What is cIRcle?

cIRcle is the University of British Columbia's digital repository for research and teaching materials created by the UBC community and its partners. Materials in cIRcle are openly accessible to anyone on the web, and will be preserved for future generations.

From 'Place and Promise'

“The University of British Columbia ... supports outstanding research to serve the people of British Columbia, Canada, and the world”

in part by being

“a leader in fostering student, faculty, staff, and alumni engagement within the wider community.”

<http://strategicplan.ubc.ca/>

Community Engagement

“Community Engagement is about UBC’s role and responsibility to community. It is about the contributions that UBC can make to explore and address the issues, aspirations and needs of importance to community.”

<http://www.communityengagement.ubc.ca/>

The impact of UBC research?

Although it is risky to create a single summary of meaningful impact for research, perhaps the notion that *excellent research can create an improved quality of life or a better world* is one that embraces the full scope of our efforts.

From: UBC Research Strategy

<http://research.ubc.ca/vpri/ubc-research-strategy>

Community Engagement at UBC

- ▶ How do we tell our stories of community engagement?
- ▶ How do we recognize community engagement by faculty, staff, students and community partners?
- ▶ How can the University support community partners?
- ▶ How do we measure community engagement?

Community engagement discussion paper

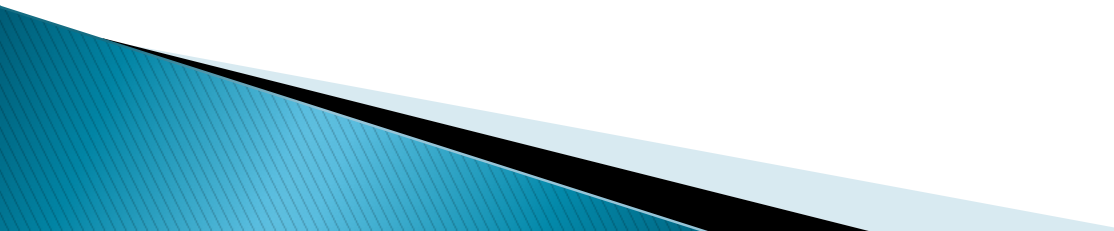

<http://www.communityengagement.ubc.ca/>

How does cIRcle support community engagement?

- ▶ cIRcle is an open access digital repository for published and unpublished material created by the UBC community and its partners.
 - ▶ cIRcle showcases and preserves UBC's unique intellectual output by making content freely available to anyone, anywhere via the web.
 - ▶ Telling stories ...
- 

Innovative Dissemination of Research

- ▶ UBC Library's annual Award, started 2010
 - ▶ Recognizes new and innovative ways of communicating and disseminating research
 - ▶ UBC faculty, staff, and students are eligible
 - ▶ Award consists of framed certificate of recognition and a \$2,000 cash prize
 - ▶ Application deadline:
Monday, November 28, 2011, 5 p.m.
 - ▶ <http://scholcomm.ubc.ca/events-awards/award/>
- 

2011 AWARD WINNERS

2011 Winner

Dimas Yusuf, a second-year UBC medical student, is this year's recipient of UBC Library's Innovative Dissemination of Research Award. Yusuf's work is sponsored by Professor Wyeth Wasserman from the Centre for Molecular Medicine and Therapeutics.

Transcription Factor Encyclopedia (TFe)

Dimas Yusuf, 2nd Year UBC Medical Student

About the project:

The Transcription Factor Encyclopedia (TFe), is an online encyclopedia that houses more than 800 articles about transcription factor genes. Transcription factors are a special class of genes that control when genes are turned on or off. They are critical to learning how to use embryonic stem cells for the treatment of human disease. The TFe, which is a wiki-based software system, encourages experts to create short summaries of the known information about each transcription factor. The summaries are comprised of text, 3D models, and word clouds.

Award: UBC Library Innovative Dissemination of Research Award

Established by the Library in 2010, this Award focuses on new and innovative ways of communicating and disseminating knowledge. The Award honors UBC faculty, staff and students who are expanding the boundaries of research through the creative use of new tools and technologies that enhance the research findings being disseminated.

Atmospheric Science Program

The Atmospheric Science Programme, jointly sponsored by the Department of Earth and Ocean Sciences and the Department of Geography, conducts teaching and research in atmospheric science. It is an interdisciplinary programme, with faculty members coming from not only these two departments, but also from Agricultural Sciences, Chemistry, and Applied Science, with research covering boundary layer meteorology, atmospheric chemistry and air pollution, climate and climate variability, weather and climate prediction, cloud physics, atmosphere-ocean interactions, geophysical fluid dynamics, and interactions between the atmosphere and land (especially vegetation and soil). NEXUS

From 2003-2009, the NEXUS Research Unit, based at the University of British Columbia and provincially funded by the Michael Smith Foundation for Health Research (MSFHR), conducted leading, multidisciplinary research into the social contexts of health behaviour. Under the leadership of NEXUS co-directors Drs. Joan Bottoff, Joy Johnson, and Pamela Ratner, the unit operated with a mandate to critically analyze the social contexts that create barriers to health, affect health seeking, and influence system responses through the lenses of gender, diversity, and place. NEXUS closed in 2009 when provincial budget cuts resulted in the discontinuance of the MSFHR research unit infrastructure program which had funded NEXUS since its inception. In its short six-year lifetime NEXUS was exceptionally productive and successful, having developed internationally reputed programs of research in the areas of tobacco and substance use, youth sexual health, rural and remote health, heart health, women's and men's health, and cancer, and supported the research training of over 70 graduate students and postdoctoral fellows.

At the time of its closing, the investigators of NEXUS represented over a dozen disciplinary perspectives spanning the health and social sciences and humanities. In addition to the three co-directors, the unit was comprised of nine lead investigators, and 21 co-investigators representing a diverse group of researchers, policy and program experts, and health care service providers and clinicians.

clRcle user feedback

"clRcle allows the UBC Laboratory of Archaeology to make our reports and data available to the widest possible community of users. We provide links to clRcle's permanent and stable repository of documents, graduate theses and dissertations in our own publications and webpages, thereby quickly disseminating valuable information that otherwise would be very difficult to access. The usage statistics that clRcle generates are an added bonus--it is great to be able to track the number of downloads of our documents over the course of months and years."

—Michael Blake, Associate Professor, Department of Anthropology

UBC and the 2010 Olympic and Paralympic Games

The cIRcle 2010 Olympics Project aims to showcase and preserve UBC's intellectual output related to the Olympic and Paralympic Winter Games. Examples include research or teaching outputs, proceedings or webcasts of conferences and other events, as well as other material that is Olympic inspired and has long term value.

Workflow Authorization Form

Use this form to request the creation of new communities and/or collections in cIRole and/or to request authorization for specific users (cIRole logins) to upload files to the specified communities and collections. Please fill out the following information and click the 'Submit' button. An asterisk next to a field name indicates that the field is required. Workflow authorization requests are processed in the order received. You will be emailed when your request has been completed.

Step 1: Your Name and Academic Unit

Note: If you also have a role as a Submitter or Reviewer, please add your name in Step 3 below as well.

Name *

FirstLast

Email Address *

Phone No.

Position *

Academic Unit *

Step 2: Name of cIRole Community and Collections

Note: For multiple collections, please separate collection names with a semicolon.

Name of cIRole Community *

Name of cIRole Sub-community

Name of cIRole Collection *

Authorizations

Step 3: Names of Authorized Users and their Roles

Please use this section to record the names and contact details of all persons in your unit who will be submitting materials and/or reviewing records for submission into the cIRole collection(s) requested above.
Note: these persons must already have cIRole logins.

Total Number of Users: *

One

Please select the total number of users in your unit who will be submitting/reviewing materials for this collection and include their contact information below. Please ensure that these users have already registered for cIRole logins, and that their email addresses as specified below are the same as their cIRole logins.

User #1

Role:

- ☐ Submitter
☐ Reviewer

Submitter creates metadata (descriptive information) and uploads files.

Reviewer edits metadata and checks to ensure that the correct files have been uploaded, then adds records/files to the cIRole database. (Does not review the content of the files.)

Name

First

Last

Email

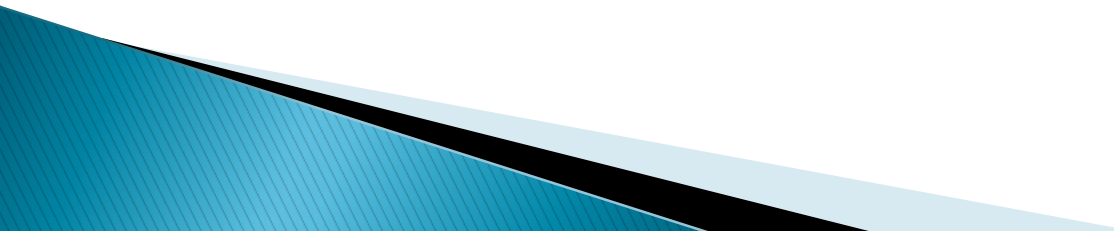

This should be the same as your cIRole login.

Phone

Step 4: Submit Form

Please ensure that the above information is accurate before submitting. When you submit this form a copy will be sent to the email address you provided above and to cIRole staff.

Permissions

- ▶ Copyright owner retains copyright
 - ▶ cIRcle requires a non-exclusive license to distribute (from rights holder)
 - ▶ Optional: copyright owner may attach a Creative Commons license to their work in cIRcle
- 

Attribution-Noncommercial-No Derivative Works 3.0 Unported

You are free:

to Share — to copy, distribute and transmit the work

Under the following conditions:

Attribution — You must attribute the work in the manner specified by the author or licensor (but not in any way that suggests that they endorse you or your use of the work).

Noncommercial — You may not use this work for commercial purposes.

No Derivative Works — You may not alter, transform, or build upon this work.

Sport and Challenge: Is Anything Possible?

[Show full item record](#)

Title:	Sport and Challenge: Is Anything Possible?
Author:	Hansen, Rick;Jarvis, Patrick;Katz, Sid;McManus, Bruce
Subject	Olympics;Olympic Games;Olympic Games (Winter);Winter Olympic Games;2010 Winter Games;Olympic and
Keywords	Paralympic Games;sport;athlete
Issue Date:	2010-03-10
Series/Report no.	Sport and Society, Intellectual Muscle: University Dialogues for Vancouver 2010, University of British Columbia,
Abstract:	The following discussion is one of the five thought-provoking dialogues in the Sport and Society series (February 8th-March 15th 2010) featuring Olympic and Paralympic athletes who have used their celebrity to make a difference in the world. The series was hosted by Intellectual Muscle: University Dialogues for the Vancouver 2010 Games, developed by Vancouver 2010 and the University of British Columbia, in collaboration with universities across Canada and The Globe and Mail. Abstract: Inspired by the dream of a world accessible and inclusive for all, Rick Hansen set out on his legendary Man In Motion World Tour, on March 21, 1985, raising \$26 million for SCI research. More importantly was the collective shift in consciousness in the belief of the potential of people with disabilities when barriers are removed. Twenty-five years later, that dream continues. In this keynote address Rick Hansen talks about how far we have come, the power of sport as a vehicle for social change and what the future holds. A panel discussion with Dr. Bruce McManus and invited participants follows his presentation.

"When I started my leadership role with UBC's Olympic and Paralympic Secretariat, the most valuable resource I found to support my work was a report from the University of Utah that shared their experience – as a university - serving as a host venue and athlete's village for the Salt Lake City Game. I found it by accident.

I knew that over the course of the next two or three years, we would generate some equally interesting and valuable material that might be of interest to others. As a university, students, staff, alumni and faculty – as well as the official administration – contributed to our Games-related experiences of learning, research and service.

I turned to cIRcle. This digital repository offered the open access and content preservation that we hoped would capture our shared efforts in a permanent way.

Our UBC cIRcle team offered support identifying, collecting and preserving material, guiding us through the more technical aspects, and keeping us engaged throughout. cIRcle is a powerful resource that was indispensable in our efforts to create a legacy from the Games."

–Michelle Aucoin, Director, UBC 2010 Olympic and Paralympic Secretariat

Secretariat*

The cIRcle Olympic collection is an extremely important knowledge platform for the sport research community.

Although Vancouver 2010 only had a fleeting physical presence, cIRcle provides an important legacy to ensure that the research capital generated around this event be captured and stored in a permanent and centrally accessible place.

The Centre for Sport and Sustainability in particular values this resources and has added its own cIRcle collection to encourage public access to materials generated from its events, research, and projects.
