
PAPERS

In re telegraph line and service between Victoria and Carmanah Point.

By Command

JAMES BAKER,

Provincial Secretary.

Provincial Secretary's Office,

8th February, 1897.

Extract from a Report of the Committee of the Honourable the Privy Council, approved by His Excellency on the 28th April, 1896.

The Committee of the Privy Council have had under consideration a despatch, hereto attached, from the Lieutenant-Governor of British Columbia, dated 19th February, 1896, transmitting a certified copy of an approved Minute of His Executive Council, dated 12th February, embodying a resolution of the Legislative Assembly of British Columbia, respecting the desirability of placing the telegraph line and service between Victoria and Carmanah Point, under the direct management and control of some Department of the Dominion Government, with a view to its greater efficiency and utility in the public interest.

The Minister of Public Works, to whom the matter was referred, states that the General Superintendent of the Government Telegraph Service, to whom the matter was referred, reports that the present connection of the Cape Beale (Carmanah) line with Canadian Pacific Telegraph Office at Victoria, is very convenient for the expeditious interchange of messages, and was made expressly for that purpose; and that the Telegraph Agent at Victoria acts under the direction of the Canadian Pacific Telegraph Superintendent at Vancouver, who is at the same time an officer of the Government Telegraph service. Under this arrangement, with the District Superintendent in a dual position, the business of the Cape Beal line is interchanged with C. P. Co., as if our offices were a part of their system, and the Government is not charged for the exchange of service message over the C. P. R. line between the District Superintendent and his agent at Victoria, and to all intents and purposes, his being telegraphically in constant touch with the operator at Victoria, answers as well as if he were on the spot.

The dissatisfaction experienced with the Cape Beale line, appears to be properly attributable to the exceptionally rough character of the country through which it is carried, as the wire is repeatedly thrown down by trees falling upon it during heavy storms that frequently occur in that locality.

With a view to securing a more reliable connection with Cape Beale and Carmanah Point than is afforded by the present line, an item has been submitted for the estimates this year, for an alternative line from Alberni.

The Committee advise that a certified copy of this Minute be forwarded to the Lieutenant-Governor of British Columbia.

JOHN J. MCGEE,

Clerk of the Privy Council.

*His Honour, the Lieutenant-Governor of the
Province of British Columbia.*
