MEMO.—In noting the quantity of work performed for the year, it should be borne in mind that the majority of the tabular work was printed in very small type (Nonpariel), nearly all the pages containing not less than 6,600 ems, and that, according to established rules, double composition should be allowed for this description of work, which would increase the total number of pages from 1,754 to 2,025—270 pages more than in 1882; the number of impressions printed also exceeding that of the preceding year by 124,968, while the revenue has increased by $597.58, or more than double that in 1882. Although the above return shows the net result for the year, yet a large amount of unavoidable additional work was necessitated by making alterations from the original drafts in Bills submitted to the Legislature, and in reports and other documents, which it is impossible to include in this return.
