YALE REGISTRY,
Aug. 14, 1897.

IN THE SUPREME COURT OF BRITISH Columbia, in the matter of the Official Administrators' Act, and in the matter of the estate of Charles Berger deceased, dated the 13th of July, A.D. 1897. Upon reading the affidavits of Ernest Henry Sheridan McLean and Charles Frederic Lindmark.

It is ordered that James Ferguson Armstrong, Official Administrator for the County Court District of Kootenay, be administrator of all and singular the goods, chattels, rights, and credits which were of Charles Berger, late of Illecillewaet in the district of Kootenay, free miner, deceased;

And it is further ordered, that this order be published in the Revelstoke Herald newspaper for the period of sixty days.

(Signed.) A. J. McCALL,
J.

The creditors and persons interested in the estate of the above named Charles Berger, late of Illecillewaet in the District of Kootenay, free miner, deceased, are hereby required within sixty days from this date to send by registered letter addressed to James Ferguson Armstrong, Official Administrator, Fort Steele, British Columbia, particulars of their claims, and the nature of the securities (if any) held by them. After the expiration of the said sixty days, the distribution of the said estate will be proceeded with, regard being had only to such claims of which notice shall be given as aforesaid.

Dated this 20th day of August, 1897.

CERTIFICATE OF IMPROVEMENTS

GOLD BUG FRACTIONAL MINERAL CLAIM.

Situate in the Trout Lake Mining Division of West Kootenay District. Where located: On Silver Cup hill, bounded on the north by "Sunshine," on the south by "Free Coinage," on the east by "Silver Cup," and on the west by "Huron" mineral claim.

Take notice that I, Frank Stillman Barnard, Free Miner's Certificate No. 88692, issued at New Westminster on the 17th day of October, 1896, as agent for and on behalf of the Lillooet, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 30th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above mineral claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 9th day of September, 1897.

F. S. BARNARD.

Sept 29-9t

MOUNTAIN MINERAL CLAIM.

Situate in the Trout Lake Mining Division of West Kootenay District. Where located: Northeasterly from and adjoining the "Towser" mineral claim.

Take notice that I, Frank Stillman Barnard, Free Miner's Certificate No. 88692, issued at New Westminster on the 17th day of October, 1896, as agent for and on behalf of the Lillooet, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 30th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above mineral claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 9th day of September, 1897.

F. S. BARNARD.

Sept 29-9t

SCOTTISH CHIEF MINERAL CLAIM.

Situate in the Trout Lake Mining Division of West Kootenay District. Where located: Northeast of and adjoining the "Sunshine" mineral claim.

Take notice that I, Frank Stillman Barnard, Free Miner's Certificate No. No. 88692, issued at New Westminster on the 17th day of October, 1896, as agent for and on behalf of the Lillooet, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 30th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above mineral claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 9th day of September, 1897.

F. S. BARNARD.

Sept 29-9t

Sutton Mineral Claim

Situate in the Illecillewaet Mining Division of West Kootenay District.

Where located: On the northwest side of the mountain between the Illecillewaet River and the north fork of the same, about five miles northeast of Illecillewaet.

Take notice that I, Frank Stillman Barnard, Free Miner's Certificate No. 88692, issued at New Westminster on the 17th day of October, 1896, managing director of the Lillooet, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 30th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a crown grant for the above claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 20th day of Sept., 1897.

F. S. BARNARD.

NOTE AND COMMENT

As time goes along, the developments in the Liberal convention project become more interesting. One great difficulty appeared to be to know who had called it. It is quite certain that neither Mr. Templeton nor Mr. Maxwell, two of the leaders of the Liberal party at the coast, had anything to do with it. They absolutely refuse to be bound by it in any shape or form. These gentlemen recently made a tour through Kootenay, in the course of which Mr. Maxwell signified his readiness to come forward as leader of the provincial opposition, if required. The proposal was not received with any very great enthusiasm, and Mr. Maxwell returned to Vancouver. Both he and Mr. Templeton, appear to think there are wheels within wheels in this proposed convention, and do not like the look of it. On the other hand Hewitt Bostock, Esq., M. P., to adopt the fond and lingering nomenclature of the Golden Era, told the coast papers that the Liberals in Kootenay are delighted with the idea of the convention and are prepared to take hold of it heartily. This delight, by the way, is not very vividly reflected in the columns of our esteemed, which merely mentioned the coming convention and warned the faithful to govern themselves accordingly. Perhaps it was waiting to see which way the cat was going to hop. Probably in its next issue pussy's movements will have been made clearer, particularly as the Province demands a convention, and is bound to have it right or wrong. It is pretty to see the little tin gods jumping about this way and that, when the great Grit Jove of British Columbia jerks the strings.

A remarkable feature in the development of North Kootenay has been the great increase in value in the customs collections in Revelstoke. During the first six months of the incumbency of the present collector, who was appointed only three years ago, the total amount collected was only $75 altogether. During the first nine months of the present year the total amounted collected was $14,595.-68, an average of over $1,600 a month. Last year the average was about $1,300. Since then Nakusp has been made an outport, and the whole of the Sloean country went with it. The increase has kept up in spite of this loss of territory. Last month the total collected was $2,702. In spite of this immense increase of revenue the collector's salary remains at the same paltry figure of $25 a month, as it was when the present collector was appointed. Mr. Haig has carried out the work of the office to the greatest satisfaction of the public, and it is time that the department recognized his services by an increase of salary. The present arrangement becomes more glaringly unfair, when it is noted that the collector at the newly made outport of Nakusp, whose district was sliced off the Revelstoke district a few months ago, gets double the salary for looking after that portion which comes under his supervision, than Mr. Haig got for attending to the business of the whole undivided district. This petty treatment of an excellent official is far from conducive to the efficiency of the public service. When the department gets hold of a good man they ought to know enough to pay him a sufficient sum to retain his services.

Mr. J. Edelman, of Philadelphia, Pa., writes the HERALD that he intends to operate the placer claims across the river, staked for him by Mr. O. F. Wegener, in the near future.

Mr. Jas. Savage, who is well known as a first class tailor in Kamloops, Revelstoke and other mainland towns, has returned to his old position in Mr. R. S. Wilson's tailoring establishment, the increase of business warranting the introduction of more help.

The Johnson-Smiley concert at the Methodist church last night drew a big crowd. Miss Pauline Johnson, who appeared in the Mohawk costume, recited several Indian pieces with her usual thrilling effect, while Mr. Smiley supplied the lighter part of the entertainment to the great amusement of the audience. The want of a little music to relieve the recitations somewhat marred an otherwise most enjoyable evening.

Mr. John Sanderson came in from the Last Chance placer mine on Monday. Work is still progressing on the claim and the tunnel is still being run to strike bed rock. Twenty five dollars were taken out of a small shaft sunk in the tunnel from about 3 feet of the bedrock. This is a cheering indication, but how far more the tunnel may have to be run before it strikes the bedrock cannot be estimated. It may be only a short distance, or it may be some considerable length. Three men are at present working on it.

VISIT OF PREMIER TURNER

An Interview on the River Bank Protection Question.

During the visit of Mr. Turner to Revelstoke on Saturday he met a delegation of the Council of the Board of Trade in the Victoria Hotel, with a view to a discussion on the much needed protection of our river bank. The subject was broached by the president, Mr. Sibbald, and a long discussion on the subject from every point of view followed. The Premier said that he had formerly been of the opinion that this class of work devolved entirely on the Federal government, but it was now clear to him that by the B. N. A. Act and the terms of union, that the province could be called upon to co-operate, as the exclusive responsibility of the Federal government was confined to the beds of the navigable rivers. He explained that in some way, which he could not explain, the Federal authorities had neglected to notify the provincial government of the vote of $10,200 passed by the Dominion House for the protection of the bank of Revelstoke till late in the last session of the legislature. It was the usual course to forward information of items affecting the province, which were passed in the estimates, at once, but this procedure had not been carried out in this particular instance. For his own part he acknowledged the necessity of action in the matter, but thought the first thing to be done would be to get the ground surveyed by a competent engineer, one who was familiar with river work, and an estimate of the cost of the work furnished. Mr. Roy, the Dominion government engineer was at present making surveys on the lower Fraser, and had informed him that he would make a report on the river bank here before returning to Ottawa.

It was suggested that the matter was urgent, that land, which should furnish a revenue to the province was being annually washed away, and that this was the best time for a survey to be made, when the water was low. Why could not the department be asked to send Mr. Roy here at once?

The Premier fell in with the suggestion and promised to wire Hon. A. L. Sifton at the coast to that effect.

The subject of the unequal incidence of taxation was brought up incidentally to the river bank question, but Mr. Shaw stated that this year all property was being taxed as town lots, so that everybody will be taxed alike in future.

On the question of a waggon road to the head of the canyon, the deputation failed to extract anything more satisfactory than an opinion from the Premier that an engineer would have to be appointed to look after the construction of roads and bridges in the province, as he regarded the present system as very unsatisfactory. Roads were being built not where the general public wanted them, but where a few persons had interests, giving rise to much dissatisfaction.

The Premier remarked that it was about time Revelstoke was getting incorporated, as the place had made such an astonishing progress. He thought that when incorporated the town ought to take over the school as well. In fact something would have to be done in the way of getting all incorporated towns to assume the financial responsibility of their schools, as the drain on the revenue under the head of education was more than the province could stand.

The interview was very interesting and at times quite animated. At its close the deputation thanked the Premier heartily for the courteous hearing, which he had accorded to their demands.

The latest advices from the Carnes Creek Co's. property are to the effect that work on the Roseberry is going on very satisfactorily, and the mine continues to shew up very promisingly under development. Owing to the expense, which would be entailed by continuing the work all winter, operations will probably close down at the end of this month.

Miss Gertrude Marrack, the Australian prima donna contralto, who is at present performing at Victoria, will give an entertainment here in about two week's time. She is supported by a strong company, including Master Sammy Johnson, the prince of comedians, Miss Ethel Wynne, solo pianist, and others. Selections from the new Japanese opera "The Geisha" will probably be given.

☞ Gents' furnishings, ready-made clothing and hats, a splendid assortment. A large range of suits, pants, etc., all new goods. The newest styles in gents' neckwear, white and fancy shirts. Large assortment of underwear in fancy stripe wool merino. Nice range of English and Scotch goods—imported specially for our trade. Correct styles in Fedoras and soft felt hats. Our prices are very reasonable. BOURNE BROS.

COUNTY COURT

The New Courthouse Opened by Judge Forin This Morning

This morning at 10 o'clock Judge Forin opened county court in the court room in the new government building. On his honor taking his seat Mr. A. G. M. Spragge opened the proceedings by a short speech in which he congratulated the judge and town on behalf of the bar and general public on the commodious new room, now opened, showing as it did the progress of the place. He alluded to the efforts of the government agent in getting the grant and pushing the building through to completion.

His honor answered briefly, stating that he himself had fully recognized the need of a court house in Revelstoke, and had strongly urged the necessity on the government. The court room and his private room were both very commodious and comfortable. The latter could be used for holding chambers in the winter. Other places wanted a court house, and Mr. Turner had promised that an appropriation should be made next session for a large court house next the registrar's office at Rossland. The premier was much concerned over the needs of the district in these matters. His honor alluded to the charge of severity which had been brought against the administration of justice in the province. He had no sympathy with any maudlin feeling towards criminals. The rights of the public had to be protected. At the same time everyone would get an impartial hearing, but the criminal classes would have either to behave themselves or be punished or leave the country. He thanked Mr. Spragge for his remarks.

The first case that came up was that of H. Murphy for assault on H. A. Brown. Prisoner elected to be tried summarily and pleaded guilty. The case was adjourned till 2 p.m. to give the prisoner a chance to get witnesses.

The case against Nicely was also adjourned till this afternoon.

THOMSON'S LANDING

An Interesting Budget of News From the Lardeau.

THOMSON' LANDING, B.C., Sept. 30.—Mr. I. M. Citron, general merchant here, has left for a visit to San Francisco. Mr. J. W. Thomson will manage his business during his absence. It seems Mr. Citron, last year, took a fancy to a bonnet in that city and has gone back to secure possession.

The Lade Bros., who own the Gainer creek gold mines, came down to the Landing today. They have been driven off the claims by snow and will be unable to do any more work on them till spring. It is a pity these rich leads were not discovered earlier in the season so that there would have been time to put up the necessary buildings and work all winter. We hope however these claims will be worked vigorously next summer.

Large flocks of geese now frequent the grass flats in the vicinity of the Landing. Some of our crack shots have been firing at them, but no geese were killed until today, when Ben Reamy, the champion nimrod of the Trout Lake country, appeared on the scene. He shouldered his rifle and managed to get within 400 yards of a flock, picked out a big gray goose, and as it turned its right eye to make observations, fired and down fell the goose shot through the right eye. No doubt Ben will secure quite a few of them before the season is over. He grumbles considerably about fellows, who never could hit a goose, persisting in firing at them and scaring them away.

Messrs. Evan Johnson, of Evansport and Ike Thomson of this place are on a visit to Revelstoke.

Some time ago I warned people through your paper not to purchase cheap interests in claims they know nothing about, but it seems that the warning has been unheeded, as some parties are still enquiring about the value of purchases they have made on leads that only assay a few dollars to the ton, but which are represented to assay over $2,000. People should understand that those who have claims on ledges which assay $2,000 or more to the ton will not sell an interest for $50.

Mr. Jas. Tobin, who has been blacksmith here for the last year, has sold his house and three lots to Mrs. J. M. Green, of New Westminster, and left for a visit to his home in Oregon. He will return in about a month.

Dr. E. George is still at the Landing, and has the Klondike and another fever bad. He is going to sell his gold claims at Whiskey Point and leave for the Klondike in the spring.

The match race between Pettipiece's Lark and McCarty's Banjo, which came off last Saturday afternoon, drew a considerable crowd to Front St. The race was run in heats, two out of three and was a quarter mile in distance. In the first heat the chestnut won and in the second the black, both being well contested. In the last heat the Lark came in first, but the judges decided that it was no race, owing to a foul being claimed by the backers of the black, which took place nearly opposite the post office. However most of the bets on the race have been paid, though the stakes have not been handed over. Another race for $500 a side is being arranged to take place in two weeks time.

GREAT BRITAIN AND SILVER

PROPOSED CONCESSIONS TO THE BIMETALLISTS AND SILVER MEN

One-Fifth of the Bank Reserve in Silver—Silver to be a Legal Tender up to £25 and the Indian Mints are to be Reopened.—Reception to Sir Wilfred Laurier in Toronto.—The War on the Indian Frontier.—Henry George Accepts the Nomination as Mayor of Greater New York.

(SPECIAL TO THE HERALD.)

LONDON, Oct. 5.—The Times yesterday morning in an editorial on the recent currency correspondence calls for the publication of the details as to what the French and American governments demand and offer.

The Daily News in its financial article refers to the rumors that an active correspondence is proceeding between the home and Indian governments and that the concessions to America will include the holding of one-fifth of the bank of England's reserve in silver, raising the amount of the legal tender of silver coin from £2 to £25 and reopening the Indian mints and says: "It is very much to be desired that an end should be put to the present mischievous agitation and its attendant disquiet in reports.

TORONTO, Oct. 6—Sir Wilfrid Laurier was tendered a public reception yesterday at Toronto. The Premier in reply to the numerous addresses said that Canada was now a nation and no longer a colony. Hon. Edward Blake addressed the Premier saying that he himself was better at choosing a leader than at bearing the standard himself.

LONDON, Oct. 6—On the Indian frontier the Mullah's forces are preparing to fight the advancing British troops, but are willing to accept or offer terms and to end the war.

MONTREAL, Oct. 6.—Sir Wm. Van Horne left yesterday for the west on his annual tour of inspection.

NEW YORK, Oct. 6.—Henry George has accepted the nomination tendered him last night for the mayoralty of Greater New York.

Price of Silver

NEW YORK, Oct. 6—Closing price of silver yesterday was 55; copper $11.14; Lead $4.

THE SPOKANE FRUIT FAIR

Opened Yesterday with a Grand Parade Nearly a Mile Long.

SPOKANE, Oct. 6—The fourth annual Spokane Fruit Fair opened here yesterday with a magnificent harvest festival parade. The procession was nearly a mile long and included over twenty floats representing the United States, Great Britain, Scandinavia, the goddess of plenty, the mines of the Northwest and a number of Spokane business houses. On the British float Great Britain was represented by Britannia with trident, shield and helmet, seated on a rock. At each corner of the float stood a British soldier or sailor, and it was accompanied by a band playing British airs.

THE PUBLIC SCHOOL

Honor Roll of Pupils for the Month of September.

SENIOR DIVISION.

Class V.—1 Wm. Beavo, 2 Frances Dent.

Class IV.—1 Marion Adair, 2 Eva Lang, 3 Edward Jeffs.

Senior III.—1 Elvie Lapsvold, 2 Ernest Hanson, 3 Rose Piper.

Junior III.—1 Essie Hamilton, 2 Ancil Hillier, 3 Thomas Allen.

Class II.—Pearl Robinson, 2 Delia Morgan, 2 Archie Bensall.

JUNIOR DIVISION

Primer II.—Beatrice Bland, Maud Hyatt, John Fraser.

Primer I.—Edwin Reid, Annie Savionni, Frederick Robinson.

Tablet A Class.—Jennie Hayatt, Kathleen Fraser, John Procynouski, Jules Perrin.

Tablet B Class.—Harold Burridge, Frederick Turnross, William Ogg.

Shipments of Ore for September

The following is the amount of the ore shipments through Revelstoke during the past month:

Lanark	120,000 lbs.	$ 4.680
Idaho	548,000 "	38.706
Reco	240,000 "	20,580
Enterprise	120,000 "	5,447
Slocan Star	360,000 "	14,244
Meteor	80,000 "	7,515

The Lanark ore was shipped to Argentine, Kansas, the Meteor to Great Falls, Mont., and the balance all went to Omaha.

Customs Returns

During the month of September the amount collected at the customs office, Revelstoke, was $2,762, value of dutiable articles, $6,561. Total collected for the nine months ended Sept. 30th, $14,505.68.

WEDNESDAY. OCT. 6. 1897.

HUDSON BAY EXPEDITION

The Government expedition to further investigate the navigability of Hudson's Straits brings back a discouraging report. The steamer Diana, which carried the expedition, returned last week, after having made six passages through the Straits, visited Cumberland Sound, explored the coast of Baffin Land, discovered a large lake in the interior, trawled for cod fish without success, surveyed both shores of Hudson's Straits, visited Fort Churchill, and obtained a lot of information from the factors there, steamed 30 miles up the Ungava river and reached Fort Chimo. The expedition reports unfavorably upon the commercial value of Hudson's Bay as a steamship route, owing to fogs, shoals, icebergs, want of lighthouses and the country being bleak and barren with no communication to civilized regions. The expedition will return to make a final run through the Straits to determine exactly when navigation closes.

There is a suspicion in this report of the wish being father to the thought. The people of eastern Canada, for selfish reasons, have always opposed the Hudson Bay route. They brought such pressure on the late Government as to hamper the action it was well known to be willing to take toward opening up the route, and now the Liberal Government sends out an expedition to show that previous explorers were liars and that a route which was used for steamships and sailing vessels before the members of the Diana party were born is "of no commercial value." What is one of the reasons advanced? The absence of lighthouses! Another is that there is no communication to civilized regions. Did the expedition expect to find cities up there, with harbors, docks and accomodating pilots on little steam tugs coming out to meet them? All but two of the reasons advanced against the route can be removed. Lighthouses can be built, shoals can be deepened, and telegraphs or even cables established. As for fogs, they are plentiful on the present Atlantic route and icebergs are not an insuperable difficulty. The very fact of the Diana having made in safety six trips through the Straits this season, with all on board in good health, is itself a refutation of the adverse report, and it is not likely that an interested finding, made at the instigation of an interested Government, to gratify the prejudice of an interested people, is going to annihilate a route which the Hudson Bay Co. has used for over a century and toward which in connection with a railway to the bay Western Canada looks as her savior from freight rates which for geographical reasons must always remain high on other routes.

Since his return to the United States the American papers have been making a great ado over Lieutenant Peary's meteorolite. He filched it off a Canadian island up in Baffin's bay. It is a very large one, the largest by much that was ever discovered. That is because it is Canadian; it is the kind of meteorolite we grow in this country. Lieut. Peary is clearly open to prosecution for stealing, and unless American papers conduct themselves more civilly in the future we may demand the restoration of our property and the punishment of the robber. Meantime we leave it with them as a hostage for their better behaviour.—Free Press.

FALL AND WINTER STOCK

We now beg to call the attention of the Public to our New Lines just received in the following articles:

DRY GOODS---Comprising the latest designs in Dress Goods, Cashmeres, Flanellettes, Laces, Ribbons, Embroideries, etc., etc., imported direct from Scotland.

BOOTS AND SHOES---Large shipment of Fine Boots and Shoes from best Canadian makers.

GENTS' FURNISHINGS---The stock in this department is most complete. Shirts, Ties, Collars, Socks, Hats, Ready Made Clothing, etc. in great variety.

HARDWARE AND HOUSE FURNISHINGS---Parties furnishing are invited to inspect our Stock of Stoves and Heaters, including the new Air Tight Heater, Granite Ware, Cutlery, Silver Ware and Crockery. Carpets, Oil Cloth and Linoleum. An extensive selection.

GROCERIES---Our Stock of Groceries is always fresh and first-class, being constantly renewed by consignments from the best houses in the Dominion. We lead in Tea and Coffee.

PATTERSON'S DEATH

HE WAS STANDING IN THE BOW OF THE BOAT

And Fell When the Rocks Were Struck The Accident Due to Mistaken Directions.

Jos. E. Devine, Edward Harris, A. W. Complin, H. W. Richmond and R. Hunter, of the Hamilton-Yukon expedition on their return to Edmonton gave the following account of the trip to Grand Rapids and the accident which resulted in the drowning of Wm. Patterson. They left the Landing on the evening of Sunday, August 29th, and drifted all night, and with only one or two stops for meals, until 10 o'clock on Monday night. They tied up for the rest of that night and started at five o'clock on the morning of Tuesday, 31st. Very shortly after starting they passed the Pelican rapids without mishap, there being little or danger there. They had no guide from the Landing, expecting to get one at the Grand rapids. About four o'clock on Tuesday afternoon they reached Grand rapids. They had been sailing, but on coming to rough water above the head of the rapids they dropped the sail and drifted with the current. They had been told to land on the right bank above the rapids, but were told to keep a sharp look out for the police post, and that when they saw that they should pull ashore. As a matter of fact they should have landed at the steamboat landing on the right bank about a mile above the police post and two miles above the head of the island which is also at the head of the rapids. They were looking out for the post, but when they saw it it was too late to pull over to it. They were towards the west side of the river when they caught sight of the police post, and heading for over the rapids by the west channel. Langworthy's party who were at the head of the island saw them coming and fired guns to warn them that they were wrong. The boat was turned for the island, but was too far down stream to reach its head. To keep from going down the rapids the boat was jammed between two rocks. Patterson was not asleep, as was reported, but was standing in the bow and it is believed put his foot over the side to ease the shock of the boat striking the rock. He was thrown overboard. The water was four or five feet deep with a terrible current. He stood for a minute or two in it and a plank was thrown to him which he seized. A rope was also thrown, but he did not reach it. The current swept him off his feet and he was carried down the rapid. The rapid is about half a mile in length with a fall of 80 feet with many rocks in it. Once he was swept down the rapids there was no chance of saving him. The parties on the island tried to reach him with a rope as he was being swept down, but the attempt failed. A rope was brought from the island to the boat by a canoe, and having been made fast the men held on the rope and waded ashore. The cargo was taken out safely and the boat brought ashore. The boat was considerably damaged. The party remained on the island four days searching for Patterson's body without avail. The boat was so much damaged that the pilots would not undertake to guide it through the rapids. The party therefore decided to give up their trip for this season, but expect to go north by the same route in April. In the meantime Hunter and Richmond will trap on the Athabasca and Devine and Harris will go east.

Langworthy's party and the Fresno party left the Grand rapids for the north on the same day as the Hamilton party started on their return to Edmonton. They met the first Chicago party 40 miles this side of Grand rapids and Messrs. Bell and Reid of Calgary, with two canoes this side of Pelican rapids. They met a large number of other parties on the river.

They describe the method of making the portage at Grand rapids as follows: Boats going down stream should land on the east bank at the steamboat landing, about two miles above the head of the rapids, but there were two or three teepees, so that a sharp look out must be kept for the place. Half the cargo is unloaded at the landing and a pilot must be taken who guides the boat with half a load through very bad water and amongst rocks to the head of the island. The half load is discharged on the island and the empty boat taken back to the landing for the balance of the load, which is also brought to the island. The H. B. Co. have a tramway with a handcar, the use of which might be arranged for. The empty boat is let down carefully by lines held on the island in the east channel and brought around to the landing at the lower end of the island. There it is loaded again. A piece of bad water has to be passed through almost immediately below the island, for which a capable and experienced pilot is necessary. For the river from the steamboat landing, two miles above the head of Grand rapids, to Fort McMurray, 87 miles below, it is simply foolhardy to go without a competent pilot.

Uncle Jimmie Lane, an Irishman by birth, but a citizen of Canada since 1832, died on Friday in Toronto at the advanced age of 102 years. He enjoyed good health to the last.

All Read It

And Read It All—Every page, every column, every line. No paper in North Kootenay has one-fourth its circulation, or is as well read by so many persons as THE SEMI-WEEKLY REVELSTOKE HERALD. To reach the people of North Kootenay its columns must be used, and in fact it can boast of what no other paper in its district can. Every business house in Revelstoke advertises in it, and are satisfied it brings results. What better guarantee could outside advertisers ask?

Its newsy columns, its telegraphic, its typographical neatness, its free delivery, its interest in the welfare of Kootenay, are steadily increasing its circulation.

We solicit your business on the basis of results—not from sympathy. We can help increase your business.

DESPATCHES

A NEW ISSUE OF POSTAGE STAMPS

SIR OLIVER'S SUCCESSOR

Another Mine Sold for a Big Figure—Canadians Boycotted in the States—A Rumor About Our Lieutenant-Governorship.

VANCOUVER, September 28.—The steamer Coquitlam brings the news that heavy rains have flooded the rivers at Dyea and Skagway and that the trails are in a fearful condition, blocked with dead horses, and it would be madness to start out now.

LONDON, September 28.—Lord Ashbourne states that there is no foundation in the rumor that he would succeed the Earl of Aberdeen.

WOLSELY, September 28.—Young Jordan was killed yesterday and another boy wounded by the accidental discharge of a gun with which they were playing.

WASHINGTON, September 28.—When the British Ambassador reaches here next month negotiations for reciprocity treaties under the new tariff law will be taken up.

LONDON, September 28.—The Icelandic parliament has voted money for a cable from Iceland to Scotland.

CARMAN, September 28.—Three stacks of oats and a new separator belonging to Frank Bridges was burned yesterday.

GUARDVILLE, Pa., September 28.—Nine men received fatal injuries and many were seriously wounded in a bloody riot here yesterday. The battle was the outcome of the Hazletown trouble. All were Polish miners.

SIMLA, September 28.—General Westmacott destroyed the villages of the Kuakhell tribe yesterday.

HAVANA, September 28.—The insurgent forces have captured Victoria de Las Tunas. They plundered the private residences and committed many brutalities with women and girls. It is said they mutilated ninety-eight volunteers and innocent children.

WINNIPEG, September 28.—James Stanley, contractor died suddenly yesterday at the Manor House.

LONDON, September 27.—The Spectator, accepting as a fact the report that the United States has admonished Spain, finds it difficult to think war can be avoided, adding: "Apart from the fact that in pride and ignorance of the consequences Spain defy the United States, war is probably considered to be the best way out of the difficulty. Were the Government to purpose the abandonment of Cuba in cold blood it would simply mean handing over the country to Don Carlos. So the Government proposes to employ the United States, as the surgeon, to do the necessary amputation, which will alone prevent the Cuban gangrene from spreading to the rest of the body politic." After detailing Spain's iniquities in Cuba, the Spectator continues. "To prolong the war would be a crime and if the United States chooses to stop these hideous cruelties all Englishmen should applaud and refuse to enquire too narrowly into the reason which influenced her statesmen in putting pressure against Spain." Referring to the objection of patriotic United States citizens to the admission into the union of Cuba and Hawaii as states and the consequent election of senators by degraded populations, the Spectator says: "The duty of the United States is to stop the long agony of Cuba and if the constitution admits of her doing so safely, the sooner she amends her constitution so that she can hold her new acquisition on a different footing the better for her and for humanity."

LONDON, September 26.—An extensive economical revolution is in sight, if the claims of Dr. Prinzen Geerlings turn out to be what the doctor asserts they are. Dr. Geerling, a government official of Java, and formerly a professor of chemistry at the university of Amsterdam, announces a simple method of converting potato starch into sugar. He lodges his description of the method with the French academy of sciences, so as to secure priority for his invention, although he is not ready to make the details public.

BOMBAY, September 25.—Recent advices from the scene of the wreck of the bridge on the Bangalore-Misore railway near Madur, indicate that 150 persons were killed and 14 injured. About 70 persons succeeded in making their escape. Most of those killed and injured were natives. The train was crossing the bridge at a considerable rate of speed and has been entirely submerged by the waters of the river.

OTTAWA, September 30.—It is learned on good authority that Hon. David Mills has accepted the portfolio of justice to succeed Sir Oliver Mowat.

New designs for postage stamps have been selected. The new issue will be out in about three months.

A NEW BRANCH

BUFFALO, September 30.—The Bank of Montreal has established an agency here, with O. W. Yarker, of Toronto, as manager.

ANOTHER MINE SOLD

WINNIPEG, September 30.—It is stated here that the Olive mine, in the Lake of the Woods district, has been sold to an English syndicate for three-quarters of a million. Many Winnipeggers are interested in the property and will make small fortunes out of their lucky speculation.

A LAWYER DEAD

SARNIA, September 30.—C. C. M. Garvey, barrister, is dead. He was a former law partner of the Honorable Pardee.

THE LAND OF THE FREE

PEORIA, Ill., September 30.—Two officers of the Order of Railway Telegraphers have been arrested for promising positions to Canadians.

ANOTHER RUMOR

OTTAWA, September 30.—It is reported here that J. V. Sifton, father of the Minister of the Interior, is to succeed Lieut.-Governor Mackintosh of the Territories.

GOOD FOR THE AMEER

LONDON, September 30.—The Ameer of Afghanistan has refused ammunition and assistance to the Afrides and the Orakjas, the rebellious tribes on the Indian frontier.

A GREEK CRISIS

LONDON, September 30.—A political crisis is now on at Athens. It is expected the government will resign tomorrow.

ANOTHER CRISIS

MADRID, September 30—The Spanish cabinet has resigned. Sagask, the Liberal leader has been telegraphed for by the Queen Regent.

JAPANESE AND HAWAII

WASHINGTON, September 30.—Minister Moshi, of Japan, denies that his government has accepted one hundred thousand dollars as an indemnity for the rejection of Japanese by the Hawaiian government.

WHAT DOES THIS PORTEND?

NOTTINGHAM, September 30—Father Ignatius caused a sensation here yesterday by declaring at a convention that "we are on the fringe of a great apostacy."

A MILLION DOLLAR FIRE

WASHINGTON, September 30—The Capital Traction Company's buildings have been destroyed by fire and the flames spread to the buildings on Pennsylvania avenue and "D" streets. The damage is estimated at one million dollars.

THE NEW LORD MAYOR

LONDON, September 30.—Lieutenant Colonel Horatio David Davis has been chosen Lord Mayor of London.

LABRADOR FISHERIES FAIL

PLENTY OF PROVISIONS AT DAWSON

A Boiler Explosion in British Columbia—Firemen Killed—Yellow Fever Victims — Bush Fires at Turtle Mountain—Ralli Ministry Defeated

OTTAWA, October 1.—While attending a meeting of the Liberal association last night, E. Leblanc, city license commissioner, dropped dead of heart disease.

PROVISIONS AT DAWSON.

VICTORIA, October 1.—Dominion Government Surveyor Ogilvie says there are enough provisions at Dawson for four thousand people for the winter and that there need be no starvation.

THE LABRADOR FISHERIES

ST. JOHN'S, Nfld., Oct. 1.—The failure of the Labrador fisheries is complete, the catch being below that of last year. Much destitution is expected.

BOILER EXPLODES.

VANCOUVER, October 1.—The boiler of engine 354 on the C. P. R. exploded yesterday near White Creek bridge, killing brakeman Geo. Elson and scalding the engineer and fireman.

JAPAN'S REPRESENTATIVE.

LONDON, October 1.—Count O'Kuma will represent Japan in the Behring Sea controversy and other important matters between the United States and Japan.

PRINCE CARL'S DANGER

LONDON, October 1—A despatch from Copenhagen to the Daily News says that the torpedo boat commanded by Prince Carl met with an accident and nearly foundered while returning from the Jubilee festivities of the King of Sweden.

BRITISHERS IN BELGIUM

BRUSSELS, October 1.—British subjects held a meeting last night to protest against the Belgian law compelling foreigners to serve in the civil guard.

MORE STRIKES

CHICAGO, October 1.—A street car strike is imminent and the police are held in readiness for immediate duty.

A MONTREALER SWINDLED

ST. PAUL, October 1.—T. L. Young, of Montreal, was swindled out of $90 dollars on the Soo passenger train between Minneapolis and St. Paul yesterday.

BUSH FIRES

WINNIPEG, October 1.—Bush fires are raging in the timber reserve at Turtle Mountain and great damage will result.

YELLOW FEVER VICTIMS

NEW ORLEANS, October 1.—The total number of deaths from yellow fever now mounts up to sixty.

RALLI MINISTRY DEFEATED

ATHENS, October 1.—The Ralli ministry was defeated yesterday on a vote of want of confidence when considering the peace treaty with Turkey.

IRRIGATION

The Sixth Annual Convention of the Irrigation Congress Now Being Held at Lincoln, Nebraska.

LINCOLN, Neb., September 29.—The Nebraska state capital will have its fill this week of irrigation and subjects relating thereto. The sixth national irrigation congress, to which nearly 500 delegates have been designated, and the fifth annual session of the state irrigation convention, for which 4,000 invitations were sent out a few months since, is now in session. The national congress convened this morning in the hall of the House of Representatives, being called to order by E. R. Moses, of Kansas, chairman of the national executive committee. As in previous years this session of the congress will be devoted to papers and discussions concerning means and methods of reclaiming the arid west and providing acres of land for the homeless. Special features of the present gathering will be an address by W. J. Bryan; a talk by Booth-Tucker, on the Salvation Army colonization of arid lands; while C. C. Wright, the author of the celebrated "California Act" after which the Nebraska law was copied, Binger Herman, commissioner of general land offices, and Ellwood Mead, of Wyoming, the first irrigation professor in the United States will also be heard.

STAGE ROBBERY

A Passenger Shot and Three Express Boxes Looted

UKIAH, Cal., September 19.—Two masked highwaymen held up the Boonville stage yesterday, and J. B. Earnett a passenger was shot and instantly killed by one of the robbers. As the stage was passing through a heavily wooded part of the road, seven miles from here, the bandits suddenly appeared and ordered the driver to stop. Barnett, who was seated on the rear of the stage, heard the order and plunged his hand into his hip pocket to secure his purse. The highwaymen thought Barnett about to draw a pistol and fired, the charge striking Barnett in the neck, killing him instantly. The robbers then secured three express boxes and disappeared. A sheriff is now trailing the outlaws with bloodhounds. If captured they will undoubtedly be lynched.

TARTE GRENIER CASE

Mr. Tarte Received a Salary as Paid Organizer and Also Other Party Money

MONTREAL, September 20.—The examination of the Hon. Mr. Tarte for the defense in the case of Tarte vs. Grenier, continued this morning. In reply to Cornellier's question, Mr. Tarte gave evidence, dealing with the charge in the article complained of, that he had lived off the Liberal party. In 1893 at Sir Wilfrid Laurier's request he took charge of Liberal reorganization in Quebec province. For this service he was to get $4,000 a year. Up to the general election of '96 he had received in all but $1,000, and he lived on his sessional indemnity, on money raised by pledging his insurance and on money obtained from the private resources of his family. The cheque handed Mr. Tarte by Premier Laurier for $1,000, was given by the Hon Louis Tourville and was passed to Tarte's sons for newspaper purposes, and the money which was intended for election purposes in L'Islet was replaced by the advance given by T. G. Shaughnessy, of the C. P. R. for printing. This money, $2,400 was given to witness' sons who reimbursed him the $1,000. In respect of the Tourville check, some sparring between Mr. Tarte and Mr. Cornellier took place, the former said he considered this a case of the blackmailing game.

SOME FORTUNES

Which Sagacious Citizens of the United States Have Made in Mining.

New York World recently published the following article, which gives some idea of the money made in mining in the States, and demonstrates the fact that legitimate mining pays:

W. M. Harriman, the vice-president of the Illinois Central, who lives in New York—although many of his most intimate friends do not know that he owns mines—has made $1,000,000 mining, principally out of the Golden Reward mine in South Dakota.

W. S. Garnee, one of the first mayors of Chicago, but who now lives in this city, has made $500,000 in the last five years mining in Colorado and Montana.

Anton Ellers, president of the Colorado Smelting Company, who lives in Brooklyn, has made out of the Smuggler Union in Colorado and out of other mines in Colorado, Idaho and Montana at least $500,000 in the last few years.

John I. Blair, who is sometimes called the fourth richest man in the United States, has made $10,000,000 mining in Candelaria, Nevada, and in Montana and Idaho.

A. Foster Higgins, of New York, president of the Mexican Northern Railway, has made $1,000,000 out of mines in Mexico.

Theodore Berdell, one of the early pioneers of Leadville, with N. Witherell, made $750,000. He now lives at Summit, N.J., and does business down town at 100 Broadway.

James Shields, father-in-law of Marcus Daly, who spends half of his time in New York, was a shift boss and Marcus Daly a mine laborer when Daly married his daughter. He has made $500,000 in mines, while Daly has made several millions.

A. S. Bigelow, president of the Boston and Montana has made $5,000,000 in mining.

Thomas Nelson has made $5,000,000 in mining.

Herbert L. Terrell, of 80 Broadway, has made over $3,000,000 in mines in Cachuahua.

It is not generally known that W. F. Havemeyer is a silver baron as well as a sugar king, but such is a fact. He estimates his fortune from the Cimarron mine at Telluride, Colorado, to be $1,000,000.

John E. Searles is another sugar king who does not confine himself to sugar. He has a son-in-law in Colorado. He showed Mr. Searles a good thing. It was. It cost Mr. Searles $2,000,000.

Oliver H. Payne, son of the late Senator Payne, deals in other things besides gas and oil. He has made fully $3,000,000 in Eulalia and Colhuahua, Mexico, where he owns two of the largest mines in that country.

Lewissohn Brothers, of 81 Fulton street, the largest handlers of copper in the world, out of their mine in Arizona, the Old Dominion, and the Boston and Montana and Butte and Montana, in Montana, have made $2,500,000.

Phelp, Dodge & Co., one of the largest metal houses in the world, have made $10,000,000 mining in the last few years.

W. A. Clark, of Montana lately, but now of this city, has made $10,000,000 out of mining, principally out of Colusa and connecting mines in Montana, and out of United Verde, in Arizona, which by several experts is called the greatest mine in North America. Last year it paid $1,500,000 in dividends. Mr. Clark's latest venture was buying the Mayflower in Arizona. In the first sixty feet he took out $100,000 more than he paid for the mine.

J. B. Haggar, whose offices are in the Mills building, has made $60,000,000 in mining, principally out of the Homestake and associated mines, which have paid millions and millions in dividends; the Anaconda, in Montana, which paid $3,000,000 in dividend last year, on a captilization of $30,000,000, with the stock at a premium of 20 per cent.; the Ontario, of Montana, which paid $13,000,000 and is still paying monthly dividends, and the Daily, of Montana, which has paid $3,000,000 in dividends. He is the principal owner in the El Oro of Mexico, and the Guanacevi, of Mexico; the former pays $30,000 monthly. Mr. Haggan is also a heavy stockholder in the Highland, of South Dakota, which has paid $3,000,000 in dividends.

Ogden Mills is directly indebted to mining for the great fortune with which he entertains so royally. He was a 49er and made at the lowest estimate $15,000,000 from the gold fields. Mr. Mills owns the controlling interest in the Alaska Treadwell—the gold mine which has the stamp mill with the largest number of stamps in the world 280; the mine which pays $25,000 dividends, and the ore of which can be treated for $1 per ton.

QUEEN VICTORIA'S DREAM.

Some of the Notable Women Who Have Graced Her Name.

If Queen Victoria could find time on her birthday (May 24) to sit down and think over the remarkable women who have lived since she first saw the light in 1819, what a brilliant list she could recall!

Among novelists there are few names as great as that of George Eliot, and the author of "Adam Bede" was born in the same year as the Queen herself. Among poets, since the tuneful Sappho sang long, long ago in Greece, no woman's name was quite worthy a place with the best until Mrs. Browning added hers to the illustrious list of the Victorian age. In science Mary Somerville and Caroline Herschel did such work as would shed honor upon any reign, and these two patient scholars, by the way, were almost centenarians, as the former was 92 when she died, and the latter was 98. The existence of such sturdy spinsters rather refutes the theory that arduous intellectual labors are wearing upon a woman's health, but the secret might be found in an avowal which Caroline Herschel made when she was 81. She said: "I never had a proposal of marriage made to me, and never had anything said to me which I could construe into one." So she was certainly unique in more ways than one! The greatest woman artist of the century is the English Rosa Bonheur, and, as she is just three years younger than the Queen, the compliments were mutual when Victoria pinned upon the breast of the gifted painter of animals the glittering cross of the Legion of Honor. The Queen possessed the prerogative of decoration—the artist had added one more star to brighten the long reign. The heroic deeds of Grace Darling were done when Victoria was still a young woman, and as maturity and then advanced age came to her there were two women within her realm whose deeds were perhaps better than those even of the distinguished poets, writers and artists. It was during the Crimean war that Florence Nightingale first established hospitals for sick and wounded soldiers, and during the late scenes of distress and disaster in Europe no one has more faithfully listened to the call of sorrow and need than has the noble Clara Barton.

Long ago the wicked Richard III lay in his tent and watched in horror the ghosts of those whom he had wronged, as they marched by in a dream. Surely if the sovereign of England sees the spirits of her reign in walking or sleeping visions they will form such a "goodly company" that she can smile in restful peace as she broods upon their greatness.—Philadelphia Record.

A New Month for Victoria

The most recent idea for the celebration of the sixtieth anniversary of the Queen's accession to the throne merely involves the changing of the calendar by dividing the year into thirteen months instead of twelve, and naming the extra one thus acquired Victoria. The genius who originated this scheme proposes that the old calendar months be reduced to twenty-eight days each, and that the month of Victoria be given twenty-nine days, leap years being arranged for as formerly by allowing February one extra day every four years. By this arrangement the calendar would stand thus:

New Calendar	No. of days.			Present Calendar
January	28	commencing	Jan. 1, ending Jan. 28	Jan. 28
February	28	"	Jan. 29 " Feb. 26	Feb. 26
March	28	"	Feb. 27 " Mch. 26	Mch. 26
April	28	"	Mch. 27 " April 23	April 23
May	28	"	April 24 " May 21	May 21
June	28	"	May 22 " June 18	June 18
Victoria	29	"	June 19 " July 17	July 17
July	28	"	July 18 " Aug. 14	Aug. 14
August	28	"	Aug. 15 " Sep. 11	Sep. 11
September	28	"	Sep. 12 " Oct. 9	Oct. 9
October	28	"	Oct. 10 " Nov. 6	Nov. 6
November	28	"	Nov. 7 " Dec. 4	Dec. 4
December	28	"	Dec. 5 " Dec. 31	Dec. 31

The innovator points out that he puts in the month of Victoria between June and July, because he is thus able to bring in eighteen anniversaries of importance to England in the twenty-nine days. Thus the new month would begin on the anniversary of the battle of Waterloo, June 18 being the old date, the second Victoria would be the anniversary of the signing of Magna Charta; the third, that of the Queen's accession; the fourth, of her proclamation as Queen, also of her Jubilee of 1897, the fifth, of the Diamond Jubilee; the sixth, of the birth of a possible king, the Duke of York's eldest son; the seventh would be midsummer day; the eighth, the anniversary of the repeal of the Corn laws, and the eleventh, that of the coronation of Queen Victoria, and so on.

A Dignified Retort.

Blaikie often told "on himself" this anecdote, which seems to indicate that personalities are not agreeable, even to those who deserve criticism.

This genial old professor used to form a very picturesque feature in the Edinburgh streets. He was a wiry old patriarch, with handsome features and hair falling in ringlets about his shoulders; no one who had seen him could possibly forget him.

One day he was accosted by a very dirty little bootblack with his "Shine your boots, sir?"

The professor was impressed by the filthiness of the boy's face.

"I don't want a shine, my lad," said he; "but if you'll go and wash your face I'll give you sixpence."

"All right, sir," was the lad's reply. Then he went over to a neighboring fountain and made his ablutions. Returning, he held out his hands for the money.

"Well, my lad," said the professor, "you have earned your sixpence. Here it is."

"I dinna want it, auld chap," returned the boy, with a lordly air. "Ye can keep it and get your hair cut."—Youth's Companion.

According to the New Brunswick papers, the Scott Act is making a lot of money for the Moncton lawyers, but "the average citizen has no difficulty in getting all the favorite beverages." A decision has just been given by Judge Hanington, under which it is claimed all prosecutions are dropped. The Judge took the view that as the fines levied under the Scott Act go into the city funds, the magistrates, who are ratepayers, are interested parties, and therefore disqualified. So there is no one to try the offending liquor sellers, and the "favorite beverages" are supplied even without the subterfuges which the Scott Act has rendered usual in some places.

PEOPLE ARE ON MARS.

PROF. LOWELL ANNOUNCES THE CONFIRMATION OF THE THEORY.

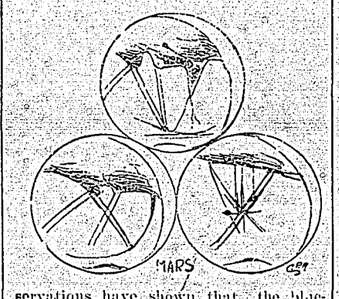
Results of His Recent Investigations Under the Clear Skies of Arizona—The Peculiarities of Mars—His Arizona Deductions Confirmed in Mexico.

Mr. Percival Lowell, who has recently returned to Boston from Mexico, has made some discoveries of great interest regarding the planets Mars and Venus. The observations of the planets made at the Lowell observatory, in Arizona, were confirmed and enlarged upon by the recent observations in Mexico. The results are of special significance to dwellers on the earth, because in the solar family circle Venus and Mars, on either hand, are the nearest neighbors to our own planet. As the life of the planets is believed to pursue the same general course, it follows that we can learn much from a study of their conditions about the past and future, the history and the destiny of our earth.

Mars is in many respects the most interesting object in the solar system. Its phenomenal brightness when nearest the earth has attracted the gaze and excited the imagination of men of all ages, while the beautiful coloring which the telescope discloses to observers has made it the more admired the better it has been known.

Its general conditions are more like our earth than those of any other planet. Its day is about forty minutes longer than ours. It has four seasons like our own, though the greater eccentricity of its orbit and the slightly greater inclination of its axis accentuate its seasons, giving it a colder winter and a hotter summer.

Mars has an atmosphere slightly less dense than our own. This serves to keep the surface at a mean temperature above that of the earth. We know this because, while Mars shows polar caps like our own planet, these melt off in the late summer very much more than on the earth. The presence of polar snow indicates that there is water on the surface of Mars, but these last observations at Flagstaff and Mexico have shown that there is almost no water on the planet, visible as such—that is, in the form of lakes or oceans or seas. The observations have shown that the blue-green patches formerly supposed to be water are, in reality, tracts of vegetation.



We know this for the following reasons:

First—They are not of the same tint throughout the whole Martian year.

Second—They are darkest just at the season when vegetation would be most luxuriant, and lightest when it would be most in decay.

Third—They undergo a process of transformation.

So soon as the polar snow has begun to melt, its retreating edge is surrounded by a dark blue belt which follows it as it goes back toward the poles. This is apparently the only body of water visible to us.

As soon as the melting of the snow is well under way—a phenomenon which occurs as on the earth in the late spring and early summer—the blue green areas in its neighborhood darken and continue to darken for a couple of Martian months. Then as autumn advances they proceed to fade out, owing, as it is believed, to the falling of the leaves.

At the same time throughout the rose orange parts of the planet, which are undoubtedly great desert tracts, the so-called "canals" make their appearance, and then gradually darken, just as the other blue-green areas did, and they themselves are also apparently of a blue-green tint.

This is not all. As the large blue-green areas lighten, canals make their appearance through them also, showing conclusively that they are not oceans, but tracts of vegetation. These canals in the dark region connect directly with those in the light one, and with others that run straight up the snow. This makes a complete chain to conduct the water from the poles to every part of the planet.

Now, such a marvelous system as this appears to be cannot well be due to any natural forces, and finds its best explanation in the presence of local intelligence on the planet, which has purposely created a system of irrigation for the perpetuity of its own existence.

Such is Mr. Lowell's theory, as it was enunciated after the discoveries at Flagstaff.

The theory has been confirmed by the observations at Mexico. It has there been seen that the north polar cap passes through exactly the same course in its melting, and gives rise to the same curious system of inundation that the south pole does. It, too, has canals that run right into its snow and then over the surface of the planet.

The canals also pursue the same course they were observed to do at Flagstaff in 1894 in the matter of their development. What was anticipated and what came to pass just as was anticipated was the curious doubling of the canals. At first a canal will appear single, and this continues to be its appearance through the earlier part of the Martian season. Then it gradually proceeds to "twin," that is to say, in place of one canal it shows two canals absolutely parallel and of the same width throughout their length. They have the same association that we see in the twin rails of a railroad track.

In 1894 at Flagstaff the beginnings of this curious gemination were observed much and chronicled, but this year in Mexico the Martian season was much further advanced, and the doubles came out in great quantity. Some appeared in a way to show that they were in a way connected with melting at the south pole, while others were connected with the north pole. They are from thirty-five to forty miles wide.

The spots seen where the canals cross came out again in this year's observations just as in 1894. These so-called "oases" are very curious markings. They occur only at the junction of the different canals, and, if the telescopic power is strong enough, appear always at these junctions. As they show the same characteristics of the canals, they are, probably, like them, vegetation. They are about 150 miles across.

What such tracts of vegetation enclose we do not know. They may be centres of population. This is the most probable supposition, for it is to them that the canals run.

Prof. Lowell's observations of Venus show that she has no day.

WONDERFUL FORECASTS OF ATMOSPHERIC CHANGES BY THE BRUTES.

Some Living Barometers and Wherein They Surpass the Most Ingenious Mechanisms Invented by Civilized Man.

Civilized man is the only animal that does not possess a high degree of sensitiveness to atmospheric conditions. Whether the human race has ever possessed this attribute, it would not be easy to say, but from the fact that brutes possess this faculty in direct proportion to their wild or natural condition, it may be inferred that though attaining a sheltered and perfectly housed condition human beings have lost the useful faculty of foretelling the weather, according to the law of nature, that removes any attribute after the necessity for it has ceased. Thanks to Torricelli, this deficiency has been, to some extent supplied, but the fact remains that other living creatures have the power of making forecasts that are far more trustworthy than any the ingenuity of man has yet been able to devise.

The spider is a good example of a living barometer. He is constantly making alterations in his web to suit the weather, and, by watching closely, considerable skill in weather prophecy may be acquired. In fair weather he runs out long filaments of guy ropes for his web. The coming storm causes him to shorten these. If the storm is to be long and severe thes guy ropes are strengthened as well as shortened.

For the benefit of those whom nothing could induce to study the spider, it may be remarked that the common domestic animals evidence coming changes in the weather. Cats and dogs are given to scratching and other restless movements, and their fur looks dull when a storm is approaching. It is a sure sign that the barmometer is falling when a flock of sheep become quarrelsome; when goats bleat incessantly and seek sheltered spots; when pigs begin to carry straw into the sky; when the barnyard fowls huddle together and fill the air with their cackling.

An observer of the wilder animals will soon realize that they are still more demonstrative when a storm is approaching. The hedgehog is very distinguished as a weather prophet, for he always begins to strengthen and fortify his house when he feels an unpleasant change in the weather coming. The wild birds are, probably, the best objects for observation. The low flying swallow has become proverbial. Other birds generally remain grouped together and do not venture from their homes in the face of coming wind or rain.

There have been several successful attempts to make profitable use of these remarkable and unfailing instincts. In many parts of Germany the "frog barometer" is a common object in the home. They have a small green frog in that country, which always comes out of the water when cold or wet weather is approaching. These frogs are kept in half filled jars in which is a tiny ladder. Some hours before the storm the frog will come out of the water and sit on the top of the ladder, where he will remain until the storm has broken. There is a story of an old meteorologist who used leeches for the same purpose. He arranged his barometer in such a way that when the leeches crawled up the side of the jar a bell would ring, and this gave warning of the storm. The little creatures would gather around the top as long as the storm was in progress.

Well Said If Not Well Meant.

A man of distinction who came to the Postal Congress is Mr. Chang Yen Hoon, who was Minister Plenipotentiary from China during the Harrison Administration. At that time the legation was in Stewart Castle, and many and elaborate dinners were given to the denizens of the republic by the then Chinese Minister, who, however, kept the women of his household well in the background.

At his first large reception the Minister was coached by one of his American friends as to the etiquette of the occasion. He was told that the guests in passing out would all say they had had a very enjoyable evening, and he must say, "I am very glad."

It went very well until a tipsy official came along and varied the order by saying boisterously, "Well, I must go now."

The Minister was ready with his "I am very glad," and he said it as if he meant it.—Chicago Tribune.

Excessive Enterprise.

"I guess," remarked Farmer Hornbeak slowly, "that I admire enterprise as much as anybody does, but I am kinder of the opinion that it can be carried to excess. Even a good thing can be run into the ground, you know."

"What are you referin' to, Ezra?" asked the wife of his bosom.

"Why, you know when that tract society up in the city sent out a man to paint religious signs all warnin's on the barns an' rocks, he inscribed the question in red paint everywhere: 'Do you want to be saved?' Wal, now, I see that another painter, workin' in the interest of a patent medicine concern, has jest been over the same ground an' added beneath each question this answer, in letters a foot long: 'If so, take Pritchett's Peculiar Pills!' That may be all right, but blamed if it don't look to me like enterprise carried to the point of offensiveness."

LOCAL AND GENERAL NEWS

An Interesting Budget of Local, Personal and General Items Round and About Revelstoke.

NOTICE TO SUBSCRIBERS

Subscribers to the Herald who do not receive their paper promptly and regularly by carriers will confer a favor by letting us know at once.

Johnson & Pettipiece.

Watch for Pippy & Wright's lumber ad. in our next issue.

10 tons of cabbage for sale this month at 1 cent per lb. R. Tapping.

Mr. W. M. Brown of the Columbia, returned from Victoria this morning.

Stevenson & Co.'s stock is new and up to date, and prices right.

If Geo. B. Lake or Geo. Black will call at this office he will hear of something to his advantage.

Mr. John Grant and Mr. Otto Abeling registered at the Hotel Revelstoke from Albert Canyon on Monday.

The latest novelties in dry goods and men's furnishings at Stevenson & Co.'s. J. F. Doyle, manager.

Mrs. A. N. Smith will return from her visit to friends in Methuen, Man., on tomorrow evening's No. 1.

All the latest things in the drug and stationery line can be had at the *Canada Drug & Book Co.'s store.*

Newest and best value in dry goods and trimmings in town at Stevenson & Co.'s, Union Hotel Block.

Capt. Robert Sanderson has put the Marion on the Kootenay lake. Next year she will be put on the Duncan River run.

We are here to stay, so come with the crowd. No trouble to show goods at Stevenson & Co.'s. J. F. Doyle, manager.

Mr. W. White, of the firm of White & Sibbald, has passed his examination for admittance to the bar of British Columbia.

Mr. John C. Ferguson came in this morning. He is starting immediately on a trip up to Ground Hog Basin to inspect progress on the Ole Bull mine.

Mr. J. I. Woodrow had to be taken up to the hospital suffering from an attack of sciatica on Monday. The Herald hopes to see him round again before long.

Sam. Livingstone, an old timer in Calgary and miner and prospector well known throughout the western states and territories in the early days, died on Monday last.

The Slocan Pioneer announces that a grand combined amalgamation consisting of Sir Charles Tupper, Sir Mackenzie Bowell and Major Walsh, of all people in the world, is to visit the rising camp at the foot of Slocan lake.

The Consolation Mining Company is to start work again this week. The recent fire at the mine was caused by one of the partners who had a contract for sharpening tools for the French Creek Co. and was working at them in the blacksmith shop at the Consolation. The claim will be worked all winter.

Mr. Langstaff, who is going to put a paper in Trout Lake City, was in town yesterday soliciting advertisements for the new journal. It will be a four page, five column sheet and will be known as the Trout Lake Topic. The building for the office is built and the plant is on the ground and the paper will make its bow next week. It will be a weekly publication. The Herald wishes the newcomer every success.

Don't forget to leave your orders for fashion books and magazines with the Canada Drug & Book Co., Limited, Revelstoke Station, B. C.

The Revelstoke City Directory and Map of Townsite is now in the hands of the printers. With the exception of the map the whole work will be done in the Herald job office. It has been freely patronized by the business men of Revelstoke, and those desiring to "get in on it" should, without delay, communicate with R. Parni Pettipiece, Herald office.

See our men's and ladies' underwear, iron clad wool hose for boys, any size, only 25 cents a pair at Stevenson & Co.'s. J. F. Doyle, manager.

News of the death by drowning of ex-Mayor Cope of Vancouver, while fording a creek on the Skagway trail has been brought to the Terminal City.

Mr. W. H. Cushing, the well known proprietor of the Calgary Sash & Door Factory, is in town today on a business tour, which will take him as far as Sandon.

Mr. G. J. Atkins, of the French Creek Co., came down from Big Bend last night and went out by the No. 2 train this morning, being summoned away by the news of the death of his father in Indiana.

With reference to a quotation on the price of Mr. Tapping's cabbages, which appeared in our last issue, at 10c. per lb. Mr. Tapping wishes us to state that he is willing to knock off 9 cents from that figure for cash.

The Vancouver World says that the Mining Record office is to be removed from New Denver to Sandon. In that case the whole Ledge is liable to run out into the Paystreak before long.

John C. Garvin of Denver, Col., has invented a process for handling the Saskatchewan black sand by a bromide solution after roasting, which he claims will only cost $2 or $3 per ton.

Mr. Percy Chapman, manager for A. Macdonald & Co., returned from his trip south on Sunday. He found business good, the silver districts rather quiet but the gold producing sections improving.

As a proof of what can be done in the horticultural line in Revelstoke Mr. R. Somes has laid on the Herald table an early Puritan potatoe, 9 inches long, weighing 2 lbs. 6 oz., which was grown in a garden on the far side of the station.

The Nakusp has been jacked up and a dam built round her stern. Ways will be built under her, and she will be relaunched. She is being repainted and thoroughly overhauled. She will be ready for launching some time next week.

Owing to the accumulation of freight at Arrowhead the Trail will make two additional trips between Trail and Arrowhead every week on Saturdays and Wednesdays and will only make two trips to Northport a week on Tuesdays and Fridays.

Raymond Allen has not yet recovered from the effects of the axe cut he gave himself on the foot up in the Big Bend some time ago. The heel was nearly severed from the rest of the foot. J. H. McFarlane is with him, looking after him.

The Kootenaian reports a find by E. A. Otto and W. White on the north fork of the Lardeau, six miles from Ferguson. The ledge shews concentrating ore carrying silver, lead and some gold. It is a contact of schist and limestone. The partners will build a trail and cabin preparatory to working the claim.

Gus Lund was down to within 3 feet of the bottom of the 60 foot shaft on the Ole Bull last Thursday. The shaft was started on the lead and has disclosed a good body of free-milling ore, in which gold is plainly visible. The lead has, however, dipped away from the shaft slightly. There has been a good deal of trouble with water and bad air in the shaft.

Messrs. R. Howson & Co., the well-known furniture dealers on Mackenzie Ave., are making great alterations and improvements in their store. The show room has been enlarged by running the partition at the end back, till there is a fine room 50 feet long for the display of the firm's handsome stock of sideboards, tables, chairs of all kinds, bookcases, bureaus and every imaginable article for furnishing a comfortable home. The show room has been newly painted and papered, greatly adding to its appearance and helping to set off the stock. At the end of the store are two cabinets for coffins. At the back a room is being arranged for a mortuary chamber, in which, if necessary, a dead body can be placed waiting burial. Another room in the back will be used for the display of upholstering goods, curtains, etc. Behind that again is the workshop and a room for Mr. Laing, the manager. Above is a warehouse for chairs and light articles of furniture. The firm find their business greatly increasing and feel they are quite warranted in launching out to meet the requirements of this rapid increasing town.

Last Sunday night an accident occurred at Notch Hill, which although fortunately not attended with loss of life or injuries, yet delayed traffic for several hours on the main line. An eastward bound freight was coming down the grade this way with two engines on, when the train broke in two places. The centre section, being entirely out of control ran on after the first part of the train and gathering momentum with every foot of slope, soon crashed into it, being closely followed by the rear section, which completed the smashup, wrecking two cars entirely and knocking five others off the rails. A wrecking train at once left Revelstoke for the scene of the accident, but the Atlantic express was delayed 7 hours, and did not arrive here till about 4:30 p. m. It is supposed the break in the train occurred in pulling out of the siding at Notch Hill station. The only person hurt was Brakesman Agnew, who was on top of one of the telescoped cars at the moment of collision. Fortunately he escaped with his head bruised and scratched and a wrench to his shoulders, and is very thankful for getting off so easily.

CONVINCED THE SCEPTIC

The Merits of the Great South American Nervine Withstand All the Assaults of the Credulous and Sceptical—When They are Converted to its Use in Their Personal Ailments They Become Its Best Friend—For It Never Fails Them

Mr. Dinwoodie, of Campbellford, Ont., says: "I recommend South American Nervine to everybody. I consider it would be truant to the best interests of humanity were I not to do so. In one instance I convinced an avowed sceptic to all remedies of its curative powers; he procured a bottle, and it has been of such benefit to him that he continues to purchase and use it, and has proved its great worth as a stomach and nerve tonic. It has done wonders for me and I keep it constantly in my house. An occasional dose acts as a preventive and keeps me well and strong. It is wonderful medicine." Sold by Canada Drug & Book Co.

LIKE SUFFERERS ONLY KNOW

R. Scriver, Carpenter, of Hastings, Was a Great Sufferer from Kidney Disease—South American Kidney Cure Effected a Quick Cure—It is a Specific Remedy for a Specific Disease—It Dissolves and Eradicates All Solid Matter From the System—Is Safe and Permanent

For many years I have been troubled with kidney disease, necessitating the taking of much in the way of remedies. Two years ago they became so bad that I had to seek the aid of a physician. My urine was more like blood than anything else, and was very painful. Just at that time I began using South American Kidney Cure. It gave me immediate relief, and from that time till now I have had no difficulty. I can safely and honestly recommend this great remedy to all persons suffering from kidney trouble. Sold by Canada Drug & Book Co.

Piles Cured in 3 to 6 Nights.—One application gives relief. Dr. Agnew's Ointment is a boon for Itching piles, or blind, bleeding piles; it relieves quickly and permanently. In skin eruptions it stands without a rival. Thousands of testimonials if you want evidence. 35 cents. Sold by Canada Drug & Book Co. 7

Pill-Dosed.—With nauseous, big purgers, prejudices people against pills generally. Dr. Agnew's Liver Pills are revolutionizing the pill demand—they're so pleasant and easy to take. The doses are small and so is the price—20 cents for 40 doses. Biliousness, sick headache, constipation dispelled. Work like a charm. Sold by Canada Drug & Book Co. 8

A Magical Life Saver is Dr. Agnew's Cure for the Heart. After years of pain and agony with distressing heart disease, it gives relief in 30 minutes. Thos. Petry, of Aylmer, Que., writes: "I had suffered for five years with a severe form of heart disease. I was unable to attend to business. The slightest exertion produced fatigue. Dr. Agnew's Cure for the Heart gave me instant relief, four bottles entirely cured me." Sold by Canada Drug & Book Co. 9

When buying a Cook or Heating Stove

Why not buy the Best?

We sell only such stoves as we can guarantee. If you want to have stoves that you know your great-grandchildren will warm their toes at, buy a "Gurney." A cook stove to be durable must have weight; we mark the weights on all our stoves. A stove to please your wife must be a work of art; no expense is spared in the decoration on our heaters. A stove to give universal satisfaction must perform the duty assigned to it without inconvenience to the owner and with economy in the use of fuel; in this respect our Souvenirs stand unrivalled in the world today. Then, brethren,

Oh! think of the stove over there,
A model of beauty and grace;
No stove in the world will compare
With the stoves we have in our place.

W. M. LAWRENCE,

Sole Agent for the Gurney Stoves, Revelstoke Station, B.C.

R. S. WILSON'S TAILORING EMPORIUM

WE HAVE NOW THE MOST COMPLETE LINE OF SUITINGS, Overcoatings and Pantings ever placed before the trade, which we will make up to please the customer. We use the Excelsior fashions which we receive every month from Chicago and New York, with latest styles and designs in dress, and are the most complete designs published in America. With this and our new workman, who can compete with the world, we are able to give satisfaction to any who will favor us with an order.

In addition to our Tailoring we have a complete line of Ready-made Clothes, Suits, Overcoats, Pea Jackets, Pantings and Boys' Clothing, American and Canadian manufacture. Being Tailors we are able to select the best wearing material for the money, and by putting a tailor's stitch in the buttons, pressing out the wrinkles and making any alterations that are necessary, our Ready-mades are rendered equal to Eastern ordered Clothes. We sell for cash, thus being able to make our prices low.

Give us a trial order. Mail Orders promptly attended to.

R. S. WILSON, Merchant Tailor, Revelstoke Station, B.C.
