5 cents each.

## Council of Community League Transacts Business

At a special meeting of the Anyox Community League Council on Monday, Ed. Ashton was appointed as caretaker at the gymnasium. Much work has been done in the pool room to make it an even brighter place to while away leisure hours during the coming winter. Paint and enamel have been generously applied. Thirty-six new cues have been added, cloths and cushions have been renovated and several new games are available.

For the theatre-goers the secretary has arranged with J. E. Archer, Vancouver manager of First National, who was a visitor here this week, to show such Stellar attractions as "Smiling Irish Eyes," "His Captive Woman," "Sally," and "Paris." There will not be as many black moments during the performances hereafter as the League has purchased several double reels upon which the films will be wound before showing.

In the library an attempt is being made to supply more and better books and to make the reading room a more attractive place.

With the appointment of a caretaker the gymnasium will immediately begin to serve the needs of those inclined to indoor athletics.

## Mining Men Visit Alice Arm

D. C. McKechnie, mining engineer for the Consolidated Mining and Smelting Co. arrived on Monday. He examined several mining properties in the district during the week. He visited the Upper Kitsault country, North East fork, McGrath mountain and down the inlet. He was accompanied by Mrs. McKechnie.

G. W. McMorris, president of the Kitsault-Eagle Silver Mines Ltd. arrived on Monday from Vancouver. He will make an examination of the big tunnel on the Sunrise Group on McGrath mountain, which has now entered the mineralized zone.

E. G. Davidson, mining engineer, who has inspected numerous mining properties in the Alice Arm district this summer, is expected to arrive on Monday from Vancouver. His visit here will be brief. Before leaving for the south he will examine the Elkhorn Group at Hastings Arm, where spectacular gold ore was recently located.

## Radio Meeting On Friday

A meeting of those interested in radio will be held on Friday evening, October 25th, in Recreation Hall. The subject of the cheap sets which are now on the market will receive special attention.

## Toric Mine To Operate Throughout Winter

Prominent officials of the Britannia Mining & Smelting Co. paid a visit to the Toric mine and other properties under option by the company, during the week. They arrived on Monday morning and left again on Wednesday afternoon.

The result of their visit was that plans have been made to conduct development work throughout the coming winter.

The visitors comprised W. J. Quigley of New York, president of the company; C. P. Browning of Britannia Beach, general manager; O. R. Whittaker of Denver, Colorado, consulting engineer; and C. V. Brennan head of the exploratory department, Britannia Beach.

In addition to examining the Toric, they also visited the Dolly Varden and Wolf properties, which the Britannia Co. optioned a few months ago.

Development work this winter will consist of sinking the shaft from the main level. This shaft was commenced a few weeks ago, and will be sunk to a depth of about 250 feet. A raise will also be made from the same level. Ore can then be developed on three levels.

## Silver Crest Property Gives Good Values

The Saddle property at Hastings Arm, which is being developed by the Silver Crest Mining Co. has the earmarks of developing into an important shipper. Latest reports from the mine state that the tunnel is being driven in a full face of ore.

The ore is of a good grade. Samples which were recently assayed gave returns of 15 per cent. lead, 35 ozs. silver, 20 cents gold, three-tenths of one per cent. copper and four per cent. zinc, with a total value of \$45.77.

The Saddle is ideally located for cheap transportation. A short aerial tramway connects the mine with the beach, and everything is now completed for the shipping of ore.

## Work On Elkhorn Group Is Suspended

Development work on the Elkhorn Group has been suspended until next spring. This property jumped into prominence two weeks ago when high grade gold ore assaying over \$8,000.00 per ton was located. The cause of the suspension of work this fall was snow conditions on the high altitudes, and lack of camp buildings. The cool weather of the past week did not permit open air camping. Development work will be undertaken next spring.

Miss E. Yaeger, attendant at the Red Parrot ice cream parlor, left on Wednesday for Vancouver.

## Arrives Alice Arm to Inspect Mohawk Property

Mr. Dave Thomson, president of the Winnie Mining Co. who have taken over the Mohawk property arrived on Thursday from Vancouver. He was accompanied by W. C. Arnett and F. Brown. They left yesterday in order to make an examination of the property.

### ANYOX NOTES

Miss Gladys Ballantyne left on Wednesday for holidays in the south.

Mrs. Dunn arrived on Wednesday from the south

Mrs. M. C. Irwin arrived on Wednesday's boat.

W. Calderoni arrived on Wednesday from a visit to the south.

Included among those arriving on Wednesday were: T. W. Skinner, M. Nakye, D. Eaton, H. C. Catnett, W. L. Kennedy.

Mrs. G. M. Lee left on Wednesday's boat. She was called south owing to the death of her father. Mr. Lee accompanied her as far as Prince Rupert.

Mr. and Mrs. J. A. Swanson left Anyox on Wednesday for the south. Previous to their departure a series of farewell parties were given on their behalf. They leave a large circle of friends, not only in Anyox, but the whole north, who are sorry to see them leave.

Henry Deeth left on Wednesday for Vancouver where he will take a position with Hoffer's Ltd.

Among those leaving for the south on Wednesday were: S. L. Thomson, Glen Gulich, J. E. Archer

Mr. and Mrs. Cook arrived on Wednesday from the south.

The popularity of the ElDoro cigar is increasing. There's a reason.

Mrs. A. Matanarchi was an arrival in town on Wednesday.

Judge Young and registrar H. McLeod of Prince Rupert arrived on Wednesday and left the same evening. While here they took several applications for naturalization.

### ALICE ARM NOTES

Jens Larson left on Monday for Vancouver accompanying his cousin, Miss Hedegaad who has spent holidays here.

Norman Fraser, managing director of the Esperanza Mining Co. left on Wednesday for Prince Rupert on company business.

Continued on page 4

## Several Applicants For Naturalization

While the SS "Prince Rupert" was in port on Wednesday night, His Honor Judge Young presided at the local court to take applications for naturalization. Those who applied for the privileges of citizenship were: Edward Hanson, Joseph Chycardo, Adolf Bopp, Frank Vresk, Michael Stefanek, Jacob Sauer and Wasyl Petrusiak. All have been law-abiding residents for some years and are vouched for in each case by two natural born citizens.

His Honor was heard to express a highly favorable opinion of the class of men who were presenting themselves for enfranchisement. These applications are forwarded to the Secretary of State who in turn sends the candidates certain forms among which is a copy of the oath of allegiance which the prospective citizen is to take before a local magistrate or justice of the peace.

## Anyox Golf Club Hold Tournament

During the last few weeks membership in the Golf Club has risen from 31 to 72. An increase in funds has permitted the making of many improvements to the course. Last Sunday twelve couples enjoyed a mixed foursome handicap tournament. The winners were Mrs. Learoyd and Sid Peters with 57 while Miss Blakey and Angus Cavers received the consolation prize for a score of 83. A fair sized "gallery" followed the players. Next Sunday the men will engage in a singles contest, individual scores to determine the winner.

## Anyox Basketballers Fail To Decide on Policy

Basketball is not much further ahead, despite the calling of two meetings on Monday and Wednesday. It is to be hoped that at the next meeting there will be a larger crowd of players and fans to determine a policy and discuss plans. The executive so far consists of President R. Deeth, Vice-President Geo. Winklemann and Secretary Ross Oatman.

## Anyox P. T. A. Meeting On Monday

The next meeting of the Anyox P. T. A. will be on Monday evening. In connection with the new high school course Mr. Clark will attempt to answer the numerous questions which are likely to arise. An invitation is extended to all who are interested in any phase of the subject. By courtesy of the church authorities the association will meet at 8 o'clock in the United Church Hall.

## Details Given of Anyox Night School Classes

Following is a detailed report of the Anyox Night School classes that will be in operation this winter. There is an opportunity for everyone to improve their learning. A chance that should not be lightly ignored. Leisure hours could not be spent more profitably than by attending one or more classes.

### Commercial Course:

This is a thoroughly practical course in book-keeping, typwriting, Isaac Pitman's shorthand system, etc. Office equipment such as typwriters, duplicators, etc., have already been procured by the School Board, and the necessary texts can be purchased from the instructor, Mr. H. B. Porteous. Students in this class should qualify for positions in any of these subjects. The class meets in Division I. Public School, Monday and Wednesday, from 7 to 9 p.m.

### Mechanical Drawing and Mill Building Design

The Mechanical Drawing course is adapted to any student from the one that has had no drafting lessons, to those of experience. It is so arranged that each student receives individual instruction, forming a class by himself. The work covers the subjects of projection and drawing to scales of various machined parts from single pieces to more complex problems.

For the Mill Building design work, some knowledge of mechanical drawing is essential to thoroughly understand the subject handled. The courses start as elementary as necessary, and progress as far as the season and the efforts of the students permits. Instructor, R. O. Cutler. The class meets in High School, Monday and Thursday 7 to 9 p.m.

### Electrical Course:

This course not only endeavors to give a short course in electricity but also a knowledge of the "Why?" of things electrical, such as motors and generators, their installation, operation and repairs; troubles, how to locate and remedy; transformers, how to connect up and care for them; gas engines, ignition systems; condensers and their uses and also the uses and properties of insulators.

T. L. Mitchell who so successfully carried on the class last year is in charge. The class meets in the Electrical Shop on Monday and Thursday 7 to 9 p.m.

### Milling Metallurgy:

The work in this class will cover a course in Metallurgy and all the processes used in Milling and Smelting. Details in flotation processes will be dealt with thoroughly and some practice given in Concentration. The metals studied are gold, silver, copper, lead

The members of the Council of the Anyox Community League are fulfilling their duties with unprecedented enthusiasm. They are supported by a secretary that is striving to serve the people even better than in previous years, and their efforts are producing results. Every kind of recreation is receiving their attention, and suggestions made by individual members are carefully considered. Indoor recreation of all kinds during the long winter months is being fostered. The library is receiving special attention, and the Reading Room is filled with periodicals from almost every English speaking country. To those who wish to study or keep up-to-date on world events, the library and reading room alone is more than worth the small monthly fee. Become a supporter of the League and by your assistance help those who are helping you.

When the buildings now situated on the new streets of Alice Arm have been removed and the streets cleared and side walks built, the town will present an appearance second to none in the province. The business section will be located near the waterfront. Farther back will be the residential section, while across the river small farms will be under cultivation. Alice Arm is fortunate in having such a large area for townsite and farming purposes. There is not another town in Northern B. C. that possesses such an area of rich level land. It is the duty of its inhabitants to assist nature in making it the town beautiful of the north.

An outlet to the Pacific coast for the Peace River country has been the cause of considerable discussion in the western press during the past two years. Everyone knows that an outlet to the coast will be provided at some time, but it is possible that a few years will elapse before it is done. President Beatty of the C. N. R., recently visited the coast and also

### Canadians Acquiring Railway Bonds

That Canadians are supplying a substantial portion of funds required for capital purposes in connection with the rapid industrial and agricultural development of the Dominion is evidenced by the fact that fully 11 Canadian banks and investment houses are included in the international syndicate offering an issue of \$30,000,000 Canadian National Railway Company 5 per cent 40-year bonds. These Canadian institutions, with their Dominion-wide clienteles, make it certain that these bonds will obtain a wide circulation in this country.

Another interesting feature is that the bonds, which are practically government securities, as both principal and interest are guaranteed by the Dominion government, are offered to yield over 5 per cent, reflecting the recent rising tendencies in yields in the bond markets.

### Sales of Copper Are Dropping Off

Reports at the latter of September announce decreased sales of copper at New York following the heavy demand in August. Stocks of undelivered copper at American refineries are the heaviest for 4 or 5 years and production of both refined and blister this year have beaten all records. Accumulations, however, have not yet affected price and some action is anticipated to prevent excessive supplies from accumulating. New York reports foreign sales satisfactory, Lead is in fair demand though volume has decreased somewhat. Prices remain firm. St. Louis reports a very weak demand for zinc with 80 per cent. of sales for spot shipment. London reports unfavorable situation in zinc due to sales pressure following overproduction.

The first electric railway in Canada was operated at Windsor, Ont., in 1886, after an experimental section had been tried out at Toronto Exhibition. The second electric railway was built at St. Catherines

the Peace River country. He stated that at the present time the needs of the settlers of the Peace River was being taken care of by the building of branch lines. When the country had been developed to a stage that sufficient tonnage could be guaranteed an outlet to some point on the coast would be provided. The date and place has still to be decided upon.

## British Columbia

Department of Mines

British Columbia, the Mineral Province of Canada, has produced up to the end of 1928, \$1,114,210,411. worth of mineral products.

AN EXPANDING INDUSTRY

Annual Mineral Production Values:

1919	\$33,296,313	1925	\$61,492,242
1921	28,066,641	1928	65,372,583
1923	41,304,320	1929 (Estimated)	70,000,000

Gold, placer and lode, silver, copper, lead, zinc, coal, and many miscellaneous minerals make up this output.

The Annual Reports of the Minister of Mines and Summary Reports, bulletins, etc., dealing with the mineral areas and mines, may be obtained, free of charge, on application to:—

Powder, Caps, Fuse, Steel and Tools. Rain test Clothing, Stanfield's Underwear, Hand-made Boots. A full line of Quality Groceries for Mining needs.

**BRUGGY'S STORE** Alice Arm

**Will Diamond Drill At Dunwell Property**

Following up a radiore survey which was made some time ago, Dunwell Mines Ltd. is diamond drilling its property to try and locate the faulted ore bodies.

The Dunwell, which is completely equipped for production, including a 100-ton mill, closed down in November, 1927, when ore in sight unexpectedly petered out and metal prices declined sharply.

A geophysical survey was made in 1928 and good "conductors" north and south were located.

It had been the intention to carry on about 2000 feet of diamond drilling to test the results of this prospecting. During 1926 and 1927 the stock was a sensation on western exchanges.

**Charles Bunting Visits Mines In Eastern Canada**

Charles Bunting, pioneer of the Portland Canal Camp, has returned from an extended visit to Toronto. He has brought with him interesting specimens of ore and semi-refined metals from the holdings of the International Nickel Company, Noranda and other eastern mines. In addition, he has a display of the ores found on the Premier in the early days of its development.

**May Increase Gasoline Tax**

An increase of the present three cents tax on gasoline to five cents on account of the extensive highway program planned is regarded at the parliament buildings as almost certain to take place at the next session of the legislature.

**Ore Movements From Mayo Increase**

Last season the total movement of ores and concentrates of the great Mayo camp totalled 4,500 tons, valued at about \$1,500,000. This year the movement will be 8,000 tons of a total estimated value exceeding \$2,600,000.

**Copper Production Declines**

The world's production of copper in August was 173,729 short tons, which compares with 174,347 tons in July and 196,820 tons in April, the peak month for the current year, according to the American Bureau of Metal Statistics. August production in 1928 amounted to 161,838 tons.

When at Smithers recently, Hon. W. A. McKenzie, minister of mines, exchanged greetings with Samuel Hunt, 91 years of age, who has prospected for 72 years and is still going.

**Premier Has Formulated Highway Policy**

Legislation for the creation of a highway classification and the expenditure of a million dollars on highway construction and maintenance in all parts of British Columbia affected by through traffic will be sought by the government at the next session, Premier Tolmie announced in an address before the Saanich Conservative Association.

The new highways will be termed arterial highways and will be built and maintained at the sole cost of the provincial treasury.

**Canada's Export Trade Increases**

Canada's trade in the five months ending August 31 amounted to \$1,044,883,786. Despite a reduction of nearly \$57,000,000 in wheat exports, the total for the five months was \$2,400,000 higher than the corresponding period in 1928.

**Pool Elevators Increase**

Three years ago there were only four grain elevators in Alberta belonging to the Alberta Wheat Pool. Now there are 437, representing an investment of over \$6,000,000. "The introduction of combines and auto trucks has speeded up harvesting on the Canadian praries to a remarkable degree.

**HEAP CASH MAYBE COMING TO RED MAN FOR OIL HOLDINGS**

The Stoney Indians on the Morley Reservation along the line of the Canadian Pacific Railway near Calgary, are benefitting by the oil developments in Alberta. Every man jack of the 640 members of the tribe, representing 125 families, receives \$10 per annum for oil lease rentals on the tribe's land and should oil materialize will receive a 12½ per cent royalty on all production, a certain amount of which will be set aside for agricultural implements. They gathered in all their Indian bravery of feathers and finely worked shirts, shawls and moccasins on the occasion of the first payment. Pictures show Chiefs Wolf Teeth, Lost Buffalo and Black Buffalo saluting the derrick, source of their new wealth. Chief Hector Crawler receiving payment from R. Hinton, Indian Agent at Morley; Indian with pipe in mouth is "Wild Man," son of "Wild Woman." Chief Wolf Teeth inside derrick with driller. Squaw Becky Beaver and papoose, counting her money. She looks heap happy.

## Details Given of Anyox Night School Classes

Continued from Page 1

and zinc. The class meets in the High School Thursday evening at 7 o'clock. D. McLeod, Assistant Superintendent of the Concentrator, is instructor. 25 are already enrolled.

### Engineer's Course:

J. McMillan is conducting this class. A large number have enrolled with a view to preparing themselves for the examination of fourth, third and second class standing. This class means business and is already down to hard work. They meet from 7 to 9 p.m. on Tuesday and Friday in the High School.

### Music, Vocal:

The class meets in the Public School Monday evening under the direction of Mr. H. B. Redman. While the course will be instructive, dealing with the theory of notation and training in voice culture, the practice in part singing should make it one of the most enjoyable of winter occupations.

### Music, Orchestral:

Stewart Steele is again in charge of this work by the unanimous demand of the class. The value of the work last season is well known to all on account of the public entertainments given.

### Music—Band:

J. J. H. Varnes will continue the work he has given such care to for a number of years.

### English for Newcomers:

This class far outnumbers any other single subject and great care in the selection of the right stamp of teacher is always taken. The prescribed text "The new Canadian" outlines a most practical course and in one season a total stranger to English gains a fair practical understanding of both the written and spoken word. Teachers assisting with this work are: Mr. A. C. Vogee, Miss Heaney, Miss Greenwood, Mr. S. H. Bartman. Classes are conducted at the Public School, the Mine Club, and the Bonanza Reading Room,

## Alice Arm Notes

Continued from Page one

C. H. Homer, provincial assessor, arrived on Monday from Prince Rupert. His visit was in connection with the new ownership of lots

on the former Indian Reserve. He left again on Wednesday.

Gus Pearson returned on Monday from a visit to Prince Rupert.

Miss Hedegaad of Copenhagen, Denmark, who has been visiting her cousin Mr. Jens Larson, left on Monday for Vancouver. Miss Hedegaad may spend the winter in Vancouver.

Jack Edwards suffered a painful injury on Wednesday. While chopping wood he had the misfortune to almost sever a finger. He left for the Anyox Hospital the same day, where it was found necessary to amputate the finger.

The new streets of Alice Arm are being slowly cleared of obstructing buildings. Several smaller ones have been moved and plans are made to move several more this fall.

A bridge party will be held at T. W. Falconer's hall this evening, October 19th, commencing at 8 p.m. It is being held under the auspices of the Alice Arm Athletic Club. Mrs. H. F. Kergin and Mrs. O. Evidson are the conveners. Admission 50c. Refreshments provided. A good time is promised.

This is the first of a series of bridge parties that has been planned by the Athletic Club for the coming winter.

## Big British Smelting Co. Being Formed

Formation of a new smelting company, with a capital of £7,500,000, to be known as the Imperial Smelting Corporation, has been announced by Sir Robert Horne, chairman of the National Smelting Company, at the annual meeting of his company held recently in London.

The new company, according to the plans outlined, will include the Burma Corporation, Broken Hill Group Zinc Corporation, British Metal Corporation, and the National Smelting Corporation. Necessary additional capital, to be issued soon, will be offered first to preferred and common shareholders of the companies involved in the merger. To protect British Empire interests, all foreign shareholders are excluded from voting power.

It's discouraging to do your best and then find out it isn't good enough.

Some of us might find happiness if we would quit struggling so hard for it.

Adversity is a medicine which people are rather fond of recommending indiscriminately as a panacea for their neighbors. Like other medicines, it only agrees with certain constitutions. There are nerves which it braces, and nerves which it utterly shatters.

Canada has 28 per cent. of the area of the British Empire and is twice as large as 30 United Kingdoms or 18 Germanys. Canada is twice the size of British India, 18 times the size of France, and 33 times the size of Italy. Canada is almost as large in area as Europe.

Being sick is twice as depressing if your ailment has an ugly name.
