of thousands of lives will be saved, and hundreds of thousands of chronic, lingering cases of catarrh will be prevented.

Mrs. Thresa Rooke, 258 N. Ashland Ave., Chicago, Ill., Treasurer Ladies' of the Maccabees, writes:

"In our home Peruna is the only medicine we have. Grandmother, mother, father and child, all have used Peruna. It is our great remedy for catarrh of the stomach and head, colds, and female complaints of which it has cured me.

"We find it of great value when my husband becomes worn out or catches cold. A couple of doses cure him.

"If the baby has colic, or any stomach disorders, a dose or two cures her.

"I consider Peruna finer than any doctor's medicine that I have ever tried, and I know that as long as we have it in the house, we will all be able to keep in good health."--Thresa Rooke.

No Doctor Required.

Mr. Edward Otto, 927 De Soto street, St. Paul, Minn., writes:

"I cannot say enough for Peruna. It has done great work in my family, especially for my oldest boy. We had doctored with three or four different doctors and they did not seem to do him any good.

"We gave up hopes of cure, and so did they, but we pulled him through on Peruna.

"We had several doctors and they said they could do no more for him so we tried Peruna as a last resort, and that did the work. Since then we keep it in the house all the time, and no doctor is required."--Edward Otto.

Pe-ru-na Contains No Narcotics.

One reason why Peruna has found permanent use in so many homes is that it contains no narcotic of any kind. Peruna is perfectly harmless. It can be used any length of time without acquiring a drug habit. Peruna does not produce temporary results. It is permanent in its effect.

It has no bad effect upon the system, and gradually eliminates catarrh by removing the cause of catarrh.

There are a multitude of homes where Peruna has been used off and on for twenty years.

Such a thing could not be possible if Peruna contained any drugs of a narcotic nature.

Mr. G. H. Farmer, New Martinsville, W. Va., writes:

"Our little son, Harry, is well and healthy now and we think if we do as you directed us, he will keep his health and grow strong.

"We know that our little son's life was saved by your wonderful medicine, Peruna, and we shall always praise Peruna and use it in our family when needed.

"Should we have any more catarrhal trouble in our family, we shall always write to you for treatment."—G. H. Farmer.

Mr. Howard Andrew Sterner, Muddy Creek, Pa., writes:

"I have Peruna in my house all the time and won't be without it. It is good for children when they take a cold or croup. It cured my baby boy of croup.

"I have introduced Peruna into six families since I received your last letter, and four have seen relief already."—Howard Andrew Sterner.

Pe-ru-na Should Be Kept In Every Household

Where There Are Little Children.

Peruna should be kept in the house all the time. Don't wait until the child is sick, then send to a drug store. But, have Peruna on hand—accept no substitute.

Children are especially liable to acute catarrh. Indeed, most of the affections of childhood are catarrh.

All forms of sore throat, quinsy, croup hoarseness, laryngitis, etc., are but different phases of catarrh.

Mrs. Amelia Sailer, Menasha, Wis., writes:

"I have used Peruna for a number of years. It cured me of chronic catarrh which I suffered with from infancy.

"When my three children were born they all had catarrh, but I have given them Peruna and find it very effective in ridding them of this horrible trouble. I find that it is also good to give them as a tonic and a preventative of colds and colic.

"In fact, I consider it a household blessing. I would not know how to raise my children without it. I am pleased to give it my recommendation."---Amelia Sailer.

Do You Want A Copy?

There are a few copies left of the Midwinter-Number of the Pioneer. They were held for a special order, but were never claimed, and will be disposed of to the first comers.

The issue contains 32 large pages and cover with nearly 100 illustrations, thoroughly describing the large mines and smelters of the Boundary.

Just the thing to send to friends far away, telling them of the Boundary and of Phoenix.

The Pioneer spent a thousand dollars in publishing this number, but you can get them, while they last, at 25 cents each.

COPPER

The new edition of the COPPER HANDBOOK lists and describes 3,311 copper mines and copper mining companies, in all parts of the world, covering the globe, these descriptions ranging from two lines to 12 pages in length, according to importance of the mines. The descriptions are not padded, but give facts in the most condensed and get-at-able form.

There are also fifteen miscellaneous chapters, devoted to the History, Uses, Terminology, Geography, Geology, Chemistry, Mineralogy, Metallurgy, Finances and Statistics of Copper, rendering the volume a veritable encyclopedia of the subject of Copper and everything pertaining to the metal.

It is the World's Standard Reference Book on Copper

Every Miner, Prospector, Investor, Banker, and Broker needs the book. Price is $5 in Buckram binding with gilt top, or $7.50 in full library morocco, and the book, in either binding, will be sent, fully prepaid, on approval, to any address in the world, to be paid for if found satisfactory, or may returned within a week of receipt and the charge cancelled. Address the Author and Publisher,

HORACE J. STEVENS, 36 Post Office Block, Houghton, Mich., U. S. A.

In and Around Phoenix

BRIEF TOPICS OF LOCAL AND GENERAL INTEREST TO PHOENICIANS.

The old reliable, Boyle, the druggist.

Dey, the Jeweler, guarantees all repairs.

Quality first, price next; Boyle, the druggist.

J. L. Martin will buy International Coal shares.

Prescriptions our specialty, Boyle, the druggist.

Dr. Simmons, dentist, Balmoral hotel July 9 to 12.

Dr. Matheson will be at his dental parlors, Bank block, as usual, from July 10th to 14th.

Just received, Enamelled Souvenir Brooches, Hat Pins, Sash Pins, and others. G. E. Dey, the jeweler.

Wedding invitations and announcements promptly executed in the latest styles in the Pioneer Job Department.

Phoenix Socialist League meets Tuesdays, 7.30 p.m., Miners' Hall. Readings from Socialist authors given. Discussion invited.

Miss Howe, matron of the hospital, will probably leave today for a month's vacation, which will be spent in Spokane and Nelson.

Don't overlook the fact that the Phoenix Pioneer makes a specialty of fine job work—the kind that you, mayhap, have been looking for.

W. R. Matheson, who was thrown from his horse on the road to Greenwood some two weeeks ago and badly bruised, is able to be around once more.

James Marshall has decided to heat his new Brooklyn hotel with hot water. The building is now beginning to assume shape with a large force of workmen.

Did you get a copy of the Midwinter Number of the Pioneer for that friend in the east? If not we have a few left that can be had at two bits each, ready wrapped for mailing.

James McGregor, of Nelson, provincial mining inspector, came into camp Wednesday, and examined the place where Frank Loster was killed at the Granby mines the day before.

Supt. A.B.W. Hodges, of the Granby Co., and wife, went to Victoria Tuesday with the mining engineers' party, and will be gone a couple of weeks, taking in the Portland fair before returning.

William Fleet Robertson, provincial mineralogist, was here Thursday with American Institute of Mining Engineers returning to the coast the same night. It was his first visit to Phoenix in three years.

Jack Dale, an employee of the Granby mines had the misfortune to fracture his leg Thursday evening while riding to Greenwood. He was taken to the hospital where the injured member was reset.

The Miners' Union, through its building committee, having settled on the location for the new opera house and hall, is now looking into the best kind of plans for the erection of the new building. Something will doubtless be known about it before long.

Prof. Buell will give one of his spectacular entertainments on the evening of July 11th, at Miners' Union hall. It will be given under the auspices of the Catholic Ladies' Aid society, and Prof. Buell's "Tour Around the World" is well spoken of by the press wherever he has been.

Rev. C. N. Whittaker, pastor of the local Methodist church, arrived last Saturday to take charge. Mr. Whittaker has been stationed at Dawson for the last two years, and has an interesting fund of reminiscences of that much advertised gold camp. He preached for the first time in Phoenix last Sunday.

W. H. Fisher started Monday on the grading to be done on Dominion avenue for the Great Northern, to complete the work left undone for the city last winter. His teams worked for several days but striking some rock, Mr. Fisher is now consulting with Engineer Hastie, of the Great Northern in the matter.

John Jordan, of the firm of Burns & Jordan who spent several months here last year, was in the city yesterday on his way from Oroville to Spokane. The firm has one of the best pieces of work on the Great Northern extension. The tunnel they are starting to drive has been increased in length to about 1,800 feet, and means a year's work for the firm. At present they have 150 men on, and expect to have a compressor plant to furnish power. Altogether, nearly a thousand men are now employed on that piece of railway.

Boyle is the druggist.

Souvenir Jewelry at Dey's.

Dey, the Jeweler for Enamelled Souvenirs.

Donald McCallum, of Grand Forks, was in the city last Thursday.

Jupiter Pluvius has been favoring this locality in no small degree of late.

No gathering in weekly session was held by the city council last Wednesday.

Isaac Crawford is taking his daughter Irene on a week's trip to Nelson and Sandon.

Lloyd A. Manly, of Grand Forks, came up from the Forks with the mining engineers Thursday.

The water and light company has begun work of putting in a four inch main on Old Ironsides as far as the C. P. R. depot.

Mrs. McKelvey has leased the Dominion house, and is having it repaired. H. A. Wright is applying for a license to open the bar in the same house.

All Over the Boundary

Geo. A. Fraser, M.L.A., of Grand Forks, went down to Victoria this week.

It is reported that Grand Forks is to have a warehouse of the Standard Oil Co.

The members of the Odd Fellows lodge at Grand Forks, with their friends are taking an excursion to Curlew lake today.

The Anglican people at Eholt held a Sunday school picnic Wednesday, Rev. Steele, of Grand Forks, being in attendance.

The Grand Forks Conservative Association held a meeting Monday and passed some resolutions regarding southeast Kootenay coal licenses.

Midway people are much excited over the probability of immediate railway construction at that point. And there seems to be reason for the excitement.

Mayor G. R. Naden, of Greenwood, is reported to be out west of that city with Great Northern right of way agents, securing property needed by the company.

Judge Andrew Leamy, of the county court, has been confined to his home at Grand Forks by a complication of diseases, since his return from New Westminster.

Miss Ethel, third daughter of Chas. and Mrs Hay, was married on Thursday at Grand Forks to L. W. Hale, the ceremony being performed by Rev. J. R. Robertson.

J. F. Royer is considering making the Chesaw-Hedley end of his Phoenix-Hedley stage line daily instead of three times a week, as at present. He will also probably extend the line to Princeton, 23 miles beyond Hedley.

The survey for the Bonnington Falls high tension pole line from Rossland to Greenwood, has now reached Fourth of July creek, and will soon reach Phoenix. The contract for clearing the twenty miles from Rossland to Cascade has been let to W. P. Barber, and has been started on.

Charles H. Thomas, proprietor of the Cascade hotel, at Cascade, won out in the strenuous fight before the license commissioners for the only license in that place. The defeated applicant was J. A. Bertois, the question being decided last Saturday at Grand Forks, at the meeting held for that purpose.

The owners of the McKinley mine in Franklin camp, have offered to build three miles of road if the government will build the remaining six miles, to connect with the existing wagon road from Grand Forks. The Grand Forks Board of Trade endorsed the matter strongly as did the city council of that place. The McKinley people have started work on their end of the road.

V., V. & E. Bill Passed.

Press dispatches this week state that the much discussed V., V. & E. bill, which has been before committee of the House of Commons at Ottawa for some weeks, has at last passed the committee and reported favorably on, notwithstanding the warm opposition put up by the C.P.R. Politicians assert that this means the bill will undoubtedly pass the house, and the senate also.

EAGLES HAD CROWDED HOUSE

Ladies' Night on Friday Was a Great Success.

Last Friday night the Eagles of Phoenix gave their Ladies' night, being an entertainment and dance, and its popularity was attested by the fact that rarely has there been such a big crowd in Miners' Union hall. D. Oxley was the chairman, the programme consisting of eight numbers. Reynolds and James gave an overture, Mrs. Danny Deane a mandolin solo, and Lewis and James represented Phoenix Policemen; Albert Brazell rendered a vocal solo pleasingly, and Percy Wilkinson in costume gave a sword dance and Highland fling. The Royal German band of 18 pieces, with Herr Spoopendike as leader, entertained the audience with sweet (?) strains, and a sparring exhibition by Danny Deane and Percy Wilkinson was also enjoyed.

One feature of the programme was a sketch called, "Razor Jim," in which William Fleming, Harry James, Leslie Walters and Johnny Lewis took part. For the sparring J. Marshall was the timekeeper and W. Callahan the referee; and W. Ludwig acted as floor manager for the dance, which lasted for several hours after the programme was given. The event was generally voted a great success, and was much enjoyed.
