Plans Being Made To Operate Mohawk

The Mohawk property will be operated next summer, by a newly formed company, if plans now being formulated are successful.

The Mohawk is situated on Roundy Creek, in the vicinity of the Keystone. On it is located one of the best high grade silver veins in the camp. This has been partially developed but was never concluded.

The Mohawk was acquired from J. Wells and F. Juggins, original owners, by G. R. Naden of Prince Rupert and associates in 1911. Mr. Naden is now Deputy Minister of Lands. In the fall of 1911 they commenced development work, and sunk a shaft on the ore ledge. A drift was driven on the ore a distance of 135 feet. The ore vein was proved to be 2 feet wide and composed of very high grade ore. Owing to lack of finances, work was suspended in April 1912, and since that time no work of importance has been done.

A company known as the Winnie Mines Holdings Co. Ltd. was recently organized by Mr. Dave Thomson of Prince Rupert to take over the Mohawk from G. R. Naden and associates. This has been done, and it is the intention of Mr. Thomson to organize a new company for the purpose of developing the property early next summer. Mr. Thomson, who was in Alice Arm last week, made an examination of the property and was well pleased with everything he saw.

The Mohawk is situated about four miles down the inlet from Alice Arm. It is within easy distance of tidewater. Mining and transportation costs will thus be reduced to a minimum, which is an asset of considerable importance.

Topographical Mapping Survey Completed

R. Bartlett, who was in charge of the topographical survey party here during the summer, left on Saturday for Ottawa.

Assisting Mr. Bartlett in his work were several students of the University of B. C. The work in which they were engaged was the mapping of an area in the Illiance river valley as far as Copper Creek, the North-East Fork valley to its headwaters, and the Kitsault river valley north as far as Homestead Creek.

Owing to the fact that a part of the work depended on photographic methods, progress was considerably delayed, due to so much foggy and cloudy weather.

Mr. Bartlett was unable to state whether further work of this nature will be undertaken in the Alice Arm district next year.

Granby Co. To Disburse Nearly Half Million Next Month

Granby Consolidated Mining, Smelting & Power Co. will disburse a quarterly dividend of \$449,998 on November 1 to stockholders of record on October 13. This will be at the rate of \$1 a share, according to Logan & Bryan, and will increase the grand total to \$11,672,916.

Granby reported deficits in each of the last eight years, after deductions had been made for depletion and depreciation, the depletion amounting to about \$1,800,000 each year for the last seven years. In 1927 the net income before these deductions was \$1,429,000.

The profit and loss on the balance sheet is \$4,017,702, according to a recent eastern report. In the first half of this year the net earnings were \$1,301,200 before depletion and depreciation reductions. This is comparable with \$907,500 for the same period of 1927. The principal properties of the Granby are near Anyox and Allenby, B. C.—Financial News.

Elks' Lodge Will Stage Minstrel Show

A Minstrel Show is to be presented in the near future by the local order of Elks, according to plans formulated at a recent meeting. The project has been under informal discussion for some time, but no announcement was made until a positive decision had been reached. A canvass of the membership, both of the Lodge and the community at large, reveals the fact that so far as talent is concerned they are well equipped for the endeavor. A committee on arrangements has been appointed and rehearsals will begin as soon as the work of selecting a tentative cast has been accomplished.

The "Searchlight" will show the way to an evening of thrills and laughter.

There Will be a Fathers' Night at P. T. A.

The regular October meeting of the Anyox P. T. A. held on Monday, spent some time discussing the program for the year. After considerable debate the general topic, "Education—its aims, methods, and results" was selected and speakers will be invited to deal with different aspects of this. An effort will be made to enrol a larger number of men in the association and to this end a Fathers' Night will be held in January. In February the Association will, as formerly, arrange a dance. The concert by the school children given at Christmas will this year be managed by the teaching staff. The P. T. A. will however, assist in every way possible.

Business Items Disposed Of P. T. A. Meeting

Numerous small items of business were despatched at the last meeting of the P. T. A. Mrs. Cloke was given charge of all costumes and stage properties belonging to the association. The Corresponding Secretary, Miss Richards, and the Treasurer, Mrs. Patrick, were each allowed five dollars for incidental expenses, and towels for the refreshment committee and stationery for the secretaries was ordered purchased. Miss Anne McLachlan delighted the assembly with piano-forte selections.

Preparations Made For Big Carnival on 23rd.

Men are engaged at the gymnasium building booths and making other preparations for the big carnival on Tuesday 23rd. The Committee in charge is keeping dark many of the features which are on the program. It is safe to say that every one will get a run for his money. Meanwhile the paint is drying on the badminton courts and the basketball fittings are being put in place. These sports will get under way as soon as the floor is again cleared.

Anyox Duck Hunters Having Busy Season

With the advent of the hunting season, local water craft are busy transporting hunters to the ducks' haunts. On Sunday, J. J. Beckett, C. S. McLachlan, and James Wilson in the "Wanderer" got a few. Early on Tuesday morning a large party set out for the haunts of the honker and it is expected that some local records will be broken. Included in the party, were: Geo. Lee, W. A. Gigot, A. S. Baillie, C. O. Fricker, J. Swanson. Chas. McLachlan.

Essay Competition Will Be Dropped

Owing to the lack of information regarding conditions, the P. T. A. has dropped the Goodwill Day Essay Competition which was postponed from April to November. Instead a committee comprising Mrs. McMaster, Miss Griffith and Mr. Hartley was directed to assemble suggestions for another competition. Mr. Miller, local agent for McLean's Magazine, was present in the interests of the competition now being conducted on the story of Canada's war effort. Mr. Hartley suggested that, in view of the short time now available, the essay be left to individual pupils.

The rooms in the elementary school are gay with plant life these days. The slips donated by Mrs. Cameron are thriving. Credit is due to Mr. F. M. Kelley who attended to the planting. The Pioneer Mess supplied the earth gratis. The P. T. A. has sent letters of appreciation to Mrs. Cameron and Mr. Kelley for their kindness.

Pleasant Card Party Held at Alice Arm School

A very enjoyable card party was held at the Alice Arm school on Saturday evening. Bridge was played at eight tables. The prize winners of the evening were, Ladies' first prize, Mrs. O. Evindson; consolation, Miss Alice Kergin. Men's first prize, W. B. Bower; consolation, J. Graham.

At the conclusion of cards, refreshments were provided by the ladies. Mr. E. Greenaway, who was organizer of the evening's entertainment, spoke a few words in which he thanked everyone for their attendance.

Prizes were presented by Dwight Rice, president of the Alice Arm Junior Sports Association, who also made a few well chosen remarks.

J. Stark, on behalf of those present, thanked Mr. Greenaway for the evening's entertainment.

A poster competition among a number of school pupils was won by Miss Florence Studdy.

It is planned to have several such evenings, proceeds of which will be used for erecting swings, etc. on the school playgrounds.

Oddfellows Hold Successful Card Party

On Monday evening the local Lodge of Oddfellows held a very successful card party and dance in the I. O. O. F. Hall. The music for the dance was supplied by an orchestra composed of Frank Dresser, Duncan Campbell, Steve Jones, Steve Peel and Thos. Evans.

This Orchestra is proving very popular with their snappy selections.

The prize winners for the cards were, ladies' first prize won by Mrs. Jas. Varnes; consolation, Mrs. Thos. Wilby. Gentlemen's first prize, Mr. Rex Hopkins; consolation, Mr. Wilkinson.

Freshies at High School Will Be Initiated

Next Friday night the "freshies" at the local high school will go through the ordeal of initiation, after which they will be the guests of the upper years at a social evening. A committee of third year students is busy planning schemes for a mild hazing of the newcomers. For the dance the Moose Orchestra have kindly consented to play. It is exclusively a young people's affair.

Mrs. Hanna, sister of Mrs. Yard, was a passenger on the "Prince George" on Saturday, on the first stage of her return to China.

Miss Dingwall, until recently on the nursing staff of the local hospital was an out-bound passenger on Saturday.

New Discoveries of Ore Made on Homeguard Group

Further close prospecting on the Homeguard during the past week was instrumental in tracing the silver-lead ore body for a distance of 600 feet on the surface. Several samples were broken off along it, showing good mineralization.

This ledge is now being drifted on, as was mentioned in last week's issue.

A new ledge was also discovered during the week. It is located on the upper claim. The width has not yet been determined, as there has not been enough time at present to do surface stripping. Samples of the ore brought down show good mineralization, and they will be sent out for assaying. The ore is copper-gold.

This new discovery is of considerable importance, as it shows that the whole property is well mineralized. In addition to the silver-lead ore ledge now being drifted on and the new discovery, the Homeguard carries considerable bodies of copper-gold ore, which are awaiting development.

Tramway At Saddle Is Practically Completed

The Silver Crest Mining Co. have practically completed the towers of the aerial tramway at the Saddle property on Hastings Arm. Preparations are being made for the pulling in of the lumber for ore bins and camp at the mine.

The tunnel at the mine has been driven a distance of 110 feet, and it will be driven to its objective as soon as camp construction is completed, which it is expected will be the latter part of this month or the beginning of November.

Work is progressing satisfactorily, and no interference from snow has been experienced.

Work on Tiger Group Going Ahead

Both underground and camp construction work is being pushed as rapidly as possible at the Tiger property in the upper Kitsault country.

The lower tunnel has been driven a distance of 160 feet. Good progress is also being made on the clearing of a camp site, and the lumber is now on the ground.

Anyox Forthcoming Events

The annual Armistice Dance of the Anyox Post, Canadian Legion will be held on November 12.

The Girl Guides and Boy Scouts will give a joint concert on Nov. 23.

R. S. McGill arrived on Saturday from Vancouver.

In the three weeks ending with September 19, the domestic sales of copper reached the astounding total of 117,000 tons, a record that has not been equalled in years if ever. Practically none of the metal was for prompt delivery or for delivery later than November. Moreover, this huge volume of business was preceded by a normal volume of buying throughout August, so that it is evident that the recent activity was neither a speculative move on the part of consumers, nor was it forced because their stocks had been reduced to the danger point. Rather it was induced by the numerous favorable industrial conditions that brought copper consumers to the realization that their business this fall would be better than they expected—perhaps of unprecedented proportions. Foreign sales have also been excellent. They promise to set a new record this month.

The improvement that, in all probability, will be recorded by the copper industry this year will refer to production, consumption, price, and profits. In 1925 the world produced only four per cent more copper than in 1924; in 1926 and in 1927, only three per cent more than in each of the preceding years; but the world production in 1928 promises to be about 1,880,000 tons, or twelve per cent more than last year.

The industry is coming into its own for the first time since the World War. Increasing demand, which indicates prosperity, is the fundamental reason for the improvement. Some are wont to give the credit for the advance in price to the closer association of producers achieved this year; but it must be realized that the recent appreciation in price could not have occurred without a demand that justified it, though the work

No Royalties Sherritt-Gordon For 20 Years

Sherritt-Gordon, the copper-lead-zinc property in the Cold Lake district of northern Manitoba is exempt from payment of royalties to the Canadian government for a period of twenty years, and will be permitted to export its blister copper for final treatment. These concessions were made on the recommendation of Charles Stewart, Minister of the Interior, who pointed out that transportation of the copper to the Pacific Coast plants for refining and then shipment to the Eastern market would make the enterprise, which will depend for its success on low-grade ore and large-scale methods, unprofitable. The Dominion Lands Act, which was set aside in this case, requires that all ores produced on lands leased from the Canadian government be treated within the dominion.

Then there is the story of one stay-out who said to his companion of the evening, "It is a good thing our wives don't know where we were last night."
 "It certainly is, where were we?"
 "I don't know."

of the Copper Institute, the Copper Export Association, and the American Bureau of Metal Statistics, without doubt, has had a salutary effect on the industry.—Engineering and Mining Journal.

Silent, invisible airplanes are being designed in England. If they extend that idea to automobiles the pedestrian might just as well give up.

Here and There

(134)

The biggest day for grain handling that the port of Montreal has experienced this season was registered on August 21st, when deliveries went well over the 2,000,000 bushel mark for the 24 hours, and receipts were recorded at nearly 1,500,000 bushels, a total handling of 3,500,000 bushels for one day.

The almost complete absence of forest fires with their smoke screens marring scenic effects—the brilliant clearness of the air in this region has made the present tourist season the best on record in British Columbia. Many touring parties travelled over the Canadian Pacific lines, some breaking the journey to motor over the picturesque Banff-Windermere highway. Among other groups may be mentioned the Alpine Club of Canada, which held its camp at the Lake of the Hanging Glaciers, followed by the Trill Riders of the Canadian Rockies.

Approximately 250 new elevators have been constructed throughout Alberta this year. It is estimated by local grain men. The total capacity of these elevators would be about 18,000,000 bushels, it was stated. Complete figures for elevator construction in the province were not available, but grain men stated that extension of facilities had been progressing rapidly in all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 140,000 bushels. The Alberta Wheat Pool alone has 110 grain elevator companies have in 1927 and practically all the public grain elevator companies have increased their storage capacity.

For the first season in a number of years the Nipigon trout may be said to abound. Hydro-development with accompanying fluctuations in water levels, threatened extinction of this exceptionally game fish, but the careful regulation of the past three seasons has apparently restored the world's most famous trout stream to something of its old standing. Six guests of the Bungalow Camp here brought in 125 pounds of fish yesterday, counting a fair number of four and five-pound trout caught mostly at the entrance to Lake Polly. Pike and pickerel still abound in large numbers, so it is thought that the restoration of the water level rather than the destruction of natural enemies has brought back the Nipigon trout.

Entirely new and important schemes involving large expenditures on the part of the Canadian Pacific Railway in the placement of British colonists upon the land, are to be undertaken through the Department of Colonization and Development of that company, working in co-operation with the Overseas Settlement Committee of the British Government. The details of these schemes have been negotiated during the present visit to Canada of Lord Lovat, Under Secretary of State for Dominion Affairs and chairman of the Overseas Settlement Committee. One undertaking provides for the building of one hundred cottages by the Canadian Pacific for the use of British families. They will be used to make families accustomed to Canadian conditions and farm life before being established on farms of their own.

Diamond Drills Will Develop Premier Border

Stewart News

Diamond drills were put onto the Premier Border this week by the Mitchell Co. of Cobalt, the equipment being brought in from Mexico.

According to F. J. Crossland managing engineer for the company, who is now here, a contract has been let for 5000 feet of drilling and a tentative agreement made for 5000 feet more, providing results from the first drilling are favorable.

The Premier Border has already done more than 1500 feet of underground work and an amount of surface work on three porphyry zones that are characteristic of the ore deposits of the Salmon River section.

"We fully realize that we have no mine yet," said Mr. Crossland in an interview today, "and we appreciate the fact that it will take a considerable expenditure in this country for preliminary exploration work before we can know whether we are justified in installing more expensive equipment and continuing underground work. The purpose of installing diamond drills is to govern and direct underground work.

It is the intention to continue work on the Premier Border throughout the winter. The company, which is controlled in Winnipeg, is amply financed and has no stock for sale. Ernest Parker, president of the Grain Exchange in Winnipeg, is president of the company, and the directors include Mr. Tobias, M.P., three directors of Canadian banks, Cornelius Vanderbilt Jr. and other capitalists. There is no trouble anticipated about financing.

Woman Walks From Hazelton to Dawson

Completing an overland and river journey of about 900 miles over mountain trails through a country that would tax the courage and resourcefulness of a veteran trail blazer, Lillian Alling, a young slender woman, arrived in Dawson last week from Hazelton, B. C. from where she started on a long wilderness jaunt last June.

Apparently none the worse for her long journey, Miss Alling would not divulge the object of her visit beyond stating that she had one more place to go to before returning to Dawson to seek work. Leaving Hazelton she followed the Government Telegraph trail to Whitehorse then to Stewart Crossing. There she obtained a small boat to make the final 70 miles down the Yukon River, the last lap of which she made against chill north wind and in a swirling snowstorm.

No Work Underground For Japanese Women

Conspicuous improvement in labor conditions has been a characteristic trend in most of the Western countries. Permeation elsewhere of the fundamental idea has occurred, but progress has been slow in the Orient. Japan only recently promulgated legislation forbidding the employment of women and children in mines, and regulating the daily hours of labor of mine workers to ten. Hitherto women have toiled underground as muckers and tram-mars at a wage of from thirty to forty cents gold per day. However, the reform outlined will not go into full effect for three years.

Lady (to tramp)—"Why don't you work if you are hungry?"
Tired Jim—"I tried that ma'am and it only made me hungrier."

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (sable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

EMPIRE'S LARGEST

Built from designs originated in the motive power department of the Canadian Pacific Railway, the 3100 is the largest passenger locomotive in the British Empire and the most powerful. Canadian workmen turned her out of Angus Shops, a graceful mechanism nearly one hundred feet long, with a tractive effort of 60,800 pounds equal to 3,885 horse power. The use of Canadian nickle steel parts has reduced its weight to 42,400 pounds, but the high ratio of tractive power to weight is a notable feature of the new engine. The boiler pressure, 275 pounds, is the highest of any locomotive in Canada. The eight drive wheels have a diameter of 75 inches and the cast nickle steel cylinders are 25 1/2 inches by 30 inches. The length over all of the new Canadian Pacific engine is 97 feet 5 inches. Two have been built at present for the Toronto-Montreal run.

ANYOX NOTES

Miss Kathleen Blakey has joined the nursing staff of the local hospital vice Miss Dingwall.

Miss McGillivray is the house guest of her sister Mrs. Fred Brown.

J. S. Appenzellar, was an arrival from Vancouver on Saturday.

Owing to the Carnival on Tuesday the Rin Tin Tin film "A Dog of the Regiment" will be shown at Recreation Hall on Monday, 22nd.

On Wednesday evening a number of local residents gathered in the Oddfellows' Hall to do honour to Miss Thelma Deeth and Mr. Sid Peters whose marriage will be an event of next month.

An ElDoro cigar is unquestionably the most pleasant smoke possible. That's why they are so popular.

Constable Wm. Smith in company with several witnesses of an alleged stabbing affray here some time ago left on Saturday night to attend the Fall Assizes in Prince Rupert.

G. H. Turnam arrived in town on Saturday from Vancouver.

Geo. Woodley was an arrival from Prince Rupert on Saturday.

Mr. and Mrs. R. O. Cutler were passengers for the south on Saturday's boat. They will visit on the lower mainland and Vancouver Island.

The Herald is at all times anxious to publish news of general interest. We spare no effort in obtaining all the news of the district, but sometimes a news item is overlooked in spite of our vigilance. Mr. Fordyce Clark is the Anyox representative of the Herald and he will be pleased to gratify your wish in regard to desired publicity.

ALICE ARM NOTES

Mat Storey returned on Monday from an extended visit outside. During his travels he visited the prairie provinces.

A dance will be held at T. W. Falconer's Hall this evening, commencing as early as possible. Good floor, good eats, good music, and then good night.

A card party will be held at the school next Saturday night October 27th. Another good time promised.

Hunting the lordly goose and his smaller relative the mallard is a popular sport on the Kitsault Flats. Almost every hunter has brought home his goose while the experts have brought in three or four.

D. Thomson left on Monday for Prince Rupert. While here he examined the Mohawk, on behalf of a newly formed company who intend to operate it next spring.

J. A. Anderson arrived home from Stewart on Sunday, and during the week paid a visit to the Naas River on business connected with the Public Works Department.

Ed. Pickett, owner of the Tiger property, which is being developed by the Utility Mining & Financing Co. left on Saturday for California, where he will spend the winter.

H. Butler, who was telegraph operator here for a number of years arrived at Anyox on Saturday and left during the week for the Naas River. He will be stationed at Aiyansh.

S. Dumas, who is now residing at The Pas, Manitoba, wishes to extend thanks to everyone engaged in safeguarding his residence during the fire which destroyed the building of the Dominion Telegraphs.

H. E. Doelle, representing the Granby Co. left on Saturday after inspecting mining properties in the district.

Mrs. Hanson, who spent the summer months with her daughter, Mrs. O. Evindson of the Alice Arm Hotel, left last week for Vancouver, where she will spend the winter.

Alice Arm Agriculture Will Grow With Mining

Alice Arm is a mining centre. Everyone realizes that the future prosperity of the camp is dependent on mining, and they look in this growing industry to build up a large and permanent town at the head of the inlet.

Until the last two years agriculture was treated as a joke, but it is being realized that as the mining industry expands, agriculture in the district will grow with it, and will ultimately be a big factor in the district's prosperity.

On the Kitsault Flats are a few thousand acres of logged off land composed of fine river silt, and capable of growing any vegetable or small fruit. It is also suitable for dairy farming.

On the east side of the river, several persons who have an inclination for farming have this year shown what results can be attained.

J. Sauer is successfully operating a dairy farm and adding to his holdings. He is also raising vegetables for the local market. Others who are operating truck gardens, also for the local market are William Stevens and W. B. Bower, while A. McGuire, J. Calfa and M. Krall are all successfully conducting extensive gardens on the east side of the river.

The expansion of the mining industry will foster agriculture. As the former grows so will the latter, and it is probable that when mineral production attains large proportions that the fertile extensive flats of the Kitsault and Illiance rivers will be dotted with small and prosperous farmers, who will considerably contribute to the town's growth and prosperity.
