FOR YOUR

SUNDAY DINNER

Look over the List of Good Things at the BIG STORE

New Potatoes, 8 lbs. for 25c.
New Cabbage, 6 cts. per lb.
New Turnips, 5 cents per bunch
Cucumbers (large) 20c. each
Ripe Tomatoes, 20c. per lb.
Water Melons, 6c. per pound.
Ripe Plums, 15c. per pound.
Ripe Apricots, 15c. per pound.
Ripe Peaches, 3 lbs. for 50c.
Pine Apples, 25c. each.
Red Raspberries, 3 Baskets for 50c
Green Apples, 10c. per pound.
Black Berries, 20c. per basket
Strawberries, 15c. per basket
Corn on Cob, 65c. per gallon can
Fresh Brandon Creamery Butter, 3lb. $1.00

LETTUCE, SPINACH, RADISHES, YOUNG ONIONS, PIE PLANT, etc., in great abundance.

CHERRIES for Preserving are at their best, leave your orders TODAY for delivery the first of the week.

TO EXPLORE GRANBY TO 1000-FOOT DEPTH

Important Diamond Drilling Operations Commenced---New Area of Ore is Located on Granby Property--Graves Interviewed

What is expected to prove an important exploratory undertaking in the history of Granby mines was commenced yesterday, when a diamond drill started operations on the 400 foot level of the big producer to bore to a depth of one thousand feet.

It has been generally understood that ore bodies of low grade copper propositions in the Boundary district do not run down, though there has never been any satisfactory demonstration that there is not ore at depth. Up to the present time the ore bodies have been found to be so large that it has never become necessary to develop at great depth, that is below 600 or 700 feet. The starting of deep holes from the lower level of the Granby mine, which is practically 800 feet below the surface, opens up a new era in deep mining in the Boundary district. It is for the purpose of determining whether or not there is minable rock at depth that this special exploratory work has been undertaken. Operations are in charge of Boyles Bros., diamond drill contractors for the Granby, and the cores will be awaited for with interest. The success of the bores will mean m ch to both the Granby company and the Boundary mining district generally.

NEW ORE STRUCK

Particularly gratifying results have followed recent diamond drilling on the southern part of the Knob Hill claim of the Granby group, hitherto undeveloped. No information concerning the strike could be obtained from O. B. Smith, superintendent of the Granby, but the Pioneer learns that the drill has gone through 16 feet of good average ore and the extent of the body has not yet been determined. While the new ore struck is only a continuation of the ledge in the Knob Hill, from which shipments have been made for years, it at least represents one of the probably large blocks of ore in the Granby property which were not known to Dr. Sussman, the engineering expert of New York who examined the Granby some months ago, and whose statements concerning the property were apparently responsible for the drop in Granby shares from $100 to $35. Dr. Sussman, however, has probably made himself sufficiently famous, even though the mine may smile at his pessimism. It is not possible to state the tonnage located by recent piercing of the drill, though coupled with the fact that there is still considerable of Granby's area unexplored, it is safe to state that development work is being kept well up with even the large shipments of ore and an expert will still find his six millions in sight a year or two hence.

JAY P. GRAVES INTERVIEWED

"We are treating about 3200 tons of our own ore and about 300 tons of custom ore daily at the Grand Forks smelter," said Jay P. Graves, general manager of the Granby company, in an interview in Spokane on Monday. "Owing to the low price of copper, we do not aim to work at full capacity at present, in which respect we are following the example of the Consolidated and other big copper producers. Diamond drill work, which is in progress in the lower levels of the mine, is disclosing highly satisfactory ore bodies."

GRANBY SHARES

Granby shares dropped to $20 last week, without apparent reason, but quickly strengthened to $26 and are now $30. Granby directors are being severely criticized for not making a statement for shareholders, but the silence, which is found both at the mines and the head office, shows the determination not to lend any support to the market price. It is understood a detailed report is now about completed, though it is quite probable it may not be made public until the annual meeting of the company in October.

GRANBY'S RESERVES

In an article criticizing the Granby for withholding from stockholders information concerning the property, the Boston News Bureau says:

"The recent statement by President Langeloth that ore "available for stoping" at the present did not exceed 6,000,000 tons, does not, in itself, indicate a deplorable state of affairs—there are few vein mines which can point to larger reserves—and at any fair price for copper there would seem to be net profits in this tonnage alone more than sufficient to cover the present selling price of the property."

GRANBY GOOD BUYING

Geo L. Walker, in Boston Commercial, says: "Granby stock sold down to $20 this week, but quickly recovered to $26. At the low price the company's capital stock was selling in the market for $2,970,000. If it is assumed that there is no more than the 6,000,000 tons of ore in the property, which an engineer recently found blocked out, this ore was selling, when the stock was at its low price, for 49 cents per ton, and this without making allowance for any of the company's other assets at all. It has been estimated that its investment in the Crow's Nest Pass Coal company will eventually be worth the par value of Granby's entire capital stock. Its smelter alone is probably worth nearly one-half what the stock is now selling for in the market, and the company must have upwards of $5 in liquid cash assets behind each share of its stock. I believe Granby will again sell above $100, and I advise its purchase."

BITUMINOUS COAL FOUND AT MIDWAY

Seam of High Grade for Coke and Steam Uncovered

High grade bituminous coal has been found at Midway. One seam was recently uncovered and prospectors are at work on a second one.

Experimental work has proved this coal excellent for steaming and for coke. The owners will try to prove the extent of coal available at that point and if they succeed in establishing the fact of quantity the mere location of the find will make it a success and the property will then be thoroughly developed. At the present time the coal which the C.P.R. uses in the Boundary district has to be brought from the Crow's Nest at no inconsiderable expense.

Mining Records

Following are the locations, certificates of work, bills of sale, etc., recorded in the Government office, of the Grand Forks mining division, from June 23 to July 6, inclusive.

RECORDS OF LOCATIONS

K. K. fraction, Franklin camp, F. M. Kerby; Climax fraction, Franklin camp, relocation of Climax fraction, Thomas Newby; M. K. fraction, Franklin camp, H. C. Kerman; H. B. Fraction, Franklin camp, H. J. Birnie; Gracie; east of Coryell, relocation of Gracie, I. R. Poole.

Province, and Commonwealth, Franklin camp, Larsen et al.; Crystal Copper, Gloucester camp, Russell et all.; Doris fraction, Franklin camp, M. M. Kerman; Fidelity, Gloucester camp, Thomas Newby; J.P., Franklin camp, P. Donaldson; Ieta, McKinley camp, Morrell et al.; Maggie, McKinley camp, Morrell et al.; Marx and Moose, Wellington camp, surveys, D. L. McIntominey; Piper Lad, Seattle camp, Stewart Carruthers; St. Joseph, Central camp, H. Johnson; Ready Cash fraction, and R. Kipling fraction, Wellington camp, Cook et al.; C.P.R. fraction, Volcanic mountain; two years, W. K White; Big Raymond, two years, McKinley camp. Bonnacie et al.

CERTIFICATES OF IMPROVEMENT

Gopher and Shaw, Summit camp, Edgar L. Burden; Banner, Franklin camp, Fred W. Russell 16-32, Wm. Spier 3-32, Jean H. Miller 2-32, E. R. Northrop 3-32, Donald McLaren 8-32; Rio, Franklin camp, Donald McLaren ½, John McLaren ½.

TRANSFERS.

All of A.B., C.D, E.F., ½ Omega, ½ Delta, Christena lake, W. H. Beach to H. D. Cameron.

George Chapple, who for a number of years has conducted a pumbing and bicycle shop in Grand Forks, has sold his business in that city and leaves next week for Spokane, where he will make his residence in future. Mr. Chapple was one of the progressive citizens in Grand Forks and is well known throughout the Boundary and his many friends will regret to learn of his departure.

CONSTRUCTION WORK AT THREE POINTS

On the New Kettle Valley Railway

It is only a matter of a few hours before the first sod on the Kettle Valley railway will have been turned and the dirt will be flying.

Macdonnell, Gzowski & Co. have been awarded the contract for the thirty miles of the road leading out of Merritt up the Coldwater river, in fact they have secured the contract for the entire line from Midway to Merritt. Construction outfits were shipped from Field for Merritt on Wednesday.

James Macdonnell, head of the contracting firm, will be here Saturday to personally direct the inauguration of work. Pat Gorman, one of his worthy lieutenants, has been here for several days. A. V. Macdonald, another railway contractor, has been in Merritt since last night.

"We will have our end of the work well in hand and ready for the contractors to go ahead" declared Chief Engineer McCullouch, and he is one of the busiest men in the camp at present.

"Will Princeton get a branch line?" was asked of the railway man. "Yes, I am more than confident that Princeton will have connection with the Kettle Valley, and in that way you would also have a short route from Merritt to the Similkameen."

In a letter from J. J. Warren, president of the Kettle Valley railway the editor of the Nicola Valley News was informed that work would be rushed to an early completion.....Construction has already started at the Midway end and in a few days the dirt will fly at Penticton thus giving construction at three points. Mr. Warren has gone east to Toronto but will return very shortly.—Merritt News.

The Trunk Road

The provincial government is spending $5,000 this year on the trunk road which is being constructed between Castlegar, Trail and Rossland. It is intended that this shall be a trunk road from Alberta to the coast, and the new road between Rossland and Trail will form part of it. It is not yet known just what direction it will take between Rossland and the Boundary, but when complete, it will be a connecting link of inestimable benefit to the country. The government has pursued a wise policy in making stretches of road wherever there have been settlers living, in order to give them an outlet. In time these various and numerous stretches will be linked and the result will be a fine trunk road from Vancouver to Alberta.

W. J. Loutitt left on Wednesday for Denver, Colo., to attend the eighteenth annual convention of the Western Federation of Miners, as representative from Phoenix union, No. 8. He was accompanied by Lester McKenzie of Greenwood and W. E. Hadden of Grand Forks.

Build Your Own Fortune

BY BUYING A GOLD BOND from the International Investment and Realty Co. of 403-4 Eagle Block, Spokane, Wash.

A Cumulative Bond matures in Ten short years by paying $6.13 monthly, for which you receive 6% interest compounded annually. In Ten years you will have paid in $735.60, for which you will receive $1,000 in a heap.

Spokane Real Estate a specialty, on small cash payments and Easy Terms. Place your order with our Local Agents.

Cosgrove & McAstocker

We cordially Invite YOU to call and see us when visiting Sdokane

ODD FELLOWS LODGES INSTAL OFFICERS

New District Deputy, David Whiteside Officiating

The regular semi-annual installation of officers of Snowshoe lodge, No. 46, I.O.O.F., Phoenix, took place in the local hall on Monday, the newly-appointed district deputy grand master, D. Whiteside of Grand Forks, officiating, assisted by Past Grands Rutherford, McDougall, Fleming, Pickard and Logan. Following are the officers for the current term: Noble Grand, John P. McKenzie; vice grand, D. Paterson; past grand, T. A. Love; recording secretary, T. A. Bean; financial secretary, W. A. Pickard; treasurer, J. F. McDougall; chaplain, F. E. Brine; warden, R. K. Morrison; conductor, S. McLeod; R.S.N.G., H. Hazelwood; L.S.N G., W. Ross; R.S. NG., D. Tyson; L.S N.G., P. Cranley; R.S.S, C. Wootton; L.S.S., T. Pilkington; inside guardian, A. G. Howe; outside guardian, J. Kuhle.

At Greenwood on Tuesday evening the following officers were installed in Boundary Valley lodge, No. 38: Noble grand, F. E. Brown; vice grand, W. G. Pond; past grand, F. B. Holmes; recording secretary, W. Murray; financial secretary, G. B. Taylor, P.G.; treas. A. E. Braithwaite, P.G.; chaplain, L. L. Matthews; conductor, D. A. McDonald, P.G.; warden, G. Murray; R.S N.G., A. Logan, P.G.; L.S N.G., W. Elson, P.G.; R.S.V.G., W. Fleming; P.G.; L.S.V.G., J. L White, P.G.; inside guardian, S. P. Dixon; outside guardian, C. Bierce.

Mr. and Mrs. Murdock McIntyre returned Saturday from a trip to coast cities. Mr. McIntyre says there is a cyclone of business at the coast and it is quite probable he may meander that direction soon himself. He returned by way of the Nicola valley and visited his brother, William McIntyre, formerly of Phoenix, but now owning the Coldwater hotel at Merritt, one of the most up-to-date commercial houses in the upper country. Mr. McIntyre states that there are indications of considerable activity in railway building in the Nichola country.

Mine Rescue Apparatus

Victoria, July 14.—The mines department of B. C. of which the premier Hon. Richard McBride is head, has placed orders with the Draeger oxygen apparatus company of Pittsburg, Pa., for complete mine rescue apparatus for the equipment of three mine rescue stations in the principal coal mining areas of British Columbia, one of which stations will be established in the Crow's Nest Pass district and two on Vancouver island, these stations being in charge of the respective inspectors, and in accordance with the amendment to the "Coal Mines Region Act" which became law of the province on the 10th of March last. It is both hoped and expected to have these stations established before the close of the present year, thereby immensely augmenting the modern facilities for life saving in the event of colliery disasters should any such occur in future.

Christena Lake

Christena Lake continues to grow in popularity as a summer resort and large numbers are now wending their way to Boundary's beauty spot to spend their summer outing, while others are arranging to arrive later on. A number of cottages are now in course of construction and the choice locations on the waterfront are being quickly taken up. T. B. Cosgrove, who recently purchased two acres adjoining Ole Johnson's Christena Lake hotel site, went to the lake on Wednesday to improve the property and will probably build a cottage. T. McAstocker of Nelson has also bought some acreage close to Levalle point which will be cleared and put in shape. A wagon road to the head of the lake is now being constructed.

Handsome Donation

J. J. Strutzel, secretary of the Phoenix general hospital, received this week a check for $25 from the Hamilton Powder company, as a donation to the hospital. The hospital is deserving more general support than it receives and the board of directors greatly appreciate the public-spiritness of this popular powder company, the present donation being the second check for this amount received from the Hamilton company.

HEDLEY GOLD MINING COMPANY IS LISTED

Nickel Plate Company on Boston Exchange

The Boston Stock Exchange has listed the shares of the Hedley Gold Mining company, which is largely owned by certain officials of the United States Steel company, together with Pittsburg and Duluth interests.

The company owns the Nickel Plate group at Hedley with reduction works of 40 stamps and equivalent cyaniding plant, and also owns the Copper Flat mine, near Silver City, New Mexico, now being explored.

There have been three dividends declared by the company, since the incorporation of the company last August, as follows: $35,520 on January 4, 1910; $36,000 on April 1, 1910, and $36,000 on July 1, 1910.

The directors of the company are: I. L. Merrill, president; W. B. Dickson, vice-president; C. D. Fraser, secretary-treasurer; W. D. Thorton, C. A. Congdon, George E. Tener, Marcus Daly, F. E. Searle, and Warren A. Akers The principal office is at 42 Broadway, New York.

Wants Mining Properties

W. H. Minns, of Cascade, writes to the Pioneer enquiring for mining properties which will stand inspection. He says: "I have received a letter from a prominent company promoter in London, England, asking me to find really reliable mineral properties (no matter how large), and if passed by a mining engineer will be financed promptly. Fullest particulars will be required and can be sent to me at Cascade, B.C., or by an interview. If I visit any property I would expect all my expenses to be paid, plus ten per cent commission in the event of a sale."

This is an opportunity which the mine owner in the Boundary who has "the goods" should not let pass.

The benedicts put it all over the bachelors at baseball in the park last Sunday before a large number of spectatore. The bachelors are slated to retrieve their lost honors tomorrow afternoon.

MEN'S SUITS

A great many of the best dressed men in this community have discovered how to have suits that fit them perfectly, and also how to do this without paying exhorbitant prices. Have you discovered how to dress well? If not, you had better visit our store and examine our range of suits, and after you have examined them you will have learned the secret of dressing well, and also by buying one of our stylish fitting suits.

Our range of clothes have that "distinctive class" which the swell-dressed men are always looking for and so seldom find in ready-to-wear clothing. The range of patterns is very large.

For Aching, Sore and Sweating Feet

In Summer the feet ache, perspire and feel damp and uncomfortable. Cool shoes and thin stockings help some, but not enough

If You Want Real Foot Comfort Use Eas'em

Dust a little Eas'em in the shoes, sprinkle some on the stockings. It absorbs moisture and checks pespiration to a large extent. Then the feet are comfortable, do not swell, do not ache.

Its fine when breaking in new shoes summer or winter, makes them slip on easily, overcomes friction at the vinching places, prevents formation of corns and blisters.

United Wireless Swindle

The following letter and editor's reply are taken from the Saturday Sunset of recent date:

Dear Sir:—Could you or any of your readers inform me if there is any legal method of getting after those agents who have been selling worthless United Wireless stock? Could they be prosecuted for obtaining money under false pretenses? They, one and all, from Grant at Winnipeg to Megraw at Hedley, B.C., have the one story that they are not rogues, but only credulous fools. In the case of Megraw, I think he would find it hard to prove in a court of law that he sold the stock believing it to be even half the value he sold it at. It can be proved that he was warned by men in financial circles and who were in a position to judge its value, that the stock far from being at a premium was so depreciated that banks and other financial concerns gave it a very nominal value. Over a year ago he was shown an article in the World's Work, which warned the public to beware of wireless stock and added that there was one company at present unloading at 200 to 300 per cent. premium on the Pacific coast. It explained the modus operandi and instructions given to their agents to best methods of disposing of stock, and if he is not an absolute idiot, it must have struck him as a curious coincidence that he had been following those instructions to the letter. The article went on to say that from time to time items appeared in the local press about wireless, these purporting to be news items, whereas they were paid advertisements. By another curious coincidence items from time to time appeared in the Hedley Gazette, of which Megraw is the editor. A paper that lends itself to becoming the paid advertising organ of a swindling company should be suppressed. Megraw has the unblushing effrontery to publish an article entitled "Like Bolt from Blue"; a more inappropriate heading could not have been chosen as the crash has been expected for months, and several warnings have been given to sell the stock, which by another curious coincidence, although being sold at $30 to $40, would not fetch half that even in the local market. Sneering at tin horns is hardly good taste, in one, who has yet to clear himself of the imputation of having knowingly sold inflated stock. It would be more satisfactory to the public to know what efforts Megraw, and other agents made, to find out from independent sources the value of the stock they were handling after repeated warnings. If any of them can publish a letter written by them and answer received from any chartered bank or stock brokers in New York, or elsewhere, of undoubted integrity, saying that United Wireless was gilt edge security it would go a long way to clear them of the imputations they at present lie under. Thanking you in advance for any information or advice you may tender.—I am etc.,

ANXIOUS INQUIRER.

Keremeos, B.C., June 25, 1910.

It would appear from Anxious Inquirer's letter that the Attorney-General should investigate the methods employed by agents who foisted this swindle upon the public in British Columbia. Where culpability can be shown the Department of Justice in British Columbia should not be behind the machinery of justice in the United States where they are gathering in the big ones concerned in this gigantic steal.—EDITOR.

Moral View of Copper Cartellment

Boston—D. Houston & Co. in their July copper circular say: "There is an aspect of the situation which sustains a very vital relation to the copper problem, and that is the custom of working some, not all, of the mines 365 days in the year. The cessation of Sabbath operations at all mines would go a long way in effecting a cure of the situation. And besides, from moral, humanitarian and economic consideration, the discontinuance of a system in industrial life requiring a seven-day week of toil would be a move forward in the right direction. It is utterly incompatible with the principles of Christian civilization to exact labor not at all necessary seven days in the week, and the practice is also undemocratic and productive of anything but genuine good. A change to a working week of six days at all the mining camps would go far in bringing about a healthy readjustment of the whole situation in a year's time. On the basis of affecting say but 50% of United States output the cutting out of operations one day in seven each week in itself would make a difference in production, calculated at the rate for marketable copper produced in 1909, of 100,000,000 pounds less metal per year to pile up."

BOUNDARY & KOOTENAY 1909 ORE RECORD

Shipments and Smelter Receipts For Year to Date.

Ore shipments from the various mines of Boundary and Kootenay, and the receipts of ore at the smelters of Southeastern British Columbia for last week and for 1910 to date are as follows:

SHIPMENTS.	WEEK.	YEAR.
Boundary	35,160	920,019

PROVINCIAL.

Strawberries are a great crop in the Kootenays.

Hog ranching on an extensive scale is being established near Revelstoke.

The Tulameen district has up to date produced 10,000 ounces of platinum.

The Burrard cannery, at Steveston, has been burned with a loss of $30,000.

Kamloops is making a vigorous efforts to secure jobbing rates from the C.P.R.

One of the government's demonstration orchards is to be established at Rossland.

Vancouver is taking action toward securing an adequate water supply for the future.

The Sprague Lumber Company of Winnipeg is establishing large mills at Fort George.

A class in connection with the St. John Ambulance Association has been formed at Nelson.

The Mercantile Trust Company, of Vancouver, is to erect a handsome block at Fort George.

Prairie chickens for the first time may lawfully be shot in any part of the Province during October.

The Presbyterians are preparing for an extensive evangelistic campaign in the Kootenay churches.

George K. Leeson, who died recently at Kamloops, operated the first stage line in British Columbia.

A townsite near Hazelton has been named Ellison, in honor of Hon. P. Ellison, member for the Okanagan.

The Trades and Labor Council of Vancouver has decided to affiliate with the American Federation of Labor.

The North Vancouver council has decided to take 100,000 one dollar shares in the Second Narrows bridge scheme.

Marcel Clark has located a body of ore thirty-four miles up the Copper river which assays 45 per cent iron to the ton.

G. O. Buchanan, for years past one of the leaders in all the affairs of the Kootenays, has taken up his residence at Fort George.

F. Dundas Todd, the government's apiary expert, estimates that British Columbia bees produce $100,000 worth of honey annually.

The Salvation Army contemplates the erection of a People's Palace at Vancouver to cost, with other departments, $150,000.

Abbotsford is in a state of great excitement over the latest and most encouraging developments on the recently discovered coal seam.

The Methodists are the first denomination to stake a church claim in Fort George, the temporary pastor of the flock being Rev. A. T. Bell.

A five-foot seam of supposedly first quality anthracite coal has been struck by men engaged in prospecting for oil near Clayburn, Matsqui district.

Residents of the Arrow Lake district from Robson to Arrowhead will worship hereafter in a floating, self-propelled church, under the Baptist ministry.

The Centre Star mine at Rossland last week passed the 100,000 tons mark for the year, in total ore production. It is the third interior mine in point of output, this season.

The Provincial Department of Agriculture is soliciting from the Kamloops Board of Trade a permanent exhibit of Kamloops grains and grasses for the botanical museum at Victoria.

Canada's New Gold Camp

The gold developments of the Porcupine district in Ontario are sensational. At the 100-foot level of the great Timmons gold mine the ore is the richest yet encountered. This vein is 10 feet wide and all the way down chunks of ore running thousands of dollars to the ton have been mined. It is impossible to tell the average, but it must run several hundred dollars to the ton. A drift has been started on the vein to connect with No. 3 shaft 700 feet away. Should these sensational gold values continue while drifting and sinking on this vein, the Timmons gold mine of Porcupine will rank among the most famous of the world.

But these wonderful gold values are not confined to one mine. Already seven fabulously rich gold mines are being developed, and this wonderful gold field is being explored to the west of the Timmons mine for 25 miles and sensational values found there. Ontario has already astonished the world by the wealth of her nickel and silver mines, but if these wonderful gold developments continue, Ontario will astound the world with the magnitude of its gold output.

Autoing Over Dynamite

An auto party were out driving in New Westminster last Saturday. They rounded a sharp bend in the road, when a man who had apparently been standing on the side of the road and not seen them coming, rushed towards them, waving an axe and shouting to them to keep back.

Almost at the same time the chauffeur's attention was attracted by the actions of the man, he saw, lying on the road only a few yards in front of the machine, seven sticks of dynamite.

He was right on top of them; the road was narrow and the machine was travelling fast. He thought that the best and only chance he had was to pass over the sticks fast and give the dynamite the least weight possible.

He put on full power. For the fraction of a second there was a period of horrible suspense as Hunter waited for what he thought was certain destruction, but the might explosion never came and the machine passed in safety.

When the machine was stopped some rods down the road, it was seen that the wheels had passed directly over three of the sticks of dynamite and had broken and crushed them.

COPPER

The New Edition of the

COPPER HANDBOOK

The Copper Handbook contains, in this new and greatly enlarged edition, about 50 per cent. more matter than the Bible—though not necessarily a better book because of its greater bulk. It is filled with FACTS of vital importance to Vol. VIII, issued May, 1909, contains 1500 pages, with nearly 50 per cent. more matter than the preceding edition. The chapters with mine descriptions and on statistics have been carefully revised and the bulk of the matter therein is

ENTIRELY NEW

There are 25 chapters.

Covering Copper History, Geology, Geography, Chemistry, Mineralogy, Mining, Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology, Deposits by Districts, States, Countries and Continents; Mines in Detail, Statistics of Production, Consumption, Imports, Exports, Finances, Dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book On Copper.

THE INVESTOR
THE SPECULATOR
THE METALLURGIST
THE CONSUMER
THE MINER

TERMS are the most liberal. Send no money, but order the book sent to you, all carriage charges prepaid on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

PRICE is $5 in buckram with gilt top, or $7.50 in genuine full library morocco.

NYAL'S BLOOD PURIFIER

Purifies the Blood

AN EFFICIENT AND RELIABLE REMEDY

For IMPURE BLOOD, SCROFULA, BOILS, PIMPLES, SALT RHEUM, TETTER, ECZEMA, Etc. NYAL'S BLOOD PURIFIER Has No Equal

NYAL'S BLOOD PURIFIER means pure blood. Try it and you will be convinced.

Boils, sores, pimples, skin diseases and rough skin indicate impure thin blood. Nyal's Blood Purifier purifies and enriches the blood, driving out the poisonous materials that produce such disagreeable symtoms. It is for the same class of diseases as those treated at Hot Springs.

Get a bottle at our store; we recommend it because we know what is in it—and every NYAL remedy is good. Price $1.00.

Mr. Businessman Are You Very Much Alive?

To the fact that Printers' Ink is an essential to the building up of a successful business. If you wish to stand in the front rank of commercialism, you must advertise — not once or twice, but continuously. Therefore, must be your watchword. The guide of the thrifty housewife is the newspaper, every column of which she scans to find out the price and particulars of any article she requires; the same applies to the man who wants either a suit of clothes or a pair of boots, etc.

We can act as YOUR AGENT in this respect. The ONE and ONLY ADVERTISING MEDIUM for the Boundary is

The Phoenix Pioneer

$2.00 Per Year . . . . . In Advance

WILL EXPEND A MILLION

Improving Nelson-Boundary C.P.R. Lines

Estimated expenditures by the C.P.R. for repairs during the present year in the Kootenay district and exclusive of the Proctor hotel project will aggregate $1,080,000. Some three hundred miles of railroad will be built; several new steel bridges are under construction; several miles of road will be laid with the eighty five-pound steel rails; wooden bridges will be filled in; retaining walls of stone masonry built; sixty miles of track ballasting done; a brick roundhouse built at Smelter Junction and a multitude of smaller jobs handled. Between 500 and 600 laborers are now at work at the various points and within a few weeks almost as many more will be engaged.

A survey of the work which the C.P.R. is doing in southern British Columbia sustains the belief that the railway authorities are decidedly optimistic as to future development work in the district mentioned. Probably no other territory produces more business, freight tonnage and passenger traffic and more railroad revenue per capita of population. According to a census recently taken by the railway officers the population in the district between Kootenay Landing and Midway, south of the main line, does not exceed 30,000 in number and the expenditure of so large a sum in one year for railroad improvements points to a volume of production highly creditable to the province.

Steel rails weighing eighty-five pounds per foot, the heaviest rails used, are expected to arrive from the east the latter part of the present month, and the work of laying them in place will start at once. These new rails will be used on the Phoenix Eholt branch to Greenwood, Castlegar, Smelter Junction, from Castlegar westward for ten miles, Nelson to Shore Acres, and on the Granby spur from Grand Forks to the smelters. It is estimated that the cost of laying these new rails will be $2600 per mile and for the total of seventy miles this item alone amounts to $182,000.

One of the biggest bridge building jobs is that of Cascade, where a wooden structure is being replaced by a steel one on stone masonry piers of nearly 3000 cubic yards. It will be one hundred feet above the water, and will consist of two spans of 130 feet, two of 100 feet, and two of forty feet. The railway company is doing the masonry work. This bridge will cost the railway company $115,000.

Twelve miles north of Cascade work has started on another steel bridge of 130 feet, single span. Men are now engaged on the foundation. An eighty feet span will be put in on the Lardo branch, but the remainder of the cut will be filled with gravel and stone. A number of important operations are on hand in the filling in of old wooden bridges. Men are at work at Fisherman, between Grand Forks and Eholt, where 160,000 cubic yards of earth will be required to fill in a bridge. Instead of building a masonry culvert, the railway at this point is driving an eight-foot tunnel through the rock for 400 feet to carry off the water.

East of Farron, on Porcupine Creek, 700,000 cubic yards of material will be required to fill in the wooden bridge, and it will take three years to complete the job. At present the work is confined to building a hydraulic plant by which method the work will be done. Actual filling at this point can not commence before next year, an eight-foot stone arch culvert 520 feet long being necessary first. The cost of this improvement is estimated at $150,000. Other filling jobs on hand include one south of Robson of 80,000 cubic yards, one on the Phoenix branch of 50,000 yards, and one on the Nakusp line, totalling 180,000 yards. Economy prompts the filling in of wooden bridges. They require constant watching and yearly repairs. When once filled in they are permanent and entail no further expense.

In the Boundary district forty miles of ballasting work is under way and half done. This the railway company estimates costs $1000 per mile. Four retaining walls are under construction between Nelson and Cascade, and at Smelter Junction work in started on a fine five-stall brick round-house, to cost $22,000.

E. A Dagg and W. M. Alexander are negotiating with the New Westminster city council for a 99 years' lease and exemption from taxation for twenty years, in return for which they promise to establish an elevator with 100,000 bushels capacity and also a large flouring mill.

The Government's representatives are selecting the Crown's quarter-interest lots in the new townsite of Kaleden.

C. N. Railway Plans

Detailed plans of the line of the Canadian Northern Pacific railway through the mainland of British Columbia from the lower Fraser terminals at Port Mann to a midway point on Moose Lake (beyond and eastward of Tete Jaune Cache) have been filed with the chief commissioner of lands, and formerly accepted and signed by Hon. Price Ellison. The line is now authoritatively delineated insofar as the mainland sections are concerned with the exception of one short section lying between the head waters of the North Thompson and the McLennan River and such minor deviations as may hereafter be made will not vary from these filed plans by more than a mile at the maximum.

The first section plan covers from Yale, south along the Fraser river to Chilliwack. The second section extends from Chilliwack to New Westminster bridge and is in entire accordance with public expectations. From Kamloops the line follows the North Thompson 156 miles to its headwaters.

The easterly section (yet to be connected by the awaited plan for the line from the North Thompson to Mc Lennan river) extends from the headwaters of Canoe river northerly to about ten miles south of Tete Jaune Cache, at the junction of the McLennan with the Fraser, and there takes a sharp bend, following easterly.

In their entirety the plans filed cover upwards of 400 miles of construction, and only omit about thirty miles of the complete mainland line.

Mount Tatlow

Mount Tatlow will be the name given to the culminating peak of the Cascade Mountains. It is 10,000 feet high, and stands to the south of Nemiah Valley. It will be named in honor of B.C.'s late minister of finance and agriculture, who lost his life under tragic circumstances over three months ago.

Trade Asaya-Neurall Mark
THE NEW REMEDY FOR
Nervous Exhaustion

Night sweats are a sure sign of nervous exhaustion. They weaken the body and depress the mind. "ASAYA-NEURALL" will overcome this condition. It feeds the nerves with Lecithin, the element required for nerve repair. Full control of the bodily functions soon returns. Restful sleep is obtained, the appetite and digestion improve, nerve vigor is regained. $1.50 per bottle. Local agent.

JOHN LOVE.

Silverton Drill Experts

Silverton again won fame and honor when its representatives, Algut Erickson and Joseph Johnson, won the drilling contest at Republic, Wash., on Monday, July 4. Incidentally, the winning team of Canadian miners carried home with them the prize of $200 cash which had been posted.

This same Silverton team of experts were the winners of the Dominion Day contest in Nelson. There the team won first prize with a hole 37¾ inches, which was five-eighths of an inch better than the Rossland team's work. In Republic the winners made a hole of 39¾ inches, using the regulation eight-pound hammer and seven-eighths-inch drills, in 15 minutes.

Contract Let

Vancouver, July 13—The contract for the first section of the Kettle Valley railway has been awarded to MacConnell, Gzowski and company. The work awarded covers the portion between Merritt, on the Spence's bridge Nicola line, and the headwaters of the Coldwater river, a distance of 30 miles. The contractors will carry on the work entirely from the Merritt end of the line on account of the facility in the delivery of materials. The agreement covering the provincial bonus demands that operations be started by July 10 and contractors are rushing equipment to fill this condition.

HAVE YOU REMEMBERED IT?

When packing for the country cottage, don't forget your box of Zam-Buk! Blisters, sunburn, scratches, insect stings, etc., if not immediately attended to, are likely to spoil your pleasure. Zam-Buk ensures you against trouble from these. Take Zam Buk, instead of "taking chances"?

Zam-Buk is antiseptic; kills all poison in wounds, whether from barbed wire fence, or insect sting. Soothes aching feet and blistered hands; heals baby's chafed places; cools those sunburn patches, and prevents freckles. No mother should be without it. Purely herbal in its composition, Zam-Buk is always superior to the ordinary ointments containing animal oils and fats, and mineral coloring matter. All druggists and stores sell Zam-Buk, but avoid harmful substitutes.

Joseph Martin's Prediction

London, July 13.—Writing to the Morning Chronicle, Joseph Martin charges Premier Asquith with making terms with the opposition, which means that the government will be kept in office and power by connivance of the Tories for the rest of the natural life of this parliament. He predicts that Democracy's triumph over the house of lords will be delayed for many years unless the ministerial stalwarts at once coerce Mr. Asquith, with the aid of John Redmond and Laborites.

The Blind Pig

The experience of the police at Prince Rupert during the no-license period preceding its incorporation as a city with self governing powers, and its adoption of the license principle as generally prevailing in this province, is not one that is likely to be cited by advocates of change in British Columbia's system of dealing with the liquor traffic. Despite the utmost activity of the police, blind pigs and holes-in-the wall sprang up and flourished until ferreted out by the law, these vile resorts hidden away from the public view dealing in alcoholic drugs and poisons of the vilest description, and subject to none of the official supervision and surveillance inevitable under the license system, proved breeding places of disorder. According to superintendent Hussey, the blind pig offers opportunities in crime and difficulties for the police which are happily uncommon in the extreme in British Columbia. In Prince Rupert alone no less a sum than $5100 was recently collected in fines as the result of a special campaign against these underground boozing dens, to deal with which a special force of outside detectives had to be employed. At least three crimes of serious character and these it is said would in every probability have never been possible under ordinary circumstances had the common license and regulation system of the province prevailed.

Operations on the construction of the Canadian Northern Railway in the Province practically started on June 29th, when a gang of 40 men was sent from Vancouver to prepare railway camps at Port Mann and other points.

A CHOIR LEADER

Tells How Peruna Did Him of All Catarrhal Troubles.

PE-RU-NA SCORES
Another Triumph in Canada

"A Relief to Breathe Freely Once More."

MR. G. W. MARTIN, Hartford, Ont., choir leader at St. Paul's Episcopal church, writes:

"Peruna is a wonderful remedy for catarrhal troubles.

"I have been troubled with catarrh for a great many years, and always trying something for it, but was able only to secure temporary relief until I used Peruna.

"Only five bottles rid my system of all traces of catarrh, and I have not noticed the slightest trouble for several months.

"My head was stopped up, my breath offensive, and it is a relief to be able to breathe freely once more."

Brighten Your Home

Now is the time to take a look round your house and see what is required in the line of

Furniture

Nothing brightens and contributes to the happiness and comfort of a home as a few wisely selected pieces of New Furniture. We have a splendid range and can quote you prices equal to those of Toronto, plus freight.

C. F. EDWARDS OLD IRONSIDES AVENUE

Builds you up and makes you strong

How do you feel to-day? Not quite right? Energy a little below standard—not strong enough to make much exertion?

NYAL'S COD LIVER COMPOUND

is what you need. Don't get frightened about these words "Cod Liver." You'd never know it from the taste. It's a real tonic, containing cod liver extract, extract of malt, wild cherry and hypophosphites—a splendid combination. The cod liver extracts build you up—so does the extract of malt. The wild cherry soothes the bronchial tract and the hypophosphites supply phosphorus to the nervous system—just the thing it needs. And the taste is pleasant. As an all 'round tonic, strength restorer and body-builder you'll find nothing better than Nyal's Cod Liver Compound—so why look further? You will be pleased. The price is One Dollar.

Anything you buy with the Name Nyal's will give you entire satisfaction.

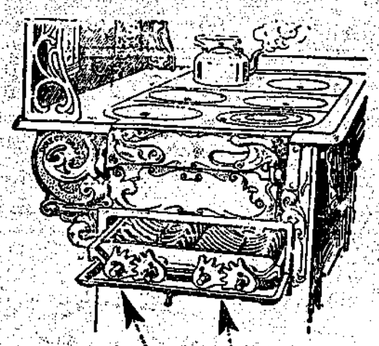
W. A. McKAY & SONS

The oven does the baking, the fire-box controls the oven heat, and the grates hold the coal or wood that produces the heat, so THE GRATES are important.



Sask-alta Range

Double Duplex Grates

"Sask-alta" Double Duplex Grates are made in four pieces, each grate shaken separately. Ashes over one grate can be shaken without wasting good fuel over other grate. No poking necessary, thereby saving fuel. Dampers at both ends of fire-box secure perfect drafts. When grates are inverted for wood a patent clamp retains them in position. The easiest-working way is the surest-serving way — and that's "Sask-alta" way.

Mrs. William Humphries returned Tuesday evening from an extended visit to the Old Country She was away about a year and spent the greater part of the time in Wales.

Special services in connection with the local lodge Knights of Pythias will be held in the Presbyterian church tomorrow evening, when the members of the order will be addressed by Rev. S. Lundie. The memoers will meet at the hall at 7 p.m.

Greenwood Liberal association held a rally last week, when new officers were elected as follows: Honorary president, Sir Wilfrid Laurier; president, J. D. Spence; vice-president, D. A. McDonald; secretary-treasurer, Dan. McDonald.

The C.P.R. official decorators have arrived and have made a fair start at painting the town. The local terminus of the transcontinental has received a double coat of red with green trimmings, Mr. Shaughnessy's new colors, while the interior of the depot has also been brightened. The freight sheds and section houses have also been painted.

The Sherrys appeared in the opera house on the 8th inst. and gave an enjoyable evening's entertainment to a large audience. There were only two in the company, but each was an accomplished musician and comedian and their repertoire included a great variety of comedy and good humor which sent the audience home happy.

Work on the wagon road to the No 7 mine is progressing favorably and should be completed in the course of about ten days. A. B. Calhoun, engineer in charge of operations has found it more difficult than originally expected to avoid grades and make a firstclass road. However, about four miles of the distance is now completed in good shape and the entire work when finished will be a creditable piece of roadbuilding, and make transportation between Phoenix and Central camp comparatively easy. The short-cut trail has been cleared and is in good condition for those walking between the camps.

John O. Griffiths, who some three months ago was accidentally shot, the bullet still lodging in his head, left on Thursday for his former home in the Old Country, accompanied by Thomas Williams. Although Mr. Griffiths' recovery after the accident two months ago was one of grave doubt and a brain specialist, who was brought from Spokane, was able to give no encouragement, under the care of Dr. Dickson the patient gradually but surely recovered, and when he left Thursday was in apparent good health. Were it not for the fact that the bullet still remains in his head and may give him trouble in time, Griffiths' recovery would be considered complete at present. This will undoubtedly be another reference for medical annals.

The hospital dance given in Miners' Union hall Thursday evening was a pronounced success in every way and as a result of it the Phoenix general hospital benefits substantially. Notwithstanding the warm weather it was one of the most largely-attended dances given in town for some time, a number from Greenwood being present, and all had an enjoyable evening. Werner's orchestra supplied splendid music and it was not till the early hours of the morning that the dancers departed. A score of young ladies were present in nurse attire, while the gentlemen on the reception committee had the "red cross decoration" conferred on them for the occasion. A tasty supper was served in the banquet room adjoining the hall. Those responsible for the dance are to be congratulated on its splendid success.

Le Roi Mine Closes

The Le Roi mine at Rossland is about to close down. It was in March, 1909, that the famous Le Roi closed down primarily and remained inactive till October. During that period A. L. McMillan raised additional funds with which to pursue a policy of exploration which had been outlined. Since October this work has been carried on, and, although shipments of ore have been made periodically, no great success has attended the efforts or the management. So it has been finally decided to close down again, and, although work may be continued for a little longer, another week will about see the end of operations.

Trade **Asaya-Neurall** Mark
THE NEW REMEDY FOR
Nervous Exhaustion

Night sweats are a sure sign of nervous exhaustion. They weaken the body and depress the mind. "ASAYA-NEURALL" will overcome this condition. It feeds the nerves with Lecithin, the element required for nerve repair. Full control of the bodily functions soon returns. Restful sleep is obtained, the appetite and digestion improve, nerve vigor is regained. $1.50 per bottle. Local agent.

JOHN LOVE.
