Tiger Mine Will Commence Shipping During Next Year

Mine Shows Great Promise and Work Being Pushed

Development work on the Tiger property will be pushed to the limit and it is hoped to install a 100-ton concentrating mill next summer and that before the end of next year the mine will be shipping concentrates and bullion, states E. H. Martin, manager of the Utility Mining and Financing Co. who was in Alice Arm last week-end in company with P. E. Peterson, consulting engineer.

The new compressor plant and engine, consisting of an Ingersoll Rand compound compressor and a Petters Deisel oil engine is now ready for shipment from Vancouver and is expected at Alice Arm at any time. As soon as it arrives it will be installed and operated throughout the coming winter.

With the installation of the compressor plant development work will be carried out on three levels, 140, 240, and 400 foot levels. After ore was encountered in the 140, and 240 levels, work was commenced on the 400 level. It has been driven a distance of 30 feet, with two shifts working. It is expected to encounter the ore in this tunnel at a depth of 400 feet.

Following the coming winter's development work it is planned to ship the concentrating mill north early in the spring, and as soon as snow is off the railway to Camp 8 to transport it to the Tiger, and it is expected that the mill will be operating before the snow flies and steady shipments of concentrates and bullion made.

The mill will consist of a combin-

ation of concentrating and making bullion, the larger portion of the product shipped will be in the form of bullion. This bullion will comprise the silver values and the concentrates will consist of a 70 to 80 per cent lead concentrate.

Next year's development work will include an electrical prospecting programme, which will locate ore bodies not exposed on the surface. A new camp will be constructed this fall at an elevation 700 feet lower than the present camp.

Mr. Martin, manager of the Utility Company, inspected the property on Saturday, and was amazed at the large tonnage of ore developed in so short a time. The large tonnage and excellent quality of the ore and the prospects of an immediate increase of tonnage fully convinced him that in the Tiger the company has a mine that will rank among the best in the province. Efforts will be made by the company to create a record, if possible, in transforming the Tiger from a prospect to a shipper of concentrates and bullion.

The Utility company is one that is out to get results and they are certainly getting them on the Tiger. They have in the Tiger one of the best silver properties of the Alice Arm district. They have secured in Mr. Peterson, consulting engineer, one of the ablest mining engineers and millmen of the province, and Mr. Pickett, foreman of the mine, is a man who understands mining from A to Z.

Alice Arm Saturday Night Dance Greatly Enjoyed

Another of those popular Saturday night dances which have become frequent during the past two months, was held at the Alice Arm Hotel on Saturday. A large number were present, including those from Alice Arm and a number of Anyox visitors. The floor was comfortably crowded with dancers throughout the evening and a very enjoyable time was spent.

Music was supplied by the Alice Arm orchestra in its usual snappy manner, and the musicians received many compliments from the Anyox visitors. The orchestra was composed of Wm. Stephens, piano; F. Butterfield, violin; Chas. Hutchinson, clarinet; E. Aubusson, traps and drums.

Send your next films direct to Wrathalls Photo Finishing, Prince Rupert, B. C. Our high class photo work and quick returns will please you. We also do picture framing. Try us.

A Record That Will Require Some Skill to Beat

Without a doubt, the fishermen's championship of the district must be given to Harold Eld of Anyox. Every year this young angler pays a visit to Alice Arm and each year he never fails to land a few hundred trout. This year, however, he has excelled himself, for since the 16th. of this month he has landed close to one thousand fish. His best catches for one day have been 128 and 124. How he does it when fish are scarce for other anglers has not yet been solved.

Stabbing Affray at Anyox

As a result of a stabbing affray at Anyox last week-end, Louis Rawka, lies in the Hospital in a serious condition, but hopes are entertained for his recovery. His assailant has not yet appeared for trial.

Two Mine Workers Fall To Their Death

Two fatalities occurred at the Anyox mine last week when two miners plunged to their death by falling from the places they were working in at the big Hidden Creek mine.

The victims were: Valter Heinrich Lilligals, aged 21, a native of Finland and Tomo Rubcich, aged 30, a native of Jngo Slavia. The former, who met his death on Friday, is survived by his father and mother and three brothers of Luppfgard, Finland, and one brother who is employed at the Golkeish Mine near Anyox.

The latter, whose fatal accident occurred the following day, leaves to mourn his loss his wife and two children and father and mother, all of Rastaka, Smiljan, Jugoslavia. He had been a resident of Anyox for 1½ years, and Lilligals resided here for 1 year.

The funeral of both victims was held on Tuesday at the Anyox cemetery, and a large number of friends attended. The funeral service for Lilligals was conducted by Rev. Dewar of the Union Church, and Rev. Father Champaign of the Catholic Church conducted the service at the burial of Rubcich. Funeral arrangements were in charge of R. T. Csarick.

At a coroner's inquest held in connection with the death of the above mentioned victims a verdict of accidental death was brought in

ANYOX NOTES

Mrs. Winterburn was an arrival in town on Friday.

Mrs. J. M. Hutchings was an outbound passenger on Friday.

S. Armstrong arrived home on Friday from Regina where he has been attending the Elks' Convention.

Miss Vera Eve left on Friday for the south.

Alex Brown is spending a vacation at the Alice Arm Hotel.

M. Leonard was an arrival on Friday's boat.

Mr. and Mrs. V. Hopkins, who were married recently in the south, arrived in town on Friday and will take up their residence here.

Miss L. Pilling returned on Friday from the south.

Ladies Dressmaking and Embroidery work done.—Miss Luikkonen, Cabin T, Anyox, B. C. P. O. Box 405.

D. C. McKechnie, who has been visiting Alice Arm, left on Friday for the south.

Mr. and Mrs. J. Kirkland and family are spending a week's vacation at Alice Arm.

Vancouver Board of Trade Spends Day at Alice Arm

Mines and Ore Display Evince Favorable Comment

With all her flags flying and her sides thronged with passengers, comprising members of the Vancouver Board of Trade, the palatial steamer Princess Alice of Canadian Pacific coastwise service drew along side the Government wharf on Sunday at 12.30 p.m.

Large crowds were on hand to welcome the visitors and greetings were thrown back and forth as the boat was made fast.

Luncheon followed immediately and officers and others of the Alice Arm Branch of the British Columbia Chamber of Mines were guests of the visitors.

The visitors numbered ninety-eight and over sixty entrained for the Toric, where they were shown through the mine, and inspected the concentrating mill, which was running like a clock, turning out concentrates. Refreshments were provided at the mine by the local Chamber of Mines, and the last party arrived at the boat at 9 p.m. about an hour before she sailed.

Others of the party spent the afternoon around town admiring the scenery, and inspecting the ore display at G. W. Bruggy's old store building. The quality and variety of ores evoked much surprise, many had not realized the camp contained such rich ores or such a large variety. There were displayed, silver, lead, zinc, copper,

tungsten, molybdenum, asbestos, and Toric mine concentrates. Another point of interest was the fifty tons of Toric concentrates piled in the freight shed on the wharf which is a part of the 100 ton shipment to be made shortly.

At a dinner held on board the Princess Alice, Frank Woodside, president of the British Columbia Chamber of Mines thanked A. C. H. Gerhardi, general manager of the Toric Mines, and also the local Chamber of Mines for their efforts in making their visit so instructive and entertaining.

O. Evindson, president of the local branch replied, and said how pleased he was to again welcome the Vancouver Board of Trade and he was sure after what they had seen here that they would do their best to advance the mining industry whenever possible.

Mr. Gerhardi in a few words thanked Mr. Woodside for his kind remarks and hoped that the next time they visited the Toric better facilities would be available.

During the evening the townspeople were entertained on board the Princess Alice by the visitors and an enjoyable evening was spent. Punctually at 10 p.m. the boat pulled out amid singing and cheers, and a very entertaining evening was all too early brought to a close.

Will Drive a 1000 Foot Tunnel on Sunrise

The Kitsault-Eagle Silver Mines Ltd. have commenced work on a 1000 ft. tunnel on the Sunrise property on McGrath mountain. This tunnel will encounter one of the ore ledges at a depth of 500 feet and work will be carried on continuously throughout the coming winter.

A new camp has been completed and consists of a bunkhouse 18 ft. x 18 ft. and a dining room of the same dimensions, the two buildings being joined together by a roof, so that no trouble will be encountered through the heavy winter snows.

The Sunrise is one of the properties bonded by the Kitsault-Eagle Co. a short time ago. It is situated on McGrath mountain a few miles from Alice Arm. It has large surface showings of silver-lead-zinc ore and its successful development will mean much for this section of the camp.

The visit of the members of the Vancouver Board of Trade to Alice Arm on Sunday is the second in two years. Their decision to include Alice Arm in their itinerary again this year shows that we had something worth while to show them, and that they appreciated our hospitality, which perhaps was limited, but Alice Arm with its small population did its best, as a mining camp always does when strangers visit. Both Vancouver and Alice Arm will benefit from the visit. The former city more fully realizes our vast mineral riches that lie undeveloped waiting for the hand of man to convert them into wealth. They also realize the problems and difficulties confronting a new mining camp, and by visiting us they understand more fully that the development of our natural resources will benefit the city of Vancouver equally as much as it does the north. All supplies are purchased in the southern metropolis, and a large portion of the wages also find their way south. The ships that carry the supplies north are also a part of Vancouver. During their stay at Alice Arm they had an opportunity of securing first class information regarding the district from an investment point of view. Each year the amount of money invested in mining stock by Vancouver business men is increasing. They realize that if the mining industry is to be fostered home capital must be forthcoming in addition to foreign investments. Such visits as we received on Sunday are conducive to increased prosperity to the province from whatever angle it is viewed and we hope a return visit will not be delayed too long.

A few years ago when millions of salmon were swarming up every river and creek on the coast, the supply was said to be inexhaustible. But today with our big rivers sadly depleted and a number of the creeks barren, the idle boast of yesterday has been proven a fallacy. The canneries have only themselves to blame for the depletion of the fish, they fished every river and creek to the limit with no thought of tomorrow. At the present time we hear from some quarters of our inexhaustible supply of timber, but at the present rate of cutting it is possible that the next twenty years will see the last of the big timbers cut, and what then? Mining and agriculture will be our chief industries, and mining

Reported Big Strike Of Copper on George Property

The Consolidated Mining & Smelting Co. diamond drill crew working on the George Copper at Stewart, is reported to have cored into an 11-ft. vein of \$150 ore in an ore body 100 feet wide.

The core was actually about 250 feet in copper ore running from 3 to 9 per cent. copper with some gold, but the angle of the hole would set the width of the ore body at 100 feet. The gold content is said to be in the neighborhood of \$16.00 per ton.

This news, obtained by The Financial News on what is regarded as reliable authority, lifts George Copper to a high place in the Consolidated Mining & Smelting Co. family of companies. There is a growing possibility that George Copper will prove a sensation as a mine and in the stock market. There are very few George shares in circulation.

The mine was developed in its early stages by W. B. George of Stewart and Victoria. Victoria capital supported it until the Consolidated acquired control about a year ago. The big Trail company holds under option 1,395,000 shares of \$1 par stock. William George holds about 45,000 shares and the public about 60,000.—The Financial News.

A California real estate man was trying to sell some lots to a Vancouver visitor.

"All this place needs is good people and water," he averred.

"Sure" said the Vancouver man. "That's all hell needs, too."

will be the more important, for it will create work for thousands of workmen in mines, mills, and smelters, thus creating a home market for our agricultural products. The future prosperity of the province depends upon the mining industry and when this has been fully developed the centre of population will probably move to the north. In the northern portion of the province there are still thousands of square miles, that have never been prospected. Minerals are known to exist, and their successful development will undoubtedly create huge industrial centers and at the same time open up for agriculturists huge tracks of fertile land.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 16, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA

The Mineral Province of Western Canada

TO END OF DECEMBER 1927

Has produced Minerals as follows: Placer Gold, \$78,174,795; Lode Gold, \$130,651,919; Silver, \$86,689,046; Lead, \$121,850,734; Copper, \$221,501,079; Zinc, \$59,508,692; Coal, \$271,294,668; and Miscellaneous Minerals, \$53,502,301, making its mineral production to the end of 1927, show an

Aggregate Value of \$1,048,837,828

Production for Year Ending December, 1927, \$60,729,358

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing—

The Hon. the Minister of Mines,

VICTORIA, BRITISH COLUMBIA

Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports covering each of the six mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Ice Conditions In Arctic Are Bad This Year

Ice conditions in the Western Arctic, and especially at Point Barrow, have been especially difficult for shipping to cope with this season, and according to reports now received from the north, the prospects are for a very short period of open water around Barrow. This is the gateway to the Canadian Western Arctic as it is here that the polar pack locks itself to the shore late in summer and shuts off the water route for ten or more months each year.

This year it was late in opening and the inbound traders had delay and difficulty in rounding the point. The ships finally passed inward on or about the last day of July. SS. Baychimo, on August 1 was forced into shallow water and ashore by the ice pack, but released herself undamaged.

The ships are coming out again and already the polar pack is threatening to lock the passage. The American trading schooner C. S. Holmes was penned in Point Barrow for four days and after the wind changed to the North, managed to blast her way through to fairly open water, where, with the assistance of another vessel, she has hopes of making the open Arctic to the east of Barrow with no more danger of serious ice trouble.

Distribution of Liquor Profits

The distribution of liquor profits for the period ending March 31 was announced last week totalling \$559,479, some municipalities receiving:

- Prince Rupert, \$6,807.
- Prince George, \$2,742.
- Smithers, \$1,404.
- Terrace, \$1,054.
- Vanderhoof, \$580.
- Vancouver, \$148,045.
- Victoria, \$39,341.

J. F. Duthie Makes Another Payment

J. F. Duthie has notified the head office at Victoria of the Rufus Argenta mine at Stewart that he was paying another \$18,000 into the treasury of the company, bringing the cash paid up to \$27,000 to finance the work now contracted for.

Mr. Duthie said that all supplies were being purchased from Vancouver and Prince Rupert firms and operations would be carried on all winter.

Americans sink \$1,000,000,000 a year in dubious financial schemes. The worst one is keeping up with the neighbors.

Here and There

(123)
Tourist traffic to Saint John this season is the largest in its history, and so far is equal if not greater than during the whole of last season. Tourists started arriving earlier this spring, and have continued in much larger numbers than in other seasons.

Colonel Scott, who is successfully producing tulip bulbs at Salmon Arm, British Columbia, believes that the industry has a future. He has one acre under this production with drying, cleaning and storage sheds. He grows fifty-two varieties of bulbs and has about a quarter of a million bulbs on hand growing.

The Alberta Amateur Championships will take place shortly at Banff, Alberta, where the annual Highland Gathering and Scottish Musical Festival is being held from August 31 to September 3. An elaborate programme has been arranged of a Scottish character many of the athletic contests being peculiar to that race, such as tossing the caber and putting the shot.

Plans are reported to be on foot among sheep raisers to establish in Vancouver a wool grading centre similar to that functioning in Trenton, Ontario, where at present most of the wool business of Canada is conducted. An authority states this would probably have the result of increasing the returns to the producer from 25 to 50 per cent.

Although the automobile is sometimes said to be a rival to the railroad, it gives the latter a great deal of traffic. The number of freight cars used by the Canadian Pacific Railway for the transport of automobiles has doubled during the past five years, and the latest order of 300 new cars for the company has just been completely filled.

Trans-Atlantic records have been made by two new vessels, the "Duchess of Bedford" and the "Duchess of Atholl," the first two of the new cabin class quartette to be built by the Canadian Pacific Steamships. The former has just accomplished an eastbound voyage from Liverpool to Montreal in six days, fourteen and a half hours, while her sister ship, enroute at the same time, made a westbound crossing from Montreal to Liverpool in six days, 13 hours.

The second school car operated jointly by the Canadian Pacific Railway and the Ontario Department of Education has been issued from the Angus Shops, Montreal, for service in the district west of Fort William. The car is a remodelled first class coach equipped like an up-to-date "little red school-house" with bright classroom, with blackboard, globe, school books, regulation desks, and so forth; a library for the use of students and adult visitors as well; and comfortable living quarters for the teacher. The school car is able to reach remote areas where permanent school facilities are not available.

R. Mitchell, T. McIntosh, T. J. Shenton, arrived in town on Monday.

Next time you choose a cigar, take an Eldoro. They are the best.

Mr. and Mrs. Anderson arrived in town on Friday's boat.

Mrs. C. W. Ruckhaber and Mrs. A. Morton, after spending a short vacation at Alice Arm, returned home on Tuesday.

It is probable that the Herald may be late in publication next week and will not arrive in Anyox until the following Tuesday.

Mrs. W. Tamkin and family returned home on Monday from holidays in the south.

Mrs. Champagne arrived on Friday from the south.

Mrs. Johnstone and family returned home on Friday.

Mr. and Mrs. M. Patrick arrived home on Friday from holidays in the south.

C. Gray, M. Richmond, P. E. Peterson, B. Clegg, G. A. Edgcombe, H. E. Delle, J. M. McDonald, were among the arrivals on Friday.

W. C. Cavers, J. Koski, J. E. McCutcheon, were among the southbound passengers on Friday.

Mr. and Mrs. Hanley left on Monday for holidays in the south.

ALICE ARM NOTES

W. G. McMorris, president of the Kitsault-Eagle Silver Mines Ltd., left on Monday for Vancouver after spending a week here.

Mr. and Mrs. T. W. Falconer and family left on Monday for Vancouver. Mrs. Falconer and family will spend next winter in the south and Mr. Falconer will return within three weeks.

Miss Christine Nucich, who spent summer holidays with her mother, left on Monday for Vancouver.

A. C. H. Gerhardi left on Monday on a business trip to Vancouver.

Dr. Geo. Hanson and Ed. Goranson, who have completed their geological survey of the Upper Kitsault left on Monday for the Topley district on the Canadian National railway near Smithers.

Mrs. Al. Falconer and family left on Monday for Vancouver where they will spend the winter.

Miss Ellen Anderson left on Monday for Vancouver where she will spend the next six months.

Mrs. S. Benton and child arrived on Monday from Prince Rupert to join Mr. Benton, who is relieving at the telegraph office here. His place will be taken next week by J. Studdy of Aiyansh who will remain here permanently.

E. H. Martin, manager of the Utility Mining and Financing Co. and P. E. Peterson, consulting engineer, spent the week-end in town inspecting the Tiger property.

Mrs. G. W. Bruggy and family left on Monday for Vancouver, where they will spend the coming winter.

J. Wheatley arrived home on Monday from a business trip to Prince Rupert.

P. Wickstrom, who has been receiving medical attention at Vancouver for the past few months returned home on Monday, improved in health.

Mrs. J. Gurvich and son, who have been visiting Mrs. N. Sutilovich returned to Prince Rupert, on Friday.

Cliff Pittman, of the Toric mine, who spent a month's holiday in Vancouver, returned on Monday.

W. A. Talbot, district engineer, arrived on Tuesday from Anyox. It is understood that his visit is in connection with the improvement of the trail on the North-East fork of the Kitsault.

A Holiday at Alice Arm

I came this morning, I am leaving tonight,
But the hours thus spent, were full of delight.

I stood in a beautiful shady nook,
Watching the boys fish in the brook.
And again on the banks of the raging Kitsault,

As it races to the sea without ever a halt,
Your verdant green, and snow-capped hills,

Both soothe the eye and give one thrills.
I saw your town so clean and neat
With myriads of flowers about my feet,

And your citizens, sir, are social and true
As they smilingly nod with a "How do you do,"

Had a wonderful time enjoying your charm,
I love thee, I love thee, Oh, sweet Alice Arm,
W. J. PIERCE

Spawning Grounds of Salmon is Bare

To find salmon spawning in the upper reaches of the Fraser River is like hunting for a needle in a haystack, says the annual report of the provincial fisheries department prepared by John P. Babcock deputy commissioner of fisheries.

Reports on the halibut situation in Northern British Columbia are likewise pessimistic and the necessity of measures to conserve the halibut as urged by the international commission is stressed.

C. N. Railway Places Large Number on Land

During the first six months of 1928 the Canadian National Railways have placed, through their land settlement association, 1,336 farming families, chiefly of British American, and Northern European stock, on 243,727 acres of land along the lines of the company between the Great Lakes and the Pacific Coast, according to J. S. McGowan, western manager of the colonization department. The figures represent a substantial increase over the corresponding period of 1927.

Eventually the entire Arctic region will be explored by hunting for explorers.
