MINISTRY OF EDUCATION

of the Province of British Columbia

One Hundred and Seventh Annual Report
JULY 1, 1977, TO JUNE 30, 1978

Minister of Education
Province of British Columbia

To the Honourable Henry Bell-Irving
Lieutenant-Governor for
the Province of British Columbia

May it please Your Honour:

I beg respectfully to present the One Hundred and Seventh Report of the Ministry of Education.

Dr. Patrick L. McGeer
Minister of Education,
Science and Technology

PERSONNEL

MINISTER'S OFFICE

Minister of Education
The Honourable Patrick L. McGeer
B.A., Ph. D., M.D.

DEPUTY MINISTER'S OFFICE

Deputy Minister of Education
W.G. Hardwick, B.A., M.A. Ph. D.

Assistant Deputy Minister - Schools Department
R.J.Carter, B.A., M. Ed.

Assistant Deputy Minister - Post Secondary Department
A.E. Soles, B.A., M. Ed.

Assistant Deputy Minister - Department of Ministry Services
J.R. Fleming, B.A.

Educational Policy Development
J. Walsh, B. Sc., M. Ed.

SCHOOLS DEPARTMENT

Division of Public Instruction

Senior Superintendent of Public Instruction
J.R. Meredith, B.A., M. Ed.

Assistant Superintendent, Educational Programs
B.G. Webber, B.A., M.A.

Director, Curriculum Development
W.B. Naylor, B.A., M. Ed.

Assistant Director, Curriculum Development
W.D. Oliver, B.A.

Director, Learning Assessment
J.J. Mussio, B. Sc., M.A., Ph. D.

Co-ordinator, Learning Assessment
R.N. Greer, B.A., M.A., Ed. D.

Assistant Director, Examinations
H.C.D. Chalmers, C.D., B. Sc., Ph. C.

Co-ordinator, Industrial Education
J.Jupp

Home Economics Advisors
J. Campbell, B. Sc., M.A., Dip. Ed.
H. Krueger, B. Sc.

Co-ordinator, French Language Programs
C. Fournier, B.A.

Assistant Superintendent, Special Programs
F.L. Fleming, B. Ed., M. Ed.

Director, Special Education
J.A.G. Gittins, B. Ed., M. Ed., Ph. D.

Co-ordinator, Hearing-Impaired
J.L. Anderson, B. Ed., B.A., M.A.

Co-ordinator, Visually-Impaired
D.M. Corrigan, Dip. Teaching, M. Ed.

Principal, Jericho Hill School for the Deaf
H. Minto, B. Ed., M. Ed.

Director, Indian Education
S.E. Arbess, B.A., M. Ed., M.A., Ph. D.

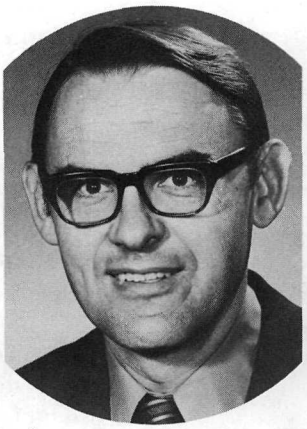
A.J. Middleton, Stockman, Post-Secondary, 10 years.

Deceased

F.B. Simpson, Senior Architect - Schools Facilities Services

R.S. Boyle, District Superintendent

FROM THE MINISTER



Honourable Patrick L. McGeer

The Ministry of Education is a challenging portfolio at any time but perhaps never more so than during the past three years. A triad of factors has been in operation at the elementary and secondary levels which has forced a re-examination of the most fundamental approaches to education all over the continent. The first is disturbing evidence, based on standard achievement tests, of slipping academic achievement in many jurisdictions of North America. The second is declining enrolment, which has made it impossible to use growth as a means for incorporating educational enrichment. The third is an escalation in per-pupil costs exceeding the general growth in the economy.

It is against this background that reforms have been undertaken by the Ministry of Education.

In 1977/78, we implemented a core curriculum throughout British Columbia, providing assurance that every elementary and secondary student would be offered a strong program in all fundamental subject areas. Our learning assessment program, designed to monitor performance in the system, is in its second full year. Three grade levels have been assessed across the province in mathematics, reading and social studies. Already, weaknesses in curricula have been identified and early corrective action taken in some school districts.

In February of 1978, I asked all schools and all school districts to report to me on their assessment of individual students and their promotion policies. It was readily apparent from the diversity of policies being pursued from district to district, and from school to school within districts, that strong direction was required and so standard practices are now being developed by the ministry. Echoing the ministry's concern from comparative analysis of student achievement, mathematics teachers requested the utilization of common examinations across B.C. to help the class teacher evaluate his or her pupils. The first test, in algebra, was developed and will be in use in the fall of 1979, with others to follow.

To provide fully for children speaking Canada's other official language, a core curriculum in French was developed and a full range of learning materials identified. *Le programme-cadre de Francais* will be

available in the elementary schools throughout the province in September of 1979 wherever demand warrants.

A second major departure for British Columbia—one designed to recognize and strengthen the educational value of an alternative to the public school system—was the approval by the legislature in September of the province's *Independent Schools Support Act.* Soon thereafter an inspector of independent schools was travelling the province, reviewing programs, standards and facilities.

With a ministry budget of nearly $1 billion (for the 1977/78 fiscal year), education in British Columbia is an enormous and complex undertaking. Since per-pupil costs have been permitted to escalate at 11 per cent and 18.7 per cent over the past two years, modernization of the management system is essential. This must be a co-operative venture with close liaison between the ministry, school districts and the teaching profession.

The Deputy Minister's Advisory Committee, which brings in both the B.C. Teachers' Federation and the B.C. School Trustees Association, is one vehicle. Another is the Joint Educational Management Project (JEM), which is designed to provide information sharing and management assistance for various combinations of users within the education system. The ministry has also established a major facility in Richmond, headed by an assistant deputy minister, which is designed to provide easier access to the ministry for the heavily populated Lower Mainland area.

While the emphasis in the elementary and secondary system has been directed primarily at upgrading academic standards while at the same time controlling runaway costs, the emphasis in the post-secondary system has been to close fundamental program gaps. Youth unemployment remains a major economic and social problem of our times and the full power of education must be used to expand programs that are designed to provide marketable skills.

The key piece of legislation enacted to reach this objective was the *Colleges and Provincial Institutes Act.* For the first time, specific legislation was provided for post-secondary institutions in addition to universities.

Initial proclamation of sections of the act led to early establishment of three councils (modelled upon the Universities Council of B.C.) to guide the management of these institutions and advise the ministry—the Academic Council, the Occupational Training Council and the Management Advisory Council. Five new provincial institutes were created to take their places beside the British Columbia Institute of Technology in providing specialized and technical education to the province as a whole. The first of these was the Pacific Vocational Institute, with major campuses in Burnaby and Maple Ridge. Thereafter came the Emily Carr College of Art (created from the Vancouver School of Art), the Pacific Marine Training Institute (developed from the Marine Training Centre based at Vancouver Community College) and the Justice Institute of B.C.—a unique concept and a major initiative in unified courts personnel and police training.

The fifth provincial institute is the centerpiece of a major new educational thrust. The Open Learning Institute will deliver academic, career and technical programs as well as adult basic education to British Columbians no matter where they live, how long they have been out of school or what their previous background. The OLI will make

appropriate use of such delivery systems as the mails, telephone, radio, video and audio cassettes, cable television and perhaps even satellites. It is expected that the institute will be able to offer courses by September, 1979.

A forerunner was an eight-week satellite project in the latter part of 1977. Launched by the ministry's distance education planning group, this systems experiment utilized Canada's Hermes communications satellite to bounce a television signal from the Burnaby studios of the Provincial Educational Media Centre to seminar rooms and home viewers in five dispersed B.C. centres, including a logging camp.

The other institutions covered under the new legislation are British Columbia's 14 regional colleges. After proclamation of required sections, these colleges will be established as corporate entities for the first time, with college boards and authority to hold property and assets in their own names.

With knowledge, initiative and skill, British Columbia can prove the richness of its economic and human resources and can anticipate a future where all young British Columbians will have a fulfilling career within their own province. Education will help meet this objective. That is why we have called upon pupils and educators alike to strive toward each individual's maximum potential and not to be held back by the fear of failure. That is why we have insisted upon a strong foundation of basic learning and the universal availability of programs to provide marketable and entrepreneurial skills. That is why the Open Learning Institute has been created—because opportunity must always be available to British Columbians, regardless of their age, financial circumstances or previous educational experience.

In keeping with our philosophy, the first steps were taken to expand the Ministry of Education to include science and technology. In June, the legislature gave approval to the *Science Council Act,* establishing a Science Council in B.C. and a Science Research Secretariat. The aim of these bodies is to advise government on opportunities for the future. Industrial Post-Doctoral Fellowships and Graduate Research Engineering and Technology (GREAT) Awards are now being offered to young British Columbians to prepare themselves for entry into this new industrial realm.

In 1977/78 I was sorry to lose the services of several outstanding officials in the Ministry of Education, but pleased to gain or re-assign several others of similar ability. Among the losses, I might mention Frances Fleming, who retired as assistant superintendent for special programs; J. Ross Hind, who retired as director after making the correspondence branch a national model, and Fred Simpson, senior architect—schools, in facilities services, who died prematurely. Also, Joe Phillipson, a former deputy minister, retired as associate deputy minister, schools, but honoured my plea to become the first inspector of independent schools. R. James Carter, the man most recently responsible for major policy developments, stepped into Mr. Phillipson's shoes as ADM.

SCHOOLS DEPARTMENT

The schools department of the Ministry of Education is reponsible for the overall direction and administration of the public school system under terms of the *Public Schools Act*. The department works closely with the province's 75 locally-elected boards of school trustees, to which the act and its regulations assign many specific functions and responsibilities with respect to the delivery of educational programs to some 523,000 pupils in more than 1,600 schools.

The schools department in 1977/78 comprised three divisions—public instruction, administrative services and field personnel—and was directed by a policy and planning committee. Chaired by the assistant deputy minister—schools, the committee also included superintendents in charge of these three divisions as well as the office of educational policy development.

DIVISION OF PUBLIC INSTRUCTION

School Programs

In January, 1978, the division of public instruction replaced the former division of educational programs—schools, and was given responsibility for the implementation as well as the development of school programs. Its operating branches include curriculum development, learning assessment, examinations, special programs and consultative and educational support services.

The change in name and function of the division stressed the need for co-ordination of all school programs under a single senior superintendent so that they could be managed as a coherent whole. It also improved the administrative efficiency of the ministry.

Special features of the work of the division during the 1977/78 school year included the initiation of an elementary school accreditation program, the development of a French language core curriculum, and the extension of the learning assessment program to cover the provincially-prescribed science and social studies programs.

In addition, the consultative services' industrial education team became involved in new vocational projects which improved articulation between secondary school, college and employment. Educational support services special programs branch extended the policy of providing programs as close as possible to their homes for children with special needs.

In the school accrediation program for 1977/78, 10 secondary schools were evaluated by ministry-appointed external evaluation teams. Six schools received full accreditation status, and the other four received partial accreditation. During the same period, 30 other secondary

schools were examined by locally-appointed external teams which reported their conclusions to the provincial accreditation committee. All schools involved in the process later received detailed reports, from both the external evaluators and the provincial accreditation teams, which contained confirmation of good work and appropriate recommendations for improvement.

The elementary school self-assessment program was piloted in 35 elementary schools during the year and as a consequence an instructional booklet on the subject will be available early in the 1978/79 school year.

Curriculum Development

A major project of the curriculum development branch was the development of a core curriculum in French *(le programme-cadre de Français).* This venture, which is in addition to the French-as-a-second-language program, provided a complete elementary school curriculum with French as the language of instruction. Curriculum guides were prepared and support materials identified. The actual task of developing the program was a joint effort by British Columbia educators and a team from the Baldwin-Cartier school district of Point Claire, Quebec. The program will be available from September 1979 in school districts where a sufficient number of parents indicate that they want their children to be educated in French. A minimum of 10 pupils who know French well enough to receive instruction in the language is required to form a class.

The curriculum development branch was also involved in the bi-centennial of Captain Cook's explorations of the B.C. coast. Under contract to the ministry, a publisher prepared a teaching kit, *Captain James Cook and the Nootka,* designed specifically for use with the prescribed curriculum. The kit was developed as a permanent addition to schools' instructional resources.

Revised programs in elementary school science and chemistry 11 were introduced, as were four courses in the new business education program. For the first time a course in drama at the grade 8 level was implemented. Course development and revision work is a continuous process and was carried on during the year in a number of other secondary and elementary subject areas.

Learning Assessment

Province-wide assessments in mathematics, reading and social studies were completed during the 1977/78 school year. Assessment reports dealing with science and written expression will be issued in the fall of 1978 and an assessment of physical education will be completed in 1979.

In addition to publishing results of provincial assessments, the assessment branch, through the British Columbia Research Council, issued overall summaries of student achievement for each district in the province. School districts were expected to involve teachers and members of the public in reviewing the assessment results.

The assessment program is designed to survey and assess the

effectiveness of major programs, and overall pupil accomplishment, in selected areas of the curriculum. The main principle underlying the program is that decisions on ways to improve the education system should be based on reliable data about the effectiveness of existing programs.

The 1977 mathematics assessment concluded that basic arithmetic skills of students in British Columbia schools are generally satisfactory but greater attention is required to teaching the application of those skills to consumer-related problems.

The study found overall grade 12 problem-solving results disappointing. Students who had taken a full 12 years of mathematics did well on all portions of the basic skills test, but the 15 per cent who had taken only the minimum requirements of 10 years of mathematics generally performed poorly.

Some trends emerged from the mathematics assessment and the report urged that they be studied further.

- On the grade 4 test, children born between January and March outperformed those born in the latter part of the year. The student's age when he starts school, therefore, may be one of the factors contributing to the range of individual differences confronting teachers at the primary level.
- In grades 8 and 12, students born outside Canada, and for whom English is not a first language, achieved higher scores than Canadian-born students for whom English is the first language. The reverse was true at the grade 4 level.
- A disproportionate number of female students are not enrolling in high level mathematics courses in secondary schools.

The reading assessment revealed that grades 8 and 12 students had satisfactory skills in vocabulary and in understanding passages from school textbooks. However, their ability to handle out-of-school reading—for example, scanning newspaper items for details or understanding misleading advertising—was in need of improvement. The assessment report suggested that this finding could probably be linked to a lack of emphasis on the teaching of these skills in the secondary school program.

Although educators and the public alike agree on the importance of developing reading skills among all students, the report said, comprehensive and systematic reading programs were being offered in only a minority of B.C. secondary schools.

Calls for an extensive revision of social studies programs and for expanded professional development activities for teachers were the chief findings of the social studies assessment report.

The report stated that the majority of educators and members of the public who were surveyed agreed that, in addition to acquiring factual information about the past and present, students should develop an understanding of the complexity of major social issues.

By the end of the school year, most school districts had provided the ministry with their interpretations of their assessment results, and their recommendations for change. Introduction of teacher in-service programs, development of school diagnostic testing services and reorganization of secondary reading programs are examples of the kinds of activities planned.

On the basis of suggestions received from a variety of districts, the assessment branch began the development of achievement tests which are designed to measure individual pupil achievement. They are intended as a resource for use by classroom teachers.

The first test was in mathematics. An algebra 12 test project, initiated by the B.C. Association of Mathematics Teachers, was prepared by the Educational Research Institute of B.C. and was to be available in October, 1978.

Examinations

The examinations branch is responsible for the administration of the grade 12 scholarship program, the general educational development (GED) testing program, the issuance of transcripts of secondary school records between 1890 and 1973, and the evaluation of secondary school education taken elsewhere in terms of British Columbia equivalency.

Grade 12 scholarship examinations are administered in January and June of each year. In 1978 a total of 4,178 candidates applied to write the examinations. Of those, 3,218 completed one or more subjects and 1,079 won scholarships of $500 each. The number of winners was 20 per cent greater than in 1977.

Of significant interest in January was the notably improved success of students writing English composition; 82 per cent of the 3,036 students writing the examination achieved an acceptable passing standard, compared to 78 per cent in January, 1977.

In the general educational development program, 5,470 candidates applied to write the battery of five standardized tests and 3,388 were granted the British Columbia Ministry of Education grade 12 equivalency certificate.

Consultative Services

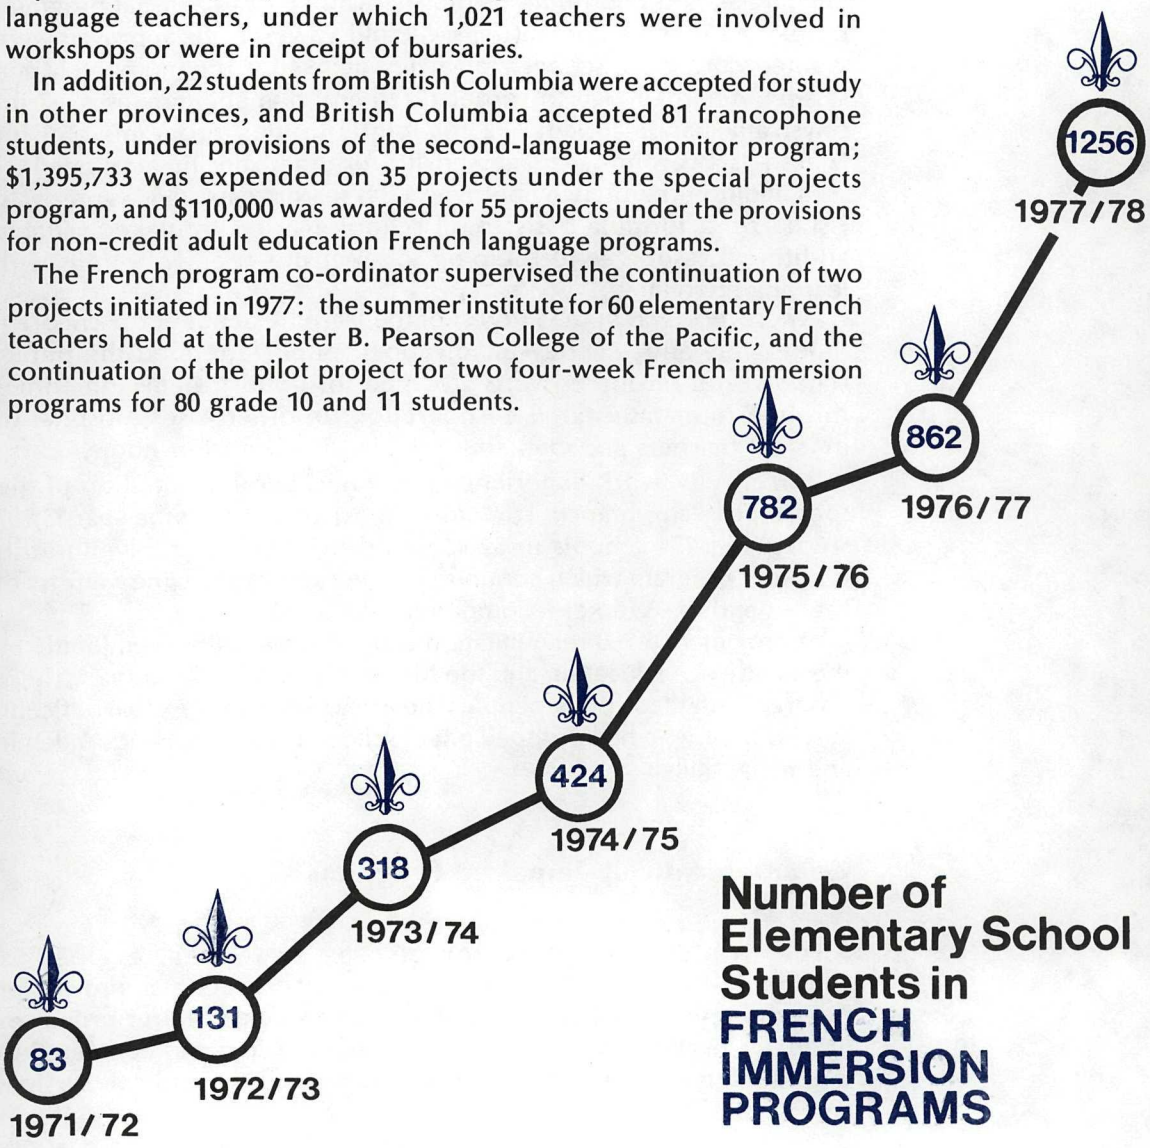
Consultative services continued to be provided to districts and schools and other agencies in many of the specialized fields, including industrial education, pre-apprenticeship programs, pre-career courses, home economics, metrication, programs for the handicapped, tests and measurement, and school libraries. Some of these were provided through seconded personnel, others by members of the ministry staff. The work involved, amongst other activities, assisting in in-service education, advising on program development and on facilities and equipment needs. Consideration is being given to a greater use of the plan whereby highly qualified field-based personnel are brought in to the ministry for particular services and a specified time. Such an approach enables the ministry to respond more effectively in meeting the priority needs of the system, which change from time to time.

French as a Second Language

As a result of the federal-provincial agreement for bilingualism in education, support for French-as-a-second-language programs continued to grow. Specific funding included the distribution of $2,193,528 to school districts for French language support grants, and the expenditure of $321,224 from the program for bursaries to second language teachers, under which 1,021 teachers were involved in workshops or were in receipt of bursaries.

In addition, 22 students from British Columbia were accepted for study in other provinces, and British Columbia accepted 81 francophone students, under provisions of the second-language monitor program; $1,395,733 was expended on 35 projects under the special projects program, and $110,000 was awarded for 55 projects under the provisions for non-credit adult education French language programs.

The French program co-ordinator supervised the continuation of two projects initiated in 1977: the summer institute for 60 elementary French teachers held at the Lester B. Pearson College of the Pacific, and the continuation of the pilot project for two four-week French immersion programs for 80 grade 10 and 11 students.



Educational Support Services

Educational support services are provided by the Ministry of Education to assist in the establishment and maintenance of services which supplement normal services, including a variety of special programs for disadvantaged children, programs for the communicatively-impaired, and native Indian education.

Special Programs

The special programs branch of the schools department is responsible for developing policies and procedures on matters relating to the education of exceptional children and the issuance of special approvals. The special approval is a funding device by which the ministry is able to encourage, and contribute to the shareable cost of, special programs developed in the school districts. All told 1,136 specific approvals were granted during the school year including 194 for the moderately and severely retarded, 120 for hospitalized and homebound cases, 47 for physically handicapped, 192 for jointly-funded programs, 229 for English-as-a-second-language and 104 for other specific local needs.

In addition the branch approved 1,344 learning assistance approvals, issued on a formula basis to all school districts to make available additional resources for helping to meet the needs of pupils with learning disabilities.

Wherever it was in the interest of the learning needs of the children, moderately and severely-handicapped pupils attended the public schools, and resources were provided to support them, sometimes through inter-ministerial co-operation. In other cases, hospital or itinerant teachers provided education in the hospital or home.

Work study/work experience programs, another function of the special programs branch, continued to expand. During the year 13,397 students in 271 schools in 52 school districts were involved in this excellent program which continued to be supported by the Ministry of Labour and the Workers' Compensation Board.

Approximately 200 rehabilitation programs were financed jointly by the Ministry of Education and the Ministry of Human Resources. These programs enabled young people who were experiencing great difficulty at school, or who had dropped out of school, to acquire basic academic and social skills.

Communicatively-Impaired Programs

The Ministry of Education also extended its services to communicatively-impaired students, awarding 85 special approvals for the hearing-impaired and 26 for the visually-impaired. In April, a co-ordinator of the education of the hearing-impaired was appointed to assist districts in developing quality programs and to co-ordinate services among them.

There are now more than 100 specialized teachers of the hearing-impaired working in the province, enabling many of the students to be served according to their needs by local itinerant programs, in district classes for the hearing-impaired, or at Jericho Hill School for the Deaf. Similar programs were developed for the visually-impaired.

Regular inter-ministry discussions and co-operation continued at all levels in the area of speech therapy, the provision of auditory training equipment, school health services and programs for pre-school handicapped children.

Indian Education

To meet the special learning needs of native Indian children, programs were designed which strived not only to develop basic skills but also to reflect the cultural, linguistic and social background of the children.

Programs were implemented in co-operation with the Indian communities to provide native para-professional workers such as home-school co-ordinators and teacher aides, to provide native Indian language and cultural programs for the benefit of all children, and to provide alternative education programs.

Of the total of 1,136 special approvals mentioned above under special programs, 139 went towards Indian education.

DIVISION OF ADMINISTRATIVE SERVICES

The division of administrative services is responsible for a wide range of administrative, regulatory and logistic functions within the educational system in the province, as well as for the Provincial Educational Media Centre, the correspondence education branch, and the publication services branch. The division was created in the spring of 1977 in response to a demonstrated need for an advisory and service link between the Ministry of Education and the school districts.

The central office of the division co-ordinates the flow of information between the ministry and school districts and issues the ministry's circulars. It acts as the executive arm of the schools department management committee.

Provincial Educational Media Centre

While the 1977/78 year was highlighted for the Provincial Educational Media Centre by innovations such as the satellite tele-education project, the centre's main efforts were on the consolidation of resources and the integration of both acquired and original materials to support new ministry programs. Close co-operation with curriculum development committees resulted in the purchase or production of comprehensive sets of learning materials directly related to course objectives. Co-operation with the Ministries of Health and Consumer Affairs led to the creation of attractive multi-media kits representing units of study in nutrition and money management respectively.

As part of an ad-hoc distance education planning group, PEMC served as the control centre for the satellite tele-education project (STEP). Technical, production and program development staff worked closely with several institutions and agencies in a two-month experiment using the satellite to carry educational television programming to various areas of the province. Other PEMC contributions to distance education

included a survey of existing facilities and resources and the publication of *Distance Education,* a bi-monthly newsletter describing distance learning projects and activities throughout the province.

For the second successive year PEMC captured an Ohio Award at the international exhibition of educational radio/television programs. The radio series *Soundscape,* designed to improve listening skills, was described by the judges as "a rare excursion into the mind of the young...warm, soft, tender learning that possesses the listener." Originally carried by CBC, the programs were also distributed in kit form through the audio duplicating service developed by PEMC during the school year. This new service makes possible the packaging and distribution of outstanding radio programs, along with appropriate print materials, in media kits. It complements the successful video duplicating system initiated five years ago.

Due to the increased range and variety of learning resources available from the media centre, a computer-printed catalogue was developed. The new system, which facilitates identification of, and access to, all materials in a given subject area, has now been adopted by several educational media libraries in Canada and the United States.

Correspondence Education

The 1977/78 booklet, *Correspondence Education,* was released in July, 1977, and contained lists of the courses offered by the correspondence education branch. They comprised a wide range of kindergarten, elementary and secondary school courses, together with vocational and special courses for adults.

In the area of course-writing, at the elementary level all mathematics courses were rewritten, and work was begun on science revision. At the secondary level, several new courses were produced—consumer mathematics 10, industrial and trade mathematics 10, and algebra 11 and 12. The curriculum for German studies was totally revised. The new German 12 course, involving full use of audio-tapes, will be in use in 1978/79, and other German courses will be rewritten. A course in beginners' Esperanto, also using audio-tapes, will be available in September, 1978.

In the field of instruction, efforts continued to find ways to individualize teaching to suit the capabilities and requirements of each student. Regular reports were made to the parents of those students taking all their education by correspondence, and to the principals of schools in which students were enrolled in one or two courses.

Further investigations are being made as to how correspondence courses may be used to expand the curriculum offered by small secondary schools, to offer further opportunities for gifted students who wish to take additional or advanced courses, and to offer assistance to students having particular difficulties. The co-operation of school boards in bringing additional resource material to these students is being sought.

The enrolment for 1977/78 changed very little from that of 1976/77.

General enrolment (includes adults as well as school-age persons)

Kindergarten	83
Grades 1 - 7	939
Grades 1 - 7 (serviced from the Dawson Creek sub-office)	120
Grades 1 - 12 (Canadian children living in Iran)	120
Grades 7 - 12	12,362
Total	13,642

Certain groups for whom free instruction was provided

Inmates of institutions	384
Adults receiving social assistance	84
Students unable to attend school through illness	260
Students needed at home	10
Students unable to attend school through distance	324
Recent immigrants	101
Total	1,163

Publication Services

The main function of the Ministry of Education's publication services branch continues to be the purchase, inventory and distribution of learning resource materials to approximately 1,760 public and independent schools in the province. Over three million pounds of material were shipped during the year and learning material invoices in excess of $10 million were processed.

A more equitable distribution of textbooks to schools, based on enrolment, and more efficient inventory control were made possible through the extended use of a computer system. The book repair plan, conducted with binderies located in the B.C. Interior, continued to prove its merit. In 1977/78 approximately 200,000 repairs were made at a significant saving over the cost of purchasing new replacement texts.

The branch continued to act as distributor for ministry publications and also administered the new school library book purchase plan, which provides for the purchase of one copy per school of appropriate titles accepted by a panel of teacher-reviewers. The plan indirectly supports B.C. authors and publishers and has received an enthusiastic response from schools.

Production at the ministry's print services operation continued to increase. During the past year print services was again able to serve every branch of the ministry, producing more than 800 publications. Particular emphasis was placed on core curriculum books for public school programs. The majority of the post-secondary education publications reflected the emphasis being placed on career-vocational areas.

DIVISION OF FIELD PERSONNEL

The division of field personnel is responsible for the recruitment, selection, assignment and supervision of provincially-appointed school superintendents, as well as liaison with locally-appointed superintendents. The division is also charged with teacher certification and document evaluation, co-ordination of in-service programs, international teacher exchange programs and liaison with the faculties of education of the universitites. In addition to the superintendent's office, these functions are carried out by two branches, field services and teacher services.

Field Services

The field services branch provides assistance to school districts on personnel matters and organizes various appeal processes for school personnel as provided for under the Public Schools Act. The branch continued during the school year to act as the co-ordinating and sponsoring agency for a rapidly expanding province-wide in-service training program for school administrators. Through regional and local workshops, administrators were provided professional assistance in a number of appropriate subject areas. Co-ordination with the curriculum development branch enabled the ministry to help administrators and teachers prepare for the introduction of new courses.

Professional development programs for school and district administrators were expanded by the division in both scope and numbers. The division continued to seek methods of assisting administrators to meet all the needs of the school system.

The accreditation of public schools, discussed earlier in this report, continued to be a major responsibility of the division.

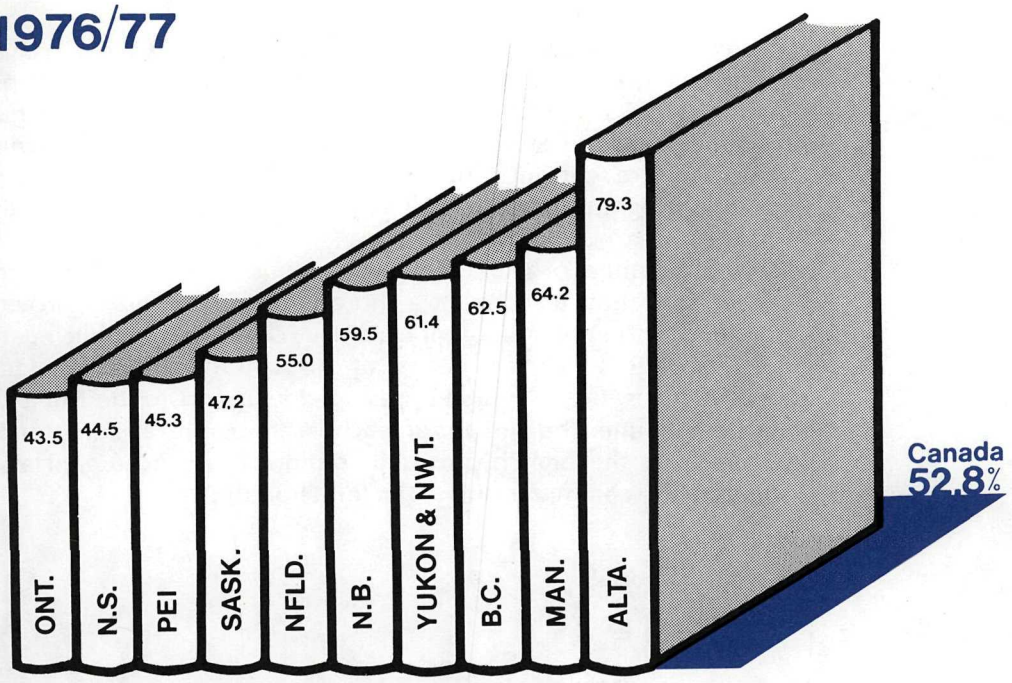
Teacher Services

Teacher certification, international and inter-provincial teacher exchange programs, the co-ordination of professional development activities for teachers, and administrative support for the Joint Board of Teacher Education are the principal responsibilities of the teacher services branch.

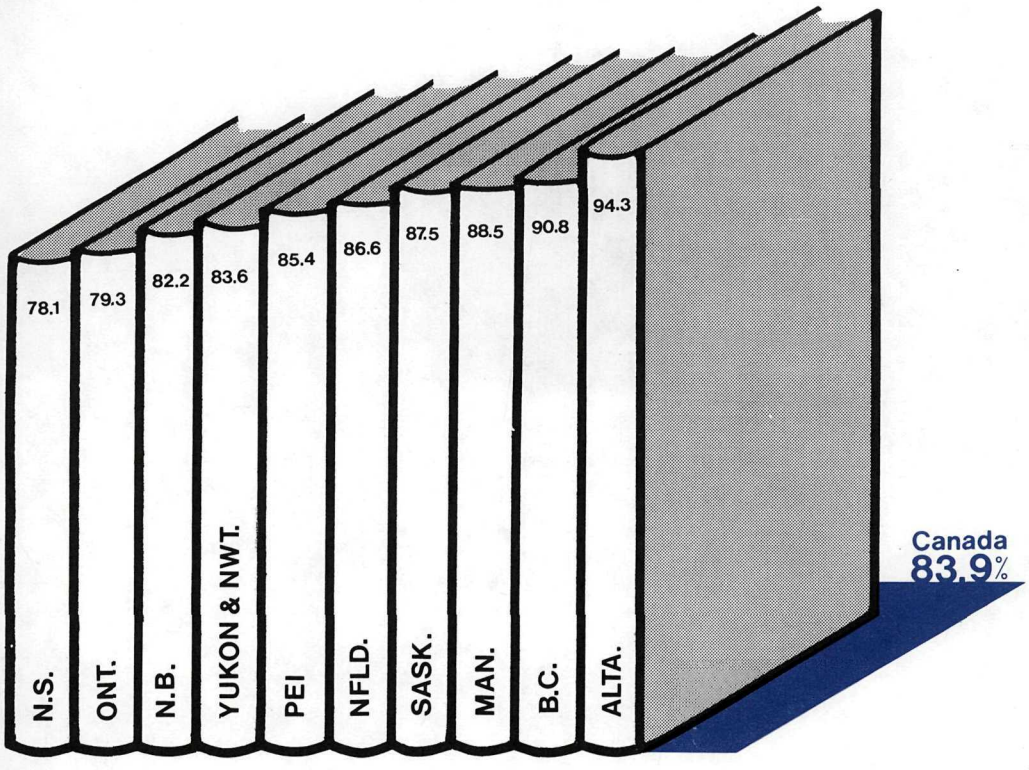
During the 1977/78 school year, the branch assisted with the promotion and administration of 13 regional curriculum workshops in elementary science and chemistry 11 and 12, an elementary French summer institute, a special education program and a number of conferences and workshops in industrial education, environmental education, remedial education, metric measurement, and the teaching of the emotionally-disturbed, the hearing-impaired and the autistic.

Twelve British Columbia teachers received exchange fellowships with Great Britain, five with the State of Queensland, three with South Australia, two with the State of Victoria, two with the Australian Capital Territories, two with the Australian Northern Territories, and two with

1976/77



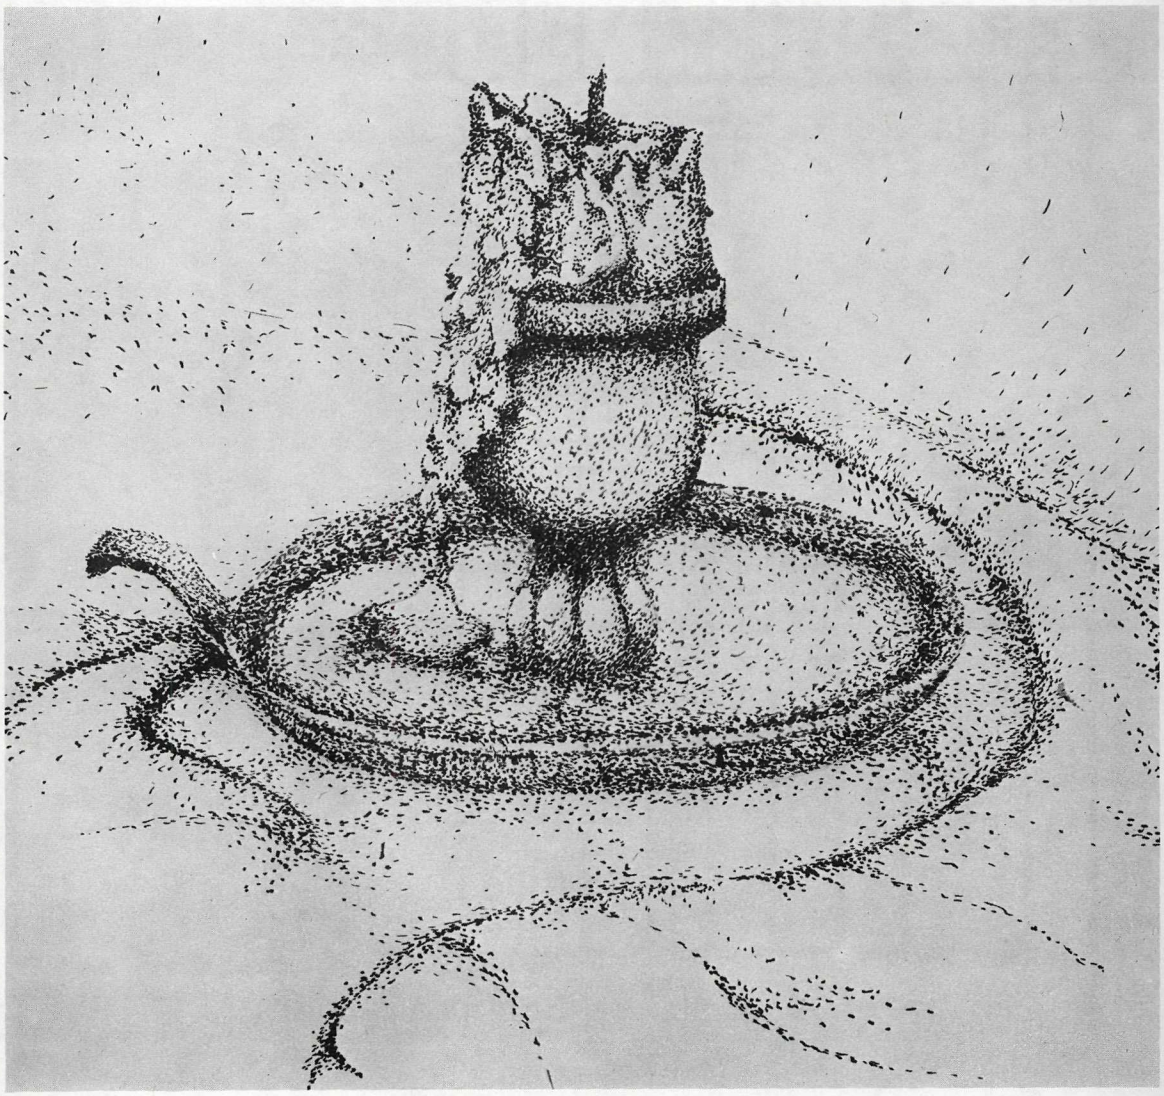
Percentage of ELEMENTARY School Teachers with UNIVERSITY DEGREES



Percentage of SECONDARY School Teachers with UNIVERSITY DEGREES

states in the United States. In addition, the inter-provincial exchange program involved the placement of eight teachers and one principal in Ontario. In 1979, the branch plans to extend the overseas exchange program to include Sweden and the Federal Republic of Germany. Discussions are currently underway to extend the inter-provincial exchange program to include all 10 provinces and Canada's northern territories.

The appointment of a committee was authorized by the Joint Board of Teacher Education to conduct a thorough examination of provincial programs for the preparation of teachers. Following 10 public hearings and meetings with the deans of education and their faculty representatives, the committee presented its report to the Minister of Education in June. The director of teacher services and an administrative assistant from the branch provided administrative and organizational support to the committee and to the joint board.



INDEPENDENT SCHOOLS

In September, 1977, the Provincial Legislature passed the *Independent Schools Support Act* which made provision for financial grants to independent schools meeting certain specified requirements. For the first time since the passage of the *Public Schools Act* in 1872, non-public, fee-charging independent schools were eligible for financial assistance.

The act, which provided for the appointment of an inspector of independent schools directly responsible to the minister, established two levels of grants based on a percentage of the average per-pupil operating cost in the public school district in which a qualifying independent school is located.

To obtain the lower level of grant, a school must satisfy the inspector that it has no program—in existence or proposed—that would in theory or in practice promote or foster doctrines of racial or ethnic superiority, religious intolerance or persecution, or social change through violent action. The facilities of the school must be adequate, and it must have operated as an independent school for at least five consecutive school years, including the school year immediately prior to its application for support.

To obtain the higher level of grant the school must, in addition to the conditions above, meet provincial standards regarding minimal instruction time requirements for course subject areas, have a pupil testing program, agree to co-operate in an external evaluation program, and employ teachers certified in accordance with guidelines set by a teacher certification committee appointed by the Minister of Education.

During the 1977/78 school year 101 schools—with 1,300 teachers and 16,500 pupils— were qualified by the inspector.

The government provided sufficient funds so that the 1977/78 grants (payable in the 1978/79 school year) could be set at 9 per cent and 30 per cent of the average operating cost per pupil in the public schools. This worked out to an approximate average grant of $150 per pupil at the lower level and $500 per pupil at the higher level.

POST-SECONDARY DEPARTMENT

The post-secondary department of the Ministry of Education is responsible for the ministry's input into a comprehensive range of academic, technical, vocational and continuing education programs offered at some 20 colleges and provincial institutes in the province. The department has three divisions—program services, continuing education and management services—each with special responsibilities. In addition, the department provides services to the three advisory councils created under the *Colleges and Provincial Institutes Act* of 1977—the Academic Council, the Occupational Training Council and the Management Advisory Council.

DIVISION OF PROGRAM SERVICES

The program services division was created in 1977/78 to provide co-ordinated program services to the colleges and institutes. Its major thrust during the year was in program development activities.

Extensive work was also carried out on the development of basic policies and guidelines to assist the division in carrying out its other duties, which include monitoring institutional program performance, implementing program research and development projects, and providing means of professional development for college and institute personnel.

In keeping with the expanded scope of its activities, the former curriculum and program development branch was renamed the program research and development branch. It continued its former function of curriculum development, working closely with colleges, institutes and the Ministries of Labour, Health and Human Resources. Among its tasks were revisions to the carpentry and heavy duty mechanic apprenticeship programs and the development of new provincial curricula in early childhood education and home-maker training, currently in progress.

In the research area, two important studies were completed. The technical feasibility of the satellite tele-education program (STEP) was evaluated and specific recommendations made regarding program content, audience participation and technical production. A survey of welders was undertaken and a comprehensive report written recommending changes to the present training system to reflect better the needs of industry.

The branch also co-ordinated several training improvement projects funded by the Canada Employment and Immigration Commission.

DIVISION OF CONTINUING EDUCATION

The 1977/78 year was one of steady growth for adult and continuing education in British Columbia. Following recommendations of the 1976/77 report of the special committee on continuing and community education, several projects were undertaken. Studies on English as a second language, women's programs in post-secondary institutions and adult special education were commissioned. In addition, a directory of all provincial government and adult education programs and services was published and distributed.

In recognition of the need for community education and basic literacy programs, a system was introduced to encourage innovative programming on the part of the various post-secondary institutions. Similarly a French-language special project system was successfully implemented to provide opportunities for adults wishing to learn the French language or to improve their knowledge of the French-Canadian culture.

Within the ministry the school district adult education grant-aid system was maintained with an ever-increasing number of new programs. English for New Canadians classes continued to be a major program area, as did small business management.

DIVISION OF MANAGEMENT SERVICES

In the past year the roles of the division of management services included the monitoring of the efficiency of the system, the allocation of college and institute budgets, the co-ordination of the development of manpower plans, and the provision of administrative services to the department.

One specific accomplishment during the year was the co-ordination of significantly-expanded vocational programming to provide young people with the type of training required to enable them to better compete in the job market. The division also played a major role in the continuing process of developing an overall budgeting and reporting system for the colleges and institutes which will enable the ministry, provincial councils and college boards to make better decisions regarding their allocation of funds to programs.

The division assisted in the implementation of the new *Colleges and Provincial Institutes Act* and with the development and activities of the new councils it created, especially the Management Advisory Council to which it provided the support services.

COLLEGES AND INSTITUTES

The proclamation of many sections of the *Colleges and Provincial Institutes Act* occurred during the school year and as a result a number of new governing bodies and institutions were established. They include the three councils already mentioned and five institutes—the Pacific Vocational Institute, the Emily Carr College of Art, the Pacific Marine Training Institute, the Justice Institute of British Columbia, and the Open Learning Institute. The new institutes, which are designed to serve the whole province in their specialized fields, complement the 14 colleges located throughout the province to meet regional needs.

Enrolment in the colleges and institutes increased enough to more than offset a slight drop in university enrolments. Detailed tables in the statistical section of this report provide the breakdown, but generally there was a large increase in the part-time non-vocational enrolment (15 per cent) and an even larger increase in full-time and part-time vocational enrolment (26 per cent). This information indicates the results of the increased emphasis placed upon vocational education by the ministry.

Academic Council

The Academic Council was established in February, 1978, under authority of the *Colleges and Provincial Institutes Act,* and Dr. Ian McTaggart Cowan was named its chairman. The council was given responsibility for academic transfer programs, the majority of the technological programs at the colleges and provincial institutes, and a number of career programs. In these areas the council is responsible for establishing advisory committees and articulation committees, and for reviewing financial requests and allocating the funds available.

The council will maintain effective contact with the colleges and institutes so as to understand the different circumstances within which each operates, its teaching objectives, the limitations imposed by geography and demography and its plans for the future. To this end the council plans to hold many of its meetings on the college and institute campuses.

Occupational Training Council

The Occupational Training Council was established in April, 1978, and Mr. S.M. Rothman was named chairman. Its mandate is to advise the minister on the allocation of funds for the vocational and career programs under its jurisdiction, to develop industrially-oriented advisory committees, to relate training needs in the province to programs available at the institutions and to develop an occupational counselling service having current and accurate information available to individuals and institutions alike. To date the council has established an occupational counselling sub-committee, and has set up a schedule for participation in the Ministry of Education's budget planning processes.

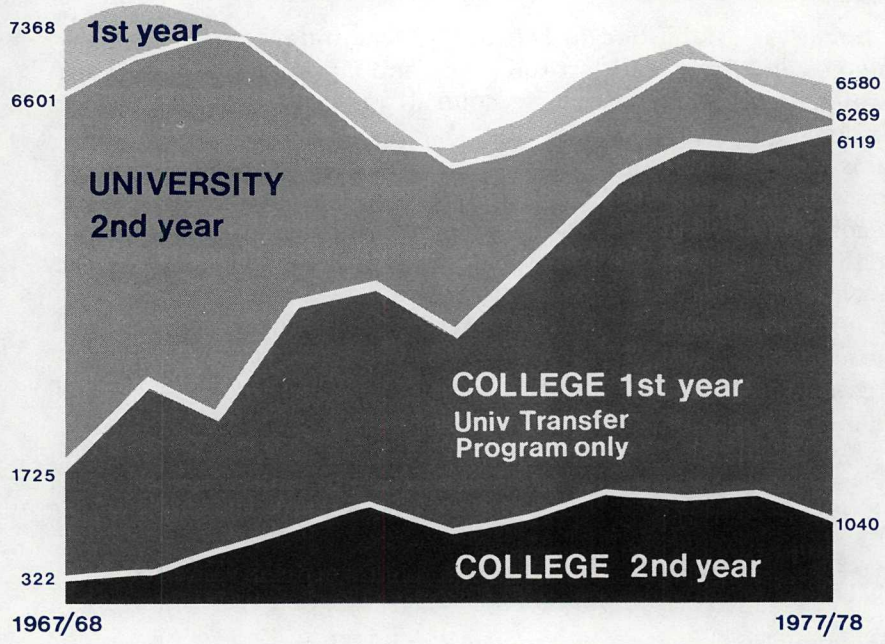
Management Advisory Council

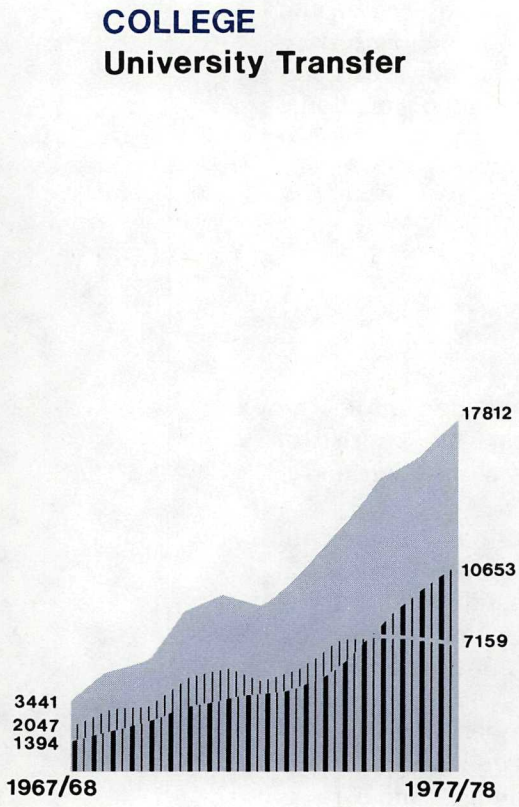
The Management Advisory Council, also established under the provisions of the *Colleges and Provincial Institutes Act,* consists of representatives from all B.C. colleges and provincial institutes and is chaired by the deputy minister of education.

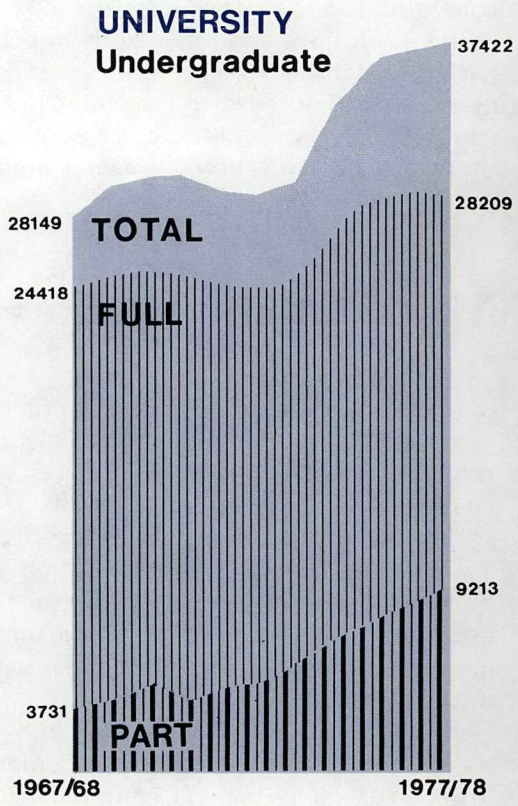
The council's responsibilities are residual, covering programs not assigned to other councils and including also administration, capital building approvals, support services such as libraries and student aid, the development of a budgeting process to serve the various institutions, long-range planning, and personnel relations, functions common to all the institutions.

In addition to an inaugural meeting in November, three regular meetings were held during the year. Committees of council were formed to act on executive matters, continuing education, budgets and bylaws.

Enrolment in Colleges and Universities



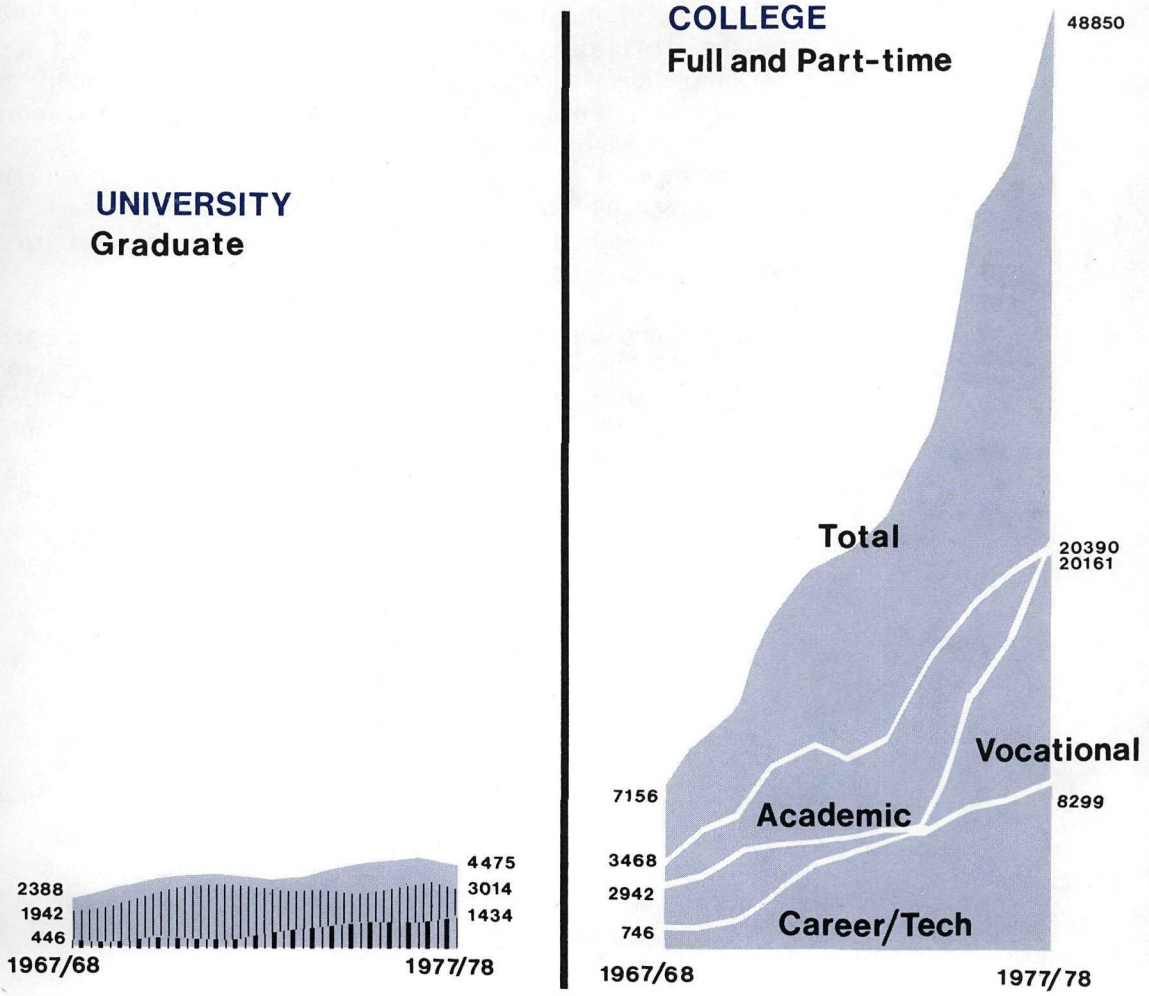




UNIVERSITIES

The three provincial universities reported a total of some 50,000 students enrolled in degree programs. Of this total some 32,000 were full-time students and 18,000 part-time, summer and inter-session students. Approximately 10 per cent of the total were graduate students.

The figures represent a slight decline from the 1976/77 year and generally this decline was equally distributed among the three universities and the various types of students. A detailed table on enrolments can be found in the statistical tables in this report (see page 153).



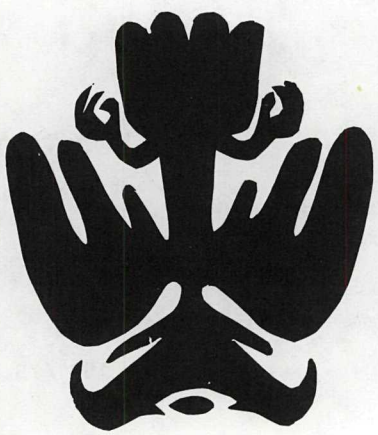
Universities Council of British Columbia

The Universities Council of British Columbia was formed in 1974, subsequent to the proclamation of the *Universities Act (1974)*. Its purpose is to encourage the systematic development of university education and to bring about a greater degree of public accountability for university expenditures. The council serves as an intermediary body between British Columbia's three universities and the provincial government. Dr. William Gibson was named chairman of the council during the academic year, replacing Dr. William Armstrong who assumed the post of executive director of the newly created Science Council of British Columbia.

The council undertook and completed several tasks during the fiscal year. Among the most significant activities were:

- Examination of a series of program proposals to meet post-secondary needs in the B.C. Interior.
- Completion of a policy statement on faculty responsibilities with regard to consulting, supplementary income and related activities.
- Co-ordination and facilitation, in concert with the Ministry of Education, of the medical teaching expansion project of the University of British Columbia.
- Completion of an examination of student aid programs for British Columbia residents, and the submission to the minister of a report containing recommendations.
- Funding of a computerized cataloguing system for provincial libraries, which is expected to be fully operational in five years.
- Participation in the organization of a space inventory and space entitlement project.

In its third annual submission to the provincial government, the council requested $202,487,000, a 9.7 per cent increase over the actual grant for 1977/78. Appended to this request was a further recommendation for two supplementary operating grants, one to support the expansion of the 1978/79 medical undergraduate program at the University of British Columbia, and one to fund 1978/79 non-metropolitan university programs recommended by the Interior University Programs Board and approved by the council.



DEPARTMENT OF MINISTRY SERVICES

The department of ministry services is responsible for many of the activities of the ministry which, though not strictly educational, form the infrastructure which makes the delivery of educational programs possible—finance, facilities services through which buildings and equipment are provided, data services, and various ancillary services.

During the past year the department concentrated on the continuing improvement of ministry management systems. For example, extensive improvements were made in budgeting processes, both for internal use and for capital approval management. In addition, new efforts were made to develop long-range planning systems for the ministry and its field agencies. Five-year forecasts were developed and analyzed in a number of sectors.

This planning effort increased the intensity of co-operation between the ministry and the central agencies of government. The department of ministry services has become the focal point for these agencies and the conduit through which they are involved in long-range fiscal and physical plans. The agencies include the Treasury Board, the Government Employee Relations Bureau, the Public Service Commission, the B.C. Systems Corporation, and the B.C. Buildings Corporation. This activity will continue to increase as the ministry further develops and integrates its planning and management systems.

DIVISION OF FINANCIAL SERVICES

The division of financial services is organized into three branches—ministerial finance, schools finance and post-secondary finance.

Ministerial Finance

The ministerial finance branch is a service section of the division and is responsible for internal finance, including the co-ordination of the budget process for the ministry's annual estimates. In addition, the branch is responsible for monitoring and maintaining records of all expenditures and accounts payable and for assisting all other ministry branches in the administration of financial matters. The Ministry of Education budget for the 1977/78 fiscal year was $947,709,405—more than 24 per cent of the entire provincial budget.

Submissions of all claims under federal-provincial cost-sharing programs are directly prepared by the branch or audited by it before being presented to the federal government.

Schools Finance

The main function of the schools finance branch is to monitor the expenditures of capital and operating funds in all school districts. The branch analyzes the budgetary requirements of the districts, calculates the value of the instructional unit (the basis on which operating grants to districts are determined), advises the government on the effects of various levels of funding, recommends the mill rates which should be established for property taxes for school purposes, and calculates the grants payable to each district.

For the 1977 calendar year, school district expenditures exceeded one billion dollars (see table no. 3.4 for details). Prior to the 1977 budgets being finalized, budget reviews were conducted in selected school districts by senior staff of the division.

Between July 1, 1977 and June 30, 1978, 85 capital expense proposals, amounting in total to more than $135,000,000 in borrowing authority, were processed. This amount, an increase over 1976, was due in part to a carry-over from the 1976/77 capital budget year. Capital expense proposals provide borrowing authority to the school districts for the acquisition of capital assets in the form of land, buildings and equipment. The actual cost is met by the sale of debentures through the British Columbia School Districts Capital Financing Authority.

During the year the branch provided assistance and information to the joint education management (JEM) project team,which is engaged in the investigation of processes designed to develop comprehensive reporting and management systems for the benefit of both the school districts and the ministry.

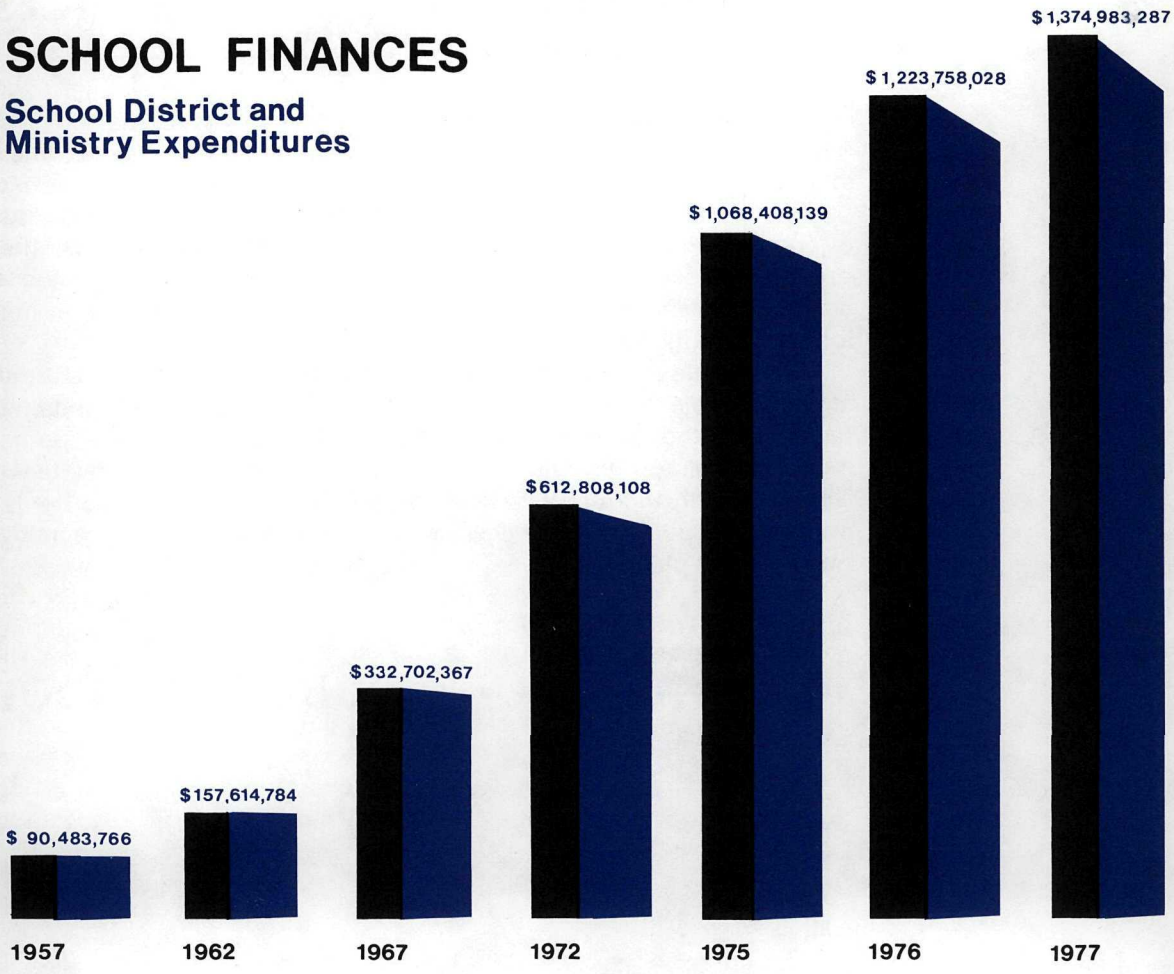
Post-Secondary Finance

In 1977/78 the post-secondary finance branch accomplished two primary goals. The first was to become more effective in analyzing college budget requests, monitoring their expenditures in relation to approved budgets, and estimating future requirements based on actual financial performance and future growth projections. The second goal was to provide greater assistance to the colleges in the form of operational audits, one of which has been performed to date, and to provide indirect assistance in the form of documentation and procedure manuals. A college expenditure reporting manual was developed and distributed to the colleges, as well as a manual on budgeting procedures.

Post-secondary finance was also involved in the negotiation of a new federal-provincial Adult Occupational Training Agreement to govern vocational training courses conducted on behalf of the British Columbia Ministry of Labour and the Canadian Employment and Immigration Commission. Approximately 40 per cent of all vocational training carried out in the province is purchased by these two agencies.

SCHOOL FINANCES

School District and Ministry Expenditures



Student Services

Approximately one-third of all post-secondary students applied for student aid under the British Columbia student assistance program during the 1977/78 fiscal year. In all, 18,130 loans and 13,300 grants to students were authorized. The average loan and grant was $1,155 and $667 respectively.

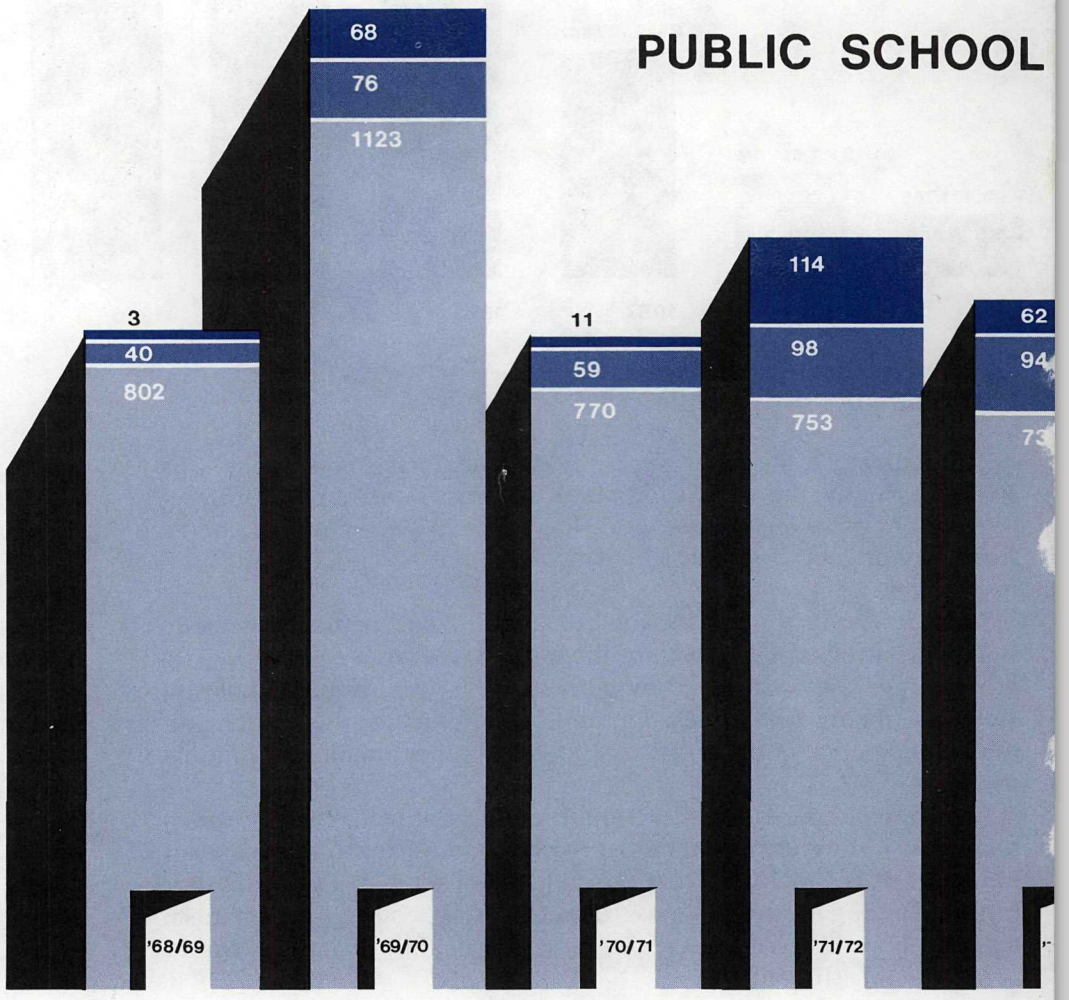
The work-study program by which on-campus jobs are found for needy students, started on a pilot basis by the student services branch during the previous year, was endorsed by both students and institutions during 1977/78. Funding was increased three-fold to meet the growing demand for supplemental jobs to assist students to meet their educational expenses.

The student services advisory committee, in conjunction with the post-secondary institutions, compiled a provincial model for student services functions. It is anticipated that this model will serve as a guideline for future planning in such areas as student housing, counselling, financial aid, athletics and recreation, registration, student information and other areas affecting student life.

DIVISION OF FACILITIES SERVICES

The facilities services division of the ministry services department is responsible for the co-ordination and development of physical facilities for public schools and post-secondary institutions. During the past year it continued to improve its capacity to respond to capital program requests by completing the staffing of six teams, each assigned to a region of the province. The team system has reduced the number of persons a school district or college must contact in order to develop a capital program and follow it through to completion.

A capital budget procedure was developed to allow for closer scrutiny of capital projects, necessitated by declining enrolments and spending restraints. Although the capital budget has a fixed overall total, some individual changes were allowed to provide flexibility. Each regional team was continually in touch with its school districts and colleges in order to provide a proper level of service and to ensure that programs were being carried out as planned.



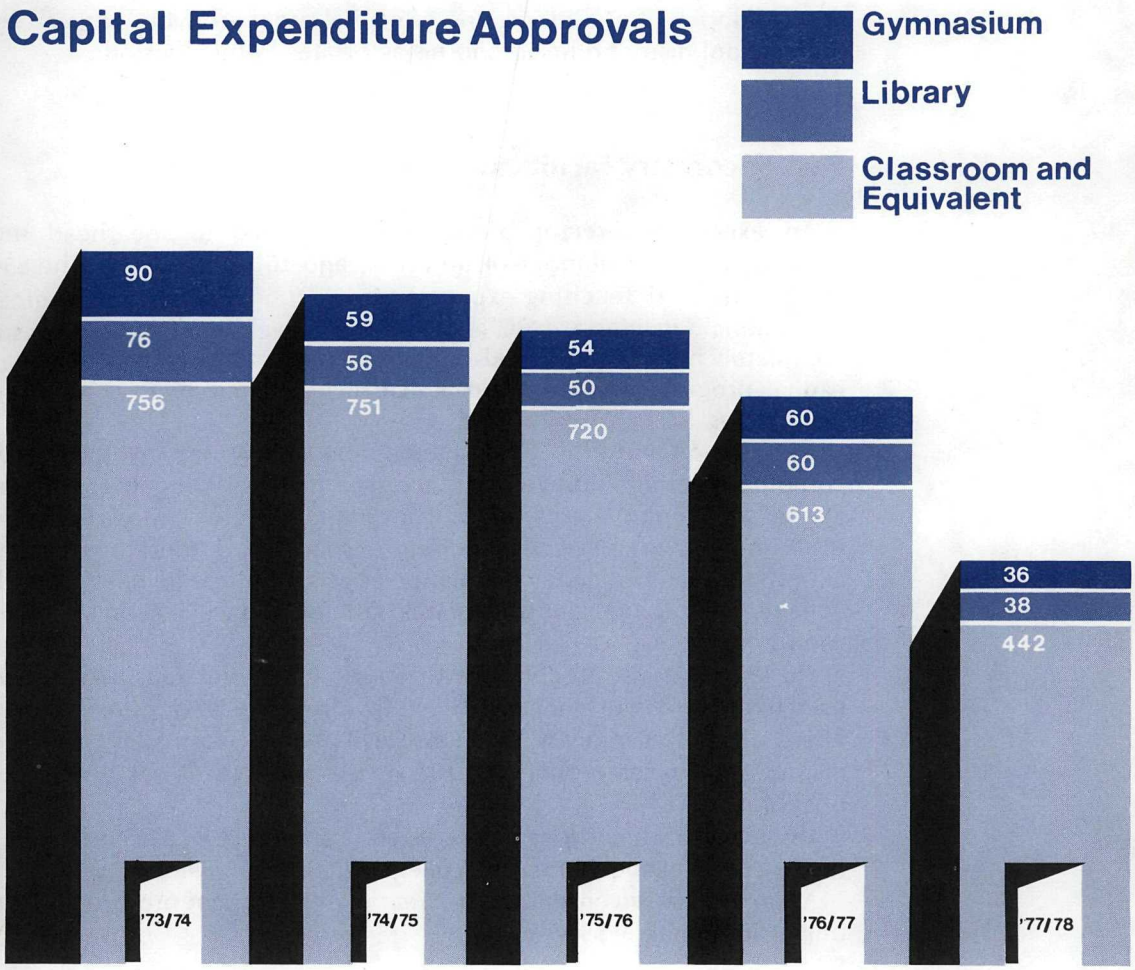
Schools Facilities

To ensure proper planning the senior architect—planning spearheaded studies on the long-term planning of facilities in a number of school districts. Each study takes into account the future of the school district, recognizing particular criteria such as anticipated commercial growth, and the enrolment projection.

With the assistance of the provincial schools equipment advisory committee, the division continued to review and adjust capital equipment allowances. In 1978 capital funding was provided for the additional equipment needed as a result of changes to the chemistry 11 and 12 curricula, and for the first time capital funding was made available for the replacement of some major industrial education equipment.

Facilities services, in co-operation with the joint educational management (JEM) projects team, began a program to computerize the facilities inventory and analysis process, the first phase being the listing of school facilities. This project includes a detailed quantitive analysis of

Capital Expenditure Approvals



current space, not only for schools but also for bus garages and administrative and maintenance offices. Each school district will automatically be provided with its relevant data, and those wishing information on other school districts may receive it on request.

While demand for new school facilities continued to decrease, there was a considerable need for renovations to bring buildings up to current standards for program needs, safety and fire protection. The division approved 755 building projects during 1977, but only 22 were new school buildings and five of those were fire replacements. Renovations accounted for a great deal of the total work.

Capital expenditures for schools in the 1977 calendar year (Section 190 PSA approvals) were:

Sites	$11,250,242
Buildings	69,256,538
Equipment	12,582,715
Other	7,405,406
Total	$100,494,901

The staff of the ministry was saddened by the untimely death in June of Fred Simpson, senior architect—schools, a man closely associated with the development and processing of capital programs who is missed by both school district officials and his associates in the division.

Post-Secondary Facilities

An executive director of projects was hired to spearhead the development of a number of university and college projects. The $54 million medical teaching expansion project, incorporating medical educational facilities at UBC and five Vancouver area hospitals, was a completely new departure. Also the first phase of a university five-year capital program was launched which included buildings at all three universities.

The division and the JEM team compiled an inventory, which is now computerized, of all university space. The inventory, together with an agreed set of entitlements, allows true comparisons to be made between institutions. The result is that future space, and therefore capital allocations, can be made on a planned basis. A similar inventory for all colleges and provincial institutes was initiated and will be completed as soon as possible.

These inventories, together with enrolment projections, have been used to prepare five-year capital plans for all post-secondary institutions. These allow the ministry to level out its capital cash flow, and the institutions to carry out longer-term planning than was previously possible.

The plan for universities envisages an expenditure of $155 million for the five years, while that for the colleges totals $125 million.

Approval was given during the year for new capital projects for the universities totaling $50,500,000.

For the colleges and institutes, capital expenditures in 1977 were:

Sites	$1,025,465
Buildings	4,054,985
Equipment	3,500,208
Other	475,639
Total	$9,056,297

Educational Data Services

During the school year the educational data services branch provided a wide range of services at both the public-school and post-secondary levels.

In the public schools sector, requests for information to be used for monitoring and planning purposes continue to increase in frequency and complexity. To meet these requests with timely and accurate data the public schools sector continued, in co-operation with the B.C. public schools statistics committee, to revise the forms used to collect the data. For example, a major revision was undertaken in the format of Form J (teachers' qualifications and teaching assignments) and the revised form will be used during the 1978/79 school year.

Work continued within the public schools section on the catchment area forecasting model. This is a pilot project being carried out in four districts to develop a model to project enrolment from various areas within districts. Initially the model is for secondary school catchment areas, but it is possible that further refining of the model, to enable it to make predictions for elementary schools catchment areas, will take place in the future.

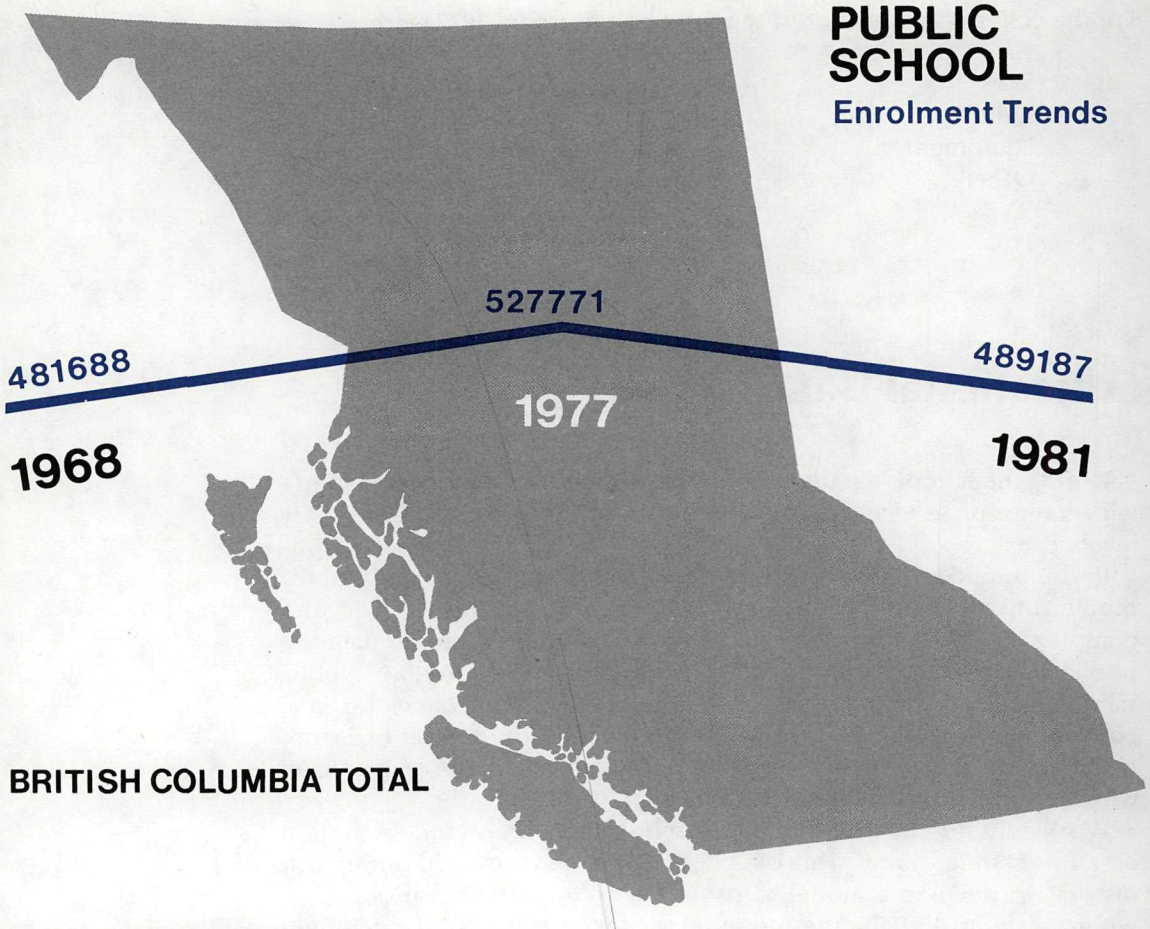
Meetings were held during the year with representatives of Statistics Canada to consider the design of the Statistics Canada library form which will be distributed during the coming school year to all public schools in Canada. Educational data services also arranged to receive 1976 census data, by school district, from Statistics Canada. It was to be summarized and made available in booklet form during the early part of 1979.

In the post-secondary sector statistical coverage continued to increase at a rapid rate. For the first time statistics on college and institute library services (for 1976/77) were gathered and published. All college and institute libraries were surveyed and the resulting statistics covered almost 800,000 items of library material.

Also for the first time, continuing education statistics (for 1976/77) were published. The project was undertaken jointly with Statistics Canada and the resulting publication covered one-third of a million course registrations.

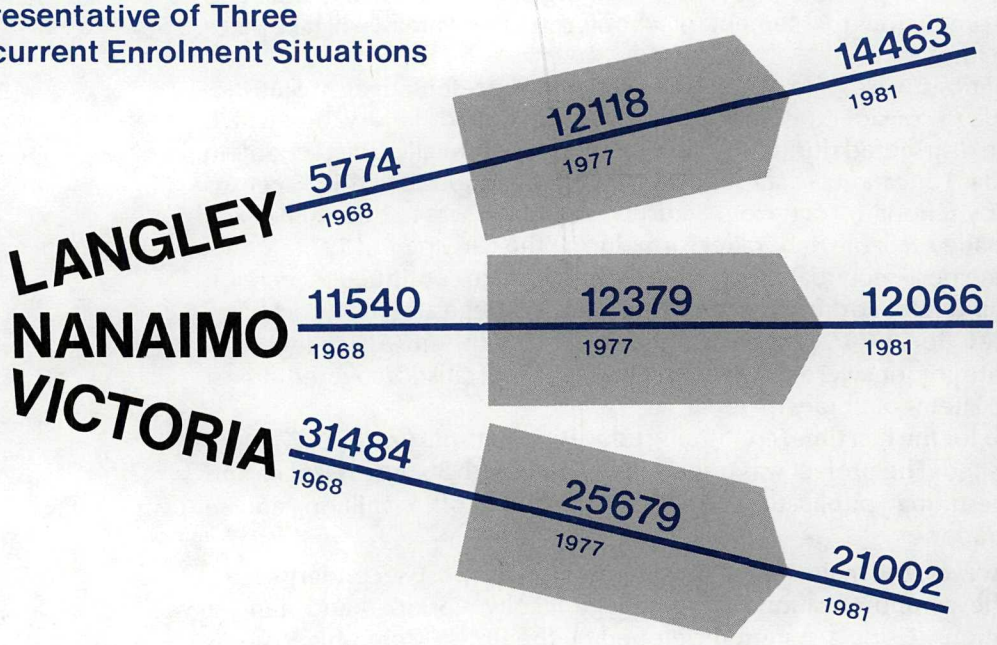
However, the main area of development in the post-secondary sector was the computerization of the college faculty workload and staff list operations. Using a system developed by the British Columbia Systems Corporation, the branch was able, for the first time, to carry out detailed

PUBLIC SCHOOL
Enrolment Trends



BRITISH COLUMBIA TOTAL

School Districts Representative of Three Concurrent Enrolment Situations



analyses in this area. A wide range of information was published which included costings by institution for instruction, services and professional administration. Over 3,500 full-time and part-time professional and instructional staff members were surveyed.

The branch arranged for the microfilming and indexing of material from 1946 to 1976. With micro-filming completed, an index was made for every reel, allowing for quick access to historical statistical data.

Information Services

Emphasis of the Ministry of Education on post-secondary development, fiscal responsibility and co-operative management of the school system was reflected in the activities of the information services branch during the 1977/78 academic year.

Against the background of such recurrent activities as publishing the monthly *Education Today* tabloid, composing press releases (a total of 86) and compiling the 106th annual report on education, the information services branch completed the first stage of an extensive examination of communications in search of ways to improve contact, co-operation and better management at all levels of the education system. Initial results included establishment of a ministry-wide internal communications

committee and a fortnightly bulletin for managers, and approaches to the association of education information officers with the object of enhancing its role in the B.C. education system.

Ministry emphasis on educational finance was reflected during the year by several special features in *Education Today* and widespread distribution of a broadsheet explaining the cost-sharing formula.

The information services branch in 1977/78 was particularly involved in such post-secondary developments as the satellite tele-education project, launching a promotional campaign in the communities involved and seconding an information officer to the planning group. Information services prepared background documents on distance education and the newly-established Open Learning Institute, and in the latter part of the year began development work on a comprehensive exhibit on distance education to be circulated throughout the province.

Library

The ministry's library continued to act as a source of information for staff in the ministry and for school district superintendents as well as other government ministries, related educational organizations and members of the public needing material not available elsewhere. Increasing use of major library resources in British Columbia was made possible by the computer output microfiche (COM) catalogues of university holdings, funded by the Ministry of Education.

On-line access to ERIC (Educational Resources Information Centre) and other data bases has been made available through the co-operation of the Legislative Library.

Metric Conversion

During the year the metric conversion branch organized and conducted 22 three-hour metric training seminars for municipal and regional district personnel, and 21 for real estate associations, fire prevention officer associations, the B.C. Construction Association and vocational school and community college personnel. It also conducted 11 two-day seminars and workshops for school district directors and supervisors of instruction.

In addition, information booths and displays were manned at various gatherings and 22,480 training aid kits were distributed.

RESEARCH SECRETARIAT

In December, 1977, an external research advisory committee was established with 10 members appointed by the Minister of Education. With approval by the Legislature of the Science Council of British Columbia Act in June, 1978, this committee evolved into the B.C. Science Council with an authorized membership of 15.

In March of 1978, the Research Secretariat was established. In addition to providing staff support to the Science Council, the Research Secretariat offers services to the internal research advisory committee which advises on policy for "in-house" research in government departments.

As part of its activities last year, the Research Secretariat advised the Minister of Education on the establishment of discovery parks—research parks associated with the universities.

The secretariat also has set up procedures by which a scientific advisory committee evaluates the applications for research funds received by the B.C. Health Care Research Foundation.

Two research fellowship programs have been established to encourage applied research and development in B.C. universities and to retain highly qualified manpower in the province. The graduate research engineering and technology (GREAT) awards provide financial support of $6,000 per year to graduate students at B.C. universities who work on research projects which are relevant to the interest of a collaborating industry or business organization. The industrial post-doctoral fellowships provide a subsidy of $12,000 per year to any B.C. industry employing a person holding a Ph. D. degree. The terms and nature of the employment are negotiated by the candidate and the employer. To date some 15 industrial post-doctoral fellowships and 12 GREAT awards have been made.

The Science Council of B.C. has already selected several areas of applied research which seem to have high priority for B.C. and is preparing recommendations for the funding of these projects.

TOTALS	1,611	269,916	257,855	527,771	100

Source: September 1977 Form B.
[1]Actual enrolment is defined as the number of pupils actually enrolled for whom an attendance record is required to be kept as of the reporting date.

In addition to the number given above, there were enrolled:

Secondary school correspondence classes, regular students (exclusive of the 3,180 officially registered in other schools)	2,303
In the elementary school correspondence classes, regular students	1,084
Under section 20 of the Public Schools Act, pupils receiving instruction	24
	3,411

Table 1.2 DISTRIBUTION OF PUPILS BY GRADE AND SEX

The following table provides a distribution of pupils by grade and sex for September 1977 and a comparison of the totals with September 1976.

Grade	Male	Female	Total Sept. 1977	Total Sept. 1976	Ratio 1977:1976
Secondary					
Grade XII	18,132	18,822	36,954	35,919	1.029

N = Number of teachers from that jurisdiction who hold the type of certificate shown expressed as a percentage of:

A = Percentage of teachers from that jurisdiction holding all types of certificates.

B = Percentage of teachers from all jurisdictions holding that type of certificate.

C = Percentage of teachers from all jurisdictions holding all types of certificates.

[1]Including Professional Advanced, Professional Basic and Professional C certificates.

[2]Including Elementary A certificates.

[3]Including Elementary B certificates.

[4]Including 20 Vocational Instructor's certificates.

[5]Including 23 Vocational Instructor's certificates.

Note: One teacher has been excluded from September 1977 figures because of missing information. Total number of teachers was 28,820.

Source: Form AD — 77-10-31, Division of Financial Services.

Note: Calculation of F.T.E. pupils — each Grade I through XII pupil is counted as 1.0; each Kindergarten pupil is counted as 0.5.

Calculation of F.T.E. teachers — part-time as well as full-time teachers are counted. Each part-time teacher is counted according to the appropriate decimal fraction of full-time (i.e., a half-time teacher is counted as 0.5). All district-wide (i.e., directors of instruction, supervisors, teacher consultants, coordinators, district librarians, district counsellors, relieving teachers, etc.) as well as school-attached

[1]Average daily attendance as a percentage of FTE net enrolment. Since 1968/69 percentage of attendance is total actual attendance as a percentage of total possible attendance.
[2]The total expenditure for public schools was borne by the Government.
[3]Excluding unknown expenditure made for incidental expenses in city school districts.
[4]Since 1922/23 this amount includes the annual grant from the Government to the provincial universities and since 1963/64 to school district and regional colleges.
[5]Since 1955/56 this amount is exclusive of capital expenditures from by-law funds.
[6]The numbers of teachers reported from 1966/67 on include district-wide teachers with supervisory and administrative duties. These district-wide teachers were excluded from this table prior to 1966/67.
[7]Since 1973/74 the number of teachers is reported as of September 30 rather than June 30.

Table 3.2 EXPENDITURE FOR EDUCATION — CALENDAR YEAR 1977
(EXCLUSIVE OF CAPITAL EXPENDITURE FOR BY-LAW FUNDS)

Total Expenditure by school districts (including Colleges)			$1,034,332,782
Add:	Ministry of Education expenditure for administration, correspondence school, teachers' pension fund, free textbooks and maps, insurance, adult education, vocational and technical schools, grants to colleges, universities and school districts, etc.	$924,061,219	
Less:	Government grants to school districts included in school district expenditures		
	Direct grants	$438,661,901	
	Grants to reduce local taxation	144,748,813	
	Total Government grants to school districts	583,410,714	
	Gross total other Ministry of Education expenditures		340,650,505
	Grand total expenditure		$1,374,983,287

Table 3.3 COST PER PUPIL — CALENDAR YEAR 1977

Grand total cost of education		$1,374,983,287
Deduct: School district expenditure not affecting pupil cost:		
Colleges and other non-operating expenditures	$ 82,043,232	
Debt charges	89,734,670	
Current non-shareable capital	9,221,928	
Total school district reduction	$180,999,830	
Ministry of Education expenditures for post-secondary and adult education, correspondence school, technical and vocational schools, grants to colleges not included in school district deduction, universities, etc.	270,248,093	451,247,923
Total operating costs		$923,735,364
Operating cost per pupil based on average daily attendance of 478,792.4		$1,929.30

TABLE

7.1 Degree enrolment in British Columbia universities, 1977/78 156
7.2 Undergraduate students, (full-time plus part-time) enrolled for credit at British Columbia universities, by faculty for fall 1977 157
7.3 Graduate students, (full-time plus part-time) enrolled for credit at British Columbia universities, by faculty for fall 1977 158
7.4 University regular teaching faculty by rank, fall 1977 159
7.5 University regular teaching faculty by faculty, fall 1977 160

Table 7.1 DEGREE ENROLMENT IN BRITISH COLUMBIA UNIVERSITIES, 1977/78

	University			
	British Columbia	Victoria	Simon Fraser	Total
FULL-TIME				
Undergraduate	17,988	4,937	6,130	29,055
Graduate	2,120	261	583	2,964
Subtotal	20,108	5,198	6,713	32,019
PART-TIME[2]				
Undergraduate	8,849	3,530	3,637	16,016
Graduate	1,389	294	360	2,043
Subtotal	10,238	3,824	3,997	18,059
TOTAL	30,346	9,022	10,710	50,078

Source: Universities Council of B.C. Data are for fiscal year 1977-78.

Note: [1] Academic year equivalent enrolments are computed as follows:
— UBC and U.Vic.: the sum of the enrolments of the summer session and inter-session added to the part-time enrolments of December 1.
— SFU: for undergraduates, it is the sum of the enrolments of summer, fall and spring enrolments and of the summer session and inter-session, divided by two (summer and inter-session enrolments are part-time only). For graduates, it is the sum of the enrolments of the summer, fall and spring semesters, divided by three.

[2] Part-time enrolments include on and off-campus part-time enrolments as well as the enrolments of summer and inter-session. In addition, it includes correspondence enrolments at UBC.
