THE BIG STORE

House Cleaning Time

This event takes place in every home at this particular time of the year, and it's a source of worry and trouble to the ones in connection with it, as to the best way to beautify the home for the summer months. We have helped you in the past to settle this trouble. Let us supply you again this season with something new from our well assorted stock of house furnishings.

	PER YARD
Art Sateens	20c to 25c
Reversible Cretonnes	20c to 25c
Art Muslins	15c to 25c
Figured Scrims	25c to 45c
Spot Swiss Muslins	20c to 25c
Figured Swiss Muslins	20c to 30c
White and Cream Madras	30c to 50c
Colored Madras	40c to 1 25c
Colored Tapestry's	75c to 2.00
Striped "	75c to .90c
Colored Burlaps	85c
	PER PAIR
Nottingham Lace Curtains	1.00 to 3.00
Irish Point " "	4.00 to 5.00
Colored Portiers	3.50 to 7.50
Tapestry Squares (all sizes)	9.00 to 30.00
Rugs and Door Mats	1.00 to 8.50
Brass Sash Rods	25c each
Brass Curtain Rods	.20c to 30c
White Cottage Rods	.25c each
Curtain Poles Complete	.75c
Linoleums, 12 feet wide	.75c sq. yard
Linoleums, 6 feet wide	.60c sq. yard

Lind Shine

A Preparation that will make your Linoleum look new and prevent it from wearing.

THE DOMINION'S THIRD TRANSCONTINENTAL RAILWAY

The Canadian Northern, Which Will Shortly Build Across British Columbia As a Link in Its Coast-to-Coast Line

Canadian Northern is the Dominion's third transcontinental railway. It is already in operation from Quebec to Montreal and Ottawa, from Toronto to Georgian Bay and northern Ontario, and from Duluth and Port Arthur to Edmonton. Seven hundred miles of additional railway construction will extend Canadian Northern from Port Arthur on Lake Superior to Vancouver, and 400 miles will close up the gap between Port Arthur and Toronto. Four hundred miles more will link Key Harbor on Georgian Bay to Ottawa, Montreal and Quebec.

In other words, Canadian Northern has already completed 5500 miles of railway and 1500 miles more will enable it to span the continent from Quebec to Vancouver. The Canadian Northern Railway's maximum grades from Quebec to Vancouver will not exceed 26 feet to the mile. From Vancouver to Port Arthur or Duluth, it will have a shorter route than Union Pacific or Northern Pacific from Seattle to any Lake Superior port, and its low grades across the Rockies will enable it to handle traffic from the Pacific to Lake Superior at 60 per cent of the cost to the American lines. Indeed, Canadian Northern, when its line to Vancouver is completed, will have the highway of commerce between the Pacific ocean and the great lakes. It will be 200 miles shorter from the Pacific ocean to Lake Superior over the Canadian Northern than over the Grand Trunk Pacific, although Grand Trunk Pacific's harbor is 500 miles nearer the Orient than Vancouver.

Canadian Northern has the immense advantage over all competitors because of its low fixed charges. There are only $600 a mile of interest charges against all its lines in operation. When completed from ocean to ocean, its interest charges and taxes will not exceed $1000 a mile, and these fixed charges include all interest on railways, equipments, terminals, express, grain elevators and telegraphs controlled by Canadian Northern.

These interest charges of less than $1000 a mile are highly illuminating when compared with the $2250 a mile of interest charges of the Wabash, the $2500 of interest charges of Southern Pacific, the $3200 for the Baltimore & Ohio, the $6600 a mile for the Erie and the 6300 a mile for the New York Central, according to an American writer.

Indeed, one of the greatest achievements in railroad construction ever known has been the up-building of the Canadian Northern to the position of a great transcontinental system at such an amazing low cost of construction. This new system has not only chosen for its own the best and surest traffic producing territory across the American continent, but in grades it has actually secured the best railroad highway across the continent also.

It traverses one continuous panorama of wheat fields or wheat lands from Duluth to Yellow Head Pass, where it crosses the Great Divide into British Columbia. From Yellow Head Pass to Vancouver down the Thompson valley and the Fraser, it will tap a region of rich pasture and fruit lands and forests. Its lines in Ontario and Quebec are all planned to develop the mineral, forest and agricultural resources of these provinces, while keeping in view the project of constructing a great transcontinental railway that shall surpass all others in freedom from curves and heavy grades.

The honor of up-building the Canadian Northern belongs to two men of unusual ability, William MacKenzie and Colonel D. D. Mann of Toronto. In course of time they will take rank among the umpire builders of the age, but their greatest monument will always be the Canadian Northern Railway.

A ROSSLAND MAN'S ROCK DRILL PATENT

New Chuck With Big Saving Over Old Style

H. W. Schorlemmer, of Rossland, has invented and recently patented a rock drill chuck, which, after having been given a very thorough trial in the mines of the Consolidated Mining and Smelting Co., has answered every test to which it has been put, says the Miner. It has also been abundantly demonstrated by the tests that a saving of more than 25 per cent over the old style chuck has been effected. The new chuck has some special features, the efficacy of which drill operators will readily perceive. In addition to being very simple to operate there are no chuck bolts and nuts to tighten; all that an operator has to do is to slip in the drill and turn on the air. The drill tightens automatically and never gets loose while working, as is so frequently the case with the old design. Consequently the chuck bushing lasts about four times as long as the older design. This has been clearly proved by actual test. All one has to do to release the drill is to give a slight tap to the wedge, which is part of the chuck, and the drill is instantly free. From this it will be seen that the changing of the drill can be accomplished much more rapidly than in the old way. Miners who have used this new chuck for any length of time, claim that they can drill as much in six or six-and-a-half hours as they could in eight with the old-fashioned chuck. This is another great saving and but one more of the numerous advantages to be derived from the use of this new machine. For the past twelve months this chuck has been used by the Consolidated Mining and Smelting Co. of Canada, and it has been pronounced by the management and machine men alike, the best they have ever been called upon to operate.

It will pay you to investigate our parcel sale today. E. A. Black.

WELLINGTON BRANCH RAILWAY BRIDGES

First Completed by Contractor Murdock McIntyre

The first bridge on the Wellington camp railway has been completed, steel laid across it, and the second is now under construction.

Murdock McIntyre, who was awarded the trestlework contracts by Tierney & Co., has built an imposing bridge. The construction of a bridge 160 feet long, with a curvature of about 15 degrees, and 100 feet high in the centre, is no small feat, and its completion in a limited time reflects creditably on Mr. McIntyre.

There is about 200,000 feet of timber in the structure, all of which has been cut locally and framed at Mr. McIntyre's mill since Feb. 1st., when the contract was awarded. The immense timbers used are a revelation to even those familiar with the local forests. The timbers were placed in position by a cable operated by donkey-engine.

Odd Fellows at Greenwood.

At Greenwood on Tuesday evening, degree teams representing Snowshoe lodge (Phoenix), Gateway lodge (Grand Forks), and Boundary Valley lodge (Greenwood), conferred the mysteries of Odd Fellowship on candidates, in the presence of one hundred brethren. After the mystic proceedings, the members adjourned to the hall of the Rebekahs, where the members of the sister lodge had provided tables laden with toothsome delicacies, as well as sweet-scented flowers. F. B. Holmes, noble grand of Boundary Valley lodge, presided over a lengthy toast list which included pithy remarks from a number of pioneer Odd Fellows. Among the Snowshoe members present were: F. J McDougall, J. C. Tait, F. E. Brine, L. J. Stalls, J. P. McKenzie, W. Ross, D. Paterson, H. Hazelwood, D. Deane, A. McKinnon, T. Pilkington, E. Carlson, C Wooton, T. A. Love, R. K. Morrison, W. VanWagener, R. Humphries, L. Jones, F. Anderson, W. S. Cook, C. Cook.

TUMBLE IN GRANBY COMPANY SHARES

Drop to 50---Mines and Smelter Are All Right

New York, March 24.—The break in Granby, while not directly connected with the stock exchange, has been an important matter, because it has stirred up a charge of deception by its directors. The stock sold for 112 in January. New stock was issued at 85. The shares sold down to 67 on Wednesday and today to 50.

In the report for the year ended June 30, 1909, the statement is made that "Our reserves are largely increased and we have ore in sight for many years to come."

NOTHING WRONG AT WORKS

Smelter Superintendent Williams states that at this end there is nothing wrong, mines and smelter are all right. The possibility of a 25 per cent tax on blister copper entering the United States, under the new tariff, has caused some holders to get cold feet. He only looks for a temporary decline.

MESSAGE FROM J. P. GRAVES.

"Pasadena, Cal., March 24.—Replying to your telegram requesting my views as to the break in Granby shares upon Boston stock exchange, and asking if it was due to disappointing news from the mine. I have not visited the mine personally for about 18 months, but according to our employees there has been no change in the mine during that time for better or for worse. The quotation of the stock is not always the true value of the mine. JAY P. GRAVES."

CONSULTING ENGINEER'S VIEWS

W. Y. Williams, consulting engineer of the company and manager of the mine from its inception until his promotion to his present position in 1904, said yesterday:

FEW CHANGES AT MINE.

"No important developments of any kind have taken place in the mine for two or three years. I mean by that that no new knowledge has been gained as to the extent or limit of the ore bodies. The mine and smelter are running along on the same lines and the same rate of production that have governed for the last few months, which, as regards the latter, is greater than ever before in the company's history.

"My position with the company is such that the financial end of its business is utterly outside of my province and stock market movements usually receive no attention from me. The present one is so radical, however, that I could not fail to take notice of it. To me it came as a bolt from the blue, and, seeing that Mr. Graves is holidaying in California, I guess it is just as big a surprise to him.

COINCIDENCE STRIKES ENGINEER.

"In looking round for an explanation of so untoward and unexpected an event, I have been forced to take cognizance of what may be merely a coincidence. This is that the slump in the price of Granby stock immediately followed the arrival in New York of President Jacob Langleloth after a prolonged investigation of the mine and smelter. I can not help linking the two incidents as cause and affect, though, of course, in so doing I may be guilty of an injustice to Mr. Langeloth.

"He was at the mine two weeks ago with a friend. What he may have seen or not seen during that visit that differed from his preconceived ideas of the property I have no conception. Certainly he should have been as fully informed before his arrival as afterward, since complete and detailed reports of the company's operations have at all times been made to him or passed through his hands.

"As to the rumor that the resignation of A. B. W. Hodges as manager has any connection with the slump, I decline to credit it.

"The whole thing is a puzzle to me but I suppose we shall find the answer to it in time and things will gradually work back to the old basis."

Orchestra Dance Monday.

Werner's orchestra will give a dance in Miners' Union hall on Easter Monday evening. The dance promises to be a largely attended event and Werner's complete orchestra of five pieces will furnish music for the occasion.

KETTLE VALLEY RAILWAY CO. AWARD TEN-MILE CONTRACT

Extension of Line Up the North Fork from Lynch Creek Will Be Built by Tierney & Company

It is announced that a contract for construction of a ten miles' extension of the Kettle Valley Lines railway up the north fork of the Kettle river has been awarded to W. P. Tierney & Co., railway contractors. W. P. Tierney, head of the contracting firm, was in Phoenix on Saturday in connection with the contract and it is expected that actual work on the new extension will commence in the course of a month.

No more important announcement of railway construction in the Boundary district has been made public for some time and the news will be particularly pleasing news to men interested in Franklin camp mining.

The line is now built to Lynch creek, about twenty miles from Grand Forks, and the ten miles' extension will not only tap important properties enroute, but will about cut in two the distance between Franklin camp properties and railway connection.

Frankin camp has an ore area of about ten by six miles, the formation consisting of lime, porphry and conglomerate. Numerous deposits of self-fluxing sulphide ores have been found with values running from $8 to $40. Among the principal claims in the camp are the McKinley, Ajax, I. X. L., Manhattan, Gold King, the Bonner group and the Mineral Hill. Those familiar with Franklin camp predict the construction of a smelter near the McKinley gronp as soon as the railway reaches the camp.

A railway up the north fork taps many important properties enroute to Franklin camp, among which are the Volcanic mountain group, the Golden Eagle, Earthquake, Pathfinder, Little Bertha, Diamond Hitch and Bonanza.

It is also authoritatively stated that construction work on the Midway-Penticton section of the Kettle Valley line will be commenced in June, for which a contract for fifteen miles up the west fork, commencing at Midway, is about to be let. A contract for another section, commencing at Penticton, will also be let.

In May the same company will start work on its line from Merritt. The road will go from there up the Coldwater for 30 miles, and will then divert southeast, and link up with other sections.

Boundary Mining Notes

The Jewel mill, which has been under construction at Long lake for the past two years, will be completed this summer. About $75,000 worth of machinery is being installed.

Previous to closing down temporarily last week, the Sally mine shipped a car of ore to Trail smelter. The ore was teamed 17 miles to Midway and the shipment, which amounted to 32 tons, is expected to net about $3,000 after paying transportation and smelting charges. Gold and silver values are recovered in the Sally ore.

The second instalment of 50 per cent, or 42.50 per share, on the new Granby Consolidated stock, offered to stockholders at 85 per share on the basis of one new share for each ten held, falls due Monday, March 31. With 13,500 shares of treasury stock thus disposed of, it is not unlikely that the directors at their April meeting may act on a dividend. Prominent stockholders had anticipated a $2 declaration at the meeting early in March, but the directors explained that until stock became fully paid no dividend would be forthcoming. New construction appears at an end, and the company now has an up-to-date smelting plant, with eight furnaces capable of treating between 30,000,000 and 35,000,000 pounds of cooper a year.

Boundary Side Lights

Born in Greenwood, on March 18, to Mr. and Mrs. E. F. Smith, a daughter.

W. H. Sherrod and J. G. Hiatt of Seattle, who are prominently connected with a company operating the Tip Top and Bay mines, were in the Boundary this week inspecting the properties.

Jay P. Graves, managing director of the Granby Consolidated company, who has been recuperating his health at Los Angeles, Cal., for the past few months, will visit Phoenix mines next month.

M. M. Stephens, formerly of Phoenix and now of Prince Rupert, is reported to have bought the Good Luck mineral claim in the Portland Canal district and will form a company to operate it.

Wm. Davis, who has been appointed superintendent of the Snowshoe mine during Mr. Biesel's absence, arrived in the city from New Denver this week. In company with Mr. Biesel he visited the No. 7 mine on Thursday.

S. S. Easter Entertainment.

The scholars of the Methodist Sunday school are giving their Easter program in the Methodist church at 2:30 o'clock tomorrow (Sunday) afternoon. Parents and friends are cordially invited to attend. The collection will be donated to missions.

BOUNDARY ORE TONNAGE.

March 26, '10

The following table gives the ore shipments of Boundary mines for 1900, 1901 1902, 1903, 1904, 1905, 1906, 1907, 1908 and 1909, as reported to the Phoenix Pioneer—

SATURDAY, MARCH 26, 1910

A real estate agent by the name of Cannon has been arrested at Fernie on a charge of selling misrepresented property. Cannon is said to have been disposing of bare mountains that wouldn't raise goats as choice fruit land. There has been a variety of the "Cannon" species shooting it into the unsuspecting public here in the Boundary for many months. In fact here in Phoenix all brands of realty agents have been thriving, and it would appear that there is a liberal supply of "easy marks" residing in the city. Payday is is usually the monthly feast for the realty birds of prey, when thousands of dollars are paid out by miners and others for city lots of imaginary value. Of course, there are instances where property is offered at a reasonable figure, but such are the exceptions. The instances where the public have been asked to speculate in city lots that are a hundred miles from nowhere or fruit lands on some mountain have been too numerous. It is high time that the wage-earner realized that the silvery-tongued agent talks to line his own pockets. No man should risk his limited cash in property he has not seen,— unless at least it has been seen and is recommended by a personal friend.

That certain companies are offering questionable values in real estate to the outside investor is more than borne out by the fact that a meeting of the responsible realty firms of Vancouver was held a few days ago to deal with the matter, at which the following resolution was adopted for the protection of investors:

"That we deprecate some of the advertising methods employed by agents in placing before the public lots and subdivisions especially appealing to the small investor and the outside public, under the guise of large profits and quick returns, which can not in the opinion of this meeting be realized and we would recommend outside investors to make inquiries from recognized financial or banking institutions as to bona fides and approximate values before purchasing from canvassers or by circular."

President Taft, of the United States is anxious to avoid a tariff war between the Republic and the Dominion of Canada, and will do everything possible to secure trade peace. It is declared at Ottawa that the authorities will not recede from the attitude taken during the recent conferences, claiming that the present law does not show any undue discrimination against the United States.

The Toronto News says "not many Canadians know that a Copper Mining and Smelting company in British Columbia has the largest plant in the British Empire and the second largest in the world." There are many great things about British Columbia that many Canadians do not know, even those Canadians who live west of the Rocky Mountains. This is a province of surprises, and we are having new ones presented to us almost daily.—*Merritt Herald.*

PROVINCIAL.

Merritt is to have a rifle association.

Kamloops had a genuine kipnapping case last week.

The assessment of Kamloops shows an increase of $300,000 over last year.

The C.P.R. has established a tie and timber department in British Columbia. Several tie mills and sawmills will be put in.

Recognising the value of advertising the district of Spallumcheen is levying a rate of a mill on the rateable value of the municipality specially advertising the municipality.

W. O. Miller of Nelson has been appointed divisional superintendent of the C.P.R. for the Boundary and Kootenay district. F. W. Walker, the acting superintendent goes to Vancouver.

W. H. Burton, a Canadian Pacific railway conductor running between Cranbrook and Kootenay Landing, has purchased the Monro hotel at Creston for $25,000.

A persistent rumor apparently based on good foundation is, says the Times current to the effect that the Canadian Northern railway is contemplatieg the erection of a smelter on the the north-eastern foreshore of Esquimalt harbor.

Three demonstration farms are to be operated this season in the Kootenay, and three in the Okanagan, an appropriation of $10,000 having been granted to the government by the legislature for this purpose.

$50,000 FOR ZINC MINING

Hon. W. Templeman, *Dominion Minister of Mines, has rendered splendid service to the mining industry of* British Columbia by securing a vote of $50,000 for investigating the process used in the production of zinc, and zinc products from Canadian ores. At present many thousands of dollars are lost annually to Canada through unscientific and inadequate methods of treating zinc ores, especially in British Columbia. The mines department of the government proposes to undertake experiments and gather information from abroad with a view to improving the present processes and preventing the great waste now prevailing in the treatment of ores.

MEN WHO USE ZAM-BUK

HOW IT SAVES THEM MONEY.

Look at the financial side of Zam-Buk's use. A cut sustained in the workshop, a sore which is unattended, results say in festering or blood poisoning. You have to lay off for a day or two. What does that mean when pay day comes around? Zam-Buk insures you against that loss! A little Zam-Buk applied to such an injury at the time, or as soon afterwards as possible, prevents all danger of blood-poisoning, takes out the smarting and starts up healing.

Heads of families know how costly doctoring is. Be wise and act on the preventive line. A box of Zam-Buk in the home is so all round useful. The baby's rashes, the older children's cuts and bruises, the inevitable burn, cut, or scald—for all these, as well as for more serious ailments, such as piles, ulcers, eczema, ringworm, etc., Zam-Buk is without a rival.

Dangers of shaving.—You get a cut at the barber's shop. A little Zam-Buk smeared on the wound prevents all danger. If any ailment has been contracted, Zam-Buk cures. Mr. George Hobden, 108 Manitoba street, St. Thomas, Ont., says: "I contracted barber's rash, and the whole of my left cheek broke out in one mass of red, watery pimples and sores. These spread to the other parts of my face, until face and neck were covered with running sores. How far the disease would have spread had it not been for Zam-Buk, I don't know. I applied this balm, and in a short time Zam-Buk effected a complete cure."

The sportsman knows that Zam-Buk is used by all the "cracks," because it is the best liniment and embrocation. Men like Longboat, Sherring of Hamilton, Kelly of the Toronto ball team, all the famous lacrosse teams and ball teams use Zam Buk in this connection.

All druggists and stores sell at 50c. box, or post free from Zam-Buk Co., Toronto, for price. You are warned against harmful imitations.

NATIVE MERCURY AT FIELD, B. C.

G. S. Flindt, late manager of the C.P.R. Hotel at Field, is authority for the statement that he has made a remarkable mineral find there. He had noticed something blocking the sink and causing a gurgling sound in the waste pipes of the hotel and on investigation found native mercury in the pipes and sink. He then went to the source of the water supply at the base of the mountain behind the hotel and an investigation revealed native mercury in the rocks. On this discovery he staked three claims, and intends as soon as the snow is off thoroughly prospecting the ground, and finding but the source of this extraordinary mineral condition, which, with the exception of a mercury deposit in Mexico, is almost unheard of, though arquerite, which is an amalgam of native mercury and gold, is said to be found in French and McCullough Creeks in the Big Bend and is vouched for as found in payable quantities in the Omenica country, British Columbia. The source of the lead deposit near this mercury location at Field has always been a mystery to mineralogists, but if these mercury locations should disclose sub plutonic influences underlying the schists and limestones there, new light will be thrown on the whole problem.

A Pittsburg clergyman has announced that he will not marry any couple unless the prospective bridegroom has an income of $2,000 a year. He holds that poverty is one of the chief causes of divorce, but statistics sustain the view that divorce is rather in inverse ratio to poverty.

Henry Berry, a commercial traveller of Montreal, declares on oath that the proprietor of the Royal hotel, Vancouver, kept him in a room under the influence of liquor for 22 days, during which time money in his possession mysteriously disadpeared.

Photographic views of Phoenix and of the two recent funerals on sale at Love's Drug Store.

35 cts. Will Keep The Doctor Away

At the very first symptoms of a cold get a bottle of Mathieu's Syrup of Tar and Cod Liver Oil.

Begin using it at once and you will not need a doctor. Keep on using it till the last sign of the cold has vanished and you will be better able to resist another one.

Large bottle 35 cts from all dealers.

C. N. RAILWAY ROUTE SURVEYED

The route of the Canadian Northern Railway from Yellowhead Pass to the Pacific coast has now been entirely located by the company's surveyors. The last link in this important work was completed recently by Mr. Garnet Hughes, a Canadian Northern surveyor who has been working west from Edmonton to Yellowhead, joining his survey with that of Mr. C. G. Hannington's party, which has been working between Tete Jaune Cache and Yellowhead, the latter distance being placed at fifty miles. According to the survey of Mr. Hughes, the distance between Edmonton and Yellowhead is 200 miles. Mr. Hughes and his party are now travelling back to Edmonton.

Within the next six weeks it is expected that tenders will be let for building the portion of the line between New Westminster and Hope on the south bank of the Fraser. Construction is also likely to be carried on this summer at points between Kamloops and Hope.

It is rumored that the Consolidated company is taking over the La Plata, formerly known as the Molly Gibson.

Not Sisters

Now and again you see two women passing down the street who look like sisters. You are astonished to learn that they are mother and daughter, and you realize that a woman at forty or forty-five ought to be at her finest and fairest. Why isn't it so?

The general health of women is so intimately associated with the local health of the essentially feminine organs that there can be no red cheeks and round form where there is female weakness.

Women who have suffered from this trouble have found prompt relief and cure in the use of Dr. Pierce's Favorite Prescription. It gives vigor and vitality to the organs of womanhood. It clears the complexion, brightens the eyes and reddens the cheeks.

No alcohol, or habit-forming drugs is contained in "Favorite Prescription." Any sick woman may consult Dr. Pierce by letter, free. Every letter is held as sacredly confidential, and answered in a plain envelope. Address: World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N.Y.

THE COAST REAL ESTATE BOOM

A regrettable feature of the Vancouver real estate boom is that it is crippling industry and development throughout the province. The boom has degenerated into a wild and reckless gambling which has assumed collossal proportions, and the end of which will be the further enrichment of a few rich men, while it will bring ruin to thousands just as happened in the real estate boom of Toronto and Winnipeg some years ago. An undeveloped province can no more support a great city in the throes of a boom than the human will can control the tide in Burrard Inlet. The end of the Vancouver boom must come sooner or later. Better far if the money wasted in the Vancouver boom were diverted to the development of the resources of the province establishing a sound basis on which to build a great city.—Revelstoke Mill Herald.

The recent coal excitement on Graham Island is causing endless confusion. Immediately after the diamond drill had passed through the last vein men started out in various directions to stake new limits. Each limit is a mile square, and upon advertising they were found to overlap each other in numberless cases.

For pointing a revolver at Harold Moffat at Enderby, Michael Graham was fined $50 and costs.

LYTTON MERCHANT KILLED IN STORE

Merritt, March 22.—John B. Barrick, one of the oldest merchants of Lytton, was murdered in his store early Thursday morning. This police are now on the track of a suspect.

Barrick was 78 years of age and formerly conducted a store at Thompson. He was burned out eight years ago, when he went to Lytton and opened another business.

The motive for the killing is not known The murderer entered the store and without warning shot the old man and made his escape. There is intense excitement in Lytton over the tragedy.

A POSITIVE CURE FOR INDIGESTION

If you have indigestion, your food ferments in the stomach and bowels. It does more; it decays, and the nutritious matter which should go to make new blood decays with it, and this leads to an impoverished condition of the blood, to nervousness, biliousness, constipation, sick headache, bad breath which disgusts your friends, and other disagreeable and unpleasant conditions.

And all this trouble is caused by the food that doesn't digest, but ferments and oftimes rots in the stomach.

And fermentation is caused by the stomach not being strong enough and energetic enough to thoroughly mix the food with the digestive juices.

M-I-O-N-A is responsible for tens of thousands of cures. It is such a positive cure for indigestion and all stomach troubles that it is guaranteed by John Love to cure or money back.

The price of a large box of Mi-o-na tablets is 50 cents, and they are sure to promptly relieve the worst case of indigestion or gastritis. Try them.

HYOMEI

(PRONOUNCED HIGH-O-ME)

Notice is hereby given that the partnership heretofore existing between David Oxley and John Hartman as Oxley and Hartman, formerly of the Summit hotel, is this day dissolved. Hereafter the business will be conducted by David Oxley, who will pay for all accounts against the firm of Oxley & Hartman and to whom all accounts due the said firm are payable.

DAVID OXLEY
JOHN HARTMAN

Phoenix, B.C., March 15, 1910.

LIFE IN FIJI ISLANDS.

They Are An Ideal Home for Colonists But Natives Are Often Violent.

Fiji, in some respects one of the most delightful settlements in the Southern Seas, continues to develop along modern lines. According to the latest news, the Union Steamship Co. has just been granted a site for the erection of a fine modern hotel, which is to cost $125,000, and is intended chiefly for the accommodation of tourists, who are going to Suva in ever-increasing numbers. The site has been allocated by the Government at an almost nominal rental for the sake of contingent advantages to the colony. Then a scheme of scientific drainage is under contemplation, and the Government of New South Wales has lent one of its ablest sanitary officials, Mr. Peak, to report upon the question.

The London Amalgamated Radio-Telegraphic Co. has sent a representative to Suva to look into the question of a wireless telegraphy installation; and finally, the corner-stone of a Carnegie library has just been laid by the Governor, Sir Everard in Thurn.

Unfortunately there is a darker side to this picture of progress. The colony has been shocked by a brutal and, so far as can be discovered, wholly unprovoked crime on the Esivo plantation, near Lautoka. There was a popular young overseer named Hall in charge of this somewhat extensive sugar ground. Towards the end of August, when he was alone on the estate, a coolie boy brought in a message, between 11 and 12 o'clock at night, to the effect that there was some trouble with the horses. Hall hastened towards the stables, and was barely fifteen yards from his bungalow when he was suddenly attacked in the darkness by a body of eight or nine Indians, who hacked him to death with large sugar cane knives. When the body was discovered next morning it was found that more than sixty cuts had been inflicted on the head and arms. The nature of the wounds made it clear that his assailants were plantation coolies, and it was not long before several arrests had been made. Two of the coolies confessed the crime and all concerned were soon under lock and key. It has also been necessary to put a strong guard over them, as local indignation is so strong that fears were entertained that the coolies would be lynched.

Led by a Stick of Cugar.

In his reminiscences the late Sir Henry Drummond Wolff told many amusing stories of politics and politicians, amongst which is the following: At the time of an important division a member happened to be confined in a lunatic asylum. Every vote was necessary. Arrangements were therefore made to deliver him at the House at the moment required, and he was received by the Whip of his party, who induced him to walk through the lobby by preceding him with a stick of barley-sugar in his hand. By the way, Joseph Wolff, the father of the late Sir Henry, was one of the most remarkable men in the history of missionary work. The son of a German rabbi, he became a convert to Christianity at the age of 17. After being expelled from the Papal dominions he entered the Church of England, but was at one time ostracized by the English clergy. A man of learning, great daring, and a certain romantic charm, Joseph Wolff was nevertheless full of queer ideas, especially with respect to the lost Ten Tribes, whom he endeavored to discover. He visited many lands, was shipwrecked, was made a slave for a time, and was also threatened with execution by some Central Asian potentate.

A Methodist Millionaire.

The name of Sir Christopher Furness, whose remarkable co-operative offer to his workpeople has attracted so much attention, is possessed of great wealth acquired by own exertions, and owns over 30,000 acres of land. Sir Christopher is one of the few merchant princes among the Primitive Methodists, and he has not forgotten his chapel days now that he has become prosperous. A few years ago he paid off the debts of all the Free Churches in the Hartlepools, and this is only one of many acts of similar munificence standing to his credit. He has a great faculty for seeing and grasping an opportunity. When quite a lad, having been sent to Sweden by his firm, he found that circumstances favored a fine stroke of business, brought off the coup on his own responsibility, and, on his return home, was rewarded by admission to partnership.

Sometimes we don't care so much about what a man can do as we care about what he can't.

Being a captain of industry seems to be quite sufficient to satisfy the military ambition of many men.

Some men are philosophers, but there are others who are neither men nor philosophers.

The reason why fat men are good natured is because those who are slim die of being jollied about it.

Some people who go around bragging about their shyness are so careful of it that they never show it.

Lever Brothers, Toronto, will send you free a cake of their famous Plantol toilet soap, if you mention this paper.

CAN'T FOLLOW LEADER BORDEN

Hon. A. W. Atwater, K.C., former provincial treasurer of Quebec, who returned to Montreal recently from a two months' visit to Britain, says the general view in the mother country was that it would be far better for Canada to build her own navy than to make any monetary contribution to the imperial navy.

"The general opinion I gained in England," said Mr. Atwater, who was a minister in the last provincial Conservative government, "was that we should earn the respect of England much more by showing capacity to defend ourselves than we could by any mere money contribution. The latter would scarcely be noticed in so rich a country as Great Britain, unless much greater and more permanent than any party here dare advocate, but the idea of actual physical participation fires their imagination just as it did in the South African war".

Mr. Atwater remarked that hitherto there had been a certain patronizing air in England regarding Canada, because they knew if we ever got into trouble they would have to pull us out. But this would all end if Canada had her own navy, which she must eventually have, and the sooner the better.

Judge Clement, whom Mr. Macgowan, M.P.P., hit so severely, has not been heard from regarding the matter, but it is stated on good authority that the judges deliberated whether or not they would take action. One well known member of the bench declared that no judge should sit in British Columbia until Mr. Macgowan retracts or the matter is judicially settled.

Six new shippers sent ore to Trail smelter last week.

A MOTHER'S LETTER.

Mrs. Samuelle Vigneau graphically describes the illness and the recovery of her daughter.

All Mothers Should Read.

DAUGHTER OF MRS. SAMUELLE VIGNEAU.

MRS. SAMUELLE VIGNEAU, Amherst, Isle de La Magdaline, Can., writes:

"I write to tell you that I am perfectly well. I took only three bottles of your Peruna according to your advice and the directions in your book, and it restored my health.

"It also cured my daughter, who is 17 years old. She took one bottle according to directions. I assure you that no doctor is equal to your book and your advice. I have recommended your remedy to a number of persons."

A Woman's Remedy.

Mrs. A. E. Stouffer, Caploma, Kansas, writes:

"Peruna has given me health and strength; it is the best medicine that was ever made for women. My friends say they never saw such a change in a woman. I cannot say too much for Peruna."

If you are thinking of building or require building material of any kind—lumber, shingles, lime, brick—call on me for figures. Phone A44. C. A. Ross.

McRae Bros. Sell Out

McRae Brothers on Thursday disposed of their stationery and fancy goods stock in Phoenix to Albin Almstrom. The deal involves about $4000 and one of the oldest businesses in the city. Mr. Almstrom assumed charge yesterday and will consolidate his lower-town stock with his new purchase in the upper town.

John and Alex. McRae are among the pioneer business men of the city, having conducted a stationery store here for nearly eleven years. They leave shortly for the coast, where they already have an established business at Prince Rupert, and in their departure Phoenix loses two progressive business men.

Trade **Asaya-Neurall** Mark

THE NEW REMEDY FOR **Nervous Exhaustion**

Headache, Insomnia and Neuralgia are generally the result of exhausted nerve centres. The true remedy is not a paralyzing drug, but Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, quickens the appetite and digestion; freedom from pains and buoyancy of spirits result. $1.50 per bottle. Obtain from the local agent.

JOHN LOVE.

Next Tuesday's Attraction

Miss Eileen Maguire, Ireland's queen of song; Miss Lucy Webling, an actress of distinction, and Walter McRaye, the well-known entertainer are the artists who will appear in the Phoenix opera house next Tuesday evening—giving the third entertainment of the Star concert course under the direction of C. P. Walker of Winnipeg.

Direct from a triumphant tour of England, Scotland and Wales, Miss Eileen Maguire of Cork, Ireland, comes to Canada for a limited number of engagements in the Star concert course. Miss Maguire has a rare contralto voice and sings the songs that everyone knows and loves. She sings the Irish songs in Irish costume as only an Irish girl can sing. What Jessie Maclachlan is to the Scotch, Eileen Maguire is to the Irish. Wherever the quaint poems of the late Dr. Drummond are known, the name of Walter McRaye is a household word. Throughout Canada, England and the United States, Mr. McRaye is recognized as a foremost dilineator of "The Habitant," the interesting French Canadian. Although local audiences still insist on Mr. McRaes's reading some of the old favorites such as "Bateese." Mr. McRaye is departing somewhat from his former style and on this tour will be heard in an altogether new field of sketches, playlets and humorous impersonations, appearing with Miss Lucy Webling, the dainty English entertainer.

The Stuttz Players.

The Stuttz Players who opened a week's engagement at the Phoenix Opera house Monday evening, have been entertaining large audiences all week and have been receiving many compliments from the theatre-going public.

J. G. and Aggie Marion Stuttz, who head the company of sixteen, are artists of distinct merit. They have been appearing on the stage for many years, but have lost none of their old-time ability to creditably portray the leading roles in splendid plays. Their repertoire includes a large number of representations of well-known plays, in all of which Mrs. Stuttz's natural ability as an actress appears to advantage.

Mr. Stuttz is both genial and generous. The entire proceeds of the opening show, "Until Death We Part," amounting to upwards of $100, was given to Phoenix Miners' Union in recognition of his sympathy towards the union.

Today (Saturday) a matinee will be given at 2:30 p. m. and the company will close their engagement tonight with "The Celebrated Case." They should receive a bumper house.

Change of Business

Having disposed of our business in Phoenix to Mr. Albin Almstrom, we wish to take this opportunity of thanking our many patrons and friends for their liberal patronage in the past. Our successor has taken over the entire stock and being a good business man, we bespeak for him a continuance of your generous trade.

As it is our intention to leave Phoenix in the course of a few days, we will be glad if those owing us accounts will kindly call and arrange settlement.

McRae Brothers.

For Sale.

I offer for sale my residence on the Golden Eagle addition, together with all house furnishings, for $1500 cash. The house is well located and has a good spring water supply piped into the building.

JOHN McRAE.

When the fire whistle is blowing is no time to think about insuring your house and furniture. Don't put off another day. You should also consider what company you insure in; D. J. Matheson represents the best companies.

Advertising Talk . . .

To make your advertising pay you must put your best thought into it.

It is just as important that you do this as it is that you devote your best efforts to any other vital part of your business.

Newspaper advertising is conceded by America's most successful merchants to be the most profitable of all.

If you desire to reach the people of Phoenix and the Boundary country with a word picture of the goods you have for sale the best medium by which you may do so is
