Thrilling Scenes Mark Last of Basketball Games

The last regular basketball games which preceded the disastrous fire were particularly interesting. High School opened the evening by running up sixty-one points, while they allowed Concentrator Intermediates to accumulate thirty-four. McMillan and Asimus scored almost at will for the winners, and Stewart shone on the losing side.

High School: Asimus-22, McMillan-20, McDougall-10, Steele-9, O'Neill, Barclay.

Concentrator: Stewart-14, Laycox.6, Docherty, Cavalier-6, Moffat-6, Weber-2.

Public School Win by 2 Pts.

The game between the schoolgirls was the best contest yet staged by these teams. The result was uncertain until the whistle left the public school two points ahead. Just what might have happened in future games is an interesting speculation.

Public School: D. Gregg-10, L. Dresser-4, M. Dresser, W. Cameron, M. Cloke, D. Waterman, M. McDonald. Total, 14.

High School: F. Cameron-8, K. Eve-2, M. Marriott-2, V. Eve, D. Austin, J. MacDonald, F. Dodsworth. Total, 12.

Curtain Ringer Close Game

The game between the Coke Plant and Mechanics, which rang down the curtain, was one of the most exciting finishes yet seen. Stuart McLachlan was in splendid form for Mechanics, and his shooting in last half was mainly responsible for the two point lead which Mechanics obtained in the last minute of the game.

Mechanics: McLachlan-10, Lazoreck-8, Clay-2, Beaulieu-2, Evans-2, Wilson, Bartman.

Coke Plant: Hill-11, Dodd-6, Stewart-1, Asimus-3, Anderson, Jamieson. Spencer.

Basketball Schedule Is Abandoned

The Executive of the Basketball Association have decided to turn over to the Community League the money previously allotted for prizes. A series of Senior games may be played at the Mine Hall to decide the winners of the cup and medals. In the Intermediate League, the Executive decided that the High School being as yet undefeated, should receive the cup for the present season.

Rich Ore Vein Located At Esperanza

An ore vein eight inches wide, composed of the finest high grade argentite silver ever mined at the Esperanza is now being worked.

The ore vein was broken into during the week. It was located in the Lost Vein or No. 5 tunnel after 32 feet of drifting had been done. The tunnel was driven years ago by former owners a distance of 66 feet and reports are that extremely high grade ore was taken out at that time. The vein has again been picked up and great credit is due the mine manager, N. Fraser, for his excellent judgement in re-locating this rich vein. The ore is being drifted on to the west, and depth is being gained as the tunnel is extended.

ANYOX NOTES

You can't afford to put off ordering your new suit any longer. See Stan. Ballard, Anyox Tailor Shop.

Mr. Howard Purchase, teller at the Canadian Bank of Commerce, left on Thursday for Prince George. His place is being taken by Wm. Dickinson of Victoria.

D. F. Davidson arrived on Monday from Victoria.

Constable Wm. Smith arrived back on Thursday from Victoria.

Morley Shier arrived in town on Thursday to investigate any possible shortage of explosives.

S. E. Parker was an arrival on Thursday from Vancouver.

Harry Tanum arrived from Seattle on Thursday.

L. Richardson, insurance adjustor arrived on Thursday and departed on the same boat.

A cigar that pleases on account of its quality. The El Doro. Try one and be convinced.

Plans Being Formulated For Rebuilding Gymnasium

A bigger and better Gymnasium is the intention of the Commuuity League. When an adjustment has been made by the insurance company it is possible that plans will take more concrete form.

One feature often mentioned in connection with the new structure is a swimming tank. To offset the added cost subscriptions may be taken and the subscribers credited with admission tickets to the amount subscribed.

Retiring Council Community League Deserve Thanks

On February 27th. the annual meeting of the Anyox Community League will be held. At this meeting reports of last year's operations will be read, and new Councillors elected for the coming year.

Viewed from an impartial point of view the past year has been an exceptionally successful one for the League, and this success is solely due to the sound methods employed by members of the Council in making decisions on the various problems as they arose; their co-operation with the secretary, F. M. Kelley—whose experience in community matters is almost unequalled—also greatly assisted in the successful functioning of the Community League for the past year. The result is, the League is in as strong or perhaps stronger position than it was 12 months previously, and everyone who are members find it hard to register any legitimate complaint. Those who are not members may find fault, but they really have no grounds, for if a person does not put his shoulder to the wheel and push, he certainly should not persist in trying to put a block in the path.

View the different utilities operated by the Community League: pool rooms, picture shows, library, reading rooms, gymnasium, sports, etc. and then imagine what conditions would be like if it ceased to exist. Its extinction would leave a void that could not and would not be filled.

The present members of the League have fulfilled their

Continued on Page 4

CARD OF THANKS

Mr. and Mrs. C. M. Smith of Alice Arm wish to thank their many friends in the north and Vancouver, for the kind sympathy and help extended to them during their sad bereavement.

Anyox people are reminded that the mail for Alice Arm closes on Thursday evening. Mail leaves Alice Arm for Anyox on Monday morning and Thursday morning.

The Herald printing plant is equipped to handle any class of printing from a visiting card to a mining prospectus. A fair price and prompt delivery.

Fire Consumes Anyox Gymnasium

Friday, February 10th. marked the conclusion of most indoor sports in Anyox for the present season.

Somebody's cigarette, no doubt, was thrown where it got a start unseen, and by midnight the flames had consumed most of the building.

The conflagation attracted a large crowd of spectators, many of whom suffered personal loss in addition to being sadly out of luck along with the Basketball Association, the Badminton Club, the Beach Athletic Club, the Girl Guides and other organizations. Nearly two hundred school children are at a loss for a place to play, and already the lack of a large hall for dances is being felt.

ALICE ARM NOTES

Mr. and Mrs. A. Beaudin and son Bobby returned on Monday from a vacation spent in Vancouver.

Norman MacLeod, who has spent the winter at Anyox Mine, returned to town yesterday.

Since our report of two weeks ago regarding the big ore strike at the Silver Cord, later information is to the effect that the ore body is even larger than was at first expected. Work is being pushed with all possible speed.

During the past week the weather has become much warmer and the snow is gradually decreasing. Unless protracted cold weather again prevails an early spring will follow one of the coldest winters on record.

Residents who spent the winter in the south are gradually returning, and soon the town will be again filled up, and the camp humming with the summer mining activities.

Memorial Service Held For Earl Haig

On Sunday night, February 19th. the Canadian Legion held a Memorial Service for Earl Haig, in the United Church.

The launch, Fisherman, in charge of Lee Intermelia will leave Alice Arm each Thursday for Anyox at 10.30 p.m. She will leave Anyox the following day (Friday) at 9 a.m. for Alice Arm. This schedule will be maintained until the Awake is again on the run.

Anyox Orchestra Will Conduct Sunday Concerts

Anyox probably does not fully realize that it possesses an orchestra that has been conceded by music critics to be of great merit. The Anyox Amateur Concert Orchestra, under the baton of Stewart Steele has given Anyox a prominent place in the annals of music, and occupies a warm place in the hearts of every citizen who has been privileged to listen to their playing.

Desiring to meet the oft repeated demands of citizens, and believing that the public will give generous support to the plan, it has been decided to give Sunday evening concerts, beginning Sunday evening, February 26th.

Stewart Steele has made sound progress with his orchestra and has never deviated from his determination to give his audiences the best possible. Acting as a unit under his leadership every member is a steadfast booster for Steele.

Continuation of the Sunday concerts will depend entirely on the support given by the public, and if the citizens of Anyox respond to the opportunity offered, the concerts will be given for an indefinite period.

Popular as well as classical music will be on the programme, request items also being a feature that will be taken care of. It is the aim of the organization to give a concert that will appeal to the lover of music in all its form, and the public may rest assured that no particular class will be exclusively catered to, but that an attractive bill of good popular music will constitute the weekly programme.

Arthur Smith, Aged Four Years Passes Away

The death occurred on Friday, February 10th. at the Vancouver General Hospital, of Arthur Smith of Alice Arm, aged 4 years and 2 months. The cause of death was lymphatic leucinuria.

He was the eldest son of Mr. and Mrs. C. M. Smith, and was taken to Vancouver a short time ago by his mother, after everything possible had been done for him in the north.

The funeral was held at Vancouver on Saturday, February 11th. and a large number of Alice Arm residents, who are spending the winter in the south attended.

The resolution made by H. F. Kergin, M. L. A. in the Legislature a short time ago, shows promising signs of bearing fruit. The matter has been discussed by members of the Legislature and they are unanimously in favor of the Federal Government opening negotiations with the United States so that Canada can acquire this strip of Coastline, which geographically and rightfully belong to her. Boundaries are delicate things to settle, especially when the decision is in the hands of a third uninterested party. Canada has never been satisfied with the decision---and who can blame her after glancing at the map---and as she was not satisfied the matter was bound to be again brought up. The United States have advised Canada that she would appreciate being allowed to fully exercise her treaty rights for navigation on the St. Lawrence River. This she can not do unless Canada is sympathetic. If the St. Lawrence and canals were made navigable for the enormous inland merchant fleets possessed by United States it would be worth untold millions to them. Any expenditure that would be incurred to deepen the river and canals would benefit the United States far more than it would Canada. The United States purchased Alaska from Russia for a few million dollars, and surely if she is allowed full navigation rights on the St. Lawrence she would be willing to surrender the coastline or the whole Alaskan territory. The purchase of Alaska was good business. It gave the United States an opportunity to develop a virgin country rich in minerals, fur and fish. They quickly availed themselves of the opportunity, for in a few years the enormous herds of valuable fur seals were almost extinct. The fishing industry has been developed to the limit and the scarcity of fish is causing anxiety. The mineral production is on the down grade. In 1926 minerals worth $17,664,800 were produced, but in 1927 it had fallen to $14,445,000. The population is also decreasing, so that the territory is not such a valuable asset to the United States as many imagine. Annexation by Canada, however, would spell prosperity, for it would be merged with a vast rich country, to the Alberta border and beyond, and north to the Arctic Circle. The taking over of Alaska would give easy transportation facilities to the whole of North-western Canada, and it would be instrumental in creating many busy seaports on the coast. It would benefit everyone concerned. Geographically Alaska belongs to Canada and sooner or later, by some means she will acquire it.

Copper Production of Belgian Congo Increase

In 1927 the Union Miniere du Haut-Katanga, which is situated in the Belgian Congo, Africa, produced approximately 88,000 long tons of copper, a satisfactory increase over the 1926 production.

During the first six months of the year, production was below normal; all efforts being put forth to further the construction programme, particularly that of the reverberatory furnaces. Increase in production since June has been marked. The company is the sixth copper mine of the world and accounts for some 6 per cent. of the world's production.

Liquor Board Secret Service Operators Fired

The secret service system operated by the Liquor Board Control has been discontinued, the public accounts committee has been told by the Attorney General. The expense incurred by the Board for secret service and law enforcement in the year ending March 31st., 1927, totalled $134,000, including travelling expenses and court proceedings and was partly recouped from the municipalities.

Mr. Manson explained that the present system of carrying on secret inquiries consisted in the transfer of permanent employees to districts needing investigation.

Minister of Mines Warns Against Foreign Investments

A recent statement made by Hon. William Sloan, warned investors against foreign enterprises. He declared that British Columbia mineral properties offered plenty of opportunity for investment. While the government was empowered to investigate and report on B. C. enterprises it had no way of checking up foreign operations.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced Minerals as follows: Placer Gold, $78,018,548; Lode Gold, $126,972,318; Silver, $80,787,003; Lead, $106,976,442; Copper, $209,967,068; Zinc, $50,512,557; Coal and Coke, $284,699,133; Structural Materials and Miscellaneous Minerals, $50,175,407, making its mineral production to the end of 1926, show an

Aggregate Value of $988,108,470

The substantial progress of the Mining industry of this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,507,968; for five years 1906-1910, $125,534,474; for five years, 1911-1915, $142,072,603; for five years, 1916-1920, $189,922,725; for five years, 1921-1925, $214,726,650; for 1926, $67,188,842.

Production Last Ten Years, $429,547,755

Lode mining has only been in progress for about 25 years, and only about one-half of the Province has been even prospected; 200,000 square miles of unexplored mineral bearing land are open for prospecting.

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports covering each of the six mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES,
VICTORIA, British Columbia

Pulverized Coal to Replace Oil as Fuel

Recent advices from Great Britain, Belgium and the United States show that a solution of the problem of the competition of coal with fuel oil has been solved by the use of pulverised coal and high pressure boilers. This combination is said to provide the most economical power ever discovered. The results of U. S. Shipping Board tests have been published in the press. The claims therein made are substantiated by the Imperial Chemical Industries Company, which is installing at Bradford a pulverized coal plant operating steam boilers under a pressure of 750 pounds to the square inch.

New Company Formed to Work Flin Flon

Hudson Bay Mining & Smelting Co. is the name of the new corporation that will be formed to take over the Flin Flon properties in Manitoba, recently acquired by the Harry Payne Whitney interests.

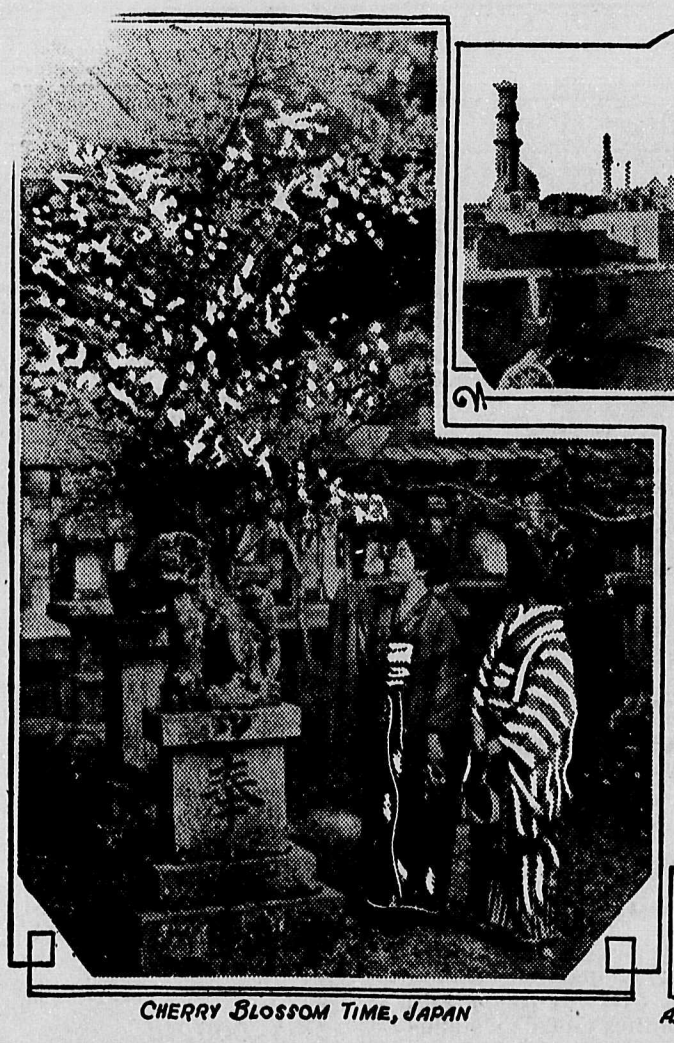
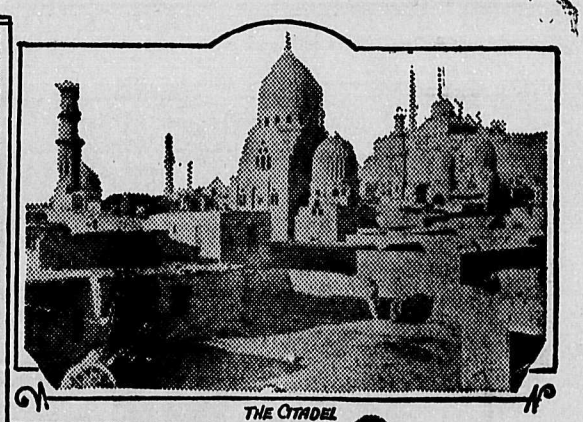
Psychology of Color on a World Cruise



CHERRY BLOSSOM TIME, JAPAN



THE CITADEL AT CAIRO

ALGIERS RUG MERCHANT

Colors that run rampant in the four corners of the world provide the contrasts that make a lasting impression on the memory of the world traveller. Districts wholly different in their colorful ensemble are but a few miles apart and the keynote of their striking contrasts is color. Today we hear much about color psychology, its effect on the senses of people and of animals; and how it affects temperament and even health.

Colors of the scattered ports of the world that burst from quaint bazaars and the costumes of the inhabitants on the streets, vie with those of nature. The landscapes and seas differ; colors in architecture, and the colors of princes, peasant and paupers, gladden the eye and make the blood run riot in unison.

From New York on December 2 the Canadian Pacific steamship Empress of Australia, will commence another cruise to the contrasting ports of the world. This vessel will make an entire circuit of the globe anchoring in 56 ports and visiting 21 different countries, covering during the four-months cruise approximately 28,400 miles.

Funchal the Capital of Madeira, and the first port of call is radiant with gaily colored houses and gardens; Costumes here are likewise brilliant. Naples with the wonderful blue of its sea and sky, with Mount Vesuvius at one side and the Islands of Capri, Ischia and Procida in the distance, affords a vision of loveliness.

Japan in cherry blossom time is a fairyland of color and sunshine, and Fujiyama towers above the masses of bloom, its white summit contrasted against the blue sky. New Year's eve in Cairo is most festive and here colors run riot. The bazaars, the palaces and bright hued mosques with their numerous minarets and domes are color schemes of rare beauty. Each of the countries offers an ever-changing vista of color and strike vividly into the memory, causing the traveller to become interested, consciously or not, in color psychology.

One of the features of the world cruise of the Empress of Australia, is the way detail worries have been taken out of the hands of the members of the cruise party. From start to finish the ship is their home. Worries in connection with foreign money, customs regulations and language are a thing unknown to the passengers, as these details have been worked out months ahead and handled entirely by the cruise managers on board.

WATER NOTICE

USE AND STORAGE

TAKE NOTICE that William Andrew Wilson whose address is Alice Arm, B. C. will apply for a licence to take and use fifteen cubic feet of water per second out of Granite Creek, which flows easterly and drains into Kitsault River, about six miles above Alice Arm, B.C. A 150 foot head damsite and pipe line will be located on Riverside Mineral claim, near the Dolly Varden Railway. The water will be used for mining and milling purposes upon the mineral claims described as the Riverside Group. This notice was posted on the ground on the 30th. day of January, 1928. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Prince Rupert, B. C.

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

WILLIAM ANDREW WILSON, Applicant.
By J. A. Wilson, Agent.

The date of the first publication of this notice is February 4th. 1928.

duties excellently. They have hewed straight to the line, giving everyone a square deal and favoring none. It is hoped, that should they not be re-elected, that their place will be taken by others, who will show the same fair-mindedness and sound judgement.

Absence of trivial bickerings marked the meetings during the past year. All questions were discussed with an open mind, and an understanding thus quickly reached. There is no reason why the same happy state of affairs should not exist this year, and with the indefatigable secretary, F. M. Kelley, at the helm the members of the Council of the Anyox Community League will, at the end of the coming year again receive the meritorious gratitude of the members.

The above was originally destined for the editorial columns but unfortunately space did not permit.—Ed.

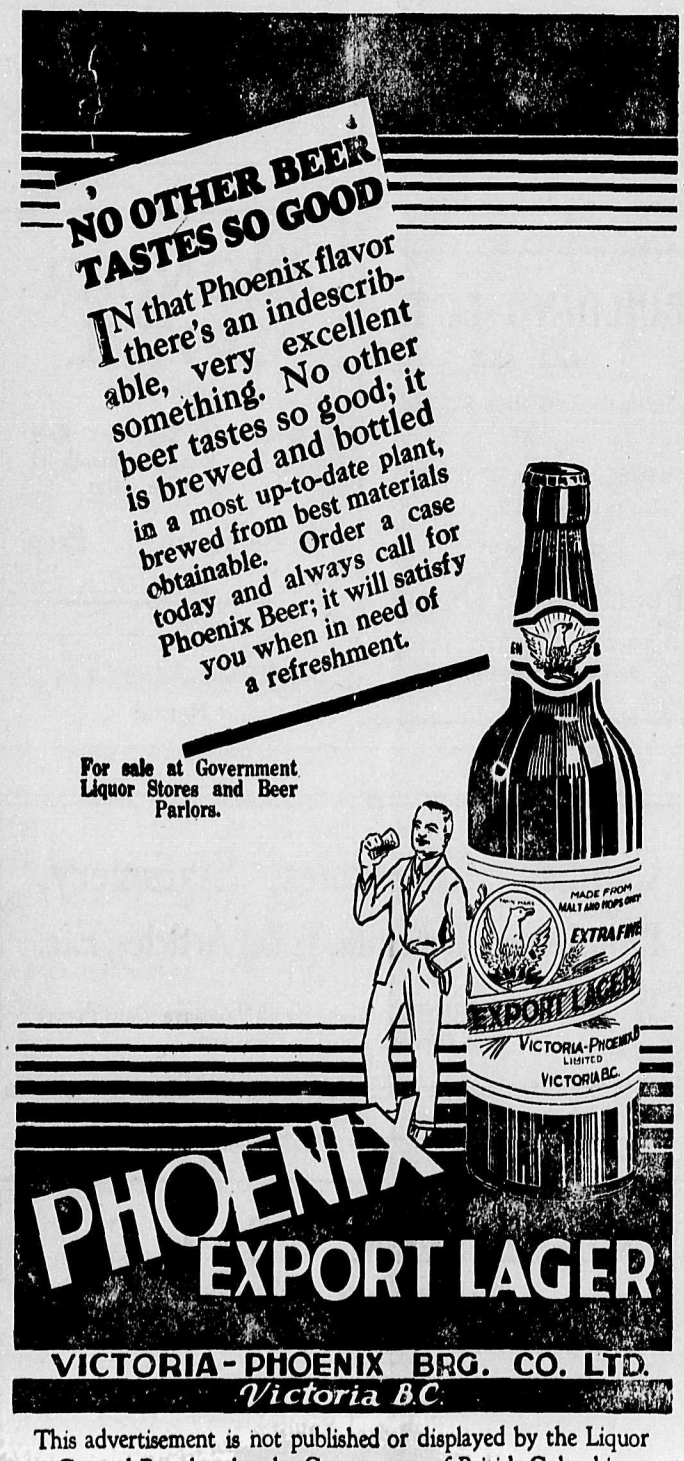
LARGE FAMILY PARTY FOR ALBERTA FARMS

MANY more inquiries are being made in the United States for farm homes in New Ontario than ever before, according to a Dominion Government official stationed at Detroit, but Manitoba and northern Saskatchewan and Alberta is the objective of most of those now being sent north or who are negotiating to cross the line.

"I am sending a number this spring to northern Alberta, around Lac Labiche," said this agent. "In June, 1923, I sent from here to that place 35 people in one car, ALL THE FAMILIES OF THE FOUR PLAMONDON BROTHERS. They lived at Provement, Mich., and their parents originally came here from Quebec. These people were experienced farmers, had a little money and prospered from the first. They have written their friends and relations and are responsible for many more going into Alberta. There are many Quebec French in Ohio and Michigan and many of them are returning to British soil. I do not think it is an exaggeration to say that fifty per cent of all those now crossing the line both to the prairies and New Ontario, are former Canadians going home or Americans who have previously resided on Canadian farms."

Photograph shows the Plamondon families when they left the Canadian National train on reaching their destination.—C. N. R. Photos.



This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.
