

Orr, N. L., Wahl, K. J., Noga, H., Allaire, C., Williams, C., Bedaiwy, M. A., Albert, A., Smith, K. B., & Yong, P. J. (2020). Phenotyping sexual pain in endometriosis using the central sensitization inventory. *The Journal of Sexual Medicine*, 17(4), 761-770. doi:10.1016/j.jsxm.2019.12.019

Supplementary figure 1. Sensitivity analysis was performed where the subgroup with no/low deep dyspareunia was divided into those with no bladder/pelvic floor tenderness (n = 43) and those with bladder/pelvic floor tenderness (n = 12). As shown, there was no difference in CSI scores between these two new subgroups.
