5 cents each.

## Mining Properties In District Reported On By Dr. Mandy

The Preliminary Report of Department of Mines recently published contains a report by Dr. J. T. Mandy, resident mining engineer for the North Western District, the portion relative to the Alice Arm and Anyox district is published below:

Granby Consolidated Mining, Smelting & Power Company. During 1931 continuous operations have been carried on and a larger production made than in 1930. The Granby Company curtailed by shutting down its Copper Mountain mine, permitting Hidden Creek to run at a higher rate than before. To cope with the increasingly depressed copper prices, economics have been worked out and applied to every phase of the operation, resulting in the per pound cost of copper being steadily lowered throughout the year. In the Hidden Creek mine exploration and development have been energetically continued, and some lateral extensions of the known replacement ore-bodies have been picked up. Diamond drilling from the lower and minus 885 levels for depth continuity of the known ore-carrying structure along the greenstone-argillite contact has been continued.

Prospecting operations were carried out by W. Hanna on the Deadwood and Quartz; on the Black Bear by S. W. Barclay and on the Sunrise group by Thos. McRostie, with results generally satisfactory in exposing further copper mineralization.

Esperanza Mines, Ltd. Some financing was arranged for the carrying out of further work on this property. For this purpose a 36/42 horse-power semi diesel Pettier engine belt connected with a 2x 120 Gardner Denver compressor was installed and suitably housed near the portal No. 9 tunnel and some work carried out until November 15th. Contrary to some impressions and notwithstanding an occasional high gold assay the indicated commercial possibilities of

Continued on page 2

The following were visitors to Anyox from Prince Rupert on Wednesday last, returning the same evening: Dr. C. H. Hankison, T. McMeekin, J. J. Little, C. V. Evitt, C. V. Wilkinson, G. H. Outram, A. E. Knowle, T. H. Hall, Mr. Thorpe, Alex. McRae, Dr. J. H. Carson, H. B. Morley, H. N. Birch.

## Copper Was a Little Firmer During Week

New York—The copper market was strong this week with domestic metal moving in fair volume at 7¼ to 7½ cents a pound delivered. Custom smelters offered the metal at the lower figure, but primary producers refused commitments below the 7½ mark, which represented an advance of ⅛ cent a pound. Export copper buying was active at 7½ cents a pound c.i.f. London, Hamburg and Havre.

Total output of primary and secondary copper by American refineries in 1931, amounted to 1,639,000,000 pounds, compared with 2,436,500,000 in 1930, or a reduction of 33 per cent., according to the bureau of mines.

## Enjoyable Card Party Held At Alice Arm

Another very enjoyable card party, of a series being held this winter, by the Alice Arm Athletic Association, was held in the Club House on Saturday evening. Bridge was played at all tables. The ladies' first prize was won by Miss Alice Kergin, and Mr. Jens Larsen, who was playing as a lady, secured the consolation.

Mr. J. Krug was the winner of the men's first prize, and Mr. Gus. Pearson successfully captured the consolation.

Refreshments brought a pleasant evening to a close.

## Granby Ore Used In Unique Fireplace

A fireplace constructed entirely of mineral specimens from famous mines in different parts of the world has been built in the home of Mr. and Mrs. L. A. Lobdell, of Durant, Wisconsin. A picture of this unique possession has been received at the Chamber of Mines, Vancouver, who contributed a sample of copper ore from the Granby Company's mine at Anyox to the assortment of ores utilized in its construction.

## Indoor Sports Pick Up After Christmas Adjournment

Both badminton and basketball are away to a good start for the second half of the season.

Badminton players are getting in form for the next tournament, and basketball has its special nights set aside for practice.

The cold weather also stimulated the desire for indoor sports.

## Keeping the Wolf From The Door is Double Problem

"Keeping the Wolf from the door" is a problem that is being solved in more ways than one by some of the people of Alice Arm this winter. A band of timber wolves, thought to number over a dozen at least, have made the Kitsault flats and adjacent territory their headquarters this winter, and their prolonged howls have reverberated throughout the still winter nights, and also frequently during the day. Residents on the hillside have been paid visits, one hold intruder venturing onto the porch of H. F. Kergin's residence, while another paid a call close to J. Strombeck's door.

They have been frequently seen, but so far not one has been shot. Gus. Pearson recently ran into a pack of eight a short distance up the Kitsault Valley, but as he was only carrying a 22 calibre rifle, failed to drop one. Others have also sighted single wolves, but so far their speed and quickness have saved them.

Although their howls have ceased during the past week, tracks in the snow show that they are still in the district.

## Oddfellows to Celebrate The Anniversary of Founder

"Widdey Night," which is a special anniversary of the Oddfellows in commemoration of the founder of the lodge, will be held in Anyox on Monday the 18th., by the members of the Askew Lodge, I. O. O. F.

The celebration will take the form of a banquet and dance, and the sisters of the Order the Rebekkas will be present, so that the affair promises to be one of real sociability and enjoyment.

## All Metals Showed Price Decline Last Year

The recently published Preliminary Report of the Department of Mines, states that: Silver and base metal prices reached record lows during the year 1931, and the averages show substantial declines from those of 1930. The following table shows the average metal prices for 1931, and the percentage declines in the averages for the year.

	1930	1931	Per Cent
		Estimated	Decline
Silver (New York)	cents per oz. 38.154	28.428	26 per cent
Copper (New York)	cents per lb. 12.982	8.150	37 per cent
Lead (London)	cents per lb. 3.9273	2.7658	30 per cent
Zinc (London)	cents per lb. 3.5999	2.5893	28 per cent

## Henning Lindgren Is Injured

Struck with a heavy wrench while working in the Concentrator on Thursday the 7th., Henning Lindgren is in the hospital suffering from the effects of a severe blow just above the left eye. Henning was removing a belt, when the wrench was knocked from his hand on to a driving pulley, from which it was propelled with considerable force. The stiff brim of the cap which he was wearing probably saved him from a more serious injury. Henning is well known in musical circles, and his many friends wish him a speedy recovery.

## Anglican Church Holds Card Party and Social

A very enjoyable card party and social evening was held at the Anglican Church Parish Hall on Friday, January 8th. About forty people were present, and whist was the popular game indulged in. For the ladies, Mrs. Doelle captured the first prize, with Mrs. J. Dunn at the other end of the list, securing the consolation prize. Alex. Wright was the top scorer for the men, with Mr. J. Warden qualifying for booby prize. After supper had been served the remainder of the evening was spent in music and singing.

## Former Anyox Resident Was Recently Married

Mr. Elmer Lloyd Perrin, formerly cashier at the Granby Stores and now resident in Vancouver, was married on December 27th. to Harriet Anne McRae, second daughter of Mr. and Mrs. John McRae, of Vancouver. The wedding took place in Blaine, Washington.

R. Lighterman arrived on Monday from Vancouver.

## Large Number of Fans Attend Basketball Games

On Friday the 8th., three games of basketball were played, and drew a large crowd of fans. In the boys' game (Intermediate series) the All-Star Scouts engaged the Wildcats and tamed them down to the extent of 14 to 10. The All Stars shone throughout the game, two or three of them, be it noted, proving to be real "shooting" net-eers.

In the ladies' game the Spooks had evidently lost none of their ability through the Christmas festivities, as they overcame the High School by a total of 18 to 10. The Students, however, have lost none of their determination and dash, and there are whispers that the Spooks will probably be laid low in the next encounter.

In the Men's Senior Game the Vandals did not make quite as good a showing against the Celts, the latter winning by 32 to 12. For the Celts baskets were scored by McDonald 6, Steele 4, Mikeli 2, Patrick 1, Dwyer 1, while the Vandals scores were Calderoni 2, Davis 1, F. Anderson 1, Lindgren 1 and Lazorek 1.

On Monday the 11th. the store team tried conclusions with the Celts, but came on the thin end of a 26 to 9 score. However, the Store team, as seems to be the case regularly, were unable to connect as much as they deserved on the actual play. S. Steele was the star scorer for the Celts, netting no less than eight baskets, all in the first half. In the second half luck deserted him altogether. Other scores were: McDonald 2, Dwyer 2, Mikeli 1. The Store delivered their baskets thus: Bass, Gillies, Pinckney, and Watson one each.

## Anyox Police Court Notes

On December 18th. Rita Grey was charged with being an inmate of a disorderly house. She was fined \$15.00 and costs, or 15 days' imprisonment.

On January 5th. Jean Allen and Peggy Smith were also charged with a similar offence, the former being fined \$15.00 and costs and the latter \$20.00 and costs, the option in each case being 15 days' imprisonment.

The British Columbia Legislative Assembly will open on February 17th.

## Mining Properties In District Reported On By Dr. Mandy

Continued from page 1

this property lie solely as a possible small-tonnage, mainly silver-producing, proposition, dependent on careful, systematic, and economical operation, and a sufficient silver price. As was stressed in the 1929 Annual Report, this indicated limited possibility has yet to be definitely determined. Before embarking on haphazard exploration systematic surveying and sampling of the property should be done and a careful plan laid out.

On the Wildcat, the owner A. Davidson of Alice Arm, has energetically continued exploration by stripping and tunnelling, and is continuing tunnelling during the winter. On the Combine, the owner Miles Donald, of Alice Arm, has discovered another vein showing encouraging mineralization. The old tunnel has now been cleaned exposing the vein with a width of about 10 feet carrying good copper, lead and silver values, with about \$1.20 in gold to the ton. This property is recommended to examining engineers.

On the Vanguard, further work was carried out consisting of ten

feet of cross-cutting in the zone from the end of the north drift of No. 2 tunnel (lower tunnel), which is reported to average about 1.5 per cent. copper. The south crosscut in the zone has also been extended about 9 feet beyond the 4 feet previously reported, and is estimated by the owner to carry about 1.5 per cent copper.

On the Lucky Strike group, John Hauber of Alice Arm, has made a new discovery of antimony ore in a vein 3 inches to 2 feet wide, carrying good gold values. Further exploration was also carried out on other veins on the property. On the Moose group, north-west of the tunnel, John Strombeck of Alice Arm has uncovered additional promising showings carrying silver, lead, and copper mineralization with interesting gold values and is continuing exploration during the winter. On the Highland, Tyee, and, Last Chance groups, exploration was continued by Archie McPhail, and the trail extended towards the summit. On the Tyee, a tunnel was started 200 feet below the long cut. Unfortunately, this was in broken ground and it caved. Continuity of the ore-zone with encouraging mineralization, was also extended by open cuts above and below the long cut described in the 1930 Report. These groups are recommended to examining engineers.

In the Silver Basin area on East Creek, towards the Kinskuch Lake section, G. Pearson and associates have been prospecting some encouraging copper showings. To facilitate the prospecting of this section the trail was extended by the Department of Mines.

## Copper Imports By The Leading Countries

New York.—Imports of copper by the United States in November again led the world in volume, while Great Britain retained her position as the heaviest importer of lead in the same period, according to figures just issued by the American bureau of metal statistics.

Copper imports into this country in unmanufactured form in November were 20,386 metric tons, as compared with 21,454 in October and 19,080 in September. Great Britain's imports were 8629 tons in November, 10,071 in October and 10,062 tons in September. Germany imported 11,521 tons of copper in October as compared with 13,499 in September and Sweden took 2949 and 1944 respectively in the two months.

Average monthly net imports by leading countries were: Great Britain, 10,552 tons for eleven months with November 30, compared with an average of 11,197 tons a month in 1930; France, 10,717 tons a month for ten months, compared with 10,642 tons for the full year. Germany's average for ten months was 9005, compared with a monthly average for the full preceding year of 10,555 tons.

The average monthly exports of copper from Chile in the ten months ended with October 31 last were 17,575 as compared with an average of 15,995 tons in the full year 1930.

Book Salesman: "This book will do half of your work."

## Here and There

A new railway record, and a different one, was established recently when John Caesar, called at the Vancouver office of the Canadian Pacific Railway for his jubilee pay cheque. Mr. Caesar has 60 years service to his credit.

Canada's gold production in September hit a new record, being 240,222 ounces, as compared with 225,630 produced in August and 178,291 ounces in September 1930. The Dominion has been a gold-producing country for more than 70 years.

And now the eyes of the world are focussed on that greatest of all travellers, Santa Claus, who seems to have weathered transportation and financial problems once more. Just a good old Christmas custom!

One can visualize thousands of pairs of skis being waxed; now that the snow is here to stay. Then it will be "All aboard" for Quebec, Banff, Field or Revelstoke, or anywhere where there is a real good hill.

And, speaking of Quebec, Jack Strathdee, who was on loan to Lucerne-in-Quebec last winter, is back at the Chateau Frontenac, Quebec, as winter sports' director, once more, with a lot of good ideas and a smart staff of instructors. Jack is well known throughout Canada. Incidentally he's a fine performer at the piano.

Pacific Coast ports, and indeed shipping circles throughout Canada, are mourning the passing of Captain James W. Troup, aged 76, a native of Portland, Ore., pioneer in coast-wise shipping and for 36 years manager of the B.C. coastal service of the Canadian Pacific Railway.

Sino-Japanese war reports are causing more geographies to be consulted than is popularly imagined. Chin Chow, for example is almost as entertaining in its many phases as was its namesake with the prefix "Chu", during the days of 1914-1918. Besides, it's the only war we've got!

## Premier Still Hopeful Of Northern Highway

Premier S. F. Tolmie, while immediate prospects of embarking upon the projects may have disappeared, is still hopeful the road which leads from the Cariboo and connects Prince George and Hazelton may eventually be extended into the Yukon and Alaska.

Nat. Cornfoot, colorful golf pro at the Canadian Pacific Langara course, Vancouver, for the past five and a half years, sailed by the Empress of Russia recently for Tokio where he will act as golf instructor at the Fuji Shokai Club course. This organization operates a huge indoor layout in addition to its outdoors links.

Major John W. Sifton, one of the proprietors of the Manitoba Free Press, Winnipeg, seated at his writing desk in his private residence at Toronto recently, pulled a lever which, through the medium of Canadian Pacific Telegraphs transmission wires, set in motion the new ten unit speed press just erected in the Free Press offices at a cost of \$300,000. The new press has a rated maximum capacity of more than 100,000 forty-page papers per hour.

Twelve hundred colonies of screened bees and their accompanying queens from the Province of Alberta to China was the unique feature of the Canadian export trade to the Orient and of the shipments aboard the Empress of Russia recently. The European and American bee produces nearly twice as much honey as its Asiatic brother that has been exploited by the Chinese since the time of Confucius. (799)

Two little boys were talking. One said to the other: "Aren't ants funny? They work and work and never play."

"Oh, I don't about that," replied the other. "Every time I go on a picnic they are there."

"How is it?" said one dog owner to another, "that your dog knows so many smart tricks, while mine is so dumb?"

"Well, you see," said the other, "you've got to know more than the dog to start with."

## Wild Animals Friendly on Banff-Windermere Highway

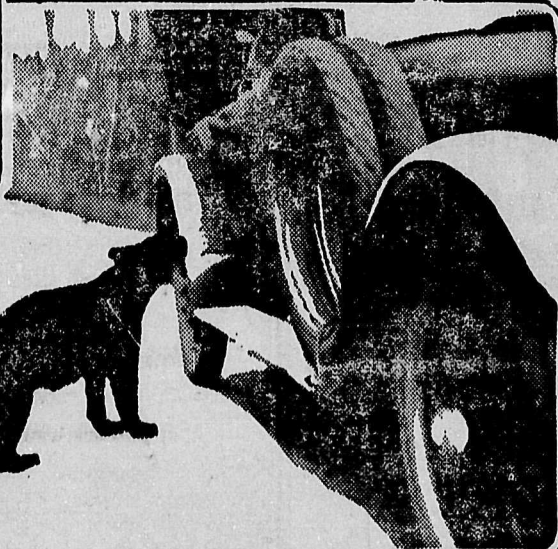

MAMMA BEAR AND KIDS, LAKE LOUISE

CINNAMON BEAR NEAR BANFF

BIGHORN SHEEP STOP CARS NEAR BANFF

BOZO BEAR TRAFFIC COP

"The Friendly Road," by David Grayson, which is well-known to many lovers of nature, depicts incidents and friendliness of the people along country roads and in the rural districts. There is, however, a road in the Canadian Rockies the friendliness of which is not due to mortals as in Grayson's book, but to the friendliness of animals. Animals termed wild, but in this instance a word that cannot be applied to those on the Banff-Windermere Highway. There is possibly no more beautiful road than this which runs from Banff to Lake Windermere, in the Columbia River Valley. The distance of 104 miles is spectacular and the scenes are constantly changing. The views from the high passes looking down into valleys, thousands of feet below, tiny lakes surrounded by al-

pine meadows, rivers crossed and re-crossed, and glimpses of cascades tumbling down slopes from dizzy heights are intriguing and beautiful.

To this natural beauty is added that of seeing the animals in their natural haunts. Rocky Mountain sheep are seen on the road along Vermilion Lakes not far from Banff. They are so tame that often motorists have to slow down as they will persist, almost to the point of danger, in standing in the middle of the highway.

Bozo, a black bear, is a friend to many motorists on the Banff-Windermere road. He comes out on the highway as if he had sole right to it. He does not resent these invaders in the least and really wishes to

show his friendliness. Sometimes he has lunches handed to him and the remarks of "nice old chap, fine old fellow," please him tremendously, and he will try to come even nearer. Bozo no doubt had many dreams during the winter of summer tourists, and possibly has figured out in true bear fashion just how to get the most out of the tourist season.

Deer are seen, also, on this famous highway, though not as often as other animals. They are regular visitors to Banff, and are frequently seen on the streets of the village. There are hundreds of miles of smooth motor roads through the Canadian Rockies, and devotees of the open road are visiting this region in increasing numbers annually.

## Anyox Hearths Maintain Their Welcome Warmth

Anyox is not only a good place to work in, especially at these times, but it is a good place to play in. At Christmas and New Year social events were in full swing, and in several instances they apparently did not cease but kept right on. A lady visitor to our town who has spent Christmas in various cities and under different conditions has stated that she never enjoyed any Christmas as much as this one. She attributes this to the genuine sincerity of the people she has met, and the whole-hearted manner with which they enter into their various functions. Anyox hearts and hearths are always warm to townsfolk and visitors alike.

S. H. Hoskins returned to Anyox by Wednesday's boat. He has been spending holidays with his family at Smithers.

Poet: "Burglars broke into my room last night."

Friend: "You don't say! What did they do?"

Poet: "They searched all over the room and then left me a five-dollar bill."

## ANYOX NOTES

C. Cvetkovich was an incoming passenger by Monday's boat from Vancouver.

A. Gianco arrived on Monday from New Westminster. He was accompanied by his mother, Mrs. N. Gianco, who will make her residence in Anyox.

W. F. Eve and Mr. Duncan Campbell were passengers to Prince Rupert by Monday's boat, and returned on Wednesday.

Mr. and Mrs. C. P. Hill, who have been on a holiday visit to Anyox for the past three weeks as the guests of Mr. and Mrs. George H. Stewart, left on Wednesday for Victoria. They will spend a few days in Vancouver en route. Mr. and Mrs. Hill have made many friends in Anyox during their stay and a good many people assembled at the dock to bid them "bon voyage."

Mr. Ivor Basset, who left Anyox a year ago to take up a position in the Research Department at Flin Flon Mine, returned to Anyox by Wednesday's boat.

Art Nickerson, formerly of the Granby Stores, arrived by Wednesday's boat for a short visit to Anyox.

## Britannia Mine Output For Last Year

The Britannia mine—which is the second biggest copper producing mine in the province, the Hidden Creek mine at Anyox being first—was operated steadily throughout last year, but on a curtailed basis. The copper production will amount to approximately 30,600,000 lb. The mill was operated to capacity of well over 6,000 tons a day when running, but was closed down one or two days a week. Advancement of the 4100 Haulage tunnel has been carried on during the year. This will be driven 10,000 feet and when raises are put in will be the main level for handling ore.

## Psychology of Color on a World Cruise

CHERRY BLOSSOM TIME, JAPAN

THE CITADEL AT CAIRO

ALGERS RUG MERCHANT

Colors that run rampant in the four corners of the world provide the contrasts that make a lasting impression on the memory of the world traveller. Districts wholly different in their colorful ensemble are but a few miles apart and the keynote of their striking contrasts is color. Today we hear much about color psychology, its effect on the senses of people and of animals; and how it affects temperament and even health.

Colors of the scattered ports of the world that burst from quaint bazaars and the costumes of the inhabitants on the streets, vie with those of nature. The landscapes and seas differ; colors in architecture, and the colors of princes, peasant and paupers, gladden the eye and make the blood run riot in unison.

From New York on December 2 the Canadian Pacific steamship Empress

of Australia, will commence another cruise to the contrasting ports of the world. This vessel will make an entire circuit of the globe anchoring in 56 ports and visiting 21 different countries, covering during the four-months cruise approximately 28,400 miles.

Funchal the Capital of Madeira, and the first port of call is radiant with gaily colored houses and gardens; Costumes here are likewise brilliant. Naples with the wonderful blue of its sea and sky, with Mount Vesuvius at one side and the Islands of Capri, Ischia and Procida in the distance, affords a vision of loveliness.

Japan in cherry blossom time is a fairland of color and sunshine, and Fujiyama towers above the masses of bloom, its white summit contrasted against the blue sky. New Year's eve in Cairo is most festive and here

colors run riot. The bazaars, the palaces and bright hued mosques with their numerous minarets and domes are color schemes of rare beauty. Each of the countries offers an ever-changing vista of color and strike vividly into the memory, causing the traveller to become interested, consciously or not, in color psychology.

One of the features of the world cruise of the Empress of Australia, is the way detail worries have been taken out of the hands of the members of the cruise party. From start to finish the ship is their home. Worries in connection with foreign money, customs regulations and language are a thing unknown to the passengers, as these details have been worked out months ahead and handled entirely by the cruise managers on board.
