5 cents each.

Mining Properties Alice Arm Under Examination

Col. Victor Spencer, accompanied by H. E. Wilmont arrived in Alice Arm on Monday in order to make an examination of mining properties in the district, including those on which options were taken some time ago.

On Monday and Tuesday they visited the Silver Cord Mine on the North-east fork of the Kitsault river, and also inspected several properties on McGrath mountain. On Wednesday they left for the upper Kitsault country, where they will examine the Dolly Varden and Wolf, also the Climax, Silver Horde, Moose, and Chance. An option was taken on the four latter properties some time ago and it expires at the end of this month. Arrangements have also been made by Col. Spencer so that operations can be commenced on the Dolly Varden and Wolf at any time.

Col. Spencer is a member of the firm of David Spencer, Ltd., Vancouver, and Mr. Wilmont is a mining engineer of the Stobie-Furlong firm of Toronto, and is at present in charge of operations at the Cork-Province Mine.

Bert Kergin Elected by Majority of 42

H. F. Kergin has again been elected by the voters of the Atlin constituency to represent them at the provincial Legislature. This makes Mr. Kergin's third term of office. He was elected in 1920 and again in 1924.

The election was very close and was in doubt until Saturday evening. Latest advices give the following figures: Kergin 611; Falconer 569; Moulton 32. This gives Kergin a majority of 42, and includes every poll and all absentee votes.

Conservatives Obtain Good Majority in Legislature

Final election returns give the standing of the political parties as follows: Conservatives 34, Liberals 13, Labor 1. The latter party evidently had not consolidated their position in the province by forming an alliance with the Liberals, and are now represented by a lone member, Tom Uphill of Fernie.

H. F. Kergin Conveys Thanks

I wish to take this opportunity of thanking all those who worked on behalf of Liberalism and myself during the election and as in the past will do all I can to show my appreciation of the confidence placed in me.

H. F. KERGIN.

ALICE ARM NOTES

Miss Alice Kergin is spending a week's holiday at Anyox.

Fred Brown, who has spent the past few months here left on Monday for Stewart.

Charlie Parker, who until recently was in charge of the Toric Mines gasoline speeder left on Monday for Vancouver.

Mrs. J. Thomas, accompanied by her son Johnny and her sister, left on Monday on a visit to Vancouver.

The annual meeting of the Alice Arm School Board will be held on Monday evening July 30th.

The annual picnic of the Anglican Church Sunday School will be held tomorrow at Campers Point. The first boat will leave the wharf at 10 a.m.

Rev. Jennings, who has taken over the duties of Canon W. F. Rushbrook on the Anglican Mission boat Northern Cross, will conduct Divine Service at the Anglican Church on Sunday at 7.30 p.m. Sunday School at 11 a.m. Everyone is invited to attend to welcome Mr. Jennings.

Elks' Baseball Team Meet a Defeat

On Monday July 23rd. the Concentrator nine defeated the invincible Elks by the score 6-5. This was the first time the Elks had been beaten for several weeks.

The line-up was: Concentrator, Musser, Whitehouse, Hardy, Mattox, Knight, McColl, Cavalier, Dresser, and McKay. Elks, Balentyne, Chenoski, Bartmann, Evans, Lazorek, McDougall, Steele Wilson, and McLachlan.

Thanks Extended by T. W. Falconer

I wish to extend thanks to everyone who supported the conservative cause and myself during the recent election, and to assure them that their assistance was greatly appreciated.

T. W. FALCONER.

Claims Developed Near Keystone

Tom McRostie arrived from Anyox on Tuesday, and during the week he had supplies taken to his claims on Roundy Creek, near the Keystone mine, where he plans a season's development work.

Send your next films direct to Wrathalls Photo Finishing, Prince Rupert, B. C. Our high class photo work and quick returns will please you. Try us.

Big Ore Body Highland Group Is Being Developed

The Highland Group, situated on McGrath mountain, and which is being developed by the owner, R. Ingraham, is showing signs of developing into an important property.

A tunnel is being drifted on the ore body and is in a distance of 20 feet, which gives depth on the ore of also 20 feet. The ore body has an average width of 34 feet, and is plainly traceable on the surface for a long distance. The ore is a zinc-lead of a high character. Mining engineers and others who have examined the property are of the opinion that the prospects of developing a considerable tonnage are good. Work of extending the tunnel is being vigorously prosecuted.

The ground slopes at an angle of about 45 degrees, so that considerable depth on the ore can be obtained at a minimum cost.

New Camp Esperanza Mining Company Completed

The new camp of the Esperanza Mines Co. that has been under construction is now completed. It comprises two buildings and provides accommodation for ten men, a commodious dining room and kitchen. Hot and cold water has been installed, and a shower bath for the use of the miners.

Timbering at the mine has been undertaken during the past week or two. The compressor plant is expected to arrive shortly and with its installation mining operations will be considerably expediated.

Toric Road Nearly Completed

The new road from the Upper Kitsault Suspension bridge to the Toric Mine will be completed about the end of the month. The bad parts of the old road have been eliminated, and a much better grade is now obtainable.

It is ten feet wide and will accommodate the big shipments of concentrates that are shortly expected to be moving continuously from the Toric.

Enjoyable Dance Alice Arm Hotel

One of the most enjoyable dances held in Alice Arm for a long time was the one on Saturday evening last. A large number were present, including a number of Anyox visitors, who danced continuously to the strains of the excellent music of a 6-piece orchestra, consisting of W. Stevens, piano, C. Hutchison, clarinet; S. Jones, saxophone; Lorne Falconer, violin; A. Butterfield, violin; E. Aubusson, traps and drums.

ANYOX NOTES

Dr. and Mrs. G. S. McDonald left for Vancouver on Friday.

Mrs. E. Yard was an arrival from the south on Monday.

Mrs. R. Donaldson and family left on Monday for Kimberley, Nevada.

Miss Lillian Burees and Miss Helen McLaughlin of Vancouver are spending a short vacation with Mrs. Chas. Ruckhaber.

Mrs. F. Larson is spending a vacation at Silver City.

A. G. Card, J. Calvin, W. J. Greer, R. Robertson, H. G. Wilcox, J. Lornson, G. Sihoff, and J. Chicardo, were arrivals on Monday's boat.

Mrs. Wenerstrom and her sister Miss Lucille Messenger, left on Friday for the south.

Mrs. Peterson and family of the Mine, are spending holidays at Alice Arm.

R. V. Pressus was a southbound passenger on Friday.

For a really enjoyable smoke, try an ElDoro Cigar.

R. W. Patmore, who was counsel in a recent police court case, returned to Prince Rupert on Monday.

Sergeant McNeill left on Monday for Prince Rupert.

Mr. and Mrs. Griffiths, who spent last week at Alice Arm returned home on Sunday.

H. Day and W. Hellman, arrived in town on Monday.

Miss Rose O'Neill and Miss E. Anderson returned to Prince Rupert on Monday.

Don McLeod was a southbound passenger on Monday.

Mr. and Mrs. E. Evans and daughter returned to Anyox on Sunday after spending a week at the Alice Arm Hotel.

Miss B. Newman arrived from the south on Monday.

Mr. and Mrs. W. E. Yard are spending a week at Alice Arm.

Mrs. Goode arrived on Monday's boat.

Dr. George Paine spent the weekend at the Alice Arm Hotel.

S. Vokich left for Prince Rupert on Monday.

Mr. and Mrs. D. MacKenzie and family are spending holidays at Silver City.

M. Cranley spent a few day's holiday at the Alice Arm Hotel during the week.

Mrs. C. O. Fricker, accompanied by Mrs. Gentle, is spending a vacation at Silver City.

Rev. and Mrs. Dewar are holidaying at Silver City.

Continued on page 6

Portfolio of Minister of Mines Lost to District

When election figures were pouring into Prince Rupert Wednesday and Thursday last week from northern constituencies, the figures became somewhat twisted and T. W. Falconer, conservative candidate for this riding was given a majority of 167. These figures were forwarded to Vancouver and Hon. S. F. Tolmie wired to Mr. Falconer congratulating him on his victory, and informing him that the portfolio of Minister of Mines awaited him.

By a small number of votes the golden opportunity of the member for Atlin becoming Minister of Mines has been lost. An opportunity that will probably never happen again, and which would have been of great assistance to the mining industry of the North could it have been realized.

Three New Boats For Northern Service

Construction of three new coast-wise passenger liners which will be larger and more modern than the present "Prince" ships will be undertaken, it was announced by Sir Henry Thornton. The liners will be ready for service in 1930 and the service will be again extended to Victoria and probably Seattle,

Smelter Footballers Win 3-0

On Tuesday last the Concentrator and Smelter football teams engaged in a very active game of football in which the smelter team blanked their opponents 3-0. Sid Armstrong acted as referee. The line-up of the teams was as follows; Smelter, Evans (goal), Donaldson, Ingram, Bell, S. Peele, J. Peele, Wilson, Hunter, Miller, Horner, Carmichael. Concentrator: Winkelman (goal), Stoltz, Pynne, MacDougall, Parker, Dodd, Cavalier, Buchanan, Lavery, Archer, Westgouth.

Fire at Anyox Mine Quickly Subdued

On Thursday morning at the early hour of 1.45 a.m. a fire broke out at the residence of R. Owen at the Mine. The cause was unknown. Due to the quick action of near-by neighbours no heavy loss was sustained. What seemed at first to be a serious fire, was checked by the hard work of Mr. Owen and the Mine fire chief, R. Strand.

Billy Mac Development

A development tunnel was commenced this week on the Billy Mac claim. The work is being done by Tony and Joe Calfa. The Billy Mac is situated on McGrath Mountain and contain some excellent showings of zinc-lead ore.

The people of British Columbia spoke with no uncertain voice on the 18th. when they ousted the Liberal party from office and elected a strong Conservative Government to administer the affairs of the province for the next four or five years. Northern British Columbia, however, with the exception of Fort George remained Liberal, which is perhaps to be regretted, especially as T. W. Falconer would have held the portfolio of Minister of Mines in the Tolmie government, which would undoubtedly have done much to further the expansion of the mining industry in the Atlin riding. As it now stands the entire north will be without cabinet representation. The election is now a thing of the past. The Conservatives are in power by the wish of the majority of the people, and as good citizens, whether we voted Conservative or Liberal, we should all stand and work together for the development of the natural resources of the province, and this district in particular.

As far as this riding was concerned the election was very quiet. No great local issues were at stake. The proposed railway from Stewart to the interior was criticized by several liberal speakers in the south and the Stewart News came out strongly in defense of Stewart's rights. Following is an editorial regarding the Stewart railway, which was published in the Financial News of Vancouver on July 20th. It is broad-minded and well worth reading.

"In the recently concluded political campaign that raked British Columbia fore and aft during the better part of an ordinarily placid month, some special sniping was done at the proposal to construct a railway in the North running from Stewart to the Groundhog coal fields and thence, ultimately to the Peace River country.

"Justification for this sniping was advanced in the form of an argument that an east-and-west line cutting British Columbia in the North must necessarily be inimical to the welfare of Vancouver. There is something decidedly wrong with that logic.

"We do not pretend to know the 'ins and outs' of the Hon. H. H. Stevens' railway plans for the north. He has been decidedly secretive on the point of what kind and quantity of backing he has procured. He may be adequately supported or he may be financing precariously. We do not know.

"But we do hold that there is something decidedly wrong with the type of logic that would condemn a new railway in British Columbia on the general principle that

it must be no good because it does not terminate in Vancouver.

"To the far-sighted citizen of British Columbia the conviction will come on consideration of the facts that British Columbia stands to profit most in the coming score of years by opening the latent wealth of northern Alberta and British Columbia, and that the only economical way of obtaining that desired development is by providing the cheapest possible form of transportation service. The objection that the time has not yet arrived for further railway development in the North is ridiculous. The time is over late in arriving, for the world is ready to buy the products the North is capable of yielding in tremendous quantity.

"Nothing holds greater promise for the future prosperity of the Pacific & Great Eastern Railway than its northward extension to a thriving, industrialized, well-populated Peace River country. And if an east-and-west direct line from the Peace River country to Stewart will lower transportation costs in that latent Empire of the North and enlarge its prospects for rapid development, then by all means should that line be encouraged. Granting the economic soundness of such an undertaking, it must be realized that its consumation would assist rather than injure the north-and-south line which is the P. G. E. and, moreover, would serve Vancouver, if indirectly, more profitably than would a long north-and-south line which, alone, might fail to give the Peace River country the full advantage of short rail haul to tidewater. By reason of recent experience Vancouver should realize the truth and justice of the argument in behalf of the short rail haul to tidewater."

News of the Mines From Stewart Camp

Portland Canal News

Diamond drillers left town last week for the George Gold Copper for the purpose of completing the diamond drill program commenced last summer. A small crew has been employed on the property for the past month getting things in shape.

The Premier management, after a very thorough examination, moved a compressor plant up to the Silverado for the purpose, it is stated, of driving a 1000-foot tunnel, which will no doubt be used as a working tunnel when ore is encountered.

From the portal of this tunnel it will be pretty well a straight shoot through to the site of the new dock which, as a result of having taken over the Silverado, Prosperity and Porter Idaho properties, the Premier is constructing at the mouth of the Marmot river.

New Mining Town Created Northern Manitoba

Cranberry Portage, which sprang into being almost overnight, is the North Country's newest town, and citizens believe it is destined to be one of the most important points on the Flin Flon Railway.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 1, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

The Mineral Province of Western Canada

TO END OF DECEMBER 1927

Has produced Minerals as follows: Placer Gold, \$78,174,795; Lode Gold, \$130,651,919; Silver, \$86,689,046; Lead, \$121,850,734; Copper, \$221,501,079; Zinc, \$59,508,692; Coal, \$271,294,668; and Miscellaneous Minerals, \$53,502,301, making its mineral production to the end of 1927, show an

Aggregate Value of \$1,048,837,828

Production for Year Ending December, 1927, \$60,729,358

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing—

The Hon. the Minister of Mines,

VICTORIA, BRITISH COLUMBIA

Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports covering each of the six mineral Survey Districts are published separately, and are available on application. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Drop in Stocks Will Not Retard Prosperity of Industry

During the past few weeks the price of local mining stocks has fallen heavily, and in the aggregate represent a decline in values running into the millions of dollars. Yet the physical conditions of the respective mines and prospects have not changed, except in some cases for the better as a result of the progress of development. Already people are beginning to shake their heads and enquire what is the matter with mining, and to remark that the bottom seems to have dropped out of it. It is idle to explain to them that the inevitable reaction from a more or less unwarranted and hysterical stock market boom is no reflection of the present state of industry. As a matter of fact mining in British Columbia is probably in a better position today than it has ever been. Production is steadily increasing; the recent increase in the price of metals assures greater profits; and there is more development work going on in areas more widely distributed than at any previous time. Whether there will be an early revival in stock market interest is another matter, and so far as the industry is concerned, is of no great moment. Unquestionably the price of a few of the more meritorious mining stocks is now below the level of their intrinsic worth, and this will be corrected when, as will presently happen, dividends are declared. Already one of the newer companies has commenced the distribution of profits. But, as in a horse race there may be many starters, so, of the many recent promotions on which the public were keen to gamble, there will be many "also rans."—British Columbia Miner.

CORBY'S CANADIAN RYE WHISKY

Distilled by Consolidated Distilleries, Limited Corbyville, Ont. The largest distillery in Canada—making quality whisky for over 70 years.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia

Showing Canada her Opportunity in World Trade

Another Striking Advertisement by the Trade and Commerce Department, Ottawa

The various striking advertisements of the Trade and Commerce Department at Ottawa which have appeared in Canadian newspapers from time to time are calculated to create an "export trade consciousness" throughout the Dominion.

It was decided last year by the Honourable James Malcolm, Minister of the Department in question, that Canadians should become more intimately acquainted with business opportunities outside their own country. In order to accomplish this, the campaign of publicity was embarked upon.

Canada's external trade has grown in such proportions as probably few Canadians

HON. JAMES MALCOLM

realise. For instance, in the last fiscal year, ended March 31st, the Dominion's total exports were valued at more than a billion and a quarter dollars, or to be exact \$1,250,456,297. This represents an export trade of more than \$130 for every man, woman and child in Canada. At the beginning of the present century Canada's export trade amounted to less than 200 million dollars.

Another method of gauging Canada's export trade is found in the fact that last year the country's exports of manufactured products alone amounted to about the same as her total production of manufactured

products in 1900. In other words, Canada is exporting as much in manufactured articles to-day as the total output of every factory in the Dominion twenty-eight years ago. These few figures may give readers some comprehension of the immense increase in export business.

Most public men and business men, no matter what their politics may be, agree that export trade is possibly the most valuable asset the Dominion can have. Canada's natural resources are so varied and so rich that it would be impossible for Canadians to consume them. Take wheat for example; it is manifestly impossible for 9,000,000 people to consume 400,000,000 bushels of wheat annually. Canada's future prosperity therefore is bound up in seeking markets abroad for her surplus production.

When Canadian business men seek to sell their products in other lands, they cannot hope to control prices. They have to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce world competition in maintaining their hold on export business. To maintain this trade of a billion and a quarter dollars a year and to increase it, Canadians must become acquainted with every legitimate method known to business. They must learn how to pack their goods in the manner desired by the foreign buyer, they must learn how to keep contract dates, how to ship these goods by the most economical and direct routes. And perhaps most important of all Canadian goods must always be kept up to the standard of the sample submitted.

The Department of Trade and Commerce, at Ottawa, is doing everything in its power to further this export trade. Years ago a Commercial Intelligence Service was established, and trained trade commissioners sent to the world's trade centres. In fact, Canada had the first trade commissioners abroad, thus inaugurating a system which has been widely copied. To-day this country has 24 trained trade commissioners in strategic business centres. More men are now in training to go to other places. The government has by subsidy, and other means, obtained first-class shipping facilities to these business centres. The trade commissioners are constantly on the alert, seeking out opportunities for the selling of Canadian products. Whenever they learn that there is a chance of a Canadian order being placed, they immediately communicate with the Commercial Intelligence Service at Ottawa, giving all information they possibly can. This information in the possession of the service at Ottawa is at the disposal of any Canadian producer or manufacturer. This system, the result of some years' experience, is thoroughly organized and working smoothly. To-day the Canadian manufacturer or producer can find out with little trouble, and no expense, if his products can be profitably marketed in almost any part of the world.

So encouraging have results been from the export system adopted by Canada, and so well have Canadian goods been received abroad, that it is fairly prophesied that within a decade Canada's exports will mount to double the present figure. Hon. Mr. Malcolm as the responsible head of this department believes in keeping Canadians fully informed as to opportunities abroad. To do this he is reaching the people through newspapers, magazines and trade journals.

Vacation Time

Is here again, with its call to the Great Outdoors. In the course of the next few weeks, thousands of people will forsake the cities to seek rest and recreation by lake and stream, and in the depths of the cool, green Forests

ST. CHARLES MILK
(Unsweetened)

Ore on Sheritt-Gordon Proven to Over 1000 Feet Depth

At the Sheritt-Gordon mine, in the Cold Lake district of Manitoba a diamond drill hole penetrated the ore body about 1,160 ft. below the surface, indicating the continuation of the ore to great depth. Having secured the Norrie Tower and other adjacent claims, a solid block of territory about 5 miles long now belongs to the company. Mining equipment on hand is capable of carrying the two shafts on which work has been started to a depth of 1,000 ft. In the meanwhile several diamond drills are being used for important pilot work. The two shafts being sunk are about 7,000 feet apart.

Confirmation of Deal Jumps Stock

Big Missouri held the centre of the stage on the Vancouver stock market last week, reaching a recent high at 74 on news that the Consolidated Mining and Smelting Company was prepared to go on with development of the property by joining with the Big Missouri Company in paying \$100,000 on the option from Lindeborg.

Later the stock eased down to 70. The highest point reached was just 20 points above the low for the week. Heavy selling orders were brought out by the rise.

Huge Foreign Investment in Canada

More than five and a half billion dollars of foreign capital was invested in Canada at the beginning of 1927, according to figures lately issued by the Dominion Bureau of Statistics.

The exact figure of investments is \$5,500,441,000. Of this sum \$2,192,467,000 was British capital as compared with \$3,069,181,000 from the United States and \$238,793,000 from other countries.

Canadian investments abroad at the beginning of 1927 totalled \$1,330,586,000 of which \$723,328,000 was invested in United States securities.

Present outlook is that the placer find on Squaw Creek will not develop into a large camp. Good ground is confined to discovery claims.

WATER NOTICE

DIVERSION AND USE

TAKE NOTICE that Esperanza Mines, Limited whose address is 324 Second Avenue, Prince Rupert, B. C. will apply for a licence to take and use fifteen cubic feet per second of water out of Falls Creek, which flows easterly and drains into Kitsault River, about one mile above Alice Arm town-site. The water will be diverted from the stream at a point about 3,000 feet west of the mouth of Falls Creek and will be used for Mining and Power purpose upon the Esperanza Mine described as "Aldebaron, Black Bear and I'll Chance It" claims. This notice was posted on the ground on the 11th. day of June, 1928. A copy of this notice and an application pursuant thereto and to the "Water Act" will be filed in the office of the Water Recorder at Prince Rupert, B. C.

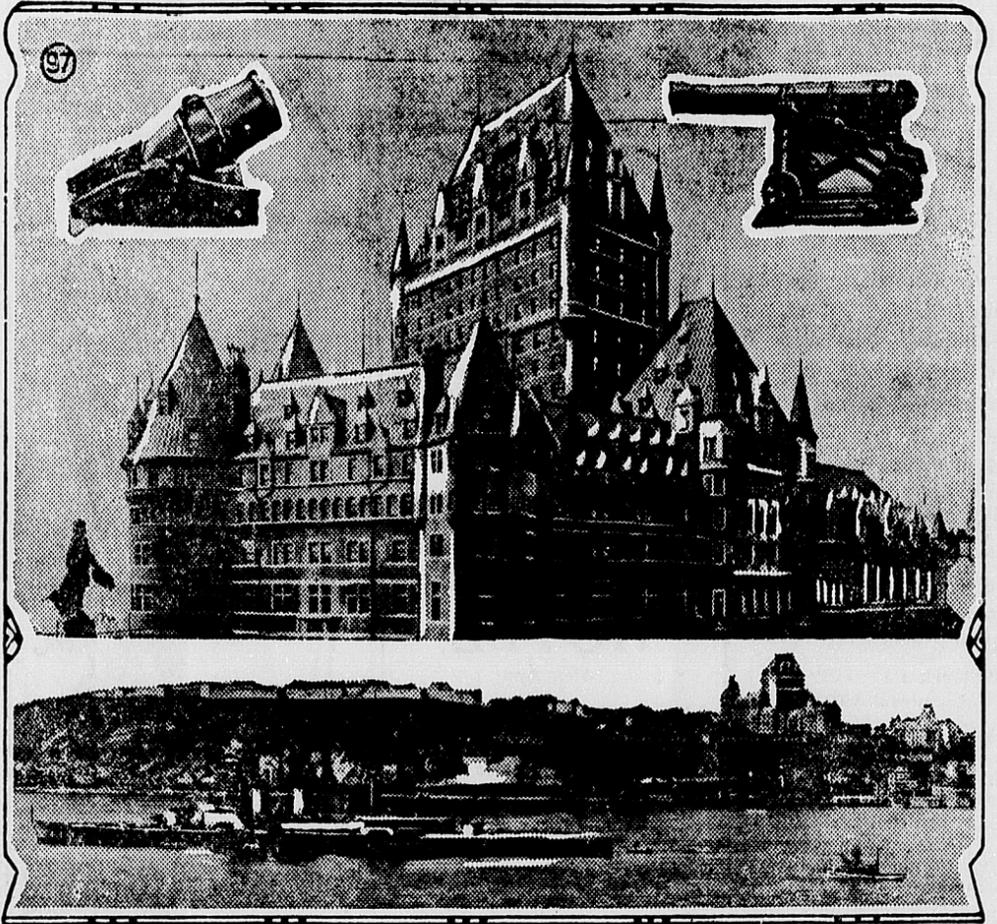

Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C., within thirty days after the first appearance of this notice in a local newspaper.

ESPERANZA MINES Ltd, Applicant
By Norman Fraser, Agent.

The date of the first publication of this notice is June, 22nd. 1928.

A BRAVE ATTACK AND A BRAVE DEFENCE

Upper.—The Chateau Frontenac, famous Quebec hostelry, on whose wall a tablet in memory of the soldiers of the Royal Fusiliers has been erected. Lower.—A panorama of the ancient city of Quebec, showing the Chateau Frontenac and the ramparts, taken at the time of the visit of H.M.S. Hood to Canada. The attack against Pres-de-Ville was made along the shore behind the warship. Inset—A mortar and cannon used in Quebec at the time of the siege by American troops in the War of Independence in 1775-76.

A memorial to an event of outstanding importance in both Canadian and American history, has been erected on the wall of the Chateau Frontenac in Quebec.

Although many thousands of American tourists regularly invade the ancient city and throng the corridors of the great hostelry, it is not often realized that their ancestors once attempted to gain admittance to the city with less success. Early in the War of Independence two forces of American soldiers were despatched against Canada, one under General Richard Montgomery up the Richelieu against Montreal, and the other under Colonel Benedict Arnold through the wilds of Maine against Quebec. The two armies united their resources before the city of Quebec in mid-December, 1775, and commenced a siege that lasted for 154 days throughout the ensuing winter. Montgomery had carried all before him and captured the forts of St. Johns and Chambly, and occupied Montreal and Three Rivers, so Quebec remained the last stronghold of importance held by the British. Arnold had encountered great difficulty in his march, and his expedition was depleted by about a third of its members.

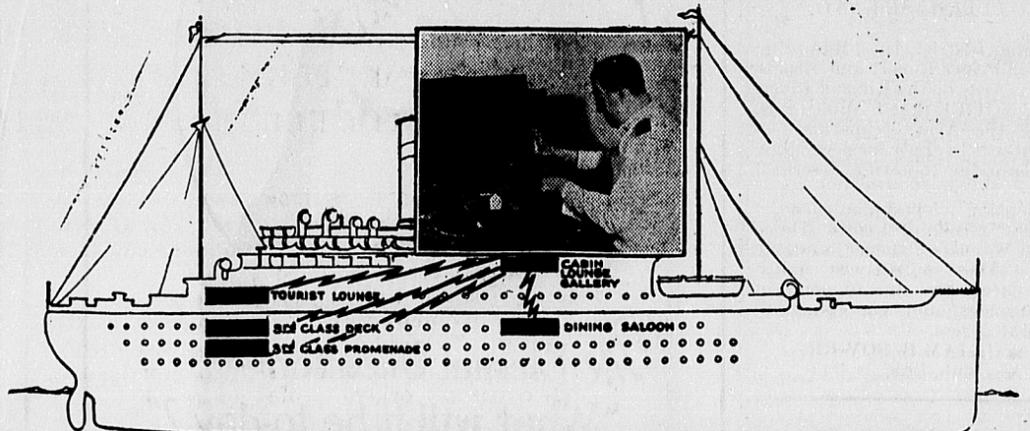

The defense of Quebec was under General Sir Guy

Carleton who had a garrison of about 1,500, about equal to the strength of the attackers, composed of a few regulars, including the Seventh Royal Fusiliers, the Royal Emigrants, a Corps of Seaman, and British and French-Canadian Militia.

Early in the morning of December 31, 1775, the chief assault was delivered by the American troops, bravely led by the commanders in person, Montgomery being killed at Pres-de-Ville, and Arnold wounded at Sault-au-Matelot at the other side of the town. The attack was unsuccessful, many prisoners were captured by the defenders, and the siege thereafter became little more than a blockade until relief arrived from Great Britain in May, 1776.

The tablet in commemoration of the part taken by the Royal Fusiliers in the defence of the town "throughout the rigors of a Canadian winter, against an active and enterprising enemy" was unveiled in Quebec on Dominion Day, July 1, in the presence of the Governor-General. A detachment of the Canadian Fusiliers of London, Ontario, with two officers from the parent unit in England, represented the Second Royal Fusiliers. The arrangements were made by General Charles F. Winter, secretary of the Dominion of Canada Rifle Association, and formerly a member of the Royal Fusiliers.

Music from Unseen Orchestras

The Panatrope, latest development in gramophone equipment, installed on the Anchor Donaldson steamer "Athenia", sailing to Montreal. The "Athenia" is the first Canadian Service Transatlantic steamer to carry the new device, which broadcasts music from the ordinary gramophone record to six different locations on the ship with all the power of a full strength orchestra.

Here and There

(98)
With concrete now up as far as the first bedroom windows and steel up to the fourth, the Royal York C. P. R. monster hotel in Toronto is well up to schedule and is expected to be completed in time for the opening next May, notwithstanding the short strike of the steel and building trades.

W. M. Van Valkenburg, president of the Regina Board of Trade, says that his city and province are out to capture industries. That is one reason for his visit to Montreal and the Eastern States. He figures that the mineral resources of the province should provide the basis of a number of industries, as 42 per cent of the provincial area lies within the pre-Cambrian shield.

Inauguration of the new New York-Yarmouth, Nova Scotia, passenger ship service recently represented the first entrance of a vessel from New York into Yarmouth harbor for the past 20 years. This was the S.S. Evangeline, of the Eastern Steamship Line, carrying 150 passengers. She is of 5,000 tons and her sailing connects with the Dominion Atlantic Railway and so enables tourists to reach Nova Scotia sea and holiday resorts.

This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvests which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators each with a capacity of 40,000 bushels.

Musicians under the leadership of Flight Lieutenant John A. Amers, forming the band of the Royal Air Force, Britain's youngest military band, landed recently at Quebec from Canadian Pacific liner Montclair, for a tour of Canada from coast to coast, as did the band of the Coldstream Guards last year. This aggregation was formed in June, 1920, and since then has fulfilled engagements all over the British Isles. The band will play in all the principal centres, military centres and garrison towns of Canada during their tour here.

"First call for dinner!" "Last call for dinner!" The old monotonous warning to the hungry traveller is a thing of the past on the Trans-Canada Limited, C. P. R. trans-continental crack train from Montreal to Vancouver. To-day a nattily attired waiter in white coat and apron with a smart black bow tie walks through the cars ringing "chimes" on a dulcimer, an appeal at once more pleasant to the ear and more likely to attract attention than the former method. In time, there is no doubt, the idea will be adopted on all dining car trains of the railway.

Advertised to make the trip from Montreal to London in nine days, the Canadian Pacific freight ship Beaverbrae actually completed the run in eight days and twenty hours, making record time for a freight vessel between the two ports. This ship is one of the five "Beaver" ships making up the new fast freight steamship service of the Canadian Pacific. They have refrigerated cargo space and are of 10,000 tons dead weight. The service is between Montreal and London, and there is a sailing from the Canadian port every Friday, the vessels as a rule making better time than most passenger vessels on the London route.

Going up!

AFTER all, there's no place like British Columbia in which to work and live and play! Here, there are no long "off seasons" to cut down a man's working time. Our temperate climate keeps a man fit... enables him to produce more... earn more.

The producers' average weekly wage in British Columbia is \$28.39... 49% higher than the rest of Canada. In 1926 seventeen industries increased weekly wages by \$12.95! Actually in ten years our annual payroll has grown from 78 million dollars to 175 million dollars... the greatest advance by far of any Province during that period. This, of course, does not include agricultural workers, professionals, clerks and others. British Columbia's gross payroll is estimated at 210 million dollars!

Life is more enjoyable... we have more time to enjoy the year-round pleasures and recreations at our doors, while our general standard of living is very much higher.

Taxation during the last four years has been reduced by two and a half million dollars... concrete proof of our province's sound financial condition.

Construction, that outward evidence of the faith we have in our province, has played a large part in the wage situation. In ten years British Columbia's construction activity has gone up ten times. In 1916 it involved only \$2,800,000... for 10 months in 1927 it amounted to \$27,277,000!

This activity has an immediate effect on current conditions. Cash funds are disbursed for materials, employment is good... wages fairly steady... money in circulation.

It increases the capital investment in our Province. And there can be no surer indication of future progress than when producing machinery increases... a sign of growing markets... a sign that British Columbia products are winning a place in the markets of the world.

Read these announcements and understand your province's progress... clip them out and send them to friends. If you desire extra copies of these announcements a note to this newspaper will bring them. Advertise your Province!

BRITISH COLUMBIA'S PROGRESS

Alice Arm Receives Favorable Comment In Annual Report

The Annual Report of the Minister of mines for 1927 makes very interesting reading, containing as it does a lot of valuable information.

The Alice Arm district has been fairly well covered by Dr. H. T. James, mining engineer for the North-Western district. Dr. James has been favorably impressed with the possibilities of this section, and following are some of his remarks regarding this portion of his division:

"Some of the properties in the upper Kitsault valley should receive attention from examining engineers. The Wolf property a part of the Dolly Varden holdings, should be some inducement to investigate the Dolly Varden property as a whole. The Wolf is situated on the opposite side of the river to the Dolly Varden and 2 miles farther up the valley. It is stated that diamond drilling has demonstrated the existence of a considerable amount of milling ore.

"In addition to these two properties, the North Star, Toric, and Tiger are properties which are partially developed and in which at least fair silver values are found. There are several other silver properties which might bear investigation. While it is not certain that all or any of these properties will stand up to systematic and accurate sampling, still there are a sufficient number of silver prospects within the upper Kitsault valley to justify a careful investigation of them by some large organization. Since all the properties are prospective milling properties and the transportation will be quite a problem, it is suggested that the district could be developed to the best advantage by one or two large companies, each operating more than one of the smaller properties.

"Some special mention should be made of a part of the Illiance River section. I refer to the McGrath Mountain portion lying between the North-east fork of the Kitsault and the Illiance rivers. It is only about 4,000 feet high, reaching just to timber-line, and is situated at the very head of Alice Arm, separated from the tide-water by about a mile of gravel flats.

"A great number of claims have been staked on McGrath mountain and on every claim there is some showing of zinc ore. The surpris-

Tree Climbing Contest With Bear Dead Heat

Marathon races, tree climbing contests, and rifle shots followed each other with dazzling rapidity a few days ago, when two miners went out in quest of adventure to shoot up a bear.

The bear being brought to bay, a magazine load of rifle shells was quickly emptied in his direction. The bear being taken off his guard was surprised and disgusted at the somewhat unwelcome salutation, and hit for the nearest tree to size the situation up.

It also suddenly dawned on the miner that shooting high grade underground was a lot safer than shooting at wild and woolly bears and not liking the looks of his former target he too scaled a nearby tree. The third party who came along to witness the killing suddenly remembered pressing business that needed attention at the camp, and disappeared from the scene with the rapidity of a comet.

The bear still peacefully roams the hills and the miners are quite content to stay at home evenings and watch the squirrels gambolling around the camp.

ing part of it is that in almost every instance zinc is practically the only metal present. There is usually a small amount of lead, as galena, but only in a few places is galena at all conspicuous. The same be said of pyrite. Gold and silver values are very low. On the Silver Chord property high silver values have been found in narrow stringers, but in general the mineralization is essentially zinc-blend."

CABIN FOR SALE

Cabin for Sale at Alice Arm, in good condition. Adjoining Kitsault Bridge, on south-west side. Best offer takes it. Apply J. MacConnachie,
