REPORT OF THE INSPECTOR OF MUNICIPALITIES.

VICTORIA, B.C., July, 1930.

Hon. R. H. Pooley, K.C.,
Attorney-General.

SIR,—I have the honour to submit herewith the Annual Report of this Department in connection with the municipal affairs of the Province for the year 1929.

There is comparatively little in the figures shown which exhibits sufficient change from the last Report to merit special comment.

The figures of assessment show a reasonable increase, particularly in the matter of improvements, the difference in assessed value of improvements being slightly in excess of twenty millions. This is due very largely to the buildings erected in the municipal territory of the Province during the year. The land figures show an increase of approximately three and one-half million, but I am of the opinion that in respect of the assessment of land there are substantial reductions which must be made in the near future. In a number of municipalities the assessments have been carried at high figures for some years and there is hesitation in reducing them on account of the effect which it would have on the tax rate. I do not, however, regard it as a sound policy to place a fictitious value on land in order to keep down the tax rate. The assessment figures then do not honestly represent the taxpaying power of the municipality, and, further, as soon as the assessments on land rise above the fair selling value the inequalities are bound to increase. The more valuable parcels of land are as a rule carried as near as possible at a fair selling value, while those parts of the municipality not in actual use are frequently assessed far beyond what they would sell for. The result is further additions to the tax-sale property. It would be better, I think, if the assessment rolls were properly adjusted. All parcels of land would be equally capable of private ownership.

The debenture liabilities show an increase of $8,358,000, the greater part of which is due to debenture issues authorized in the City of Vancouver.

The condition of the sinking fund accounts continues to improve in a very satisfactory manner.

The arrears of taxes, as well as the tax-sale lands, unfortunately show a slight increase. I trust that steps will be taken in the near future in the different municipalities to make it profitable for private individuals to purchase these tax-sale lands and thus strengthen the financial position of the municipality.

The public utilities are carrying on very satisfactorily, but it is difficult to use the totals shown for the purpose of making comparisons, on account of the fact that in recent years many of the municipal public utilities have been purchased by private corporations.

The Village Municipalities within the Province are doing a very good work in local government in the small communities. The Villages are organized under the conditions that they do not incur any liabilities extending beyond the current year and they do not take any part in the administration of schools or police matters. The school district carries on as before and the policing of the territory is continued, as before, in the hands of the Provincial Police. The Villages simply levy their own taxes for their own internal affairs and the arrangement is, I think, producing very good results. During the past year further village incorporations have taken place in Stewart and Silverton.

ROBERT BAIRD,
Inspector of Municipalities.

NOTE.—The sinking fund computations cannot be made with exactness. In most cases the requirements are calculated up to the time of the last tax levy, several months before the end of the year, no allowance being made for accrued interest on sinking fund requirements and at the same time only such interest as has actually been received is included in the sinking funds on hand. Interest accrued and not paid is not included on either side.

NOTE.—The figures submitted under the headings of "Receipts" and "Expenditures" are prepared very largely from an analysis of the auditors' reports, and although the classification of expenditures is not uniform in the different municipalities, and it is in many cases extremely difficult to make a distribution of the items, yet the statements have been prepared with a good deal of care and may be taken as substantially correct. Items which are of the nature of cross-entries, deposit accounts, and trust accounts, which would have the effect of inflating the figures, have as far as possible been eliminated.
