NOW IN COAL—EYES ON COPPER

International Co. Doing Very Well.

Its Officers Were Here This Week.

A couple of years ago S.H.C. Miner sold out a large part of his interest in the Granby Consolidated, and with his assistant, A. C. Flumerfelt, has since devoted most his attention, as far as mining was concerned, to the getting out of coal, and building a town called Coleman at their collieries in the Crow's Nest Pass. Here the International Coal and Coke Co. has been steadily working for two or three years past, and today probably has one of the best propositions of its kind in Alberta.

Mr. Flumerfelt, the president of that company, spent a day or two in Phoenix this week, and told something of what had been done in Coleman in a short two years or less. The town now has a population of 700 or 800 souls, the company's mines employing between 350 and 400 men. At present the output is in the neighborhood of 1,500 tons of coal daily, the run of the mines being supplied to the C. P. R. and to the Canadian Northern, while the 165 coke ovens are busily engaged in turning out that commodity, which is sold to the Dominion Copper Co. at Boundary Falls. About a hundred tons of coke are manufactured daily. The monthly payroll at Coleman runs above $30,000.

Coleman itself is a thriving little burg, with many neat residences and up to date business concerns. It has but two hotels and the company, which owns the townsite, does not intend to have any more than that for years to come.

The company probably produces its coal as cheap or cheaper than any other company in the Pass, the mine being operated almost entirely by tunnels, haulage being done by compressed air. A splendid machinery plant was installed at the outset, and is doing the best of service. G. L. Fraser, formerly of Phoenix, who went to the Coleman mines, as master mechanic, has been made superintendent, and is doing good work. The company gets along well with the miners' union, which has a branch there of the United Mine Workers of America, and the outlook for the mines and the town seem to be of the best.

Their Eyes on Copper.

Since Mr. Miner and Mr. Flumerfelt sold out of the Granby Consolidated—Mr. Miner, however, still being a large shareholder—they have put this coal business on a substantial foundation, and they are well pleased with it. However, it appears that they still have their eyes on copper, and, seemingly, would like to take a hand in it once more.

H. N. Galer, manager of the International Coal and Coke Co., and formerly assistant manager of the Granby Co., was here also this week with Mr. Flumerfelt, and the two gentlemen went out to Hartford Junction to have a look at the Hartford group of mineral claims. They with Mr. Miner and William Farwell own a control in this group, and they propose to see if something cannot be done to put the property on its feet. At any rate, they intend to consider the matter further. The price of copper is most attractive, transportation in the Boundary is now all that could be desired, and it would not be surprising to see active work undertaken at the Hartford some day in the near future, if investigations are favorable. The group had some work done on it six years ago, with a shaft down 100 feet or more and considerable drifting, but no ore has yet been sent out from the property.

Mr. Flumerfelt resumed his journey to Montreal on Thursday and Mr. Galer returned to Coleman.

Greenwood Strike Settled.

The strike which was on last week on the contractors for the new work at the B. C. Copper Co.'s smelter at Greenwood, has been settled by W. P. Tierney and James Creelman, the contractors, granting the $3 for a nine hour day, which was demanded. This strike did not affect the operation of the smelter itself in any way.

The strike declared on the West Kootenay Power & Light Co.'s substation at Anaconda, adjoining the B. C. Copper Co.'s smelter, has not yet been settled. The men asked the same hours and wages as above, and they are still out. L. A. Campbell, the manager of the company, was in Greenwood from Rossland late last week, looking into the matter, but at last accounts no compromise had been reached.

Latest Prices in Metals.

COMING AND GOING

Phil McDonald, of Greenwood, was renewing old acquaintances here Thursday.

John McRae, of McRae Bros. & Smith Ltd., made a business trip to Nelson yesterday.

Mrs. A. B.W. Hodges accompanied Mr. Hodges on a trip to Phoenix from Grand Forks on Wednesday.

Provincial Constable I. A. Dinsmore, of Grand Forks, was here yesterday on professional business.

Emil Almstrom returned Saturday from a two weeks trip to Northport, leaving his family on his ranch near there.

F. W. Thomas, of New York, consulting engineer for the B. C. Copper Co., after spending some ten days in the Boundary, left for the coast last Saturday.

A. Muchmore, of Vancouver, representing the American Type Founders' Co., spent a day or two here this week, leaving for Spokane and the coast yesterday.

Wm. Dickman, of Rockville, Wis., the original locator of the Providence mine, arrived here Wednesday, and will likely spend some time in the Boundary.

Rev. Lundie spent a few days in Cascade this week, and incidentally wooed the finny denizens of Christina lake. Only one specimen responded to the woo, however.

William Harding, Great Northern passenger conductor in and out of Phoenix, was attending court in Rossland this week, being a witness in some timber matters.

Ed. Stirling, formerly of the Nelson Proctor run of the C. P. R., and previous to that on the White Wings Limited on the Phoenix branch, is once more handling the punch between Eholt and Phoenix.

Dr. James Sproat was a visitor here last Saturday, shaking hands with old friends, and leaving the next day for Portland, Oregon, where he has located for the practice of his profession. He recently graduated from the Toronto University.

Rev. C. Wellesley Whittaker, left Monday to attend the annual conference of the Methodist church at Victoria, and will visit his old home in England before returning to Phoenix. Francis Knott is the lay delegate from Phoenix to the conference.

MR. JOHNSON WAS PLEASED

With Dominion Copper Progress.

Smelter Plant Doubled by Early Fall.

After spending a week in the Boundary looking after the interests of his company, Maurice M. Johnson, consulting engineer for the Dominion Copper Co., Ltd., and a member of the company's board of directors, left for his headquarters in Salt Lake City by Wednesday's Great Northern train. While in the Boundary, Mr. Johnson, in company with Thomas R. Drummond, the resident manager, visited the Sunset, Brooklyn, Stemwinder, Rawhide and Mountain Rose mines of the concern, inspecting the work that is being done at the several properties. He also spent some time at the smelter, discussing enlargements and improvements with W.C. Thomas, superintendent of the company's reduction works at Boundary Falls, that have been doing such excellent work since they were blown in a few months ago.

To a representative of the Pioneer, Mr. Johnson said that he was very well pleased indeed with the results of development at the various properties of the company, and with the metallurgical results being obtained at the smelter. All branches of the company's work are moving along smoothly, and withing thirty days preparations will be started for the enlarging of the smelter, where another furnace, as large as the two now in use, will be installed, doubling its capacity. This work, Mr. Johnson thought, should be completed so that the increased capacity can be handled by early fall. In the meantime the mines also will be placed in a position to furnish the increased output, which is now about 650 tons daily. The new 25-drill air compressor plant for the Idaho will be installed, and from that time on the plant is expected to reduce at least 1200 tons daily and produce about a carload of copper matte every 24 hours.

Mr. Johnson, who is also consulting engineer for several other enterprises in which Samuel Newhouse is interested, expects to return to the Boundary in a few weeks.

GT. NORTHERN IN NORTH FORK

Said to Intend to Build to Franklin Camp.

Chief Engineer Kennedy is the Authority.

The announcement comes from Grand Forks that James H. Kennedy, chief construction engineer for the V., V. & E. railway, who has recently been at Ottawa, to appear before the railway commission regarding the entering of the town of Hedley, in the Similkameen, by his line, which the C.P.R was opposing, has made the statement this week that the V., V. & E. will at once proceed to construct a branch line of railway up the North Fork of Kettle River to Franklin camp. According to the information, Mr. Kennedy is now in Grand Forks and is arranging to send parties of surveyors into the North Fork country, to select the most feasible route.

If the Kettle Valley lines continues with its announced intention to build up the North Fork, that section will evidently have several railways, and almost before it has a wagon road.

Suspects Were Discharged.

Last Saturday morning Conductor Nelson, who has charge of a C. P. R. ore train out of Phoenix, arrived in Nelson to spend the Sunday with his family. As he stepped off the train at Nelson he was held up by a couple of men and relieved of his watch, some $150 in cash being fortunately overlooked by the thugs. Monday Chief of Police Flood took into custody two men who had just alighted from a box car in the C. P. R. yards here, suspected with being the thieves. They were held a couple of days, and closely questioned by the police officials here, as well as by Officer Dinsmore, of Grand Forks, it being a provincial case. Their names were John T. Gibson and Chas. Connors. Being brought before the police magistrate, they were finally warned to leave town very suddenly, which they did. Nelson felt certain that one of the suspects held him up, but could not swear to it, so they were discharged.

Building the Connecting Link.

This week Ed. McGrade, foreman of the C.P.R. extra gang, put his force of some 18 sons of sunny Italy at work on grading the spur track which will connect the C.P.R. and Great Northern systems at Denoro. It is expected that it will require but two or three weeks to complete the three or four hundred feet of grade and track, the rails of both roads running close together at that point. The spur will run from the B. C. spur of the C.P.R. to the Great Northern on Oro Denoro ground. This point is about eight miles from Phoenix by either line, and will enable the Idaho mine in this camp, located on the Great Northern, to send ore to the company's Boundary Falls smelter, located on the C. P. R. The same thing will work in getting Showshoe ore to the Northport smelter, whenever that shall have been finally decided upon.

BROKE HIS LEG—DIED OF PNEUMONIA.

Conrad Gustafson Was Buried Tuesday in Local Cemetery.

Last Sunday Conrad Custafson, a miner who had been employed by the Granby Co. at the Gold Drop, died of pneumonia at the Phoenix General Hospital. He was taken to the hospital some little time ago suffering from a broken leg, some rock that he was barring down having caught him and crushed the limb. The fracture was a bad one, one of the worst seen here in a long time, and it was mending in good shape. Before being hurt, however, Gustafson had contracted a bad cold and this developed into pneumonia and carried him off.

The funeral was held Tuesday afternoon, under the auspices of Phoenix Miners' Union No. 8, of which deceased was a member, interment taking place in the Phoenix cemetery.

Gustafson had a brother in camp, the two having come here from Moyie last September, where they had been employed in the St. Eugene mine. Deceased was a young man of 23 years, unmarried and a native of Sweden.

Granby President Here Today.

Today Jacob Langeloth, president of the Granby Consolidated, will be here from New York, to inspect the properties of the company. He will be accompanied by Mrs. Langeloth, Jay P. Graves, general manager of the company, Mrs. Graves and A. B. W. Hodges, general superintendent of the company. The party is expected to stay in Phoenix two or three days.

Boundary Mining Notes

Development work is to be resumed on the Betts and Hesperus about June 1st.

The new crusher for the Granby mines, which arrived a few days since, will be located at the headworks of the new main three-compartment shaft.

J.C. Haas, M.E., of Spokane, arrived in the Boundary this week, and expects to see work started on the Golconda once more at no distant date.

It is reported that a deal has been arranged for the bonding of the Big Copper to Boston capitalists, and that the papers were finally to be signed this week.

The machinery for the five stamp mill for the Carmi, which has been at Midway for some time, was unloaded and sent to the mine up the West Fork last week.

Officials of the B. C. Copper Co. are reported to have recently visited Gloucester camp, and to have taken a bond on the Gloucester group from George A. McLeod.

It is said that the crosscut in the ore body on the Pathfinder, on the North Fork, is in some 30 feet and continues in ore. The property is under bond to the Granby Co.

Some of the machinery for the enlargements at the B. C. Copper Co.'s Greenwood smelter is beginning to arrive, several car loads having already been received from the manufacturers in the east.

A sample of free gold ore from the Neverslip, owned by Jos. Simpson, and located near Grand Forks, gave $5,284 per ton in gold and a trace of copper. The quartz ledge is said to be a large one.

The Canadian Western Oil Co., Ltd., now being formed is composed largely of Greenwood men, and is the first concern, so it is claimed, to secure a lease on coal and oil lands in British Columbia.

The electric hoist for the Prince Henry mine has arrived from Denver, and is being installed at the property. This will place this property in excellent condition to proceed energetically with development work.

The Dominion Copper Co.'s special meeting, called a couple of weeks ago, will be held next Saturday at the company's office in Phoenix, to authorize the issuance and sale of $300,000 first mortgage bonds and 228,000 shares of capital stock, par, $10.

Keipiro Nakamura, who is chief metallurgist for the Besshi copper mines, Island of Shikoku, southwest of Kobe, Japan, is about to investigate the metallurgical processes in vogue in the three Boundary smelters, having visited the coast smelters on a similar quest.

Last Monday No. 1 furnace at the Granby smelter was blown in once more, after undergoing repairs and a decided enlargement, according to the plans of Supt. Hodges. This furnace was first blown in on August 21, 1900, and was also the first furnace blown in at any smelter in the Boundary.

Matters are being shaped up here on two or three mining deals of no little importance, which will, if consummated as expected, add materially to the already comfortable payroll of Phoenix. Several large groups of claims are included, and an announcement in the matter is expected shortly.

PAYROLL WAS ABOUT $60,000

April Wages Paid Out in This Camp.

Boundary Pay Was Over $126,000.

The payroll for the mines and smelters of the Boundary for the month of April, runs, as usual, over $126,000, although it is a trifle less this month than the month before, owing to the Granby Co. having had one furnace out of commission most of the month, while repairing and enlarging at the smelter.

For Phoenix camp the payroll, which was distributed last Thursday, amounted to about $60,000, which, for the reason above mentioned, was somewhat smaller than last month. From this on, however, the payroll for Phoenix should hold well up to $65,000 per month, and will likely go above that figure before the summer is out. All day long on Thursday there was a stream of men going from the Dominion Copper and Granby offices to the Eastern Townships Bank to get their pay checks cashed, and the amount of money in circulation was increased to an appreciable degree.

At the B. C. Copper Co.'s Greenwood smelter and Mother Lode mine, exclusive of construction work, the payroll Thursday was $26,000.

The following is an approximate estimate of the payroll of the three largest mining and smelting concerns in Boundary for April, which was disbursed this week:

Granby Consolidated	$75,000
B. C. Copper Co.	26,000
Dominion Copper Co.	25,000
Total	$126,000

Old Maids' Association.

Wednesday evening Phoenix Lodge of the I.O.G.T. gave an entertainment in the main lodge room of Miners' Union hall, there being an excellent attendance of the faithful and their many friends. It was "The Old Maids' Association," similar to an entertainment of the same nature given here some six years ago. Those who took part were Miss Clark, Miss Howe, Miss Wall, Miss Botha, Miss Marlin, Miss McKenzie, Miss Targett, Mrs. Knott, Mrs. Boyce, Mrs. Gordon, Mrs. Dan Martin, Mrs. Hugh Reid, with Gilbert McEachern taking the part of the professor. Much merriment was created by the experiences as related by the old maids, and the evening closed with refreshments.

Returns from the last car of high grade ore shipped from the Skylark mine gave an average of $158.40 per ton in gold and silver. F. C. Buckless has been hauling another couple of cars this week. Before the summer is gone the company expects to have the bond paid up on this property.

NOTICE.

Owing to telegraph and telephone systems being crippled last night, the ore tonnage table is incomplete this week.

BOUNDARY ORE TONNAGE.

MAY 12, 06

The following table gives the ore shipments of Boundary mines for 1900, for 1901, for 1902, for 1903, for 1904, for 1905, and 1906, as reported to the Phoenix Pioneer—

Three Reasons Why

Blue Ribbon

TEA excels all other teas:

FIRST---Because it is grown in the best gardens in India and Ceylon.

SECOND---Because it is blended by competent and experienced men.

THIRD---Because great care and cleanliness are exercised in its packing.

Following in the Wake.

As old as the hills is the saying that nothing succeeds like success, and it as true today as it was when first uttered. This is noticeable just now in the success that is attending the mining of low grade ores in the Boundary district of British Columbia. For years two or three companies pegged away here, working out the problem of how to make ore extraction here commercially profitable, when many of supposed good judgment shook their heads at the immense amounts of capital being put into these properties.

Then came the gradual evolution, from the stage where the mines were in doubtful column, to that where they had demonstrated the ability to make copper here at a profit. On top of this came the increase in the price of the red metal in the world's markets, and then began the turn of the tide.

Last January the Granby Consolidated paid a dividend of $405,000, and next week this company will pay another similar dividend. This is expected to continue three or four times a year hereafter. The B. C. Copper and Dominion Copper companies are both doing well and doubling or more than doubling their capacities for producing copper, there being no trouble now to finance propositions of this sort here. The Granby, as well, in accordance with its custom for years, is still planning and arranging for a greater output each year.

In addition to these healthy signs and proofs of prosperity, is the fact that other capitalists are having their attention drawn to this section as never before, and it is an open secret that more than one group of moneyed men is now figuring on entering this low grade field with all the cash necessary. They are following in the wake of those who have stood the burden of making low grade mining in the Boundary a success, but they are none the less welcome on that account. They think that the psychological time for investment here has arrived and we agree with them. The path has been hewed, the problem demonstrated, other great copper lodes await them, and they will be welcome if they come with the same backing and bona fides as that of the companies now in the field.

Is Well Worth the Price.

Recently the editor of the Nelson Daily News has made the statement several times that, unless the business men of Nelson see fit to support that paper more liberally, it would be forced to discontinue publication. Thus the matter would appear to be up to the people most interested in that thriving town, and they must decide. Is the News doing all possible for the upbuilding of the place or not? Is it possible to publish a better paper there?

Most emphatically we should say that the News is doing all and more than its full share to make known the advantages of the Kootenay metropolis as such. It certainly is publishing a good paper for this country. The paper certainly cannot be making any money. Outside of Nelson, as far as the reading public goes, the paper is appreciated and patronized—in the Boundary and through the Kootenays. F. J. Deane, the editor, is today doing more than any other one man for the good of Nelson. Not only that, but he is attempting, in his enthusiasm, to do what not one in fifty newspaper men of experience would attempt—trying to make it a paying proposition. Many of little experience would doubtless like to tackle it—with others' money; but few would care for it for the profits in sight. And so, we say, that Mr. Deane should receive a greater measure of support. If he does not, the town will be a greater loser than he.

Unquestionably the best and greatest advertisement any place can have is a good local paper, whether it be daily or weekly. If the town has such, it is the duty of every business man to patronize it—not as a charity, for it is nothing of the kind, but strictly as a business proposition. No matter where located, whether in Nelson, or any other part of Canada, or in Phoenix, the local paper, if clean, up to date and creditable, is entitled to the support of every man interested in that town. If this support is lacking, sooner or later the paper must suspend or curtail, in either of which events it is hanging out the flag of distress, and the business men must feel the effects of it in due course. Nelson should support its Daily News. It is clean, creditable and up to date—the best advertisement Nelson ever had or is ever likely to have, for, after an experience of twenty years in the newspaper business, we miss our guess if another man will be found who will put the time, labor and cash into the proposition that Mr. Deane has.

Not if as Rich as Rockefeller.

If you had all the wealth of Rockefeller, the Standard Oil magnate, you could not buy a better medicine for bowel complaints than Chamberlain's Colic, Cholera and Diarrhoea Remedy. The most eminent physician cannot prescribe a better preparation for colic and diarrhoea, both for children and adults. The uniform success of this remedy has shown it to be superior to all others. It never fails, and when reduced with water and sweetened, is pleasant to take. Every family should be supplied with it. Sold by all druggists.

THE OBSERVATORY

THINGS TALKED OF AT HOME AND ELSEWHERE

It is reported that the first copper mine worked in America, was at Granby Connecticut, as far back as 1705, but the mines in that state never produced much copper. In the Dominion of Canada, the Granby mines were not the first copper mines worked, but they are today the greatest copper producers in Canada.

The first rail on the Grand Trunk Pacific has been laid at Portage la Prairie, but no one is brash enough to hazard when the first rail of that system will be laid in British Columbia, notwithstanding the efforts of the "Solid Seven"—that is, efforts put out about election time, and lost sight of since the ballots were counted.

Matters are coming to a pretty pass in Toronto the good. If reports are true, thirst parlors have raised the price of liquid refreshments to the standard in the west, a bit each. The five cent day has been relegated.

Fernie seems to be having several kinds of trouble with the big coal company, which has its headquarters there, and which seems to pay about as much attention to side issues as it does to coal mining and coke making. The company owns, through another company, the water and light systems, and also controls the telephone system. Recently a controversy came up between the Fernie city council and the coal company, and the council won out by appealing to the courts. Now then the coal concern has raised the price of water, etc., and the people of Fernie are paying through the nose for everything the Crow's Nest Pass Coal Co. has a say about. They decline to bow down to the coal god, and the latter puts on the screws. It looks, at this distance, as though the coal barons had gone too far, and one of these fine days would have to climb down from their high horse and be reasonable with the people. The worm will turn.

Cobalt, the booming mining town of Ontario, that is acknowledged to have great merit, is beginning to struggle under the incubus of a mining exchange. If it keeps up, we can see Cobalt's finish.

Last Monday the summer schedule on the C. P. R. was put into effect on the Boundary branch. The chief effect is receiving mails an hour earlier, and in the cutting out of communication entirely in one day by rail between Phoenix, Greenwood, Boundary Falls and Midway—by which the C.P. R. will lose considerable patronage. Once again, although Phoenix is but five miles from Greenwood, and is connected with that town by Canada's greatest railway, it requires two days for the transmission of mails between the two places.

The legislators of the new province of Alberta seem to think their brain and talent are valuable, as they have fixed upon $1,000 each for the sessional indemnity of a few weeks, which is said to be the highest of any province in the Dominion. Doubtless, they need the money.

Frank Leslie's Illustrated Weekly recently had an article on the Granby Consolidated, with a view of the smelter. It was published for the purpose of calling attention to the Mineral Hill properties, a few miles distant across the international boundary line, near Danville, Wash. Thus do the little fellows continue to travel in the wake of the Granby.

Politicians east and west are now treating of the contract made by the Laurier government with the North Atlantic Trading Co., and Duncan Ross, M. P.,—our own Duncan—was selected to make a speech on the floor of the house defending the measure. It was a disagreeable job for Duncan, out he had no choice about it, and jumped right out into the limelight, getting his name in the press all over Canada. That the contract was a pernicious one is shown by the fact that the government cancelled it. Independent and nonpartisan dailies criticised the measere unmercifully, and the Grits backed out of the matter as gracefully as possible.

Sore Nipples.

A cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the child to nurse. Many trained nurses use this salve with the best results. Price 25 cents per box. Sold by J.B. Boyle.

Canada's Mineral.

Practically all the valuable minerals are found in Canada.

Canada's mineral production in 1905 reached $70,000,000.

Canada has produced in the last 20 years 600 millions worth of minerals.

Canada has produced 200 millions in gold since 1862.

One half of this has come from the Yukon since 1896.

The Yukon produced 12 millions worth of gold in 1905.

Canada ranks fourth among the world's gold producing countries.

British Columbia has produced nearly 100 millions in gold all told

Canada's Yukon gold field is 125,000 square miles in area.

Yukon placers have produced more gold than any other placer mines in the world.

Canada's mineral production has increased 600 per cent since 1896.

PHOENICIAN IN 'FRISCO

Graphic Account of the Earthquake

32 Quakes Since First Big Tremble.

Thousands of stories have been written regarding the almost inconceivable experiences at the time of the recent earthquake at San Francisco, but we have seen nothing that seemed more graphic than that contained in a letter to the editor of the Pioneer, received from H. S. Turner, once a resident of Phoenix, but for the last two years successfully conducting a printing establishment of his own in the heart of San Francisco. While Mr. Turner's loss was fortunately little, his son, a wholesale confectionery manufacturer, with several retail stores, lost nearly everything. Following is the letter in part:

San Francisco, Cal., April 29, '06.

W. B. Willcox,
Phoenix, B.C.,

MY DEAR WILLCOX,—I and mine, at this writing, are alive. I was not burned out, but my two boys were—homes and businesses. My office was pretty well overturned, and my presses were more or less injured by the awful convulsion; but with plenty of help I was able to do business the second day after the crash.

But, oh! Mr. Willcox, of all the horrors that human being are called to witness, this terrific rage of irresistible, unseen and unheralded force of nature, which overthrew our beautiful city in a few seconds, is the climax. The sepulchral, deafening roar which for a few seconds preceded the twisting jerk, was enough to frighten the life out of one; and then came the inexpressible din and clatter of crashing timbers and falling brick walls and chimneys.

This whole peninsula seemed to wave in space like a long streamer in a stiff breeze, then, like the snapper on the end of a long lash, we got an awful jerk. It was simply paralyzing. There are sections in the city where four or five blocks were moved in a body from six to ten feet, and some were sunken from ten to fifteen feet. The street railway tracks were twisted so out of place as to need complete reconstruction. All the power houses in the city were destroyed, both trolley and cable. The gas and electric plants having been destroyed, we have neither light nor power. The only light we are permitted to use is a tallow dip. All the chimneys having been destroyed, we have been compelled to move our stoves into the street and keep house there. The two first nights after the shock we slept on the hills—afraid to go into our houses, for, until yesterday, the quakes have been quite serious and frequent.

Our home newspapers have not told a tithe of the horrors of this escapade of nature. They have studiously minimized everything. The destruction of life and property by the quake was great, but that by fire was greater. On the night of the second day of the fire, I stood on Bernal Heights, near my office, and saw a raging wall of fire and furious flames over four miles in length; then the heartrending scenes incident to a stampede of tens of thousands of frantic human beings. The most vivid imagination cannot picture anything so appalling.

Though the papers report a few hundred lives lost, it is generally claimed that more than two thousand cannot be accounted for. After martial law was declared, at least fifty people were shot to death for thieving or other crimes. Two hundred were poisoned by eating of canned goods that were partially destroyed by fire, and their bodies were cremated.

As all the wholesale stores were destroyed, the supplies in the retail stores were soon depleted and we all have to get in the bread line to get food, some of these lines being half a mile long, five and six abreast. I've stood beside men who, a few hours previous, were millionaires, and with them taken bread and other supplies from the relief committees. My wife says, tell Mr. Willcox that there have been 32 quakes since the heavy one. (Yes, and three more last night.)

H. S. TURNER.

In a letter dated May 4th, Mr. Turner also says:

We have no lights other than candles, no power for machinery, only one street car line in operation, and we still have to do our cooking in the streets, as there is not a whole chimney in the fraction of the city left, nor hardly a building not out of plumb—they are all zigzag. The fire in places is still burning, and the stench from cooked human corpses is sickening. I was just informed by a prominent undertaker that the estimated loss of life was over ten thousand. Some of the bodies are buried, some are incinerated and some are weighted and thrown into the bay. I want to get away from these heartrending, harrowing surroundings.

Stomach Troubles.

Mrs. Sue Martin, an old and highly respected resident of Faisonia, Miss., was sick with stomach trouble for more than six months. Chamberlain's Stomach and Liver Tablets cured her. She says: "I can now eat anything I want and am the proudest woman in the world to find such a good medicine." For sale by J. B. Boyle. Samples free.

THE COPPER HANDBOOK

A practical book of nearly a thousand pages, useful to all and necessary to most men engaged in any branch of the Copper Industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the every-day man.

It is a dozen books in one, covering the History, Uses, Terminology, Geography, Geology, Chemistry, Mineralogy, Metallurgy, Finances and Statistics of Copper.

It gives the plain facts in plain English without fear or favor.

It lists and describes 3,849 copper mines and companies, in all parts of the world, descriptions running from two lines to 12 pages, according to importance of the property.

The COPPER HANDBOOK is conceded to be the

World's Standard Reference Book on Copper

The miner needs the book for the facts it gives him about mines, mining and metal.

The investor needs the book for the facts it gives him about Mining Investments and Copper Statistics. Hundreds of Swindling Companies are exposed in plain English.

Price is $5 in Buckram, with gilt top; $7.50 in full library morrocco. Will be sent fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

Boundary Mining and Smelting Men.

IX.

(This is the ninth of this series of articles on men who have been prominent in Boundary's development, each complete in itself. The next will appear in an early number.)

SAMUEL NEWHOUSE.

In the last ten or fiteen years the Boundary country has had the attention of many prominent mining men, but probably none of more importance than Samuel Newhouse, of Salt Lake City, managing director of the Dominion Copper Co., Ltd., who first became interested in that incorporation about a year ago.

Mr. Newhouse was born in New York City in 1855, and is thus a comparatively young man to have achieved international name and fame, to say nothing of the many millions with which he is credited. He was educated in the public schools of Philadelphia, and after graduation read law with Hon. E. N. Willard, of Scranton, a jurist of high rank in the commonwealth of Pennsylvania. In 1879 Mr. Newhouse arrived in Leadville, the Cloud City of the Centennial state, and for a time gave his attention to newspaper work, which may account for his consideration of the members of the fourth estate. In a short time, however, he became a freighter, and as there were no railways in those days, the freighter was the important man of the community, and one who rapidly made money. Consequently, Mr. Newhouse quickly acquired a solid but modest financial foundation. In 1885 he turned his entire attention to practical mining, taking leases and bonds, and by working in the mines himself for the first few years, acquired a knowledge and experience which soon proved to be far beyond value to him.

Today Mr. Newhouse is one of those leaders of men whose name is as well known in the innermost financial circles of London as it is in New York, Colorado, Utah, Montana and California, this being shown by the fact that he is associated financially with the Guggenheims, the Untermeyers, the Rockefellers, the Rogers and others of the financial world. He has gathered around him a corps of experts ready at all times to critically examine all properties under consideration, and it has become almost proverbial that a mining property under his control is practically sure to turn out a dividend payer and not a quasi failure. In Salt Lake City he has maintained one of the most perfectly equipped forces of mining experts, surveyors, assayers and chemists that exists in the United States, installed in a suite of offices that are regarded as one of the sights of that city.

Mr. Newhouse was the original owner of the famous Highland Boy mine, now incorporated as the Utah Consolidated Gold Mines, Ltd., and sold a half interest in this company to the Standard Oil people for about $6,000,000, he being still one of the directors of the company. Mr. Newhouse is also president and managing director of the Boston Consolidated Copper Mines, a copper producer adjoining the Highland Boy, at Bingham, Utah, too well known to need extended reference here.

One of Mr. Newhouse's greatest efforts, however, is centered around the town of Newhouse, where the great Cactus copper mine is owned and operated by the Newhouse Mines and Smelter Coporation, located in southwestern Utah, not far from Nevada. Two years ago there was nothing there, while today Mr. Newhouse is spending millions in the building of a model mining camp, centered around his far famed mines. He believes that labor is responsive to good treatment, and he proposes to show that here, at least, is one corporation with a soul, and a portion of the profits, he announced, should go to the miners. This property, like nearly all mines in which Mr. Newhouse is interested, will doubtless be a dividend payer for years to come.

In 1883 Mr. Newhouse married Miss Ida H. Stingley, of Virginia, the family being in truth one of the F. F. V.'s. In London they maintain a magnificent establishment, their social position being second to none in the American colony. His brother resides in London, taking charge of the European interests of Mr. Newhouse with a large clerical force in suitable banking offices. He himself visits London frequently, but most of his time is passed in the west. A keen observer and earnest student, and at the same time a rapid worker, Mr. Newhouse vibrates between Salt Lake City, Denver, London and San Francisco, and keeps in close touch with his vast and scattered mining interests.

Mr. Newhouse has visited the Boundary and Phoenix but once, in August, 1905, when he came here with a party of directors of the Dominion Copper Co. to look at the properties of the company. How well pleased he was with this visit and with the reports made to him by his metallurgical advisors is shown by the extensions being prepared for by the company in the Boundary, as well as by the satisfactory work already done.

Mr. Newhouse is known among those best acquainted with him as a man with a big heart and one who gives every one with whom he comes in contact a square deal, and sometimes perhaps a little more. One incident related by a resident of the Boundary will illustrate:

"I was in the office of Mr. Newhouse in Salt Lake City, when a poorly dressed washer woman entered, and was asked by one of the clerks what she wished. In that office it is a standing rule that anyone who asks personally for Mr. Newhouse, whether he be a miner or a banker, shall be admitted. The woman wished to see Mr. Newhouse personally, and sent in her name. When he heard it, Mr. Newhouse left the magnates he was conferring with, went into the outer office and held the door open himself to usher her into a private room. He listened to her story, which was the old one of hard luck, and recognized in the woman a worthy acquaintance of early days in Leadville. A loan of $25 was desired, but when she went out she had the check of Mr. Newhouse for $100."

It is Dangerous to Neglect a Cold.

How often do we hear it remarked: "It's only a cold," and a few days later learn that the man is on his back with pneumonia. This is of such common occurrence that a cold, however slight, should not be disregarded. Chamberlain's Cough Remedy counteracts any tendency of a cold to result in pneumonia, and has gained its great popularity and extensive sale by its prompt cures of this most common ailment. It always cures and is pleasant to take. For sale by all druggists.

PROVINCIAL.

A healthy nest of Eagles has been hatched in Vernon.

Kelowna proposes to issue $6,000 in debentures for street improvements.

B. A. Isaacs has purchased the Nelson Iron Works from J. A. Honeyman.

There is considerable fruit land activity around New Denver and Silverton.

Vancouver expects building permits for the year to amount to over $3,000,000.

The Grand Lodge of the Knights of Pythias met in annual session at Nanaimo this week.

It is now said that the Grand Trunk Pacific will have 15 survey parties in the field in British Columbia ths summer.

Last Saturday the C. P. R.'s new $90,000 steamer, the Kuskonook, was launched at the Nelson shipyards, to go into commission in about a month.

Christopher Curry was killed at the Centre Star mine at Rossland. He fell sixteen hundred feet down the shaft of the mine, and was almost torn to fragments by the projections.

The Coldstream Estate Co., Ltd., has been registered at Somerset House, London, to acquire and operate the Coldstream ranch, owned by the Earl of Aberdeen, formerly governor-general of Canada, and now lord-lieutenant of Ireland. The property is described as the Coldstream ranch, of 13,000 acres and some 470 acres additional. The capital is £80,000 in £100 shares.

Sciatica Cured After Twenty Years of Torture.

For more that twenty years Mr. J. B. Massey, of 3322 Clinton St., Minneapolis, Minn., was tortured by sciatica. The pain and suffering which he endured during this time is beyond comprehension. Nothing gave him any permanent relief until he used Chamberlain's Pain Balm. One application of that liniment relieved the pain and made sleep and rest possible, and less than one bottle has effected a permanent cure. If troubled with sciatica or rheumatism why not try a 25-cent bottle of Pain Balm and see for yourself how quickly it relieves the pain. For sale by all druggists.

B. C. MINING

The Jumbo mine, at Rossland, is once more shipping to the Granby smelter.

The Last Chance, at Sandon, is being reorganized with a capital of $500,000.

Rossland ore shipments last week were 6,252 tons, making 121,342 tons for the year.

Total ore receipts at the six Yale-Kootenay smelters last week were 31,694 tons.

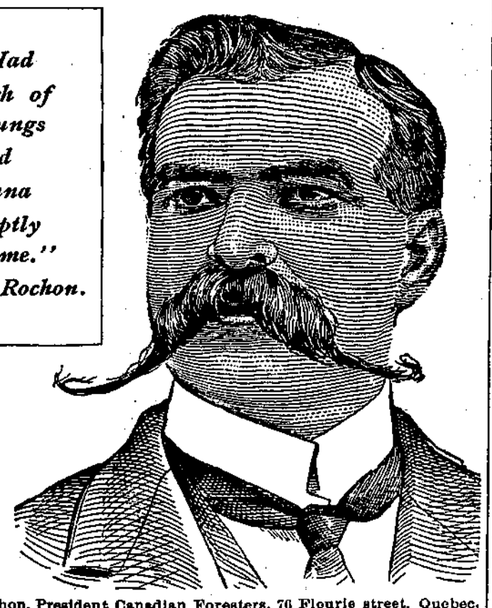
The Frank smelter people have taken a lease and bond on the Giant group of silver-lead claims in Spillamacheen for $100,000.

F. Aug. Heinze has sent a party of mining engineers to examine the 40 claims in the Telkwa and Bulkley districts, on which he recently took options.

SEVERE CANADIAN WINTERS DEPRIVED OF THEIR DANGER.

Colds and Their After-Effects Conquered By the Use of Pe-ru-na.

"I Had Catarrh of the Lungs and Peruna Promptly Cured me."
--Alfred Rochon.



Hon. Alfred Rochon, President Canadian Foresters, 76 Flourie street, Quebec, Canada, writes:

"I am pleased to add my testimonial to the many I see to the efficacy of Peruna. I suffered for some time with chronic catarrh of the lungs and really thought that I was not to get any relief, as I had used so many remedies and my condition remained about the same.

"Finally I decided on Peruna and that was a lucky day for me, for it proved to be the remedy which cured me. My lungs are perfectly sound now and I have not had the slightest trouble with them since, and at the slightest indication of a cold now I take a few doses and it will always ward off any bad effects."
---Alfred Rochon.

Catarrh of the lungs is, ordinarily, known as consumption. In these cases the catarrh has usually found its way into the lungs by the gradual extension of the disease from the throat through the bronchial tubes. Consumption is the natural termination of all cases of neglected chronic catarrh. Every one who is afflicted with chronic catarrh is liable to be attacked with consumption at any time. In the first stages of the disease Peruna is a sure cure.

NEGLECTED COLDS PROVE DISASTROUS.

A slight cough, which, without a vestige of doubt, would soon disappear with the use of Peruna, becomes chronic bronchitis, which requires a persistent use of Peruna for some time. There are a great many cases of consumption every year due directly to a cold.

A COUGH IS NATURE'S WARNING.

Peruna is for sale by all first class drug stores at $1 per bottle.

Send to The Peruna Medicine Company, Columbus, O., for Dr. Hartman's free book, entitled, "Chronic Catarrh."

Kootenay mines ore shipments last week were, St. Eugene, 524 tons; Sullivan, 500 tons; Hunter, V., 52 tons; North Star, 234 tons; Krao, 40 tons; Rambler, 14 tons; I. Henry, 6 tons; other mines, 175; total 1545 tons.

In and Around Phoenix

BRIEF TOPICS OF LOCAL AND GENERAL INTEREST TO PHOENICIANS.

Lowney's chocolates at Boyle's.

The old reliable, Boyle the Druggist.

Hannam's milk suffers no addition or subtraction.

New and second hand goods sold by R. J. Gardner.

Rugs and art squares from $1.75 up, at Binns' Furniture Store.

Take your watch to Dey, the Jeweler. He guarantees all repairs.

See Miss McDonald, milliner, for Singer sewing machines and supplies.

Miners, attention. If you want solid comfort, stay at Hotel Brooklyn

California strawberries are now in the local markets, and every berry has its price.

For Sale.—Old Miners' Union hall. Apply to John McInnis, chairman Board of Trustees.

Rev. J. Leech Porter, wife and child, of Greenwood, were visiting Dr. Boucher yesterday.

The next meeting of the Dominion Day celebration committee will be held at the city hall next Thursday evening.

When feeling like having having a wee drappe Scotch, call at the Brooklyn and have a wee taste McCallum's Perfection.

The baseball club received the new suits from Chicago this week, and will wear them in a game with a local team tomorrow.

Have you seen the newest in printed stationery, linenette? It is the best yet. Stock just received by the Pioneer job department.

James Marshall has decided to install a complete and modern hot water heating plant for his Hotel Brooklyn, at a cost of some $3,000.

The city team earned its oats one day this week by being used in the grading operations on Aetna avenue, between Church and First streets.

Owing to the absence of the minister, Rev. Whittaker, at the annual conference, there will be no service in the Methodist church tomorrow.

The current issue of the B. C. Gazette contains notice of the incorporation of W. S. Macy & Co., Ltd., of this city, with a capital of $10,000.

There are three reasons why our brushes are attracting attention. Quality of goods; lowness of price, and good assortment.—Thomas Drug Co., Ltd.

Yesterday afternoon's rain was very welcome. While itdid not directly affect the local crop of chalcopyrite, it did much good to the many gardens and lawns.

That Back Yard Assessment. Our Chloride of Lime, at 25c. a can, and Crude Carbolic Acid, at 25c. a pint, will do the work in twenty-four hours. —Thomas Drug Co., Ltd.

If you want deeds, mortgages, leases, bills of sale, agreements or documents of any kind promptly and carefully prepared, go to A. S. Hood, Notary Public, Bank Block.

There is something new in Phoenix. Daniel Draisey has opened a candy kitchen adjoining the Knob Hill cafe on First street, and makes an announcement in another column.

Plans for the new Burns block, to be erected on the corner of First street and Victoria avenue, are expected here daily by Manager Sherbino, when tenders will be asked for the erection of the building.

Work on the painting of the scenery for the new Miners' Union opera house is proceeding in good shape, and the work will be done in a short time, when final arrangements for a big opening of the auditoriam will be made.

By advertisement in another column, it will be noticed that the C.P.R. will run special excursions to Midway, on the 24th of May, for the celebration in that town, the round trip from Phoenix being $1.50 or 75 cents for children.

Postmaster Matheson has received word from Inspector Greenfield at Vancouver, that he had recommended to the postoffice department at Ottawa the corner of Aetna avenue and School street as a new site for the postoffice in this city.

A number of outside physicians were in the city Thursday, including Dr. Hall of Nelson, and Drs Foster, Spankie and Oppenheimer of Greenwood, conferring with the local medicos regarding matters in which they are all interested.

The Great Northern Railway will sell through return tickets to London, Ont., May 28th to June 1st, inclusive, account of Canadian Presbyterian Assembly, good to return until July 31st, at rate of $72.85; to Ottawa, selling dates June 4th and 5th, good for sixty days, first class at rate $79 85.

This week a deal was made by which E. P. Shea and Ed. Brown, owners of the Bellevue hotel on Knob Hill avenue, purchased the adjoining property, which had been owned for some years by Knight & Stone, the diamond drillers, of Spokane. The lot was an old stable, but this will be torn down, and Mr. Shea states that it is the intention to erect a two or three story building thereon, which will be made a part of the Bellevue hotel.

Boyle, the Druggist.

J. L. Martin will buy International Coal shares.

Purity first consideration by Boyle the Druggist.

For millinery go to Mrs. Gardner, Hardy building.

Dr. Mathison, dentist, at his office, Bank block, May 10th to 14th

Get a South Bend watch. They keep perfect time.—Dey, the Jeweler.

Special attention given to Miners' Dinner Buckets at Hotel Brooklyn.

Prescriptions a specialty at Boyle's.

Phoenix Brewing Co.'s bock beer will be on draft again today.

Sewing machines to rent, $3 per month. See Miss McDonald, milliner.

Geo. E. Dey, the Jeweler, guarantees all his South Bend and Elgin watches.

Mrs. Spofford, organizer for the W. C. T. U., gave an address here a few days ago.

Marsh hotel building for rent after May 1st. Apply R. J. Gardner, Hardy Block.

See our Early English dining room suite. The latest finish. Binns' Furniture Store.

Sarsaparilla, as every one knows, is the best spring tonic. Ask for Churchill's. One hundred doses for one dollar at Thomas Drug Co., Ltd.

This week an ore body was reported reached on the 600-foot level of the Providence mine, near Greenwood, and it is said that the ore is of a better grade than usual in that rich mine. This would seem to add materially to the value of the mine.

The Great Northern offers the following rates east: New Haven, Conn., account of annual convention Knights Columbus, round trip first class, $83.60 selling dates May 24, 25 and 29, going transit limit, June 9, final limit, return, August 31. For further particulars apply to M. M. Stephens, agent, Phoenix.

T. H. Rea, manager of the Betts and Hesperus mines, was in Phoenix Wednesday, having just returned to the Boundary from a trip to Chicago. He also visited the booming camp of Cobalt in Ontario, while in the east, and will shortly make another trip to that section, having organized a company to operate there.

Frank W. Hart, formerly of Phoenix, then of Midway, and now living at Medical Lake, Wash., was the victim of an accident in Spokane, the other day. He had just returned from 'Frisco, and was standing on the O. R. & N. platform by the train when an unprotected blast set off nearby sent a heavy rock that struck Hart and shattered his arm badly, and required his being taken to the hospital.

Boundary Side Lights

Tomorrow the Midway and Greenwood baseball clubs are expected to cross bats at Greenwood.

The subscription list in Grand Forks for the sufferers by the San Francisco earthquake and fire was $115.

Alex Greig, formerly located in Phoenix, has purchased the Pacific hotel inGreenwood and will conduct it himself.

About sixty telephones were temporarily put out of business yesterday afternoon in Greenwood by an electrical storm.

From all reports, general business in Greenwood is believed to be in better condition than in any time for the last four years.

It is now expected that trains will be running west from Midway on the extension of the V., V. & E. some time in July.

Forest fires have been doing some damage already in the Boundary this season. This week they were noticed around Cascade and Grand Forks.

Next Thursday evening an amateur performance entitled, "Between the Acts," will be given in the Auditoriam in Greenwood for the benefit of the St. Jude's church of England.

Duncan Ross, M. P., was finally successful, and Greenwood enjoys mail service over the Great Northern, via stage from Midway, and is now one day nearer the outside world in that respect.

May 20 is now announced as the date when the Kettle Valley line will begin its construction on the North Fork extension. It is expected to have steel laid as far as Lynch creek about 20 miles, this fall.

A branch of the W.C.T.U. was organized last week in Grand Forks, with the following officers: President, Mrs. Dr. Follick; 1st vice-president, Mrs. Case; vice-president for Methodist church, Mrs. Manuel; vice-prsident for Presbyterian church, Mrs. McLeod; vice-president for Baptist church, Mrs. Auvache; secretary, Mrs. F. Reid; treasurer, Miss McRae.

Piano Raffle May 19th.

M. H. Roy states that the raffle for the upright piano will be held at the Butte hotel on Saturday evening, May 19th.

Two Base Ball Tournaments.

The first base ball match of the season to be played on the Phoenix diamond, was pulled off here last Sunday, the Phoenix fans crossing bats with the team from Greenwood. The game was close, the score standing 10 to 9 at the close, in favor of Phoenix. In two previous games pulled off this year between the same clubs on the Greenwood ball park, Greenwood won both of them.

Considerable interest is being taken this year in base ball in the Boundary in some of the towns, and efforts have been made to organize a Boundary league, with clubs in Grand Forks, Greenwood, Phoenix, Midway and Republic. On Victoria Day a base ball tournament is to be held at the time of the celebration at Midway, and another is being arranged for the Dominion Day celebration to be held in Phoenix.

Eastern Excursion Rates via Gt. Northern.

To St. Paul, Minneapolis, Duluth, Superior, Sioux City, Council Bluffs, Omaha, St. Joseph, Kansas City, Houston, Mineola, Tex., Fort William, Chicago and St. Louis at rates of one first-class fare, plus $10; returning via California, $37.15 higher. Dates of sale: June 4, 6, 7, 23 and 25, July 2, 3, August 7, 8 and 9, September 8 and 10. Going transit limit 10 days from date of sale; final return limit 90 days or not later than October 31.
