Unfinished Business Is Disposed Of At A. C. L. Meeting

The adjourned meeting of the Community League on Wednesday advanced the business a few stages further but leaves it still uncompleted. Like the last meeting it had its exciting moments. There was a skirmish at the opening as to whether all the minutes of the preceding meeting should be included in the League's records.

This was finally decided upon but the actual business transacted after the rejection of the Chairman's report had to be repeated last night. The Chairman's explanation of the change in the secretaryship was included in his report which was, accordingly, accepted by the meeting. The General Superintendent, Mr. W. R. Lindsay, also explained his desire for a change; he stated that the procedure followed might very well have been different and that the resulting confusion was due to the unanticipated change in the attitude of some of the Councillors.

On rising to read his report the retiring secretary was accorded an ovation. He drew attention to certain needs of the League which had been neglected due to the allocation of more than the estimated amount of League funds to the construction of the gymnasium. This report was likewise accepted and without more ado Mr. John McCallum was again unanimously elected to the Hospital Board.

In the regular way nominations were asked for the Council and about sixty names were put forward, Messrs. O. Macintyre, Dunwoodie, and Murdoch trying hard to complete a ticket. With only five acceptances it was decided to pass over this item and get on with the general business. Discussion of the proposed constitutional amendment was voted down on the amendment being ruled out of order.

A number of the audience then left, choosing not to listen to a wrangle over whether small children should not be allowed in the gymnasium during the hours set for the schools. Principal Hartley took responsibility for the order debarring those under ten years of age, saying that no provision existed for their participation in organized games. Mr. Kirkwood advanced the liberal view that all school children might very well be given a school period during the day under the direction of a fully qualified instructor in physical education. He was reminded that the use of the gymnasium by the school children had been mentioned as a consideration when the most suitable site for the new gymnasium was discussed last year. Other members recommended the installation of equipment for exercise by those who did not partake in the more

Esperanza Directors Are Impressed With Mine

Thomas McMeekin, president of the Esperanza Mining Co., accompanied by D. B. McDougall and Bert Wilson, directors, arrived in Alice Arm on Monday from Prince Rupert. During their visit they made a thorough examination of the mine. They were surprised at the quantity of ore developed, and predicted that the Esperanza would be developed, into a big producing mine.

It is the present plan of the company to continue development in order to prove the extent of the big ore body recently crosscut. Ore in the other tunnels will also be developed at the same time.

It is planned to drive a new tunnel under the big gold ore body. This tunnel will encounter the ore at an additional depth of 50 feet, and will satisfy the owners as to whether the high values obtained in the upper tunnel persist with depth.

Shipping of ore may be carried out this spring, but this course has not been definitely decided upon.

The annual general meeting of the company will be held in Prince Rupert on Tuesday next, March 26th, when a board of directors will be elected for the ensuing year and future plans made.

Awake Schedule Will Change

Owing to the change in the schedule of the C. N. R. Steamships to Anyox, the schedule of the Awake will be changed to conform with the new conditions. She will leave Alice Arm on Tuesday morning as usual, at 9 a.m. and leave Anyox at 3 p.m.

She will leave Alice Arm at 2 p.m. on Wednesday and leave Anyox Thursday morning at 10 a.m.

At the time of writing the Saturday sailing is in doubt. If the C. N. R. Steamship carries mail, the Awake will leave Alice Arm at 2 p.m. returning from Anyox at 10 a.m. on Sunday. If no mail is carried the regular Saturday run will be adhered to.

violent sports.

Discussion being ended, the matter of nominations for the Council was again brought up. This had the effect of emptying a couple of hundred seats. The forty or so who remained empowered the retiring Council to appoint a committee of three whose duty it is to obtain a list of at least twelve members who will stand for election. This list will be offered at a further session of the Annual meeting which will be held on Wednesday evening at 8 p.m. in Recreation Hall.

Mine Girls Trim High School 13 to 6

On Monday night only one basketball game was played. The Senior game between Beach and Concentrator declared postponed after an executive storm. For their dimes the fans saw the Mine Girls hand a neat trimming to the Students who obtained only one point to their opponents' nine in the first half. The second frame was better contested. High School put on five points while the Mountain added another four. Julia Calderoni was the feature of the game while Mildred Dresser was active on the losing side.

Teams: Mine: A. McLachlan; H. Calderoni, 2; M. Marriott, 2; J. Calderoni, 9; E. Steen. Total—13.

High School: F. Cameron; L. Dresser, 2; M. Dresser, 4; W. Cameron; K. Eve; M. Cloke. Total—6.

Referee—Norton Youngs.

Alice Arm Celebrates St. Patrick's

The "Seventeenth of Auld Ireland" was celebrated at the Alice Arm Hotel on Saturday evening, when practically the entire town were the guests of Mr. and Mrs. J. Graham.

Bridge was played during the early part of the evening. The winners were: Ladies' first prize, Mrs. N. Fraser; consolation, Mrs. W. M. Cummings. Gent's first prize, H. Fowler; consolation, M. Smith.

Following cards, a sumptuous supper was served, after which dancing was indulged in, which terminated a very pleasant evening.

Anyox May Have Radio Association

Plans are being formulated with a view to forming a radio association at Anyox. It is felt that a radio inspector for Northern B. C. is a growing necessity. The annual fee of \$1.00 in fact is levied for the purpose of paying the cost of inspection. A visit was paid recently by an inspector from the south, Mr. A. L. Gray who gave valuable advice and suggestions.

Radio owners are requested to watch for an announcement of a general meeting. An effort will be made to have periodic lectures and other means of assistance to radio fans.

ALICE ARM NOTES

Hans Peterson, who has spent the past few months in Vancouver, arrived home on Monday.

Continued on page 4

Huge Throng Enjoy St. Patrick's Dance At Gymnasium

It was the unanimous opinion of everyone present at the St. Patrick's dance held on Friday, March 15th, that it was the most well-attended and lively dance ever held in the new gymnasium.

The spacious hall was filled to the limit with dancers, who enjoyed themselves stepping to the delightful strains of the Savona orchestra, who excelled themselves in rendering the various numbers. Popular dance music was played throughout the evening interspersed with Irish airs.

So enjoyable was the evening that when the dance previous to the Home Waltz was announced, the crowd yelled for more and the dance was continued until 3 a.m.

Three hundred and fifty sat down to a bounteous supper, and the numbers taxed the efforts of the ladies to the limit, but everyone was sufficiently supplied.

A feature of the evening was the chairs supplied in the dance hall by the ladies of the Catholic Church. They helped considerably towards making everyone comfortable.

The ladies of the Catholic Church deserve great credit for the able manner in which all arrangements were carried out. The committee in charge of affairs were as follows: Mrs. A. Morton, (convenor), Mrs. C. W. Ruckhaber, Mrs. J. Tierney, Mrs. O'Brien, Mrs. T. Pinckney, Mrs. Loftus. Mrs. J. Wier of Alice Arm also assisted.

Keystone May Operate This Year

Word was received locally a few days ago from Al. Clary, part owner of the Keystone Mine that arrangements have been made with the Keystone Mining Co. to further develop the mine.

Development work will probably consist of driving ahead on the long tunnel which was near the ore body when work was suspended in the fall of 1927. Or it is possible that crosscuts may be driven from the head of the tunnel in an effort to pick up the ore.

Births At Anyox

Born to Mr. and Mrs. Steve Baczuk at the Anyox Hospital, on Tuesday March 5th, a son.

Born to Dr. and Mrs. G. C. Paine at the Anyox Hospital on Tuesday March 12th, a son.

Born to Mr. and Mrs. Duncan Campbell at the Anyox Hospital, Thursday March 14th, a daughter.

Born to Mr. and Mrs. Emil Kalakaylo at the Anyox Hospital, on Tuesday March 19th, a daughter.

Transaction of Much Business At P. T. A. Meeting

At a meeting of the P. T. A. on Monday progress was reported regarding the first aid room on which the Association is spending seventy-five dollars. A review was also given of the inter-school basketball competition which has engaged a score of boys for over two months. The High School juniors look like eventual winners.

Plans for an essay contest in the elementary school were shelved indefinitely but the committee which prepared these was accorded a vote of thanks.

The Association is now casting about for some worthy purpose for the money which is now unexpectedly thrown back on its hands.

The Rev. J. Dewar then presented an impressive analysis of Child Labour conditions throughout the world, dealing with the efforts of International Child Labour Conventions to better conditions. The Anyox P. T. A. has undertaken to forward the recommendations of the Canadian Council on Child Welfare to the Provincial Convention of the P. T. A. with a resolution that government action be taken.

The recommendations requests "the regulation of the night employment of children and young persons in agriculture assuring them a period of rest compatible with their physical needs, in the case of children under 14, not less than 10 consecutive hours, and in the case of young persons between 14 and 18 years of age, not less than 9 consecutive hours".

The speaker deplored also the exploitation of oriental children by Western capitalists and argued that every precaution be taken to safeguard the young of this country. When Canada, he said, has adjusted such matters at home, she can then use her influence to promote similar legislation in European and Oriental countries.

Winners of the Badminton Handicap

Thirty members took part in the badminton handicaps on Tuesday. In one group Miss Leighton and Mr. Peters carried off the prizes with a total of 109. Mrs. Munro and Mr. Cloke were just one point behind. In the other group Mrs. Roy and Mr. Field led with 95, having five added to a perfect score. Mrs. Smith and Mr. Clark took second place.

The play for the cups in the ladies' and men's doubles will take place on Thursday, April 11th.

CARD OF THANKS

The ladies of the Catholic Church wish to thank everyone who assisted in any way toward the success of the St. Patrick's dance.

It is planned by the Department of Mines to increase the staff of the district engineers. We hope it will be done and done quickly. It is something that has been needed for a long time, especially in the North-western district. It is impossible for one man, however energetic he may be to cover this enormous area, that stretches from the Yukon boundary in the north to Bella Coola in the south. Under present conditions he is compelled to race over the ground pausing here and there to make a hurried examination and pass on to other fields in order to cover the whole district before the early snows cover the higher altitudes. Three resident mining engineers in this district during the summer months is necessary. One of the duties of a resident mining engineer is to give advice to small mining companies, and also prospectors who are developing a property. This he cannot do if time does not allow him to make a thorough examination. A resident engineer should also be allowed sufficient time to make a report upon a property when requested by the owner. Often a property could be disposed of by the prospector if an engineer's report was available. The owner of a mining property cannot as a rule afford the services of an independent engineer, and this is where the resident engineer can be of considerable benefit to a district. We hope the increase will be made at once so that results can be attained this summer.

Several times within the course of a year, it is our sad duty to record the death of some mine worker, in the north who met his death from a blast, falling from a high place or crushed by a fall of rock from the roof. Oftimes the cause of death is through neglect to

Woodbine Co. Decides To Develop Further

One of the most important events of the week has been the announcement of the new deal that the directors of the Woodbine Gold Mining Company has been successful in making with the vendors. More interest has been centered in this company of recent months than any of the others in the northern area, because of the large number of people who are shareholders.

Rightly or wrongly, there was a deeply ingrained suspicion in the minds of the shareholders that they were not getting a square deal, and that some movement was under way by which the property might be lost to them. Too much importance cannot be attached to such a rather sinister theory, knowing the high type of men who have been on the directorate in the past months. But that the suspicion existed cannot be denied, and it was freely expressed at the adjourned meeting on Monday of last week.

Now the company has practically got ownership of the property. They pay \$35,000 in cash to the vendor, and that is all the cash from the treasury that he will get. The balance of the payments will be in stock of the company amounting to 666,666 shares, with \$100,000 in cash from returns from the smelter. If the mine is able to make payment of the smelter's returns everyone will be satisfied. The company will benefit as they prove up the ore and cash in on ore shipments. If they do not get adequate smelter returns, he will get no money, and that will be because there is no commercial ore in the mine. Then, if the mine is worthless, the shares he is to be given will be practically worthless also.

A sum of \$15,000 is in the company's treasury for carrying on work, and while that is small, it will be enough for about five months and in the meantime ore will be shipped to the smelter and its values proved beyond all shadow of doubt. With a brand new directorate and a new policy, the shareholders felt very happy when they left the meeting. It will be interesting to await events.

take proper precautions. "Familiarity breeds contempt" is an old adage. Often those that suffer death are old timers in a mine. They get careless, especially with powder, and some day they pass out in a hurry. The man that takes undue chances is a damn fool. If you are not forced to take chances, don't do it.

Railway Practically Finished To Hudson Bay

Before the breakup of winter, about May 1, the Canadian National Railways will have shipped 300 carloads of provisions, coal, cement and other building materials to Fort Churchill, according to H. A. Dixon, regional chief engineer. Thirty carloads of cement moved north, the first big shipment bound for Churchill, and other trains will follow until the 300 cars have been emptied at the bay.

The first message received over the telegraph line, now completed to Hudson Bay, recently, indicated steel was now within 12 miles of Churchill.

The line should be completed at the end of the month or early in April.

Outlook for Copper Is Good and Producers Optimistic

Engineering and Mining Journal
March 2nd.

Unusually turbulent conditions have prevailed in the copper market during the last few days. The entry of several of the largest consumers into the market and their failure to completely satisfy their requirements, even at the advanced quotations, has revealed in some measure the panicky nature of the situation. The largest producers are sold out further in advance than they feel is desirable, yet the demand for deliveries, even further in the future continues. A feature of the recent demand from large fabricators has been the request for a considerable tonnage of prompt, late March, and early April copper. These requests indicate that fabricators find themselves in an underbought position, despite the large purchases made for these positions several months ago. Consequently, the demand from ultimate consumers must be extremely heavy. Several producers are completely sold out for deliveries earlier than June, and as a result were forced to open their books for shipment in that month to meet the demand of the past week. Considerably more than half of the 28,000 tons purchased by domestic consumers during the week ending today has

been for June delivery. In one or two instances, a premium is reported to have been offered for near by positions, but records of such transactions are lacking.

British Columbia leads all Canada in percentage of telephones to population, the ratio being 18.1 telephones per hundred of population, followed with Ontario's 17.46 telephones per hundred of population.

Over 93 per cent. of Vancouver's population is literate—a higher standard than most cities.

RADIO MAY AID MAN IN STUDY OF WILD LIFE

Harry Allen

Do animals converse?

Harry Allen, famous New Brunswick guide says they do, and he speaks from the experience of a lifetime spent in the woods which flank his seventy-eight mile lease of the Cains River. Within certain narrow limits, he insists, the language of the wild can be counterfeited by man with such skill that it deceives the animals themselves. Thus, the call of the cow moose in the mating season is more often than not a successful lure in bringing the bull to the hunter. The cry of the hunting wolf and the honk of the migrating goose are easily imitated by the initiate and are easy of interpretation. There is, however, nothing particularly new in this. What is new, is Mr. Allen's claim that animals communicate with one another by sounds inaudible to the human ear. That they do converse and communicate one with the other is demonstrated in a thousand ways each day. What our well-known guide suggests is that radio will eventually solve the question and be the means of interpretation of the animal communication.

That the human ear is sensitive to but a very narrow and limited range of vibrations is in fact certain. What Mr. Allen hopes to prove shortly is that all animals are sensitive to, and make use of,

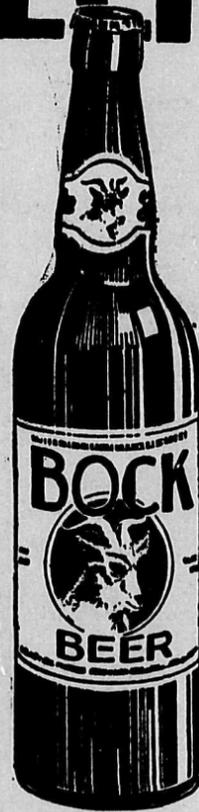

"wave lengths" outside the range of mankind.

"It is a common occurrence in the woods to see a cow moose leave her calf, or a deer her fawn," says Mr. Allen by way of example. "I have seen it hundreds of times. Every time the mother animal has instructed her young, in a language inaudible to human ears, not to stray. That language was quite intelligible to the young, but although I have sometimes been within touching distance, I have never heard the faintest sound, beyond at most, the blowing out of air from the nostrils which had no apparent significance. The young of the moose or deer will remain exactly as its mother left it, even though she be gone for half an hour at a stretch. More than that—in case of extreme need it will "radio" its mother without apparent sound.

"I have experimented on the problem many times. In each case it has been the same. I have waited until the mother has gone some distance; then have approached and stroked the young animal. Beyond a slight twitching of the skin, it has not moved, but it must have sent out a call, for almost immediately I would hear the crashing return of the mother through the undergrowth. At such moments I would not pursue my investigations further."

Mr. Allen has cited many other "demonstrations" to members of the Tourist Department of the Canadian Pacific Railway who are encouraging him to develop his theory still further as he engages in the role of guide, philosopher and friend to the fisherman and the hunter. 255

THE FABLE OF BOCK BEER

DURING the medieval period two neighboring towns in the Old Country had long engaged in a rivalry as to which brewed the best beer. During a dispute one day in early spring, between two brew-masters, one from each of the towns in question, it was claimed by one that the Beer brewed by the other lacked strength. To settle the dispute, the following test was proposed: Each brew-master was to consume a gigantic tankard of the beer brewed by his opponent, after which he was to stand on one leg and thread a needle. The loser claimed that a goat that had butted in through the circle of men surrounding the opponents was responsible for his downfall. The winner laughingly replied: "It was the Bock (German word for goat) in the beer." From that time it became customary to brew a special dark beer called "BOCK BEER" and place it on sale in the Spring of each year.

BOCK BEER

may be obtained on Saturday, March 30th, 1929, and thereafter, until the limited supply is gone, from the Government Liquor Stores in bottles or on draught in any licensed place at the same price as regular beer. Bock Beer is the *Brewers' Treat*, an exceptional brew of high grade Beer and aged (lagered) for an unusually long period. It is a very wholesome and nutritious beverage, the highest achievement of the skilled Brew-master. Order early to make sure of a supply.

Bock Beer, brewed by the Vancouver Breweries Limited, Westminster Brewery Limited, Silver Spring Breweries Limited, and Victoria-Phoenix Brewing Co. Limited is guaranteed to be absolutely pure beer. Have a case delivered to your home for Easter.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

Alice Arm Notes

Continued from Page 1

N. Sutlovich, who has spent the winter at Anyox, visited Alice Arm during the week.

T. McMeekin, president of the the Esperanza Mining Co. left Alice Arm on Tuesday, for Anyox, where he spent a few days before proceeding to Prince Rupert on Thursday.

D. B. McDougall, director of the Esperanza Mining Co. left on Thursday for Prince Rupert, after making an examination of the mine.

Mr. and Mrs. Craig arrived down from the Toric Mine on Thursday. Mrs. Craig plans to spend a vacation in Vancouver shortly.

Don't forget the big dance at T. W. Falconer's hall this evening.

Ed. Peterson and Morris Petersen, arrived back from the Naas River yesterday, where they have been repairing the jail at Arrandale.

Rev. B. Jennings arrived yesterday from Stewart and will hold services on Sunday at the Anglican Church, as follows: Easter Communion Service at 10 a.m. Children's Service and Baptism at 11 a.m. Everyone welcome. Evening Service at 7.30 p.m.

ANYOX NOTES

Mr. and Mrs. W. Muse arrived on Monday from Vancouver.

Frank Anser was an arrival on Monday from the south.

J. Reid arrived in town on Monday.

Ed. Ashton arrived back on Monday from a visit to southern points.

Mr. and Mrs. Caviglia arrived in town on Monday from Vancouver.

Mrs. M. Todd arrived from Prince Rupert on Monday.

Arrivals from Prince Rupert on Monday, were: A. Gray, W. Nicholas, S. Peel.

The El Doro Cigar, a real smoke made out of real tobacco, sold in different sizes at all tobacco stands.

R. L. Healy, who has been in charge for the Granby Co. during the absence of W. R. Lindsay, returned to Vancouver on Monday.

A. McDonald, H. A. Kendon, and H. McCallum left on Monday for Stewart.

Mr. and Mrs. A. S. Baillie arrived home on Thursday from a visit to Vancouver.

Mrs. A Stone arrived from the south on Thursday.

Among the arrivals on Thursday were: J. E. Miller, W. Philips, J. C. Bigham.

F. Brown was a southbound passenger on Thursday's boat.

Lots of Money Available For Public Works

While Atlin, Prince Rupert and Skeena ridings have had their appropriations seriously cut, there is offered the bright prospect that this will be made good by expenditures under the new loan bills. When the public works votes for the various ridings were tabled in the house the northern members made a strong protest against the appropriation for development roads in the north while more money was made available for surfaced roads in the south. The votes as tabled will give Prince Rupert district only \$27,000, Atlin \$32,000 and Skeena \$55,000. Omineca does a little better, having been allowed \$75,000.

Speaking in the legislature on one of the loan bills before the house, Hon. N. S. Lougheed, minister of public works, said in regard to the northern portion of the province tributary to the C. N. Railway, that special consideration would be given to that district in the matter of providing it with suitable roads to permit the development of the immense and valuable resources in that important area.

Under the bill referred to it was expected that \$6,000,000 would be available for road construction.
