Ore Zone Mile Wide At Tulsequah Carries Gold Values

Neil Forbes, well known mining man of Alice Arm and the north coast, arrived home on Monday after spending the entire summer prospecting and developing his mining properties in the Tulsequah district of the Taku River country.

Neil spent a considerable portion of his time this summer developing and close prospecting a mining property owned by himself and Mr. Smith, whom he met at Taku this fall. On this property is located an ore zone, fully a mile wide. The principal metal is gold, and samples assayed have given values of $24.00 to $25.00 per ton in gold. The ore also carries silver and copper values. Gold values in varying quantities are found across the entire zone, and Mr. Forbes states that it has greater possibilities of developing into a mine than anything he has so far seen in the north. It is his intention to lose no time next summer in continuing development work.

The property is located fourteen miles up the Taku River and only two miles distant from its banks.

The value of this property is more easily discerned when it is considered that the Alaska-Juneau Mining Co. who are operating near Juneau in the same district is mining and milling an ore carrying only 85 cents in gold per ton, and they are netting a good profit.

Due to the prevailing low price of all metals and general trade depression, the Tulsequah camp, in common with all others, has not experienced any great boom this summer. The Alaska-Juneau relinquished their option on one property during the summer, but still has other interests in the field.

The United Eastern Co. of Los Angeles, are expected to develop their holdings next summer, but no definite decision has yet been reached. A great deal depending on the metal prices and financial conditions.

The Tulsequah district, is, on the opinion of Mr. Forbes destined to become one of the big producing camps of the province as soon as metal prices improve and money for development purposes becomes more plentiful.

Eric Barlow, left for Prince Rupert on the Catala on Monday morning.

Parent-Teacher Assoc. Elect Officers

The Anyox Parent-Teacher Association held their monthly meeting on Monday evening. Election of officers for the coming year was held. They are as follows:

Honorary President—Mr. D. J. Hartley.

President—Mrs. Doelle.

Vice-President—Miss. E. Ormrod.

Secretary—Mrs. C. O. Cutler.

Treasurer—Mrs. H. R. Patrick.

Following the disposal of business, Miss Ormrod gave a very interesting address on Junior High School work, touching on certain changes in the teaching of reading and composition in the ordinary elementary schools. The serving of refreshments brought to a close a most profitable and enjoyable evening.

Oddfellows Hold Successful Card Party and Dance

The Anyox Lodge of Oddfellows held a very successful card party and dance in their hall on Friday evening.

The winners at cards were: ladies' first, Miss Polly Brisbane. Mr. Dick Lavery taking the Gentlemen's first. The ladies' consolation went to Mrs. J. Peel, while Mr. Charles Struthers, still playing in hard luck, was again unfortunate enough to win the men's consolation. It is to be hoped Charlie's luck changes before it wins him a wife.

Peel's orchestra were the caterers for the dance music and supplied a high grade of peppy numbers, which were largely instrumental for the delightful evening's entertainment which everyone enjoyed.

Hunters Are Having Success Around Anyox

A party of hunters made a trip on board the launch "Granby" to the Naas River on Sunday, October 12th, and found very good shooting there. A fine bag of geese and ducks being the reward of the party.

It is reported that there are plenty of ducks around the Lagoon these days, but the hunters who have covered Carney Lake, have found very slim pickings.

The duck shooting at Sylvester Bay has also been good, one good bag at least being brought in from there.

ALICE ARM NOTES

Neil Forbes, who has spent the summer at Tulsequah in the Taku Country arrived home on Monday.

N. Sutilovich was a week-end visitor from Anyox, arriving on Saturday.

Ted Kergin, who has spent the summer at Prince Rupert, arrived home on Thursday.

J. C. Studdy, government telegraph operator, returned to Alice Arm on Monday, after spending over two months in the Maple Bay district stringing new wire. Hans Peterson, Wm. McLean, A. D. Yorke and O. Flint also returned during the week. The two latter walked from Maple Bay to Anyox repairing the telegraph line enroute.

ANYOX NOTES

J. M. Shaw arrived in Anyox on the Prince George on Wednesday.

Morley Shier and C. S. Craddock of the Canadian Explosives Co. left Anyox on Wednesday night.

Amongst the departures on Wednesday's boat were O. Hanley, R. Boyes and A. Gordon.

J. S. McMillan of the Canadian Milk Products Company was a southbound passenger from Anyox last Wednesday.

R. Thompson arrived in Anyox on Monday morning.

D. M. Sinclair, manager of the Anyox branch of the Canadian Bank of Commerce, returned on Monday from his vacation, which he spent in the south.

Sam Jabour, district agent for the Sun Life Assurance Co. left for Prince Rupert on Wednesday.

Wm. Selwood, of the General Office staff, who has spent an extended vacation in the south, during which he was married, returned on Wednesday with a bride. Their honeymoon was spent in California. Mr. and Mrs. Selwood are receiving the hearty congratulations of their many friends.

Three Teams In Senior A Basketball League

Three teams are entered for the senior A division of the Anyox Basketball League. The teams are reported to be evenly matched and the fans will undoubtedly be treated to some dazzling exhibitions when these teams settle down to the business of battling for the supremacy of championship honors.

"Three Live Ghosts" Is Dynamic Laugh Quake

At The Anyox Theatre, Tonight

Three British soldiers escape from a German prison camp and return to their former haunts in London only to learn that they are legally dead in the eyes of the government and their friends.

One of them, an American, foiled in his hope for death on the battlefield to expiate a crime he had committed in his native land, finds himself the object of a search by the police.

The second member of the trio has lost his reason, a victim of shellshock. His mind clears following a blow from a policeman's club and he discovers he has kidnapped his own child!

The third wages a battle of wits with his gin-soaked step-mother who, dazzled by the reward offered for the American, connives to bring about his arrest.

These are some of the fascinating and colorful highlights of "Three Live Ghosts," an all-talking film version of the famous New York and London stage, which proved a brilliantly refreshing evening's entertainment.

The picture, judging from the audience's enthusiastic approval following the fade out of the final scene, is easily the best talking picture to date.

Why Shouldn't You Buy A Ticket?

On Friday, October 31st. the Anyox Ladies Hospital Auxiliary will hold their annual Hallowe'en Dance. From the sale of tickets for this dance practically all their funds are obtained for the carrying out of their work of mercy for the coming year. The ladies of the Auxiliary provide many appreciative comforts for the hospital patients. They carry on their work without ostentation, and it is those who have been patients of the hospital who know best how these comforts, not ordinarily provided by the Hospital Boards, help to pleasantly pass long and tedious days on a sick bed. If you can possibly afford it, buy a ticket. You will feel happier when you have done so.

Miss K. Lillian Reid arrived on the Catala on Monday to take up duties as stenographer in the Granby Stores.

A Review of the Future Of Copper

Keyed up to high production capacity during the period when copper was selling at 18 cents per pound or better, United States producers have found it difficult to adjust output to current demands, with the result that the metal is selling at 10 cents, and surplus stocks of the metal have grown. Were this the only factor bearing on the market during a period when consumption is restricted, it might be regarded as a temporary condition, from which the industry might recover as normal conditions returned and consumption improved. Other potent factors exist, however, of a more permanent bearish nature, which during the course of the next two to four years is bound to disturb the balance of supply and demand still further, and may make it difficult even for the big low grade copper producers to carry on. With copper at ten cents, large copper producers have had to cut dividends severely or pass them within the recent past.

It is argued that consumption will increase, bringing about an upward revision in prices for the metal, thus enabling producers to resume or increase dividends again. In this regard, serious consideration must be given to the assured increase in production in other parts of the world, other than the United States and South America, and the growing competition of aluminum in the metal working industries.

Copper has certain advantages over aluminum for use in electric transmission cables, but because of its comparative lightness, apparently, aluminum is being used more extensively for this purpose. There are now more than 300,000 miles of aluminum cable in use, principally high tension lines for the transmission of electric power, according to the United States Bureau of Metal Statistics. Copper, probably, will be preferred to aluminum, for transmission lines at a price, but above a given price, the preference swings in favor of aluminum.

Of greater significance to the future of the copper market than aluminum, is the preparations already well advanced whereby African production of copper will

Continued on Page 4

The cold north wind blizzard which without warning struck this district last week-end and left over four inches of snow did not linger long, and during the week the snow also disappeared. No extensive damage was done such as was experienced by our unfortunate neighbors of the prairies, where the storm was more severe.

At the present time it does not seem as though very great results are going to be obtained at the Imperial Conference now sitting in London. The present Labor Government of Great Britain seems to favor the plan of buying its food supplies and raw materials in the cheapest market possible, in order to feed the unemployed army and short time workers as cheaply as possible. Canada and Australia both have large surpluses of food products and raw materials, and if they cannot secure a tariff preference will be forced to sell in competition with the lowest price world producers. Governments the world over prefer to encourage buying in the cheapest market. All Europe is importing Russian wheat, oil, coal, wood and pulp. Canada is also an importer of Russian coal, and United States is also importing Russian pulp because it can be procured cheap. It will be a pity if protective tariff is not reached between Great Britain and the Dominions during the present conference. An exchange of food stuffs and raw materials for manufactured goods could be arranged, which would benefit everyone. The world is passing through an acute stage. Trade competition is becoming increasingly fierce, and everyone is buying as cheaply as possible irrespective of the origin of its production.

What will be the outcome of the present world wide trade depression is a question often asked and never satisfactorily answered. Judging from developments of the past few weeks it is possible that we may revert to the pre-war period, when the price of everything was much lower than at present. Previous to the late war, the cost of living was much lower; wages were lower; manufacturers, wholesalers, retailers and transportation companies were content with a moderate profit. Money was plentiful and everyone was as well off financially as during the years following the war. Europe, including Russia is fast recovering from the ravages and aftermath of the war, and the latter will soon again become a big exporter of a large variety of products. During the past sixteen years since the commencement of the war, the world has, through increased production, managed to get along fairly well without Russian supplies, but from now on they are a factor to be seriously reckoned with, and the result will possibly mean lower prices for foodstuffs and raw materials. Russia, however, will, as her export trade expands, again require large quantities of manufactured goods, and this will probably offset any injury she may inflict on our raw material market.

Hanson Pole Camps Are Closed Down

After looking over the possibilities of the pole market in the east and following a consultation with his managers, Olof Hanson M.P., head of the Hanson Timber & Lumber Co., has decided to close everything down tight for the meantime, including the company's office in Smithers. Bell Lake pole camp and Mike George's pole camp, the last two to remain open, are now closed and there does not seem to be any prospect of a resumption of operations before next spring. The company has more than enough poles on hand to take care of any orders tnat are anticipated.

Prince Rupert—Formal opening of the new Falls River power plant of the Northern B. C. Power Company, subsidiary of Power Corporation, is expected to take place about the end of October, J. J. Little, general manager, reports that work is from 85 to 95 per cent. completed.

Imperial Conference Delegates Sail

The Canadian Pacific liner Empress of Australia might almost have served as a Cabinet Council room during its last voyage to England with the Prime Minister of Canada and several members of his cabinet as passengers. There was so great a crowd at the pier in Quebec that photographers had to go to Father Point to get pictures of the party.

Above are several groups made while the ship was on her way. I. The Premier and his sister Miss Mildred Bennett shake hands with Captain R. G. Latta, commander of the Empress of Australia. II. Prime Minister G. Howard Ferguson of Ontario and Mrs. Ferguson. Mr. Ferguson said that while he was not attending the Imperial Conference he "hoped to listen at the keyhole." He will open the Ontario Building in London during his visit. III. Hon. H. H. Stevens, Minister of Trade and Commerce, who is an official delegate. IV. Hon. Hugh Guthrie, Minister of Justice, also a delegate.

"MELODY MIKE" TO BE BROADCAST.

Radio fans in Canada will be introduced to a new and original form of radio entertainment this winter with the inauguration of Monday evening hours from "Melody Mike's Music Shop", a broadcast over the Canadian Pacific Railway's transcontinental network.

"Melody Mike", as the above picture shows, runs a music shop near the station at a railway divisional point. The shop becomes the centre of numberless adventures in which Mike himself, Mary, his wife ("Molly Maloney, as wuz"), Ted and Larry, their sons, Scotty Macgregor, an argumentative but friendly neighbor, and Lack-a-day Liz, quite the most surprising of the characters, all play parts.

All are competent and enthusiastic musicians, and their adventures are sprinkled with charming music, old-time favorites and popular song hits. Also, the fame of their musical Monday evenings has spread beyond the division, and when a train halts at Melody Junction there is a stream of visitors to Melody Mike's emporium, many of whom contribute to the enjoyment of the evening.

The first programme from "Melody Mike's Music Shop" will be broadcast from 9 to 9.30 p.m. on Monday, October 6th, by the following stations, linked together by the broadcast transmission system of the Canadian Pacific Railway's Telegraphs, CKAC, Montreal, CHRC, Quebec, CKGW, Toronto, CJGG, London, CFCO, Chatham, CKY, Winnipeg, CKCK, Regina, 10-RB, Moose Jaw, CFQC, Saskatoon, CJRW, Fleming, Sask., CKCA, Edmonton, CJCJ, Calgary, CKLC, Red Deer, and CKWX, Vancouver.

British Columbia

Department of Mines

WHEN BUYING COAL
- REMEMBER -

Every ton of British Columbia coal used means employment for local miners and mine workers.

It means the maintenance of more homes in the Province.

It means the continued local circulation of funds which otherwise would leave the Province.

It means, if every B. C. user of coal will use local coal, that the Vancouver Island, Nicola-Princeton, and Crow's Nest Pass coal fields, whose coal workers have been struggling on half time or less for months, again will be favored with prosperous conditions.

For these reasons British Columbians should consider carefully the source of the coal which fills their bins this winter.

Annual Reports, Bulletins, etc. may be obtained free of charge, on application to

Noranda Mine Not Reducing Output

Toronto—Noranda Mines is still in a position to produce copper at a profit despite the recent slump in the metal at 10 cents a pound, according to President J. Y. Murdoch. Noranda has made no change in its policy as a result of the steadily falling price but has continued to step-up production as rapidly as possible. At the present time the concentrator is producing at the rate of 750 tons daily, and in order to bring this to the proposed objective of 1,000 tons a new unit will have to be added. The smelter is operating on a daily average of ?,000 tons, and the copper output totals approximately 7,000,000 pounds monthly.

Much Salmon to be Marketed This Year

Shipping of 5000 cases of canned salmon to Australia makes a very small dent in the big stores of this product warehoused in British Columbia and for which a market is earnestly desired.

Russia has competed with Japan in throwing red salmon on the British market in unpreceded quantities and the wholesale food co-operatives which are given the blessing of the Labor Party in Great Britain are great buyers of this salmon. Incidentally, the same organizations are buying heavily of wheat from Russia.

Here and There

(624)

After a trip through western Canada during which he and his fellow-directors studied at close range business and agricultural conditions in the four western provinces, E. W. Beatty, chairman and president of the Canadian Pacific Railway, recently announced a programme of improvements and extensions to be undertaken forthwith by his railway which may be described as bold in conception and nation-wide in incidence. This work is advanced to the present time from next year and 1932 and will furnish work for farmers and their work animals and absorb as much as possible of the surplus labor in towns and cities.

Speaking at Winnipeg after a tour of western Canada, with E. W. Beatty, chairman and president of the Canadian Pacific Railway, General Sir Arthur Currie said he returned to the east "more proud, more confident of the country than ever before." Admitting that the times were uncertain and anxious, Sir Arthur urged that wealth, opportunity and resources belonged to Canadians and the solution of nation-wide depression was "up to our men and women and I believe in the Canadian bread and the Canadian breed." As an instance of the creation of new wealth in Canada, he cited the Peace River country with which he had been profoundly impressed.

Occupying the entire top floor of the Royal York Hotel, Toronto, Canada's most up-to-date radio studios were operated for the first time October 3 with the broadcasting of the Canadian Pacific Railway's "hour of cheerful and good music." It will operate a nation-wide radio broadcasting through the winter months.

How high can a fish climb? This is a question over which lovers of angling have often argued and debated. Many experts declare that 50 feet is the maximum for a fish to climb by means of a natural fishway. The Canadian Government Department of Fisheries in an official statement declares that fish in the Mersey River are climbing a fishway 59 feet high and "are making the climb up the river without difficulty."

"Metis" Dancers for Quebec

From far-off Edmonton, outpost of Canada's wide West, to old Quebec, cradle of her civilization and gateway from Europe under both French and English regimés, a group of men and maidens of mixed French-Indian and Scotch-Indian blood will bring their tribute to the shrine of Terpsichore, when the Dance and Folk Song Festival opens at the Canadian Pacific Railway's Chateau Frontenac hotel, on October 16th, 1930. There are twelve in the party and all proudly claim that their ancestry gives them the prime right to the title of "Canadian". The above drawing by Kathleen Shackleton, noted portraitist, made from life, shows the beauty resultant from the mingling of the European and Indian stocks. As performers, the Westerners have a varied programme to offer, including toe-dancing in moccasins.

A Review of the Future Of Copper

Continued from page 1

be greatly enhanced. It is claimed that consumption will grow commensurate with potential output. There is every evidence, however, that consumption will have to increase by leaps and bounds to offset the amount of the metal that Africa will contribute from 1932 forward.

In addition to Africa's many giant copper mines, in the making and made, Canada's output is increasing to quite large proportions, sufficient to make it a factor in the market in future of no small importance. Canada produced 248,000,000 pounds of metal last year, and doubling that volume within the next three or four years appears assured. The plants of International Nickel Company alone have a capacity today of 240,000,000 pounds of copper per annum, while Noranda will produce 7,000,000 pounds monthly.—Financial News.

Premier Gold Co. Bonds New Property Near Kamloops

Premier Gold Mining Company, according to reliable reports, has bonded a group of claims at Mount Ollie on the Thompson River, 60 miles north of Kamloops, Samples of ore from this property have been brought to Vancouver and are stated to show high values in gold, assays ranging from $80 to $130. The claims were staked only a short time ago and word of the discovery is drawing numerous prospectors to the spot. The ore is described as containing arsenical iron sulphide with high values in gold.

Montreal, October 18 (Special to the Herald.) Within five years the United States will be buying Canadian wheat in large quantities according to E. W. Beatty, K.C., president of the Canadian Pacific Railway, who has just returned from a tour of the western provinces. Mr. Beatty states that he found conditions in the west "much as he had anticipated," and says that he was delighted with conditions in general there. "Canada cannot go back" he said and in his opinion the Dominion will steadily forge ahead in the face of the threatening depression.

GRANBY STORES

BUY BC PRODUCTS

MERCHANTS ARE HUMAN

Merchants try to keep in stock the brands of goods that people ask for. When more people have the courage to insist on B. C. Goods, more merchants will carry B. C. Goods in stock, more factories will be busy more jobs will be created.

If your boys and girls are working perhaps you know some who are not. Think of them the next time you make a purchase. Ask for B. C. Products.
