Boundary Mines Sent Out 390,000 Tons of Ore in 1901.

The Phoenix Pioneer.

Devoted to the Interests of the Boundary Mining District.

Phoenix is the Centre and Leading Mining Camp of Boundary.

VOL. III. PHOENIX, BRITISH COLUMBIA, SATURDAY, OCTOBER 11, 1902. No 48.

The Big Store

There's no doubt that Fall is here, and we are showing the nicest line of FALL GOODS that was ever brought to Phoenix. Its only a pleasure to show you through the various departments.

This year we have a fine line of FURS, which are being hunted down just as if they were alive. Come early and get the choice.

This year we are handling Watson's Unshrinkable Underwear for Ladies and Children

Ladies' and Children's Heavy Hosiery.

Ladies' Winter Wrappers, Fall Waists, Eiderdowns, Wrapperettes, Gray Flannels and Flannelettes at 10 cts. per yard up,

Flannelette Underwear, Ladies' Black Underskirts—the popular underskirts, which are going fast.

We have line of Heavy Dress Goods, suitable for Children's School Dresses, at 25 cents per yard.

GROCERIES DRY GOODS
GENT'S FURNISHINGS
GLASSWARE CROCKERY
HARDWARE BOOTS, SHOES
HAY AND GRAIN

PHOENIX GREENWOOD GRAND FORKS SANDON

MACHINERY ARRIVING

Granby Co.'s Large Orders Coming to Hand.

PARTS OF NEW COMPRESSOR ARE HERE

Two Car Loads Have Reached Phoenix—Gigantic Ore Crusher Shipped from Sherbrooke September 27th.

At last some of the new machinery being installed by the Granby Co. for the improved equipment at the Phoenix mines, which will cost over $100,000 when installed and in running order, has begun to arrive here. During the week two carloads of the first half of the electric driven compressor reached Phoenix, and more is expected daily. The cars already here contained the immense fly wheel, a receiver and some fittings.

At first one of the 30 drill compressors only will be put in commission which will then give the company more power than at present available. The second half, however, is being made as fast as possible, and will be shipped at an early date.

After many delays the machinery for the big ore crusher was shipped from the makers at Sherbrooke, Que., on the 27th of September, and is now about due in Phoenix. It consists of two carloads, weighing 126,000 pounds. The crusher is of the Farrel-Blake type, having jaws with an opening 42x36 inches, which means that pieces of ore a cubic yard in size can be crushed. It is the largest piece of machinery of its kind yet made or operated in Canada, and will be driven by a dynamo of 100 horse power, which is being furnished by the Canadian General Electric Co., of Peterborough, Ont.

The buildings for both the compressor and the ore crusher are now completed as far as can be done until the machinery is erected, which will not be a lengthy process after its arrival.

Saw Mr. Waterlow Off.

Anthony J. McMillan, managing director of the Snowshoe Gold and Copper Mines Ltd., has been spending the week at the property, leaving yesterday for the coast. He saw Mr. Waterlow, who was recently in camp, as far as Glacier on the main line.

Mr. McMillan will make another visit to Phoenix before leaving for England for the winter, which event will occur about November 1st. After his arrival there the annual meeting of the company will be held, and the question of erecting their own reduction works will come up for discussion and probably for settlement.

Pay Day at the Mines.

Yesterday was pay day at the Granby mines, when something over 200 men received their monthly checks. The amount distributed this month, while somewhat more than for the previous month, is less than half what it should be, and what it will be when the smelter is able to operate all four of its furnaces. For the month of September the amount is about $20,000 for men at the mines, while the smelter payroll is about one-third of this amount.

Pay day at the Snowshoe is next Wednesday, the 15th inst., when several thousand dollars more will be distributed.

Mr. Hill Will Build.

A dispatch from Victoria states that Hon. A. G. Blair, minister of railways, who was waited upon by the Victoria board of trade, said in response to an address, that he had had a conversation with J. J. Hill in which the Great Northern magnate led him to believe that he not only had an interest in the V., V. & E., but was ready to carry it forward energetically when the present depression had passed, which Hill regarded as only temporary. He was led to believe also that Hill would build without asking any aid from the government.

The all-British cable has reached Fanning Island from British Columbia. D. H. Duncanson, formerly of Phoenix, is in charge of the cable station building at Fanning. He expects to return to San Francisco about the first of January.

MORRIN, THOMPSON & CO.

COAL.

The Railway Company has advised the Coal Company that they may not be able to let them have any cars during October and November.

In face of this fact, we will have to get most of our coal supply this month,

COAL.

We will have our first car next week and we would like to book all orders early, so that nobody may be disappointed in getting their supply.

COAL.

MORRIN, THOMPSON & CO.
POST OFFICE STORE

DEATH OF MRS. JAMES PUNCH.

Passed Away Last Tuesday Evening, Aged 53 Years.

Last Tuesday evening about half past six the grim reaper claimed another victim in the person of Mrs. Punch, wife of Ex-Alderman James Punch, of this city, the death occurring at the family residence on Second street. Mrs. Punch had been in poor health for over a year, but was not seriously ill till about ten days before her death, the immediate cause of which was cancer of the stomach.

The funeral took place Thursday morning, the remains being interred at the Greenwood cemetery, Father J. A. Bedard conducting the ceremony. The Granby mines were closed for the day, out of respect to the deceased, and a large number attended the funeral, the pall bearers being J. F. Hemsway, James Marshall, T. Roderick, F. Finnigan, John Pierce and George Cornach.

Mrs. Punch, whose maiden name was C. Jane McKay, was born in Cape Breton county, Nova Scotia, in 1849, and was therefore 53 years of age at the time of her death. She was the first woman to die in Phoenix. She left three grown children, one of them is the wife of P. J. Dermody, fireman at the Granby mines, the other two being a daughter, May, and a son, John. Mr. Punch has been a resident of the camp for nearly five years, the family living here four years. Mr. Punch has been foreman boss at the Knob Hill glory hole work since that work was started, and was one of the first aldermen elected to the council when the city was first incorporated. He formerly lived in New Westminster, where he is well known, having been a member of the legislative assembly in the early days of the province.

The family desires to extend thanks through the columns of the Pioneer to the many friends who sent flowers and courtesies at the time of the funeral.

ARE SHORT OF POWER

Granby Smelter Running One Furnace.

BUT BLOW IN ANOTHER TODAY

Low Water in the North Fork Makes the Trouble—Will Soon Have Power from Cascade, When Four Furnaces Will be Operated.

For the last week the Granby smelter has had but one furnace in operation, due to the low water in the North Fork of Kettle river—the lowest for several years. As heretofore this smelter has relied entirely on the North Fork for power, the dry season has resulted in temporarily curtailing to some extent the normal output of the reduction works. In turn this has caused a curtailment of ore shipments from the company's Phoenix mines, so that for some days past 25 car ore trains have been sent out every other day.

This state of affairs is now changing, however, it is pleasant to notice, as a second furnace is to be blown in again today. The coke supply also has not been all that was desired of late, but this is expected be adjusted by the time the four furnaces are in operation.

As soon as the power from Cascade can be had, there will be no trouble on this score at the Granby smelter. When this will be, no one can state definitely, not even the manager of the power company himself. Several dates have been set for starting, but each time it had to be postponed. However the work of installation is in such an advanced state that the date of beginning cannot be far off.

McKenzie-Clark Wedding.

Last Saturday A. D. McKenzei, of the Reco laundry, and Miss Mary A. Clark, both residents of Phoenix for several years, were quietly united in marriage at Greenwood. The ceremony was performed at St. Jude's Hall, Rev. E. P. Flewelling, of Phoenix, officiating. On the return of the bridal couple to Phoenix they were effusively greeted by many of their well wishers.

PASSING OF "HOT AIR"

T. W. Holland Has Resigned as the Manager.

LITTLE BUSINESS FOR THE RAILWAY

Over a Million Dollars Spent in Construction by the Kettle Valley Lines—Paralleled by the Great Northern.

It was given out in Grand Forks a few days ago that Tracy W. Holland, manager of the Kettle Valley lines, or the "Hot Air" road, as it has been termed, has resigned, being the result of his trip to Toronto, whence the cash came with which to build the road.

The history of the Hot Air line has few parallels in railway building. Numbers of surveys had been made between Grand Forks and Republic, a distance of some 43 miles, and it was rumored that the Great Northern would build a line. Mr. Holland was manager of the Grand Forks Townsite Co. then, and with John A Manly other surveys were made, and finally, with the financial assistance of friends in the loan and trust business in Toronto, the contract was let for an independent line. In the course of eight or ten months the line was completed after a fashion, and the much heralded opening was held, and the so-called "last spike" was driven on the 12th of last April, five miles beyond the rail-head.

Just about this time the troubles of the road began in earnest. The Great Northern had been prosecuting active construction to Republic, and was pushing it as fast as possible. As manager of the Kettle Valley lines Mr. Holland put all the difficulties he could in the way of the Jim Hill line, and it must be confessed that he exercised considerable ingenuity in doing this. The Kettle Valley lines connected with the C. P. R. at Grand Forks, and so secured entrance to the Granby smelter, where quite a little ore has been shipped from Republic mines.

But when the Great Northern line was finally completed, the passenger and freight traffic on the Hot Air line fell off to almost nothing, and no passenger trains have been run for some time, and mighty few freight trains.

Then the eastern financiers began investigating matters, and it is said they turned up some interesting details of the way things were conducted. W. C. Morris, attorney and assistant manager, was discharged, but to settle with him and keep things quiet, he was paid a pretty sum—several thousands of dollars. Then Mr. Holland went east, and his resignation was reported a few days ago.

What will be done with the line has not been announced, but it has been built and equipped, and with the right management it may be made to show a balance on the right side of the ledger.

Harry Lindley Back Again.

The Harry Lindley Co. were so well received last week, that after playing several nights in Greenwood, they returned this week to Phoenix. Thursday evening they gave "Dad's Girl," and last night "Are You a Mason?" was presented. Tonight "A Pretty Sinner" will be given. Their previous engagement was a success, Mr. Lindley having many friends of long standing in the camp, who heard and saw him years ago in the east, he being today one of the oldest men in the profession.

Is A Blessing.

Life Insurance is a blessing to those left behind, when a man climbs death's shaft. Every married man should have his life insured, so that his family would be secured from the chilling blasts of poverty, when the grave makes of him a silent non-producer. William J. Twiss, General Agent, Kaslo, for the Mutual Life of Canada, will be pleased to send you full particulars as to plans, rates, etc. It will be to your advantage before placing your life insurance elsewhere.

It is rumored that the authorities are on the trail of some smugglers, who have been operating here lately.

O. N. Galer, of the Granby staff, who has been taking his vacation in Colorado, and W. X. McDonald, who has been visiting his old home at Granby, Quebec, returned to camp yesterday.

Boundary Mining Notes.

The B. C. mine is shipping some of its surface ore.

Debts of the Waterloo, Camp McKinney, have been paid, and the property is again to be actively worked.

This week the Mother Lode made shipments of over 4,500 tons, the largest in any one week since the mine began shipments.

The Snowshoe will use the power from Cascade as soon as it can be delivered here, an arrangement having been made to that effect.

Shipments from the Snowshoe will average about 150 tons per day, and when the new spur is completed, this quota can be readily increased.

Thus far the Granby mines in this camp have shipped a grand total of 532,000 tons of ore, the first shipments having been made in July, 1900.

Orders have been placed for the second furnace for the Sunset smelter at Boundary Falls, which should be in operation some time in January.

A force of 117 men is now employed at the Mother Lode mine. The Sunset needs only 14 men to get out the requisite amount of ore, so easily is it broken down.

Several offers have been made for the Ruby, located near the Sunset smelter, which shipped 85 tons of excellent ore last year, but whose owners got into financial difficulties.

The C. P. R. is putting in a new spur for the Emma mine, in Summit camp, and ore bunkers will be built. Four cars of ore are being shipped every day to the Nelson smelter.

Returns from the last shipment of 15½ tons from the Providence mine to the Trail smelter gave $1,796.38, or about $130 per ton. The next shipment is expected to give $150 or better per ton.

The Cariboo, in Camp McKinney, is to declare a dividend next month of two and a half per cent, the first in a year from this old dividend payer. It is said that the company has $125,000 in the treasury.

This week the average number of men employed at the Granby mines has been 240. Porter Bros., who have the stripping contract from the Granby Co., have about 35 men at work, which force will likely be increased when they begin to take out ore for the new crusher. The regular force will be doubled also when the smelter can take the ore.

CITY CLERK MATHESON MARRIED.

Wedded Miss Sarah Noble Last Tuesday Morning.

At seven o'clock last Tuesday morning Donald John Matheson and Miss Sarah Noble were quietly united in the holy bonds of matrimony at the residence of the bride's sister, Mrs. Joshua E. Mills, on Brooklyn avenue. The bride was dressed in a brown travelling costume, and was attended by her younger sister, Miss Kate Noble, while J. E. W. Thompson supported the groom. Rev. Dr. McRae, of Greenwood, performed the ceremony, according to the rites of the Presbyterian church. The house was specially decorated for the occasion, and after the ceremony a wedding breakfast was served. The bridal couple were driven to Grand Forks, where they took the Great Northern train, to visit Spokane.

Mr. Matheson has been a resident of Phoenix for three years, and is esteemed by the business community, being at present postmaster, justice of the peace, city clerk, city assessor and city collector, while the bride has been living in Phoenix over two years. On their return they will start housekeeping in the neat cottage already prepared for the purpose in the New York townsite, adjoining the city.

WILL PUT IN 40 STAMPS

Nickel Plate Mine Owners Have Placed Order.

BE INSTALLED SOME TIME THIS FALL

Will Have Daily Capacity of About 200 Tons—Now being Manufactured by the Jenckes Machine Co., of Sherbrooke, Que.

Manager Rogers, of the Nickel Plate mine, up Twenty Mile creek in the lower Similkameen district, has placed an order with the Jenckes Machine Co., of Sherbrooke, Quebec, for the building of a 40 stamp mill, to treat the free milling gold ore of the mine. The machinery is now in process of manufacture, and is expected to be put up and operated late this fall or early in the winter. The capacity of the mill will be about 200 tons of ore daily, which can be readily increased by the addition of more stamps to the battery already ordered. The order for this machinery was secured by the Boundary agent of the makers, R. P. Williams.

This is the first stamp mill to be erected in the Similkameen, but it is believed that others will follow in the not distant future, or as soon as transportation is provided.

Negotiations by the Nickel Plate owners, the Marcus Daly estate, of Butte, have been nearly or quite completed for the acquisition of a piece of land at the mouth of Twenty Mile creek, owned by Indians, about five miles from Camp Hedley proper, where the mines of the syndicate are located, and on which the reduction plant will be erected. It is said that there are many thousands of tons of ore on the dumps of the Nickel Plate already, awaiting treatment, although the management gives out nothing in regard to the property, probably today the most important mine in the Similkameen.

Smelters Making Money.

From all accounts, the Boundary creek smelters are making money. The Greenwood Times is of this opinion, and states that the Mother Lode smelter is shipping one car load of matte daily to the Granby converter, each car being valued at $4,000 approximately. It is also said that the Mother Lode people are clearing about $1.50 per ton on the ore now being mined from the glory holes, which is of a higher grade than that formerly taken from the shaft workings. The Mother Lode is being entirely worked on the glory hole system now. The Sunset smelter is also said to be doing the best of work, and to be returning good profits.

Sentenced to be Hanged Nov. 21.

On the 4th of June, John Cole, who spent the previous winter in Phoenix, was found murdered near Nakusp. A companion, Henry Rose, was suspected guilty of the crime, and was arrested on the charge. His trial took place this week at Nelson, and was a most sensational affair. The case for the crown was conducted by W. A. McDonald, K. C., and that of Rose by J. A. McDonald, of Rossland. The jury rendered a verdict of guilty, and the chief justice passed sentence that he was to be hanged November 21st.

After a season of fine weather, rain fell Wednesday night.

BOUNDARY ORE SHIPMENTS.

The following table gives the ore shipments of Boundary mines for 1900, for 1901 and for 1902, as reported to the Phoenix Pioneer—

	1900	1901	Past Week	1902
Granby Mines, Phoenix	64,533	231,762	4,542	238,728
Snowshoe, "	297	1,731	780	7,858

COPPER SURE TO RISE.

Some persons, perhaps not conversant with the real situation in regard to the price of copper, seem to think that the brown metal, in sympathy with silver and lead, will remain at the present low figure for some time to come. But those best informed in regard to the prices of metals, and who have made the subject a business study for years, do not agree with this hastily formed conclusion. Nor can it be said that the wish is father of the thought.

Within the year the price of copper has tumbled from 16 or 17 cents per pound to about 11½ cents—a straight reduction of 25 per cent. Nearly all authorities now agree that the first named price was abnormal, being maintained by large producers who had certain ends in view. It is also a curious fact the same authorities also agree that the present quotations are abnormally low, more so than the production and consumption warrants. The pendulum has swung to the other extreme, and is about to adjust itself at the happy medium.

It is significant that, notwithstanding the drop in copper, the leading producers have continued working uninterruptedly. This is as true of the Boundary copper mines as it is of those elsewhere. Had not the drop occurred, knocking 25 per cent off the price realized, undoubtedly there would be several dividend paying mines in the Boundary today. Nevertheless, the managers of our great mines are continuing operations steadily, confident that while profits are small now, a little later they will be larger. Their time of realization is coming, even if it was temporarily postponed, and 13 or 14 cent copper will be realized.

Corroboration of this opinion comes from a source that carries weight. Last week W. A. Nichols, of New York, visited the Phoenix mines and the Granby smelter for the first time. His company was the pioneer in the field of using electricity for refining copper, and they handle the entire output of the copper smelters of the province. The Nichols Chemical Co., in fact, turns out 200,000,000 pounds of refined copper annually, to say nothing of by-products in gold and silver worth $15,000,000. Mr. Nichols' opinion, therefore, on the price of copper is worth something. Here is the way he put it to the Grand Forks News-Gazette man:

"Copper consumption is bound to increase, and I look to see it go to 12 or 13 cents, and possibly to 14 cents per pound. Influences at work not althgether connected with stockjobbing are keeping it down. If the natural law of supply and demand were not interfered with, the price would soon advance."

Last week the coal kings virtually told President Roosevelt to mind his own business. It's now up to Teddy to do something and do it quickly.

"An intimate friend," says that Premier Dunsmuir will resign within a month. Another makes a contrary assertion. You can take your choice.

R. L. Borden, the conservative leader, brought great big chunks of harmony with him to British Columbia. But the moment Mr. Borden started east it vanished. Evidently there are too many here itching to be leader.

Latest government estimates put the Manitoba wheat crop at 68,000,000 bushels—a large increase over that of last year. This will put the C. P. R. shares up another notch, and the ore tonnage of this pacific province will also help.

An exchange says that there was a fishermen's trust in the seventeenth century, and doubtless its claims that it was organized to lower prices are what originally gave the fishermen the reputation for telling big stories that they have never been able to live down.

It is about time that British Columbia was relieved from the domination of the Victoria politicians. On one pretext or another those gentlemen have always been uppermost, and considered their own wants as paramount. There are some other "pebbles" on the beach, and they are of as much, or more, importance as Victoria.

Twenty or thirty dollar coal stares the people of the east in the face, which for the multitude means no coal at all and all the misery that entails on thousands. It is a great pity the recent conference of operators and miners could not have been the means of ending this fearful strike. As it is, the struggle is still on, and the end cannot be surmised with any accuracy.

WHAT EDITORS SAY

BRIGHT FOR JOE—The policical sky of the Hon. Joe Martin seems to be clearing in a most remarkable manner. —Kootenaian.

TRUE GRIT—Miss Maude True, a Toronto girl visiting friends in New York, has distinguished herself by capturing a burglar. The temptation is very strong to comment that she showed True grit.—Vancouver World.

MAKING PROGRESS—The development of the province's chief industry, mining, is proceeding apace and progress is being make in every section. In no one particular is it to be noticed more than in smelting.—Slocan Drill.

PROVINCIAL NOTES

New Denver now has a full fledged board of trade.

New Westminster fair this year is a great success.

Ferguson is to have an electric light system by December 1st.

The quantity of fruit exported from British Columbia this year will be far ahead of other years.

Andrew Carnegie is donating a public library to the city of Victoria. The contract for a fine stone building has been let for same.

The attorney general will issue a warrant to hold an election for two aldermen in Sandon, so providing a quorum and enabling that city to do business.

Something Wrong Here.

The Associated Press sends out a story of a Canadian newspaperman named John Jones, being held up by a Buffalo footpad and relieved of $80. Something wrong here. What would a newspaperman be doing with $80, and where could he have got it? And if he had got it honestly, how is it that he would not have died of heart disease without waiting for the highwayman?—Vancouver World.

The Yale-Columbia Lumber Co. will put in a new sawmill at West Robson, at the site of the old one destroyed by fire a couple of years ago. The company have a large amount of sawlogs at that point, being advantageous for shipping purposes.

B. C. MINING NOTES

Sandon's shipments last week were 263 tons.

Whitewater camp shipped 240 tons in September.

Rossland's ore shipments last week were 7,680 tons.

Oil lands in East Kootenay are to be tested at an ealy date.

The Le Roi is shipping some ore that runs $50 to the ton.

There is considerable talk of a smelter at Elko, in East Kootenay.

Kaslo's smelter scheme is in a more moribund condition than ever.

Last week's shipments of Slocan ore through Kaslo were 183 tons.

The Homestake mine in the south belt, Rossland, is likely to resume.

The Whitewater mine makes a net profit of $1.00 a ton out of its ore.

The Centre Star and War Eagle a Rossland are to increase ore shipments at once.

Once again the Silver King tramway is running, carrying ore to the Nelson smelter.

Twenty men are employed at the Highland mine, near Ainsworth, on Lake Kootenay.

The Bosun, near New Denver, will be an important shipper of zinc ore to Kansas in the near future.

The entire Slocan has shipped upwards of 22,000 tons of ore for the year valued at about $1,760,000.

The California mine at Republic, Washington, is shipping steadily to the Hall Mines smelter at Nelson.

During the month of September, 601 tons of lead bullion were shipped from the Hall Mines smelter, Nelson.

The Lardeau papers are ominously silent about the Vulcan furnace, built in Ferguson by the McCorssan company.

Ymir will probably be a lively camp this winter, owing to recent strikes of ore. Half a dozen mills will be operated steadily.

The machinery for the 50-ton concentrator at the Blue Bird mine, Deer Park, Arrow Lake, has been shipped from Spokane.

A. A. Abbott, a New York capitalist has secured an option for $100,000 on the well known Bend'or mines, in the Bridge river district.

Several idle properties at Ainsworth are expected to commence work shortly and will probably keep forces going through the winter.

STRICTLY BUSINESS

Do advertising or it will do you.

Advertising is the lubricant of the wheel of prosperity.

Never use small advertisements when you can afford to use reasonably large ones.

There is no dealer but that has something in stock wh.ch he can make prominent in an advertisement. If it be not novel, it may be made attractive by its reasonable price.

There is not any season when it is not profitable to keep the name of a concern fresh in the public mind, as there is no time when people fail to look over the advertising columns of the newspaper.

One need not expect good eturns from occasional advertising. An old farmer tried "now and then" eeding upon his favorite mare, and it was not long before the "critter" laid down and died.

The mistake of mistakes is to wait until one has money (lots of it) before one begins to advertise. Without exception, the really successful men of this country began advertising when they had but little money.

Sir William Mulock and the Flower Girl.

They are telling a good story in Canada of Sir William Mulock, says an English journal, the sedate and scholarly gentleman who combines the duties of trustee of the University of Toronto with those of Canadian Postmaster-General. Walking along the Strand with a distinguished London lawyer, Sir William was inveighing fiercely against English ignorance of Canada.

The lawyer pooh-poohed Sir William's assertions. "Very well," said the Canadian Postmaster General, "we will ask the next three people we meet if they have ever heard of Canada." The three they met were all Londoners. The first answered "No." The second, an old man, said he had been around London very near to seventy years, and he knew 'twas nowhere near the Strand. In his most amiable manner Sir William then accosted a Cockney flower-girl. She looked as though she might have been at a Board School, so the Canadian Minister altered his question, and asked her if she was familiar with Ottawa. "Familiar with who?" she replied. "You just go along, or I'll smack your dirty face."

WEBSTER'S COLLEGIATE DICTIONARY

FREE.

One of Canada's greatest Family Papers absolutely FREE.

We have made arrangements with the publishers of the Montreal Family Herald and Weekly Star, and with the publishers of the Toronto Weekly Globe, by which we can offer a subscription to either of these greatest Canadian family weeklies for the balance of 1902

Absolutely Free.

To every person paying 75 cents for a subscription to the Phoenix Pioneer for the balance of 1902, we will have either of the above famous weeklies mailed direct without extra charge.

If you are already a paid up subscriber to the Phoenix Pioneer, on receipt of 75 cents we will send you either of the above weeklies and extend your Pioneer three months.

This is no doubt one of the greatest offers ever made to Canadians, and the sooner it is accepted the more you get.

Address now,
PHOENIX PIONEER,
PHOENIX, B. C.

NOTICE.

Notice is hereby given that the partnership between myself and H. J. McQuaid having been dissolved, all accounts due the Palace Livery Stable are payable only to me, and I will settle all bills against said stable.

JOHN COLLINS.

Dated at Phoenix, B. C., Sept. 10, 1902.

C. W. Stack and C. Oliver, of Greenwood, have been given the contract to manufacture 1,500 feet of 4-inch wire-wound wood pipe, for the city of Greenwood—the first of the kind made in the province.

Do You Take THE PIONEER ?

You should if you don't. It gives the news of the Boundary. It works for the Boundary. It is owned by the editor and not by any clique or faction. It is worth $10.00. It costs only $2.00.

HIGH PRAISE FOR GRANBY

New Yorker Predicts Great Things.

HAS EVERY CONFIDENCE IN COPPER

W. H. Michols, Who Refines Two Hundred Million Pounds of Copper Annually, Made His First Visit.

W. H. Nichols, president of the Nichols Chemical Co., New York, paid his first visit to the Boundary last week. The visitor is one of New York's multi-millionaires, and his name is one to conjure with in the financial and metallurgical worlds. He founded the refinery with which his name is identified. His vast plant, located in a suburb of Manhattan, is the largest of its kind in existence. Its annual output comprises two hundred million pounds of refined copper, and about sixteen million dollars in refined gold and silver annually. This represents a very large proportion of the world's annual copper production.

At his works, in addition to the smelting of ores, blister copper, copper and other mattes containing the precious metals are refined by the electrolytic process. No consignments are treated unless they contain gold and silver values. The basis of the electrolytic method is the use of electricity in not only refining the copper but in separating therefrom its other metallic contents. Before the discovery of this process no means were available for saving these valuable by-products.

"My attention," said he in Grand Forks, "has been directed to British Columbia for a number of years past owing to the rapid increase of its mineral production. As the Nichols Chemical Co. practically refines the matte from every smelter in the province, and as I had heard so much respecting your vast ore bodies, I recently concluded that it was about time for me to come west in order to size up the situation for myself.

Up-to-dateness of Granby.

"The trip has proved a perfect revelation. British Columbia is so new, that my first big surprise was in regard to the wonderful way the very latest mining inventions are being applied to local needs and conditions, and it is also remarkable that one should come so far west to see the art of smelting so far advanced. I have examined a good many smelters in the east and west at various periods, but have no hesitation in stating that the Granby plant is the most modern I ever saw. Perhaps I can convey my meaning better by using another expression: I mean its up-to-dateness. The Granby smelter is away ahead of most of the smelters I have seen as regards the prime attributes of economy and management. I did not visit the other Boundary reduction works, but understand they are also of the most modern character.

"I traversed a considerable portion of the three miles of underground workings in the Granby mines at Phoenix. While not unprepared for suprises, the magnitude of the ore bodies far surpassed my expectations. They are the largest ore bodies I ever inspected, and I have had occasion to visit a great many mines, including my own in Mexico. I shall leave to others the task of estimating the millions of tons of ore in sight or blocked out. The surface ore quarrying operations and the acre tracts of ore underground are sights that are calculated to arouse enthusiasm even among the most conservative of mining men. The showing of the Granby group I understand is almost duplicated in other Boundary camps.

Large Copper Producer.

I have gathered enough information on this trip to venture the prediction that this section is destined to be a very large copper producer in the near future.

Low Grade Mines Popular.

"Of course the Boundary, even with its present annual output of from fifteen to twenty million pounds of copper, is only in its infancy. Nature has been lavish with her mineral wealth. The grade is low, and skilful attention alone can treat the ore profitably. The compensating factors are the size and uniformity of the ore bodies, their self-fluxing character, and last but not least, the fact that no sorting is required.

"After all, investors nowadays prefer the low grade propositions because the element of permanence is assured, and large profits accrue from the vast output, even though the net output per ton may be small. Some of the Lake Superior copper mines are of very low grade, and, unlike the Boundary mines, have not got the gold and silver values to fall back upon. Of course, the method of treatment in vogue in Michigan is a good deal cheaper than in British Columbia. There the ore is free milling and the concentrates are smelted."

Mr. Nichols went on to observe that the men employed in the Phoenix mines were, collectively speaking, the most intelligent body of miners he had ever come in contact with. He considered a Canadian miner could accomplish in one day the equivalent of the labor of two Mexican miners. The subject suggested other comparisons. Mr. Nichols said the people of British Columbia impressed him as being more active and wide awake than their countrymen in the eastern provinces.

Copper Will Go Higher.

Mr. Nichols is not at all pessimistic about the future of copper. "The metal," he said, in reply to a question, "has been dealt with a little harshly, and the drop in prices has frightened timid people to death. Copper consumption is bound to increase, and I look to see it go to 12 or 13 cents and possibly to 14 cents per pound. Influences not altogether connected with stockjobbing are keeping it down. If the natural law of supply and demand were not interfered with, the price would advance.

"Our firm, which I organized, was one of the first in the field. By the application of electricity a purer quality of copper is produced than was possible formerly. In addition the gold and silver values in the copper matte are saved, but under the old methods all these by-products were lost. The blister copper shipped us by the Granby company was refined at the minimum tariff because it is free from antimony, arsenic and bismuth. These foreign substances are frequently encountered in the matte from other countries. We draw our raw material from Australia, California, New Mexico, Arizona, Mexico, Colorado and Montana.

"British Colombia," added Mr. Nichols in conclusion, "is all right. It has a great future, but the people should not get excited and overdo things. Your timber wealth also impresses me very favorably. If we had it down east it would be as valuable as your mineral resources."

We have not advanced the price of our tobaccos. Amber smoking tobacco, Bobs, Currency and Fair Play chewing tobaccos are the same size and price to the Consumer as formerly. We have also extended the time for the redemption of Snowshoe tags to January 1st, 1904.

BRIEF NEWS NOTES

MATTERS OF GENERAL INTEREST TO PROVINCIALS.

COUNTY COURT—County court was held this week at Greenwood, Judge Andrew Leamy presiding. There were a number of cases of minor importance on the docket, among them several from Phoenix.

EAGLES GROWING—The local aerie of Eagles is growing steadily, having now over a hundred members in good standing. From two to four are initiated every meeting night. The lodge is preparing for a number of entertainments from now on.

WE MAY GET IT—Hugh McCutcheon, collector of customs at Greenwood, was in the city early this week on official business. He thinks now, that with the presentment of the matter, it may be arranged so that Phoenix has customs facilities — something long needed.

NEW STAGE LINE — Last Monday John Collins began running a daily stage line to Nelson, Wash., to connect with the trains on the Great Northern railway, coming and going. Quite a number have taken advantage of it to visit the Spokane Interstate Fair, which opened last Monday.

TIME TABLE CHANGED—Beginning Monday the C. P. R. will put the winter time table into effect. The outgoing train will leave Phoenix at 1.35 p. m., and will arrive on the return trip at 4.10 p. m., the trains in and out of the Boundary passing at Eholt, as they did last winter.

SUCCESSFUL NIMRODS—R. L. Boyd and M. L. Groulx returned late last week from hunting up the main Kettle river, after a most successful trip. They secured during the week's absence two bucks and all the birds and fish they could use. This is the local record so far this year.

OUT OF QUARANTINE—Jede. Summers, who was quarantined some time ago on account of scarlet fever, was let out by the city health officer last Saturday, having been quarantined just nine weeks and three days. Geneiveve Delgrove was dismissed at the same time, having been quarintined the same length of time.

AFTER A "WAD" — C. F. Packard, an old newspaper man, but who was employed by the Kettle Valley lines in the time of construction, has sued that concern, for $25,000 damages for malicious prosecution. He was recently arrested, charged with appropriating funds of the Hot Air line, and on trial was acquitted.

BACK AGAIN TO PHOENIX—Dougald McMillan, ex-city clerk, who resigned and went to the northwest last spring, returned from the Calgary district this week, and expects to remain here. He, like others, reports general prosperity in the northwest, but he evidently prefers the Boundary country, just the same. He has taken the agency of the Equitable Life for the Boundary.

BEATEN AGAIN — Last Sunday the Eagles' base ball nine went down again before the Granby nine by a score of 31 to 11. This is the third game of the series, and each time the champions of the Boundary came out the winners, although the Eagles did some excellent playing and incidentally created much amusement for the large number of spectators who attended.

OFF FOR THE OLD COUNTRY—Dr. G. S. Gordon expects to leave next Monday for a trip to eastern points, to be absent between three and four months. While he is gone he will cross the ocean and visit his sister, who lives in London, England, afterwards spending some time at his old home in Halifax, Nova Scotia, and in New York city, before returning to Phoenix.

City and District Notes

Dr. Mathison, Dentist.

Choice tobaccos and cigars at Albin's News depot.

C. S. Schlam went to Spokane last Monday.

The infant child of C. E. Peterson, of Anaconda, died last Sunday.

Mrs. W. L. Germaine went to the coast this week, to spend a month or two.

J. A. Munson, was in the city Thursday, looking after his property interests here.

Next week Thursday the Thanksgiving ball of Phoenix Miners' Union will be held.

Geo. L. Pedlar, eye specialist, will fit glasses at McKenzie's drug store, Oct. 21-22.

Wedding bells have been ringing in Phoenix this week, and they will ring again before long.

Mrs. W. B. Willcox spent a couple of days in Grand Forks this week, visiting Mrs. Chas. Powell.

Guss Luff has taken charge of the Yale-Columbia Lunber Co.'s office and business at Greenwood.

The Grand Forks base ball team beat the Nelson, Wash., fans last Sunday by a score of 3 to 2.

King Rees had the experience of shooting his gun to frighten away a prowler last Monday night.

Better get around and order that photo while you think about it. Milner's the man to do it for you.

J. E. W. Thompson is acting as city clerk while D. J. Matheson and bride are away on the wedding trip.

Randolph Stuart has accepted the position as travelling representative of the B. C. Mining Record, of Victoria.

The wife of D. Sherman, an employee of the Mother Lode smelter, died last week Friday, leaving two young children.

The New Westminster lacrosse team won two out of three games on their own grounds against the Shamrocks of Montreal.

Milner makes photos, rain or shine. Don't hesitate at all. If the weather don't suit you it suits us, if it is a little cloudy.

Electric fixtures have been placed in St. Andrews Presbyterian church, and will be used next Sunday for the first time.

Rev. D. H. Reid, formerly of Phoenix, but now of Nelson, is exchanging pulpits with his brother from Vancouver for a time.

Hon. A. G. Blair, minister of railways, has set Friday, October 24th, for the hearing of the crossing of the V., V. & E. at Grand Forks.

Rev. Joseph McCoy, who is well known in Phoenix, having resided here some months, has opened a ladies' college at Victoria.

Work has been started on the large brick vault to receive the drainage of the Bank block, which will be located under the First street bridge.

F. S. Parrish, manager of the B. C. mine, has been doing some expert work in East Kootenay lately, where his principals are also interested.

Miss Boultbee, of Rossland, who has been visiting with Mrs. J. W. Astley at the Snowshoe mine for some time, returned to her home last Monday.

R. A. McMordie, principal of the Columbia public school, has accepted a similar position at Fernie, and has been succeded by Lawrence Redmond.

G. W. Elliott, of Seattle, who six years ago had an option on the Winnipeg mine, Wellington camp, was registered at the Dominion house early this week.

The lakes of the district are being stocked with black bass by the Dominion government, among them Long Lake, in Long Lake camp, being included.

Owing to absence of members, no council meeting was held last Wednesday, but one will probably be held this morning, to dispose of some important business.

Rev. J. Hard will occupy the Presbyterian pulpit tomorrow morning, and the pastor, Rev. V. M. Purdy, who is much better after his recent indisposition, will preach in the evening.

H. S. Cayley, of the law firm of Cayley & Cochrane, has been elected president of the Grand Forks board of trade, vice-president E. Doberer, resigned, on account of moving to Vernon.

Wm. Hunter, head of the Wm. Hunter Co., Ltd., spent Sunday in the city on a visit to his local store. Mr. Hunter has recently given up business in Nelson, and once more makes his home in Silverton.

E. L. Newhouse, general manager of the American Smelting and Refining Co., was a recent visitor to Grand Forks where he inspected the Granby smelter, being the guest of Supt. Hodges, who is an old friend and coworker in the smelting business.

R. Gardom, customs officer at Midway, was married on Saturday to Miss Susan J. Haynes, youngest daughter of the late judge Haynes, of Osoyoos. The ceremony was performed by Rev. Father Bédard, at the house of the bride's mother, Mrs. E. J. Dowing, Midway.

Are your eyes prepared for the long winter evenings? One pair must last your lifetime and it is false and bitterly regretted economy to neglect the relief of properly fitted glasses when headache or failing sight warn of eyestrain. Geo. L. Pedlar, specialist, will make his regular visit at McKenzie's drug store, Oct. 21-22. No charge is made for examination, and every glass is guaranteed.

New Millinery Store.

The ladies of Phoenix will kindly take notice that we have leased the store adjoining McKenzie's drug store, in the McAuliffe building, and are now displaying some of the nicest creations in fall and winter hats yet seen in the Boundary. No need to send or go away this year. Our goods are all new and in the latest style. We invite you to call and inspect.

McKENZIE & HAMBLEY,
McAuliffe Block,
Dominion Ave.

GOOD NEWS...

—FROM THE—

PEOPLE'S STORE

40 pound box Apples, $1.00; 20 pound box Apples, $1.00.
Potatoes, $1.25 per hundred.

We have been appointed agents for the celebrated KAMLOOPS CIGARS, and sell them at factory prices. These cigars are not made in the east by cheap labor, but are made almost at home, and are admitted by all lovers of the weed to be excellent cigars.

As soon as the freight blockade is raised we expect Car Groceries, Car of Flour and Car of Hay. And as soon as we can make arrangements we will carry a complete stock of Feed, Hay and Grain of all kinds.

Whenever any of my competitors tell you that they sell goods cheaper than Hardy, you tell them that they are mistaken, and I will prove to you that they are.

'Phone 61. THOS. HARDY & CO.

NOTICE.

Notice is hereby given that, having sold out my interest in the Fashion Stable, heretofore owned by Fraser & Landon, to Samuel W. Johnson, all accounts owing to October 1, 1902, to the firm of Fraser & Landon will be settled by said firm, and all bills due the late firm to October 1, 1902, will be collected by Fraser & Landon.

All accounts not settled within ten days will be placed in the hands of a solicitor for collection.

JOHN K. FRASER.

Dated at Phoenix, B. C., Oct. 4, 1902.

One Good Investment is Worth a Life Time of work.

An Investment in Phoenix Realty at the present time is bound to bring a handsome dividend at no distant date. No one with an understanding of the possibilities of the Phoenix mines believes that present low real estate values will long prevail. With increased ore shipments prices are stiffening up. We still have some good values in Dominion Copper Co.'s Addition and other parts of the city at most reasonable figures. Whether you desire it for an investment or a home we can fill your wants.
