PROVINCE OF BRITISH COLUMBIA

THE MILK BOARD

ANNUAL REPORT

for the

YEAR ENDED DECEMBER 31

1973

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1974

To His Honour the Lieutenant-Governor in Council
of the Province of British Columbia

MAY IT PLEASE YOUR HONOUR:

SIR: We have the honour to transmit herewith, in accordance with section 56 of the *Milk Industry Act,* the Twenty-eighth Annual Report of the Milk Board under that Act for the year ended December 31, 1973.

THE MILK BOARD

E. D. DAUM, *Chairman*

J. D. HONEYMAN, *Member*

C. H. P. KILLICK, *Member*

Vancouver, B.C., February 26, 1973.

Twenty-eighth Annual Report of the Milk Board

For The Year Ended December 31, 1973

This Report of the Milk Board is made in accordance with section 56 of the *Milk Industry Act* and covers the calendar year ended December 31, 1973.

LEGISLATION

Milk Industry Act

The Thirtieth Legislative Assembly passed an amendment to the *Milk Industry Act* during the Second Session.

The effect of the amendment was to enable the Board to become a party to the Federal Market Sharing Program.

Milk Board General Orders

General Order 53 (B.C. Reg. 107/73), made on April 26, 1973, amending General Order 46 (B.C. Reg. 126/70), came into operation on May 1, 1973. The effect of this order was to repeal General Order 52 (B.C. Reg. 227/72). It established the new base period of 1963–72 and the new base period values. It changed the index source for the Index of Alfalfa Hay Prices and the Index of 16% Dairy Feed due to discontinuation of former sources. It increased the Class II Minimum Accounting Value per hundred pounds of milk for 3.5 per cent butterfat content to $2.500 in all areas of production and increased the Class III Minimum Accounting Value per hundred pounds of milk for 3.5 per cent butterfat content to $4.760 in all areas of production due to change in the support price of butter and nonfat milk powder. It increased the butterfat differential (*a*) for Class I milk to 8.5 cents, (*b*) for Class II and III milk to 7.1 cents.

General Order 54 (B.C. Reg. 281/73), made on August 17, 1973, amending General Order 46 (B.C. Reg. 126/70), as amended by General Order 50 (B.C. Reg. 106/72), and by General Order 51 (B.C. Reg. 162/72), and by General Order 53 (B.C. Reg. 107/73), came into operation September 1, 1973. The effect of this order was to increase the Class III Minimum Accounting Value per hundred pounds of milk for 3.5 per cent butterfat content to $5.000 in all areas of production due to change in the support price of nonfat milk powder.

General Order 55 (B.C. Reg. 471/73), made on November 30, 1973, amending General Order 46 (B.C. Reg. 126/70), as amended by General Order 50 (B.C. Reg. 106/72), and by General Order 51 (B.C. Reg. 162/72), and by General Order 53 (B.C. Reg. 107/73), and by General Order 54 (B.C. Reg. 281/73), came into operation December 1, 1973. The effect of this order was to reduce the daily quota building programme to a four-year programme and to make the qualifying period for the daily quota building programme a six-month period of July 1 to December 31 in a calendar year. It struck out subsection (*b*) of section 7.08 and struck out section 7.09 and by substitution made the effective date of approved daily quota transfer applications the first day of each month every month of the year subject to 15 days' written notice by the licensed transferor.

Milk Board Membership and Activities

Membership of the Board remained unchanged from the previous year, with Elmer D. Daum, B.A., C.A., as Chairman, and J. D. Honeyman and C. H. P. Killick, P.Ag., as the other members.

The Board held 18 meetings to discuss matters of policy and held nine additional meetings with producers, vendors, and other interested parties to discuss matters pertinent to the milk industry.

Board representatives attended all meetings of the Dairy Committee of the British Columbia Federation of Agriculture, and the Board members attended the Federation's Annual Convention.

The Board Chairman and Administrator attended the meeting held by the International Association of Milk Control Agencies which took place in New Orleans, U.S.A.

The Administrator attended the Western Dairy Conference held in Boise, Idaho.

The Board continued to act in an advisory capacity to the subcommittee of the Dairy Committee of the British Columbia Federation of Agriculture concerning the possible entry of British Columbia into the Canadian Dairy Commission's comprehensive market-sharing programme. British Columbia entered into the programme effective October 1, 1973.

Areas of Production

During 1973 the four areas of production defined under the provisions of section 40 of the *Milk Industry Act* remained unchanged.

Statistical Information

As 1972 was a leap-year, to provide comparability between 1972 and the current year the daily average figures for February 1973, as shown in Tables IIIA, IIIB, IIIC, IIID, and IIIE, should be added to both February 1973 totals and 1973 yearly totals for each area. Table IIIE is a new table which combines Tables IIIA, IIIB, IIIC, and IIID to show total production figures for all four Milk Board areas. Table 1VA, IVB, IVC, IVD, and IVE are new tables which provide a month by month and accumulated month by month comparison of 1973 to 1972 for each of the four Milk Board areas with Table IVE showing combined figures for all four Milk Board areas.

Table I—Analysis of Quart Sales by Product Category

Total quart sales increased in all four controlled areas of production, with the total increase being 4.11 per cent.

The trend of decreasing standard milk sales and increasing low-fat sales and skim-milk sales continued with the exception that in the Cariboo and central British Columbia area skim-milk sales decreased by 8.03 per cent compared to 1972. The aggregate decrease in standard-milk sales and the aggregate increase in low-fat and skim-milk sales were 2.63 per cent and 11.00 per cent respectively.

Buttermilk sales increased in all controlled areas except the Cariboo and central British Columbia area where sales dropped 9.77 per cent compared to 1972.

Light-cream (9 per cent butterfat content) sales in the Okanagan-Kootenay area declined by 2.84 per cent. Light-cream sales and whipping cream (32 per cent butterfat content) sales in the Cariboo and central British Columbia area declined by 4.51 per cent and 3.60 per cent respectively. With these exceptions cream sales increased in the four controlled areas.

Sales continued to switch from retail to wholesale. In 1972 Vancouver area was the only area to show an increase in retail sales amounting to 1.47 per cent over the previous year 1971. This was reversed in 1973 when Vancouver area had a decrease in retail sales of 6.04 per cent compared to 1972. The aggregate decrease in retail sales in the controlled areas of production was 7.28 per cent, while the aggregate increase in wholesale sales was 7.43 per cent. In the controlled areas of production 20.08 per cent of the quart sales were retail and 79.92 per cent were wholesale.

Table II—Analysis of Class I Sales, Including Inter-area Sales

Total Class I sales in pounds (which is the aggregate of all Class 1 sales in an area of production whether made by the vendors within the area or by vendors located outside the area) increased in all areas of production during 1973. The aggregate increase was 4.78 per cent. Within area Class I sales increased in all controlled areas of production as did interarea Class I sales.

Table III—Analysis of Qualifying Milk: Production and Utilization.

Total qualifying milk production during 1973 increased 0.81 per cent in the controlled areas of production compared to 1972. However, as 1972 was a leap-year, to obtain a more accurate comparison the daily average production in February 1973 for the four controlled areas should be added to the 1973 year total—795,531,060+2,189,905=797,720,965—which when compared to 1972 total production for the four areas of 789,137,604 would indicate an increase for the four controlled areas in 1973 of 1.09 per cent.

Table IIIA shows that total qualifying milk production in the Vancouver area decreased by 799,614 pounds of milk or 0.14 per cent compared to 1972. Again because of the extra day in February 1972 the daily average production for February 1973 should be added to the 1973 year total—579,095,374+1,608,637=580,704,011—which when compared to 1972 total production for the area of 579,894,988 would indicate an increase for the Vancouver area in 1973 over 1972 of 809,023 pounds of milk or 0.14 per cent.

Total quota milk receipts in the controlled areas of production was 77.73 per cent of total production during 1973, up from 76.44 per cent in 1972. Total Class I utilization of quota receipts increased from 87.36 per cent in 1972 to 88.91 per cent in 1973.

Total production, quota milk receipts, and Class I utilization showed an actual increase in 1973 over 1972 in Vancouver Island area, Okanagan-Kootenay area, and Cariboo and central British Columbia area. Vancouver area also had an increase in total production, quota milk receipts, and Class I utilization if 1972 leap-year is taken into consideration.

All areas of production experienced a larger increase in Class I utilization than in total production, thereby creating a decrease in the milk-supply surplus to Class I requirements.

Table IV—1973 Year to Date Production and Class I Utilization Compared to 1972.

This table is included in the Milk Board Report for the first time and is intended to show a month by month comparison of 1973 total production and Class I utilization to the same month in 1972 in both pounds of milk and percentage change.

Table V—Class I Accounting Value Formula and Producer Price.

The contents of this table summarize the accounting values for each class of utilization announced by the Milk Board for the calendar year 1973. Also shown are the producer prices (before adjustments), calculated monthly by the Board. Details relative to Milk Board General Orders referred to in the table may be found in the comments applicable to legislation.

Table VI—Licensing Information

Under the provisions of the *Milk Industry Act* and General Order 46, the Milk Board issues Class I licences to vendors and milk jobbers and Class II licences to producers. Both classes of licences are issued April 1 each year for a 12-month period or portion thereof. A summary of the 1973/74 licences issued, cancelled, and in effect December 31, 1973, is contained in Table VI. There was a net decrease of 94 producers from December 1972, to December 1973, which is a 6.62-per-cent reduction from December 1972.
