## *Preface*

This list, which is published under the general auspices of the Publications Committee, is an attempt to give a picture of the activities of faculty and staff through their publications. As usual the number of entries shows a substantial increase over that of the previous year. A rapid survey of the lists since 1950 proved both interesting and gratifying, for it indicated that the work of the faculty is being published from Sweden to Hong Kong and from East Africa to Australia. Better still is its appearance in such journals as the *Transactions* of the Royal Society, *Nature*, and the *American journal of physiology*, to name only a few.

Not everything submitted can be included. Abstracts, unless they represent the sole publication of the material, introductions, unless of some length and genuinely critical, news notes from the field, however useful to the men concerned, and translations, unless of a substantial work and of true literary value, are all omitted.

Since last year's arrangement under departments proved satisfactory, it has been continued. As a further measure of economy, joint authors are indicated merely by cross references to numbered items.

I wish to express my appreciation of the work of Mrs. Margaret Fukuyama, who did all the typing and most of the "leg work".

ANNE M. SMITH, *Compiler and Editor*.
