Inauguration of the Granby Polytechnic

Great Interest Taken in Movement
by the People of Anyox

The inauguration of the Granby Bay Polytechnic, Anyox, B. C. was held at the Recreation, Hall, on Friday evening the 14th inst. The meeting was held under the auspices of the Anyox Community League and the School Board, and President Robert Armour was in the chair.

After the chairman's opening remarks, he called upon Mr. H. S. Munroe, General Manager of the Granby Consolidated Mining, Smelting & Power Co., Ltd., who said in part: "This is taking an unfair advantage of me as I do not know what it is all about. I was under the impression that Mr. Pinder-Moss was going to outline the whole scheme, and I would tell you all what a good thing it was."

You have all seen the curriculum and the Granby Company is most anxious to co-operate in every possible way to make these schools a success, and I hope they will be received with enthusiasm and that this enthusiasm will last throughout the whole term."

Mr. H. R. King, chairman of the Anyox School Board, gave a brief review on the work of the Technical Classes in Anyox. He stated that two years ago we had our first class of forty students, who took up Mineralogy, Smelting, etc. This class was very successful and the students were thoroughly satisfied. The second year we had many more classes and students, so the School Board engaged Mr. Lambert to find a Director for the Technical work when he was out on his vacation this summer. Mr. Lambert obtained the services of Mr. John Pinder-Moss who has had wide experience in Polytechnic classes, and his work is proving very satisfactory.

Mr. W. H. Lambert, Principal of the Anyox Schools, spoke on the co-relation of technical and theoretical work. He contended that although theoretical work is largely a failure, yet the facilities of this town (the Coke Plant, Hospital, etc.) depended upon the theoretical work done in the schools. He pointed out that 44 per cent of the

pupils graduating from Grammar Schools do not reach the High Schools and University graduates are forced to work for very small salaries, owing to lack of technical knowledge. He stated that Classics, Mathematics, Modern Languages and Technical Training should be incorporated in every ideal school, and the night schools as outlined by Mr. Pinder-Moss are based on the best system in the world—the system now used in England.

Mr. Pinder-Moss stated that 2.7 per cent of the population is all that reaches the universities of Canada and the United States. Mr. Lambert had stated that 44 per cent of the pupils never reach High School, but from figures received from Washington, Mr. Pinder-Moss shows that 63 per cent do not reach the High School.

Mr. Pinder-Moss further pointed out that although 6000 were unemployed in Vancouver, and 10,000 in Montreal were clamouring for 100 jobs in the Harvest Fields on the Prairies, yet from statistics, there is no unemployment to any appreciable extent in Germany. Germany for the past fifty years has been leading the education of the world. The indemnity which France paid in 1870 was used for the rejuvenation of the educational system.

In Leipzig there are forty Technical Schools and one High School. In Winnipeg and Toronto there are about five or six High Schools and two Technical Schools. In Edmonton there are five High Schools and one Technical School. Anyox now has one High School and one Technical School, a properly balanced ration of education.

In closing the meeting, Mr. Armour, President of the Anyox Community League, speaking for himself and the Council stated that they were anxious to co-operate in every way possible to make the Polytechnic a success.

The League orchestra rendered several much-appreciated selections throughout the evening.

Col. C. W. Peck, V.C., ex-M.P. for the Federal riding of Skeena, will be an independent candidate in the election campaign now in progress.

"I want to go back to Ottawa with my hands free to deal with any situation that may come up, concerning the north country irrespective of party," he stated.

Ladies Tennis Cham- pionship of Anyox

Won by Miss A. McMillan

On Tuesday afternoon, Mrs. D. Deane and Miss A. McMillan, played off the finals for the Ladies championship of Anyox.

Jupiter Pluvius was kind and turned off the rain for half a day. Both ladies were in fine form and played a keenly contested game, which created quite a little enthusiasm amongst the spectators, the score running close all the way through. Mrs. Deane taking the lead in the first game. Miss McMillan taking the second. Not until the last minute could anyone say who was to be the winner, the contestants having equal share of the honours. The final score was 7 to 5 in favor of Miss McMillan.

Both ladies were recipients of congratulations of the crowd at the close of the game. Miss McMillan for winning and Mrs. Deane for the excellent fight she put up.

Alice Arm School Is Completed

The public School which was finished on Friday, is now ready for occupation and it is expected that school will be held there on Monday.

The main room is 23ft. by 29ft. inside, and an ante room in front, 10ft. by 14ft. Toilets, wood-shed and coal bin are situated at the rear of the school room, and a closet has been built in the school room for the storage of school supplies.

The inside of the building downstairs has been V-jointed and varnished throughout, and big windows give lots of light.

The living quarters for the teacher is upstairs and this has been beaver-boarded and tinted and makes a very pleasant room indeed. The public library of Alice Arm will be located in the New School, under the supervision of Miss Boa.

The school, now it is completed, is a great improvement over the old quarters in the Anglican Church and is a credit to any town the size of Alice Arm. Great credit is due to the public spirited citizens of Alice Arm for the energetic manner in which they carried the project out.

The School cost in the neighbourhood of \$2500.

A play platform, 20ft. by 24ft. will be built in front of the school as soon as possible, for the use of the children.

Mining News of Alice Arm District

Moose Mine to Work Throughout Winter

Work at the Moose Mine at present consists of outside work. Ore bunkers are being built, so that ore taken out of the mine during development work will not be wasted. A winter supply of fuel is being cut and all outside work is being finished up before the heavy snow falls.

According to present plans, a small crew will be worked on the property doing development work throughout the winter. Work on cross-cutting the ledge in the lower tunnel will be resumed as soon as outside work is completed. This cross-cut, at present shows the lead to be 18 feet wide.

Tunnel on Last Chance In About 55 Feet

The tunnel being driven on the Last Chance by Archie McPhail and Pat Morley, is in about 55 feet and it is expected that ore will be encountered at a distance of 200 feet, and the depth obtained will be about 175 feet. The tunnel will cross-cut the ore body, which has been traced on the surface for about 1000 feet. Three hundred

feet of stripping has been done at one point on the lead and shows the ore body to be about 70 feet in width. An open cut of 45 feet has also been made about 1000 feet distant from where the stripping was done and the cut is not yet across the ore.

The Last Chance joins the Moose mine, and it is believed that it is the same ore body on which development work at the Moose proved so successful this summer.

A tunnel is being driven by Mr. Pete Anderson on the Vanderhoof and Columbia claims situated on Clearwater Creek and he intends to work there throughout the coming winter. All supplies are on the ground, and Pete expects to show up a big body of ore before next spring.

Mr. Louis Reynolds, accompanied by Dan Kennedy, spent several days this week doing work on the Dixie No. 1, which is situated on McGrath mountain. Louis brought down some fine specimens of ore which he is having assayed. There are some first-class showings on the property, one lead being 40 feet wide and has been traced on the surface for a distance of over 300 feet. It is ideally situated, being only a few miles from town and at a low elevation.

Well-known Residents of Alice Arm Leave the District

Mr. and Mrs. George Pratt, who were two of the oldest residents in Alice Arm, left town this week to reside on their ranch in Oregon. Mr. Pratt, who is over seventy years of age has been troubled for a considerable time with cancer in the eye and his failing eyesight made it impossible for him to follow mining any longer. Mr. and Mrs. Pratt have been residents of Alice Arm since 1909 and formerly lived in a cabin where the Hotel now stands. He sold this property in 1916 to Mr. Ole Evindson, and moved across the bay, where he has resided ever since. He has sold all his mining interests at Alice Arm, with the exception of the property above the Esperanza mine, in which Mr. Ralph Ingraham has taken an half interest.

Work on Government Wharf Has Started

Mr. W. T. Muse, who arrived from Prince Rupert last Friday, has commenced work on the government wharf at Alice Arm. The two outside bents of piles have their footings under water, which necessitates the use of a diver. The diver arrived on Monday and commenced operations the following day. The holes for blasting the footings under water will be drilled with a 30ft. steel, so that it will be possible for the drillers to work above water. Footings for the piles above low water are being blasted out. The Prince Albert is bringing up piles, lumber, etc. for the construction of the wharf and is expected to arrive at any time.

The Granby Bay Polytechnic

The Granby Bay Polytechnic with Mr. J. Pinder-Moss, A.E.I.C. as organizer, has prepared an elaborate programme for the coming winter, and it is hoped he will get the whole-hearted support of the citizens of Anyox, so that the programme will be carried out successfully. There are fourteen different departments of learning. Teachers have been appointed, and the dates, meeting places, and time have been settled for the various classes. This is an age of learning. Everyone is clamoring for knowledge that will enable them to better their position in life, and there will be no excuse for anyone in Anyox if they fail to take advantage of the splendid opportunity that is now open to them and enroll in one of the several classes of the Polytechnic. The long winter evenings can be spent in no better way than the acquiring of knowledge. It is always the one that knows a little more than the other fellow that gets promotion and he is the one that holds a job when times are slack and the staff is being reduced. There is no royal road to learning. It is acquired by sheer hard work and the person that thoroughly studies and masters the subject he undertakes this coming winter will have acquired knowledge that will benefit him all his life.

Granby Company Investigating Coal Fields

Engineers representing the Granby Co. have recently been investigating coal and iron deposits on the Copper River, which is a tributary of the Skeena. It is well-known that the Cassidy coal does not make a good coking coal when used by itself and it has been necessary to import coal from Alberta to mix with it to produce a coke suitable for smelting the company's ores.

By building a railway about thirty miles in length the coal can be delivered at navigable water on the Skeena River, so that from a transportation point of view it is particularly well located for a supply of coal to the company's by-product plant at Anyox.

Report of Workmen's Compensation Board For 1920

The following is extracted from the fourth annual report, recently published by the King's Printer, Victoria.

The operations of the Workmen's Compensation Board in British Columbia for the year 1920, covered 113,000 workmen with a pay roll of \$132,000,000.

During 1920, 1417 new firms were added to the list of employers, while 869 were cancelled, leaving a net increase of 548.

Of every \$100 collected from the employer, \$95.92 goes directly to the workmen or their dependents without any expense whatever to them.

After four years' operations of the Act the reserves amount to \$1,715,854.02. This amount includes an item of \$15,000 per year (now amounting to \$60,000) which has been set aside as a catastrophe reserve to protect against a possible catastrophe that may occur and which may not be attributable to or be a proper charge against any single class of industry.

During the year 1920, 20,905 accidents were reported, of which 20,689 were non-fatal and 216 were fatal. This number does not include several thousand trivial accidents in which first-aid service only was rendered, and in which there was no doctor required or time lost and no claim made.

There were fewer fatal accidents in 1920 than any year, since the Act came into force. During 1919 there were 277 fatal accidents reported; in 1918 there were 240 and in 1917 there were 217 fatalities, or an average of 237 for the four years.

Since the present Act came into effect on January 1st, 1917, a total of 74,323 non-fatal claims have been filed and 950 fatal accidents reported. Arising out of the fatal accidents, pensions have been granted in 440 cases to dependents. There is now a total of 1,326 persons receiving monthly pension cheques resulting from fatalities of the four years.

By reason of thirty-four widows of deceased workmen having remarried and been paid the statutory allowance of \$480, further payments to them have ceased. Pensions however, in respect to the children of the first marriage continue until such children reach the age of 16 years.

During the year 11,166 workmen received compensation in respect of lost time. Of the non-fatal accidents, 7,844 were such as did not necessitate a longer time loss than three days. Medical aid, however, was paid in respect of same.

The total amount paid on claims during the year was \$1,711,637.29, being 23 per cent. more than 1919. This was due mainly to the increased volume of business and the increase in widows' allowances of 75 per cent., children's allowances of 50 per cent., and other dependents of 50 per cent.

A total of 40,276 cheques were issued during the year to workmen, dependents, and in respect of medical aid.

Reindeer Carcasses Shipped from Nome

Three thousand reindeer carcasses averaging 150 pounds each, are awaiting shipment at Nome, to Seattle. The Nome company producing reindeer on a commercial scale, says it can ship the meat 2,500 miles by water to Seattle and then distribute to the Middle West and also to the east so that reindeer meat, now growing in demand, can be sold as cheaply as beef. Last year, 1,500 carcasses were shipped to Seattle and placed in public cold storage terminals and then distributed over the United States.

SYNOPSIS OF LAND ACT AMENDMENTS

Minimum price of first-class land reduced to \$5 an acre; second-class to \$2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of \$10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of \$360 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of \$10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under the Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the great war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Piano Class

In Order to have a First-class Piano Teacher, we have to guarantee a certain number of pupils. Those wishing to take Lessons, kindly turn their names into Mrs. W. F. Eve, or the Secretary of the Anyox Community League.

Ontario Mines Paying Large Dividends

October is a big month among the dividend paying companies of Northern Ontario.

The gold mining industry, represented by the Hollinger, and the Dome, will pay \$365,166.75, while the silver mining industry will be represented by the Nipissing and Kerr Lake, which two companies will distribute \$255,000, making an aggregate of \$620,166.75 for the

month. Following is summary: Hollinger Consolidated \$246,000; Nipissing Mines \$180,000; Dome Mines \$119,166.75; Kerr Lake mines \$75,000; total \$620,166.75.

The month of December will probably be a big month also, as during the closing month of the year it is the custom of the Hollinger to alone distribute \$492,000.

A new coal field has been discovered in Shantung province, China, estimated to contain an immense amount of smokeless coal.

The National Crisis

"My appeal is to the whole people; to every man and woman who wants to do right by this country; to everyone who breathes the spirit of our fathers who founded this British Dominion."

—ARTHUR MEIGHEN

THE Election to be held December 6th will be the most momentous in Canadian history; for as men and women vote will depend the economic stability, the political stability and, indeed, the national stability of this country.

Today we find group striving against group, class against class, the industrial and financial structure of the country assailed by false and unsound doctrines and theories, while our great neighbour to the south has adopted a trade exclusion policy directed against Canada's vast agricultural interests.

The currencies of nearly every country in the world are depreciated. The Canadian dollar in the United States is subject to a heavy discount causing a loss of over one hundred million dollars in exchange annually.

Europe is overwhelmed with war debts—unemployment is acute—and the restoration to pre-war conditions is slow.

While Canada is in a much more favorable condition than many countries, yet there is evidence of stagnation, instability, unemployment and lack of confidence.

Taxes are heavy because of the country's efforts in the Great War, but have become burdensome on account of the misconceived policies and blunders of Governments that directed Canada's affairs prior to 1911.

These conditions are largely the direct aftermath of the war, but they must be dealt with fearlessly and constructively. This is no time to consider experimental changes, or the theories of visionaries.

This is no time for Crerar and his Free Trade policy.

This is no time for King and his wobbling "charted" policies, varying with each provincial boundary.

It is the time to cling to orderly, stable Government in the interest of all the people; to be guided by the experience of the past, proceeding upon lines that have been proven sound.

It is the time to place the destinies of Canada again in the hands of a Government led by a sane, courageous Canadian who has safely brought the country through the trying years of reconstruction, and upon whom we can rely to retain and initiate policies in the interest, not of a group or class but of all the people.

It is the time to support Arthur Meighen and his Candidates.

Meighen will lead us through

The National Liberal and Conservative Party
Publicity Committee

Children's Service, 10.30 a.m.
Evening Prayer, 7.30 p.m.

ALL WELCOME

Mrs. H. Carney is now agent for the Amateur Finishing Co., of Vancouver for Developing, Printing and Enlarging all kinds of Photographs. Prices on Application.

Mr. J. B. Robinson, of Prince Rupert was a visitor in town for a few days this week. Mr. Robinson was one of the pioneer business men of Alice Arm, being interested in the celebrated Kitsault House.

Mr. George Young arrived back on Monday from Stewart, where he has been inspecting roads and trails.

See Al Falconer for Wood or Coal

Mr. J. G. Johnson left on Monday for Seattle. He has been working on his claims, the Nome and Yukon, situated on Bluebird Creek, and is well pleased with the ore he has shown up this summer.

The School children were given a half holiday on Tuesday in order to see the man go under the water and come up again without getting wet, in other words the diver was working on the new wharf.

Spud digging and strawberry planting has been the chief recreation of the citizens for the past week.

Mr. S. Dumas left on Thursday for Vancouver. He may go east before returning home. Louis Reynolds is in charge of the cigar store during his absence.

The logs for strengthening the roof of the skating rink are cut and will be floated up as far as possible the next high tide. The work of placing them will be done by volunteer labor.

Mr. Marshall Smith arrived from Anyox on Thursday, to spend a few days.

Mrs. Gray arrived home from Prince Rupert on Thursday.

John Skrl, brother-in-law of Mrs. Helen Nucich, returned to his old home in Lyublana, Jugo-Slovakia. Mr. Skrl has resided here for the past three years, and leaves many friends who wish him the best of good luck.

See Al Falconer for Freight and Pack Horses.

Constable E. W. Davis, of the R. C. M. P., arrived in town on Thursday.

The duck hunters are busy these days scaring the life out of the ducks over by the Illiance River.

Mr. Gus. Anderson returned home from Prince Rupert on Monday.

Mrs. J. Esplin and baby, arrived from Anyox on Thursday, and will be the guests of Mrs. H. F. Kergin

ANYOX NOTES

The Anglican Church are holding a Sale of Work and Home Cooking on Saturday, October 29, at 3 p.m. Afternoon tea will be served.

Anyox people would like to see copper take a notion to soar like eggs, which made a 25 per cent increase in less than a month. If copper did that these old partners ham and eggs would be re-united on the breakfast table.

Dr. Patterson arrived from Vancouver last week, to take the place vacated by Dr. Street, at the mine. He comes from the Vancouver General Hospital, and was overseas during the war.

Sign the petition now being circulated for a road into the Naas Valley, and help develop the district.

Mrs. J. M. Davis arrived home on Thursday.

Mrs. D. Deane, the popular librarian, left on Thursday, for holiday in the south. Mrs. P. Clark will act as librarian during her absence.

Messrs. W. F. Eve, D. S. Fyfe and H. Selge, returned from their hunting trip on Thursday. They hunted Porcher and the adjacent islands and stopped over in Prince Rupert for a few days. They reports the islands around Rupert full of game, but the dear little deer are a wee bit shy when you want them to act as targets.

**A meeting will be held on
Saturday, October 29th, at 3
p.m. of all Parents interested
in forming a Parents and
Teachers Association.**

of the A. C. L.*

**Work on Silverado
is Being Rushed**

Work is being rushed on the Silverado, at Stewart in order to have everything finished before the winter. Supplies and equipment is being rushed up the hill as fast as the horses can be loaded and got away. A part of the tram equipment is already on the ground and the preliminary work of preparing for the erection of the towers is well under way.

BRITISH COLUMBIA

The Mineral Province of Western Canada

Has produced minerals valued as follows: Placer Gold, \$75,944,203; Lode Gold, \$102,753,823; Silver, \$53,668,284; Lead, \$46,637,221; Copper, \$161,513,864; Zinc, \$19,896,466; Coal and Coke, \$212,573,492; Building Stone, Brick, Cement, etc., \$32,168,217; Miscellaneous Minerals, \$1,037,408; making its mineral production to the end of 1920 show an

Aggregate Value of \$706,192,978

The substantial progress of the Mining Industry of this Province is strikingly exhibited in the following figures which show the value of production for successive five-year periods: For all years to 1895, inclusive, \$94,547,241 for five years, 1896-1900, \$57,605,967; for five years, 1901-1905, \$96,509,968; for five years, 1906-1910, \$125,534,474; for five years, 1911-1915, \$142,072,603; for the five years, 1916-1920, \$189,922,725.

-Production During last ten years, \$331,995,328

Lode-mining has only been in progress for about 25 years, and not 20 per cent of the Province has been even prospected; 300,000 square miles of unexplored mineral bearing land are open for prospecting.

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees. Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.
