Report of the Superintendent of Education, 1960/61

EDUCATION OFFICE,
VICTORIA, B.C., January, 1962.

To the Honourable Leslie Raymond Peterson,
Minister of Education.

SIR,—I beg to submit herewith the Ninetieth Annual Report of the Public Schools of British Columbia for the school-year ended June 30, 1961.

ENROLMENT

The enrolment in the schools of the Province increased during the year from 305,837 to 321,760, and the average daily attendance increased from 281,513 to 298,175. The percentage of the regular attendance was 92.07.

The number of pupils enrolled in the various classes of schools is shown hereunder:—

Type of School	Number of Pupils Enrolled		
	Municipal	Rural	Total
Senior high schools	29,299	.....	29,299
Junior-senior high schools	50,716	1,157	51,873
Junior high schools	37,008	325	37,333
Superior schools	2,035	157	2,192
Elementary-senior high schools	9,080	2,846	11,926
Elementary-junior high schools	5,217	828	6,045
Elementary schools	178,667	4,425	183,092
Totals	312,022	9,738	321,760

In addition to the number given above, there were enrolled:—	
In the High School Correspondence classes, regular students (exclusive of the 6,512 officially registered in other schools)	3,680
In the Elementary School Correspondence classes, regular students	1.091
Under section 20 of the *Public Schools Act,* pupils receiving instruction	87
	4,858
Adult education—	
Canadian Vocational Training Programme	8,533[1]
Night-schools (high schools)	4,097
Vancouver School of Art	200
Vancouver Vocational Institute	4,874[2]
High School Correspondence (adults only)	8,777
Elementary School Correspondence (adults only)	318
Carried forward	31,657

[1] Day, 4,623; night, 3,910.
[2] Day, 2,614; night, 2,260.

Brought forward		31,657
Adult education—*Continued*		
Number of participants in recreational programme		243,012[3]
Vocational teachers-in-training (summer session)		33
Victoria College, regular credit courses—		
Arts, Science, Commerce	839	
College of Education	576	
Evening division	299	
Summer session	817	
		2,531[4]
University of British Columbia		6,268[5]
		283,501

[3] This figure does not include Vancouver.

[4] This figure does not include an enrolment of 553 in the non-credit evening classes and ninety-seven in the non-credit summer session.

[5] This figure does not include the following enrolments: 1960 summer session, 4,256; 1960/61 extra sessional classes, 1,318; correspondence courses, 1,282.

DISTRIBUTION OF PUPILS BY GRADE AND SEX

The following table shows the number of boys and girls enrolled in each grade for the school-year 1960/61:—

Grade	Boys	Girls	Total
Kindergarten	1,967	1,883	3,850
Grade I	18,728	16,857	35,585
Grade II	17,312	15,584	32,896
Grade III	16,398	15,075	31,473
Grade IV	15,296	14,187	29,483
Grade V	14,698	13,874	28,572
Grade VI	14,612	13,774	28,386
Grade VII	15,165	13,918	29,083
Grade VIII	14,282	13,724	28,006
Grade IX	12,302	11,901	24,203
Grade X	10,202	9,439	19,641
Grade XI	8,324	7,963	16,287
Grade XII	6,617	6,295	12,912
Grade XIII	884	499	1,383
Totals	166,787	154,973	321,760

DISTRIBUTION OF TEACHERS AND PUPILS ACCORDING TO THE DIFFERENT CLASSES OF SCHOOLS

The number of teachers employed in the different classes of schools, the number of pupils enrolled in each class of school, and also the average number of pupils per teacher are shown in the following table:—

Type of School	Number of Teachers			Total Enrolment	Percentage of Total Enrolment	Average Enrolment per Grade Teacher
	Grade Teacher	Special Instructor	Total			
Senior high schools	971	307	1,278	29,299	9.10	30.17
Junior-senior high schools	1,693	534	2,227	51,873	16.12	30.64
Junior high schools	1,219	374	1,593	37,333	11.60	30.63
Superior schools	95	.....	95	2,192	0.68	23.07
Elementary-senior high schools	443	56	499	11,926	3.71	26.92
Elementary-junior high schools	199	25	224	6,045	1.88	30.38
Elementary schools	5,744	274	6,018	183,092	56.91	31.88
Unclassified	.....	203	203	.....	.....	.....
Totals	10,364	1,773	12,137	321,760	100.00	31.05

TEACHERS' CERTIFICATES

The following table shows the number of teachers employed and also the number with or without university degrees:—

Type of School	Number of Teachers		
	With Degrees	Without Degrees	Total
Senior high schools	1,027	251	1,278
Junior-senior high schools	1,536	691	2,227
Junior high schools	894	699	1,593
Superior schools	15	80	95
Elementary-senior high schools	146	353	499
Elementary-junior high schools	70	154	224
Elementary schools	662	5,356	6,018
Unclassified	97	106	203
Totals	4,447	7,690	12,137

COMPARISON OF ENROLMENT AND EXPENDITURE FOR PUBLIC EDUCATION

The enrolment in the schools of the Province for the various years since 1877/78 and also the cost of maintaining them are shown in the following exhibit:—

School-year	Number of Teachers Employed	Number of School Districts	Aggregate Enrolment	Average Daily Attendance	Percentage of Attendance	Government Expenditure for Education	Total Expenditure for Public Schools
1877/78	56	45	2,198	1,395	63.49	$48,411.14[1]	.....
1882/83	69	59	2,693	1,383	51.36	60,758.75[1]	.....
1887/88	128	104	6,372	3,093	48.54	113,679.36[1]	.....
1892/93	267	169	11,496	7,111	61.85	174,775.43	$215,056.22[2]
1897/98	429	213	17,648	11,055	62.64	290,255.26	425,555.10
1902/03	607	268	24,499	16,357	66.76	473,802.29	604,357.86
1907/08	816	189	33,314	23,195	69.62	544,671.60	1,220,509.85
1912/13	1,597	359	57,608	43,274	75.12	1,663,003.34	4,658,894.97
1913/14	1,859	374	62,263	49,377	79.30	1,885,654.11	4,634,877.56
1917/18	2,246	575	67,516	54,746	81.09	1,653,796.60	3,519,014.61
1922/23	3,118	744	94,888	77,752	81.94	3,176,686.28[3]	7,630,009.54[3]
1927/28	3,668	788	108,179	91,760	84.82	3,532,518.95[3]	9,261,094.98[3]
1928/29	3,784	792	109,588	94,410	86.17	3,765,920.69[3]	11,149,996.27[3]

[1] The total expenditure for public schools borne by the Government.

[2] This amount does not include the expenditure (not available) made for incidental expenses in city school districts.

[3] This amount includes the annual grant from the Government to the Provincial University.

[4] This amount on calendar year 1955, exclusive of capital expenditure from by-law funds.

[5] This amount on calendar year 1956, exclusive of capital expenditure from by-law funds.

[6] This amount on calendar year 1957, exclusive of capital expenditure from by-law funds.

[7] This amount on calendar year 1958, exclusive of capital expenditure from by-law funds.

[8] This amount on calendar year 1959, exclusive of capital expenditure from by-law funds.

[9] This amount on calendar year 1960, exclusive of capital expenditure from by-law funds.

NUMBER OF SCHOOL DISTRICTS

The following table shows the number and classes of school districts in which expenditure for school purposes was made during the school-year 1960/61:—

Municipal school districts	73
Rural school districts	25
Total number of districts	98

SENIOR HIGH SCHOOLS

The enrolment in senior high schools during the school-year was 29,299; of this number, 15,212 were boys and 14,087 were girls. The number of schools, number of divisions, number of teachers, and the enrolment for the school-year 1960/61 in each district are shown in the following table:—

District Number and Name	Number of Schools	Number of Divisions	Number of Teachers	Number of Pupils

NUMBER OF SCHOOLS, TEACHERS, PUPILS, AND AVERAGE DAILY ATTENDANCE IN EACH TYPE OF SCHOOL

The following table shows the number of schools of each type, the number of teachers employed, the number of pupils enrolled, and the average daily attendance in each type of school for the school-year 1960/61:—

Type of School	Number of Schools	Number of Teachers	Number of Pupils			Average Daily Attendance
			Total	Male	Female	
Senior high schools	39	1,278	29,299	15,212	14,087	26,639.03
Junior-senior high schools	75	2,227	51,873	26,686	25,187	47,751.01
Junior high schools	56	1,593	37,333	19,281	18,052	34,835.05
Superior schools	22	95	2,192	1,163	1,029	2,017.30
Elementary-senior high schools	42	499	11,926	6,058	5,868	10,904.54
Elementary-junior high schools	14	224	6,045	3,127	2,918	5,669.85
Elementary Schools	992	6,018	183,092	95,260	87,832	170,358.24
Unclassified	-----	203	-----	-----	-----	-----
Totals	1,240	12,137	321,760	166,787	154,973	298,175.02

TEACHERS' SALARIES BY TYPE OF SCHOOL

The following table shows the highest, lowest, and average salary (in dollars only) paid to teachers in each type of school, grouped into grade teachers, supervising principals, and special instructors. Teachers earning less than $1,000 are excluded.

Grade Teachers

Type of School	Number Employed	Low Salary	High Salary	Average Salary
Senior high schools	971	$1,045	$10,920	$6,923
Junior-senior high schools	1,693	1,000	10,890	6,371
Junior high schools	1,219	1,202	10,357	5,854
Superior schools	95	1,950	9,814	4,434
Elementary-senior high schools	443	1,024	10,655	5,111
Elementary-junior high schools	199	1,380	10,457	4,983
Elementary schools	5,744	1,053	10,357	4,764

Supervising Principals

Senior high schools	39	$9,516	$12,618	$11,074
Junior-senior high schools	65	7,892	13,200	10,740
Junior high schools	55	8,738	11,750	10,610
Elementary-senior high schools	27	6,565	10,700	8,670
Elementary-junior high schools	7	7,780	11,918	9,827
Elementary schools	142	6,234	11,170	9,696

Special Instructors

Senior high schools	268	$2,060	$9,775	$6,885
Junior-senior high schools	469	1,124	9,613	6,576
Junior high schools	319	1,410	10,243	5,959
Elementary-senior high schools	29	1,200	9,990	5,266
Elementary-junior high schools	18	3,528	8,360	6,173
Elementary schools	132	1,320	9,435	4,906
Unclassified	203	1,064	12,791	7,005

SALARY CLASSIFICATION

Distribution of teachers by $100 salary-groups, including principals, supervising principals, and part-time teachers:—

Salary Range	Number of Teachers	Salary Range	Number of Teachers
Under $1,200	120	$5,600–$5,699	220
$1,200–$1,299	15	5,700– 5,799	240
1,300– 1,399	17	5,800– 5,899	363
1,400– 1,499	13	5,900– 5,999	209
1,500– 1,599	14	6,000– 6,099	154
1,600– 1,699	8	6,100– 6,199	147
1,700– 1,799	12	6,200– 6,299	180
1,800– 1,899	12	6,300– 6,399	176
1,900– 1,999	16	6,400– 6,499	165
2,000– 2,099	18	6,500– 6,599	156
2,100– 2,199	17	6,600– 6,699	147
2,200– 2,299	17	6,700– 6,799	112
2,300– 2,399	16	6,800– 6,899	103
2,400– 2,499	21	6,900– 6,999	103
2,500– 2,599	27	7,000– 7,099	81
2,600– 2,699	17	7,100– 7,199	173
2,700– 2,799	32	7,200– 7,299	165
2,800– 2,899	31	7,300– 7,399	167

GENERAL REVIEW

The Purpose of Education

There seems to be general agreement in the western world that the broad purpose of education should aim at the maximum development of the individual as a person and, as an extension of this, the maximum welfare of society, since society expects the skills of the individual to be applied for the common good.

The first task of education, then, is to give every individual child the opportunity to develop his abilities and talents. The underlying philosophy of education in the United Kingdom perhaps states it best, " that every child shall be educated according to its age, ability and aptitude with equal opportunity for all." In order to do this a broad but basic programme which takes into account the great variety of abilities, aptitudes, and interests represented in the population is made available at both the elementary- and secondary-school levels. Furthermore, instruction based on individual needs and differences is important in the development of such an objective.

In the second place, if our society is to flourish, individuals must be willing to place their skills and talents at the disposal of the public. There must also be developed a sense of civic responsibility and some skill in human relations in order to work effectively with other people. The attainment of these objectives leads to good citizenship.

These two aims of education—the maximum development of the individual and effective citizenship in a society—are what the schools are attempting to carry out. The efficiency of our schools, then, should be measured not only in terms of academic knowledge and skills, but also by their ability to produce competent citizens for our country.

The Royal Commission on Education

A Royal Commission on Education was set up on January 17, 1958, by Order in Council to inquire into, assess, and report upon the Provincial education system. In October, 1960, the report of the Commission was presented to the Provincial Government and released to the public in the latter part of December. No event in education in recent times in this Province has caused so much interest as has this report. Immediately after the report was received by the Department of Education, it was decided to prepare a précis. This was carried out competently by two members of the Department—Mr. J. R. Meredith, Director of Curriculum, and Mr. P. J. Kitley, Co-ordinator of Teacher Recruitment. An excellent summary was produced for general use. The précis was immediately distributed to District Superintendents of Schools, School Boards, the press, and other interested groups. Several weeks later the printed copies of the report became available through the office of the Queen's Printer. In all, 158 recommendations were made by the Commission. Since January of this year the Department of Education has studied many of the recommendations, several of which are far reaching. They covered virtually every aspect of public school education in British Columbia, including its philosophy, the organization of the school system, school buildings and services, qualifications and training of teachers, teachers' salaries, the curriculum, text-books, as well as school and community relations.

It was considered desirable to implement some of the recommendations immediately, and to this end certain legislation was passed at the 1961 Session of the Legislature.

It is not possible in an annual report to describe in detail the work of the Commission and its recommendations. However, it might be pointed out that the Commission found many things to admire in the school system of the Province. Their observations in this regard were summed up by stating " the British Columbia public school system compares quite favourably with that of any other country."

Legislation

Several important amendments to the *Public Schools Act* and to the Rules of the Council of Public Instruction were made during the 1961 Session of the Legislature. Three broad categories were covered in this legislation.

First, sections required to implement certain recommendations of the Royal Commission on Education. These involved eight amendments to the Act and three to the Rules of the Council of Public Instruction. It is estimated that if all the recommendations of the Royal Commission requiring legislation were to be implemented, twenty-two amendments to the *Public Schools Act* would be required.

Second, revisions to the educational finance formula. These were designed to improve the cost-sharing formula for the basic educational programme in such a way that the local burden of supporting educational services would be distributed in a more equitable manner.

Third, amendments to clarify existing sections or to facilitate administrative procedures at present in the *Public Schools Act.*

A new Manual of the School Law and Rules of the Council of Public Instruction, incorporating all previous revisions and amendments since 1958, became available near the close of the school-year 1960/61.

Technical and Vocational Education

In view of the new agreement between the Canadian Provinces and the Federal Government, vocational and technical training in British Columbia took on renewed activity during 1960/61. Plans for additional Provincial vocational schools are well in hand, but the most important aspect of the new programme involves plans for a Technological Institute, to be located on grounds of the Burnaby Vocational School. An Advisory Council was appointed in May, along with a number of technical committees, to commence planning for this new institution. As the school-year draws to an end, considerable progress has been made toward organizing the various branches to be taught and a principal for the Institute is about to be selected.

Commonwealth Technical Training Week

Commonwealth Technical Training Week was observed throughout the Province during the last week in May and the first two days in June. This event was officially opened by the Honourable the Minister of Education at the Burnaby Vocational School on May 29th. During the week there were a number of press releases on the subject, and the vocational schools at Nanaimo and Burnaby, the Vancouver Vocational School, and the F. T. Fairey Vocational School in Victoria put on displays of work for the public. Pamphlets were also provided to all the secondary-school children in the Province. Principals and teachers in the secondary schools drew the attention of parents and pupils to the importance of technical and vocational education to the future welfare of British Columbia.

The Departmental Conference

During the Easter vacation a Departmental conference, including all the District Superintendents as well as members of the Department of Education staff, was held in Victoria. The main purpose of this conference was to consider the Report of the Royal Commission on Education. Early in the year the District Superintendents were organized into study groups to prepare beforehand basic material to be used at the conference. All of this was done in a most satisfactory manner, and the credit for the organization of the conference and the success which it ultimately attained can be attributed in very large measure to the Chief Inspector of Schools, Mr. E. E. Hyndman. The Department of Education also acknowledges the splendid work done by the District Superintendents subsequently in the preparation of reports which contain sufficient material and points of view useful to the various planning committees which will be set up during the next two or three years. (A more detailed account of the conference will be given in the Chief Inspector's report.)

Appointments

The following school principals were appointed in May as District Superintendents of Schools and assumed their new duties on August 1st: Mr. Roland Rankin Hanna, principal of the Maple Ridge Senior High School; Mr. Gordon Paton, principal of the North Peace River Junior-Senior High School; Mr. D. P. Todd, principal of the George Bonner Junior-Senior High School, Cobble Hill.

Acknowledgments

The school-year 1960/61 was one of the most active on record. In addition to the normal responsibilities of the various officials of the Department, considerable extra work was entailed as a result of the Report of the Royal Commission on Education. It became necessary for all senior personnel in the Department of Education to play an active part in studying and analysing the report and in planning for certain sections of the report to be implemented for the beginning of the school-year, September, 1961. I wish to thank all members of the Department and the District Superintendents of Schools for their splendid co-operation, particularly this year when there have been so many additional duties.

I have the honour to be,
Sir,
Your obedient servant,

J. F. K. ENGLISH
Superintendent of Education.

ADMINISTRATION BRANCH

REPORT OF G. W. GRAHAM, B.A., ASSISTANT SUPERINTENDENT OF EDUCATION (ADMINISTRATION)

School Districts

The Province is divided into ninety-eight districts for the purpose of administration of school affairs. These districts are of two classifications—municipal school districts (seventy-three in number) and rural school districts (twenty-five in number). Seventy-two of the municipal school districts and ten of the rural school districts are commonly referred to as large school districts because they range in area from 50 to 33,000 square miles. The remaining smaller school districts are often referred to as unattached school districts. School Boards consisting of five, seven, or nine trustees, elected for a term of two years, are responsible for the operation and administration of the district. There are 560 trustees serving in the Province. Ten school districts are administered by official trustees appointed by the Council of Public Instruction.

One new school district was created at Fair Harbour, on the west coast of Vancouver Island, in this school-year.

School Construction

During the 1960/61 school-year, referenda were passed in twenty school districts authorizing $13,000,000 for school construction. The costs of building have remained steady at the previous year's level. In 1960 there were 409 classrooms and special rooms and twenty-five gymnasium-auditoriums and activity rooms completed. This is the smallest number completed in the past seven years. The average cost of providing elementary buildings is $500 per pupil, and secondary buildings is $950 per pupil.

The work of the School Planning Branch has greatly increased. Departmental plans have been provided for fifty-two projects, resulting in a total contract amount of $1,600,000. The majority of the planning has been for elementary schools of from two to eight rooms; however, plans for three secondary schools were provided on an experimental basis.

There is a trend toward increasing expenditures requested for school-site and playground development.

Transportation

Transportation facilities are provided in seventy-seven of the eighty-two large school districts and in two of the unattached school districts. Last year there were 402 district-owned buses, with 141 contract buses and nine water taxis operating. These vehicles travelled approximately 30,000 miles per day and transported 45,250 pupils. School districts organize and operate the school bus systems for their districts, and the Province shares in the costs as provided by the rules of the Council of Public Instruction. The Provincial limits for walking distance are 2½ miles for primary pupils and 3 miles for all other pupils. Approximately 80 per cent of all pupils transported are within the above classification. The shared operating costs for transportation for the year were $2,477,202, and the capital expenditure for the purchase of new buses was $312,675.

Transportation assistance is paid to parents living in isolated areas who transport their children to school. The cost of this service to 1,500 pupils was $230,000 for this year.

Assistance to Isolated Areas

All pupils living in isolated areas, where neither school nor transportation is available, may apply for correspondence work from the Correspondence Branch of the Department of Education.

In conjunction with the Correspondence Branch and under section 20 of the *Public Schools Act,* if four or more pupils are assembled for regular school-hours daily and are tutored by a qualified instructor, then the Province will make a grant of $15 per month per pupil doing satisfactory work toward the salary of the instructor. Fifteen of these classes enrolling ninety-one pupils were in operation.

School Boards may pay boarding allowance to pupils who cannot be accommodated in dormitories and have to live away from home to continue their education. Four hundred and twenty-five pupils received such assistance, amounting to $116,910. Boarding allowance is paid only to pupils attending public schools within the Province.

CURRICULUM AND GENERAL EDUCATIONAL SERVICES

Instructional Services

REPORT OF F. P. LEVIRS, M.A., M.S. (ED.), ASSISTANT SUPERINTENDENT OF EDUCATION (INSTRUCTIONAL SERVICES)

Instructional services include the work of the following divisions, each of which has its own director who submits his own annual report: Curriculum; Tests, Standards, and Research; High School Correspondence; Elementary School Correspondence; Visual Education; School Radio Broadcasts; Home Economics; and the Text-book Branch. There are, in addition, aspects of instructional services which do not fall readily under any one of the specific divisions.

STAFF MEETINGS

Three regular staff meetings of directors of divisions were held during the year. The March meeting was cancelled in anticipation of the Departmental conference held in April. One meeting was held at the Jericho Hill School. Discussion topics, introduced by appropriate speakers, included school radio broadcasts, vocational schools, and the education of the deaf and the blind. The last meeting of the year was devoted to changes in the work of divisions made necessary or desirable by the recommendations of the Royal Commission on Education.

ACCREDITATION OF SCHOOLS

The Accrediting Committee considered ninety-six booklets and accepted forty-eight schools for accreditation, four for the first time. Ten schools were accredited for four years, eighteen for three years, five for two years, and fifteen for one year. Two schools were removed from the accredited list. Remaining on the accredited list from the previous year were fifty-four schools.

Interest elsewhere in Canada in the system of accrediting used in British Columbia is great. In response to requests, two explanatory articles appeared in educational publications during the year.

ORGANIZATION OF SECONDARY SCHOOLS

There was a slight reversal of the tendency noted last year toward separate junior and senior high schools. The percentage of secondary pupils to be found in these schools dropped slightly from 54.7 per cent in 1959/60 to 51.9 per cent in 1960/61.

The average size of schools again increased. The percentage of secondary pupils in schools over 500 enrolment increased from 74.0 to 78.1 per cent. There was, however, a drop from 11.4 to 9.0 per cent for those in schools over 2,000 enrolment.

With changes in the allotment of grades, the next decade will mark a transition period in secondary-school organization, with new patterns taking the place of the old. The type of school at the lower secondary level will probably change radically.

Most secondary schools arrange their time-tables for a five-period seven-day week. Slightly less than one-third use the seven-period five-day week. Less than one-tenth use other types of time-tables. Here again it is likely that changes will take place because of the longer school-day.

As reported by the secondary schools, there are 22.8 pupils to each teacher (including principals, counsellors, etc.). Of teachers' time during the school-day,

82.7 per cent is spent in classroom teaching, 3.6 per cent in study supervision, 4.0 per cent in counselling, 4.7 per cent in administration and supervision, and 5.0 per cent in periods free from these duties. In addition, most teachers carry out supervisory duties after school-hours or sponsor extra-curricular activities.

Advanced Electives Most Frequently Chosen

No major changes took place in the popularity among students of the ten advanced electives with greatest enrolments. Mathematics 91 displaced Biology 91 for second place; Home Economics 91 took seventh place over from History 91. Order of most frequent choice in 1960/61 was as follows: Chemistry 91, Mathematics 91, Biology 91, English 91, Physics 91, Geography 91, Home Economics 91, History 91, English 93, and Industrial Arts 91.

Special Classes in Public Schools

These continue to increase in number, especially for the slow-learning or slightly retarded pupil. This year saw a new category, special classes for the trainable or moderately mentally retarded, as three school districts took advantage of the 1959 amendments to the *Public Schools Act* to establish them. Enrolments shown in the table below are for September.

Type of Class	Number of Teachers		Number of Pupils	
	1960	1959	1960	1959
Slow learners	161	144	2,394	2,109
Remedial training	21	16	317	246
Home instruction	5	4	(1)	(1)
New Canadians	17	17	240	269
Rehabilitation centres	5	4	56	66
Hospitals	13	13	276	179
Visually handicapped	2	2	19	17
Preventorium	2	2	29	35
Detention home	2	2	14	17
Emotionally disturbed	4	2	37	18
Pre-employment experimental	3	1	62	23
Mentally retarded	13	----	138	----
Speech	1	----	10	----
Totals	249	207	3,592	2,979

[1] Varies.

Schools for Retarded Children

The number of children in schools operated by chapters of the Association for Retarded Children increased to 491 in September of 1960, in spite of the loss of 138 children to special classes in public schools. Grants were received for 431 children of school age.

The following table shows the growth of these schools since grants were first made to them by the Department:—

Year	Number of Districts	Number of Schools	Pupils		
			Eligible for Grant	Ineligible for Grant	Total
1960/61	38	40	431	60	491
1959/60	36	38	445	39	484
1958/59	31	36	402	29	431
1957/58	33	35	309	12	321
1956/57	---	22	292	25	317
1955/56	---	---	----	---	168

Local Supervisory Personnel

The following table shows the number of district teachers employed as supervisors, special counsellors, and in other special capacities:—

	1960	1959
Directors of instruction	11	8
Supervisors of instruction	56	53
Teacher consultants	27	28
Special counsellors	31	24
District teachers other than relieving teachers	36	27
Totals	161	132

Retention of Pupils in Schools

The holding power of the schools increases steadily, with each Grade XII in succession having a higher percentage of the Grade VII enrolment of five years before. Recent figures are shown in the following table:—

For each 100 pupils enrolled in Grade VII	Grade XII enrolled
in 1954/55	in 1959/60 58 pupils
in 1953/54	in 1958/59 56 pupils
in 1952/53	in 1957/58 53 pupils
in 1951/52	in 1956/57 51 pupils
in 1950/51	in 1955/56 52 pupils
in 1949/50	in 1954/55 52 pupils
in 1948/49	in 1953/54 48 pupils

Interrupted General Programme for Adult Students

A significant forward step in adult education will be taken in September, 1961, when the new Interrupted General Programme for Adult Students comes into effect. Adults will be able to take high-school courses through approved public night-schools or other authorized adult classes. These courses will be credited toward certificates of Grade X or Grade XI equivalency, as well as high-school graduation on a General Programme. Regulations have been drawn up in such a way as to protect the validity and standards of the course offered.

New Legislation and Royal Commission Recommendations

The Report of the Royal Commission on Education was released in the latter part of December, 1960. In the following spring, legislation to implement certain of the recommendations was incorporated in amendments to the *Public Schools Act*. Changes in the Rules of the Council of Public Instruction were also necessary; these, in turn, required planning and action within the Department.

1. As a result of the return of Grade VII to the elementary school, administrative circulars concerning accommodation, staffing, time allotments, and curriculum were prepared and issued.

2. Entitlement of teachers in both elementary schools and in small schools enrolling both elementary and secondary pupils was increased. This, together with the change in Grade VII organization, involved changes in the forms and procedure used for determining entitlement.

3. Kindergartens were brought under new regulations. This also involved a new scale of entitlement.

4. A procedure for ensuring that Grade XIII is taught only in those schools where staff and facilities are suitable was put into effect.

5. Suggestions as to methods of using the longer instructional day for secondary schools effectively were sent out to all schools.

6. Many formal and informal committee meetings were held to study plans for both immediate and long-term changes.

7. New report cards, designed to provide further information for parents, were planned for next school-year at all grade levels except kindergarten.

Summer Schools

An increase in the number of summer schools provided by local School Boards is noticeable. These summer schools normally are held for pupils who have failed to complete their whole year of work in the regular school session. Fees charged must be high enough to make the schools self-supporting. Summer schools have been approved in the following centres: Victoria, Vancouver, Burnaby, Dawson Creek, New Westminster, Duncan, Kimberley, Penticton, Nelson, Kamloops, Richmond, and Prince Rupert.

Curriculum Revision

In addition to the routine duties of this office, which included attendance at various educational conferences or school functions, membership on a variety of committees and boards, the preparation and distribution of reports, and instructional materials, a large proportion of time was spent in the organization and convenorship of curriculum revision committees. Two of these were in the sciences at the secondary-school level, physics and biology; the other, in the preparation of adapted programmes for slow learners in the elementary schools. Details are covered in the report of the Division of Curriculum.

Division of Curriculum

REPORT OF J. R. MEREDITH, B.A., B.Ed., DIRECTOR

The work of this Division during the past year has been extended as a result of the inquiry made by the Royal Commission on Education. In addition to carrying on regular curriculum development work, the Division was involved in the preparation of a précis of the 445-page report of the Commission and in the analysis of the 158 recommendations made by the Commissioners. Some sixty of these recommendations have direct reference to curriculum. Since they have been offered with the expressed intent of improving the curriculum, they deserve the most careful study, not merely to determine ways and means of implementing them, but also to ensure that they would be effectual in producing desirable improvements.

It has been possible to make some changes almost immediately. Others are in the process of being made. Still others will require much more time and study than has presently been given.

Curriculum Changes Completed

Among the curriculum changes which were completed during the past year are the following: The time allotments and subject-matter content for the basic subjects prescribed for Grade VII were adjusted to allow for increased emphasis on the

fundamentals. A new Canadian text-book for elementary-school social studies was prescribed. The physical and health education course revisions begun two years ago were completed for Grades VII to XII, and a set of teacher reference texts was selected and distributed to all secondary schools. Two new guidance courses were developed, and new text-books were prescribed and issued for Grades IX and X. The revisions in guidance and physical and health education courses included the development of a series of first-aid lessons and the provision of a St. John Ambulance text-book as a part of the course prescription for all Grade X classes. A revised course in Latin was developed, and a suitable Canadian text-book was selected for Grade IX. A revised course and new text-books were selected for Grade XIII physics, to bring this course into line with the course offered in the first year of university.

New and Continuing Course Revision and Text-book Selection Studies

Several revision studies begun last year were continued. These included the revision of the elementary-school arithmetic programme, the revision of the guidance course for Grade XI, the bookkeeping course for Grades XI and XII, and the chemistry course for Grade XIII. Certain experimental work in course development begun last year was also continued in the fields of Russian language courses, senior high-school mathematics, and elementary-school French. In connection with the last of these, the experimental work has reached a point where it was possible to give permissive authorization to all Boards of School Trustees to permit the teaching of French to selected elementary-school classes at the Grades VI and VII level, provided a qualified teacher is available on the staff.

Revision work and text-book selection studies were begun in certain additional subjects, particularly as a result of the recommendations of the Royal Commission on Education. A study of dictionaries appropriate for elementary schools was begun. Course revision and text-book selection work was begun for English, French, and mathematics at the Grade VIII level. These are directly related to proposals regarding reorganization of the secondary-school curriculum.

Information Service to Schools

In conjunction with the office of the Assistant Superintendent (Instruction), the Division of Curriculum is responsible for the preparation and distribution of directives concerning Department policy, procedures, and other information pertinent to education. The orderly development of an expanding school system makes this service essential. The information is provided by means of specially designed Department circulars—administrative, curriculum, announcement, and teaching aids. Five sets of these circulars were issued, with a mailing list of over 1,950 during the past school-year. In addition, the Department, with the assistance of two special committees of teachers and librarians, provides information to all schools concerning library books selected as being suitable for school libraries. Lists of these books are prepared three times a year from the committees' reviews of several hundred books submitted by publishers. Over 1,750 schools and local libraries receive this service.

Acknowledgment

As noted in previous reports, curriculum development work is undertaken with the assistance of special committees. During the year under review, a total of fourteen course revision and text-book selection committees were at work; two standing committees reviewed library books; three special committees assisted with experimental course work; and three standing committees in special fields assisted on specific curriculum problems.

In addition, it was considered desirable to reorganize the former standing professional committee into two committees to advise on general curriculum planning at the elementary- and secondary-school levels. These committees are representative of the professional groups engaged in public education. Their work is largely that of advising on the more technical aspects of curriculum planning and development.

Mention should also be made of the Provincial Curriculum Advisory Board, which consists of some twenty-five professional and lay representatives. The Board met three times during the last school-year to advise on general matters relating to curriculum development. The agenda for each meeting included curriculum work presently being undertaken, as well as a study of special subjects, including music, kindergartens, and the recommendations arising from the inquiry made by the Royal Commission on Education.

It is impossible, in the space of this report, to acknowledge in full the work of the more than 200 persons acting on the twenty-two Department advisory committees. It can only be said that the assistance given by these people is very sincerely appreciated. Their willingness, their scholarship, and their devotion to the cause of public education is a source of continual inspiration and a tribute to their profession.

SPECIAL SERVICES

REPORT OF WILLIAM A. PLENDERLEITH, M.A., D.PÆD., F.R.S.A., F.C.P., CO-ORDINATOR OF SPECIAL SERVICES

The Conveyance of School-children

This year the Report of the Royal Commission on Education recommended " that primary consideration be given to the establishment of small local elementary schools wherever added facilities in the form of classrooms or transportation are necessary." Fifteen years earlier, Dr. Maxwell Cameron stressed the fact that his proposal to enlarge school districts did not imply the elimination of small elementary schools and the transportation of young pupils to distant centres. Notwithstanding Dr. Cameron's clearly stated recommendation, many small elementary schools were closed when the larger units were formed, and the pupils from these closed schools were transported from their local areas to consolidated schools. The Department issued circulars indicating that it preferred to pay capital grants for permanent assets, such as new local schools, rather than for impermanent assets, such as school buses. The Department also stated that it preferred to pay operating grants toward instruction services in the form of teachers' salaries, rather than to pay grants for non-instructional services, such as the wages of bus-drivers and the operation of buses.

By the year 1952 the practice of transporting elementary pupils away from their home centres to attend consolidated schools had become so prevalent in the Province that hundreds of thousands of dollars were being spent unnecessarily for non-instructional services in the form of transportation, and in spite of repeated suggestions from the Department advocating the building of local elementary schools, there was no significant evidence to indicate that the policy was being generally implemented at the district level.

The proof that these suggestions had little effect is attested by the fact that transportation costs increased from $417,651 (or less than 1 per cent of the total district operating costs) in 1945/46 to $1,702,229 (or more than 4 per cent of the total district operating costs) in 1952/53. The following year new regulations governing the approval of grants for the conveyance of school-children were introduced. Departmental walk-limits were defined, and the cost of transporting pupils within these walk-limits became a local responsibility. To encourage the construction of small local elementary schools, standard plans were supplied free to School Boards who wished to utilize them. Provision was made for increased supervision in the small schools by giving grants for teacher-consultants and supervisors. The teacher entitlement for the small schools was readjusted so that a second teacher could be employed when the school population reached twenty-six and a third teacher when the school population reached seventy-one.

These incentives to encourage the building of small local elementary schools have had a marked effect in reducing the percentage of the educational budget spent on transportation. Because of the co-operation of the trustees in implementing these policies during the past six years, hundreds of elementary classrooms have been built in the local districts where the pupils reside, and the percentage of the budget required for transportation has been brought back to a more reasonable level. The following figures, taken from the Annual Reports of the Public Schools for the years 1955 to 1960, indicate the change in trend:—

Cost of Pupil Conveyance Compared with Total District Expenditures

Calendar Year	Total District Expenditures	Conveyance Costs	Conveyance Costs as a Percentage of District Expenditures
1955	$62,238,464	$1,812,353	2.9
1956	$69,234,423	$1,918,902	2.8
1957	$80,966,873	$2,104,443	2.5
1958	$91,279,662	$2,236,918	2.4
1959	$105,044,901	$2,340,813	2.2
1960	$118,269,991	$2,477,202	2.1

Transportation Assistance

In addition to the grants paid to School Boards for the operation of school buses, provision is made for assistance to the parents where there are insufficient children to justify the establishment of a regular school bus route. If such parents provide for the transportation of their children, the Department shares up to $1 per day per child on a mileage basis. During the past school-year 1,490 pupils from fifty-nine districts utilized this means of conveyance at a total cost of $229,382.

School Dormitories

In many of the isolated rural sections of large school districts it is impossible to provide school bus services for pupils of school age. In order to enable these students to attend a high school offering a full programme, authority is given to Boards in the *Public Schools Act* to operate school dormitories.

Although there are now nine school districts providing dormitization, these institutions for public school students are of comparatively recent origin in British Columbia, the first being established at Prince George in 1947.

Typical accommodation in school district dormitories consists of sleeping-rooms or cubicles with cots or bunks, two or four students to a room, boys in one wing of the building, girls in the other, and washrooms in each wing. Most of the dormitories have a common dining-room, a recreation and study room, staff quarters, kitchen, storerooms, laundry-room, and heating plant.

The fees charged in 1960/61 ranged from $20 to $30 per month for children resident within the school district. The fees for the dormitization of pupils coming from outside the school district ranged from $27 to $35.

The fees charged cover, generally, no more than half the actual cost of operation. The cost of operation not covered by fees is an expense of the Board which is accepted as shareable by the Department provided it does not exceed one-half the cost of operation.

Boarding Allowances

Boarding allowances of up to $30 per month may be provided to both elementary and secondary students who have to come from remote areas to attend public school and who are unable to obtain accommodation in a school dormitory.

During the past school-year, 481 students from twenty-seven school districts received a total of $131,570 in such boarding allowances.

Jericho Hill Advisory Board

This Board met once each school-month during the year. Monthly reports were made to the Department respecting the operation and requirements of the school.

The accompanying report from Dr. C. E. MacDonald, the Superintendent of the Jericho Hill School, contains pertinent information respecting the operation of this institution.

DIVISION OF TESTS, STANDARDS, AND RESEARCH

REPORT OF C. B. CONWAY, B.Sc., M.S., D.PÆD., DIRECTOR

Terminal Course Testing

Tests that were administered during 1960/61 included two English 40 tests, Language and Literature, and three Mathematics 30 tests, one in ability and two in achievement. Both were based on the prescribed courses. They provided seven sub-test scores in English and four in mathematics for which norms have been obtained that can be used semi-diagnostically by teachers. Two forms of the Ma 30 achievement test were administered to alternate pupils to maintain accurate equivalence of norms. Separate norms also have been obtained for University and General Programme students and for both sexes. The typical superiority of boys in mathematics and of girls in English is evident in the following data.

Mean Scores, Terminal Course Tests, May, 1961

ENGLISH 40

Language

	Male	Female	University Programme	General Programme	Total
Words	24.6	25.8	25.4	21.8	25.2
Grammar	29.4	32.0	30.9	26.7	30.7
Sentences	11.5	14.4	13.2	9.3	12.9
Total score	65.5	72.2	69.5	57.7	68.8

Literature

Prose	16.9	18.3	17.8	13.7	17.6
Poetry	19.5	22.0	21.0	16.4	20.7
Drama	17.7	19.2	18.7	15.0	18.5
Sight work	35.0	38.7	37.3	29.5	36.8
Total score	89.1	98.3	94.8	74.6	93.6

MATHEMATICS 30

Mathematical Ability Test

	Male	Female	University Programme	General Programme	Total
Part I	19.1	18.4	18.9	17.1	18.7
Part II	9.0	7.7	8.4	7.9	8.4
Part III	12.9	11.8	12.5	11.6	12.4
Total score	40.9	37.9	39.7	36.5	39.5

Mathematics 30 Achievement Tests

Form A	24.1	22.2	23.3	22.0	23.2
Form B	25.9	23.9	25.2	22.7	25.0

The five tests are to be reprinted and released to teachers. The English 40 tests should be of particular value to teachers of high-school English in reducing the burden of marking which includes large numbers of subjective tests and essays.

French Language Test

The B.C. High School French Test, Form S, had been administered to students enrolled in the former French II and French III courses in May, 1950. The same test has now been readministered to the three new course levels—French 20 in May, 1958, French 91 in March, 1961, and French 92 in June, 1959—thus making comparisons possible over an eight- to eleven-year period.

Comparison of Mean French Language Scores 1950 vs. 1958–61
(Equated to June 1st)

	French 20, 1958	French II, 1950	French 91, 1961	French III, 1950	French 92, 1959
Vocabulary	9.8	9.8	16.2	15.2	21.1
Grammar	15.2	12.0	20.9	15.2	23.4
Comprehension	8.2	9.8	15.5	14.2	20.2
Civilization	8.4	6.9	10.4	7.9	12.1

The average student who completes the present four-year French programme is between the 82nd and 92nd percentiles on the former French III norms. Even those who complete only three years are above the former norms, particularly in Grammar and Civilization. This means that there has been a tremendous improvement in terms of students obtaining University Entrance standing in French. It must be noted, however, that those who complete a major in French now have one additional year of instruction and are members of a much more highly selected group. Concern is felt regarding the small proportion of the original population continuing the study of languages beyond the Grade X level.

Scores reported during the year, including 1,676 I.Q.s for Grade XIII, totalled 118,849.

Retention and Scholastic Aptitude in High-school French Courses

Course	Enrolment 1949/50	Mean I.Q., 1950	Retention[1]	Course and Year	Enrolment	Mean I.Q., 1958	Retention[1]
			Per Cent				Per Cent
French II	3,824	113.8	34	French 20, 1958/59	8,458	.....	42
French III	3,084	113.2	27	French 91, 1959/60	2,502	116.1	12
				French 92, 1960/61	1,469	119.3	7

[1] Retention as per cent of average enrolment in the corresponding Grades II to VI.

Additional Work

Studies of enrolment and retention were continued. As may be seen elsewhere, high-school enrolments are rising more rapidly than at any time in the past, even though net interprovincial immigration of children was only 750 in 1959 and 1,137 in 1960. (In comparison, the fifteen-year average is 3,756 children.) Over 60 per cent of the students enrolled in Grades II to VI now reach Grade XII, and two-thirds of the latter—that is, 40 per cent—are attempting to complete the University Programme.

During the year many of the man-hours of the Division were devoted to problems related to University Entrance and Senior Matriculation examinations.

(*a*) A survey of Grade XIII students was made to compare their ability with that of the Grade XII U.E. students and their achievement with that of students going directly to first-year university.

(*b*) University Entrance candidates completing the Ma 91 experimental course that has been given in six schools for the past two years were compared with students of equivalent ability in the regular Ma 91 course. No significant differences were found. Because of different treatment at the University of British Columbia, comparisons at higher levels have not been possible.

(*c*) A large number of scales were revised and recalculated, particularly those used for the August supplemental examinations. The scores of public school scholarship candidates are now incorporated in all scales. Studies of the effects of changes in failure rates are being carried out annually.

(*d*) An experiment in computer programming was conducted to parallel the graphical methods of scaling. Scores were successfully transmuted mechanically and collated to the mark-entry level. This method requires punched-card input and therefore will require complete revision of exam-handling procedures, but it is believed that it will be essential by 1964, when the first post-war wave of matriculants reaches Grade XII.

Grade XII enrolments—

June, 1954	6,663
June, 1961	12,700[1]
June, 1964 (estimate)	15,000
June, 1974 (estimate)	24,000

[1] Actual enrolment from final recap when available.

(*e*) An investigation of the relation of High School and University Entrance graduation ratios to scholastic aptitude test results and Grade VII and XII enrolments showed that:—

There is a direct relationship between the proportion of elementary-school students graduating from high school (U.P.+G.P.) and the population of the school district. The proportion graduating is three to four times as large in the largest school district as in a group of the smallest districts. This is partly due to the fact that retention to Grade XII is twice as high and indicates the effect of the provision of non-academic types of courses in addition to other facilities.

The proportion of U.E. graduates is largest in districts with the highest proportion of students of high academic potential (I.Q.s, 110+). Such districts are small cities and suburban areas with Grade XII enrolments of 200 to 400. The probability of a Grade VII student with an I.Q. of 110+ completing University Entrance successfully is twice as great in such districts as in those with the lowest density of population. It also is slightly greater than in the largest districts. This seems to indicate that an academic or a non-academic environment can be developed in a school district that is not entirely dependent on size.

HOME ECONOMICS

REPORT OF MISS MILDRED C. ORR, B.A., B.S., DIRECTOR

Total number of students taking Home Economics:—			
Elementary schools		1,425	
Junior high schools		24,462	
			25,887
In Grade VII	12,077		
In Grade VIII	12,746		
In Grade IX	1,058		
Special classes	6		
	25,887		
Senior high schools			18,880
High-school boys		95	
Technical students			78
Special classes			228
Jericho Hill School			42
			45,115

The above figures cover statistics for public schools only and show an increase of 3,024 in enrolment over 1959/60.

In addition to the above, there were a number of students in public schools taking home economics courses through High School Correspondence instruction under the supervision of home economics teachers who were not qualified to teach senior home economics courses.

There were also a number of home economics classes conducted in private schools and some in Indian schools.

During the 1960/61 session there were 194 home economics centres in the public schools of the Province, showing an increase of ten over the total in public schools for last year.

	Centres	Rooms
One-room centre	74	74
Two-room centre	74	148
Three-room centre	31	93
Four-room centre	8	32
Five-room centre	3	15
Six-room centre	3	18
Eight-room centre	1	8
Totals	194	388

New home economics centres were included in the following new public schools which were opened during the 1960/61 session: Rosedale Junior High School, Chilliwack; Mount Prevost Junior High School, Duncan; Dr. Knox Junior High School, Kelowna; Argyle Junior High School, North Vancouver; Hugh Boyd Junior High School, Richmond; Eagle River Elementary-Senior High School, Sicamous; Gordon Head Junior High School, Victoria; Mount Douglas Senior High School, Victoria; and Prince of Wales Senior High School, Vancouver.

Additional home economics rooms were added to the Smithers Junior-Senior High School, Smithers; Queen Elizabeth Senior High School, Surrey; and Williams Lake Junior-Senior High School, Williams Lake.

There were 379 teachers of home economics in the public schools of this Province, showing an increase of nineteen over the previous year. Of the total number, 16 per cent of the home economics teachers were new to teaching home economics in British Columbia. As in 1958/59 and 1959/60, the percentage of home economics teachers in public schools who held home economics degrees remained at 54 per cent. A large number of home economics teachers hold Elementary Certificates, or Academic Certificates with Bachelor of Arts, or Professional C or Professional Basic Certificates on the Bachelor of Education programme. The teachers in the latter four groups have varying amounts of training in home economics.

The number of Grade XII students electing Home Economics 91, which is the final course for the major in home economics, has increased during the past five years from 1,476 in 1955/56 to 2,752 in 1960/61.

Conference-workshops, which varied in length from two hours to a day, were held early in the fall term for groups of home economics teachers in six districts.

An extra-sessional course in home economics was offered by the University of British Columbia for the fourth consecutive year. This year the course was conducted by Miss Maud F. Bailey, B.H.E., M.A., and was held at New Westminster. Fifteen teachers were in attendance.

CORRESPONDENCE SCHOOLS

High School Correspondence Branch

REPORT OF D. KERSHAW, B.A., ASSISTANT DIRECTOR

Dr. Edith E. Lucas, the Director of High School Correspondence, was honoured this year by being chosen to set up a correspondence school in the new British West Indies Federation. Dr. Lucas was granted a year's leave of absence by the Department, and will remain in Jamaica until the end of 1961.

ENROLMENT

The total enrolment in the High School Correspondence Branch during the year 1960/61 was 18,969. This shows an increase of 1,665 students, or 9.6 per cent over 1959/60, when the enrolment was 17,304.

1. *Number of Students.*—The enrolment by age over the last five years, and the per cent increase in the total enrolment, is shown in the following table:—

	1956/57	1957/58	1958/59	1959/60	1960/61
School age (under 18 years)	4,382	5,460	9,834[1]	10,120[1]	10,192[1]
Adult (18 and over)	7,579	8,967	6,555[2]	7,184[2]	8,777[2]
Total enrolment	11,961	14,427	16,389	17,304	18,969
Increase by year	.....	2,466	1,962	915	1,665
Per cent increase by year	.....	20.3	13.6	5.6	9.6

[1] Under 19 years. [2] Nineteen years and over.

2. *School Students by Grade.*—Students who could properly be called school students (those registered in a school or taking a full grade by correspondence) were classified by grade as follows:—

	Number	Per Cent
Grade IX	1,028	15.7
Grade X	1,612	24.7
Grade XI	1,862	28.6
Grade XII	2,010	31.0
Totals	6,512	100.0

These figures do not include students who merely continue a course from one year to the next, since we have no way of determining whether or not they returned to school in the fall.

3. *School Students Registered in a School.*—A large number of school students were registered in a school and took one or more courses by correspondence. These figures do not include those students who merely continue a course from one year to the next, since we have no way of knowing whether or not they returned to school.

	Number	Per Cent	Percentage of Total Enrolment
Superior schools	225	3.9	1.2
Small high schools (fewer than 140 students in Grades IX to XII)	1,745	30.2	9.2
Large high schools (more than 140 students in Grades IX to XII)	3,444	59.6	18.2
Private schools	362	6.3	1.9
Totals	5,776	100.0	30.5

Students registered in a school enrolled in correspondence courses for the following reasons:—

	Number	Per Cent
Course not offered at school	3,641	59.6
Time-table difficulties	1,272	20.8
Failure in the course	1,187	19.5
Other reasons	6	0.1

4. *Students Taking a Full Grade by Correspondence.*—A total of 564 students enrolled in a full grade by correspondence for the following reasons:—

	Number	Per Cent
Living too far from a school	205	36.3
Too ill to attend school	98	17.4
In receipt of social assistance	1	0.2
Needed at home	8	1.4
Other	8	1.4
Not free or continuing from a previous year	244	43.3
Totals	564	100.0

Classification of Students by Fees

Students may be classified according to the fee they paid for each course.

1. *School-age Students Charged No Fees:*

Not in attendance at school—	Number	Percentage of Total Enrolment
Because of illness	201	1.1
Because of need at home	21	0.1
Because of distance factor	259	1.4
In receipt of social assistance	55	0.3
In correctional institutions	171	0.9
In attendance at a superior school	225	1.2
Totals	932	5.0

2. *School-age Students Charged Fees:*

	Number	Percentage of Total Enrolment
In high schools with fewer than 140 students in Grades IX to XII ($5 per course)	1,745	9.2
In high schools with more than 140 students in Grades IX to XII ($8 per course)	3,444	18.2
In private schools ($8 per course)	362	1.9
Summer students enrolled in courses in which they failed ($8 per course)	193	1.0
Gainfully employed ($5 per course)	841	4.4
Totals	6,585	34.7

3. *Adult Students Charged No Fees:*

	Number	Percentage of Total Enrolment
Because of illness	153	0.8
Because in receipt of social assistance	107	0.5
Because in a correctional institution	460	2.4
Enrolled in preparation for Canadian citizenship	267	1.4
Totals	987	5.1

4. *Adult Students Charged Fees:*

	Number	Percentage of Total Enrolment
Taking academic courses—		
Resident in British Columbia ($8 per course)	3,160	16.7
Non-resident in British Columbia ($16 per course)	177	0.9
Taking technical courses ($12 per course)—		
Resident in British Columbia	679	3.6
Non-resident in British Columbia	286	1.5
Totals	4,302	22.7

5. *Senior Matriculation Students Charged Fees:*

	Number	Percentage of Total Enrolment
Resident in British Columbia ($20 per course)	1,230	6.5
Non-resident in British Columbia ($25 per course)	23	0.1
Totals	1,253	6.6

6. *Students Abroad.*—British Columbia taxpayers living abroad and in other Provinces of Canada were charged rates applicable to British Columbia residents ($8 per course). Number, 141; percentage of total enrolment, 0.7.

Completion of Papers

The number of papers marked over the last five years and the per cent increase per year is shown in the following table:—

	1956/57	1957/58	1958/59	1959/60	1960/61
Number of papers marked	130,941	158,236	178,246	196,618	205,435
Per cent increase (per year)	.....	20.8	12.7	10.6	4.5

Instructional Staff

An inside staff of four course-writers and an outside staff of eighty-four instructors were employed during the year. The outside instructors were paid on a piecework basis.

New and Revised Courses

New and revised courses offered during the year were as follows: English Language 10, English Literature 10, Homemaking 10A and 30A, Auto Mechanics 30, Forestry 30.

Courses

The number of students who enrolled in each of the high-school subjects during the year was as follows:—

Subject	School Age	Adult	Total
English Literature 10, 20, 30, 40, 100	1,289	1,471	2,760
English Language 10, 20, 30, 31, 40, 101	1,387	1,781	3,168
Social Studies 10, 20, 30, 32, 33	1,262	526	1,788
Health and Personal Development 10, 20, 30	646	46	692
Mathematics 10, 20, 30, 12, 91, 100, 101	2,361	2,820	5,181
Science 10, 20	718	167	885
French 10, 20, 91, 92, 110, 120	684	503	1,187
German 10, 20, 91, 92, 110, 90, 120	511	229	740
Latin 10, 20, 91, 92, 110, 120	598	142	740
Spanish 10, 20, 91, 92, 110	252	155	407
Agriculture 10, 20, 38, 39	248	38	286
Art 10, 20, 39	376	167	543
Homemaking 10, 20, 30, 91	865	53	918
Record-keeping 11	466	107	573
Typewriting 10, 20	1,104	240	1,344
Mechanical Drawing 10, 20	247	81	328
Bible Literature 10, 20, 30, 40	48	32	80
Extramural Music 11, 21	7	16	23

Steam Engineering Fourth, Third, Second, and First Class	3	387	390
Steam Heating for Plant Operators	.....	69	69
Preparation for Citizenship	.....	267	267

English for New Canadians

During the year this division supplied 1,964 students with new material from our course in English and Citizenship I; 830 students were supplied with material from English and Citizenship II; 74 with English and Citizenship III; 306 students

took the course in English 19 and 383 students took the course in English 29 by correspondence. In addition, 267 students were enrolled in the Preparation for Citizenship Course. Classes in English were held in fifty-two night-school centres, and material was supplied for other classes and individuals in eighty-nine small, isolated places throughout the Province. Since volunteer instructors no longer make yearly reports, it is impossible to estimate how many students have been using books already supplied.

ADULT EDUCATION

	1959/60	1960/61
Enrolment—		
Total enrolment	17,304	18,969
Adult enrolment (19 years and over)	7,184	8,777
Per cent adults	41.5	46.3
Employment—		
Adults employed		6,698
Adults unemployed		2,079
		8,777

Unemployed Students Exempt from Fees

A number of unemployed students were exempt from fees for the following reasons:—

Illness and hospital	153
Correctional institution	460
Social assistance	107
Other	347
Total	1,067

Adult Students Completing on the Interrupted Programme

A total of 1,058 students was completing the University Entrance requirements under the Interrupted Programme.

Enrolment in Courses

The number of adult students enrolled in each course will be found under my report of High School and Vocational Courses.

Elementary Correspondence School

REPORT OF ARTHUR H. PLOWS, B.ED., DIRECTOR

During the school-year 1960/61 there were 1,091 pupils enrolled in Elementary Correspondence School. Of these, 999 were enrolled at Victoria and the remaining ninety-two at Pouce Coupe in the Peace River District.

ENROLLED IN VICTORIA

	Grade I	Grade II	Grade III	Grade IV	Grade V	Grade VI	Grade VII	Grade VIII	Total
September	112	103	107	70	70	80	64	68	674
October	120	109	115	71	75	84	80	83	737
November	125	118	117	78	78	90	84	92	782
December	124	128	120	81	83	91	91	108	826
January	134	129	125	88	86	95	91	125	873
February	140	132	132	92	85	99	95	131	906
March	144	141	128	98	86	96	95	145	933
April	144	146	125	105	86	102	101	147	956
May	141	147	133	111	87	101	108	154	982
June	141	148	135	114	90	102	110	159	999

ENROLLED AT POUCE COUPE (PEACE RIVER BRANCH)

September	9	7	6	7	4	4	3	5	45
October	14	8	12	10	6	5	6	6	67
November	14	10	13	11	6	5	7	6	72
December	14	10	13	11	6	5	7	6	72
January	13	13	14	12	8	5	11	6	82
February	14	14	16	12	8	5	10	8	87
March	14	14	16	13	8	5	10	9	89
April	15	14	16	14	8	5	11	9	92
May	15	14	16	14	8	5	11	9	92
June	15	14	15	15	8	5	11	9	92

The number of papers marked in the two centres were as follows: Victoria, 137,959; Pouce Coupe, 11,190; total, 149,149.

In addition to the number of pupils and papers shown above, 318 students were enrolled in the Adult Section and 7,172 papers marked.

Thus the services of the school were used by 1,409 persons and 156,321 papers were marked. The average enrolment per instructor was 100 pupils, and each instructor marked an average of 11,165 papers. The average number of papers submitted per pupil was 137, as compared with an average of 119 in 1959/60.

As an additional service, kindergarten kits were sent to eighty-seven pre-school-age children.

Authorized under section 20 of the *Public Schools Act,* correspondence instruction classes were established at fourteen centres with a total enrolment of eighty-seven pupils.

The Victoria staff consisted of a Director, thirteen instructors, and a clerical staff of five; at Pouce Coupe, one instructor and one clerk.

DIVISION OF SCHOOL RADIO BROADCASTS

REPORT OF MARGARET A. MUSSELMAN, B.A., DIRECTOR OF SCHOOL BROADCASTS

The following is a review of the work and services of the Broadcasts Branch of the Department of Education for the school-year 1960/61.

RADIO

Ranging from primary-grade science, character education, music, through wide intermediate subject-matter, up to senior secondary French and vocational guidance, 146 programmes were planned and prepared by this department. (This is a reduction of twelve in number from 1959/60, but with no reduction in time. More half-hour rather than fifteen- or twenty-minute broadcasts were scheduled. This was an economy measure, coupled with a successful experiment—the use of more definite classroom participation quiz sessions as part of the half-hour.) Production supervision of each of the 146 programmes was undertaken by either the Director or the Assistant Director.

Script analyses were made of thirty-seven additional western regional shared programmes. For fifty-two national Canadian Broadcasting Corporation programmes, this department had a voice in advice and assessment. A resultant total of 235 programmes was available for classroom participation.

Making the broadcasts of value to schools requires:—

(1) Study of teacher comments regarding previous series; discussions with teachers, teacher groups, and specialists to determine the content and manner of presentation of each year's programmes.

(2) (*a*) Preparation of the Teachers' Bulletin outlining the schedule for the year, together with background information and suggestions for the use of each broadcast. Preparation of music, French, and art booklets to supplement broadcasts.

(*b*) Packaging and mailing of the above—each year trying to adjust to increasing school demand. Quantities in 1960/61 were: Teachers' Bulletins, 10,000; Pictures in the Air, 4,000; Junior Music, 20,000; Ecoutez, 10,000; Intermediate Music (Manitoba), 41,000; Young Canada Listens (C.B.C.), 7,000. The number of music and French booklets was not adequate for the demand.

(3) Preparation of each script, including several discussions on content and format, with selected free-lance script-writers. Editing, revision, and rewriting in various amounts is necessary for each script before it is mimeographed and ready for dead-line production.

(4) Auditioning and rehearsing of student actors and choirs, as well as selection of professional performers, with due knowledge of, and regard for, union regulations.

(5) Maintaining contact with schools through a carefully planned evalution system and through promotional reminders of series. We always regret the inability to do extensive school-visiting throughout the Province. Any that is done is of great mutual benefit. Student work in creative writing and art is sent to us in tremendous quantities as a result of special series. Acknowledgment and constructive criticism is made of the work, resulting in appreciative comments and letters from schools.

Demonstrating and discussing the use of school broadcasts was undertaken with classes of the College of Education in Victoria during the summer session, and in Vancouver during the winter and summer sessions.

Response to British Columbia School Broadcasts

1. The British Columbia Department of Education won a first award for "Listening Is Fun" (intermediate music appreciation) from the Institute for Education by Radio-Television, The Ohio State University.

2. Annual reports on the use of school broadcasts 1960/61 indicate:—

(*a*) Reports to date submitted from approximately 79.12 per cent of British Columbia schools.

(*b*) 668 schools or 67.27 per cent of reporting schools participated in school radio broadcasts (3,286 classes, 100,530 students).

TELEVISION

Two four-programme series were presented for western regional in-school use. This Department planned and prepared the "Western Landscape" (geography) series, while Saskatchewan was responsible for the series "Need for Numbers" (mathematics).

A November series already completed, called "Patterns of Living," by Dr. Ian McTaggart Cowan, has direct application to a wide range of courses from intermediate level to senior secondary biology.

The Canadian Broadcasting Corporation, on advice from the National Advisory Council, made available during the school-year five series (twenty-six telecasts) for school use.

Use

There has been some increase in the use of television in British Columbia schools: forty-four schools and 102 classes reported using it in 1960/61.

Nevertheless, television offerings have been few and somewhat haphazard in course application because of their national and western regional coverage. For instructional purposes they would need to be provincial and to have more telecasts in each series. Furthermore, schools are faced with the major problem of providing receivers and of adjusting time-tables.

DIVISION OF VISUAL EDUCATION

REPORT OF J. R. POLLOCK, B.A.Sc., DIRECTOR

Submitted herewith is the circulation report of the Division of Visual Education covering the period September 1, 1960, to August 31, 1961.

In the districts marked with an asterisk (*) a system has been organized to distribute films and filmstrips locally among the public schools. Blocks of films are shipped from the Division to a central place in the district and redistributed to the schools from there. Entries in these instances refer to block bookings. They do not indicate the extent to which material may be used within the district.

Demand for audio-visual teaching material continues high. Nine hundred and eighty-seven or 78 per cent of the public schools registered with the Division for service. Close co-operation was maintained with the College of Education and its teacher-training programme.

In addition to motion pictures and filmstrips, 1,190 pictures and other aids were supplied to borrowers.

TEXT-BOOK BRANCH

REPORT OF BASIL R. WILSON, DIRECTOR

During the year the Text-book Branch has again completed all orders and requisitions for school text-books and other supplies as and when requested.

For the school-year 1960/61 an expenditure of some $608,615.78 was made to complete 4,563 requisitions relating to the purchase and distribution of free books and supplies. This is an increase of $89,065.69 or 17 per cent over the previous year.

A total of 22,873 purchase orders valued at $1,009,374.67 was received during the school-year 1960/61, an increase of 1,392 orders, and an increase in value of $120,114.89 or 13½ per cent for the year.

A total of 2,694 Rental Plan requisitions was completed during the school-year 1959/60 and 2,771 during the school-year 1960/61, an increase of seventy-seven requisitions or 2.86 per cent.

During the school-year 1959/60, $646,351.30 was collected in rental fees, for lost and damaged books paid for by students, and for remittances covering fire losses. During the school-year 1960/61, $695,726.05 was collected for the same purpose, this being an increase of $49,374.75 or 7.63 per cent. For the school-year, refunds totalling $7,534.97 were made to students who left the school system prior to March 31, 1960, and refunds totalling $7,663.35 were made to students who left the British Columbia school system prior to March 31, 1961. This is an increase of $128.38 or 1.7 per cent over the previous year.

Our library service department employs four people on a permanent full-time basis. These people are assisted by other members of the staff from time to time, as conditions demand. During the year 1959/60, 602 purchase orders were received and serviced, which required the placement of 1,951 requisitions with various suppliers. In the school year 1960/61, 615 orders were received (an increase of 2.15 per cent). To complete these orders it was necessary to place 2,022 requisitions with our suppliers. This was an increase of 3.64 per cent over the previous year.

The shipping department employs three men on a permanent basis, who are assisted by as many as twenty-three men employed on a part-time basis during the peak periods.

The total weights and quantities shipped via various general shipping agencies are shown in the following comparative tabulation:—

	1959/60	1960/61	Percentage Increase (+) or Decrease (—)
Freight (including rail, truck, and boat)—			
Number of pieces shipped	29,024	26,819	—7.6
Weight lb.	1,285,285	1,347,660	+4.8
Express—			
Number of pieces shipped	384	438	+14.13
Weight lb.	10,605	11,793	+11.2
Mail—			
Number of pieces shipped	27,578	30,426	+10.32
Weight lb.	58,669	69,246	+18.03
Total shipments for year—			
Number of pieces shipped	56,986	57,683	+1.22
Total weight lb.	1,354,559	1,428,699	+3.47

Once again I wish to take this opportunity to thank each member of the staff of the Text-book Branch for the help and co-operation given during the past year, without which the results shown in the above report could not have been attained, and to express my appreciation to those responsible officials in each school district for the patience and consideration shown during the year.

INSPECTION OF SCHOOLS AND SCHOOL SERVICES

REPORT BY E. E. HYNDMAN, B.A., B.PÆD., CHIEF INSPECTOR OF SCHOOLS

Supervision of Instruction

The supervision of instruction by the forty-seven District Superintendents and the Superintendent of Schools (Vancouver) included more than 12,300 teachers during the school-year 1960/61. This number includes 132 teachers of Indian day-schools whose classrooms were visited on request of the Indian Affairs Branch, Department of Citizenship and Immigration, Ottawa. In addition to the teachers in public schools, supervision was provided for those employed in Provincial institutions, and, on request by the Registrar, some teachers in private schools were examined for purposes of certification. An incomplete list reveals more than 11,300 supervisory visits to schools and classrooms by District Superintendents, and the number of visits per teacher varied from *nil* to many. The number of formal written reports on teachers was 3,760.

Some modifications in the district personnel for supervision under the direction of the District Superintendents occurred during the past year. The assignment of an unattached District Superintendent as a relieving agent was temporarily abandoned because of the greater need of an assistant in the Surrey District. There was no increase in the number of District Superintendents on the staff, but, nevertheless, there were five new appointments to replace two who retired, two who resigned, and one who died. Mr. Claude Bissell, supervising principal, Kelowna Elementary Schools, was appointed District Superintendent for the Castlegar and Arrow Lakes School Districts; Mr. Charles Cuthbert, principal, Dawson Creek Elementary School, was appointed to the Nelson superintendency, with School Districts No. 7 (Nelson) and No. 8 (Slocan). Mr. William Fromson, director of instruction for West Vancouver, undertook the duties of District Superintendent for Salmon Arm, Revelstoke, and Enderby School Districts. The Campbell River and Qualicum School Districts were new areas of endeavour for Mr. W. J. Logie, principal of the Kelowna High School. Mr. Ronald F. Lucas, principal, Prince Rupert Senior High School, Prince Rupert, was appointed as District Superintendent for Ocean Falls, Alert Bay, and Quatsino School Districts with headquarters in Courtenay. Directors of Elementary Instruction were appointed in the Nanaimo and Trail Districts, increasing to nine the number of districts with these supervisory assistants.

The District Superintendents and headquarters officials of the Department of Education shared in a number of projects aimed to improve the quality of instruction throughout British Columbia. Underlying each of these was an attempt to involve the many agencies and groups associated with education both in the planning as well as in their actual functions.

1. The biennial conference for principals, held on the University Campus from August 5 to 13, 1960, was very successful. The conference, directed by Professor McGechean, of the College of Education, and assisted by District Superintendent C. I. Taylor, was sponsored by the British Columbia Trustees Association, the British Columbia Teachers' Federation, the College of Education, the University of British Columbia, as well as the Department of Education. The programme included major addresses by the Deputy Minister of Education, the Dean of the Faculty of Arts, the Dean of the Faculty of Commerce, the Dean of the College of Education, and representatives of the Teachers' Federation and the Trustees

Association. Resource persons included District Superintendents and Victoria College and College of Education personnel. The aim to increase the effectiveness of principals in the discharge of their supervisory responsibilities brought a unity to the conference and gave insight to the participants. All the sponsoring groups as well as the principals and District Superintendents who took part earned the feeling of satisfaction and accomplishment from this successful project.

2. In an ingenious effort to spark enthusiasms in physical fitness by teachers of physical education, the District Superintendents organized four workshops in different regions of the Province. Several hundred teachers, principals, and District Superintendents took part in these projects—observed demonstrations, examined equipment, and shared discussions and problems. Outstanding teachers of physical education, instructors from the School of Physical Education, the College of Education, and Victoria College, all gave valuable assistance to the projects. These workshops, which were developed because of the shortage of qualified specialists at a time when a revised programme of studies was released, were extremely worth while. The Directors of Curriculum and Community Programmes, as well as the District Superintendents and their supervisory staffs, are to be highly commended for their leadership in this problem area. It brought emphasis to the physical fitness aim of instruction, and it pointed to the need for revised procedures at the level of teacher-training.

3. A Provincial conference of District Superintendents with headquarters staff culminated several months of intensive study on the Royal Commission Report on Education. In the knowledge that their experience and ideas would influence the development of education in this Province for many years to come, this phase of district activity was given priority. On occasion, district supervisory and teaching staffs were used to develop aspects of their studies for presentation at the conference. As would be expected, the conference received a cross-section of opinion that was not always unanimous. The recommendations were, however, always constructive, always positive, and consensus was reached on many concepts which recognized the variations in conditions existing in this Province. As a result of the conference, changes were made in the goals which had previously been considered desirable, and modifications in procedures were found necessary. Without any doubt, the crucible of many minds with rich backgrounds of training and experience produced clearer goals and more acceptable procedures.

4. The District Superintendents joined with their teachers of experimental Mathematics 7 and 8 in a unique day of sharing experiences at the University of British Columbia on December 27, 1960. The University Department of Mathematics, in co-operation with the Curriculum Division of the Department of Education, utilized this opportunity to evaluate progress in these experimental courses and encourage the exchange of concepts and experiences among University mathematicians, teacher mathematicians, and their supervisors. The thirty-five or more who attended from the Lower Mainland, Vancouver Island, and Interior points gained clarity in the aims and objectives and renewed enthusiasm for the experiment.

Activities of the District Superintendents

Reports of the forty-seven District Superintendents and the Superintendent of Schools (Vancouver) reveal trends and aspects of education of special interest in the public schools of British Columbia.

1. The release of the Royal Commission Report on Education led to unprecedented demands on the time of the District Superintendents to make public speeches, statements, and explanations. The reports revealed a very large number of public

addresses to groups of teachers, Parent-Teacher Associations, service clubs, and the like. The efforts of the District Superintendents in their areas did much to reduce the misconceptions that developed from publicity given the report and gave reassurance to some specialist groups who felt their security threatened.

2. Reports indicated that school districts are making progress in the withdrawal of Grade VII pupils to elementary-school buildings, although it may be some years before this will be completed over the Province. It is also indicated that many school districts are instituting an occupational programme for low-achieving Grade VII and VIII pupils. Few school districts are initiating kindergarten classes in their school organizations, but School District No. 39 (Vancouver) has completed arrangements for an additional thirty-five classes.

3. Several reports reflect School Board interest in the classes for trainable children operated by chapters of the Retarded Children's Association. A year of successful operation by school districts of Nanaimo, Vancouver, and Victoria is noted for their classes of retarded children. The newly constructed Oakridge School in Vancouver, with nine teachers, may well provide a demonstration unit for educators who will be responsible for expansion of this special education elsewhere. Several districts are negotiating with a view to School Board operation of retarded classes in the coming school-year.

4. The vitality of the Provincial system of education is manifest by the variety and amount of experimentation in schools of British Columbia. A few of these are:—

(i) A demonstration of teaching by closed-circuit television was reported by the District Superintendent for Greater Victoria.

(ii) A successful "week of music" with participation by 2,600 pupils was reported by the Burnaby District Superintendent.

(iii) The District Superintendent for Prince George noted that a resident professor from the University of British Columbia gave three courses for teachers in 1960/61—English 200, English 300, English 439.

(iv) The North Vancouver major work project initiated at Grade IV for exceptional children proved effective and of interest to educators both within and outside the district.

(v) The Superintendent of Schools (Vancouver) reports that after five years of careful experimentation and evaluation with the modern arithmetic method it has been decided to replace the traditional method for all Grade I pupils in the coming year.

Liaison Activities

The semi-annual zone meetings of District Superintendents held in seven areas of the Province continued to be an effective means of co-ordinating the supervisory function of the field officers. These conferences also provided for communication with headquarters on local affairs. On occasion, representatives of the School Boards joined in these zone discussions.

Sixteen regular School Board meetings were attended, and, in addition, a large number of informal discussions were held with Board members and secretary-treasurers. Altogether twenty-seven secondary schools were visited during the year; three of these were team inspections which thoroughly examined the organization, administration, and supervisory practices.

Included in the field activities was participation in administration conferences in the East Kootenay and Northern British Columbia. These meetings, which are jointly organized by principals and District Superintendents, were extremely valu-

able in the explanation of new legislation implementing the Royal Commission Report on Education.

From observation of relationships existing over the Province between school trustees and their District Superintendents, it can be reported that they are very favourable. All the District Superintendents have been appointed executive officers by their School Boards. Four School Boards have included in the defined duties of their District Superintendents the responsibility of Chief Administrative Officer; other School Boards have depended upon the close co-operation of their senior administrative officers to maintain unity and efficiency in district affairs. It should not be concluded that School Boards are in any way giving up their authority in local administration of Education. They determine policy and ensure that it is effected locally by their district staff. The existing favourable relationship could not continue under any other circumstances.

Conclusion

This has been an extremely demanding year on all persons active in educational affairs. Study and discussion groups on the Royal Commission Report on Education added greatly to the assignments of trustees, teachers, and supervisors. Nevertheless, they have given time and effort freely. The effectiveness of the organization and curriculum of the future will owe much to the endeavours of this year by interested and dedicated workers in education from all parts of the Province.

In addition, they found time to give many courtesies and assistance to this peripatetic representative of the headquarters staff, for which I am truly grateful.

TEACHER RECRUITMENT

REPORT OF PHILIP J. KITLEY, M.A., CO-ORDINATOR

This covers the second full year of operation of this Branch. Its most important function is in liaison with and service to organizations active in the recruitment of teachers.

College of Education

Addresses on teaching as a vocation were given to the majority of the arts undergraduates at the University of British Columbia. Three days were spent interviewing students attending the summer schools, with regard to teacher certification problems. Future Teachers Day at the University was planned in consultation with this office, and the final report of the conference was edited and distributed to high schools by this office.

British Columbia Teachers' Federation

Addresses were given to teacher groups on a number of occasions, including the British Columbia Teachers' Federation summer workshop at Nelson. Contacts were maintained regarding teacher placement.

British Columbia School Trustees Association

Several individual School Board meetings were attended and a meeting of the Metropolitan School Board.

Advisory Committee on Teacher Recruitment

This Committee brings together representatives of the above groups as well as a representative of the District Superintendents of Schools. Its purpose is to consider suggestions for improving teacher recruitment and to assist in co-ordinating the recruitment activities of the represented groups. Three meetings were held during the year, the main topics of discussion including supply and training of specialist teachers, recruitment publicity, survey of Commonwealth programmes of financial assistance for teacher-training (undertaken by the British Columbia School Trustees Association), contacts with Personnel Managers' Association and National Employment Service, problems of credit for teaching experience outside the Province.

Future Teachers Clubs

During the year 110 Future Teachers Clubs were registered with this office, having a total membership of over 2,000. There were twenty-three new clubs this year. Club members were supplied with a variety of materials, including a completely new revision of the club manual, "Teaching in British Columbia." An innovation was the regular provision of a news-letter, which appeared four times during the year, with the aim of exchanging club news and ideas and providing other programme suggestions and materials. Club reports indicate that well over 50 per cent of the membership have already made definite plans to enter the teaching profession.

Visits were made to a number of clubs and club conferences during the year, and an informal conference was held with club sponsors during Future Teachers Day at the University.

Other Recruitment Activities

Written and personal requests for teacher-training information were dealt with throughout the year.

The teacher recruitment programme in the United Kingdom was revised, in conjunction with the office of the Registrar. For the first time in a number of years it was considered advisable to supply explanatory materials in greater detail rather than send a personal recruitment officer to the United Kingdom.

A study of requirements for specialist physical education teachers was carried out, and through the joint board of the College of Education a recommendation was made which resulted in a modification of the training procedures, which allows a student-teacher to complete the physical education requirements for a major by the end of the third year of the training programme.

Educational and Vocational Guidance

Sample occupational information material was supplied to secondary schools as heretofore, a total of thirty-three separate items being sent out during the year. The Vancouver Board of Trade and Pacific National Exhibition job study competition was conducted, with some major revisions which resulted in giving wider recognition to students, both on a geographical basis and on the basis of the type of occupation investigated.

Over 200 individual occupation inquiries were also dealt with during the year.

Visits were made to a number of larger schools, as the initiation of a programme of studying at first hand problems and methods connected with school guidance work.

Preparations were made for a short workshop summer course for untrained counsellors, at Victoria College.

Royal Commission Report

In co-operation with the Director of Curriculum, a précis of the Royal Commission Report on Education was undertaken. This required extensive study and careful editing, but with the assistance of other Departmental officials was brought to a satisfactory conclusion.

TECHNICAL AND VOCATIONAL EDUCATION

REPORT OF J. S. WHITE, DIRECTOR OF TECHNICAL AND VOCATIONAL EDUCATION AND REGIONAL DIRECTOR FOR CANADIAN VOCATIONAL TRAINING.

This particular field of education has been the subject of much increased attention across Canada, and indeed throughout the Commonwealth. The continued aim in British Columbia is to provide the facilities necessary to give adequate training required to meet the challenge provided by industry in order to establish and expand the economy of Canada.

As always, this rapid growth maintains a constant pressure within this branch, and indications are that the present rate of expansion will continue for some time to come.

Almost all of the training carried out is provided under the Federal-Provincial Training Agreement, and in April, 1961, a new six-year agreement came into force, which provides for additional assistance from the Federal Government.

The Provincial vocational schools at Burnaby and Nanaimo are operating to full capacity in many types of courses, as is the Vancouver Vocational Institute, which is administered by the Vancouver School Board and largely financed by the Provincial and Federal Governments. During the year a training unit was established in Victoria and additions made at the British Columbia Vocational School in Nanaimo and the Vancouver Vocational Institute, to give training in practical nursing, commercial subjects, and vocational preparatory courses, the primary and immediate objective being to provide the unemployed with a more acceptable standard of proficiency and so enhance their prospects of employment.

Additional details on the Victoria programme are contained later in this report, and the remarks contained therein refer also to similar programmes at Nanaimo and Vancouver.

A much-needed unit in the form of a stores building was constructed at the Nanaimo school by students from the Burnaby school.

Progress continued in the construction of the new vocational school in Prince George.

The Nelson School of Art was taken over by the Department of Education in June, 1961, and the new term to commence in September will provide two-year courses in commercial art, ceramics, sculpture, block printing on textiles, and murals. The school is now called the " Kootenay School of Art."

Two new training projects were carried out. The first was a construction equipment operators' elementary course at the vocational schools in Burnaby and Nanaimo, this being instituted at the request of the Heavy Construction Association of British Columbia as a means of assisting unemployed men in this field. The second programme was held in co-operation with the Province of Alberta education authorities and the Federal Government. This consisted of a regional pipe-welding school at Calgary, to which trainees from the Western Provinces undertook pipeline welding in 36-inch pipe. It is interesting to note that of twenty-three trainees from British Columbia, twenty-two were successful, and that whereas in 1950 when 85 to 90 per cent of big-inch pipe-line welders in Canada came from the United States, the position is now completely reversed, with less than 2 per cent of such skilled men coming in from the States. (Survey made by Pipeline Association of Canada.)

Considerable interest was sparked by a Commonwealth Technical Training Week, and British Columbia played its part with open houses at all vocational schools, lectures to service clubs and other selected groups, and films in high schools. Trade-unions and employers played their parts, and full publicity was given through press, radio, television, and the high schools.

Reports on certain sections of this branch and details of enrolment follow.

Accommodation Industries Staff Training

This division lost the services of Mr. George Seldon, who resigned his position of consultant in April, 1961.

Up-grading waitress-training clinics were held in Trail, Vancouver, Victoria, Kamloops, Kelowna, and Langley, together with motel and resorts management courses at Kamloops, Penticton, Nelson, Campbell River, Courtenay, Port Alberni, Parksville, Qualicum, Victoria, Powell River, Gibsons, and Pender Harbour.

The continued co-operation of the various groups within the accommodation industry is very much appreciated and contributed to the very fine job performed by Mr. Seldon in the difficult initial stage of organization.

Supervisory Training

This programme covers the fundamentals of management as they apply to the middle management group—engineers, office managers, superintendents, and foremen. The programme includes all the material from the original "J" series programmes as well as modifications to fit current industrial needs. The conferences covered three main areas—communications, human relations, and job cost control. Each conference covered a period of one week, and conferences were held at Burnaby, Kamloops, Nanaimo, Abbotsford, and Kemano.

In many cases, conference leaders were developed during the conferences, and these men returned to their own companies and carried out in-plant training of other supervisors. This is particularly true of several of the larger lumber and logging firms, as well as the Department of Highways, which is involved in extensive programmes covering all of their supervision.

The in-plant course requires ten hours to complete, generally five two-hour sessions. These courses are shown in the statistics below along with the regular forty-hour conferences.

	Ten-hour In-plant Programme	Forty-hour Conference
Communications (job instruction training)	236	95
Human Relations (job relations training)	85	------
Human Relations and Job Cost Control (job relations and job methods)	------	93
Combination Programme (job instruction, job relations, and job methods)	------	104
Totals	321	292

Appreciation and follow-up sessions, 18.

Other sessions were also held with industry for the purpose of developing future training plans in British Columbia. Response from industry for this type of training has been excellent. There was full participation by industry and government during the entire term, and in most cases industry is asking for further training in the management field.

Court Reporting Course

The British Columbia Civil Service Commission, in co-operation with Canadian Vocational Training and the British Columbia Department of Education, offered an evening course to train court reporters.

Classes were held two evenings each week for two and one-half hours. The instructor, Mr. Dennis Pearce, is the senior court reporter in the Supreme Court and County Courts, Victoria Court-house. The progress made by the students has been most gratifying. The instructor reports that he feels that several of the students will be sufficiently trained to commence a career in court reporting or in conference and (or) public hearings reporting next year.

Appraisal Course—Final Report

Since this is the final report in respect of this programme, a comprehensive outline covering the period 1958 to 1961 follows.

A total of 122 candidates attended the course; eighty-six attended both courses, thirty-six attended one course only. These candidates wrote a total of 208 examinations set by the headquarters of the Appraisal Institute of Canada. To date, seventeen candidates have completed the requirements of the Appraisal Institute of Canada and have been awarded the A.A.C.I. designation.

A breakdown of the attendance is as follows:—

Municipal assessors—		
Appraisal 1	30	
Appraisal 2	20	
	—	50
British Columbia Department of Finance—		
Appraisal 1	39	
Appraisal 2	39	
	—	78
British Columbia Department of Lands—		
Appraisal 1	18	
Appraisal 2	16	
	—	34
Parks Branch—		
Appraisal 1	3	
Appraisal 2	2	
	—	5
Department of Highways right-of-way agents—		
Appraisal 1	6	
Appraisal 2	3	
	—	9
Federal Government—		
Appraisal 1	6	
Appraisal 2	5	
	—	11
British Columbia Power Commission—Appraisal 2		1
Private industry—		
Appraisal 1	10	
Appraisal 2	10	
	—	20
Total		208

Fully Accredited Appraisers (as of April 30, 1961)

Municipal assessors	4
Department of Finance	5
Department of Lands	5
Private industry	3
Total	17

The Committee wishes to express sincere appreciation to the Appraisal Institute of Canada; to the executive director, Mr. W. N. Mulock; to the executive and members of the British Columbia chapters of the Appraisal Institute for their wholehearted support; and to Mesdames Allwood and Sutherland of Island Hall for their wonderful service.

British Columbia Vocational School, Victoria

A total of four teaching areas was set up to accommodate the following programmes: General vocational (two), commercial, and practical nursing.

1. *General Vocational Training*

This programme was instituted as a pilot programme to provide academic upgrading for those individuals requiring such upgrading to achieve a specific vocational objective. By working in close co-operation with the local National Employment Service office, a total of sixty-six persons was interviewed, and of these, thirty were chosen initially for two programmes—(*a*) to upgrade from a Grade VIII level to a Grade X equivalent level, and (*b*) to upgrade from a Grade X level to an equivalent Grade XII level. Instruction was given by two fully certified and experienced teachers in English, mathematics, science, and social studies.

Total number interviewed		66
Total number achieving an equivalent Grade IX standing	3	
Total number achieving an equivalent Grade X standing	15	
Total number achieving an equivalent Grade XII standing	8	
Total completing training		26
Total withdrawing from training for various reasons		7
Total accepted into training		33
Total rejected from initial interview		33

In general terms it would seem this programme was a success. The students completing this training were appreciative of the opportunity to improve their academic standing, and there seemed to be definite improvement in the morale of the whole group. Several were directed immediately into a vocational commercial course; others were making application for other vocational programmes. The instructors concerned were impressed with the sincerity of the students and the will with which they worked to achieve their objective. Tests applied by the instructors to determine the equivalent grade standing were those in use in the local high schools. Standards of instruction and testing could be regarded as equivalent to those of the local high schools.

The continuance of this programme will be contingent upon the approval of the Federal Government to regard this upgrading in academic subjects as a vocational programme.

2. *Commercial Training*

A meeting with the National Employment Service officers indicated a need in the Victoria area to offer training to unemployed persons who had previously been trained in typing and shorthand to upgrading their speeds to acceptable commercial standards. The Technical Branch, working in close co-operation with the National Employment Service office, interviewed a large number of applicants, and of these a total of nineteen was accepted for the course, which commenced on January 9, 1961. Statistics to June 30, 1961, are as follows:—

Terminated course to enter employment directly	10
Terminated course to find employment	8
Total number in training as of June 30, 1961	12
Total number receiving training	30

This programme has also been well received, and the students have met with some measure of success. It is anticipated this programme will be continued to assist unemployed persons to upgrade themselves to standards of typing and shorthand acceptable to employers of this type of worker.

3. *Practical Nursing*

To meet an apparent need for trained practical nurses and to provide training for unemployed females, the practical nurses' programme was commenced on January 9, 1961. The programme was patterned on that instituted (with success) by the Vancouver Vocational Institute several years ago and which has proven to be most successful. It is planned to continue this programme with a new class of sixteen commencing every four months—that is, January, May, and September. The total number entering school is as follows:—

Total number in January, 1961, class	14
Withdrawn	3
Total number entering hospital, May, 1961	11
Total number entering May, 1961, class	15
Withdrawn to date	3
Total number presently in class	12

It is anticipated a minimum of thirty practical nurses will be trained each year with the present accommodation and facilities. Indications are that these will all be placed with very little difficulty.

Vocational-instructor Training

The context of the vocational-instructor training programme was revised during the school-year. This revision requires a vocational instructor in training to complete a total of 15 units of professional work equivalent to that covered by the secondary-school teachers in the College of Education.

In view of the difficulties in offering the revised programme on an in-service basis, it was decided that henceforth the training would be carried out at summer sessions of five weeks' duration. This would allow instructors from any vocational school in the Province to participate in the programme.

Vancouver Vocational Institute

As indicated earlier in this report, emergency courses to assist the unemployed were held at the Vancouver Vocational Institute. The following is an assessment on the vocational preparatory programme (general vocational education).

The experimental programme in general vocational education included some new concepts in vocational training programmes, and because of its new approach to some basic employment problems, it commanded a good deal of interest and attention across Canada. This programme developed from the study of unemployment by a committee including representatives of the Department of Education, the Vancouver School Board, the National Employment Service, the Canadian Manufacturers' Association, and the Vancouver and District Labour Council. It was observed that many unemployed persons could not qualify for certain types of employment because they lacked Grade X or Grade XII standings in general education, which were required by employers for many job opportunities in the Vancouver area. It was considered, therefore, that a complete vocational training service in this area should include programmes which would enable adults to achieve equivalent Grade X or Grade XII standings during periods of unemployment. These programmes serve the additional purpose of qualifying unemployed people for entry into other vocational training programmes which require Grade X or Grade XII for entrance.

The experimental group of 109 pupils was sufficiently large to provide reasonably reliable conclusions. Some of the results of the experiment to date include the following:—

(1) That unemployed people will come forward for such classes in substantial numbers.
(2) That the unemployed selected worked very hard at their studies and a very high proportion were successful as measured by the examinations.
(3) That the Grade X equivalency group achieved this standing in less than four months of full-time study.
(4) That, to date, one-third of the first Grade X group to complete were placed in employment because the lack of Grade X standing, which was an employment impediment to them, had been corrected.

Report of C. J. Strong and V. E. Rickard, Inspectors of Technical Classes

New facilities for teaching industrial arts have been provided in Chilliwack, Cowichan, Ladysmith, Surrey, Vancouver, Victoria, Williams Lake, Burnaby, West Vancouver, North Vancouver, Kelowna, and Sicamous.

Thirty-six qualified and eight untrained teachers were employed to staff the new industrial arts shops and to replace those leaving the profession. The recommendation of the Chant Report that Grade VII pupils be returned to the elementary school in September, 1961, should enable us to staff all centres this fall with qualified teachers.

The total number of industrial arts teachers employed in the past year stands at 482, an increase of thirty-nine over last year.

Participating in industrial arts courses were 35,490 junior high-school students and 15,217 senior high-school students, a total of 50,707 students.

COMMUNITY PROGRAMMES BRANCH

REPORT OF J. H. PANTON, B.A., M.Sc., DIRECTOR

The revised grant-in-aid structure, effective April 1, 1960, which provided increased financial aid to British Columbia communities for recreation programming and leadership, had a very significant impact on Community Programmes Branch work throughout the year and confronted the Branch with problems of considerable magnitude.

Recreation in British Columbia on the community administration level is slowly emerging from a period of indifferent organization to one of sound concepts of the importance of intelligent recreation planning and organization in the community. Recreation Commissions are becoming more accepted as community recreation authorities, and this responsibility is manifesting itself in much better organization both on the administrative and programme level.

The number of Recreation Commissions continued to increase, but after eight years of steady growth the rate of increase has become less due to the diminishing number of communities without Recreation Commissions. The annual increase is indicated as follows: 1954, 86; 1955, 140; 1956, 183; 1957, 216; 1958, 250; 1959, 266; 1960, 281; 1961, 307.

Services extended by the Community Programmes Branch to British Columbia communities are:—

(1) Advice to public agencies and individuals on recreational matters by a staff of regional Recreation Consultants.
(2) Aid in recreation to the blind through White Cane Clubs organized by staff member Mr. Joseph Lewis.
(3) Large and comprehensive library of books, booklets, films, and filmstrips on innumerable recreation topics.
(4) Drama library, materials, and advisory services.
(5) Leadership training through workshops, conferences, clinics, and regional schools.
(6) Night-school grants for regularly organized night-school classes.
(7) Regular grants to Recreation Commissions to assist communities with paid recreation help and expenses.
(8) Special grants to those Recreation Commissions who conducted summer swimming and playground programmes.
(9) Responsible for educational sessions and resource personnel at Annual British Columbia Recreation Conference.

Recreation Commissions

The following is a list of Recreation Commissions in British Columbia and the annual Provincial Government grant allocated for the year:—

* Commissions receiving grants for directors' salaries.
† Inactive Commissions during year with actual amount received shown in parentheses.

Recreation Commission	Annual Grant	Recreation Commission	Annual Grant
Abbotsford	$480.00	Arrowhead-Sidmouth	$180.00
Ainsworth	300.00	Arow Park	240.00

During the year a total of sixteen Commissions was on the inactive list at one time or another. In most cases this is temporary, and in all cases is due to lack of competent leadership at the local level.

The increased grants provided in the 1960/61 budget resulted in an increase of $31,877 in grants-in-aid over the past year. Twenty-eight communities with professional leadership had their grants increased from a maximum of $600 annually to $1,500 annually. One hundred and three Commissions received an increase during the year, and twenty-two new Commissions applied for and received grants. Increases are not approved unless regulations governing grants are rigidly adhered to.

STAFF

The work of the staff increases each year. The growth of Commissions and a better understanding of recreation resources by communities make more demands on the field staff and Branch resources. The consultative staff of the Community Programmes Branch are to be commended for the effective way eight men are covering 307 communities all over the Province.

The consultative staff and their regions are as follows:—

Consultant	Headquarters	Region
G. J. Pynn	Victoria	Vancouver Island.
J. M. MacKinnon	Cranbrook	East Kootenay.
(Vacant, March 15th)	Vancouver	Greater Vancouver and District.
D. M. McCooey	Quesnel	Northern British Columbia.
K. K. Maltman	Kelowna	Okanagan.
W. Mayers	Kamloops	Central British Columbia.
T. Ruben	Abbotsford	Fraser Valley.
J. R. McKeen	Nelson	West Kootenay.
J. Lewis	Vancouver	Instructor of Handicapped.
Miss Anne Adamson	Victoria	Drama Adviser.

LEADERSHIP

The increased grant from $10,000 to $15,000 for leadership training has enabled the Community Programmes Branch to greatly expand in this area. Although expansion was possible because of the availability of more funds, it must be noted that interest and desire for opportunity to participate in leadership activities are continually increasing throughout the Province.

Five regional leadership workshops were held throughout the year; these were designed for volunteer leaders and afforded them opportunity to improve their skills and teaching methods. This type of activity is still in the experimental stage but was received enthusiastically.

Workshops	Number Attending	Number of Commissions Represented	Number of Courses Given	Cost
Prince Rupert	48	16	8	$463.45
Cranbrook	153	25	11	1,042.71
Kelowna	75	34	9	363.60
Nanaimo	65	15	4	298.99
Williams Lake	61	18	6	374.00
Totals	402	108	38	$2,542.75

Statistical Analysis, 1960/61

	Clinics	Conferences	Leadership Workshops

Attendance	7,076	898	402
Number of Commissions attending	223	185	108
Provincial			
Number	4	1	----
Attendance	271	146	----
Number of Commissions attending	----	60	----

In addition to the above, ninety-eight communities received aid totalling $9,305 for aquatic and playground programmes. This was a 22-per-cent increase over the year before. Seventy-seven aquatic and twenty-three playground programmes were assisted. These special project grants are designed to encourage swimming and water safety and to promote the development of good playground organization during the summer when many youngsters have so much free time.

The Nelson and Okanagan Schools of Fine Arts each received a $250 grant from the Community Programmes Branch. This was done to promote the development of leadership in this area of recreation. People taking courses at these schools are excellent sources of leadership for clinics and workshops as well as other community activities in the arts.

In co-operation with the office of the Chief Inspector, the Community Programmes Branch paid the expenses of resource personnel and worked with four regional committees to organize physical education workshops. The workshops were conducted at Coquitlam, Kelowna, Nanaimo, and Nelson and resulted in an increased interest and enthusiasm for modern trends in physical education for school programmes.

On the Provincial level the Community Programmes Branch is responsible for the educational sessions and resource personnel for the Annual Provincial Recreation Conference. This conference, held in conjunction with the British Columbia Recreation Association annual meeting, is designed for professional people, Recreation Commission personnel, and municipal personnel with recreation responsibilities. The 1960 conference was held in Trail, and 146 delegates representing sixty Recreation Commissions attended.

The following sessions were held: Recreation in Small Communities, Recreation Commission Chairmen, Private Agencies in Recreation, Professional Personnel, The Problem of Volunteer Leaders, Arts in Recreation, Adult Education, School Community Student Recreation, Municipal Recreation, Senior Citizens' Recreation, Public Relations, Physical Fitness, and Commercial Recreation.

Library Services

A new resource catalogue was completed and forwarded to every Recreation Commission.

Library Statistics

Number of new books purchased	145
Number of new films	13
Number of books circulated	592
Number of films circulated	788
Number of drama books, plays, etc., circulated	In excess of 8,000

The new catalogue acted as a stimulus to library activity. Requests for films were almost doubled over the preceding year. The Community Programmes Branch book service could be used much more than it is. There are more than 3,000 excellent publications pertaining to nearly every aspect of recreation; most of these are the latest prints available.

Publications

In September of 1960 a new quarterly bulletin service was instituted by the Community Programmes Branch. Each quarter every Recreation Commission receives the bulletin, which contains articles of interest to people in the recreation field.

During the year the following were also printed: (1) Catalogue of Resource Material, (2) New Guide to Recreation Commissions, (3) Community Programmes Branch Information Brochure, (4) Leadership Training Brochure.

Drama

The drama services of the Community Programmes Branch continued to be taxed to the limit. Between eight and nine thousand books, including plays, pamphlets, magazines, etc., were sent out to interested groups, schools, teachers, etc. Equipment, including curtains, lights, and rheostats, was in constand demand for productions, concerts, special events, and festivals of all kinds.

Over 200 active drama groups with a minimum of fifteen members produced from three to five full-length plays during the season, with one-act and workshop plays completing the programme.

Drama festivals play a major role in the cultural life of British Columbia. Last spring thirty festivals were held throughout the Province; of these, ten were for schools only, ten adults only, three included both school and community groups, and seven combined drama and speech arts with music and dancing.

Vancouver played host to the British Columbia region of the Dominion Drama Festival. Entries came from Lake Cowichan, Vancouver, Kamloops, and Prince George, with three groups not meeting the required standards and one being withdrawn. Miss Gay Scrivener, of Vancouver, acted as preliminary judge. Adjudicator Miss Norma Springford, of Montreal, chose Lake Cowichan to represent British Columbia at the Dominion Drama Festival in Montreal. Their *comedia del arte* play, "The Three Cuckolds," was directed by Mrs. Yvonne Green. Mr. Adrian Pecknold, who played the lead, received a Canada Council scholarship to attend the National Theatre School in Montreal.

The One-act Final Festival took place in Victoria, with Mrs. Florence James, of Regina, adjudicating. Nine regional festival winners competed, and first-place honours went to the Haney Correctional Institution Players for their presentation of "Lady Audley's Secret" (Act I), directed by Mr. Antony Holland. The Community Programmes Branch appointed adjudicators for these festivals and provided

assistance to the committees in charge. Workshops continued to be important to the groups, and the Branch provided financial and other assistance in this regard.

The British Columbia Drama Association, with Mr. Franklin Johnson, of White Rock, as its president, continued to function as the parent body of drama groups in the Province. Our Drama Adviser, Miss Anne Adamson, in her capacity of corresponding secretary, gave invaluable assistance to drama groups throughout the Province.

The association has set up a British Columbia Guild of Adjudicators to train and raise the standard of adjudication in this Province. It is hoped to set up examinations for those already acting as judges in the dramatic field and to provide workshops for those desirous of being appointed to this position. Mr. Antony Holland, of Haney, heads the committee.

A committee has also been appointed to assist students to attend the National Theatre School at Montreal, University of British Columbia Summer School of the Theatre, and other established schools in British Columbia.

Conclusion

Although the year 1960/61 was successful with regard to increased activity and interest in recreation on the community level throughout British Columbia, a job of considerable magnitude will always face us. Communities must learn the value of good communications, we badly need more qualified leaders at the top level, leadership training procedure requires constant study and development, municipal governments must become more cognizant of recreation problems, and the job of Recreation Commission chairmen needs a more thorough understanding by Commission personnel.

The Community Programmes Branch is endeavouring to promote better recreation procedure in British Columbia. Progress was registered in 1960/61, as the preceding statistics clearly indicate.

NIGHT-SCHOOLS

REPORT OF J. H. PANTON, B.A., M.Sc., DIRECTOR

All indications in the field of adult education point to a future growth that will tax all our resources in this area of education. The increase in enrolment, innumerable requests for information governing courses, and the new awareness of the growing need for continuing education has confronted British Columbia educators with an ever-growing and increasingly important challenge.

Adult education is no longer a matter of night-schools. It is demanding an extension of time to every hour of the day and each month of the year. It is requiring more and well-qualified instructional staff and maximum use of facilities. Education is the key to the future. Only countries with adequately educated citizens will be able to meet the demands of the highly technical and complex society in which we live.

The programme in British Columbia offers courses of two types, as follows:—

(1) Vocational, technical, or industrial courses operating under Dominion-Provincial agreements. These courses include such subjects as typing, book-keeping, engineering, mechanics, commercial art, carpentry, or any subject an individual takes to increase his ability in his vocation.

(2) Cultural, recreational, or academic courses which fall into the general field of adult education. Courses in this category include almost all academic subjects, and all sports, hobbies, crafts, arts, and other leisure-time pursuits.

Grants on behalf of instructors' and directors' salaries are paid to School Boards for classes which are approved by the Department of Education. Under a Dominion-Provincial agreement, additional grants are provided for instructors' salaries and equipment for vocational courses only.

The following School Boards conducted night-school programmes during the academic year 1960/61:—

Abbotsford.
Alberni.
Alert Bay.
Armstrong-Spallumcheen.
Arrow Lakes.
Burnaby.
Campbell River.
Castlegar.
Coquitlam.
Courtenay.
Cowichan.
Cranbrook.
Creston.
Delta.
Fernie.
Fraser Canyon.
Golden.
Grand Forks.
Howe Sound.
Kamloops.
Kelowna.
Keremeos.
Kettle Valley.
Kimberley.
Kitimat.
Lake Cowichan.
Langley.
Maple Ridge.
Merritt.
Mission.
Nanaimo.
Nelson.
New Westminster.
North Vancouver.
Ocean Falls.
Peace River North.
Peace River South.
Penticton.
Powell River.
Prince George.
Prince Rupert.
Princeton.
Quesnel.
Richmond.
Saanich.
Salmon Arm.
Sechelt.
Slocan.
Smithers.
Southern Okanagan.
Summerland.
Surrey.
Trail.
Vancouver.
Victoria.
West Vancouver.
Windermere.

Growth in Night-school Programme

Year	Number of School Districts	Number of Enrolees	Number of Instructors	Number of Courses
1953/54	49	19,969	842	.....
1954/55	55	22,280	948	.....
1955/56	57	29,335	1,186	.....
1956/57	60	33,565	3,328	.....
1957/58	62	36,611	1,401	.....
1958/59	64	39,108	1,578	.....
1959/60	58	40,867	1,796	1,578
1960/61	64	40,917	1,945	2,220

Vocational

Year	Number of Enrolees	Number of Instructors	Number of Courses
1955/56	9,040	357	.....
1956/57	11,582	440	.....
1957/58	11,118	477	.....
1958/59	10,761	454	.....
1959/60	13,539	540	322
1960/61	12,530	552	552

Non-vocational

1955/56	20,291	829	.....
1956/57	21,983	888	.....
1957/58	25,483	924	.....
1958/59	28,427	1,124	.....
1959/60	27,328	1,256	1,256
1960/61	28,387	1,393	1,648

One hundred and eleven different non-vocational courses were offered in the total programme during the year. Some of these courses could be broken down into separate courses, making a much higher total. When vocational courses are added, the number of different courses is in the vicinity of 150. The six largest enrolment activities in the non-vocational programme were: (1) Sewing, 2,858; (2) dancing, 2,660; (3) English, 1,553; (4) art, 1,293; (5) English for new Canadians, 1,287; (6) bridge, 1,240.

The regional conferences which were instituted in 1959 continued at Nanaimo and Kelowna during 1960/61. Others were not organized because of the Provincial conference which was held in Vancouver on April 3 and 4, 1961. The regional conferences again discussed problems and procedure relative to the conduct of adult education work in the public schools of British Columbia. These conferences also provided an opportunity for adult educators to get together to exchange ideas and develop better concepts of adult education.

Some of British Columbia's leading adult educators provided invaluable assistance and made important contributions to the adult education activities sponsored by the Community Programmes Branch. Dr. B. E. Wales, Dr. W. C. Hallenbeck, Dr. J. K. Friesen, Dr. C. C. Watson, Mr. A. M. Thomas, Mr. J. H. Dalgleish, Mr. J. W. Morrow, Mr. A. L. Cartier, Mr. W. L. Day, Mr. B. Curtis, and Mr. W. G. Tippett acted as resource personnel at conferences and assisted immeasurably throughout the year.

The committee which was formed to study the Interrupted General Programme for Adults submitted a brief and met with the Department to plan procedure for

courses. The work of this committee resulted in a new academic programme in the Interrupted General Programme for Adults which permits high-school graduation. The committee terminated work on this project in early 1961, and the new programme became effective on September 1, 1961. The committee consisted of Dr. B. E. Wales, Director of Vancouver Night-schools; Mr. C. Watson, Director of Burnaby Night-schools; Mr. J. Morrow, Director of New Westminster Night-schools; and Mr. N. L. Day, Director of Maple Ridge Night-schools.

After two years of regional conferences it was decided to hold a Provincial conference for the first time since 1955. A committee was established, and the initial meeting was held on November 16, 1960. Committee members were Mr. James Panton, Department of Education, Victoria; Dr. Bert Wales, Director of Adult Education, Vancouver School Board; Mr. Frank Reder, Executive Secretary, British Columbia School Trustees Association; Dr. C. Watson, Director of Adult Education for Burnaby; Mr. William Allister, British Columbia Teachers' Federation; Mr. Alan Thomas, University of British Columbia; Dr. Wilbur C. Hallenbeck, University of British Columbia; Mr. Bert Curtis, University of British Columbia; Mr. Bill Tippett, Director of Adult Education, Nanaimo; and Mr. Wes Janzen, British Columbia Teachers Federation.

Mr. J. H. Dalgleish, of Victoria, and Mr. H. N. Cairns were added in the capacities of first and second day conference programme chairmen.

Prior to the conference, the committee held regular meetings for four months, and the final programme was the result of a searching look into the problems of adult education in the public schools of British Columbia. The conference itself will be reported in the 1961/62 Annual Report, as it was held in April of 1961.

Adult education in British Columbia has developed from a slightly regarded adjunct to the school programme to a growing giant which seems destined to exert a great amount of influence on our society. It has reached the stage where serious thought and study must be given if future procedure is to be successful. With this in mind, many aspects of adult education services and organization are the subjects of discussion at all conferences sponsored by the Community Programmes Branch. Much thought and study are being given to this challenging and important field of education; this indicates future development commensurate with the importance of continuing education.

At the conclusion of the 1960/61 fiscal year the Provincial conference scheduled for April 3rd and 4th was expected to provide many suggestions for future procedure and study concerning adult education in the public schools of British Columbia.

A very significant development during the 1960/61 year was the increased interest in adult education in evidence among the men responsible for the direction of programmes throughout the Province. Adult education leaders are meeting frequently for discussions and planning; at each meeting there has been great interest generated concerning the future and there is a probing search for better approaches to programmes and development.

JERICHO HILL SCHOOL

(A Special School for Aurally or Visually Handicapped Children)

REPORT OF C. E. MacDONALD, LL.B., B.S., LL.D., SUPERINTENDENT

The enrolment for the 1960/61 school-year was divided as follows:—

	Day	Resident	Total
Blind and partial sighted	36	53	89
Deaf and hard of hearing	91	102	193
Totals	127	155	282

Of the total number, eight blind pupils were enrolled from the Province of Alberta. There were also three children from the Northwest Territory and one from the Yukon Territory. Magna-type readers were loaned to thirty-six partial-sighted children in primary grades of regular public schools throughout the Province. As heretofore, the Canadian National Institute for the Blind co-operated with the school in providing home training and counselling for pre-school blind children and parents. A small group of pre-school deaf children were given part-time training at the school.

General Remarks

The Children's Health Centre and the Metropolitan Health Services provided invaluable assistance throughout the year in the screening and care of our resident and day pupils.

Dr. MacDonald's twenty-five years of service to the Government as superintendent of Jericho Hill School were recognized, along with other long-service Civil Servants, at a luncheon given by the Premier at the Vancouver Hotel.

A Handbook of Information for Parents was prepared and distributed on the reopening of school. A manual designed to assist teachers with partial-sighted pupils in regular schools was prepared by Miss Eileen Scott and Mr. Gordon Carson. These were distributed through the District Superintendents of Schools during the fall.

The senior deaf class, accompanied by a teacher, visited the Legislature and other points of interest in Victoria. This was a new and very stimulating experience for our young people. The association with thirty selected hearing high-school pupils on this tour was very worth while from many points of view.

On the afternoon of March 25th a delegation of Russian educators, accompanied by National and Provincial Teacher Federation officials, visited both departments of our school. From comments made, it was believed they liked what they saw and learned. We enjoyed the exchange of ideas and the informal tea with them which followed.

On May 2nd we were hosts for a day to eight deaf Koreans returning home from a tour of the United States and Canada. The girls were part of a percussion orchestra brought over for money-raising purposes. Our girls and boys found them and their school director to be very interesting people, and we are sure that they enjoyed the stop-over.

During the year the language outline for the first six school-years was revised by the vice-principal and teachers of the deaf department.

At the end of the school-year Mr. Peter Freemantle resigned as vice-principal to take a similar position in the new interprovincial school for the deaf in Amherst, N.S. Mr. Maurice White was appointed as successor.

A recommendation by the Advisory Committee that University Programme blind pupils of Grades XI and XII be required to enrol in local sighted classes for completion of matriculation requirements and that this school concentrate on the General Programme for senior blind pupils was approved by the Department of Education before the end of the school-year.

A decision was reached by the Public Works Department with regard to cottage rentals, which was acceptable to senior resident staff. It was agreed that the rentals then in effect be increased by $10 a month, and that the tenants' bills for services be forwarded to the Public Works Department for payment.

Special examinations were authorized for blind students of Grades XI and XII on the University Programme. Two senior deaf pupils wrote the regular Social Studies 30 examination. It is worthy of note that all candidates passed.

On June 16th diplomas and certificates of achievement were awarded to ten blind and fifteen deaf senior pupils. This was the largest graduation night in the history of the school.

I wish to gratefully acknowledge the co-operation received throughout the year from the Department of Education, the Advisory Committee, the two P.-T.A. organizations, and staff.

OFFICE OF REGISTRAR AND DIVISION OF EXAMINATIONS

REPORT OF HARRY M. EVANS, B.A., REGISTRAR

For reference convenience this report includes data covering a number of years.

Teacher Registration and Certification

I. Each teacher employed in the public schools must hold a valid certificate, and this office must establish certification and classification, maintaining an individual record for each person, including teaching service. The following chart shows developments in the past ten years, and indicates that the number of individual service records to be maintained has increased by approximately 85 per cent in this period.

1	1950/51	1951/52	1952/53	1953/54	1954/55	1955/56	1956/57	1957/58	1958/59	1959/60	1960/61
2a	6,250	6,622	7,116	7,560	8,223	8,757	9,482	10,119	10,856	11,547	12,148
2b	(?)	126	158	154	229	176	221	297	332	369	327
2c	377	372	494	444	663	534	725	637	737	691	601
2d	6.4	6.0	7.5	6.2	8.8	6.5	8.3	6.7	7.3	6.4	5.2
3a	835	895	829	965	974	(?)	1,135	1,165	1,270	1,357	1,356
3b	14.2	14.3	12.5	13.6	12.9	(?)	13.0	12.3	12.6	12.5	11.7
4	.....	.....	.....	.....	.....	287	310	313	348	388	317
5a	1,212	1,267	1,323	1,409	1,637	(?)	1,860	1,802	2,007	2,048	1,957
5b	20.6	20.3	20.0	19.8	21.7	(?)	21.2	19.0	19.8	19.0	16.9

1. School-year.

2a. Teachers employed, as at October, from district nominal rolls. Includes regular staff of Vancouver Vocational Institute, Vancouver School of Art, and, up to 1955/56, a portion of Victoria College. Includes supervisors, consultants, relieving teachers, etc.

2b. Numbers with temporary certificates for lack of qualifications, or qualified but overage, included in 2a. A change in age regulations occurred for 1955/56 and continued thereafter.

2c. Increase in teachers employed.

2d. Percentage increase in teachers employed.

3a. Numbers who were teaching as at June 30th in previous school-year, not teaching in November of year shown; that is, drop-outs.

3b. Drop-outs as a percentage of numbers employed in previous year.

4. Numbers who left positions during the school-year shown.

5a. Numbers of teachers needed in September of year shown to staff new positions and replace drop-outs from June previous; that is, teacher demand. This does not include replacements for staff changes during the school-year.

5b. Teacher demand for September as a percentage of numbers employed in previous year.

In 1960/61 there was the smallest annual increase in teachers employed (item 2) in the past five years, and the smallest percentage increase of the past ten years. The drop-outs (item 3) were approximately the same as the previous years but represented the lowest percentage of the last ten years. The teacher demand (item 5) was the lowest of the past three years and represented significantly the lowest percentage of the past ten years.

II. During the period up to the end of 1955/56, teacher-training was carried out in normal schools or in the one-year course for graduates at the University. Enrolments, therefore, in such one-year courses were easy to determine. Since 1956/57 such training has been in the College of Education, and enrolment figures are more difficult to relate to completion of a basic teacher-training programme as enrolments cover all years of training. The following charts, however, covering some eleven years, permit of useful comparisons.

	1949/50			1950/51			1951/52			1952/53			1953/54			1954/55			1955/56

References: M.=male; F.=female; T.=total.

1. Teacher-training enrolments, in all years; (a) elementary training, (b) secondary training, (c) total.
2. Enrolled in training programmes leading to a certificate at end of year, and therefore considered likely to teach.
3. Listed by training-college at close of year, and teaching considered likely (includes those who may be considered for temporary cetrificates, but not those who failed the year or failed practice teaching and a limited number of special cases).
4. Number of those listed in 3 who were teaching as at November in school-year following training; (a) numbers with regular certificates, (b) numbers with temporary certificates, (c) total.
5. Numbers of those listed in 3; (a) not teaching as at November but certificates issued, (b) not teaching and no certificate issued or requested, (c) total not teaching.

NOTE.—The above do not include those taking emergency Industrial Arts and summer session Home Economics training programme.

The certification of those listed in the preceding table as undertaking teacher-training in 1958/59, who were teaching as at November, 1959, was as follows, and includes adjustments through supplementals or summer session courses taken in 1959:—

Certificate	E-T	E-C	E-B	E-A	S-T	P-C	P-B	P-A	Total
Male	17	61	54	32	1	20	110	2	297
Female	28	150	238	36	.....	38	45	1	536
Totals	45	211	292	68	1	58	155	3	833

Similar information for 1960/61 follows and indicates a drop in the E-C category and increases in the E-B and E-A categories, reflecting improvement at the elementary certification level. The secondary levels remained relatively the same.

	Certificate								Total
	E-T	E-C	E-B	E-A	S-T	P-C	P-B	P-A	
Male	10	58	92	56	2	15	109	8	350
Female	34	128	295	45	1	40	46	1	590
Totals	44	186	387	101	3	55	155	9	940

III. From the preceding tables can be calculated supply from the training-colleges as a percentage of demand:—

	1951/52	1952/53	1953/54	1954/55	1955/56	1956/57	1957/58	1958/59	1959/60	1960/61
1a	731	581	668	553	831	960	607	776	1,034	1,242
1b	708	543	649	522	816	920	525	605	833	940
2	1,267	1,323	1,409	1,637	(?)	1,860	1,802	2,007	2,048	1,957
3a	57.7	43.9	47.4	33.8	(?)	51.6	33.7	38.7	50.5	63.5
3b	55.9	41.0	46.1	31.9	(?)	49.5	29.1	29.9	40.7	48.0

1a. Numbers in training-college listed in June previous as likely available to teach in September of school-year shown.

1b. Numbers in training-college in June previous actually teaching in October of school-year shown.

2. Numbers needed in September to staff new positions and replace drop-outs from June previous; that is, teacher demand. This does not include further replacements required during the school-year.

3a. Numbers listed in training-college in June as a percentage of demand; that is, 1a as a percentage of 2.

3b. Numbers from training-college who taught, as a percentage of demand; that is, 1b as a percentage of 2—actual training-college supply as a percentage of demand.

IV. The employment of teachers with temporary certificates in 1959/60, as at October 31st, was as follows:—

	Temporary Elementary			Temporary Secondary				
	E-T	E-C	Total	S-T	S-C	S-B	V-C	Total
Elementary schools	127	13	140	9	2	.....	.....	11
Secondary schools	82	1	83	83	8	2	8	101
Totals	209	14	223	92	10	2	8	112
Vancouver School of Art	8	.....	8	.....	3	.....	.....	3
Vancouver Vocational Institute	.....	.....	.....	.....	.....	.....	23	23
Grand totals	217	14	231	92	13	2	31	138
All schools	.....	.....	.....	.....	.....	.....	.....	369

Of the 369 persons with temporary certificates in 1959/60, 335 were in regular public schools. In 1960/61 the total was 327, with 285 in public schools.

V. Since 1955 the Department of Education has co-operated with School Boards to obtain teachers from the United Kingdom, and in 1955 to 1960, inclusive, has sent an interviewing officer in the early spring to select and recommend individuals for appointments. Applications are recorded, certificate and experience classifications are made in this office before or after interview, and exceed by far the number of interviews and numbers appointed. Replies to advertisements have in some years exceeded a thousand. A number of individuals annually proceed independently to this Province. The numbers who have arrived under the immigration plan have been as follows:—

School-year	1955/56	1956/57	1957/58	1958/59	1959/60	1960/61
Elementary	21	30	48	61	33	35
Secondary	41	35	33	30	35	27
Totals	62	65	81	91	68	62

VI. Teacher-exchange applications proceed through this office. The numbers of applications from British Columbia teachers annually exceed the exchange positions available. Exchanges in recent years were as shown:—

School-year	1955/56	1956/57	1957/58	1958/59	1959/60	1960/61
United Kingdom	22	22	23	26	26	28
Interprovincial	4	4	1	2	2	1
Elsewhere	3	5	1	1	....	1
Totals	29	31	25	29	28	30

VII. Annually several thousand teachers' certificates have been issued, to new teachers and to those who have qualified for permanent certificates or for higher certification. Evaluations are completed for many teachers from other Provinces or countries who have submitted credentials for this purpose; a goodly number do not arrive. General inquiries are considered from outside teachers, numbering in the thousands. In addition, there are many inquiries from British Columbia teachers for evaluations, certification or experience changes, and assistance in learning of specific requirements or suitable training programmes.

Since 1958 an individual teacher-docket system has been possible, leading to significant improvement in correspondence handling. There is difficulty in keeping up with significant annual correspondence volume increase.

Division of Examinations

I. There has been a significant increase in examinations over the years. This Division has arranged for the preparation, printing, and distribution of the June and August University Entrance (Grade XI–XII) and for Grade XIII examinations. Considerable administrative time is involved. It is also responsible for arrangements for marking, tabulating, and releasing results, appeals, and maintenance of records. The following tables give significant data:—

Number of Markers

	1951/52	1952/53	1953/54	1954/55	1955/56	1956/57	1957/58	1958/59	1959/60	1960/61
June	181	193	210	220	234	243	246	290	301	343
August	29	34	33	42	39	41	44	48	50	61
Totals	210	227	243	262	273	284	290	338	351	404
Approximate costs	$74,300	$81,700	$88,400	$90,000	$96,000	$113,000	$123,000	$153,000	$168,000	$179,000

Number of Candidates (June)

University Entrance	7,503	9,048	7,985	9,159	9,418	10,924	13,014	14,933	16,786	19,113

Totals	9,215	10,384	9,360	10,814	11,183	12,489	14,811	17,137	19,459	22,366

Number Completed in June

University Entrance	2,704	2,328	2,594	3,139	3,160	3,433	4,025	4,215	4,720	5,651
Grade XIII	284	269	304	399	410	383	341	464	587	620
Totals	2,988	2,597	2,898	3,538	3,570	3,816	4,366	4,679	5,307	6,271

Papers Marked in June

University Entrance	.....	16,399	.....	20,311	21,042	24,024	29,765	36,236	41,963	46,227
Grade XIII	.....	4,516	.....	5,669	6,028	5,647	6,388	8,055	9,751	11,974
Totals	21,642	20,915	23,280	25,980	27,070	29,671	36,153	44,291	51,714	58,201

Papers Marked in August

University Entrance	.....	.....	.....	.....	.....	.....	.....	6,844	8,931	9,236
Grade XIII	.....	.....	.....	.....	.....	.....	.....	1,727	1,869	2,489
Totals	4,022	5,134	4,663	4,914	5,185	5,789	7,031	8,571	10,800	11,725

In 1958/59 there were 5,342 August candidates, 4,178 University Entrance, and 1,164 Grade XIII.

Total papers for June and August, 1951/52–59/60, were as follows: 1951/52, 25,664; 1952/53, 26,049; 1953/54, 27,943; 1954/55, 30,894; 1955/56, 32,255; 1956/57, 35,460; 1957/58, 43,184; 1958/59, 52,862; 1959/60, 62,514; 1960/61, 69,926.

II. For 1960/61, examinations were prepared for June and August in twenty-one University Entrance subjects and in eighteen Grade XIII subjects. In June, 1961, 176 examination centres were established in the Province and twenty-nine outside British Columbia, with the farthest-removed centres being in England and the Barbados.

III. There has been a very heavy increase in the number of requests for evaluations of academic standing from those who wish to enrol in British Columbia high schools or to take night-school or private-study courses to complete requirements, as well as from those who wish to undertake nurse's training or enter similar professional courses. A very large number of persons has sought evaluations and permission to follow the Interrupted Programme for Adult Students. These numbers are increasing rapidly with expansion in the number of areas offering academic courses through night-schools.

IV. *Scholarship Awards, 1961*

University Entrance.—The fifteen General Proficiency Scholarships, each of $500, awarded jointly by the University of British Columbia and the Chris Spencer Foundation were won by the following:—

Place	Name	School	Per Cent
1st in B.C.	Robert Byng Gordon	Prince Rupert Senior High	95.625
2nd in B.C.	Timothy Charles Padmore	John Oliver Junior-Senior High	95.5
Area 1	Katherine Ruth Herbison	L. V. Rogers Senior High	89.875
Area 2	John Allan Cairns	J. Lloyd Crowe Senior High	93.25
Area 3	Karalee Ann Coleman	Vernon Senior High	87.0
Area 4	Adrienne Margaret Allen	Kamloops Senior High	90.375
Area 5	Evelyn Mary-Ann Johnston	Semiahmoo Junior-Senior High	89.0
Area 6	Eric Arthur Astrom	Gladstone Junior-Senior High	92.125
Area 7	Gwynneth Lynn Davis	King Edward Senior High	92.375
Area 8	Eric Anthony Reif	Magee Senior High	93.125
Area 9	Lee Frances Kennedy	St. Ann's Academy, New Westminster	89.75
Area 10	Alan Streatfeild Bell	West Vancouver Senior High	91.0
Area 11	Daphne Jane Simms	South Peace Senior High	88.0
Area 12	William Frederick Hubbard	Victoria Senior High	91.5
Area 13	Christopher Jo Brealey	Campbell River Junior-Senior High	90.875

The Governor-General's Silver Medal for the highest standing in the University Entrance examinations was won by Robert Byng Gordon.

The Governor-General's Bronze Medal for the second highest standing was won by Timothy Charles Padmore.

Grade XIII.—The six Royal Institution Scholarships, each of $200, awarded by the University of British Columbia for general proficiency were won by the following:—

Name	School	Per Cent
Andre Louis Le Palud	St. George's Private School	90.0
Marilynn Jane Smith	J. Lloyd Crowe Senior High	87.4
Brian Russel Olund	Abbotsford Senior High	87.2
Glenda Jean Card	J. Lloyd Crowe Senior High	86.9
Dennis Patrick Coates	Southern Okanagan Junior-Senior High	84.4
Thora Rose Seifrit	North Surrey Junior-Senior High	84.1

Financial Assistance

I. In 1959, for the first time in British Columbia, the Government entered the field of extensive scholarship awards to high-school graduates, Grade XIII students, and to students of the University of British Columbia and Victoria College. To qualify, candidates must be domiciled in the Province, are required to apply, and must undertake a full-year winter session undergraduate programme at the University or Victoria College or in Grade XIII in public high schools of the Province to receive the award. Selection of winners is made on the basis of the final Grade XII, or Grade XIII, or University of British Columbia or Victoria College examinations.

There are two awards—first class for all students who obtain an average of 80 per cent or higher based on a full year's programme, and second class, available for up to 2,000 top-ranking students with high second-class standing. The second-class awards are divided among Grade XII (University Entrance), Grade XIII, University undergraduate students, and Victoria College undergraduate students, and among the various faculties and groups roughly proportionate to enrolment. First-class awards amount to one-half the tuition fee of the next year of undergraduate study, and second-class awards similarly to one-third the tuition fee. An average of at least

70 per cent, subject to minimum adjustment for certain groups, is required for a second-class award. Awards vary in amount, depending on the institution and faculty attended.

The plan commenced with those writing examinations at the end of 1958/59, with awards being made to those who would undertake training in 1959/60, and has continued similarly annually.

Candidates writing University Entrance or Grade XIII examinations apply through the Division of Examinations, University students through the University, and Victoria College students through that institution. All applications are then considered by the Scholarship Selection Committee, representative of the University of British Columbia, Victoria College, and the Department of Education, chaired by the Registrar. Notification to all candidates is made from the Registrar's office, with cheques issued through the Departmental Comptroller. Figures covering Government of British Columbia scholarships follow, based on applications received.

Examination Year	Original Applications				Final Awards			
	Number Received	Eligible	First Class	Second Class	Total	First Class	Second Class	Amount
1958/59	2,703	1,860	552	1,308	1,782	531	1,251	$229,175.16
1959/60	3,466	2,300	635	1,665	2,192	612	1,580	276,513.32
1960/61	4,223	2,557	703	1,854	.....	.....	.....	.....

	University Entrance Examinations			Grade XIII Examinations		
	1958/59	1959/60	1960/61	1958/59	1959/60	1960/61
First class (80 to 100 per cent)	268	298	313	26	37	33
Second class (70 to 79.9 per cent)	337	492	554	104	133	169
50 to 69.9 per cent	189	290	371	53	90	127
Ineligible	82	113	135	47	80	144
Total applications	876	1,193	1,373	230	340	473

To assist local school authorities, complete tabulations showing schools concerned and final academic averages obtained by all Provincial Grade XII and Grade XIII scholarship candidates are provided to the District Superintendents of Schools.

II. The Provincial Government, with some assistance from the Federal Government, annually provides Government bursaries to assist students to undertake further training. An average of 65 per cent is required together with evidence of financial need. Assessment is based on the last academic studies undertaken. Awards vary from $50 to $300, depending on academic standing and need, with most awards in the range $100 to $150. These awards may be made available to those undertaking University of British Columbia or Victoria College undergraduate study, recognized nurse's training in the Province, and for recognized University study outside British Columbia in undergraduate courses of training not available in this Province; for example, dentistry, veterinary.

All bursary applications proceed through the Registrar's office, and Bursary Selection Committees, representative of the University and of Victoria College and chaired by the Registrar, determine awards. Notification to all candidates is made from this office, with cheque issue through the Departmental Comptroller.

Figures covering Government bursaries follow, based on applications received by the deadline. A relatively large number of applications cannot be considered because of late submission.

Year	Original Applications		Final Awards	
	Number Received	Eligible	Number	Amount
1959	821	693	653	$82,650
1960	1,071	904	865	113,465
1961	1,395	1,171	-----	----------

III. In 1959 a significant change was made in respect of loan assistance. By amendment to the *British Columbia University Act* authority was given for establishment of " The Student Aid Loan Fund " of up to $2,000,000. A joint committee composed of two representatives of the University and two representatives of the Department of Education (at present the Registrar and the Departmental Comptroller) authorizes loans. The Department of Education no longer provides loans. Loan assistance may be provided to undertake undergraduate training at the University of British Columbia, Victoria College, the Vancouver School of Art, or recognized university undergraduate training outside the Province when such training is not available in British Columbia. Loan awards have been as follows:—

Year	Number of Awards	Amount
1959/60	843	$397,570
1960/61	842	435,130

Strathcona Trust

For many years the Province has participated in the Strathcona Trust. An annual grant has been received, in recent years approximating $1,600, with the moneys to be utilized to encourage physical fitness in the schools and cadet-training and rifle shooting. Cadet awards have been made to the four leading corps for proficiency, to the National Cadet Camp, to the annual Cadet Trades Training Camp at Vernon, for cadet rifle shooting competition, and to British Columbia cadets attending Bisley.

Physical Education Shield awards have been provided for each district superintendency, with four in Vancouver and two in Victoria, for presentation to the schools showing the greatest proficiency or the most significant improvement. These awards were discontinued at the end of 1959/60, with the shield to be retained by the winning school and utilized for internal competition within the school.

To recognize and encourage physical education, Strathcona Trust bursaries have been provided in recent years to teachers wishing to undertake further undergraduate course work in physical education. These bursaries recently have been $125 in value. Five awards were made on 1958/59 standings, five on 1959/60, and six on 1960/61.

The Local Committee, Strathcona Trust for British Columbia, administers the moneys received, and consists of military representatives and representatives of the Department of Education. The Registrar has continued as Secretary, Local Committee, for some years and is British Columbia representative on the Executive Council, Strathcona Trust Fund.

Certification of Professional Librarians

New regulations for the certification of professional librarians became effective in November, 1954. The Registrar acts as Secretary, Board of Examiners for Certification of Professional Librarians, maintains records, and issues certificates authorized. Since new regulations were introduced, the numbers of certificates issued were as follows: 1955, 57; 1956, 62; 1957, 16; 1958, 18, 1959, 10; 1960, 17.

Correspondence

Volume and detail continue to be two major problems because of continual growth. New filing procedures have not permitted the maintenance of records indicating correspondence volume. For some years records were maintained of letter volume, as shown below. These figures do not include application and other forms, circulars, instructions, examination papers, and similar items, but refer to correspondence volume only.

Year	Normally Require Reply			Initiated by Branch	Total
	Exams Inward	Registrar Inward	Total	Exams and Registrar Outward	
1950	5,920	7,756	13,676	3,649	17,709
1951	6,278	8,092	14,370	4,802	19,777
1952	6,071	8,900	14,971	4,923	20,555
1953	7,220	10,111	17,231	5,187	23,352
1954	7,465	12,165	19,630	5,726	26,842
1955	8,222	13,398	21,620	5,628	29,249
1956	8,339	14,671	23,010	6,680	30,537
1957	8,130				
1958	9,084				
1959	10,113	New recording system precludes tabulations.			
1960	11,867				

In those years for which accurate figures are no longer available, it is known that volume exceeded 41,000 in 1958, and similar increases continue.

EDUCATION OF SOLDIERS' DEPENDENT CHILDREN ACT

REPORT OF MRS. FREDA KINSMAN, SECRETARY OF THE COMMISSION

During the school-year 1960/61 a total of 244 applications was considered by the Commission. Of these, forty-one were turned down, the chief reason being that family income was higher than that set by the Commission for grant purposes.

Two hundred and three applications were approved for grants. Students were distributed by grades as follows: Grade IX, 50; Grade X, 59; Grade XI, 53; Grade XII, 41. During the year nine students dropped out and grants were discontinued.

The students in the greatest financial need received $105.80 for the year; the balance received $90.80. In addition, fifteen students who showed outstanding ability were granted a bonus of $25.

STATISTICAL RETURNS
