...Copper and Gold...

The Similkameen district is noted for its ledges of Copper-Gold ores.

Quality and Price.

While W. T. Shatford & Co. are noted for the quality and price of the goods sold by them. PROSPECTORS and MINERS operating in the Similkameen and surrounding mining camps, would do well to outfit at one of our stores, where everything is kept that is needed in the mining business.

Instead of buying outside, buy right at home, and so save money, and this more particularly refers to prospectors going into the district above referred to.

Why Martin Should Go.

The Toronto Star hits the nail on the head when in referring to the reasons why Mr. Joseph Martin should be relegated to obscurity from British Columbia politics it says: A contemporary which has set Joseph Martin on a pedestal as a sort of idol to be worshipped rises to chase all papers who do not bow down to its little god as the organ of monopoly; and also to ascribe Martin's downfall to his attitude on the Deadman's Island incident.

The fact is the Deadman's Island matter is only one of several causes which led to the request for his resignation. The real trouble probably is Mr. Martin's particularly obnoxious personality. He is overbearing, rough and rude, and a stormy individual generally. He is a man with whom few people can live at peace, unless they are ready always to submit to his views and his dictation, and his shameful outbreak at Rossland is so characteristic of him that it can well be imagined that it is not an isolated instance.

All of Mr. Martin's ability cannot atone for his dictatorial and objectionable temperament, and any government would be happier and better off for his absence.

Compensation.

The truest words we ever speak
Are words of cheer.
Life has its shade, its valleys deep;
But round our feet the shadows creep,
To prove the sunlight near.
Between the hills those valleys sleep—
The sun-crowned hills,
And down their sides will those who seek
With hopeful spirit, brave though spent,
Find gently flowing rills.

For every cloud a silvery light;
God wills it so.
For every vale a shining height;
A glorious morn for every night;
A birth for labor's throe.
For snow's white wing a verdant fleece
A grain for t ses.
For buried seed, the harvest yield;
For pain, a strength, a joy revealed,
A crown for every cross.
—The Westminster.

Canadians Doing Well.

In rifle competition at Bisley, England, the Canadian team is doing well as recently they came very near carrying off the Kolapore cup. A Bisley despatch says:

In the contest for the Kolapore cup, seven shots at 200, 500 and 600 yards, open to teams of eight, one team of volunteers from the mother country, one team from the militia or volunteers of each British colony or dependency and one team from members of the Indian staff corps, Indian service or Indian volunteers, at the end of the 200 yards shooting the scores were as follows: Mother country, 283; Canada, 280; Guernsey, 256; India, 250; Jersey, 250.

The best Canadian score was that of Bourne, 42.

In the 500 yard competition for the Kolapor cup the scores were: Mother country, 279; Canada, 270; Guernsey, 258; Jersey, 254; India 246.

The best Canadian scores were those of Blair, Bourne and Fleming, 38 each.

The final scores in the Kolapor cup competition were; mother country, 768; Canada, 730; Jersey, 731; Guernsey, 765; India, 702.

The Canadian scores at 600 yards were: Simpson and Bourne, 37 each; Blair and Gilchrist, 36 each; Ogg, 35; Cartwright, 34; Bertram, 30; Fleming, 29.

Canada thus wins the colonial prize of $500.

The Eight-Hour Law.

Referring to the effect of the eight-hour law on the mining industry of Kootenay, P. A. O'Farrell uses plain and very forcible language, yet having witnessed the effect of the measure he is perhaps within the mark in using such stringent words. He says:

And now that Mr. Martin and his comrades as Attorney-General are before the Province, it is well enough for all that the people of the province should know that the eight-hour law is received in the Kootenays with universal disapprobation. The silver-lead mines of the Kootenays are no longer mines of industry, affording good wages to the miner, good dividends to the capitalists and freight and revenue to the railroads. There is gloom and poverty in a thousand homes where a year ago was comfort, happiness and money. Millions have been spent building railroads to the silver-lead districts. Millions have been spent opening up and developing these mines and the eight-hour law has locked up in the mountains of the Kootenay all the treasures which those millions were spent to exploit and recover. All the enterprise and opportunity and business and trade which has been built up in that country by ten years of unremitting toil and labor is suddenly paralyzed by a law fathered by the present government. Nobody in the Kootenays demanded an eight-hour law except, perhaps the gambler or the human sun, who harvested his greater opportunity to fleece the working miner. In Rossland, where there are great machinery punchers and stamp mines an eight-hour shift has become a necessity. In the Slocan such a law was undesirable, unnecessary and vicious. The passage of such an act stamps those responsible for it as utterly unfit to shape the destiny of the province. It has paralyzed industry and brought grief and suffering and disappointment into thousands of happy homes. It is incomprehensible to the people of Kootenay that Mr. Semlin or Mr. Cotton should have ever permitted the enactment of such a law; and the only way that they can redeem themselves before the country is to proceed immediately to its repeal.

MONDAY, JULY 24, 1899.

SHOULD TAKE ACTION.

On August the 3rd, representatives of the different Boards of Trade throughout the Kootenay and Boundary Creek sections, will assemble at Rossland in joint session, for the purpose of discussing and acting upon many questions which at the present time are important in their bearing to the welfare and prosperity of the citizens of these portions of the province. To this attention has before been called but so far without result, as no movement has been made by the people of this town to be represented at such session. In this the people are throwing away a good opportunity, for without doubt the session will be fruitful of much good at least in certain directions, and the people of Boundary Creek are entitled to a greater representation than will be had if the delegates of the Greenwood Board of Trade are the only representatives of the people on this side of the Boundary mountain. Steps should be taken at once to elect delegates, or if this is thought to be not practical then could proxies be given to the Greenwood Board of Trade representatives, a course which would at least have the effect of strengthening their hands.

Found a Route.

It is said that after many months of surveying and the expenditure of much money, the C. P. R. engineers have at last discovered a feasable route for a railway over the divide between the Kettle and Okanagan river vallevs, and to the south of Camp McKinney. Strange as it may seem, it is said the crossing of this divide at the point indicated, has offered the greatest difficulty to engineering skill met with west of the Columbia river, and this was owing not so much to the elevation attained, as the sudden drop off from the summit to the valley of the Okanagan, necessitating a circuitous route or zig-zagging down the mountain. Even this seemed difficult to attain, until lines were run to the north of what is known as Camp McCuddy, but as apparently engineering skill has triumphed over nature, it may be inferred that the C. P. R. will now take this route over which to build their main line from Midway to Penticton. Should such be the case, branch roads will be run to tap the main and western tributary of the Kettle river and a junction formed at some point near to, and yet east of Rock Creek. On the other hand as the company still have engineers in the field between the West Fork of Kettle river and Penticton, an indication is given that nothing is as yet finally decided, that is as to which route the main line will take as it stretches west from Midway.

MINING NOTES.

Work has started on a new main working shaft in the Kamloops claim in Camp McKinney. The new shaft is situated about 150 feet east from the old shaft, which was down in ore about 30 feet, when work was stopped. The vein which is about five feet wide, looks well, as it is enclosed by two very clear cut walls, and the ore being of a similar character to that taken out of the east drift of the Minnehaha, should carry good values, especially when somewhat greater depth is attained.

The sinking of the Sailor shaft in Camp McKinney is going on merrily now that the old timbering of the shaft has been removed, and new timbering of a very substantial character substituted. The shaft is between 30 and 40 feet in depth and the bottom is all in ore, although the shaft is of the regulation size 5x8 in the clear. The work on this claim is under the superintendence of Major Mograw of the Minnehaha.

A very large body of ore is being broken into in the Crown Point claim, in Crown Point camp, above Rock creek, in fact just how extensive it is has yet to be determined, for although a crosscut drift has penetrated about [illegible] feet of solid ore yet are there no [illegible] sight or any indication of them [illegible] Messrs. John Douglas and [illegible] of Midway, are very pleased with the appearance of their property.

C. P. R. line west of Winnipeg; Mr. L. A. Hamilton, C. P. R. Land Commissioner; Mr. C. C. Chipman, Manager and Chief Land Commissioner of the Hudson's Bay Company, also of Winnipeg; Mr. R. Marpole, Superintendent of the Pacific Division of the C. P. R.; Mr. W. F. Tye, chief engineer of the Columbia & Western Railway and Mr. J. G. Sullivan, his assistant; Mr. L. M. Rice, engineer in charge of construction on the C. & W. Railway, and Mr. H. T. Wilgress, C. & W. Right-of-way agent, were all in Midway yesterday. The party came in at noon, and were entertained by the local representative of the Midway Company Ltd., at lunch at the Lancashire House, where they were joined by Mr. C. A. Stoess C. E., and Mr. John Douglas. At very short notice Mrs. Dowding served an excellent luncheon, which was alike a surprise and a pleasure to the visitors, who could scarcely credit that the vegetables and fruits they so much enjoyed were grown "on the premises." After luncheon the townsite was viewed from the bench which is favored as a smelter site by smelter men, and the especial sitablity of the townsite, with its unusual natural advantages for the location of a large town was freely and favorably commented upon. Messrs. Whyte and Marpole afterwards discussed on the spot with the engineering staff, matters connected with station site, sidings, site for round house and shops, etc., required for a terminal divisional station. Mr. Hamilton looked into the position as regards town lots, a proportion of which the Midway Company has arranged to convey to the C. P. R. Company, and Mr. Chipman, who is understood to contemplate the establishment in the Boundary country of one or more of the big stores of the Hudson's Bay Company, made particular enquiries regarding the prospects of several of the streets for business purposes and requested that fuller information be sent on to him at Winnipeg. At about three o'clock the visitors with the exception of Messrs. Rice and Wilgress who returned to Greenwood, left for Camp McKinney en route for Penticton and the coast, having expressed themselves as much pleased with their too brief visit to Midway.

On the Cariboo.

A large force of men are now working on the Cariboo in Camp McKinney, under the superintendence of Mr. Keane, in fact not in the history of the mine have so many men been employed at any one time. This is owing to the fact that new ground is being opened up and new machinery installed. Near the old power house a splendid concrete foundation seven feet in thickness has been laid, and upon this a 10-drill compressor plant is being placed in position. With this plant working, ground will be broken into very quickly, in fact such a systematic development of the company's holdings is just what the Cariboo has needed for a long time past. The visible ore supply in the mine could not be exhausted at the present rate of milling for a long time to come, but with such holdings as the Cariboo company have, there is no reason why, if the property was thoroughly opened up, ore could not be blocked out which would, even with the working of a much larger mill, last for years and years. This will readily be understood by those who know the amount of ground worked over, and the enormous amount of ground the Cariboo company owns and which has never as yet been touched.

As showing what the company have already done, the following report read at a meeting of shareholders of the company, held at Toronto on the 12th inst., will convey a good idea. The report stated that the mill run for June resulted in a clean-up of 1051 ounces of bullion, exclusive of concentrates. This result is the largest ever obtained in one month in the history of the company, the largest previously having been 970.

The total output of the Cariboo up to May 31 was, $589,289.40, and since that date the output has been swelled by the shipment of between $20,000 and $25,000, the result of the clean-up for June. These figures show that the mine has yielded up to date between $610,000 and $615,000.

Up to May 31 the Cariboo had paid 29 dividends, totalling $323,151.14. Since that date a dividend of $12,250 was paid for the month of June, and today a similar dividend for July will be declared. This will bring the total sum paid in dividends from the Cariboo mine up to $348,000 in round figures, and it will be seen that, as the Cariboo [illegible] and it will be seen that, as the Cariboo produces about $20,000 per month, and pays only about $12,000 in dividends, it must be laying by the tidy sum of $8,000 a month.

G. P. & T. A.

The Cellar.

Sinks, Garbage Boxes and Cesspools need attention now. Sometimes sickness in the summer months is due to lack of disinfectants. Be on the safe side—use CREOLIN now.

CREOLIN is a prompt, reliable and safe disinfectant. It is not poisonous, and that is one of the reasons why it is in such demand. Death through carbolic acid is frequent.

In addition to its use as a general disinfectant, CREOLIN is an agreeable deodorizer for the sick room, an effective home remedy for burns, cuts and other hurts; and a useful application in treating skin blemishes and parasitic diseases of animals.

Three table spoonfuls of CREOLIN mixed with a gallon of water makes a good disinfectant.

ADDRESS :—

The Advance,

MIDWAY, B. C.

Opening a Mine.

When the shaft of the mine is sunk on the vein or deposit in the early stages of the development, the error is of too common occurrence to find that the ore on the sides of the shaft has been stoped out, because it was easy of access and conveniently mined at small cost, says the Mining and Metallurgical Journal. This is generally the prospector's first error, and the desire for ore is in excess of the means at hand of acquiring it at greater depth, and on that account prospect shafts are seldom suitable for the main working shaft of the mine. When a shaft cuts or passes through an ore chute on the vein when the mine has passed the prospect stage, the temptation is presented to extract the rich ore on the sides of the shaft. If there are no mining regulations in the district or no mine inspector, these errors are sure to happen. The shaft of a mine whether on or off the vein is the entrance to the workings and should be used for that purpose alone and not for the object of stoping ore from its sides, which operation renders it unsafe and more liable to falls of roof or wall rock, which are liable at any time to block the entrance. If it is sunk on the vein, a suitable amount of ore, say 10 to 25 feet, depending on the strength of the ground, should be left on each side of the shaft before any stoping of ore is permitted. It is also a wise provision to leave the first 50 or more feet in depth from the surface which forms the back of the vein as a support to the loose surface wall rocks and that constitutes the roof of the mine and protects the workings from summer heat and winter rain. The neglect of making this provision has made future working more expensive and ruined many mines, by admitting surface water and falls of rock into the mine. The amount of ore left in the first 50 or more feet on the back of the vein and in the ore reserved in the 10 to 20 feet on each side of the shaft is not lost, for if the mine in future becomes exhausted in depth, these ore reserves always remain in sight and are an asset which is available and can be extracted before the workings are abandoned, and it is the wisest plan to leave such parts to the last operation of the mine instead of the first stages of development, as is too often the case.

Have you seen the beautiful dinner sets we received direct from the importer? if not, don't fail to look at them soon, as we do not know how long they will bein stock. Chamber sets of 12 pieces, also cheaper ones of 6 pieces. Anything in the Crockery line from plain white stoneware to the costliest chinaware.

Our Dress Goods Department is not quite complete, as most of the seasonable goods have been sold, but we still think that we are able to satisfy almost any taste. Silks, satins and velvets in all colors for trimmings, and shirt waists. A new consignment of shirt waists has just arrived.

Our fine lot of Groceries are coming in daily, including fine Government Creamery butter, also fresh made ranch butter.

Miners' Supplies at most reasonable prices. A new consignment of the celebrated Armstrong XXXX Flour just received.

New Strike.

Word came from the west and north that some prospectors made, a few days ago, a rich strike of copper ore on Slate creek, a tributary of the Kettle river, flowing into that stream about 50 miles above West Fork, and coming in from the north. Just how extensive the strike is has not transpired as the prospectors who made the strike are still in the hills hunting up new locations, but enough is known to warrant the statement that some fine locations have been made.

The Nickel Plate.

Recent work on the Nickel Plate which is situated on Horse Shoe mountain at the head of Canyon creek, is demonstrating that the property is a very valuable one, as apart from the enormous ore body the ore even on the surface carries good values. No great depth has yet been attained on the ledge, the work until recently having been confined to surface prospecting, but now that the shaft which is being sunk is down some 20 feet, it is clearly demonstrated that the Nickel Plate is a claim of great promise. The shaft, which is 5x7 feet in the clear is all in ore, the vein matter being a quartz, carrying pyrrhotite, arsenical iron and copper, and having its principal value in gold. The Nickel Plate lies parallel to the Silver Dollar, being about 1300 feet from it. The claim is owned by Messrs. C. Newman and N. E. Peterson, who were it discoverers.

JAMES COOPER, Montreal, General Agent for Railway Fences

LOCAL AND DISTRICT.

Master Sherman Haynes is home from Montreal, and will spend the summer vacation with his mother Mrs. Spalding. He came in on Saturday last.

Mrs. I. M. Macdonald, of Ladner, and formerly a resident of Midway for a short time, is a visitor here at present, guest of Mr. and Mrs McMynn.

It is learned that Dr. Foster, of Greenwood, is suffering from an attack of typhoid fever, but it is pleasing to be able to state that he is in a fair way to recovery.

Messrs. E. A. Bielenberg and E. Milligan, of Greenwood, passed through here on Wednesday on their way to the Kettle river country, there to look after a mining property.

Mr. A. B. MacNeil, principal of one of the public schools at Victoria, was a passenger by the Penticton stage yesterday. Mr. MacNeil is touring this portion of the province during the vacation.

Mr. W. G. McMynn returned from the West fork country on Wednesday, where he had been taken to procure witnesses in the Kelly case of house breaking, which occurred at Rock Creek some weeks ago.

Mrs. J. C. Stuart is at present away on a visit to the coast, and before returning to Boundary Creek no doubt will participate in the pleasant ceremony, the marriage of his sister to [illegible], of Montreal.

[illegible] Duff, of Camp McKinney, was on yesterday's stage. Mr. Duff was one of the injured in the stage accident near the camp, the horse which was severely injured, finally mending.

Mr. Fisher, the local brick maker is preparing a big kiln of brick, containing many thousands, which will be burnt in a few days. The ever increasing demand for this class of material in this neighborhood is very gratifying.

Messrs. Cronyn and G. R. Mickle, of Rossland, were visitors in Midway on Wednesday, being on their way to Camp McKinney. Mr. Cronyn was formerly one of the members of the firm of McDonald, Clute & Cronyn, of Rossland.

Mr. Keffer was called away to Beaverdell the week to attend a well with Inspector, Mr. Harry Morgan, who had been lying seriously ill. To [illegible] call a ride on horse-back of 100 miles had to be made, but the call was cheerfully taken.

A few days ago Mr. F. Keffer, of Midway, had the pleasure of receiving his father and two sisters, who have come from Cleveland, Ohio, so that they might visit him and his esteemed family and incidentally become acquainted with this portion of British Columbia.

Mr. Lequime sawed up an enormous pile of lumber the Lequime & Powers mill has turned down on Saturday, so as to keep the plainer etc. being used to its full capacity. Finishing lumber is in great demand, especially as several buildings in town are in a partly finished state.

Mr. George Sheehan, formerly part owner of the now famous Stemwinder mine at Fairview, was in town on Wednesday last, having come over from Oro with Mr. J. T. McDonald. The company with Mr. McDonald Mr. Sheehan proceeded to Republic, where he expects to become interested in a valuable mining property.

Mr. Kelly, the man arrested for house breaking at Rock Creek was on Wednesday last brought before Police Magistrate Hallett, acting as a Justice of the Peace, at Greenwood, and given a hearing. At the close of the examination Kelly was committed to stand his trial on the charge preferred against him.

After a period of very hot weather the Boundary district is now experiencing some very refreshing showers. These showers came at a very opportune time, and have done an immense amount of good to the crops of the district, and if only they are heavy enough the farmers will benefit to the extent of many hundreds if not thousands of dollars.

The water is again running through the extensive irrigation system installed by the Midway Company Ltd. As a result a certain amout of fire protection is offered the town, and water can be procured for irrigating gardens and small tracts of land. An addition is now being made to the system, by the building of a side flume, which will convey water to the 5-acre lots on the Murray addition.

A fine limestone has been discovered and a good kiln of lime burnt at the lower end of the Midway valley at a point where Graham mountain touches the bank of Kettle river. Having successfully accomplished this task Messrs Stuart, Allen and Moran are now turning their attention to the production of a large quantity of brick, in the same locality.

In a few days telephone connection will be given to Camp McKinney, as the line is now constructed to within a short distance of the camp. Much credit is due the contractors Messrs. Davey and Donald, who have in hand the construction of the line for the Columbia Telephone Company, for the speedy and yet thorough manner in which they have carried out their work.

Immediate attention should be given to the bridges and culverts not only along the route from Midway to Camp McKinney but throughout the route from Penticton to Cascade City, as many of the bridges have their top structures so badly decayed, that very serious accidents are courted. The flooring on some of the structures has given way, big holes being the consequence. Never in the history of the country have small matters in connection with public works been so sadly neglected.

Mr. J. T. McDonald, United States Customs officer at Oro, Wash., was a visitor in town during the week, having come from home on Wednesday last. The same day Mr. McDonald proceeded to Republic on business connected with his department. With so many avenues of communication between the two countries, Mr. McDonald's office is no sinecure, yet being so conversant with the commerce of the country he is able to at all times keep closely in touch with the requirements of the situation.

Messrs. J. Roderick Robertson and S. S. Fowler, the manager and mining expert respectively of the London & British Columbia Goldfields Company, paid Midway a visit during the week. The head office of this company is at Nelson, where the above named representatives reside. As a result of the very careful selection of properties made by the officials in question, the London and British Columbia Goldfields Company, is one of the most successful corporations operating in British Columbia today. Much credit is due their mining expert, Mr. Fowler, who is well known in this district, for this state of affairs.

A considerable number of pre-emption claims have been taken up in this district during the present year, and in a good many instances the officials of the government have been put to an inconvenience by the applicants omitting to follow the requirements of the Land Act in making their application for record. Their commission lies in a failure to provide affidavits to the effect that the land applied for does not interfere in any way with any existing pre-emption, or mineral claim or claims. Parties intending to take up land would do well to bear this in mind. Also in cases in which the land has previously been pre-empted it is necessary to make a formal application to have the existing record cancelled.

The Greenwood club having taken possession of its commodious and conveniently arranged new quarters in the Rendell block, Greenwood, marked the event on Saturday night by having a smoking concert, which was attended by numerous members and guests, among whom were the visiting railway officials. The entertainment was a most enjoyable one, instrumental and vocal music, recitations, etc., being rendered well and in great variety. Though there was much to praise the special musical feature of the evening was the playing of an instrumental quintette consisting of Messrs. Hooper (piano), Arnold (banjo), Elliot, Murray and Stuart (mandolins). The club is to be congratulated upon such an auspicious beginning of its life in its handsome new quarters.

A Rare Metal.

A metal very seldom met with in any part of the world, has made, it is believed for the first time, its appearance in British Columbia. The metal referred to is known as Nagyagite and is comprised of tellurium 32.2-10, lead 54, and gold 12 8-10. The ore in which this metal was discovered is on the Kingstone claim at Triple Lake camp, on Canyon creek, a tributary of the Kettle river, and the claim is owned by Messrs. Robert Wood, Greenwood, and Henry Strauss, of Midway. Not a great deal of work has been done on the property, about $30 having been spent upon it, but the result has been very satisfactory, as a vein of ore has been disclosed which is about five feet between walls, with a pay streak carrying the Nagyagite, which is said to be about 18 inches wide. Average samples from this pay streak upon assay gave a value of $124.18 to the ton in gold, therefore it will be seen the ore is rich, and some of it especially so, as often visible gold is met with during the course of development. In appearance the ore resembles graphite, but its peculiar form of crystalization is readily determined by the microscope. Several of the rarer metals have been found in this district, and if these discoveries continue, the district will become exceedingly interesting to the scientist.
