AND BOUNDARY MINING JOURNAL.

TENTH YEAR. PHOENIX, BRITISH COLUMBIA, SATURDAY, MAY 29, 1909 No. 27

COPPER MINING ON MORESBY ISLAND

A. Ikeda, Manager of Properties, in Phoenix

A. Ikeda, manager of the firm of Awaya, Ikeda & Co., operating the Ikeda mine on Moresby Island of the Queen Charlotte group, was in town for a few days this week. Mr. Ikeda is a mining engineer, and was here for the purpose of inspecting the methods in vogue in the Boundary's big producers, which will assist him in carrying out development work on his coast properties, which have practically just commenced to produce. He was shown through the Granby and was quite enthusiastic as he watched a train of a dozen or more cars being filled with ore from the chutes, and rushed by the electric motor down one of the 400-level avenues and dump automatically into the Victoria shaft pocket, only a few minutes elapsing in the moving of 1000 tons of ore. On Wednesday he visited the British Columbia Copper smelter and Mother Lode mine.

Up to date some 9000 tons of ore have been shipped from the Ikeda mine, but the greater part of this was from ore extracted in the ordinary course of development. Recently a large body of ore of shipping grade was encountered at about 800 feet in from the portal of the lowest tunnel, and it is expected regular shipments of 1000 tons per month from now on will be easily maintained. April shipments totalled 884 dry tons, averaging 7 per cent copper and about $3.50 per ton in gold and silver.

Last year the Ikeda shipped considerable handsorted ore, the average values based on eleven cargoes running 12 per cent copper, $5 in gold and sixty ounces in silver per ton.

The property is being opened by means of a series of four tunels, the workings so far amounting to about 1200 feet. A four-drill compressor was installed last year and ore bunkers built, and employment is given to 65 men at present.

Shipments are made to the Tyee Copper company's reduction works at Ladysmith, Vancouver Island, by boat, the transportation amounting to $1.50 per ton. At present the smelter treats about 400 tons of ore per day, having only one furnace, but arrangements are now being made to double the capacity of the smelter.

Born—In Phoenix, on Thursday, May 20th, to Mr. and Mrs. Robert Brown, a daughter.

Boundary Mining Notes

J. A. McAllister, general manager of the British Columbia Copper company, left for Vancouver on Wednesday.

The Golden Eagle on the North Fork has a large amount of ore ready for shipping. A force of 25 men are now employed.

A meeting of the Lucky Shot Development company will be held in the Pioneer office on Tuesday, June 1st, at 7.30 p.m.

Local mining men should note that all free miners' certificates expire on Monday next, May 31st, and must be renewed on or before that date.

R. P. Williams of Rossland, provincial manager for the Canadian Rand company, was in town on Wednesday and accompanied A. Ikeda through Boundary mining properties.

O. E. LeRoy, who this week completed detail work in connection with the survey of Phoenix camp, commenced last year, left on Wednesday for the Slocan district, where he will direct a survey this season. He was accompanied by C. W. Drysdale, a graduate of McGill college, who is assisting in the work.

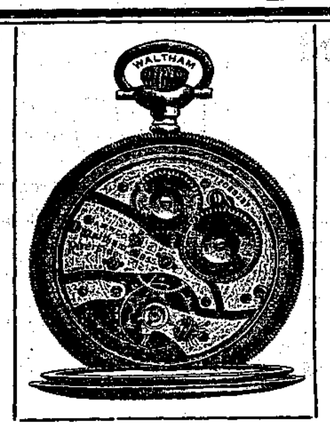
The Granby company is this week installing an 8 x 12-foot triple pump on the 400-foot level of the mine. It is a powerful pump, manufactured by the Gould company, of Seneca, N.Y., and will force water from the lower level of the mine to a tank some 500 feet up the Granby hill. The tank supplies water to the compressor and other workings on the property. At this season of the year water runs into the lower levels very freely.

A mine like the Granby property does more for the good of the community and classes than, we will say, some of the mines at Cobalt. Where the Granby has to employ extensive means and men and a big plant to take out and treat its million tons of ore and make a profit of $700,000, it is said 2,000 tons of Cobalt ore will yield the same profit, most of which the classes never get a glimpse of—except the capitalist class.—Canadian Mining Journal.

Notice to Water Tenants

The patrons of Phoenix Water Supply company are hereby notified that the minimum charge for street, lawn and garden sprinkling is $2 per month. J. L. Martin, secretary.

Watch Repairs



NOW is the time to get your Watch put in first-class shape. We carry a complete line of genuine material for all makes of Watches, made by the factory that made the Watch, and have a complete outfit of tools to execute all repairs. Charges reasonable; also, we have a complete stock of Watches always on hand—all grades and prices. . . . . .

HOLD-UP MEN GET LONG SENTENCES

Newman Brothers Go to Penitentiary for 20 Years

Twenty years in the penitentiary was the sentence given by Judge Morrison to the Bridesville bandits, Cleve and Bill Newman, at the Greenwood assize court on Wednesday afternoon. Ben Hart turned King's evidence and was allowed to go free.

On Dec. 19th last the post office store and the Great Northern agent at Bridesville were held up by three masked highwaymen. Only $73 was secured in the store and some $3 from the agent, although the latter had a roll of bills in a sleeve pocket. The agent and store clerk were made to walk at the point of guns some four miles from the village before knowing whether their lives were their own.

Suspicion led to the arrest of the Newman brothers and Ben Hart early in February at Bolster, Wash. Hart was brought to Greenwood and confessed the crime, implicating the Newmans, who were later extradited.

At the trial on Wednesday, Hart's evidence was corroborated in detail by a woman who resides near Bridesville, on the American side, and her daughter, who had made masks for the men on the evening of the holdup. The Great Northern agent and the store clerk gave convicting evidence as to the appearance of the men. The Newmans offered no defence, though they asked for leniency. Both the men have a bad previous record.

THE ASSIZE COURT

The assize court opened Tuesday morning, His Lordship, Mr. Justice Morrison, presiding. Following were the grand jurors: W. L. C. Gordon (foreman), J. N. Paton, J. T. Beatie, H. F. Stow, W. F. Proctor, J. R. Jackson, E. W. Bishop, H. C. Cummins, J. W. Main, J. R. Ferguson, Jos. Manley, W. J. Stewart and Wm. Dinsmore.

In Records vs. Fuller, for a declaration that the plaintiff is the owner of one-fortieth of the Bay Fractional mineral claim. For an order that the plaintiff deliver 1-40 part of the capital stock of the Bay Gold Mining Co., Ltd., and judgment for costs in this action. Judgment accordingly. J. P. McLeod for plaintiff.

The grand jury brought in true bills as follows:

Rex. vs. Ernest A. Shute, for assaulting a peace officer.

Rex. vs. David McBride.

Rex vs. Alex. McNeice, for carrying an offensive weapon.

Rex. vs. William and Cleve Newman, for robbery.

Among the list of civil cases was: A. D. McKenzie vs. Phoenix Steam Laundry—Salary as manager, $600.

Students for Entrance

The departmental examinations for public school pupils commence on Tuesday, June 1st. Nine students from Phoenix school will write on the Entrance examination in Greenwood: Anna M. Bell, Ada A. Pierce, Etta Murray, Hattie B. Graham, Gladys Pickard, Grace McKenzie, Elizabeth Nelson, Edward Murray, and William Johns.

C.P.R OFFICIALS INSPECT SURVEY

New Branch to Run Through Wellington Camp

Allan Purvis of Nelson, division superintendent of the C.P.R., arrived in the city Tuesday evening with his private car, and was accompanied by C. E. Cartwright, of Vancouver, divisional engineer; W. Pine of Nelson, master mechanic, Resident Engineer Moss, and Trainmaster Cameron.

They were in consultation here with H. B. Walkem, assistant divisional engineer, who has been directing the surveying for the new branch of the Canadian Pacific to run through Wellington camp, and the same evening went over the route of the proposed line, which will branch off from the main line just below Hartford Junction.

No information as to the result of their visit was given out, but it is understood the survey will be passed upon, and that the construction of the road will commence as soon as practicable.

Eholt News

D. McPherson, the popular local C.P.R. agent, who left some time ago for points east, has returned with his bride, having been married in Lethbridge, Alta. Mrs. McPherson was, until recently, C. P. R. commercial agent at Greenwood and won many warm friends by her obliging and untiring efforts to serve the public while in that capacity. Mr. and Mrs. McPherson have taken up residence here, and all wish them life-long happiness.

Miss McPherson, who for some weeks past, has been the guest of Mrs. D. Martin, Phoenix, returned home on Wednesday.

Allan Purvis, C.P.R. superintendent, and party spent Wednesday in the Boundary railway metropolis.

Chas. Kelman, who left two weeks ago to attend the trainmen's convention, is at present in Wheeling, W. V.

SALE POSTPONED

The sale of the Dominion Copper company's properties, which was to have taken place in Vancouver yesterday morning, has been postponed till Friday, June 4th.

STRIKE OF COAL MINERS UNSETTLED

Board of Conciliation Now Hearing Evidence

MacLeod, Alta., May 24.—The board of conciliation and arbitration which has been for three days endeavoring to reconcile the differences between the striking coal miners and operators in the southern districts, has succeeded in bringing about an agreement and peace and a speedy resumption of work is assured. The informal agreement was reached yesterday afternoon after a long discussion. The main features are that the miners yield on the open shop contention and the operators yielded to discrimination.

MacLeod, May 26—The conciliation board, appointed to investigate the matters in dispute between the western coal operators' association and their employees, got down to regular sessions today. On Saturday when the board adjourned until Wednesday morning it was thought that possibly an agreement might be reached which would allow the miners to resume work pending the final decision of the board, which decision was to be binding on each party. The board having recommended this proceeding, a committee was appointed from each side to endeavor to reach a satisfactory agreement.

Meantime action was taken by some of the local unions which indicated that they would not be bound by any decision reached by the board, consequently at a meeting of the board this morning both the miners and the operators reported that they were unable to arrive at any agreement, and it was decided to at once proceed with the taking of evidence along the lines of the application for the board and the reply thereto. The machinery of the board was at once put into operation and evidence along these lines taken today. It is within the province of the members constituting the conciliation board to decide whether the evidence shall be taken or not. In the case of the present sessions it was decided that only interested parties should be allowed to attend the meetings of the board, so consequently, any information which is available is of a very meagre character.

Phoenix Public School

During the month of May the attendance at the Phoenix public school has been considerably below the average. Whether this is due to the necessity of keeping children out of school or to the carelessness of parents or guardians on account of the near approaching summer holidays the teachers do not know, but they would strongly recommend that the children be kept in school during the whole of June. This is an important part of the school year, when the whole year's work is being reviewed, and if the attendance be low it is especially unfortunate not only for those who are absent but for the general standing of the whole school.

Carney Copper's Good Showing

A letter from Secretary Miller of the Carney Copper company, received by J. L. Martin Thursday evening, says: "We had the sample of ore brought in from the Carney assayed. It contained 6½ per cent. copper and some silver. They are going straight in towards the shaft and it appears to be getting better. Have not seen Mr. Cole since receiving your letter, but will have the samples taken and assays made as per your instructions and forward same to you as soon as possible."

New Methodist Minister for Phoenix

At the recent conference of the Methodist church in New Westminster, Rev. R. W. Hibbert, M.A., B.D., was appointed to the churches of Phoenix and Greenwood, succeeding Rev. Messrs. Strachan and Rutherford.

Rev. Mr. Hibbert is regarded as one of the foremost preachers in the British Columbia conference. Services will be held in Phoenix and Greenwood churches alternating morning and evening each Sunday.

Rev. Mr. Strachan Leaving

Rev. Geo. E. Strachan, who has been pastor of the Phoenix Methodist church during the past year, returns today from New Westminster, where he was attending the conference. Mr. Strachan is being transferred to a Graham Island town and will preach his farewell sermon in the Methodist church tomorrow evening. His many friends will much regret his departure.

BIG BOND TAKEN ON NICKEL PLATE

M. K. Rogers' Option is For Several Millions

The justly famous Nickel Plate mine at Hedley, B.C., has been bonded by the Daly estate to M. K. Rogers, who was instrumental in bringing the property as a prospect to the attention of the late Marcus Daly, for several million dollars, says the Spokane Orator. The identity of the parties to whom Mr. Rogers is now trying to sell the property is a secret, but their agents and experts are on the ground directing diamond drilling operations that will determine whether they take hold of it or not.

The Nickel Plate is one of the great gold mines of the Northwest. It is equipped with a 40-stamp mill which has been in continuous operation for the past 10 years, though until lately the mine was remote from transportation. The V. V. & E. railroad (part of the Hill system) is now in operation to Keremeos, B. C., a few miles from Hedley, and the connection through to Vancouver, which passes through Hedley, is now under construction. Some $2,000,000 were expended in acquiring, developing and equipping the mine, but this sum it has long since repaid to the present owners. It is a gold mine, pure and simple.

WILL LE ROI OPEN UP?

Rossland Awaits With Interest Probable Event—Centre Star and Josie Properties

There is still no definite sign of the Le Roi mine at Rossland opening up again, although rumor as persistent as unfounded has placed that event at various dates in the near future. Meanwhile the Centre Star and Josie are steadily shipping to the Trail smelter and the management of the latter mine is inviting tenders for the sinking of the shaft a depth of 300 feet.

There is plenty of activity on the South Belt, although nothing of an out of the way nature has occurred. The shipments for last week reached 3460 tons, of which amount the Centre Star was credited with 2670 tons and the Josie with 490. The year's total is 78,657 tons, to which the Centre Star has contributed 60,925 tons, the Josie 10,210, the Le Roi 7500, the I. X. L. 12 and the O.K. 10.

OLD TIMER EXPIRES SUDDENLY

Thomas Currie, a Pioneer of West Fork Dropped Dead on Saturday

Thomas Currie, one of the best known prospectors on the West Fork of the Kettle river, died suddenly near Beaverdell, on Saturday from heart failure. He was sitting talking to J. A. Trousant, apparently in his usual health, but fell over and expired immediately.

Deceased was a native of Boston, Mass., and was among the earliest settlers on the West Fork, where he became interested in numerous mining claims. He was 69 years of age. The interment took place at Greenwood on Monday, Rev. Father Bedard officiating.

ENLARGEMENT OF GRANBY FURNACES

Work on Half the Battery is Now Completed

The two recently enlarged furnaces at the Granby smelter were blown in late this week, and next week the work of enlarging two more of the furnaces will be under way. Four large and two small ones are now in operation. This will mean a gradual increase in Granby's ore tonnage and production until such time as all the furnaces are enlarged. This will increase its gross smelting capacity nearly 40%, from 3,200 to 4,500 tons of ore daily.

At present Granby is making at the rate of about 22,000,000 pounds of copper annually, at a cost of about nine cents per pound. It is probably earning at the rate of $6.50 per share on its stock. After its smelter enlargements are completed Granby will be able to produce over 33,000,000 pounds of copper annually.

Boundary Ore Shipments

The ore shipments from Boundary mines for the past week and year to date follows:

	Week	Year
Granby mines	18,377	387,951
Mother Lode	...	146,709
Snowshoe	2,260	65,360
Golden Eagle	..	270
Sally	...	77
Oro Denoro	....	1,503
Total	20,637	601,870
SMELTER TREATMENT		
Granby	18,751	371,056
B. C. Copper	....	135,549

J. P. Graves Out of Danger

J. P. Graves, managing director of the Granby Consolidated company, who has been ill at his home in Spokane with typhoid fever since May 1st, is considered practically out of danger by Dr. Olmsted, who has been treating him. His condition was at one time serious and his recovery uncertain.

Boundary Side Lights

Greenwood tennis club is spending $150 in improving their grounds.

The Royal bank has let a contract for a new building in Grand Forks.

Lind Creek ranchers are agitating for a wagon road to be constructed to the Phoenix-Greenwood road.

The Masonic order of Grand Forks is erecting a handsome and substantial temple in that city. It will be opened late in the fall.

W. D. Currie of Kamloops has been appointed by the provincial government as a lecturer on irrigation, and will visit Boundary points in the near future.

Maxwell Smith, Dominion fruit inspector, was in the Boundary this week. Mr. Smith predicts a great future for the irrigated lands west of Midway, where he considers the finest fruit in the province can be grown.

Christena lake promises to be more of a real summer resort this year than ever before. All who have visited it this season claim it is an ideal spot for rest and pleasure. A fine large hotel has been built, offering good accommodation.

HALF A MILLION

Gross Production of Trail Smelter for April Was $507,068

The production of metals at the Consolidated Mining and Smelting company's plant at Trail for April was $507,068. Following are the figures in detail: Tons of ore recived during month of April, 35,590; tons of ore smelted during April, 35,490; from which were produced 410 tons of copper matte, and 2,264 tons of lead bullion, containing: Gold, $214,835; silver, $101,891; copper, $44,232; lead, $146,110. Total gross production for April, $507,068.

During April the refinery produced: Tons of pig lead, 2012, valued at $115,927; ounces fine gold, 2663, valued at $54,959; ounces fine silver, 148,128, valued at $75,485. Total, $246,371.

For the year beginning June 30th, and up to April 30th, the metal production is valued at $4,088,940, of which the refinery has produced $2,096,461.

Spelter, $5 15 @ $5.20

VICTORIA DAY AT GRAND FORKS

Phoenix Represented in Several of the Events

The Victoria Day celebration in Grand Forks on Monday was the leading attraction in the Boundary for the holiday. About 200 tickets were sold to passengers from Phoenix, who returned by special train in the evening, and were unanimous with reports of an enjoyable day.

The leading events of the celebration were an auto race, baseball and football matches, in each of which Phoenix was represented.

The auto race created considerable excitement being close throughout. Dr. Dickson of Phoenix and George Chapple of Grand Forks entered with their 5 h.p. tri-car against E. Lane's 20 h.p. Buick car, and won by a narrow margin, the time for the mile on a heavy track being 2 minutes and 11 seconds.

In the baseball tournament Republic and Danville teams gave an excellent exhibition of the game, Danville winning with a score of 1-0. Catcher Leithfield, W. X. Perkins and McKay of the Phoenix ball team played for Danville, and had much to do in securing the victory, McKay having the credit of scoring the only run.

Grand Forks and Phoenix teams took part in a football match, but an incompetent referee managed to juggle the play so that what should have been a score of 2-1 in favor of Phoenix, become 2-1 in favor of the home team. The referee admitted not knowing the rules of the game, when the match was over, but he had already presented Grand Forks with the victory.

LADIES' WHITE WEAR

We have displayed in our window this week the finest collection of Ladies' Whitewear ever shown in Phoenix.

Our stock comprises the latest patterns and designs offered in the Eastern markets, and at prices which will suit all buyers.

Be sure and see our lines before purchasing. These prices will show you the extensive range we are carrying:

UNDERSKIRTS

In muslin and cambrics, nicely trimmed with lace and embroidery. Prices range from $1.00 to $5.50.

DRAWERS

In muslin and cambric, valenciennes lace and embroidery trimmings, from 60c to $3.50.

"VARSITY" COMBINATIONS

The very newest idea; a combination of Corset Cover, Skirt and Drawers. Prices run 3.25, 5.00 and 5.50.

NIGHT DRESSES

In all styles and materials, well made and trimmed in the best laces and embroideries. Prices 1.00 to 4.50.

CORSET COVERS

Muslin, Cambric and Nainsook Covers. Good values at 35c to 1.75.

We are making a special showing of Laces Embroideries, Muslin Aprons, Duck Top Skirts and Spot Muslins.

These goods are all new and shown now for the first time.

What is to be done with the tramp? Mr. Lewis, member of the House of Commons for West Huron, believes he can solve the problem. He proposes to set aside 10,000 acres of land in Ontario and the same area in Quebec where the tramps can be herded and put to work at farming, building roads, or preparing material for roads. The scheme is a sensible one and should work out to the advantage of the country. It has one excellent feature which does not obtain in ordinary prison labor—the work done would not be in competition with the work of the laboring men of the country. The country needs roads and it does not need tramps. There is a tremendous amount of energy stored up in the average tramp that should be utilized for some purpose more worthy than touring the country and becoming a menace to honest people. If the world owes every man a living it surely has a claim on him for some contribition to the world's labor.

With the construction of a new C.P.R. branch south through Wellington camp, a valuable mining district will be opened up, and many producers will be added to the Boundary list of ore shippers. There should be no delay by the C.P.R. in constructing the line: it will be but another avenue down which sheckels will flow into the coffers of the railway company.

All true sport-lovers will rejoice with New Westminster lacrosse team in the trouncing they gave the eastern Canada all-star professional lacrosse aggregation which was sent by Regina to lift the Minto cup. The Regina team was composed of picked men from big eastern teams, while the defenders of the cup were all New Westminster home-brews.

Guelph (Ont.) rate of taxation is 14½ mills this year. Its experience should prove an interesting object lesson to other cities. Guelph wisely took hold of the principle of public ownership early in its career, with the result that the earnings of its street railway, water and light departments make it possible to reduce the taxes to a very low rate.

The travelling public will hail the Railway Commission in its effort to keep passenger cars clean. It has issued an order requiring all companies to have at least one employee in each passenger coach to see that it is kept clean as well as properly ventilated.

It is reported Hon. Richard McBride is about to make a tour of the interior. The premier's trip will probably be for the purpose of feeling the pulse of the country, looking to the possibility of a general election this fall.

The Revelstoke Mail accuses the Kamloops board of trade of attempting to steal the Revelstoke C.P.R. shops. Revelstoke should secure a mounted body guard to keep watch.

B. C. MINING

Surveying for an additional thousand coke ovens for the Crow's Nest Pass Coal company has been completed at Fernie, and it is intended to start building them as soon as possible.

Thomas Kiddie, manager of the Le Roi smelter, at Northport, in a recent interview said: "There are large plans on hand at present in connection with the development of the Le Roi mine at Rossland. A. J. McMillan, the managing director and Consulting Engineer Carlyle are at present in London in consultation with the directors in connection with a scheme of general enlargement, which will be carried out in the near future. A complete system of development of the lower levels will, it is understood, be carried out. Pending the development work both the mine at Rossland and the smelter at Northport will remain closed down."

Further particulars have been given of the proposed plans for the recommencement of work on the Silver group at Marysville as submitted to the creditors by the reorganization committee of bondholders, composed of Moses Oppenheimer of Spokane, Edwin Parker and Reynolds, D. Brown of Philadelphia. A new company is to be formed with a capital of $400,000 common stock to be sold at 5 cents a share. Of the $400,000 bonds of the company $225,000 are held by the Federal Mining and Smelting company, a Guggenheim corporation, and the rest by George Turner and others of Spokane. The stock of the new company is to bear 7 per cent cumulative dividends, and there will be an issue of second preferred stock to an amount equal to all other claims against the Sullivan Mining company.

Electric Railway in Okanagan

Construction of a 100-mile electric railway tapping the principal fruit growing centres on both sides of Okanagan Lake is to be started shortly, says the Penticton Press. The enterprise, started by local capitalists, is said to have secured the financial support of the Earl of Aberdeen, viceroy of Ireland, who is the owner of the famous Coldstream ranch near Vernon. The new company was incorporated by special act at the last session of the provincial legislature.

Royal Advice on Advertising

His Royal Highness the Prince of Wales, while addressing the manufacturers of Great Britain, said recently:

"Experience has shown that even in the case of firms having an established reputation and world-wide connections attempts to discontinue advertising have usually followed by a diminution in the sales affected, and it is not unreasonable to assume that the neglect by Great Britain of the most important forms of national advertisement would be equally detrimental to her interests as a manufacturing country."

BOUNDARY & KOOTENAY 1909 ORE RECORD

Shipments and Smelter Receipts For Year to Date.

Ore shipments from the various mines of Boundary and Kootenay, and the receipts of ore at the smelters of Southeastern British Columbia for last week and for 1909 to date are as follows:

New Westminster Holds Minto Cup

The manner in which New Westminster lacrosse team disposed of the challenging Regina team leaves little doubt but that the cup now rests with a team which is qualified to defend it for a longer period than any previous holders of the cup.

In the second game of the series for the cup which took place at New Westminster on Monday the defenders ran up a score of 12-2 with utmost ease against the prairie team, making the combined score for the two games 18–6 in favor of Westminster.

Cremated a Hindoo

The weird Hindoo custom of cremation took place at Cranbrook a few days ago. Sheai Sangh, a laborer, died and his fellow countrymen secured the necessary permit from the government. The wooden box containing the corpse was covered with cords of dry wood and a match did the rest. After the cremation parts of the bones were collected and sent to the dead man's wife in India, where they will be thrown in the river Ganges.

Gold is Where You Find It

Prospectors and miners are all the time telling stories on the mining engineer, despite the proven value of that individual's services to the mining industry. Here is a late one in the form of a riddle:

What is the difference between a mining engineer and a successful prospector?

The engineer looks for ore where it ought to be; the prospector finds it where it is.

Buster's Philosophy.—LXXI.

Truth is honesty, and if everybody were honest see how many people would lose their jobs. Where would we get our politicians if every one were honest? Oh, yes, we wouldn't need politicians or judges, or lawyers, or police or jails or unions. Doctors are getting more honest every year and there's less drug and more truth administered. Oh, my, the world is getting better fast. The time will soon come when a poorly dressed man will be welcome in a rich man's pew—we hope. I hope too.

The crew making the final survey down the Okanagan river for the Wenatchee-Oroville branch of the Great Northern railway is making good progress.

Must Obey Instructions

Anyone who has had instructions from the firewardens will do well to have them executed within the time limit, as it may not be generally known that anyone refusing or neglecting to comply with same are liable on conviction to a penalty of not less than $50.

A MINISTER'S GRATITUDE

Zam-Buk Cured a Face Sore Which Defied all Other Remedies for Two Years

Rev. Charles E. Stafford, of Bridgeburg, Ont, says:—

"I had been much troubled for over two years with a sore on my left cheek. I tried all kinds of salves and lotions, but nothing I procured seemed to have the least bit of effect towards healing the sore. Hearing of Zam-Buk, I decided to give it a trial, and see if it would bring about a cure, as so many things had failed. I purchased a supply, and commenced with the treatment. After several applications, to my great joy, Zam-Buk has affected what for two years I tried in vain to bring about—a complete cure."

Case after case could be quoted in which, as in the above instance, Zam-Buk has worked cures when everything tried had failed. There is a reason for this. Zam-Zuk is the ideal remedy because of its unique ingredients for all skin injuries and diseases.

Away back in the days of the Roman gladiators, secret balms were used for the healing of cuts and injuries sustained in the arena and in battle. Then came a period during which external balms were neglected, followed by a period in which all the salves and embrocations had as their base animal fats and oils. Zam-Buk marks a new epoch. It is absolutely devoid of all animal fats, all mineral coloring matters, and is composed entirely of rich medicinal herbal extracts. Zam-Buk is a combination of Nature's rich healing herbal juices by the most modern scientific methods, and the result is a balm that cures when others fail.

Skin diseases, such as eczema, ringworm, salt rheum, and prairie itch, are speedily overcome by it. For piles it is fine!—easing the pain and inflammation, and hastening a cure. It also cures burns, scalds, cuts, ulcers, children's sores and eruptions, blood-poisoning, scratches, old wounds, varicose ulcers, &c. All druggists and stores sell at 50c. a box, or post-free for price from Zam-Buk Co. Toronto. Refuse harmful and cheap imitations, sometimes represented as "Just as good."

Daniel Dick, a Chilliwack Indian, who was charged with horse stealing, was given a speedy trial in the county court before Judge Howay, and was convicted and sentenced to serve a term of five years in the penitentiary.

Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued.
Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for wifehood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good."
It is non-secret, non-alcoholic and has a record of forty years of cures. ASK YOUR NEIGHBORS. They probably know of some of its many cures.
If you want a book that tells all about women's diseases, and how to cure them at home, send 31 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common-Sense Medical Adviser—revised, up-to date edition, in paper covers. In handsome cloth binding, 50 stamps. Address Dr. R. V. Pierce, Buffalo, N.Y.

NOTICE.

NOTICE IS HEREBY GIVEN that thirty days after date I intend to apply to the Superintendent of Provincial Police, Victoria, B.C., for a hotel licence for the Union hotel at Eholt, B.C.

JOHN A. McMASTER.

Eholt, May 1st, 1909.

NOTICE

Notice is hereby given that, thirty days after date, I, Joseph J. Bassett, of Hartford Junction, B.C., intend to apply to the Superintendent of provincial police, F S. Hussey, of Victoria, for the renewal of a retail liquor licence for the Hartford Hotel, at Hartford Junction, B.C.

Joseph J. Bassett.

Hartford Junction, B.C., May 15, 1909.

NOTICE

NOTICE IS HEREBY GIVEN that the Vancouver, Victoria and Eastern Railway and Navigation Company have deposited in the office of the Registrar of Titles for the District of Yale, at Kamloops, a plan, profile and book of reference showing the proposed location of a branch of the line of their railway to connect the main line with the International Boundary, near Myncaster, on Lot 490 and that it is the intention of the Vancouver, Victoria and Eastern Railway and Navigation Company to apply to the Board of Railway Commissioners for Canada, at Ottawa, under Section 222 of the Railway Act, four weeks after the first publication of this notice for the necessary authorization under the provisions of the Railway Act, for the construction of such branch line of railway in accordance with the plan, profile and book of reference so filed.

Dated this 11th day of May, 1909.

A. H. MACNEIL,
Solicitor for the Vancouver, Victoria and Eastern Railway and Navigation Company

This advertisement was first published in the Phoenix Pioneer on the 15th day of May, 1909.

PHOENIX CAMP

In the summary of geological surveys during 1908, just issued by the Department of Mines, appears the following report of O. E. LeRoy on his work in Phoenix camp last year:

The season of 1908, from May until the end of September, was occupied in making a detailed geological survey of Phoenix camp. The area examined was two square miles in extent and embraced the whole of the mineral zone on which the mines are situated. A special report and map will be issued as soon as possible.

The courtesy of the three operating companies permitted free access to all underground workings and allowed an examination to be made of the logs of all the diamond drill holes, the total length of which amounts to about seven miles. This data thus acquired and correlated with the surface geology give, within certain limits, very accurate information regarding the geological structure of the camp.

GEOLOGY

With reference to the general geology no additional information was derived regarding the age of the older rock formations, and they can only be referred to the Palaezoic, as outlined on the general map of the Boundary district. The granno diorite of Jurassic or Post-Jurassic age, is represented by a few poorly defined dykes cutting the Palaeozoic, while the Tertiary is made up of both sedimentary and igneous rocks.

The Palaeozoic admits of a threefold division. The lower consists principally of massive gray quartzites and bassic porphyrites, altered in places to quartz and horneblende schists respectively. The porphyrites are intrusive in the quartzites in the form of dykes and sills, and are not found cutting any of the younger rocks. Crushed argillites and altered limestone occur as small isolated masses with the schistose varieties of the above rocks.

The middle division is composed of quartz breccias and conglomerates derived from the lower series, siliceous, chloritic and feldspatic tuffs and crystaline limestones. In places the conglomerates show an assortment of material into finer and coarser beds of rounded pebbles. It is generally massive, however, and passes insensibly into the breccia with no hard and fast line separating them. The tuffs are both banded and massive, and stratigraphically cannot be separated from the breccia, with which they are always associated. The limestones occur in irregular and lenticular areas and are erosion remnants of a once extensive formation which suffered from folding along the breccias and tuffs.

These two divisions from a basin or trough, with the lower outcroppings at intervals along the border. The mineral zone occupies the upper part of the middle division.

The upper division is unconformable to the quartzite breccia, and consists of black carbonaceous argillites, which have but a limited exposure on the east border of the map sheet.

The sedimentary portion of the Tertiary consists of conglomerates, grits and tuffs of a prevailing white or light gray color when weathered. They are unconformable to the Palaeozoic, and form a long irregular band extending from the War Eagle to the Gilt Edge claim, crossing the east side of the town of Phoenix. The present attitude of the beds varies from almost horizontal in the south to steeply inclined and vertical in the north portion of the exposure. The character of the stratification shows that the deposition occurred in quiet waters, and the beds evidently represent a small portion of the floor of a Tertiary lake.

This period of sedimentation and erosion was followed by one of widespread volcanic activity, during which a great part of the Boundary district was covered by great lava flows, which filled up the valleys and covered some of the highest ridges.

Subsequent erosion, with the complete removal of large areas of lava shows that the topography prior to the eruption of this extrusive was very similar to that of the present.

One isolated remnant occurs in this area, and parallels the stratified rocks along their eastern border. The lava in general is andesitic in character, but more acid and basic varieties also occur with viscular and amygdaloidal types.

Later intrusions of basic alkali rocks and pulaskites, as dykes and stocks have cut all the older rocks; and with these, the period of igneous activity in this area closes. Both intrusives are genetically connected, and are probably closely related to the lava flow.

ECONOMIC GEOLOGY

As previously stated, the mineral zone belongs to the intermediate division of the Palaeozoic. The principal portion of this zone outcrops in the form of a large L, and extends from the Gilt Edge to the Montezuma claims, south to the Gray Eagle and War Eagle, then eastward through the Monarch and Rawhide and northwards through the Curlew and Gold Drop into the Snowshoe. A subordinate zone lies to the west on the Idaho and Brooklyn claims. It was originally connected to the main zone and its present isolation is due to subsequent erosion.

The exposed area is about 120 acres in extent, but the actual area is much greater as a considerabe portion is overlain by sedimentary and extrusive rocks of Tertiary age.

The field evidence goes to show that the mineral zone represents a metasomatic replacement of part of the limestones and tufts by epidote, garnet, chlorite, hornblende, calcite and quartz, together with chalcopyrite, hematite, pyrite and magne ite. Throughout this zone, the principal line of fracture, as shown in the underground workings of the several mines, have approximately a north and south trend. Between these the ground is intersected by a host of minor fractures. The former represent the trunk channels and the latter the distributaries; the whole forming a complete system of underground circulation for mineral solutions, by the action of which the country rocks have been replaced by the above gangues and ores. The concentration of the chalcopyrite along certain lines has formed ore bodies of enormous size, lying at various attitudes in the mineral zone and bounded by walls which in the main are commercial rather than structural.

In the commercial success of operation, the low grade character of the ore is offset by its fluxing qualities, by the size and favorable situation of the deposits, and by the many economies that can be practised in the handling of a large tonnage. The pillar and room method of mining and the nonnecessity for general timbering are the most important features in the general economy.

The values are fairly uniform throughout and approximate very closely averages. During the past year the Granby Consolidated were working continuously on both sides of the mineral zone. The premier mine of the district is situated on the west side, with workings extending through the Knob Hill and the Ironsides claims, into the Aetna and Victoria. There are three outlets for the ore—No. 2 tunnel, No. 3 tunnel, and the Victoria shaft. On the east side the workings are on the Gold Drop claim and the Curlew fraction, which lies between the Snowshoe and Rawhide claims. All the ore passes through the Curlew tunnel to the loading bins.

There's two things to consider in printing—material and workmanship—get both and you get satisfactionat the Pioneer.

Ven. Archdeacon Small of Lytton is dead.

The Royal bank will open a branch in Cranbrook.

Many settlers are arriving from the east and locating around Arrow lakes.

J. Montgomery, a pioneer of Revelstoke, was sandbagged in Spokane recently.

The Ludgate Syndicate will spend $200,000 on Deadman's island improvements.

Kida, an Austrian, broke jail at Revelstoke and after nine days' freedom was retaken at Sumas.

Albert Sullivan, recently principal of Nelson public schools, has been appointed inspector of schools.

A fine of $5 was imposed on A. J. Picton-Warlaw, of North Vancouver, for allowing his grounds to be used for Sunday professional baseball. The action was for infraction of the Lord's Day Act. The ratepayers of the city refused to take a plebiscite vote as to whether Sunday baseball should be continued or not.

At a Marathon race in Vancouver on Monday for the full distance of 26 miles, 385 yards, Will Chandler of the Vancouver athletic club, won in 3 hours, 22 minutes and 11 seconds. The second man was Rowan of Nanaimo, who came in a mile behind the winner. Art Burn of Calgary who ran under the colors of the Spokane club, dropped out utterly played out at the end of the 19th mile.

Prince Rupert Lots

The first day's auction of Prince Rupert townsite lots was a great success, the total value being nearly half a million dollars. Two thousand people attended the sale, and bidding was keen from the start. In no case was property withdrawn because of failure to reach the reserve price, and in many cases the prices went far above what was anticipated. This was especially the case in the business property when the choicest corner in that locality brought $16,500. Buyers from Austria, Alaska, United States and Winnipeg secured property, though the bulk of the buyers were from Vancouver

Revelstoke Wants Government Smelter

It is expected that a delegation from Revelstoke will shortly arrive in the city to urge upon the provincial government the erection of a government smelter says the Victoria colonist. An agitation is at present on foot in that district looking to the erection of such an institution. The question has not as yet been considered by the government, it is understood, but there is a strong sentiment in the interior for the erection of such an esttablishment.

Nickel Plate a Money Maker

As a mining investment of which British Columbia may well be proud, the Nickel Plate has paid in dividends nearly 200 per cent. on its capitaliation of $500,000, or out of a gross production of $2,000,000, in gold bullion the property has paid $1,000,000 in profits. During the year 1908 the net profits were over $300,000.

"HEADACHE, WEAKNESS, HEART TROUBLE"

"I Suffered With for Years--Pe-ru-na Cured Me Entirely."

Miss Albina Chauvin, No. 50 Rue Agnes, St. Henri, Montreal, Can., writes:

"I consider Peruna better than any other remedy, as it cured me when nothing else could. I suffered for years and years with heart trouble, headache and weakness. I never expected to find anything to cure me. I saw one day, in "La Presse," that Peruna was excellent and I tried it. One bottle produced a change in me and if the price had been $100 a bottle I would have paid it gladly. I have taken six bottles and am entirely cured. Please accept my thanks and best wishes for your Peruna."

Many cases of heart trouble are caused by reflex disturbances.

Derangements of the stomach and liver produce symptoms of heart trouble.

Catarrh of the stomach is a very frequent cause of sympathetic heart disease.

Palpitation, shortness of breath and bloating after meals are the most prominent symptoms.

Such a condition of the stomach is also liable to produce headaches of the worst sort.

Medicines that palliate the symptoms will never lead to a cure.

It is the effect which Peruna has upon the stomach, healing the mucous membranes and restoring the natural function of the stomach, that causes Peruna to bring such prompt relief.

There are many yards in town which should be cleaned up for sanitary improvement. The use of our editorial rake will be given any person requiring it. Give the health department a fair chance.

Tea acquires a flavor under the peculiar climate of Ceylon that cannot be acquired anywhere else on earth. The delicate fragrance and delightful aroma of "Salada" Tea will please you. Buy a package today from your grocer.

Master Eddie Swanson, son of John A. Swanson, was taken to the hospital Saturday and underwent an operation for appendicitis. Although he was very low at one time Eddie's friends will be glad to know that he is now progressing as well as can be expected.

V. Kistler, the newly appointed Great Northern freight and passenger agent for this division, was in Phoenix on Thursday and gave the Pioneer a call. It was his first visit to the Boundary's premier copper camp, and he was making the acquaintance of local men.

Miss M. Rundberg, who was on a months' visit to her parents, Mr. and Mrs. C. Rundberg, left Wednesday morning for Spokane.

Miss Kildow, a graduate nurse of the Maryland general hospital, has been appointed dietetian of Phoenix general hospital. Miss Kildow arrived from Seattle on Tuesday and has already taken up her duties.

The attendance at the orchestral dances in Miners' Union hall have been such as to encourage the orchestra to continue the dances fortnightly. Good music is being furnished and the dances are enjoyed by all who attend.

The Chicago Ladies Baseball club have been communicating with the local team and are anxious to come to Phoenix. Arrangements have been made to have them here about June 22nd.

A large consignment of Bourbon whiskies just received at the Brooklyn—"Jessie Moore," "Old Kentucky" and "Private Stock," all famed American whiskies.

A by-law for raising money for the purchase of a park failed to carry in Kamloops last week by a margin of six votes. At the same time a $5,000 by-law for sewerage purposes was passed by a good majority.

NOTICE

All accounts owing the Wm. Hunter Co., Ltd., must be settled on or before June 16th, 1909. After said date all unpaid bills will be entered in court for collection.

THE WM. HUNTER CO., LTD.
