...Copper and Gold...

The Similkameen district is noted for its ledges of Copper-Gold ores.

Quality and Price.

While W. T. Shatford & Co. are noted for the quality and price of the goods sold by them. PROSPECTORS and MINERS operating in the Similkameen and surrounding mining camps, would do well to outfit at one of our stores, where everything is kept that is needed in the mining business.

Instead of buying outside, buy right at home, and so save money, and this more particularly refers to prospectors going into the district above referred to.

W. T. Shatford & Co.

VERNON, FAIRVIEW, CAMP McKINNEY AND SLOCAN CITY.

CERTIFICATE OF IMPROVEMENTS.

Robin Hood, B. Leather.

A Competent Judge.

Mr. C. D. Porter, ore-buyer for the Kansas City Smelting & Refining Company, says that he considers the Boundary Creek district the greatest copper district in America, the ledges being immense, the ore being self-fluxing, and the formation being such that they will go to unlimited depth. He also says that the Mother Lode, which adjoins the Crown Silver location of the Montreal Boundary Creek Mining Company, and which is owned by the British Columbia Copper Company, has show steady improvement with depth, and that the Boundary Creek district has many large bodies of ore, carrying a higher percentage of copper than the Rossland mines.

Play the Game.

There's a breathless hush in the Close to-night—
Ten to make and the match to win—
A bumping pitch and a blinding light,
An hour to play and the last man in,
And it's not for the sake of a ribboned coat,
Or the selfish hope of a season's fame,
But his Captain's hand on his shoulder smote,
"Play up! play up! and play the game!"

The sand of the desert is sodden red,—
Red with the wreck of a square that broke;—
The gatling's jammed and the colonel dead,
And the regiment blind with dust and smoke.
The river of death has brimmed his banks,
And England's far, and Honour a name,
But the voice of a schoolboy rallies the ranks,
"Play up! play up! and play the game!"

This is the word that year by year,
While in her place the school is set,
Every one of her sons must hear,
And none that hears it dare forget.
This they all with a joyful mind
Bear through life like a torch in flame,
And falling fling to the host behind—
"Play up! play! up and play the game!"

—Onward.

A Big Deal.

A Salt Lake, Utah, dispatch of recent date, states that about a month ago a gigantic deal was put through in Montana, whereby Marcus Daly and his associates in the Anaconda Mining Company have sold all their holdings in that company's vast and varied interests to an eastern syndicate headed by John D. Rockefeller for $23,000,000. Of the $23,000,000 for which the Daly and allied interests were sold, Mr. Daly pockets $6,000,000, J. B. Haggin gets $9,000,000 and Lloyd Tevis of San Francisco $8,000,000.

The properties are purchased by an eastern syndicate, headed by John D. Rockefeller and other Standard oil magnates. In the transfer are included practically the entire town of Anaconda, with its mines and smelters, vast coal and timber lands in Montana and Wyoming, and all the accessories that go to make up a princely property.

Even for this vast sum, however, the purchasers do not become the sole owners. A London syndicate that two years ago bought the interest of the Hearst estate for $7,000,000, still owns that fragment.

Cariboo No. 2.

The Cariboo No. 2 in Camp McKinney has evidently struck it rich. A mill test made here shows values of $73.38 per ton, which is about double the value shown by the mill test of Waterloo ore a few days since. It is much the best test of Camp McKinney ore that has been made here.

The test was of a 50-pound sample of ore which was taken from the mine by Alex. Winston, president of the company. He stated that it was taken across 28 inches of ore which was all alike as nearly as he could determine. He chipped the ore from the bottom of the shaft himself, brought it down on the stage and train to Spokane and delivered it to C. M. Fassett, who made the test so that he is confident that the figures are correct. The ore came from the 60-foot level of the shaft.

The certificate of the test shows assay values of 2.4 ounces silver and $71.94 in gold—a total of $73.38. The ore concentrated 8 1-3 into 1 and the value of the concentrates was 13.4 silver and $468.01 in gold, a total of $476.-05 per ton. The tailings showed .7 ounce silver and $7.65 gold, a total of $8.07 per ton.

The result of the concentrating was 76 per cent. of the silver and 78 per cent. of the gold saved in the concentrates; 25.5 per cent of the silver and 9.3 per cent. of the gold left in the tailings and 7.5 per cent of the silver and 12.7 per cent of the gold lost in the slimes.

The claim owned by the Cariboo No. 2 Mining Company is the Rosey and it adjoins the Caribou mine. The lead which is being opened is said to be a spur from the main Cariboo vein. The company was floated last winter by A. E. J. Percival. Development is in charge of Joe Murphy, under whose superintendence the Waterloo has also been developed.—Spokane Chronicle.

MONDAY, JUNE 26, 1899.

A NEW ROAD.

On several occasions we have called the attention of the authorities to the fact that the mining and agricultural interests of the Similkameen, have for a long time demanded that a connecting link between the road systems of the Nicola valley and the lower Okanagan should be built. To make this connection, a new piece of road would have to be constructed between Keremeos and Princeton, and if we mistake not, between the latter place and Granite Creek. Taking the map it will be seen that the distance between these points is considerable, therefore it will naturally be supposed that the undertaking would be a costly one. This, however, would not be the case, as from Keremeos to Princeton the road would follow the level stretches which abound along the valley of the Similkameen, thereby allowing a road to be built at a truly nominal cost, and as from Princeton to Granite Creek the distance is only 12 miles, the cost in this direction too would be nominal. Called forth owing to the general activity of the district, hundreds of persons are now passing over this route yearly, and as something more is needed than a pack trail over which to transport farm produce and merchandise and miners' supplies, no time should be lost in giving to the district a good wagon road, and more especially so as it would represent one of the most remunerative investments the government could make at the present time. The miners and those interested should make themselves heard in this matter, for only by so doing can they expect that the government will attend to their wishes.

TIME TO THINK OF IT.

Even now it is not too soon for those doing business at such points as Rock Creek, Camp McKinney and in fact all points west of Midway and east of the divide between the Kettle river valley and that of the Okanagan, to pay attention to the question of changing their freight route, and more particularly does this apply to general merchants who soon will be ordering their stocks of fall goods. In two or three months if all goes well, the C. P. R. should be creeping into Midway, and as soon as this transpires, a big percentage of the enormous quantity of freight which is now being distributed at Penticton should be distributed here, and the freight route should be from east to west instead of at present from west to east.

Just what this will mean is hardly intelligible to many, but they will be able to realize it when it is stated that by the present route from Penticton to Camp McKinney, the distance is about 50 miles, while from Midway it will be only about 30, and that too over a road not to be compared at all to the one over which freight is now being hauled. Apart from the difference in distance and the evasion of the heavy sand hills on part of the Penticton-Camp McKinney route, there is another matter to be taken into consideration, and that is the difference in altitude. There is something like 1000 feet in favor of the Midway-Camp McKinney haul, owing to the fact of the height of land on the Camp McKinney mountain being to the west instead of to the east of the camp, and the enhanced elevation of Midway above that of either Penticton or Okanagan Falls. These are all great factors in the expeditious and cheap handling of freight, and should in this instance cause a saving of one half a cent a pound in goods laid down at Camp McKinney when the new route is taken.

Such being the case, merchants should not loose sight of the fact, but should even now caution those with whom they deal to be on the lookout for the orders which some day will be given to route freight over the Columbia and Western Railway.

Licence Board.

The Licence Commissioners for South East Yale in meeting at Fairview dealt with a number of applications for hotel licenses, many of which were renewals of existing licences. The procedure under the new Act in making application was for the most part carefully [illegible] greatly lessened.

The following were the licences granted.

RENEWALS.

H. S. Pittendrigh, Rock Creek Hotel, Rock Creek.
J. L. Christopherson, Mountain Hotel.
H. Cameron, Camp McKinney Hotel, Camp McKinney.
D. McDuff, St. Louis Hotel, Camp McKinney.
J. P. McCuddy, McCuddys Hotel.
Fairview Corporation, Hotel Fairview, Fairview.
Henry Jones, Golden Gate Hotel, Fairview.
Evan Morris, Miners Home, Fairview.
Geo. Sheehan, Fairview Hotel, Fairview.
C. A. C. Stewart, Johnson's Hotel, Similkameen.
Rose & McKinley, Hotel Penticton, Penticton. This renewal was granted by the Commissioners subject to the production by the applicants of affidavits of bonds men, and these have since been furnished.

The Board adjourned until June 30th, when they will meet again at Fairview to consider the application of those who had not complied with the Act with regard to the time for making application.

MINING NOTES.

The Granite and Banner Gold Mining Company, are installing a 5-stamp mill on their property at Camp McKinney, and by latest advices the work of setting up the mill is progressing satisfactorily.

The owners of the Fontenoy claim in Camp McKinney are hampered in the development of the property, owing to the non arrival of the hoisting plant. The shaft is down a depth at which only a steam hoisting plant can be worked to advantage, therefore it is to be hoped the difficulty will soon be overcome by the arrival of the machinery.

A portion of the hoisting plant ordered several months ago arrived at the Waterloo claim in Camp McKinney on Wednesday last. As soon as the balance is brought in from Penticton the plant will be put in position, and the main working shaft will be sunk another 100 feet.

LOCAL AND DISTRICT.

The general merchants of Midway have come to an unanimous understanding in the matter of Sunday closing, therefore, it is pleasing to say that for the future as far as they are concerned at any rate the Sabbath will be strictly observed.

Burglars and highwaymen are becoming all too numerous in this section as recent events tend to show. During the past week Mr. Geo. Cawston was coming from Camp McKinney to Rock Creek, when he met two Indians on his way, who were somewhat under the influence of liquor. Mr. Cawston was riding on horse back and was leading a pack horse. The Indians were also mounted. The Indians accosted Mr. Cawston, and receiving no reply or only, "How do," they rode up beside him at the same time asking him where he kept his money. Mr. Cawston thought this impertinent and therefore told them to mind their own business and go away. Instead of doing this one of the Indians took hold of his bridle rein and fastened it to his (the Indian's) saddle. By this time matters began to wear a serious aspect, so Mr. Cawston dismounted and tried to get his horse from the Indian. The Indian also dismounted and as soon as he did so he received a right and left in true Jeffries style and was sent sprawling along to terra firma. The second Indian then took a hand in affairs by dismounting and grabbing a rock. The two then closed in on their defiant antagonist and a scrimmage ensued, in which the first named Indian intent on getting money, caught hold of Mr. Cawston's right hand pants pocket and tore it out. As he did this some $60 in bills and two cheques were scattered on the ground. A scramble for the money ensued and Mr. Cawston managed to get hold of the bulk of the bills, the Indians getting about $40 and the two cheques. The Indians then made off, and Mr. Cawston rode on to report the matter to the police. The last heard of the Indians they were at Oro on the other side of the line. It is said these Indians are needed for depredations committed in the neighborhood of Vernon, and if such is the case it is to be hoped no stone will be left unturned to secure their arrest. It is feared however that this will not transpire, as it now takes heaven and earth and a word from Attorney-General Martin before a constable will move out of his tracks to arrest a man even on this side of the line, to say nothing of following criminals into the United States, to there secure their extradition.

The Cellar.
Sinks, Garbage Boxes and Cesspools need attention now. Sometimes sickness in the summer months is due to lack of disinfectants. Be on the safe side—use CREOLIN now.
CREOLIN is a prompt, reliable and safe disinfectant. It is not poisonous, and that is one of the reasons why it is in such demand. Death through carelessness is frequent.
In addition to its use as a general disinfectant, CREOLIN is an agreeable deodorizer for the sick room, an effective home remedy for burns, cuts and other hurts; and a useful application in treating skin blemishes and parasitic diseases of animals.
Three table spoonfuls of CREOLIN mixed with a gallon of water makes a good disinfectant.

MINERAL ACT 1896.

...rtificate of Improvements.

NOTICE

...NIA AND RADIA FRACTIONS MINERAL CLAIMS.

...ate in the Osoyoos Mining Division of ...ale District. Where located:—In Camp ...cKinney.

...AKE NOTICE that I, Chas. deBlois Green ... as agent for W. J. Esdaile free miner's ...ificate No. 34674 and D.B. Boyle, free miners ...ificate No. 33685, intend, sixty days from ...date hereof, to apply to the Mining Recor... for a certificate of improvements, for the ...ose of obtaining a Crown grant of the ...ve claim.

...nd further take notice that action, under ...ion 37, must be commenced before the ...uance of such certificate of improvements

...ed this 1st day of June, 1899.

C. deBLOIS GREEN.

The O. K.

Following the report that recently a splendid showing of ore was opened up in the O. K. claim on Canyon creek, comes another that the property is likely soon to be bonded for a good round sum, as a few days ago the property was examined by parties representing a strong syndicate operating in Boundary Creek, and which is well able to take hold of anything offering in the district, which happens, like the O.K., to have qualities worthy of attention, and the investment of capital therein. The O. K. ledge consists of a pyrrhotite carrying some copper and a good gold value, and is owned by Messrs. C. Matheson and H. Thelen, two prospectors who have been in Canyon creek district for some time.

Strike on the Silver Dollar.

Another rich shoot of ore has been opened on the Silver Dollar claim situated near Canyon creek, a tributary of the main Kettle river. The Silver Dollar has a fine strong vein of pyrrhotite in a quartz gangue with a small percentage of copper, and carries its principal value in gold, of which the ore has a goodly quantity. In fact it is a question if there is much better ore in the country than is to be found in the Silver Dollar.

Recently mining men have been giving this property attention, and it is said a deal is now in course of contemplation, in which a working bond will be given on the property, with figures ranging above $50,000 appearing in it. The owners Messrs. Peterson and Wardell are fortunate in possessing such a property as the Silver Dollar, but all they will make out of the claim they will well deserve as they have stuck faithfully to their holdings. If the present parties who are negotiating for the property should secure it, it will be a good thing for the district in which the claim is situated, as they would without adoubt enter upon the active development of the claim, as that is really what the district, or rather the properties contained therein, need.

Very Encouraging.

A meeting of the Montreal shareholders of the Fairview Corporation, Limited, was held at Montreal a few days ago. Mr. R. Russell, president and managing director of the company, addressed the meeting and explained that the reason for calling the meeting was that it was impossible to meet all the parties interested in any other way. The general business of the Fairview Corporation for the past two years was gone into in a very thorough manner by Mr. Russell, who showed that in the Stemwinder mine alone the corporation had an asset which would pay handsome dividends on the whole capital stock. Mr. Russell further stated that there was a quarter of a million dollars' worth of ore actually blocked out in the mine. All the other departments of the business were in good shape, and as soon as a large stamp mill could be erected on the Stemwinder the Fairview Corporation would be a steady dividend-paying company. He requested the co-operation of the shareholders in obtaining the money required for machinery.

Considerable stock was taken by the shareholders present at the meeting. A hearty vote of thanks was passed to Mr. Russell for the report given to the shareholders and great satisfaction was expressed at the position of the company.

A block of the treasury stock of the company sufficient to erect machinery is being offered at 15 cents per share, and it will probably be taken up by the present shareholders. All present at the meeting concurred in the belief that it was actually worth double that price. A full report is being circulated among all the shareholders which goes very minutely into all details.

Something About Rocks.

Those who have mingled much with miners and prospectors will readily know that among them are many that tenaciously hold to certain set theories as to the class of rock in which minerals will be mostly found, and among them will be discovered a goodly percentage that have a distinct preference for certain formations. For instance, some seekers after gold bearing veins, prefer to look in a granite formation, while others scorn the granite and declare that it is only throwing away time to prospect in such a formation. Others again who have received their schooling, say in California, cannot understand the existence of rich gold veins in gabbros, and so it goes on, until first one class of rocks then another is condemned, according to the

AT HAIN & CO.

At last the Blockade seems to be broken and freight is rolling in, not as fast as we would like, but something is better than nothing, and we are prepared to show our friends some seasonable goods, for LADIES, CHILDREN and GENTLEMEN.

Have you seen the beautiful dinner sets we received direct from the importer? if not, don't fail to look at them soon, as we do not know how long they will be in stock. Chamber sets of 12 pieces, also cheaper ones of 6 pieces. Anything in the Crockery line from plain white stoneware to the costliest china ware.

Our Dress Goods Departm-nt is not quite complete, as most of the seasonable goods have been sold, but we still think that we are able to satisfy almost any taste. Silks, satins and velvets in all colors for trimmings, and shirt waists. A new consignment of shirt waists has just arrived.

Our fine lot of Groceries are coming in daily, including fine Government Creamery butter, also fresh made ranch butter.

Miners' Supplies at most reasonable prices. A new consignment of the celebrated Armstrong XXXX Flour just received.

POSTOFFICE BOX 111

the seekers after the base and precious metals.

In British Columbia where the formations are so varied, it would seem not **wise to condemn** any class of **rocks as unassociated with** the deposits of **the precious metals,** and this will be **made more plain it is** believed, if the **following article which** was recently **contributed to the Inland** Sentinel by **Mr. G. F. Moncton,** is carefully read and **thoroughly considered.**

"Miners are largely influenced **in their opinion of veins** by the class **of rock which form the** walls. **There is no doubt that in any** given **region there** are **certain kinds** of rocks **which are** favourable to ore deposits. It is not, however, so much the kind of rock as the condition of it which will give us an indication of ore. In almost every case the walls of ore deposits have undergone considerable alteration, thus at the side of a vein in granite there is usually a clay coupe, and the same is the case with most rocks composed chiefly of felspar. Diabase and diorite are largely altered to serpentine or magnesian slate. Slates traversed by good veins are usually soft and black. In almost every kind of rock known good veins have been found. In Arizona, rhyolite carries them in the Tombstone district. In Dakota they occur in horneblende rock, in rhyolite, limestone, quartzite and slates. In California the greatest mines have been those on the contact of slate and diabase. The famous mine at Angels Camp is a mass of diabase altered to chlorite and talcose schist, filled with irregular bodies of quartz. At the Gover mine two parallel veins occur separated by slate and having diabase for their other walls. The Eureka and Idaho, of Grass Valley, are at the contact of diabase and slate or serpentine, below which is a wide belt of slate. In Eldorado the most important mines are associated with diabase or diorite and slate or serpentine. In Mariposa county, at the Sirocco mine, gold occurs in diabase as well as in quartz traversing it. This diabase is in part altered to chloritic slate. In the Monte Negras district the veins are in diorite and often contain much copper. In San Bernardino and some other countries, gold occurs in felsitic rocks. This is so in the case of the pocket mines in Mariposa county. It is found in liparite in San Benito and in rhyolite at Calico. In Calaveras county it has been found in volcanic tuffs. At Gold Mountain it has been found in quartzite, at Oro along the contact of limestone and mica slate, and in Mono county at the contact of limestone and a dyke. The Alvord vein a mass of limestone carrying shoots of iron ore, the whole carrying gold, the footwall is diorite and the hanging wall mica slate. In the Black Hawk limestone carries gold. This rock, associated with iron, carries it at the Rose and Christie. At Pinon Mountain all the veins are in granite. There is a group of great mines on the East Lode, which is a mineral belt lying east of the Mother Lode, which occur in granite and rocks resembling it. As this belt runs northward the veins lie in mica slate with associated dikes, and further north still run again into granite. The Golden Cross mines of San Diego are hornblende slate into which granite has been thrust. At Sonora, the Golden Gate is in diorite porphyry which has been altered to chlorite slate. In California gabbros, basalts and the glassy rocks have not been found to carry gold so far. In Colorado, granite associated with dikes of eruptive rock carries the best gold veins. They also occur in mica slate and gneise. The famous Gregory vein which has probably produced more gold than any other single vein in the word, was in granite and gneise. It varied from a few inches to 12 feet wide, and was 2440 feet long. It produced $7,000,000. In Virginia the veins are in slate, and much of the gold is in slate stself. The ore of the Haile mine is slate altered into talcose rock. Dikes of eruptive rock cut across the slates. It is worth nothing, while speaking of wall rocks, that veins in granite, gabbro and similar rocks have generally but one good wall. In such cases the shoots are often found to pinch out and overlap, so that the hanging wall of one shoot becomes the footwall of the shoot of ore beneath it, and as each shoot peters out the next one is found by driving through the wall which was well defined. At such an overlap the ore in the shoot which has been proved by cross-cutting from the shoot which pinched out is likely to be found to be wider and of lower grade than the average ore but will narrow down and increase in value as the distance from the overlap increases. This applies to veins of all kinds in massive rocks.

CERTIFICATE OF THE REGISTRATION

—OF AN—

Extra-Provincial Comp any.

"COMPANIES ACT, 1897."

"The Mammoth Gold Mining Company,"

Registered the 28th day of February, 1899.

I HEREBY CERTIFY that I have this day registered the "The Mammoth Gold Mining Company" as an Extra-Provincial Company under the "Companies Act, 1897," to carry out or effect all or any of the objects hereinafter set forth to which the legislative authority of the Legislature of British Columbia extends.

The head office of the Company is situate in the City of Spokane, Spokane County, State of Washington.

The amount of the capital of the Company is $50,000, divided into 1,000,000 shares of five cents each.

The head office of the Company in this Province is situate at Camp McKinney, and Thomas Donald, miner whose address is Camp McKinney aforesaid, is the attorney for the Company.

The time of the existence of the Company is fifty years.

The objects for which the Company has been established are :—

To work, operate, buy, sell, lease, locate, acquire, procure, hold, and deal in generally, mines, metals, mineral claims of every kind and description within the United Sates of America and British Columbia ; to carry on and conduct a general mining, smelting, milling and reduction business ; to purchase, acquire, hold, erect, and operate electric light and power plants for the purpose of mining and treating ores, and for the purpose of furnishing lights and creating power for all purposes ; to bond, buy, lease, locate and hold ditches, flumes and water rights ; to construct, lease, buy, sell and operate railroads, ferries, tramways, or other means of transportation, for transporting ore, mining and other materials ; to own, bond, buy, sell, lease, locate, timber and timber claims ; to do and conduct a general mercantile business, and finally, to do anything consistent, proper, and requisite for the carrying out of the objects and purposes aforesaid in their fullest and broadest sense, within the territory aforesaid.

Given under my hand and seal of office at Victoria, Province of British Columbia, this twenty-eigth day of February, one thousand eight hundred and ninety-nine.

[L.S.] S. Y. WOOTTON,
Registrar of Joint Stock Companies.

There will be no ... of opportunity for people to spend ...ney, therefore if they do not spend ...ney only will be to blame.

Mr. (Eva) Smith, of Greenwood, passed out to Vancouver on Thursday's stage bound to Penticton. Mr. Smith will be one of the central figures in a pleasing ceremony which will take place at Vancouver in the very near future, Miss Stuart, sister of Messrs. Angus and Randolph Stuart, of Greenwood, being the other contracting party. The good wishes of a host of friends will attend them as they enter upon lifes journey together.

Parties are complaining that sawmill proprietors in this district are not sufficiently careful to keep sawdust out of the streams. The question of disposing of this waste product of the sawmill is generally a grievous one, but as the law distinctly prohibits creeks and rivers being polluted with it, there is no excuse for its being found in them. Fish will not live in streams polluted with sawdust, therefore those interested in the welfare of the finny tribe should see to it that they are not molested in their native element in this particular way.

Contractor, Mr. George Smith, is busy putting the finishing touches to the carpenter work on the Lamb Bros. flume, which is to carry water from Boundary Creek to their ranch, for irrigating purposes. The flume is about two and a half miles long, and when completed and in working order, it will render a splendid service to their property. So far this season there has been no necessity to irrigate, but that is no criterion, as the weather may change considerably before the harvest time comes.

After a lengthy sojourn in the region around Canyon creek, and the west fork of Kettle river, Mr. Forbes M. Kerby, P. L. S. returned to Midway on Friday. Mr. Kerby has been engaged in some preliminary work in connection with the laying out of the towns of Canyon City and Rendell, and also in the survey of several mineral locations. Mr. Kerby reports everything moving ahead in that portion of the district recently claiming his professional services, and he feels confident that the district has a great future before it.

The party of Great Northern surveyors, under the guidance of Mr. A. L. Bowen, have been working in this neighborhood during the past week, as trial lines have been run on the north side of the Kettle river between the International boundary line and the confluence of Curlew creek with the Kettle river. This has been done so as to determine the easiest grade for the railway which will undoubtedly be built in the near future into Republic camp from the south, and which will have its objective point on the International boundary line at Midway.

A meeting of those interested in school matters was held at Midway on Saturdary last. The meeting was held for the purpose of receiving the secretary's annual report and financial statement, and the seciection of a trustee, Mr. McNicol's term of office having expired. Mr. McNicol's report and financial statement having been read by Mr. H. Murray, who acted as secretary for the meeting, the same was adopted as read. The business of selecting another trustee was then proceeded with and Mr. McNicol was unanimously chosen for the position. The meeting then adjourned

House breaking seems to be becoming a very fashionable entertainment for a certain element, who have recently invaded this district. Burglaries have recently been committed at Greenwood and other points to the east, and now word comes that on one night of last week the residence of Mr. Thos. Ellis, of Penticton, was broken into, and money to the amount of $90 and two cheques stolen. The cheques were signed but were left blank, as far as the amount was concerned, as they were left in this state by Mr. Ellis, who was away from home. It is to be hoped the guilty party or parties may be speedily brought to justice.

Mr. Reginald Gardom, who recently resigned his position as provincial police officer, has reported for duty at the Grand Forks Customs office, and for the future will be a member of the Federal staff of Customs officials. Mr. Gardom is an aspirant for the position of Customs officer at Midway, now supposed to be vacant, and as his application has been very generally endorsed by residents of this town and district it is to be hoped, as soon as he gains a knowledge of the routine work of a Customs office, that the department will accede to the wishes of the great number of people who desire to see this appointment conferred upon him.

Since writing the above it has been learned that Mr. Gardom has heard from the department, and has received his appointment, therefore, congratulations are now in order, and if only Mr. Gardom makes as good a Customs official as he did a provincial officer, the confidence of the community will not have been misplaced.
