EIGHTH YEAR. NELSON: FRIDAY MORNING OCTOBER 26 1900 PRICE FIVE CENTS

TO PENETRATE THE HUMAN FRAME

A Thoroughly Equipped Roentjen Ray Machine is Now in Operation in Nelson.

AN INTERESTING DESCRIPTION OF ITS POSSIBILITIES

The latest addition to the agencies possessed by the medical fraternity in Nelson for successfully overcoming disease is a Roentgen or X-ray machine recently set up in the office of Dr. D. LaBau. The invention of X-rays has revolutionized the treatment of certain classes of cases and afforded the physician a means by which he can examine the bones of a patient as readily as he can read the symptoms discernable on the cuticle, and during recent years the discovery has been widely adopted with splendid success in the practice of surgery. The introduction of the machine into Nelson has created great interest and among others several patients from the general hospital have been treated by means of the X-rays.

Dr. LaBau's machine is known as the Static machine. The electrical current is generated by sixteen insulated plate glass disks enclosed in a glass case. Eight of these disks, each 27 inches in diameter, revolve on an axle, the power for this purpose being obtained from an electric motor. The remaining eight disks, each 30 inches in diameter, are stationary. The interior of the cabinet is kept free of moisture and a cushion of dry air lies between the disks. When these are set in motion this effect is to produce a current of electricity of 2,500,000 volts. The current thus developed is carried through heavily insulated wires to the Crookes tube, which is the final stage of the operation. The tube has a four or five inch globe from which all air has been excluded in manifacture and contains platinum wires leading from either end to disks of the same metal. The disks are several inches apart and the X-ray is produced by using a current of sufficient voltage to pass from one platinum disk to the other through the intervening vacuum. When this is accomplished the glass globe of the tube becomes incandescent, presenting the appearance of a ball of olive green light. The machine is placed in a dark room and can be used directly or for the purpose of photography. An essential to the use of the X-ray for direct examination is the fluoroscope. This is a pyramidal box open at the apex and closed at the base with a sheet of pasteboard covered with barium-platino-cyanide. If a hand, for instance, is to be examined it is placed about ten inches from the Crookes tube, the fluoroscope is held before the eyes with the hand between the tube and the instrument. The bones of the hand can then be seen as distinctly as would be the case if the bones were denuded of every particle of tissue and exposed to the eye under ordinary circumstances. Should there be a ring on the hand or any body opaque to the ray, such as metal, etc., it stands out prominently and can be located accurately.

The second method of utilizing the X-ray is by photography. This is done by means of an ordinary photographic plate within a wooden plateholder. The portion of the body to be photographed is placed on the plate and the tube adjusted at a proper distance above. The exposures range in duration from a fraction of a moment to an hour according to the thickness of the portion of the body to be photographed. The photographic plate is more sensitive than the eye and will record impressions which would otherwise escape observation.

The apparatus without the Crookes tube is used extensively for therapeutic purposes. The current is under the absolute control of the operator and in any event would not be fatal even at full strength.

Since installing the X-ray machine Dr. LaBau has conducted a number of interesting experiments. The penetrating power of the ray is almost beyond belief, as will be realized when it is stated that on one occasion a wooden case two inches thick, containing surgical instruments, was used for experiment. Between the case and the fluoroscope was placed a book four inches thick and three inches of oak. Viewed through the fluoroscope, book oak and case became invisible, nothing being in sight save the metal instruments within the box.

In one instance a miner consulted Dr. LaBau with regard to a chip from a wedge which had lodged in his leg some years ago and could not be located. An application of the X-ray rendered the splinter visible and it was extracted without trouble. In examining fractures, etc., the condition of the bones is revealed as plainly as though the flesh was taken away.

Mining Records.

Yesterday's mining records were: Locations—The Caledonia, ten miles west of Nelson and two and a half miles north of Kootenay river, by Weldram Moore; the Ashland, same location, by J. C. Hooker; the Great East, same location, by C. P. Coon; the A, four and a half miles southeast of Nelson on the east side of the N. & F. S. road; the Princess Fraction, on the north fork of Beaver creek, by Joseph Caron; the Black Prince and British Chief, same location, by Joseph Caron; the Standard, on Yellowstone mountain by H. McAlpin; the Venus Fraction, on Hall creek, by Frank Lassley; the Copper Chief, on Ninemile creek, eight miles from Kootenay lake, by H. C. Stewart; the May A., three miles north of Deer Park, by William Parker.

Certificates of work—To Roderick McLeod on the Invincible and Major, to O. A. Lovell on the Goodenough Fraction, to Alfred Bunker on the Royal Charter, to E. D. Rinear on the Cracker Jack.

Found Dead.

INDIANAPOLIS, October 25.—Leole Wilhelm was found murdered today on the west bank of White river, in the heart of the city. Apparently she had been strangled and robbed. John Wilhelm, husband of the woman, John Maladay and Felix Robbins have been arrested.

Union Men Walk Out.

QUEBEC, October 25.—There is trouble on again between the Quebec shoe manufacturers and the men. It grew out of the refusal of a union man to work for weekly wages instead of piece work. He was discharged and a non-union man engaged. As a result all the men in the factory went out. The manufacturers' committee thereupon decided to shut down until a better understanding is obtained. About thirty factories and a thousand men are involved.

Fixed a Wage Scale.

PITTSBURG, October 25.—The National Association of Bridge and Structural Iron Workers, in session here today, adopted a universal wage scale, fixing the rate of wages at 50 cents an hour, with eight hours a day's work. The scale will go into effect next May. It was also decided to send an organizer to South Africa and Egypt to organize structural iron workers in those countries.

Preacher Went Wrong.

DELHI, New York, October 25.—Lyman S. Brown of Liberty, formerly a Methodist preacher, was found dead this afternoon in his room at the Central Hotel. He had evidently taken laudanum. There was a complaint against him for forgery before the grand jury now in session, and it is supposed he feared an indictment by the grand jury.

Takes a Pessimistic View.

LONDON, October 26.—Sir Robert Hart, director-general of the Chinese imperial maritime customs, in an article in the November number of the Fornightly Review, takes a pessimistic view of the Chinese situation. He frankly declares his opinion to be that the Boxer movement is national and patriotic, has taken hold of the Chinese imagination and will spread like wildfire throughout the length and breadth of the empire. "There is not the slightest doubt," he says, "that fifty years hence there will be millions of Boxers in serried ranks and war's panoply at the call of the Chinese government."

Discussing the alternative course open to the powers, sir Robert sees a very real "yellow peril" ahead and no hope of a permanent solution.

The morning papers, dealing editorially with sir Robert Hart's article, admit its importance, but considers that his views are too gloomy and that his ideas of the Boxer movement are a phantasm of a too sensitive imagination.

Got Double Price.

COPENHAGEN, Denmark, October 25.—Dr. Hanzen, who was a member of the Estrup cabinet in which he held the portfolio of war, is now being sharply attacked by the Liberal and Radical papers because while minister he obtained 140,000 kroners from the national invalid fund by mortgaging his estate which has recently been sold for only 70,000 kroners.

IT IS STILL IN ABEYANCE

JUDGE WALKEM RESERVES HIS DECISION.

Case of McKay vs Phillips, in Which Much Interest Has Been Taken By Mining Men.

The case of McKay vs. Phillips was closed at the courthouse last night, Mr. justice Walkem reserving his decision. Another interesting feature of mining law was evolved during the sittings which cropped up for the first time in a Nelson court. When the session resumed yesterday morning his honor announced that after considering the objections raised by R. W. Hannington, counsel for the defence, he had decided to uphold the defendant's contentions generally and that relating to lack of proofs of measurements in particular. The plaintiff was therefore non-suited. Under the former procedure this would have settled the matter finally, the defendant's title being regarded as established through the failure of the plaintiff's case. Recent amendments to the Mineral Act, however, place the onus of establishing his own title upon the defendant in addition to defeating the attack made by the plaintiff. Evidence was submitted during the day to establish Philips' title, and the judgment on this point will be handed down later.

The Surprise mineral claim involved in the suit is regarded as a valuable location. It was one of a group in which Nelson men are interested, bonded to a syndicate at $10,000. The deal is understood to be hanging fire pending the result of the litigation.

Deserved Promotion.

The friends of lieutenant V. L. Beer, R. G. A., at Victoria, will be glad to hear of his recent promotion to the rank of captain, and also of his selection for colonial employment to fill the appointment of commandant of the permanent garrison at Albany, West Australia, made vacant by the death of captain H. G. Moor, R. A., who was killed in action in South Africa, whilst employed with the West Australian contingent. Captain Beer graduated from the Royal Military College of Canada in 1894, and was posted to this station last year.

Shipping Disasters.

ST. JOHNS, Newfoundland, October 25.—The British steamer Alamanea, captain Anderson, from Philadelphia and bound to Glasgow laden with grain, put in here this afternoon with leaky decks. The vessel will be delayed about 24 hours repairing.

Four vessels from Oporto, laden with salt for the local fish trade, have been reported as lost, having been out over 60 days.

Fell on a Lamp.

ELMIRA, New York, October 25.—Mrs. George Abbey of Woodhull, aged 55, fell upon a lighted lamp which she was carrying last night and was burned to a crisp.

COULDN'T LOSE THE COUNT

EXCITING SCENE ON STEAMER LEAVING NEW YORK.

A French-Italian Nobleman Didn't Want His Wife to Escape Him and Swam After Her.

NEW YORK, October 25.—The passengers on the Hamburg-American line steamship Kaiser Friedrich, which sailed today for Cherbourg and Hamburg, witnessed an exciting scene just after the steamer had put out from her dock. A woman with a maid had hired a stateroom on the vessel and they were on board when she sailed. As the ship left the dock this woman was seen to make signals to a man who was standing at the end of the pier. As soon as the man observed the signals he boarded a tugboat which was lying on the other side of the dock with steam up, and ordered the captain to follow the steamer, remarking that he would pay him well for his trouble. The tugboat put out at once in pursuit of the steamer, which was now in midstream, and soon ranged up alongside her. As soon as it had done so the woman who had made the signals and her maid came down a rope ladder and were received aboard the tug. They had hardly reached the tug when a man jumped overboard from the steamer and landed on the deck of the tugboat. This man was count Michonoy, a French Italian. He said that the woman was his wife and that she was trying to escape from him. It was learned from the woman's brother-in-law, the man who followed the steamer on the tug, that the count and countess Michonoy were married in Hackensack three months ago against the wishes of the woman's family.

Ever since her marriage, according to the brother-in-law, she had to support her husband. When the count landed on the tugboat the captain of the vessel threatened to throw him overboard, whereupon the count drew a revolver and dared the captain to carry out his threat. Finally, the captain steered for the New York shore and landed. Here the sergeant at the harbor police station was called upon and he, it is said, compelled the count to leave the tugboat. The boat then put back to Hoboken.

The brother-in-law stated that the countess would institute proceedings to secure a divorce.

SENT A SPECIAL BLESSING

Mgr. Franconio's Visit.

The visit of monseigneur Franconio to Nelson yesterday was an event of very special interest to every member of the Roman Catholic faith. His excellency spent the entire day here, met many of the members of his church and departed leaving a very pleasant impression behind. The apostolic delegate traveled without ostentation. He was attended only by his secretary, father Fisher, and was accompanied by bishop Dontenwill who remains with him until the limits of the bishopric of British Columbia are reached. The distinguished visitor was met at the depot by fathers Ferland and Cote. During his stay he was a guest at the parsonage where a number of citizens called to pay their respects. Yesterday afternoon Mgr. Falconio was taken over the Hall Mines smelter with father Ferland and R. Kerr. The party was piloted by J. J. Campbell who explained the process of smelting at length.

Last night a most interesting service took place at the church of Mary Immaculate. After the usual benediction a delegation consisting of T. J. Scanlan, R. Kerr, Martin O'Reilly and J. O. Patenaude presented an address to his excellency, assuring him on behalf of the Catholics of Nelson of the honor his visit conferred and of their love and reverence for the head of the church, pope Leo. The hope was also expressed that his holiness might speedily become reinstated in his rightful position as temporal ruler of the holy city. Mgr. Falconio's response was received by the congregation standing. He referred eloquently to the unity of the Catholic church throughout the world, and after enlarging on this idea at some length gave expression to the great pleasure it afforded him to see Nelson's handsome church and the convent now in course of erection. These facts assured him that the Catholics of Nelson were doing all in their power to follow the directions of the church and to rear their children in the love of God and country. His holiness pope Leo appreciated the devotion of Canadian Catholics, and had sent them a special blessing. Mgr. Falconio then dispensed the papal blessing, a ceremony of marked solemnity.

Sharkey Won't Fight.

NEW YORK, October 25.—Tom Sharkey today made a public answer to Tom O'Rourke's challenge in behalf of Joe Walcott. Sharkey declines to meet Walcott.

To Go to Ireland.

DUBLIN, October 25.—The Evening Herald revives the report, which it is asserted is well founded, that the duke of Marlborough will succeed earl Cadogan as lord lieutenant of Ireland.

A CHEERFUL PROCLAMATION

"RIP THEM OPEN AND DISEMBOWEL THEM."

Such Is the Edict Issued by the Boxer Leaders to Their Fanatical Followers in Lien Chu.

CANTON, October 25.—The Chinese officials have placarded the Shetom district, offering several hundred dollars reward for the heads of four foreigners who are supposed to be leading the rebels.

The rice crop has failed in Kwang Si province and robbers are pillaging. Rebellion and famine there are certain.

To Drive Out Foreign Devils.

HONG KONG, October 25.—Advices from Lien Chu on the north river say that the American mission property there is threatened with destruction by Boxers, who have posted the following proclamation: "We have organized to protect our property and our homes and we rely upon one another to support the order to drive out the foreign devils. They are mad, their folly passes description. They are the usurpers of our land. They disturb our borders. In all the provinces and prefectures chapels have been opened and our people are deceived, while the foreigners grow fat on the revenues of China, insulting our officials and merchants and seizing our temples and palaces. Rip them open and disembowel them.

"The emperor is indulgent and permits this. Who can fortell the intentions of the foreign devils. Day by day, they act more outrageously. When we behold the present condition of affairs, our hearts are bruised with grief. Therefore we have organized our strength to destroy the devouring wolf throughout the empire."

The Boxers took the American Presbyterian mission buildings, but have not destroyed them. The rebellion is spreading along the East and North rivers in the province of Kwang Si. It is supposed to be aimed at the overthrow of the Manchu dynasty, but the reports are so contradictory that it is next to impossible to tell what is intended. In Canton the Chinese officials are taking the insurgents so lightly that the foreigners believe it will be very difficult to suppress.

Has Occupied the Town.

LONDON, October 25.—The following dispatch from general Gaselee, commander of the Indian troops at Pao Ting Fu, has been received by the secretary of state for India, lord George Hamilton: "Pao Ting Fu, October 20.—The allied troops under my command arrived here yesterday. British, German, French and Italian guards have been posted at the gates. Today all the generals with small escorts went through the town, after which they arranged for the allotment of quarters for occupation. I shall keep most of the British in camp for the present. Am awaiting orders from Waldersee regarding their future disposition."

THE GREAT STRIKE ENDED AT LAST

President Mitchell Declares It Off and Instructs the Men to Resume Work.

A FEW OF THE CORPORATIONS ARE STILL OBSTINATE

HAZELTON, Pennsylvania, October 25.—The mine workers strike has been declared off against all companies which have agreed to the miners' demands.

HAZELTON, Pennsylvania, October 25.—The following statement was given out for publication by president Mitchell, of the United Mine Workers: Temporary headquarters, United Mine Workers of America, Hazelton, Pennsylvania, October 25.—To the miners and mine workers of the anthracite region—Gentlemen: After carefully canvassing the entire strike situation, we, your officers, district and national, have concluded that your victory is so nearly complete that no good end can be served by continuing the strike longer. The contest has been in progress for thirty-nine days and the companies employing you, have, with few exceptions, signified their willingness to pay the scale of wages formulated by the Scranton convention of October 12th and 13th. We are aware that some disappointment and dissatisfaction has been caused by the failure of the operators in district 1 and 7 to separate the reduction in the price of powder from the advance in wages, but after careful inquiry, we are satisfied that each mine employee will actually receive an advance of 10 per cent on the wages formerly paid.

In the Schuylkill and Lehigh regions the largest companies have agreed that the sliding scale should be suspended; and that wages should remain stationary at 10 per cent until April 1st, 1901, thus removing one of the iniquities of which you have complained for many years.

While it is true that you have not secured redress for all your wrongs, while it is true that the increase in your earnings will not fully compensate you for the arduous labor you are compelled to perform in the mines, you have established a powerful organization, which if maintained and conducted on business principles will enable you to regulate many of your local grievances and make your employment less hazardous and more profitable than before the strike began.

The companies agree in their notices to take up with their own employees all grievances complained of. We would therefore advise that when work is resumed, committees be selected by the mine employees and that they wait upon the superintendents of the companies and present their grievances in a businesslike manner and ask that they be corrected.

After calling the miners' attention to the state law providing for semi-monthly payment of wages and the benefits derived from organization, the statement continues:

As there are some few companies who have not posted, notified nor signified in any manner their willingness to pay the 10 per cent advance in wages and suspend the sliding scale, we would advise that unless the men employed by such companies receive notice before Monday that the advance will be paid, they remain away from the mines and continue on strike until the companies employing them agree to the conditions offered by the other companies, and the employees of the companies who have offered the advance of 10 per cent and abolished the sliding scale are hereby authorized to resume work Monday morning, October 29th, and to be prepared if called on to contribute a reasonable amount of their earnings for the maintenance of those who may be compelled to continue on strike.

JOHN MITCHELL, President.

Desperate Strikers.

VALLEYFIELD, Quebec, October 25.—A couple of hundred men employed by the Montreal Cotton Company on the foundations of a new mill went out on strike yesterday, demanding an increase of 25 cents a day in their pay. The company refused to deal with their union. Yesterday the strikers prevented the company from shipping goods and today held up the company's coal pile. The local police are powerless. The company had to have coal or shut down, consequently a message was sent to Montreal asking for military assistance. It arrived at 4:30 this afternoon and consisted of two companies of the Royal Scots. The embargo on the coal pile was promptly removed. At dusk a big crowd gathered and there was every evidence of trouble. About 8:30 a crowd of strikers and sympathizers gathered at the Empire mill and stoned the windows. Troops charged the mob with fixed bayonets. They were driven back. Eight men were wounded, two of them seriously. The strikers had 15 men injured, one fatally. Reinforcements have been asked for from Montreal and word has been received that 300 men and medical assistance would arrive at 2 a.m. The condition of affairs is very serious.

Want a Public Building.

GRAND FORKS, October 25.—At a public and non-political meeting held this evening, mayor Lloyd A. Manley presiding, a resolution strongly urging the Dominion government to erect a government building for post office and custom house purposes in Grand Forks was unanimously adopted. The resolution recites that Grand Forks is the commercial and financial centre of the Boundary country, that the population is growing, that the output of the Granby smelter will exceed $1,500,000 per annum, that the customs duties collected here during the past fifteen months exceeded $126,000, that the postal money order business has increased 85 per cent, or to $64,000 as compared with last year, that stamp sales have doubled during the same period, and that the present post office and custom house buildings are unsuitable and, being unprovided with safes, offer no security for the safety of valuable packages.

Smallpox Scare at Butte.

BUTTE, Montana, October 24.—Health officer Alexander has instructed the police of the city to enforce the compulsory vaccination and arrest of all persons who fail to show the proper certificates. The chief of police will not recognize the order, and the matter is to be referred to the city council at the meeting tomorrow night. There are now between 40 and 45 cases at the pesthouse, and the health officer states that the epidemic will equal that of last season if stringent measures are not taken.

Another Railroad Project.

GREENWOOD, October 25.—At a formal gathering of the citizens today Hon J. H. Turner, minister of finance, who is touring the Boundary district, stated that it was not likely that the government would build the Victoria, Vancouver & Eastern railway, and that instead they were considering the building of a road from the Boundary west to Penticton. When this is completed a fast line of steamers would be put on Okanogan lake, thus connecting the new road with the Shuswap & Okanogan branch, thereby lessening the time between the Boundary towns and the Coast by one day and effecting a large saving in passenger and freight rates.

Boer Officials Arrive.

NAPLES, October 25.—The Transvaal foreign secretary, postmaster general and treasurer have arrived here on board the German steamer Herzog. They proceeded to Hamburg.

Will Be Sent to New York.

LONDON, October 25.—The remains of sir Roderick Cameron of Staten Island, New York, who died at Hyde Park Hotel here October 19th, have been embalmed and will be forwarded to New York Saturday next.

THE Similkameen Star is out with a tip to the three candidates in Yale-Cariboo. It says that there are some sixty odd votes at Princeton, and that they will go for the first candidate upon the ground, as all three are at present unknown. With the present division of forces voters in bunches of sixty are worth looking after.

IT is not likely that the city council will entertain any proposition for lighting the streets from the tramway company or any other corporation. The council may entertain a proposition for furnishing power from any one that has power to sell. But dual ownership in electric lighting in Nelson will not for one instant be entertained.

JUST at what time the Evening Miner became a recognized Conservative paper, history revealeth not. There has been a suspicion, however, in these parts for some time, that the Miner was the recognized organ of any party or clique who had a dollar, and the "price" may be considered exorbitant when the value of the services rendered is taken into account.

THE Evening Miner of Nelson says it is the only recognized Conservative paper in Yale-Cariboo district that is not carrying in its advertising columns the card of the Conservative candidate. It is just possible [that the Conservatives do not recognize the Miner as an organ of their party; and it is just possible, besides, that the managers of the campaign know best how to spend the money that has been subscribed for campaign purposes. Evidently they have not considered it best to pay any of it out for advertising space in a paper that has done as much as the Miner has in the last six months to discredit the Conservative party in Nelson.

IF the St. Eugene Consolidated Mining Company of Moyie, in East Kootenay, keeps up its present rate of ore and concentrate shipments, it will take rank as one of the largest producers of silver and lead on the Pacific coast. Its mill, which is said to be one of the most complete that has ever been erected in America, is turning out one hundred tons of concentrates every day, and besides the concentrates much clean ore is shipped. This is a record that if kept up for a year means that the mines at Moyie will ship ore and concentrates of the value of $2,500,000.

THERE will be no sitting of the royal commission on Oriental immigration till after the general elections. D. J. Munn, who was appointed to look after the interests of the Chinese and Japanese employing firms, is now on his honeymoon trip to England; Ralph Smith has his hands full in his election fight with William Wallace Bruce McInnes, the boy orator, and captain Clive Phillips-Woolley, the big game hunter and poet; and Mr. Clute, the third member of the commission, is also busy in Ontario. The result is that one very troublesome problem for the politicians is disposed of for the present at least.

THE city council should not forget one thing, that is, the people of Nelson do not want to be mixed up with the tramway company and the Bonnington Falls power company in its ownership of the electric lighting plant. If the tramway company can sell power that is generated by the Bonnington Falls power company, then why does it not collect the monthly sum that P. Burns & Co. pay for power? The truth of the matter is, the tramway company has an agreement with the Bonnington Falls power company that is so one-sided that it is no agreement at all. The city should steer clear of the whole outfit.

THE Evening Miner is trying to create dissensions in the Conservative ranks. If it were not an accepted legend that the Miner could not be purchased, the impression might go abroad that some designing Liberal had been "seeing" the amateur editor of that publication. The young man is too honorable for that sort of thing. Indeed, it is unnecessary to mention this fact, for does he not say that the Miner "has done its duty, and that, too, "as it has always done, without "price," providing, of course, nothing in this choice sentence may be taken as referring to dealings with the Hall committee during the provincial campaign.

THE Conservatives will not have anything to do with the newspaper that was the organ of the Mine Owners' Association. The Liberals will not touch it. The Independent Labor party cannot patronize it because it called the members of the party anarchists and thugs. The newspaper referred to is the Evening Miner of Nelson; a newspaper that never supports a candidate for high office without demanding tribute. For once, the candidates of all the political parties refused to have anything to do with it, and the editor of the venal sheet laments the fact in a column editorial, then abuses the editor of The Economist and the editor of THE TRIBUNE for having the hardihood to exercise their political rights without first receiving permission from the Miner.

ATTORNEY-GENERAL EBERTS is in fresh difficulties. So far he has utterly failed to find employment upon government work for every idle man and idle horse in his constituency. John Black, one of his constituents, makes known his grievances in the press. In former years not only his horses but himself were allowed to feed at the government trough, so that it was easy for him to pay his yearly taxes of $50; now, however, other horses and other men are at the trough, and John Black is reduced to the extremity of paying his taxes and feeding his horses without government assistance. Small wonder that the demand for the removal of the attorney-general is growing; though in fairness to him it must be conceded that were all taxpayers to follow the lead of Mr. Black, the position of the average representative would be extremely trying.

WRITTEN BY CONSERVATIVES.

[THE TRIBUNE has placed a part of one column at the disposal of the Conservatives, whose views will be expressed therein from time to time during the campaign. A like privilege is accorded the Labor party and the Liberals.]

If there is one thing more than another that has characterized the policy of the Liberal-Conservative party, it has been their ability to conceive and carry out great ideas. The splendid foresight and sagacity displayed by the late sir John Macdonald and his colleagues, are in the light of the tremendous developments that have taken place in Western Canada since the inception of the C. P. R., truly wonderful. There are many who admire Cecil Rhodes and see in him the foremost imperialistic mind of the day, in his immense ideas regarding the development of Africa, but great as they are in territorial expansion, they will hardly compare with those that culminated in the binding together of scattered provinces by a three thousand-mile railroad projected into what was then an absolute wilderness, having no natural productiveness and across a sea of mountains where the cost was brought to no mean item per foot. And this same Liberal-Conservative party which went boldly ahead some twenty years ago on this great enterprise is the one for which those who are wise and wish to see a masterly, active, western policy pursued will vote for at the coming contest.

It is to be hoped that all those who wish to have a clear and concise statement of the reason why A. H. MacNeill should be elected next month will attend this evening at the opera house, where they will hear speeches by the candidate, mayor Goodeve of Rossland and others. Judging by the views given in the recent issues of this paper of the Liberal and Labor platforms, a cordial invitation may well be extended to those who contemplate voting for either W. A. Galliher or Chris Foley, so that the cobwebs that are at present clouding their minds may be dusted away.

Wilson's Invalids' Port

Specially recommended for dyspepsia, loss of appetite, sleeplessness, indigestion, weakness from whatever cause, nervousness, fevers, consumption, malaria and general debility.

Women complain of a tired feeling. Wilson's Invalid's Port is immediate and effectious, leaving no harmful effects.

Men will find it particularly valuable as a restorative and a strengthener of the body and nerve system

We recommend this tonic

VOTE FOR . . .

A. H. MacNEILL

of Rossland

Candidate of the Liberal-Conservative Party for Member of the House of Commons for Yale-Cariboo.

PLATFORM

Adopted by the Liberal-Conservative Party in Convention at Revelstoke, September 15th, 1900

We, the delegates of the Liberal-Conservative party of Yale-Cariboo constituency, in convention assembled, reaffirm the principles of the party, and more particularly that cardinal principle, protection to home industries, and that that principle be carried out so that all sections of the country shall equally share its benefits.

The one industry on which the prosperity of this constituency is almost wholly dependent is mining; and we believe that our mining industries are as fairly entitled to protection as the manufacturing industries of Eastern Canada; therefore, we advocate that the duties on lead and lead products be increased, so that they shall be as high as those now imposed by the United States on the same articles.

That the output of the precious metal mines is largely increasing, therefore we favor the establishment of a mint; so that the specie in circulation shall be that of our own instead of that of a foreign country.

We advocate the restriction of the immigration of Chinese and Japanese, and all classes who cannot become good citizens of the Dominion of Canada, and suggest the adoption of the principles of the Natal Act.

British Columbia has not now the representation in the federal parliament that she is entitled to; therefore we advocate that when the redistribution of seats is made that this constituency shall be given representation according to its population.

That it augurs well for the success of the party that Hugh John Macdonald has decided to leave the field of provincial politics to take part in the larger one that affects the people of the whole of Canada.

WRITTEN BY LABORERS.

[THE TRIBUNE has placed a part of one column at the disposal of the Independent Laborers, whose views will be expressed therein from time to time during the campaign. A like privilege is accorded the Conservatives and the Liberals.

The workingmen of British Columbia are pleased to acknowledge the friendly expression of their Conservative friends "that is is refreshing for them to believe that they will poll a good majority above their opponents in the Slocan district" and beg to assure both Liberals and Conservatives that they intend to do so.

The statement that "every horny handed son of toil" is not necessarily a "labor man" is such a palpable absurdity that it is only surprising that the writer was sufficiently educated to be able to spell the words correctly, although that was probably owing to the expert assistance of the compositor.

We can assure our friends of both parties that the workers of our western province are possessed of such keen intelligence that they are thoroughly capable of estimating the value of each of the old parties. They know how to value the smiling acquiescence and political sympathy expressed for their welfare, which, when in power, usually ends in a contemptuous indifference and total disregard of their previous promises, and the sturdy men of our western unions are determined to show their brethren in the east that they will be united in a solid phalanx to obtain the proper representation in their house of legislation that will cause their grievances to be redressed and their rights to be established.

Now, fellow workers, you have the chance of showing your power and letting the world know that you are alive to the importance of taking advantage of the opportunity. In this province you are thoroughly organized, your labor associations are a credit to the community, your leaders are manly and straightforward, and you have selected a candidate who has no axe to grind and is wholly unselfish in his wish to ameliorate the conditions of his co-workers and to insist upon their rights being legally established.

The intelligent worker in the election will treat with contempt the gushing effusions of the fawning political hacks of either party and will rally round the banner of freedom and equality. We are bound to acknowledge with shame that boodling, corruption and every conceivable form of misgovernment is not restricted to either party, and every honest worker must exercise all his influence to elect his own candidate in order to counteract the political evils which are unfortunately becoming so prevalent. Now is the time, citizens, mechanics, miners, laborers, all must unite not to merely oppose those whose interests are prejudicial to yours, but to have your own representative in the house, ever on the alert to champion your cause. All paltry dissensions must be discontinued, every selfish consideration must vanish, and in order to secure your aim let your watchword, "Unity and Fraternity," be carried out to its fullest extent.

May you succeed.

SOLDIERS PAID THE PRICE.

Lieutenant E. W. B. Morrison, the well-known Canadian newspaperman, now serving with the Canadian troops in South Africa, does not hesitate to denounce the emergency rations scandal of the Laurier government. In a letter, to a friend in Ottawa, lieutenant Morrison says:

"It is very sad about young Borden; he was a gallant officer, and would have been mentioned in dispatches if he had lived. As you say, the event will soften the feeling against the minister on the emergency rations scandal, but it was a disgraceful thing for all that. To give a soldier a useless emergency ration is like throwing a useless life-preserver to a sinking man. The ration is never opened, except in cases of great extremity, such as the 25th of July, when we made a forced march of 21 miles to Balmoral in bitter cold. We had started before daylight with hardly any breakfast, and got in at dusk in a pouring cold rain.

"The transport convoy got mired in a spruit some miles out, and the whole army had nothing to eat except its emergency ration. We had none, as we had found the Canadian lot was completely useless, and left the boxes unpacked at De Aar. An officer and five men in our division died from exposure that night, and I don't know how many more throughout the army. None of our battery died, but seven are in the hospital at Pretoria from the effects of that night. The whole ration, even to the box and label, was so cheap and nasty that we thought it had been given to the contingent by some firm as a cheap ad. We never imagined it was a government affair until we saw the row in the papers."

Historical Errors.

Spokesman-Review.

"In 1896," says the Brooklyn Eagle, "the people voted on the personality of Mr. Bryan, on 16 to to 1, on government by injunction, on the independence of the judiciary and on the paramountcy of national law. Exactly the same subjects are before the people again. In 1898 the beginning of expansion were brought before the people. There was opposition to it then, but the president of the United States put it before the people in a series of remarkable addresses. The people elected a congress in favor of it, thus anticipating the only issue before us in 1900 that was not before us in 1896."

After citing historical contests wherin the people refused to reverse their political judgment, the Brooklyn paper says: "Those who suppose that in 1900 the people will reverse their verdict of 1896 on issues they then decided should remember that this people never reversed a national verdict in all their history. They have invariably repeated every verdict that has been challenged."

This is a shallow reading of history. The American people have again and again reversed their political verdicts. Four years ago they reversed their immemorial verdict for the double standard, and elected to try the single gold standard. In 1884, when they defeated Blaine, they reversed their verdict in support of a high tariff. In 1888 they elected Harrison and reversed their verdict for low tariff; and in 1892 they swung back to Cleveland and "tariff reform."

They have reversed their verdict on the "bloody shirt" and the "force bill." In 1856 they refused to reverse their verdict on the issues leading up to the civil war, but in 1860 they changed their minds and elected Lincoln.

In 1792 they voted against the "personality of John Adams;" four years later they elected Adams. In 1792 and again in 1796 Jefferson was a candidate and was defeated. In the third contest in 1800 he was elected.

In 1824 Jackson was defeated; in 1828 he was elected.

It is straining history for the Eagle to say that the people voted for expansion in 1898. In that contest we were emerging from a successful war with Spain, and the issues of expansion, "imperialism" and "militarism" had scarcely been broached. In that contest the Democracy made the fight on the maladministration of the war department, and the verdict was so close that the republicans carried the house of representatives by the narrow margin of 13.

What the American people may have done in one election is a poor criterion of what they will do in the next.

CORPORATION OF THE CITY OF NELSON

NOTICE.

Notice is hereby given that under the provisions of By-law No. 80, "Pound and Dog Tax By-law," it is unlawful for any person to suffer any horse, mule, bull ox, cow, sheep, goat, pig, or other cattle or poultry to run at large within the limits of the City of Nelson.

Every owner of a dog in the City of Nelson is required to pay annually a tax of two dollars for each dog owned by him.

No person shall suffer or permit his dog to run at large in the City of Nelson for which such person has not paid the tax required of him, and unless such dog shall have around his neck a collar or strap to which shall be attached a metallic plate to be supplied by the city on payment of the said tax, the said metallic plate having raised or stamped thereon the letters C. T. P. (city tax paid.)

Warning is hereby given that any person guilty of an infraction or violation of any of the provisions of the above named By-law is in addition to the fees and charges set forth therein, liable upon summary conviction to a penalty of One Hundred Dollars and the costs of prosecution, and in default of payment to imprisonment for a term not exceeding two months. By order,

J. K. STRACHAN, City Clerk.

SHERIFF'S SALE.

Province of British Columbia, Nelson, in West Kootenay, to wit:

By virtue of a writ of fieri-facias, issued out of the Supreme Court of British Columbia, at the suit of the Bank of Montreal, plaintiffs, and to me directed, against the goods and chattels of the Two Friends Mine, Limited Liability, defendants, I have seized and taken in execution all the right, title and interest of the said defendants, Two Friends Mine Limited Liability, in the mineral claim known as and called "Two Friends," situated on the divide between Lemon and Springer creeks, on the east slope of Lemon creek, located on the 31st day of July, A. D. 1895, and recorded in the office of the mining recorder for the Slocan City Mining Division of the West Kootenay District, on the 10th day of August, A. D. 1895; and also all the right title and interest of the said defendants, Two Friends Mine, Limited Liability, in sixty (60) tons of ore, more or less, mined from the mineral claim "Two Friends," and now upon the property: To recover the sum of two thousand and eighty-nine dollars and eighty-five cents ($2,089.85) together with interest on two thousand and eighty-six dollars and thirty-five cents ($2086 35) at six per centum per annum, from the 26th day of September, 1900, until payment, besides sheriff's poundage, officer's fees, and all other legal incidental expenses: All of which I shall expose for sale, or sufficient thereof to satisfy said judgment, debt, and costs, at the front of my office next to the court house, in the city of Nelson, B. C., on Friday the 25th day of October, A. D., 1900 at the hour of eleven o'clock in the forenoon.

NOTE.—Intending purchasers will satisfy themselves as to interest and title of the said defendants.

Dated at Slocan City the 12th day of October, 1900.

S. P. TUCK, Sheriff of South Kootenay

The above sale is postponed until Monday, the 26th day of November, 1900, at the same place and hour.

S. P. TUCK,
Sheriff of South Kootenay.

LAWRENCE HARDWARE COMPANY

TO

Contractors and Builders

Having disposed of our business to Mr. Ernest Mansfield, we bespeak for him a continuance of that liberal share of patronage which has been extended us during our career in Nelson. We can only say that those traits which have built up for us and maintained our reputation for reliable dealings will be continued throughout by the new firm. We therefore take great pleasure in recommending him to all our old customers, and also to any new ones who may honor him with their patronage.

Thanking you for past favors,

The West Kootenay Brick & Lime Co., Ltd.

T. G. PROCTER,
Late Managing Director

Nelson, B. C., 5th October, 1900.

To the Public...

Having taken over the business of the West Kootenay Brick & Lime Company, Limited, of Nelson, I beg to ask for a continuance of the patronage which you have heretofore extended them. My aim will be at all times to supply you with our products at lowest possible prices. Being in a position to manufacture goods in larger quantities than before, we shall be able to supply the trade at a lower figure.

It is our intention to install machinery to manufacture our marble products, and next season we shall be in a position to supply these products at reasonable rates.

We shall also keep on hand a stock of Fire Brick, Fire Clay, Tiles and Cement.

Our Bricks and Lime Rock have taken the First Prizes at the Spokane Industrial Exposition in 1899 and also this year. We also secured prizes last year and this year for Ornamental and Building Stone.

We are prepared to offer special rates to Contractors and Builders.

ERNEST MANSFIELD,
for The Mansfield Manufacturing Company.

CITY LOCAL NEWS

Real estate in Nelson, either improved or unimproved, is worth more than like property in Vancouver.

THE TRIBUNE contains a greater number of advertisements than any daily paper in the province, not counting the dailies printed in Victoria and Vancouver.

James Gilker, George Steele, Fred Bradley and Charles Griffin have returned from a shooting trip to Kootenay Landing. They had fairly good sport, but the weather was erratic, and several days were practically lost because of heavy wind.

David Mark Carley will occupy the chair at the opera house tonight, which is a guarantee that all the orators will receive fair treatment. It is expected that both candidates MacNeill and Galliher will speak. Candidate Foley is in East Kootenay and cannot be present.

One-third of the advertisements that appear in the New Denver Ledge are of merchants doing business in Nelson. This is an indication that the business men of Nelson are rustlers, and, also, that they know a good advertising medium when they see it.

Weather permitting, the gun club will shoot two matches this afternoon and wind up the trap shooting season. The fate of the three badges presented to the club some time ago for competition will be decided, and the event will probably attract a large turnout of members. If the weather is unfavorable a further postponement will be made.

The many friends of Mrs. E. B. McDermid and Mrs. S. D. Lester of this city will regret to hear of the death of their father, Mr. A. P. Coddington, which occurred at his home in Tecumseh, Michigan, on Tuesday evening. The sad news was quite unexpected. Although Mr. Coddington had not been well of late, his illness was not considered serious.

At yesterday's sitting of the assize court J. H. Bowes applied to the court to quash the conviction of John Bulko, aged nine years, sentenced to two years in the reformatory for the theft of several ducks at Slocan City, on the ground that the convicting justices of the peace exceeded their powers. The motion was granted and the Bulko lad was set at liberty.

An observing man visiting Moyie would notice that the tramway that is working so successfully at the St. Eugene mill was built by B. C. Riblet of Nelson; that the hardware and mining supplies bear shipping tags of Nelson hardware merchants; that the castings are all from the Honeyman foundry at Nelson; and last, but not least, that the empty beer kegs all bear the labels of the Reisterer brewery of Nelson.

In referring to the lumber interests of Kootenay yesterday mention was omitted of the Porto Rico Lumber Company, whose head office is in Nelson. The firm have had a busy season and their mill at Porto Rico siding has been cutting steadily all season. The logs handled by the mill are cut on Nelson & Fort Sheppard land and the railroad pays the royalty to the government, and the oversight occured through this fact. Early this fall the company located a branch yard at Rossland, which is already handling a large quantity of lumber.

A. Ferland & Co. are issuing invitations to their customers to attend the classes in fine art needlework which Mrs. W. D. Cranston will open on Monday morning. Mrs. Cranston, who is a graduate of the Ontario School of Decorative Art, will arrive in Nelson today. Messrs. Ferland & Co. will make an announcement tomorrow as to the hours of the classes.

Plans Accepted.

The plans prepared by Ewart & Carrie for the addition to the general hospital have been accepted by the directors and tenders will be taken when the tracings are completed. The addition is in the shape of a neat cottage containing four large rooms on the ground floor and two other large apartments on the second floor. It will be heated with hot air from a furnace in the basement and lighted by electricity. The rooms are arranged to enable the medical staff to attend to patients with the maximum degree of expedition, and conveniences of various descriptions are provided. The structure will cost about $2000 complete.

The Bridge at Robson.

F. J. Cambie of Vancouver, resident engineer of the Pacific division of the C. P. R., is in the city for a few days, his mission being to get the work on the Columbia river bridge at Robson under way. He states that operations will be commenced within a few days, as the contractor who will build the stonework has his plant on the way to Robson. The bridge is to be of iron and masonry, and while it will only be in third place among the bridges of the province in point of length, it will have two 200-foot spans, which are longer than any others in British Columbia. The channel at the site of the bridge is 27 feet deep at low water, but only one central pier will be located at deep water, the two long spans extending in each direction toward the shallower water. The swinging section to permit of steamers passing is located near the east bank of the river. When the work is started an engineer will be located permanently on the ground until construction is completed. The undertaking is a large one and the work is to be proceeded with as rapidly as circumstances will permit.
