DEPARTMENT OF HEALTH

VITAL STATISTICS

OF THE PROVINCE OF BRITISH COLUMBIA

ONE HUNDRED AND FOURTH REPORT

FOR THE YEAR

1975

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1978

VICTORIA, B.C., JUNE 1, 1978

To Colonel the Honourable WALTER S. OWEN, Q.C., LL.D.,
Lieutenant-Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Report on Vital Statistics in the Province of British Columbia for the year 1975.

R. H. McCLELLAND
Minister of Health

MINISTRY OF HEALTH,
VICTORIA, B.C., JUNE 1, 1978

The Honourable R. H. McClelland,
Minister of Health,
Victoria, B.C.

SIR: I have the honour to submit the One Hundred and Fourth Report on Vital Statistics in the Province of British Columbia.

I have the honour to be,
Sir,
Your obedient servant,
J. W. MAINGUY
Deputy Minister of Health

DIVISION OF VITAL STATISTICS,
VICTORIA, B.C., JUNE 1, 1978

G. R. F. Elliot, Esq., M.D.C.M., D.P.H.,
Deputy Minister of Health, Victoria, B.C.

SIR: I have the honour to submit the One Hundred and Fourth Report on Vital Statistics in the Province of British Columbia for the year ended December 31, 1975.

I have the honour to be,
Sir,
Your obedient servant,
W. D. BURROWES
Director of Vital Statistics

PART I—REPORT OF THE ACTIVITIES OF THE DIVISION, 1975

SUMMARY 13

REGISTRATION SERVICES—

Administration of the Vital Statistics Act 13
Volume of Registrations 15
Registration of Births 20
Registration of Deaths 20
Registration of Stillbirths 20
Registration of Marriages 21
Registration of Adoption Orders 21
Registration of Divorces 21
Administration of the Change of Name Act 21
Administration of the Marriage Act 22
Registry of Wills Notices 25
Microfilm and Photographic Services 25

BIOSTATISTICAL SERVICES—

Health Surveillance Registry 25
Cancer Control 26
Dental Health 26
Infant Morbidity and Mortality 26
Metric Conversion Committee 27
Tuberculosis Control 27
Mental Health 27
Community Care Facilities 27
Public Health Nursing 27
Record Linkage 27
Behavioural Studies 28
Computerization 28
Vital Statistics 28
Other Services 28

VITAL STATISTICS REPORT, 1975

INTRODUCTION

This Report is divided into three parts. Part I is an administrative report of the activities of the Division, covering both registration and statistical functions, in the year under review. Part II presents summarized serial tables, showing trends over periods of varying lengths, usually accompanied by rates or percentages. Part III presents further detailed analysis of the current year's data.

The data on births and deaths in Parts II and III in most cases relate to residents of the Province and are generally classified by *place of residence.* In several instances where data by place of occurrence are shown, the table headings make this clear. As marriages involve the places of residence of two persons, it is the custom to show marriage data by place of occurrence, a custom which is followed in this Report.

In connection with cause of death, comparability between years is affected by major classification changes introduced in 1950 and 1969. In 1950 a major change in the death classification system took place with the implementation of the Sixth Revision of the International Statistical Classification of Diseases, Injuries, and Causes of Death which was designed for classification of both mortality and morbidity.

In 1969 a further major change in classification occurred with the implementation of the Eighth Revision. Certain categories such as mental disorders, cardiovascular diseases, perinatal conditions, and syphilis were subject to considerable revision. Also certain categories of external cause of accidents were expanded to provide more detail. The code numbers of both the Seventh and Eighth Revisions are presented in Tables 21A and 21B of Part II.

The tables which show cause of death, viz., Tables 21 (*a*) and (*b*), 22–28, 31, 33, 34, 52, 54–59, 73, 74 and the Appendix Table, do not reflect the adjustments resulting from the querying of original cause of death information by the medical coder, because these adjustments were inadvertently omitted from the computer data from which the printed tables were produced. Similar discrepancies arising from the same cause, are reflected in the 1974 report. Readers who are interested in obtaining amended totals for specific diagnostic categories should contact the Division of Vital Statistics.

Before 1968, vital statistics data for Indians were presented in terms of *racial origin* only, but it was found that rates calculated on this basis were unreliable because of the recognized weakness of available population estimates for racial Indians. In all tables which present vital statistics rate for Indians, the figures are now presented in terms of *registered* Indians, i.e., Indians by legal status, living on or off reserves. In the reports for the years 1968 to 1973 data were presented separately for *registered* and *racial* Indians in selected tables of Part III.

The Appendix Table presents the cause of death by sex and age according to the detailed list of the International Statistical Classification. Elsewhere in the Report, mortality data are generally classified according to the Intermediate List of the Classification.

In 1971 the 46 census subdivisions were replaced by 29 regional districts as the standard geographical divisions of the Province for census and related purposes. The new divisions first appeared in selected tables of Part III in the 1971 Report, and are uniformly adopted in the current Report wherever geographical divisions are presented.

29.	Thompson-Nicola.

PART I—REPORT OF THE ACTIVITIES OF THE DIVISION, 1975

SUMMARY

The Division of Vital Statistics performs two major functions in the Health Branch. One of these is to administer the Province-wide vital statistics registration system while the other is to provide a centralized biostatistical service to the Health Branch, to the Mental Health Services Branch, and to certain voluntary health agencies.

The Division is required to administer the *Vital Statistics Act*, the *Marriage Act*, and the *Change of Name Act* and to operate a registry of wills notice under the *Wills Act*. These vital statistics registration services are available to the public through the central office in Victoria and 90 district offices and suboffices located in the main population centres throughout the Province. These are shown in Table 1 on page 14.

In order to carry out its extensive statistical responsibilities, the Division employs a staff of trained biostatisticians and statistical clerks located in Victoria and Vancouver as well as a Data Processing Section which serves both major functions of the Division.

REGISTRATION SERVICES

Administration of the Vital Statistics Act

A very substantial part of the Division's responsibilities is connected with the administration of the *Vital Statistics Act*, which governs the registration of births, stillbirths, marriages, deaths, adoptions, and divorces, as well as the issuance of information and certificates based on registrations filed.

The Division received excellent co-operation from hospitals in arranging for the registration of births by mothers during confinement, and in the submission of monthly returns of births in hospital. Very good co-operation was also received from physicians, lawyers, funeral directors, ministers of religion, government agencies, and the general public in maintaining the timeliness and quality of registrations.

Revised vital statistics registration forms for births, deaths, marriages, and still births were introduced in February 1974. The revisions were based on model forms developed over several years by the Vital Statistics Council of Canada.

TABLE 1—REGISTRATION DISTRICTS, LOCATION OF OFFICES, AND DESIGNATION OF APPOINTEES, AS AT DECEMBER 31, 1975

Registration District and Location of Offices	Designation of Appointee
ABBOTSFORD	Private individual.
ALBERNI	(*See* Port Alberni.)

QUATSINO (*g*)	Government Agent.
Quatsino	Private individual.
QUEEN CHARLOTTE	Government Agent.
Masset	Private individual.
QUESNEL	Government Agent.
REVELSTOKE	Government Agent.
ROSSLAND	Government Agent.
SALMON ARM	Government Agent.
SLOCAN CITY (*d*)	Municipal Clerk.
SMITHERS	Government Agent.
Hazelton	RCMP.
SQUAMISH	RCMP.
STEWART	Government Agent.
SUMMERLAND	Private individual.
TELEGRAPH CREEK	RCMP.
TERRACE	Government Agent.
TRAIL (*h*)	Government Agent.
Castlegar	Private individual.
VANCOUVER	Vistal Statistics personnel.
Sechelt	Private individual.
Gibsons	Private individual.
VANDERHOOF	Government Agent.
VERNON	Government Agent.
VICTORIA	Vital Statistics personnel.
WILLIAMS LAKE	Government Agent.

The capitalized names are the names of legally defined districts, while the names in small letters indicate the locations of suboffices.

With few exceptions, registration districts are administered by District Registrars, and suboffices by Deputy District Registrars. The exceptional cases are included among the following footnotes:

(*a*) The District Registrar for Quesnel District administers the Barkerville District directly.

(*b*) The Clayoquot District main office is located at Ucluelet.

(*c*) The District Registrar for Grand Forks District administers the Greenwood District through a *Deputy* District Registrar.

(*d*) The District Registrar for Nelson administers the Nakusp, New Denver, and Slocan City Districts through *Deputy* District Registrars.

(*e*) The District Registrar for Fernie District administers the Natal District also through a member of the RCMP whose office is located at Sparwood.

(*f*) The Pouce Coupe District main office is located at Dawson Creek.

(*g*) The Quatsino District main office is located at Port Hardy.

(*h*) The District Registrar for Rossland administers the Trail District through a *Deputy* District Registrar.

Volume of Registrations

The number of births, deaths, marriages, and stillbirths in Table 2 are related to the year of filing with the Division, hence will not necessarily coincide with those in Part II or Part III, which are related to the year of occurrence. In the case of adoptions, divorces, and wills notices, all figures in this Report are presented in terms of the year of filing with the Division.

TABLE 2—SUMMARY OF REGISTRATIONS, BRITISH COLUMBIA, 1936–75

Year	Live Births	Deaths	Marriages	Stillbirths	Adoptions	Divorces[1]	Wills Notices	Total

[1] The fee for a certificate or a certified copy of a registration was increased from $1 to $2 in April 1968.

Registration of Births

The responsibility for the registration of the birth of a child rests with the parent. The attending physician is required by law to report the birth within 48 hours of the event, although this reporting does not constitute registration. A slight increase in birth registrations reflected a similar change in the trend of births shown in Part II.

Legitimations—Under the *Legitimation Act,* a child born out of wedlock is deemed to have been legitimate from birth once its natural parents have intermarried. The *Vital Statistics Act* provides that under such circumstances a new registration may be substituted for the registration originally filed, the new registration showing the child to be legitimate. However, satisfactory evidence of paternity must be first provided.

There were 175 births legitimated in 1975, compared with 249 in 1974.

Alteration to given names—Under section 8 of the *Vital Statistics Act,* a change made in a child's given name before the age of 12 years may be entered on the birth registration by means of a notation.

Alterations of given names in 1974 numbered 247, as compared with the 1974 figure of 282.

Delayed registrations of birth—Special provision is made in the *Vital Statistics Act* for registration of a birth more than one year after the event. There were 375 delayed registrations of births processed during 1975, compared with 410 in 1974.

Fraudulent and improper registrations—The *Vital Statistics Act* makes provision for the cancellation of a registration of birth which has been fraudulently or improperly obtained.

Registrations cancelled numbered 52 in 1975, as compared with 78 in 1974. The majority of these arose from use of a false name on the original registration.

Registration of Deaths

The physician in attendance at the last illness of a deceased person, or the Coroner conducting an inquiry into the death of a person, is required to complete the Medical Certificate of Cause of Death, which forms an important part of the death registration. The responsibility for filing the completed death registration lies with the undertaker in charge of the burial, and the registration must be filed before the necessary burial permit is issued.

Classification of deaths for statistical purposes is made according to the International Statistical Classification of Diseases, Injuries, and Causes of Death, and this classification is based upon the physician's certification. Where there is doubt as to the cause to which the physician wishes the death assigned, he is queried through the local Medical Health Officer.

As indicated in the Introduction, the Eighth Revision of the International Classification of Diseases was adopted by this Province in 1969, in common with the other provinces of Canada and a number of other countries.

As a means of improving cause of death certification, lectures are given each year to the graduating class of medical students at the University of British Columbia on this topic.

Registration of Stillbirths

The term "birth" where used in the *Vital Statistics Act* includes stillbirths, but separate forms are used for stillbirth registration. These forms combine the essential features of both birth and death registrations. In the revised *Vital Statistics Act* of 1962, the definition of a stillbirth reads as follows: "The complete expulsion or

extraction from its mother, *after at least twenty weeks' pregnancy*, of a product of conception in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle."

There were 417 stillbirths registrations filed in 1975.

Registration of Marriages

The responsibility for registering a marriage rests with the person solemnizing the event, namely, the officiating clergyman or Marriage Commissioner.

Marriage registers are provided free of charge to clergymen and Marriage Commissioners. These are returned to the Division periodically in order that they may be checked against the indexes of registrations filed with the Division. If it is thus ascertained that an event has been unrecorded, steps are promptly taken to obtain a registration.

Registration of Adoption Orders

Copies of all adoption orders made by the Courts in this Province are forwarded to this Division by the Court Registrars, as required by the *Vital Statistics Act*.

On receipt of an order regarding an adoption by the Division, a marginal notation showing the child's adoptive name is made on the original registration. All certificates subsequently issued in respect of the registration bear this name. No information regarding the natural parents of the child may be released. This same procedure is followed when an adoption order is received from another province or state relating to the adoption of a child born in British Columbia.

- Inspection of the documents filed regarding an adoption is only allowed to officials of the Crown in discharge of their official duties, or to a person authorized by the Provincial Secretary in writing, or to a person authorized by a Judge of the Court presiding in Chambers. Thus every effort is made to protect the interest of the adopted child and his adoptive parents.

Adoption orders filed with the Division in 1975 numbered 1,637, as compared with 1,704 in 1974.

Registration of Divorces

The *Vital Statistics Act* also requires that all divorces and nullities granted in the Province be registered with the Division. The Division is supplied with a certified copy of each decree of dissolution or nullity by the Supreme Court Registrars.

There were 7,247 dissolutions of marriage and 2 nullities registered by this Division in 1975. The comparable figures for 1974 were 6,323 dissolutions and 5 nullities.

Administration of the Change of Name Act

The *Change of Name Act* provides a means whereby persons may change either their given names of their surnames and the names of their minor children upon meeting certain requirements set forth in the Act. The Act expressly forbids changes of name which are not made in accordance with its provisions, but exempts changes of name resulting from marriage, adoption, or legitimation, or changes in the given name of a child made under the *Vital Statistics Act* and prior to the child's 12th birthday. An amendment passed in March 1972 extended the scope of the Act by removing certain limitations upon changing the names of children, and provided that birth and marriage certificates issued after a legal change of name should not reveal the person's original name, as previously required.

During 1975, 1,900 change of name applications were granted, compared with 1,715 in the previous year. This increase reflects the continuing effects of the March 1972 amendment to the *Change of Name Act,* and the reduction of the age of majority in 1970. Many of these applications covered several members in a single family, so that in total 2,374 individuals were affected. Thirty per cent of the applications were made by married men, while an additional 28 per cent were made by divorced women, 17 per cent by single men, and 13 per cent by single women.

TABLE 6—CHANGE OF NAME APPLICATIONS GRANTED, BY MARITAL STATUS AND SEX OF APPLICANT, AND TOTAL NUMBER OF PERSONS AFFECTED, BRITISH COLUMBIA, 1941–75

[2] Includes four cases for which marital status was not stated, three male and one female.
[3] Includes one case for which marital status was not stated.

Administration of the Marriage Act

The *Marriage Act* prescribes the legal requirements which must be observed in connection with the solemnizing of marriage, the legal qualifications of individuals to marry, and the authorization of ministers and clergymen and of Marriage Commissioners to perform the marriage ceremony. Under this Act the Division of Vital Statistics is required to license ministers and clergymen of established religious denominations who desire the authority to solemnize marriage. It is also the responsibility of the Division to recommend for appointment Issuers of Marriage

Licences throughout the Province and to supervise their work. The actual registration of marriages solemnized and the issuance of marriage certificates are governed by the *Vital Statistics Act*.

On December 31, 1975, there were 2,726 ministers and clergymen authorized to solemnize marriage. During the year, 373 resident clergymen and ministers were licensed, while 240 licences for those residing in the Province were cancelled due to transfer out of the Province or due to death. In addition, 97 temporary licences were issued to nonresident ministers and clergymen who were ministering in the Province for brief periods only, and 98 such licences were cancelled.

Twenty orders of remarriage were issued under the *Marriage Act* in 1975.

Registry of Wills Notice

The Registry of Wills Notice maintained by this Division under the *Wills Act* makes it possible for a testator to file with this Division a notice stating that he has executed a will, and indicating where the will is deposited. The filing of a wills notice is not mandatory, but provides a convenient means of ensuring that information which will lead to the discovery of the will should be readily available after death. Adequate identifying information respecting the testator, such as date and place of birth, must be included in the wills notice.

In 1946, the first complete year in which notices were filed, there were only 441 notices received. The figures for the last six years show the increasing use of the service by the public. They are as follows: 1970, 17,682; 1971, 19,295; 1972, 23,525; 1973, 27,223; 1974, 34,570, and 1975, 37,295. Wills notice certifications numbered 12,531 in 1975, compared to 12,609 in 1974.

Microfilm and Photographic Services

All registrations of births, deaths, marriages, and stillbirths, together with delayed registrations and amended registrations, are microfilmed weekly. The film is forwarded under contract to Statistics Canada, where it is processed and positive rolls printed for their own use, after which the negative rolls are returned to this Division. The positive rolls are used by Statistics Canada in the compilation of national vital statistics and the national indexes of births, deaths, and marriages.

In addition, the following documents are filmed on a continuing basis: Physician's Notices of Birth, wills notices, adoption notices, change of name files, and various supplementary records which the Division is required to file under *Vital Statistics Act*.

Extensive use is also made of the microfilm and photographic unit to provide photoprints of vital statistics registrations and other documents in connection with the administration of the Acts. In 1974, 37,464 photographic and copy machine prints were issued free of charge to government agencies, including a small number required for use by this office. In addition, 10,927 photographic prints were issued as certified copies at a charge of $2 per copy, as prescribed in the *Vital Statistics Act*.

BIOSTATISTICAL SERVICES

The Division's Research Section, in collaboration with the Mechanical Tabulation Section, compiles vital statistics from the registrations of births, deaths, marriages, stillbirths, adoptions, and divorces. Certain of these statistics appear in the Annual Report of Vital Statistics. In addition, the Division provides a comprehensive central statistical service to other Divisions of Public Health Programs, to Mental Health Programs, and to certain voluntary agencies subsidized by the Government.

Various recent developments within the Department have stimulated the initiation of new research projects, with a resulting increased demand on the Division's Research staff in Victoria and Vancouver.

The Division's main statistical activities during 1975 are outlined below in terms of subject-matter.

Health Surveillance Registry

The Health Surveillance Registry (previously the Registry for Handicapped Children and Adults) accepted about 3,000 new cases during 1975. The Department of Human Resources co-operated with the Registry in instituting a program

for registering handicapped adults in receipt of the Handicapped Persons Income Allowance. From this source approximately 2,800 adult registerable cases were ascertained and are being processed. A continuing procedure for the reporting of similar cases is being worked out with the Department of Human Resources.

Over 2,000 cases, ascertained from birth, stillbirth, and death registrations, hospital separation forms, and other sources were added to the file of congenital anomalies.

The Registry makes extensive use of consultants who are experts in the fiields of genetics, pædiatrics, and cancer. In addition to direct assistance in the day-to-day operation of the Registry these consultants were active in international conferences and workshops related to the work of the Registry.

The Cancer Register is a specialized entity within the framework of the Health Surveillance Registry. Further success was achieved during the year in securing the co-operation of pathologists throughout the Province in submitting pathological reports to the Cancer Register.

Cancer Control

The Division assisted the Central Cytology Laboratory of the Cancer Control Agency in the analysis of data derived from about 440,000 cervical smears taken from women screened for cervical cancer. As from January 1975 the responsibility for mechanical processing of these records was assumed by the Computing and Consulting Services Branch of the Department of Transport and Communications, thereby terminating the service rendered by this Division since 1956. The Division, however, continues to undertake the analysis and interpretation of the annual data, and general statistical consultation.

Registry staff continued to work closely with the Cancer Control Agency of British Columbia (previously the B.C. Cancer Institute) and to process the records of the agency relating to malignancies at the treatment facility in Vancouver.

Dental Health

Statistical consultative advice and data processing services were provided to the Division of Dental Health Services. Assistance was also given in the development of a new recording form and revised methodology for the continuing series of dental field surveys. The new form is designed to provide more comprehensive information on the levels of caries experience and restorative or corrective treatment.

Infant Morbidity and Mortality

The Division participated actively in the work of the Perinatal Program Committee of the B.C. Medical Association, which was formed in 1974. One Research Officer has served as a member of the committee since its inception, and another was appointed as a statistical consultant during 1975. A number of special tabulations relating to maternal and child health in this Province were prepared for the use of the Program Committee.

The Division continued to co-operate with the Child and Maternal Health Division of the Department of National Health and Welfare in the maintenance of a national congenital anomalies surveillance program. Lists of anomalies ascertained from physicians' notices of births were submitted to Ottawa throughout the year, and assistance was given in the critical examination of the resulting data.

Metric Conversion Committee

A Research Officer of the Division continued to represent Community Health Programs on the interdepartmental Metric Committee. He assisted in the work of subcommittees on training and cost analysis, and in developing a program of basic education for all Health Department employees in the essentials of the metric system.

Tuberculosis Control

The services rendered to the Division of Tuberculosis Control for many years entered a new phase in 1975 with the computerization of the Division's punch card records. Assistance was given to a physician attached to that Division, in the statistical evaluation of all newly diagnosed cases of tuberculosis from 1950 to date.

Mental Health

The Research Section co-operated with the statistician attached to Mental Health Programs in the processing of statistics relating to patients of residential institutions and those treated at day care centres. Arrangements were made for transferring to the Department of Human Resources the main responsibility for processing statistics relating to three institutions for the retarded, which were transferred during the year to that department's jurisdiction from the Health Department.

Community Care Facilities

Services were given to the Community Care Facilities Licensing Board in maintaining statistics of the operation of personal care homes and day care centres for children. The transfer of the punch card files of these records to computer tape has facilitated prompt response to the requirements of the Board for up-to-date information.

Public Health Nursing

The patient records relating to the expanding Special Home Care Projects were processed, and summary data supplied to the Division of Public Health Nursing. Assistance was given to a Public Health Nursing Consultant in preparing a report, based on a study completed in 1974, on the effectiveness of the physician/public health nursing liaison program.

Record Linkage

In collaboration with the Medical Genetics Department of the University of British Columbia, the Division initiated a computerized record linkage program based upon the pioneer work of Dr. H. B. Newcombe at the Chalk River Nuclear Laboratories of Atomic Energy of Canada Limited. The project involves the linking of British Columbia vital and health records into individual and family histories. By this means a wide variety of health-related studies, otherwise impracticable, can be made possible, while the confidentiality of individual records is rigidly maintained. The project is under the immediate direction of a geneticist who previously worked with Dr. Newcombe on the Chalk River project.

Behavioural Studies

A new aspect of the Division's work assumed importance in 1975, namely, the provision of consulting services in relation to behavioural studies. Notable examples were a design of questionnaires to measure behavioural changes in children resulting from a program of Parent Study Groups in the Courtenay area; and a study undertaken by the REACH agency, which involved the assessment of a tape presentation designed to allay concern among the elderly about hospital admission.

Computerization

Substantial progress was made in 1975 in the computerization of the Division's data processing system, with a view to replacing the existing outdated unit record equipment by a computer terminal connected to the central installation of the Computing and Consulting Services Branch, Department of Transport and Communications. Because of the number and variety of the statistical series to be converted, the process will take another year or two to complete, depending on the availability of technical staff.

Vital Statistics

Statistics derived from the vital statistics registration system were compiled in collaboration with Statistics Canada. A substantial part of the resulting tabulations appears in the relevant Annual Report of Vital Statistics, while some unpublished data are available on request.

Other Services

The Division's Research Section maintained statistical services to the Divisions of Epidemiology, Venereal Disease Control, Environmental Engineering, Public Health Inspection, Speech and Hearing, and to the consultant in Public Health Nutrition, in the editing and processing of records, and in statistical consultation.

PART II—TREND TABLES WITH RATES
(By Place of Residence)

PROMINENT FEATURES

The population of British Columbia in 1975 was estimated at 2,457,000, up 62,000 from the previous year.

While births increased in number in the Province from 1974 to 1975, the population growth kept pace so that the *crude birth rate* was substantially unchanged from the previous year's figure of 14.8 per 1,000 population. There was an even greater increase in the number of *illegitimate births* in 1975 than had been the case the previous year and the proportion of total births these represented reflected this, being 12.7 compared to 12.0 in 1974. Illegitimate births as a proportion of all births for Registered Indians declined slightly in 1975, the first time since 1966.

Marriages were at an all-time high this year, but the increase over the 1974 figure was only 90 and the *crude marriage rate* declined from 9.1 per 1,000 population to 8.9. This was the lowest rate recorded since 1969 but it was still well above the rates of the late 1950's and early 1960's.

The number of deaths in the Province this year was almost the same as in 1974, the *crude death rate* being down from 8.1 per 1,000 population to a record low of 7.8.

Mortality from *diseases of the heart,* the leading cause of death, showed a decline this year and the rate per 100,000 population was down from 263.7 in 1974 to a low of 251.3 in 1975. *Cancer,* the second leading cause of death, recorded somewhat higher mortality in 1975 and the rate increased from 155.1 in 1974 to 156.2 in 1975.

For two years *cerebro-vascular diseases* have been the fourth leading cause of death but in 1975 they resumed their position as third leading cause. The rate of deaths from these diseases was 82.7 in 1974, dropping to 81.3 in 1975.

As has been the case for some years prior to 1973, *accidents* were the fourth leading cause of death in 1975, an improvement from their position in 1973 and 1974. There was a considerable decline in the rate from the figure of 83.3 recorded in 1974 to 75.9 in 1975.

The *suicide rate* was lower again this year, having been 18.5 in 1973, 17.0 in 1974, and 16.8 in 1975.

Deaths from *certain causes of perinatal mortality* continue to decline as they have done for some years and the rate was down from 11.5 in 1974 to 9.6 in 1975.

Infant mortality in general declined during 1975 and the rate per 1,000 live births was recorded as 14.4, a record low.

Divorces continue to increase in number as they have for the last few years and the Division received a record 7,249 divorce court orders during 1975. The largest part of these, 31 per cent, related to marriages of five to nine years' duration, with another 20 per cent being under five years.

There is a downward trend for *adoptions* and these numbered only 1,637 in 1975. While the proportion of adoptions which involved legitimate offspring has increased over the years, as has the proportion for which status of the child is not known, a declining proportion are being shown as illegitimate. To some extent the increase in adoptions for which legitimacy status is not known relates to the increasing number of adoptions in the Province where the child is born out of the Province.

As noted in previous years, population-based rates for years following the last census are subject to revision following the next census.

LONG-TERM TRENDS OF POPULATION AND VITAL EVENTS

TABLE 9—POPULATION BY SEX AND AGE-GROUP, BRITISH COLUMBIA, 1901–75

Year		Total	Age-group (Years)

1 Code numbers according to the Seventh Revision, International Classification of Diseases, for years 1966–68.

2 Code numbers according to the Eighth Revision, International Classification of Diseases, for years 1969–75.

3 Under the Eighth Revision, "arteriosclerotic heart disease with hypertension" (code number 412.1), is included with "heart disease," but under the Seventh Revision it is considered "hypertension" (code number 444).

NOTE—Cause of death adjustments resulting from medical coder's queries are not reflected in this table. *See* Introduction.

DEATHS FROM ACCIDENTS AND VIOLENCE

In order to obtain as much information as possible regarding deaths from accidents and violence, a dual coding is used. These deaths are classified according to the *external cause* and also according to the *nature of the injury*. Statistics showing both types of classification are presented in the detailed tables of Part III of this Report.

TABLE 27—RATES OF DEATH FROM ACCIDENTS AND VIOLENCE, BY EXTERNAL CAUSE, BRITISH COLUMBIA, 1971–75

(Rates per 100,000 population)

Eighth Revision, Intermed. Int. List No.	External Cause of Death	1971		1972		1973		1974		1975	
		No.	Rate	No.	Rate	No.	Rate	No.	Rate	No.	Rate
AE138	Motor-vehicle accident	622	28.5	697	31.0	806	34.8	870	36.3	770	31.3

TABLE 58—DEATHS FROM ACCIDENTS AND VIOLENCE, BY NATURE OF INJURY, EXTERNAL CAUSE, AND SEX, BRITISH COLUMBIA, 1975

Detailed Int. List No. (Ext. Cause)	Nature of Injury and External Cause	Total	Male	Female
	Fracture of skull (N800–N804)	397	301	96
E810–E823	Motor-vehicle accident	243	182	61
E800–E807, E825–E845	Other transport accident	14	11	3
E880–E887	Accidental fall	62	47	15
E900–E949	Other accident	31	27	4
E950–E959	Suicide	27	21	6
E960–E978	Homicide	17	10	7
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	3	3	—
	Fracture of spine and trunk (N805–N809)	95	63	32
E810–E823	Motor-vehicle accident	54	34	20
E800–E807, E825–E845	Other transport accident	4	4	—
E880–E887	Accidental fall	28	17	11
E900–E949	Other accident	7	7	—
E950–E959	Suicide	1	1	—
E960–E978	Homicide	1	—	1
	Fracture of limbs (N810–N829)	184	77	107
E810–E823	Motor-vehicle accident	11	4	7
E800–E807, E825–E845	Other transport accident	8	5	3
E880–E887	Accidental fall	161	65	96
E900–E949	Other accident	4	3	1
	Dislocation, without fracture (N830–N839)	5	4	1
E810–E823	Motor-vehicle accident	3	3	—
E880–E887	Accidental fall	1	1	—
E900–E949	Other accident	1	—	1
	Sprains and strains of joints and adjacent muscles (N840–N848)	1	1	—
E880–E887	Accidental fall	1	1	—
	Intracranial injury (excluding skull fracture) (N850–N854)	302	236	66
E810–E823	Motor-vehicle accident	84	57	27
E800–E807, E825–E845	Other transport accident	9	6	3
E880–E887	Accidental fall	50	37	13
E900–E949	Other accident	13	11	2
E950–E959	Suicide	126	114	12
E960–E978	Homicide	16	8	8
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	4	3	1
	Internal injury of chest, abdomen, and pelvis (N860–N869)	468	363	105
E810–E823	Motor-vehicle accident	295	221	74
E800–E807, E825–E845	Other transport accident	19	16	3
E880–E887	Accidental fall	15	12	3
E900–E949	Other accident	43	41	2
E950–E959	Suicide	49	41	8
E960–E978	Homicide	42	28	14
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	4	3	1
E990–E999	Injury resulting from operations of war	1	1	—
	Laceration and open wound (N870–N908)	39	26	13
E810–E823	Motor-vehicle accident	4	2	2
E800–E807, E825–E845	Other transport accident	2	2	—
E880–E887	Accidental fall	1	1	—
E900–E949	Other accident	7	5	2
E950–E959	Suicide	16	9	7
E960–E978	Homicide	8	6	2
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	1	1	—
	Superficial injury, contusion, and crushing with intact skin surface (N910–N929)	3	1	2
E880–E887	Accidental fall	3	1	2
	Foreign body, entering through orifice (N930–N939)	36	23	13
E900–E949	Other accident	36	23	13

NOTE—Cause of death adjustments resulting from medical coder's queries are not reflected in this table. *See* Introduction.

TABLE 58—DEATHS FROM ACCIDENTS AND VIOLENCE, BY NATURE OF INJURY, EXTERNAL CAUSE, AND SEX, BRITISH COLUMBIA, 1975—*Continued*

Detailed Int. List No. (Ext. Cause)	Nature of Injury and External Cause	Total	Male	Female
	Burns (N940–N949)	85	57	28
E810–E823	Motor-vehicle accident	22	15	7
E800–E807, E825–E845	Other transport accident	8	7	1
E890–E899	Accident caused by fire	41	24	17
E900–E949	Other accident	4	3	1
E950–E959	Suicide	4	4	—
E960–E978	Homicide	6	4	2
	Adverse effects of chemical substance (N960–N989)	453	262	191
E810–E823	Motor-vehicle accident	2	2	—
E800–E807, E825–E845	Other transport accident	4	4	—
E850–E877	Accidental poisoning	228	136	92
E890–E899	Accident caused by fire	68	43	25
E900–E949	Other accident	1	—	1
E950–E959	Suicide	103	48	55
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	47	29	18
	All other and unspecified effects of external causes (N950–N959, N990–N999)	384	290	94
E810–E823	Motor-vehicle accident	52	41	11
E800–E807, E825–E845	Other transport accident	65	60	5
E880–E887	Accidental fall	2	—	2
E900–E949	Other accident	153	117	36
E950–E959	Suicide	86	57	29
E960–E969	Homicide	11	4	7
E980–E989	Injury, undetermined whether accidentally or purposely inflicted	15	11	4
	Total accidents and violent deaths	2,452	1,704	748

NOTE—Cause of death adjustments resulting from medical coder's queries are not reflected in this table. *See* Introduction.

TABLE 59—NONTRANSPORT ACCIDENTAL DEATHS BY PLACE OF OCCURRENCE, EXTERNAL CAUSE, AND SEX, BRITISH COLUMBIA, 1975

Detailed Int. List No.	External Cause of Death	Place of Occurrence																Total
