Coming out of your silo

Leveraging cIRcle to increase your academic impact

Hilde Colenbrander, Francisco Grajales, & Meghan Radomske
October 21st, 2010 | UBC Open Access Week
Opening Questions

- What is your place of mind regarding your research?
- How many papers do you write in a year?
- How many of these get published?
- What happens to all the others?
- Is this fair to you, your colleagues, and your faculty?
Overview

- cIRcle
- Experiences from the field
- The GSS cIRcle Open Scholar Award
- The Innovative Dissemination of Research Award
- Future Directions
- Discussion
What is cIRcle?

- A database for the UBC community and its partners:
  - for the published and unpublished scholarly materials that you create

- All materials in cIRcle are openly accessible on the web

- cIRcle is a service of the UBC Library
Where does clRcle live?

circle.ubc.ca/
What is cIRcle?

cIRcle is the University of British Columbia's digital repository for research and teaching materials created by the UBC community and its partners. Materials in cIRcle are openly accessible to anyone on the web, and will be preserved for future generations.

Who's contributing to cIRcle?
When did cIRcle start?

- Pilot project in Spring 2007
- Full Library service in Spring 2009
Why contribute?

- Openly accessible on the web
- Increased visibility and readership
- Improved indexing and hence findability
- Multidisciplinary inquiry
- Serendipitous discovery and collaboration
Why contribute?

- Recruiting tool
- Classroom teaching tool
- Stable URLs / links
- Management and preservation of digital materials
- Open Access mandates (e.g. CIHR)

With acknowledgements to SMARTech at Georgia Tech
How does cIRcle work?

- A database built on Open Source software (DSpace)
- Organized into Communities and Collections
- Files are uploaded into Collections
- Indexed by Google and other search engines
- cIRcle tracks usage statistics
Granting Agency Mandates

Sub-communities within this community
- Canadian Institutes of Health Research (CIHR) Research Outputs at UBC
- Michael Smith Foundation for Health Research (MSFHR) Research Outputs at UBC

Canadian Institutes of Health Research (CIHR) Research Outputs at UBC

This cIRcle community supports UBC researchers in complying with the CIHR's Policy on Access to Research Outputs which states:

"Grant recipients are now required to make every effort to ensure that their peer-reviewed publications are freely accessible through the Publisher’s website (Option #1) or an online repository as soon as possible and in any event within six months of publication (Option #2)." (see section 5.1.1)

"This policy applies to all grants awarded January 1, 2008 and onward, which have received funding in whole or in part from CIHR." (see section 4).

**Abstract:**

As essential effectors in protein quality control, molecular chaperones serve as the primary checkpoint to assist proper protein folding, and prevent misfolded proteins from denaturation and aggregation. In addition, chaperones can function to direct terminally-misfolded proteins to the proteolytic system for degradation. Viruses rely on host cell machineries for productive infection. Like for many other processes, various viruses have been shown to evolve mechanisms to utilize or subvert the host protein quality control machinery to support the completion of their life cycle. Furthermore, recent studies suggest that some viruses encode for their own chaperone-like proteins to enhance their infectivity. This review summarizes the current understanding of the interplay between molecular chaperones and viral proteins, highlights the chaperone activities of a number of viral proteins, and discusses potential anti-viral therapeutic strategies targeting the virus-chaperone interactions. <tr>
<td>Abstract:</td>
<td>The remote sensing program at Highland Valley Copper provides maps of vegetation for the entire mine site that extend the more detailed but sparse in situ sampling. A unique and growing time series for 7 of the 8 years between 2001 and 2008 allows us to examine vegetation trends over time with good spatial detail. We are able to map areas with similar vegetation types and/or similar histories, and in particular, to identify that attaining reclamation success and those requiring additional attention in order to achieve that state. The resulting maps provide a detailed synopsis of the vegetation trends helpful to reclamation managers. In this study we examine more closely the statistically significant correlation observed between precipitation and remotely sensed vegetation cover at many of the reclamation sites. Analysis suggests that the strength and time scale of the correlation is related to site slope. This is important for site management because it identifies the particular locations most likely to benefit from water retention measures. We also demonstrate the removal of the precipitation-related signal from the remote sensing data in order to derive more desiccation-independent estimates of biomass. We hope to eventually extend this analysis to the entire imaged area and, if successful, incorporate it into our standard analytical protocol.</td>

Remote and unresearched: a contextualized study of non-Indigenous educational leaders working in Yukon Indigenous communities

This study engages in a critical analysis of the lived experiences of non-Indigenous educational leaders working in Indigenous communities in the Yukon Territory, Canada. It sheds light on the epistemic and cross-cultural tensions underpinning much of the literature on educational leadership, and aims to address Walker and Dimmock's (2000) concern that studies of comparative education have been generally absent from educational leadership and management, thereby limiting the available body of knowledge specific to culture and leadership. The study focuses on five questions: How do non-Indigenous Yukon principals construct their professional identity and their role as educational leaders? How do they construct their notions of educational leadership and practice? Given the Yukon's distinct governance and policy contexts, how do they construct understandings of 'indigenity' in relation to local Indigenous culture? How do they address the tensions arising at the juncture of policies imported from outside the Yukon and the Yukon Education Act (1980)? A critical ethnographic research approach is used to shed light upon these questions. Extensive semi-structured interviews with two male and two female participants in four Yukon schools are conducted. Detailed observations create unique 'portraits' of each school and their principals. Pertinent documents are also examined to provide further information and context. This examination suggests that non-Indigenous Yukon principals are caught at the center of micro (school), meso (community), and macro (government) operational and policy levels that powerfully shape their professional identities and their perceptions of their roles as principals. While referred to as 'educational leaders' by the extant body of literature and governments, they do not use this term in their identity constructions. Trapped between and between their schools, communities, and government policies in a fragmented Yukon educational field, instead they refer to themselves in managerial and administrative ways as they juggle educational ends mandated by distinct, and somewhat competing, jurisdictions. This study presents another lens through which to examine educational leadership, and offers insights into the use of ethnographic methods as a powerful research tool. Based on these contributions, this study should be informative to current and future practitioners and scholars of education and educational leadership.

### Sport and Challenge: Is Anything Possible?

**Title:** Sport and Challenge: Is Anything Possible?

**Authors:** Hansen, Rick; Jarvis, Patrick; Katz, Sid; McManus, Bruce

**Subjects & Keywords:** Olympics; Olympic Games; Olympic Games (Winter); Winter Olympic Games; 2010 Winter Games; Olympic and Paralympic Games; sport; athlete

**Issue Date:** 2010-03-10

**Series Report No.:** Sport and Society, Intellectual Muscle: University Dialogues for Vancouver 2010, University of British Columbia,

**Abstract:**

The following discussion is one of the five thought-provoking dialogues in the Sport and Society series (February 8th-March 15th 2010) featuring Olympic and Paralympic athletes who have used their celebrity to make a difference in the world. The series was hosted by Intellectual Muscle: University Dialogues for the Vancouver 2010 Games, developed by Vancouver 2010 and the University of British Columbia, in collaboration with universities across Canada and The Globe and Mail. Abstract: Inspired by the dream of a world accessible and inclusive for all, Rick Hansen set out on his Legendary Man In Motion World Tour, on March 21, 1985, raising $26 million for SCI research. More importantly was the collective shift in consciousness in the belief of the potential of people with disabilities when barriers are removed. Twenty-five years later, that dream continues. In this keynote address Rick Hansen talks about how far we have come, the power of sport as a vehicle for social change and what the future holds. A panel discussion with Dr. Bruce McManus and invited participants follows his presentation.

Canadian women and the (re)production of women in Afghanistan

Title: Canadian women and the (re)production of women in Afghanistan
Author: Butler, Melanie
Degree: Master of Arts - MA
Program: Political Science
Copyright Date: 2008

Abstract:
Canadian women have been at the forefront of the international movement for women’s rights in Afghanistan since the rise of the Taliban in the late 1990s. Focusing on the prominent group Canadian Women for Women in Afghanistan (CW4WAfghan), this paper looks at the role its advocacy assumes in the context of the “War on Terror”. In Canada as in the United States, government agencies have justified the military invasion of Afghanistan by revitalizing the oppressed Muslim woman as a medium through which narratives of East versus West are performed. While CW4WAfghan attempt to challenge dominant narratives of Afghan women, they ultimately reinforce and naturalize the Orientalist logic on which the War on Terror operates, even helping to disseminate it through the Canadian school system. Drawing on post-colonial feminist theory, this paper highlights the implications of CW4WAfghan’s Orientalist discourse on women’s rights, and tackles the difficult question of how feminists can show solidarity with Afghan women without adhering to the oppressive narratives that permeate today’s political climate. It is only by employing alternative models that contextualize the situation of Afghan women in relation, rather than in opposition, to our own, that feminists can begin to subvert the mutually reinforcing narratives that sustain imperialist violence and women’s subordination.

Social, Ecological, Economic, Development Studies

• Unique academic program

• Students, staff, & faculty collaborate on campus sustainability issues from climate change to waste management

• Over 500 student projects featuring 3000 contributors since 2000—saved UBC $200,000
UBC SEEDS Program

UBC SEEDS (Social, Ecological, Economic, Development Studies) is Western Canada’s first academic program that combines the energy and enthusiasm of students, the intellectual capacity of faculty and the commitment and expertise of staff to integrate sustainability on campus.

Using the campus as a living lab, the SEEDS program brings undergraduate and graduate students, faculty and staff together to work collaboratively on applied, accredited research projects that address real-life campus sustainability issues. From climate change, food security and water management to urban agriculture, transportation and waste management, SEEDS projects address a range of campus sustainability issues and build community.

SEEDS Student Reports

- cIRcle preserves and showcases over 170 of these projects
- Adam Rucker’s project has been viewed over 650 times in the last 6 months
Faculty work in cIRcle

- Professor Judith Lynam
  School of Nursing:

  “As an investigator who is taking up an ‘integrated KT’ approach to dissemination—it is helpful to have some additional ways to refer to work (e.g. reports) that are developed for a broader audience than the typical audience for peer reviewed publications”.

Faculty work in cIRcle

- Emeritus Professor R.G. Matson
  Laboratory of Archaeology:

  - “cIRcle is searchable, has good use information, and, above all is reliable, in our world of constantly changing URLs.”

  - “We are impressed [with] the number of downloads recorded in cIRcle, indicating that it has a far wider circulation than we realized.”
Human adaptations on Cedar Mesa, Southeastern Utah

Title: Human adaptations on Cedar Mesa, Southeastern Utah

Author: Matson, R. C.; Lipe, William D.; Haase, William R. IV

Issue Date: 1990

Publisher: University of British Columbia

Abstract: R.G. Matson is Professor of Archaeology Emeritus at the University of British Columbia. William D. Lipe is Professor of Anthropology Emeritus at Washington State University. William Haase IV is the Stonington Director of Planning, Stonington, Connecticut.

The Dark Side of the Universe

Title: The Dark Side of the Universe
Author: Van Waerbeke, Ludovic
Subject Keywords: Science and Engineering Library; 11th Annual Meeting of the Northwest Section of APS
Issue Date: 2009-05-15
Abstract: Dark Matter and Dark Energy are accepted as legitimate constituents of our Universe. In this talk I will review the numerous observational evidences supporting the existence of the dark side of the Universe, which is why cosmologists claim shamelessly that 95% of the Universe is made of something they do not know the nature of. I will then discuss many of the hypothetical physical origins for Dark Matter and Dark Energy and outline the major research directions now undertaken in order to test the various possible ideas. Audio begins at 01:19:30.

Graduate Student Perspective

- The GSS cIRcle Open Scholar Award
Innovative Dissemination of Research Award

- Recognizes and rewards innovative ways of communicating research
- Students, faculty and staff are eligible
- First winner, March 2010: Cycling Route Planner, Michael Brauer and his team
- Awarded annually by UBC Library
Future Directions

- Enabling you to use cIRcle as your database management system:
  - Store your research output in cIRcle
  - Create easy access to your research from your web site
  - We take care of long term accessibility and preservation
- Streamlining uploading procedures
- Making all UBC research publicly available through a single web portal
Questions for the Audience

- How many papers have you written and saved in your hard drive?

- What is stopping you from adding them to cIRcle?

- What would it take for you to put them up?
