5 cents each.

Large Number Attend Instructive Mining Classes

The lectures conducted at Alice Arm during the week by Dr. W. V. Smitheringale on behalf of the Provincial Department of Mines were well attended by prospectors and others interested in mining. Meetings were held during every afternoon and evening at T. W. Falconer's hall, and the speaker imparted a mass of useful information to his eager listeners. Audiences of over thirty were quite frequent during the evening lectures.

In addition to the regular lectures, Dr. Smitheringale at the conclusion of each one invited anyone present to ask any question on which he needed enlightenment. Many questions were asked and much valuable information was obtained not only by the questioners, but the whole audience.

In explaining his points and also in answering questions the speaker, in using a technicality, explained it fully. He also drew many diagrams to further illustrate his points. Samples of different ores were also shown and explained to the audience, especially at the afternoon meetings, when, as the speaker explained, the daylight was much more preferable than the evening artificial light.

The first meeting was held on Monday evening. O. Evindson, President of Alice Arm branch B. C. Chamber of Mines occupied the chair, and he explained the reason of Dr. Smitheringale's visit.

Dr. Smitheringale commenced his lecture by taking his audience back to the beginning of the earth when it was a molten mass. He explained that the earth's outer crust was relatively thin, being only about 45 miles thick. Two more zones were formed inside the outer crust. The inner core was molten and was composed principally of iron and nickel, as these metals being heaviest naturally gravitated to the centre.

Of the outer crust, Dr. Smitheringale stated that only 1.4 per cent. is composed of ore bearing rock. Igneous rocks were the first formed and sedimentary rock formed on their surface at later periods. The speaker then traced the origin of sedimentary rocks and showed how these were classified by the fossils found in various stratas. This lecture he explained was a prelude to those to follow.

Tuesday's lecture dealt chiefly with the erosion of the world's crust by the various elements. One of the chief processes in nature Dr. Smitheringale said, is that of erosion and this is also of importance, directly or indirectly, when the subject of ore deposits is considered.

Continued on Page 4

The Mine Club Farewell Dance Brilliant Affair

The Mine Club, which has been in existence for a number of years passed out in a blaze of glory on Friday, February 6th, when a large crowd assembled at the Mine Hall, to take part in the farewell celebrations arranged by the members of the now defunct Mine Club. The Hall was gaily decorated and the floor was perfect for the dancing of the largest assembly of partners seen at a dance at the Mine. Nearly fifty dancers made the trip from the Beach to join in the gay festivities. Harry Ward's Orchestra playing efficiently and the Rosemary String Orchestra obliged with some well played items while the regular jazz band sampled the swell supper. The Rosemary Orchestra delighted the crowd with two numbers "Little White Lies" and "Sing Something Simple."

Buffet Supper was served under the able direction of Ed. Blundell. While George Dyer and assistants dispensed other refreshments to the happy throng.

The Committee in charge consisted of E. Blundell, G. Dyer, Ray Roberts, R. Shewan T. Sanderson and Stan. McIntosh

The occasion was a very fitting end to the successful Mine Club which is now absorbed by the Mine Branch of the Anyox Community League.

Pats and Micos Win At Basketball

On Thursday, February 5th, two games of basketball were played. The Pats won by nine clear points from the Cadets and by good defensive work prevented the new team from scoring. The winners' points came from K. Eve-5, Mrs. McRostie-2, Calderoni-2.

Another senior men's game was spoiled by the attitude of some of the spectators, with two referees it is apparently hard to satisfy some of these fans who are probably lacking in the knowledge of the rules and how to "play the game." It would be better for the players if these fans were to refrain from giving air to personal remarks to the men who handle the games.

The players didn't appreciate the interference of the culprit fans as it spoiled the game and resulted in the Micos leaving the floor in protest. Up to this point the game was very strongly contested. The score was in favor of the Micos at the abrupt ending, and the Celts were one point behind.

The scores being Micos 15—Bass 6, Anderson 2, Dwyer-5, Deeth-2, Celts 14—Steele 9, Calderoni-4, McDonald-1, Davis 1.

I. O. D. E. Elect Officers For Coming Year

The members of the I.O.D.E. assembled in the Legion Club room on Monday, February 2, for the purpose of holding their annual meeting and to elect officers. Regent Mrs. J. W. Lang occupying the chair.

The following officers were elected: Honorary Regent, Mrs. Brayfield; Regent, Mrs. C. O. Fricker; 1st. Vice-Regent, Mrs. Learoyd; 2nd. Vice-Regent, Mrs. Eve; Secretary, Mrs. McRae; Treasurer, Mrs. C. Cundill; Educational Secretary, Mrs. Wynne; Echoes' Secretary, Mrs. Cody; Standard Bearer, Mrs. J. Smith; Councillors, Mesdames Roy, Barclay and Cloke.

A vote of thanks was tendered the retiring officers. Special mention being made of the excellent services of the retiring Regent, Mrs. J. W. Lang, to the local Chapter during the four years since its inception. During this time the membership increased from 15 to 56.

During the past year ten regular, three special and four Executive meetings were held and the average attendance at the regular meetings was 27.

Donations have been sent to various organizations including the Shaughnessy and Anyox General Hospitals, and G.W.V.A. and Province Fund.

High School books were presented to the winner of the Governor-General's medal, and libraries have been given to several schools in need of them.

The Chapter is greatly indebted to the Canadian Legion for the use of their pleasant club room.

Hostesses for the Annual Meeting were Mesdames F. T. Larson, D. Macleod, G. S. MacDonald and A. R. Kent.

F. E. Patton, who for many years was on the engineering staff at the Hidden Creek mine, left on Monday, for Portland, Oregon. Mr. Patton has been a resident of Anyox since early days of the camp and his many friends wish him the best of good luck in his future endeavors.

Large Number Enjoy Concert At Mine Hall

A large and appreciative audience greeted the efforts of the Anyox Amateur Orchestra last Sunday evening, when a concert was given at the Mine Hall. This was perhaps one of the best programmes ever presented by the orchestra, and reflected great credit on Mr. Stuart Steele, the director, for his untiring energy in the cause of orchestral music for the people of Anyox.

The programme was fully varied, consisting of marches, light concert numbers, massive overtures, such as "Morning, Noon and Night in Vienna," favorite national airs, etc. Each number was given with good expression and careful attention to detail, and the evening's performance marked a decided advance in the individual as well as collective ability of the performers.

In the selection, "Gems of the Old Sod," there are some very pleasing passages for the trombone and cornet soloists, who acquitted themselves well. "Southern Miniatures" offered nice variety, especially a "Recruits' Patrol," and an old time "Colonel's Party," also a pleasing love theme "The Love of Caroline." "Light Cavalry" was well received, and the audience was delighted with the descriptive piece "Uncle Remus tells a Story," the same being apropos of scared niggers on a sugar plantation. Mr. Buntain, an old resident of Anyox, who has just returned to camp, jumped into popularity with his banjo solos, and Walter Stenton, a member of the orchestra, sang with fine feeling and expression, "The Bell at Sea," receiving a well earned encore, to which he responded with "The Sunshine of your Smile."

We predict that the next concert will be eagerly awaited and will be well worth attending.

Midnight Prowler Arouses Bank Staff

An amateur bank robber made an unsuccessful attempt to appropriate the wealth of the Anyox Branch of the Canadian Bank of Commerce on Monday morning at the hour of 3 a.m. His amateur efforts aroused the staff and he fled from the scene. Later in the day Antonio Perez, a Spaniard was arrested by Constable S. Service in connection with the affair. Accused has been remanded for 8 days.

The robber evidently believed in direct methods as the quickest way to acquire a fortune, for he smashed a window, in order to gain admission, but the noise of his mode of entrance spelled his ruin for the staff were ready to receive their unwelcome guest.

Opening Session Mock Parliament Draws Big Crowd

The Government and Opposition benches were almost filled at the opening of the Mock Parliament which took place in the Recreation Hall, Thursday, February 5th, and the public gallery was crowded with people of both sexes and all ages. There were, however, several Ministers absent from the Government side of the house.

The Speaker, Mr. R. E. Collis, entered the house with all due seriousness preceded by the acting Sergeant-at-Arms, Mr. Joseph Anderson. Passing the guard of honor of local Boy Scouts the Governor-General occupied the speaker's chair and delivered an eloquent speech from the throne and declared the Parliament officially open.

The speech included a review of the past year and its effect on Canada, and the strong position of Canadian banking institutions. The measures to be brought in by the Government were outlined, these covering relief for unemployment by adjustment of working hours, creation of new industries and stabilization of present industries. Agriculture was dealt with and many factors in the marketing of wheat will be debated during the coming session. Hydro-power development, mining, prospecting and tariffs are also down for discussion.

To give all the details of what will be brought before the house would be "giving the show" away, so those interested in the Parliament should go along and hear for themselves at the next session.

Members for the fictitious constituencies of Mine, Strawboss, Hill Street, Smelter Hill, Round House and Coke Plant took the floor on several occasions during the debate on the speech from the throne, and there were several interesting and amusing passages throughout the evening. Some of the speakers were called to order on several occasions, but there is no doubt as the meeting progress the members will improve with knowledge of parliamentary procedure, and the debates will then be more interesting.

The speech was duly passed, whereupon the house adjourned till Thursday, February 19 at 7.30 p.m.

Undoubtedly the Mock Parliament will be followed with interest and everybody is invited to attend the debates which have decidedly educational, as well as recreational advantages.

H. F. Kergin, M. L. A. left on Wednesday for Victoria, where he will attend the present session of the Legislature which met on Wednesday. It is expected that the Legislature will prorogue before the Easter holidays.

Sunrise Cabaret GYMNASIUM MONDAY, FEBRUARY 16th.

A lot of words have been spilled in the past in regard to giving assistance to prospectors, to enable them to successfully conduct their search for new mineral deposits, and to carry out their limited amount of development work to the best advantage. It has, however, remained for the Hon. W. A. McKenzie, Minister of Mines, to impart first hand information to the prospector, without any expense whatsoever to the latter. Commencing last year, the Department of Mines engaged the services of Dr. W. V. Smitheringale and instructed him to visit several mining centres throughout the province; address meetings of prospectors and others, and impart to them all the necessary information that would assist them in their work. In view of the success attained, it was decided to enlarge the scope this year and include some of the smaller mining camps. Commencing on Monday, Dr. Smitheringale delivered a series of lectures at Alice Arm. These lectures were extremely well attended and the prospectors of the district and those interested in mining have gained knowledge of incalculable value. Questions that have puzzled prospectors for years have been carefully explained and those engaged in the search for metals have gained more knowledge during the past week than could otherwise have been gained in years. It is hoped that the experiment of visiting small mining camps, inaugurated this year, will prove successful and that the Department of Mines will continue the good work of sending us a lecturer each winter.

Canadian business during 1930 averaged about the level of 1927 and was not far short of 1928, says the Financial Post. It forecasts a quiet first quarter in 1931 and a gradual crescendo of business throughout the remainder of the year.

Parliament Will Discuss Many Weighty Questions

Ottawa, January 7; (Special to the Herald). Thursday, March 5 has been tentatively fixed by the Government for the opening of what is expected to be one of the most important sessions in the history of Parliament. There is a possibility that delay of a week may be occasioned by inability to get the legislative program in shape, but this is not considered likely.

The program is now well determined but in many instances the details of its application remain to be worked out. The most laborious task is preparation of customs schedules in conformity with the Prime Minister's promise of complete tariff revision. Exhaustive study of every branch of every industry is a necessary forerunner of action for the pledge is that there must be no exploitation of the consumer under the guise of essential protection.

In applying safeguards under this pledge the Government has at work a staff of statisticians at Ottawa, with representatives throughout the country, checking and rechecking wholesale and retail prices before and since the tariff revision of last session. Thus far only two instances have been disclosed in which industries appeared to be taking advantage of the tariff to boost prices and in these two the protection was withdrawn.

There is a concerted effort on behalf of manufacturers to secure new increases on perhaps half of the 1,200 items of the tariff. Everyone of these has to be subjected to a careful study. At the same time it is recognized that unorganized producers of goods in other schedules really are as much if not more in need of assistance than are the organized forces. It is the duty of the Government to watch their interests if there is to be a balanced readjustment of tariffs.

Staffs are also working in preparation for the adjourned Imperial Conference which will meet in Ottawa, probably next fall. Incidentally, Premier Scullin's announcement on his return to Australia that

closer Imperial economic unity is assuredly coming finds enthusiastic endorsement among Mr. Bennett's colleagues. The latter insist that the McDonald Government's sug-

gested quota purchasing for wheat was not rejected, that it could not be reduced to a workable formula in time for the London Conference, but is likely to be presented in de-

tail at Ottawa.

We are told that certain musical notes prevent sleep. So also do promissory notes.

New Championship Golf Course

George S. Lyon, Canada's Grand Old Man of Golf, split the fairway with the first ball driven from No. 1 tee of the Royal York Golf course recently when this new championship course, built by the Canadian Pacific Railway for the benefit of guests of Canada's premier hotel, was formally opened in the presence of Their Excellencies Lord and Lady Willingdon. This 18-hole course, claimed by players to be one of the best on the continent, has a par of 72 with a length of 6,510 yards. All Toronto golf clubs were represented at the opening and prominent golfers of the Dominion came together here for the occasion. This course has been selected as the scene of the annual interprovincial team match on August 2, and many tournaments in connection with conventions, including the monster one of the Shriners, will be staged there. Lay-out shows the \$100,000 Club-house of the course with a view of the Royal York Hotel.

"Manslaughter" Is An Appealing Play. Tuesday

Since its first appearance in 1922, Alice Duer Miller's best-seller novel "Manslaughter," has become an American classic. Now it has been made into a thrilling, all-talking melodrama, with Claudette Colbert and Fredric March in the leading roles. "Manslaughter" will feature the Anyox Theatre program, Tuesday, February 17.

Modern, up-to-date, "Manslaughter" is an introduction to the careless, carefree life of the wealthy; their gay parties, their nerve-tingling sports, their light, laughing love affairs. But it is also a grim melodrama that shows how a beautiful daughter of wealth becomes a conscious woman by means of a great tragedy and a powerful love.

Miss Colbert, as the petted society beauty, falls in love with Fredric March, young, handsome, ambitious district attorney, and attempts to twist him around her finger just as she has done dozens of other suitors. March is of different stamp, however, and remonstrates with her against her thoughtless, selfish life. Arrested for speeding she bribes a traffic policeman. March tries to tell her that she is contributing to the ruin of the man by such action. She laughs at him.

Here and There

(696)

Atlantic coast lobster fishermen fared well in 1930 in catch but not so well in prices. Nova Scotia fishermen landed a record catch of 530,000 pounds, of which 126,800 pounds were shipped in shell while 2,024 cases of canned lobster were packed.

Boxing on snowshoes will be one of the novelties at the Banff Winter Carnival opening February 7, marking another point in the great battle for popularity honors between snowshoers and skiers. George Sutherland, Alberta fly-weight champion 1926 will be in charge of the bouts.

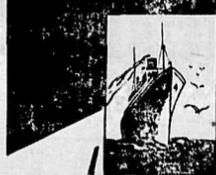

Roaring down from Edmonton through the Bow River Gap through which 50 years ago the first C.P.R. survey party made its laborious passage, airplanes bearing aquatic stars will steer for Banff where their passengers will take part in the open-air swimming and diving events, unique in winter sports, in the hot springs at the Banff Winter Carnival on February 9.

Toronto and Ontario recently honored their Grand Old Man of railroading, William Fulton, assistant general passenger agent for the Canadian Pacific Railway at Toronto, who had completed 40 years' service with the company. He was guest of honor at the Royal York Hotel at a banquet given in his honor by his fellow-officers of the company to celebrate the occasion.

Letters pour into the radio department of the Canadian Pacific Railway daily in connection with the "Melody Mike" feature every Monday night. One lady, writing from Vulcan, Alta., says in part:—"There were six in my house listening to the broadcast and I know of at least a dozen other radios that were tuned in. . . I am writing to say how much we enjoyed your broadcast."

Postal history repeated itself February 2, when an air mail service between Winnipeg and Pembina, North Dakota, on the international boundary, was put into effect by the Canadian Postal Department. Pembina was linked up with Winnipeg, then Fort Garry, in 1857 through the United States mail service. The prairie airmail postal service will be extended by the Federal Government in the near future.

International Committee Formed For Road

Formation of an international committee representing Canada, the United States and British Columbia to consider the whole Alaska road project was announced last week by Premier S. F. Tolmie. It will consist of the United States and three of Canada as follows:

Canada: J. M. Wardle of Banff, Alta., James McNeill of Dawson, Y. T., George P. Napier of Victoria, B. C.

United States: Herbert Rice, Detroit, Mich., Ernest Sawyer, Washington, D. C., Major Malcolm Elliott, United States Engineer Corps.

The Committee will be a fact-finding body and will start its investigations as soon as weather permits.

Bob Martin To Return North Shortly

Bob Martin, was lost in the wilds of the Laird River country with the Burke plane for 61 days is going back again as soon as possible. Gold is the lure of the return trip. It appears that Oscar Anderson, a 55-year old fur trader discovered gold there about 28 years ago and has imparted the secret to Martin. Anderson could not again locate the gold, but Martin claims that he has been successful in locating the lost mine.

One hundred and six million postage stamps, enough, if extended in a straight line, to reach from Vancouver to Toronto, were sold in the Dominion during 1930.

Candies, Stationery, Proprietary Medicines, Toilet Articles, Etc.

Large Number Attend Instructive Mining Classes

sidered. The majority of ore deposits are formed within the crust of the earth and at varying depths from the surface. Such deposits become exposed and are made available to us through the agencies of erosion, which cut away the overlying rocks and thus expose the mineral deposits to us.

Processes involved in erosion are both chemical and physical. The physical agencies are frost, change in temperatures, rain and wind. Chemical agencies are those of solution, oxidation, hydration carbonation, and the chemical and physical action of plants and animals.

Erosion results in great masses of material being moved from one part of the earth to another, thus causing unbalanced stresses, which finally result in readjustments, resulting in the folding and faulting of the sedimentary rocks, and the intrusion of magmas, which usually carry with them various amounts of ore minerals, which on escaping from the cooling batholith form mineral deposits of various kinds.

Dr. Smitheringale took for his subject on Wednesday, the various kinds of rocks composing the earth's surface. These rocks, he said are of various types. They are divided into three main groups, igneous, sedimentary and metamorphic. Igneous rocks are formed by the crystallizing of a molten mass of rock material texture, thus having a crystallizing texture, and is held together by the interlocking of the crystal grains.

There are two groups of igneous rocks, the speaker said, namely, the coarse grained rocks formed at considerable depth below the surface, and fine grained igneous rocks usually formed as lava flows on the surface. The sedimentary rocks have been laid down as beds in bodies of relatively quiet water. There are four main types of sedimentary rocks, namely, conglomerates, sandstones, shales and limestones. These rocks are not crystalline in texture, but are made up of fragments of other rocks or mineral grains, and are held together usually by a cement.

At the meeting on Thursday, Dr. Smitheringale explained how dykes, sills and lacoliths were formed. A distinction between a stock and lacolith was also made. Lava flows were also dealt with. Structures found in sedimentary rocks were also explained, such as anticline, syncline, monocline, unconformity, etc.

The speaker gave details of various faulting systems, such as throws, heaves, slips and offsets, and drew diagrams to more fully explain the various faulting systems. An explanation was also made regarding various silver ore in conjunction with other metals.

Various minerals and their occurrences were taken up at both the afternoon and evening meetings.

Will Give Lectures At Anyox Next Week

Dr. W. V. Smitheringale, who gave a series of lectures at Alice

Arm during the present week will give a similar series at Anyox during the coming week, commencing on Monday evening at the Recreation Hall. Lectures will be held during every afternoon and evening.

In our last issue we gave a report of why these lectures were being conducted, and readers of the Herald are therefore acquainted with the facts.

Preparations Are All Made For Sunrise Cabaret

Everything is ready for the "Sunrise" Cabaret which is being held Monday next, February 16th. The joint Committee of members of the I. O. D. E and Canadian Legion wish it to be known that the entertainment will start promptly at 9 p.m. and everybody should be in their seats by that time as tables will be limited.

The admission charges of \$1.50 per couple, \$1.00 single men, and 50c. ladies are very reasonable and include entertainment, supper and dancing. Children will be admitted only at the same prices.

Everybody is assured of a good time.

The proceeds will be devoted to relief and charity work.

ANYOX NOTES

Mrs. D. R. Learoyd and daughter arrived home on Wednesday from a visit south.

C. O. Webster, H. J. O. Oster, junr. arrived on Wednesday from Vancouver.
