I agree the terms of reference should be entirely neutral.
How about this?

Patrick

Better. The only remaining concern is point #1.. Can we try something simpler e.g.

1. explore what lessons were learned from the experience of planning, organizing and delivering the "Mapping" conference.

I just want to avoid the impression that we are looking for something that was done wrongly.

Mamdouh

Mamdouh I agree that there were problems with the earlier version of the terms of reference. I attach a revised version that takes a softer approach. (Not sure if this addresses your concerns or not.) Happy to chat later today.

Patrick
