Looking For Flaws.

Don't look for flaws as you go on through life,
And even when you find them,
It is wise and kind to be somewhat blind
And look for the virtue behind them,
For the cloudiest night has a tint of light
Somewhere in the shadows hiding;
It is better by far to look for a star
Than the spots on the sun abiding.

The current of life runs ever away
To the bosom of God's great ocean;
Don't set your force 'gainst the river's course,
And think to alter its motion;
Don't waste a curse on the universe—
Don't shrink at the trials before you,
Don't butt at the storm with your puny form,
But bend and let it go o'er you.

The world will never adjust itself
To suit your whims to the letter;
Some things must go wrong your whole life long,
And the sooner you know it the better,
It is folly to fight with the infinite
And go under at last in the wrestle;
The wisest man shapes into God's plan
As the water shapes into a vessel.

—ELA WHEELER WILCOX.

Latest News of Dreyfus.

LONDON, May 29.—M. De Blowitz, Paris, correspondent of the Times, commenting upon the steps about to be taken by the court of cassation in the case of Dreyfus, says:

The report of M. Ballot De Beaupre ends by saying: "If the court adopts the conclusion of its reporter, it will order a revision of the case and will send Dreyfus before a fresh court martial to be judged according to the law."

In that case acquittal is certain. I doubt whether there will be even partial secrecy in the new trial as everything has already been revealed and no danger has arisen at home or abroad.

Favours Arbitration.

The great disarmament conference is liable to dwindle to one for the consideration and adoption of the principle of arbitration, as a few days ago the question of arbitration was forcibly brought to thefront by Sir Julian Pauncefote the British representative to the conference.

Under date of May the 27th the correspondant of the London Daily Telegraph at the Hague reported as follows:

Peace prospects touched high water mark to-day when the conference found itself face to face with arbitration in a practicable and acceptable form and as a permanent international achievement. This honor is mainly due to Sir Julian Pauncefote. When the members of the arbitration section had finished reading the Russian proposals on this subject Sir Julian expressed his complete approval of them, but said it would be a great pity if the conference failed to embody the principle of arbitration in some permanent statute:

"I now beg to propose," he said, "the formal establishment of a permanent arbitration tribunal empowered to deal with all matters in dispute capable of reference to the judgment of an umpire. I do not intend to trouble you with details as to its mechanism today nor until you accept the principle of my proposal. Therefore I ask you to accept the principle."

M. De Staal at once declared: "Sir Julian Pauncefote having presented his proposal, we are prepared to supplement and to complete the printed suggestions just distributed by others dealing with a permanent arbitration board."

Thereupon the Russian president of the conference drew a paper from his pocket and laid it upon the table then and there. The paper contained a foundation of a permanent tribunal, suggesting the substitution of a new clause and referring to an appendix not yet drawn up.

The amazed delegates crowded around Sir Julian congratulating him upon having played the winning card, which had so quickly precipitated the Russian alternative scheme. Some stood aghast as the matter was not contemplated in their instructions. Finally, it was decided to refer the matter to a sub-committee.

The Americans, it is believed, are elaborating an organic stature for the erection of a permanent tribunal, which will probably be laid before the conference and be supported by the British delegates when the principle embodied in Sir Julian's resolution is accepted.

MONDAY, JUNE 5, 1899.

LOOKNIG UP A ROUTE.

Evidently the C. P. R. have not abandoned the hope of being able to find a feasable route for a railway over the Camp McKinney divide, as for two or three months past a corps of surveyors have been working between the Okanagan valley and the summit, being camped at McCuddy's, and now another party has taken the field between Rock Creek and Camp McKinney. Just what the outcome of all this surveying and exploring will be it is hard to say, and that the Columbia and Western will reach a connection with Penticton by way of the west fork of Kettle river, an opinion held by many for some time past, would seem to be premature.

That the company intend not to leave a stone unturned to find the most feasable route between Midway and Penticton is also evidenced by the fact that another party of surveyors have been for some time and are now engaged in exploring the country between the west fork of Kettle river and Penticton. Whatever the outcome of all this work, whether the main line is carried between the Kettle river valley and that of the Okanagan by way of the west fork pass or that over Camp McKinney mountain, nothing is so sure as that the whole district will be given railway communication by the construction of a numerous system of feeders or branch lines, so that whichever route the main line may take, no section having shipping ore and trade to offer the company will be overlooked, a matter for congratulation to all those desiring the advancement of the country and the development of this the greatest copper-gold producing section in the province.

Licenced Districts.

As the time draws near for applicants to appear before the board of Licence Commissioners, the absurdity of compelling the attendance of all those requiring either new licences or a renewal of old ones at the only point in the Rossland riding at which a sitting of the court is to be held, becomes more and more apparent. Under the new Act the province is divided into Licence Districts, and the Boundary Creek district is made so large, comprising the whole of the Rossland riding, that it will cost applicants desiring to procure a hotel licence such an excessive sum that it will be truly a hardship upon them. Instead of the Rossland riding being created a district, thereby compelling applicants from such points as Midway, Anaconda, Carson, Trail and other points outside of municipalities, to assemble at Cascade City, the riding should have been split into at least three separate districts, consisting of first Boundary Creek, second Grand Prairie, and third all that portion of the territory to the east of Christina lake. These separate courts could then have been held, (at no extra cost to the government) and applicants could have transacted their business at a nominal cost to themselves.

Before the next sitting of the court in December, two new districts should be created, and those more directly interested, should see to it that such is done.

The West Fork Ferry.

The west fork ferry has come to grief and is now it is said lying on a bar near James creek, about six miles below the point at which it was recently in operation. The cause of the ferry breaking away was defective tackle, the blocks not being strong enough to hold the great strain put upon them now that the west fork is a raging stream.

A party of prospectors with horses were on the ferry when it broke away but as no report is current of their having come to grief it is supposed that in some way they managed to get off the ferry as it decended the stream.

It is a great pity the ferry is rendered useless for the balance of the season, as quite a number of prospectors and others are passing up and down the Kettle river, in fact the volume of passengers and merchandise finding their and its way into that section is constantly increasing. Nothing will give a safe communication except a bridge across the above named stream, and it is to be hoped the government will not delay its construction, but will put it in just as soon as circumstances will permit.

the Lygia claim in Grahams camp, a north extension of the Bruce, owned by himself and W. H. Norris. The development work takes the form of a crosscut tunnel which is gradually being driven into the ledge, and which before long will disclose a fine body of ore, that is if surface indication are not misleading.

An ADVANCE representative is able to confirm the recent report circulated, to the effect that the Cariboo in Camp McKinney has a fine body of ore at the 375 foot level, in fact it is questionable if any richer ore ever has come out of the mine. The ore body too is about five feet wide the usual size of the ledge in this property. The 20-stamp mill is kept constantly employed and as a result the shareholders confidently anticipate a regular monthly dividend.

The Damask Rose is a property which is showing up well under development, as a good deal of copper is now coming into the ore. The claim is located just to the east of Cairn or Jolly Jack creek, and adjoins the Cornwall and Gravesend claims. Recently two other claims have been located near by, the May flower by Mr. J. Cameron and the Forest Rose by Messrs. Turley and Rankin. The Damask Rose is owned by Messrs. A. Megraw and T. Bryant of Camp McKinney, who intend as soon as possible to continue work on the property.

On the Helen H. Gardner, one of the Copper mountain properties situated in the Similkameen, the shaft is down about 70 feet, and it is said in a solid body of bornite ore. The property is owned by C. Sanders of Grand Forks, and is looked upon as being one of the best in a district recognised as possessing many good claims.

A mill test of 275 pounds of ore from the Waterloo claim in Camp McKinney, recently made in Spokane by Mr. C. M. Fassett, gave a return of $32.48 a ton in gold. The ore it is claimed was an average sample, therefore the result was highly satisfactory.

Representatives of three syndicates, recently acquired about three miles of ground on Rock Creek, by location, for placer mining purposes. A considerable amount of work has been done on portions of the ground by individual placer miners, and in one instance by a company, but bed rock never was reached owing to the fact that the water could not be controlled. Strong companies would overcome this by the installation of machinery, and if reports are to be relied upon this in the near future may be done. The ground lies near the second crossing of Rock Creek and from there on up the creek.

Mr. Clement Vascher arrived at Midway today on mining business bent. Mr. Vascher is in charge of operations at the Okanagan claim at Penticton, upon which before the 13th of the present month a hoisting and pumping plant will be installed, preparatory to a 200 foot shaft being sunk. The Okanagan is a copper-galena proposition and development so far discloses that the ore is of a shipping grade. Mr. Robert Wood, of Greenwood, and Mr. Thos. Ellis, of Penticton, are with Mr. Vascher interested in the property.

NOTICE.

Having retired from the general merchandise business carried on by me at Midway for the past four or five years, I beg to give notice that all accounts due to me are payable to me at the office of W. B. Rickards & Co., Midway, at which place any accounts against me will be settled.

J. McNICOL.

STRAYED OR STOLEN.

Greenwood May. 29th, 1899.

One bay mare branded UE on left hip and M on right flank, and one buckskin horse branded JJ on right shoulder and right ear tip torn. Both had new bells and straps on when last seen near Carlew, on the wagon road. Anyone returning them to Fashion Livery Stables, Greenwood, will be paid a reasonable amount; anyone retaining them in possession will be prosecuted.

Boundary Creek Licence District.

NOTICE is hereby given that the under mentioned persons have made application under the provisions of the "Liquor Licence Act 1899," for hotel licences at the place set opposite their respective names.

The Cellar.

Sinks, Garbage Boxes and Cesspools need attention now. Sometimes sickness in the summer months is due to lack of disinfectants. Be on the safe side—use CREOLIN now.

CREOLIN is a prompt, reliable and safe disinfectant. It is not poisonous, and that is one of the reasons why it is in such demand. Death through carbolic acid is frequent.

In addition to its use as a general disinfectant, CREOLIN is an agreeable deodorizer for the sick room, an effective home remedy for burns, cuts and other hurts; and a useful application in treating skin blemishes and parasitic diseases of animals.

Three table spoonfulls of CREOLIN mixed with a gallon of water makes a good disinfectant.

I beg to announce to the public that I have retired from the general merchandise business carried on by me at Midway during the past five years, and in doing so I sever my business connections with my patrons with regret. At the same time I embrace this opportunity to thank very sincerely all those who were kind enough to extend to me so liberal a patronage, a continuance of which I most respectfully ask may be extended to my successor Mr. J. R. Jacobs.

With renewed thanks to each and all, I remain,

Respectfully yours,

James McNicol.

Columbia Council.

The first civic election to be held in the new City of Columbia took place on Thursday the 25th of May, and as a result the following gentlemen were elected, Messrs. McArthur, McDonald, Cusson, Beer, Anderson, and Wastell, and in the order named according to the number of votes each one received. Mr. Charles Hay was chosen Chief Magistrate, the selection being an unanimous one.

The Elkhorn.

Some fine looking ore was brought into Midway a few days ago by Mr. C. L. Thornet the owner of the Elkhorn claim which is situated just north of the town of Greenwood. The vein filling on the Elkhorn is a quartz carrying galena, some copper and native or pure silver, in fact so rich is the ore in silver it is said from a 14-inch pay streak in a 3-foot vein, ore can be and is being taken which will run up to 1500 ounces of silver to the ton. The ore taken from this paystreak is being sacked and with the advent of the railway, which will run through the claim, it will be shipped to a smelter. The property is being developed by a shaft, and as this deepens the value of the Elkhorn ground is being clearly demonstrated.

A Probable Deal.

A deal started recently, is about maturing as only a few days can elapse before it is closed. This consists of the purchase of the bunch of well known claims at Fairview, known as the Flora, Western Hill and Virginia owned by the Flora Western Hill and Virginia Mining Company, the purchasers being the Dominion Consolidated Gold Mining and Milling Company also Fairview property owners, the company being in possession of the Black Hawk and other claims.

The Flora and Western Hill group is situated to the west and north of the now famous Stemwinder mine and is said to be upon the same ledges, and from the time Fairview camp was born these properties have demanded attention.

The ore in these claims is similar to that found in the Stemwinder but is credited with being of somewhat higher value, in fact careful sampling is said to have often given returns of from $30 to $35 a ton in free gold, the other contents of the ore being a percentage of galena and iron. The claims are so situated that a few thousand dollars will go a long way in the matter of development, and being developed the Flora, Western Hill and Virginia should be very valuable properties.

Should be Remembered.

The Mining and Metallurgical Journal sounds a note of warning to mine managers and others interested in the development and working of mines when it says:

"The too common practice of placing the hoisting works of a mine in the same building or directly adjoining the shaft house is a custom which may be economical, but is not advisable on account of the danger from fire. That is, the gallows frame at a mine shaft or head gear around the collar of a shaft should be in a separate and distinct building from the engine house or hoist ingroom. A mine shaft with a nest of buildings immediately over it is a death trap in case of a fire or explosion, for the presence of which there is no excuse except ignorance or extreme carelessness. It very seldom happens that the ground surrounding a mine shaft is so situated that it is only possible to make the shaft house and engine house combined in one and the same building. In rare instances there are difficult, steep hillside localities where a combined building might be made an excuse for economy and convenience in choosing such a position for both, but due regard for safety from fire and good pure air for ventilation are objects more worthy of consideration than any economy such a wrong custom can warrant. In small mines where there is only one shaft or means of exit, the custom is most common, for when the mine becomes larger the error is changed by using separate buildings. The most common cause of fire have been, thawing frozen powder in the engine room on top of the boiler, contact of the chimney stack and roof, or not sufficient length to causing a spark to set the roof on fire, explosion of the boiler and fire starting in the woodpile where wood is used for fuel, have all made such an arrangement of buildings a death trap which can be avoided. Again when the order is reversed and the fire starts from underground in a mine where much timber is required to be used the buildings over the shaft when such an accident occurs are sure to be lost also. The mistake is much more common in metalliferous mines than in coal mines, where underground fires are much more common.

POSTOFFICE BOX 111.

CERTIFICATE OF THE REGISTRATION

—OF AN—

Extra-Provincial Company.

"COMPANIES ACT, 1897."

"The Mammoth Gold Mining Company,"

Registered the 28th day of February, 1899.

I HEREBY CERTIFY that I have this day registered the "The Mammoth Gold Mining Company" as an Extra-Provincial Company under the "Companies Act, 1897," to carry out or effect all or any of the objects hereinafter set forth to which the legislative authority of the Legislature of British Columbia extends.

The head office of the Company is situate in the City of Spokane, Spokane County, State of Washington.

The amount of the capital of the Company is $50,000, divided into 1,000,000 shares of five cents each.

The head office of the Company in this Province is situate at Camp McKinney, and Thomas Donald, miner whose address is Camp McKinney aforesaid, is the attorney for the Company.

The time of the existence of the Company is fifty years.

The objects for which the Company has been established are :—

To work, operate, buy, sell, lease, locate, acquire, procure, hold, and deal in generally, mines, metals, mineral claims of every kind and description within the United Sates of America and British Columbia ; to carry on and conduct a general mining, smelting, milling and reduction business ; to purchase, acquire, hold, erect, and operate electric light and power plants for the purpose of mining and treating ores, and for the purpose of furnishing lights and creating power for all purposes ; to bond, buy, lease, locate and hold ditches, flumes and water rights ; to construct, lease, buy, sell and operate railroads, ferries, tramways, or other means of transportation, for transporting ore, mining and other materials ; to own, bond, buy, sell, lease, locate, timber and timber claims ; to do and conduct a general mercantile business, and finally, to do anything consistent, proper, and requisite for the carrying out of the objects and purposes aforesaid in their fullest and broadest sense, within the territory aforesaid.

Given under my hand and seal of office at Victoria, Province of British Columbia, this twenty-eighth day of February, one thousand eight hundred and ninety-nine.

[L.S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

Camp McKinney again to the Front.

A big strike of ore was made a few days ago on the North Star claim in Camp McKinney, which claim lies about one and one half miles from the camp in a north-westerley direction, and is owned by lucky Bill Edwards, who only recently sold his interest in the Dolphin and Shannon claims to Spokane parties.

Upon the North Star work has been periodically done for eight years, but as there are three ledges on the claim and the work had been done on the other two ledges, the good ore in the third ledge was not discovered. This ledge was attacked a few days ago and as a result as soon as the shaft had penetrated to a depth of 12 feet, some four feet of fine looking ore was shown up between walls, and since then the ledge has been stripped on the surface for quite a distance. The ore is well mineralized, carrying galena, zinc, iron and some copper pyrites, and resembles exactly the Cariboo or characteristic ore of the camp. Some visible gold has also been encountered in the ore, but as no assays have yet been made the average value has not been determined. This will be known in a few days, and as the ore is free milling and concentrating and the property is well situated the development of the claim will be watched with much interest.

The next claim to the North Star is the Mainland owned by Messrs. J. Lind, Thos. Humphrey, and C. Held, Greenwood parties.

The Imperial Limited.

A dispatch from Montreal dated the 25th of May says : The new fast service on the Canadian Pacific Railway will be inaugurated about the middle of June, probably the 18th or 19th. The flyer across the continent will be called the "Imperial Limited," and will reduce the time between Montreal and Vancouver to about 100 hours. There will also be a daily trans-continental service instituted, owing to the vastly increasing volume of travel, and trains will leave on Sundays as well as on week-days, this being absolutely necessary to relieve the present heavy traffic on Monday trains, with travellers from Europe. The hour of departure from Montreal will be 9:30 a.m., and Toronto about for hours later, and Winnipeg and many parts of Manitoba will be brought within 48 hours of this city, local trains in that province making close connection with the "Imperial Limited."

Vancouver and Victoria will be reached on the 4th day out from Montreal. The Kootenay country will also be advantageously affected by the new service. A fast train on the Crow's Nest Pass Railway, to which a through sleeper will be attached to Kootenay Landing, will make this alternate route to these gold-fields the shortest and quickest one from the East. Though passengers will have a choice of routes to the Pacific Coast by the main line or by the Crow's Nest Pass branch, just as they now have the option of travelling around the north shore of Lake Superior or by the Upper Lake steamships of the company between Owen Sound and Fort William.

This new fast service is to be greatly supplemented by an increased local service on different sections of the line, so that the accelerated speed will be largely obtained by the reduction of the number of local stops.

Certificate of Improvements.

Notice.

EXCELSIOR MINERAL CLAIM.

Situate in Osoyoos Mining Division, of Yale District. Where Located:—About a mile and a half east of Penticton.

TAKE NOTICE that I, J. P. at the residence of the bride's parents, Benvoulin, the marriage ceremony was solemnized between Mr. Joseph P. Keane, manager of the Cariboo mine, Camp McKinney, and Miss Mabel Dell, The officiating clergyman was Rev. G. A. Wilson, of this city, and the ceremony was performed in the presence of a few of the immediate friends of the happy couple. Mr. and Mrs. Keane left the same day on a wedding trip to Victoria and the sound cities.—Vernon News.

Mr. T. W. Stack is laying the foundation for a residence on 8th street. Mr. Stack is interested in mining properties in Summit camp, also in Grahams camp. Like many others Mr. Stack recognises that no matter where the mining interests are in the district, with a railway they are not too far away from the ideal residence town, Midway, and therefore he has selected this place in which to build a home. Very shortly Mr. Stack will start to develop his Graham camp property by running a crosscut tunnel to strike the ledge, which on the surface is somewhat broken up, but from which he took ore which gave an assay return of 47 per cent in copper.

Mr. Donald Graham, of Armstrong, was a visitor in town on Friday and Saturday, being on his way home after having paid a visit to the Burnt Basin district east of Christina lake. Mr. Graham expressed himself as astonished at the amount of improvement he noticed all along the route of his journey, since his last visit to this district. Although not now a member of the provincial legislature, Mr. Graham takes very much interest in all questions effecting his old constituency, and as before stated so it must be again said, that the people of East Yale made a great mistake when they failed to return at the last election their former representative.

A few days ago Mr. Scott McRae returned from the main Kettle river and west fork sections, after having made a thorough examination and located routes over which the wagon roads to be built there this summer by the government, will be constructed. Mr. McRae does not confirm the general opinion that those sections are easily accessable by wagon roads, as he says that in some places it will require much work to get a good road bed. In fact Mr. McRae considers that the funds available will not be sufficient to build the roads and the bridge over the west fork, although they will go a long way towards it. In some places there are enormous rock slides and in others some very boggy ground will have to be crossed.

A Wee Bit Banquet.

A few of the old members have moved away and some have committed the crime of entering the ranks of the benedicts, but when occasion requires there are still enough members of the Midway Thirteen Club left to have a good time. One of these good times was experienced on Monday evening last, when the guest of the evening was Mr. John Withell, of Montreal, a member, and one of the directors of the Midway Company Limited, a gentleman who after spending about a month in the town, left for his home on Thursday last, going out by way of Camp McKinney. During his sojourn at Midway, on the banks of the Kettle river, Mr. Withell ingratiated himself into the affections of the people, a process easily accomplished by one to whom a corteous and kindly bearing is natural. Therefore no wonder is it that some of the citizens of the place desired to show their appreciation of the interest which had been taken in their welfare, in their own peculiar way, this taking as before indicated of a "Thirteen Club" banquet. Of the proceedings very little must be said, as one of the most stringent rules of the club relates to secrecy, but under pain of offering great displeasure it is herein chronicled that the bill of fare consisted of speeches and songs, in all the known dialects and tongues, the latter with musical accompanyment, and "cough drops" to stimulate the vocal organs, with an addition to the bill of fare at midnight of a splendid coalition nicely served, and much enjoyed by all present. Of the speeches the predominent feature need only be noted, viz, that much regret was expressed at the near departure of the guest of the evening, and a sincere desire offered that the near future would see his return, not as a visitor, but to become a permanent resident of Midway, to all of which Mr. Withell suitably responded.

The singing of "Auld Lang Syne" and "God Save the Queen" brought to a close in the early morning hours one of the most successful entertainments of the "Midway Thirteen Club."
